After briefly tracing the history of Cyprus, Commander Noble gave detailed particulars of the part played by the Greek Government in actively campaigning for *enosis* and supplying arms, ammunition and money to the terrorists—mentioning, *inter alia*, that arms and ammunition had been supplied from Greek Army sources and money from Government sources; that Cypriot students studying in Greece had been trained by Greek Army officers as saboteurs; and that broadcasts from Athens Radio had incited Cypriots to violence and murder. He quoted an extract from the captured diaries of Colonel Grivas which showed that the diplomatic bag of the Greek Consul-General in Cyprus had been much used for sending arms from Greece to Cyprus. One of the principal objects of the Greek campaign, he said, was to create conditions in Cyprus which might "give colour to the Greek case in the U.N."—in which connexion he charged that major acts of terrorism had been deliberately timed to coincide with the consideration of the Cyprus question by the United Nations.

Greece (Commander Noble continued) could not have hoped for U.N. sympathy if she had stated openly that she aimed at annexing the island. She had therefore fastened on the principle of self-determination—a principle which was recognized by the Charter and which the British Government accepted as a guide for its policy toward non-self-governing territories. "We have specifically affirmed our recognition of the principle of self-determination in regard to Cyprus," he said. "But what the Greek Government has

done is to try to make out that the U.N. is under an obligation to secure self-determination irrespective of the circumstances. In fact, the application of self-determination without any regard to circumstances would be subversive of established government everywhere and could only lead to chaos. The question of the circumstances in which the principle of self-determination can be applied in any of the territories of a member-State is clearly an internal matter for that State. It is not a matter in which another State can ask the U.N. to intervene."

After setting forth the British constitutional proposals for Cypriot self-determination, Commander Noble concluded: "We shall of course go on searching for a solution. This will not be found so long as Greece will not content herself with less than *enosis* or the prospect of *enosis*. Nor will it be found until those who support *enosis* are willing to allow the Cypriots to live in peace and to express their opinions free from intimidation. If Greece will face the realities of the situation, some solution can be found. Every day that the terrorist campaign continues imposes a dangerous strain on the relations between the communities in the island, and further poisons relations between Greece, Turkey, and the United Kingdom . . ."

M. Selim Sarper (Turkey), in a lengthy speech, laid stress *inter alia* on the juridical status of Cyprus under the Lausanne Treaty, underlined the geographical and strategic importance of the island to Turkey's defence and security, and strongly denounced the "Greek propaganda for the annexation of Cyprus." He declared in this connexion: "We are told that Greek-speaking Cypriots do not want to be under British rule; have partisans of Greek annexation pondered upon the fact that the Turkish Cypriots do not want to be under Greek rule? . . . The composition of the population of Cyprus has varied throughout history, including recent history. There were times when Turks were in the majority and other times when it was the opposite. Basing themselves on the coincidence that there are today more Greeks in Cyprus—260,000 more to be exact—they tell us that the fate of this island, which is geographically a part of the Turkish mainland, should be sealed forever by its annexation to a country 700 miles away. This, we are told, is self-determination. But what about the self-determination of the more than 100,000 Turkish Cypriots on the island? Or is self-determination a right which is inherent only to those who speak Greek?"

In the course of his speech M. Sarper pointed out that "while Greek terrorists in Cyprus have killed more Greek Cypriots than they have murdered Turks and Britishers combined," there had never been in the island "a single case of a Turk murdering another Turk for his political beliefs, or of Turkish religious officials threatening their followers with excommunication or the fires of hell for political ends." After giving numerous instances of the anti-Turkish campaign in Greek newspapers, radio, and schools, M. Sarper declared that the General Assembly could best contribute to a solution of the Cyprus problem by (1) calling upon Greece "to put an end to its support of terrorism in Cyprus," and (2) encouraging "the renewal of negotiations among the parties concerned with a view to arriving at a rapid and peaceful solution of the Cyprus question, and to refrain from endeavouring to formulate within the Assembly the concrete solutions which can only come about through such negotiations."

In the ensuing debate the Panamanian delegate presented a draft resolution calling for a five-man committee to make an on-the-spot investigation in Cyprus, in co-operation with the British, Greek and Turkish Governments, and to report to the next session of the Assembly, with such recommendations as it deemed appropriate. The U.S. delegate (Mr. Wadsworth) believed, however, that neither the Greek, British not Panamanian resolutions would contribute to a solution of the problem, and appealed for the Cyprus question to be settled outside the U.N. by "quiet diplomacy" between the countries concerned. After appealing to Greece and Britain to withdraw their resolutions, he said that the U.S.A. was prepared to assist the Governments and peoples concerned, "with all of whom we have the closest friendship," in arriving at a "constructive solution" of the problem." Mr. Boland (Irish Republic), speaking "as an Irishman," said that whatever solution was adopted for Cyprus, it should be "anything but partition."

After further debate, the above-mentioned Indian resolution was presented by Mr. Krishna Menon and was accepted by both Greece and Britain, who agreed not to press their original resolutions. It was adopted by the Political Committee on Feb. 22 by 76 votes to nil, with Afghanistan and Panama abstaining, and by the full Assembly on Feb. 26 by the majority stated.

Eoka Offer to suspend Terrorist Activities.

An offer by the Eoka organization to suspend terrorist activities as soon as Archbishop Makarios was released was contained in leaflets distributed throughout Cyprus on March 14 and signed "Dighenis" (the pseudonym for Colonel Grivas). The leaflets said that this decision had been taken "in the spirit of the U.N. resolution expressing the desire to see a peaceful solution of the Cyprus problem on the basis of the U.N. Charter," and "to facilitate the resumption of negotiations between Britain and the real representative of the Cypriot people, Archbishop Makarios."

After telephone consultations with Mr. Lennox-Boyd, Sir John Harding flew to London on March 18 for talks with the Colonial Secretary in connexion with the Eoka offer and with the Cyprus situation generally. The Governor also attended a Cabinet meeting presided over by Mr. Macmillan.

NATO Mediation Offer. - Acceptance in Principle by Britain and Turkey. - Rejection by Greece.

The Secretary-General of NATO, Lord Ismay, sent letters during March to the British, Greek and Turkish Governments (the text of which was not published) tendering his good offices for conciliation in the Cyprus dispute, in accordance with the resolution on the peaceful settlement of disputes between NATO member-countries adopted at the December meeting of the North Atlantic Council (see 15285 A). In their replies to Lord Ismay—which were also unpublished—the offer was accepted in principle by Britain and Turkey but was rejected by Greece.

The British Government's acceptance of Lord Ismay's offer was announced to the House of Commons on March 20 by Mr. Lennox-Boyd, who added:

"H.M. Government have noted the declaration of the leader of Eoka that his organization would suspend its operations as soon as Archbishop Makarios was released. The Governor of Seychelles is drawing the attention of the Archbishop to that declaration, and to the statement which I am now making.

"As the House knows, the Archbishop has been asked on many occasions whether he will make a public statement calling for the cessation of violence by Eoka. He is now being asked whether in these new circumstances he is prepared to do so. If, as we hope, he makes a clear statement to this effect, a new situation will have been created. In that event H.M. Government will be ready to bring to an end his detention in Seychelles. There can be no question at this stage of his return to Cyprus."

The Greek Prime Minister, M. Karamanlis, issued a statement on the same day explaining that Greece felt bound to abide by the U.N. resolution, which had been supported by all the NATO countries. "We consider," he added, "that the only appropriate procedure consists in negotiations between the ruling Power and the Cypriot people, who cannot in any case be bound by any decision made in its absence. For this reason we have rejected the NATO Secretary-General's offer." M. Karamanlis insisted that the release of Archbishop Makarios was an essential pre-condition for any "constructive" negotiations on Cyprus.

Declaration by Archbishop Makarios. - Appeal for Cessation of Eoka Operations.

The following statement was issued in Mahé (Seychelles) on March 22 by Archbishop Makarios:

"The U.N. resolution calling for a resumption of negotiations for a peaceful, democratic, and just solution of the Cyprus problem . . . is a starting-point towards a final settlement of the issue. We understand this resolution as an expression of the wish of the U.N. for bilateral negotiations between the British Government and the people of Cyprus.

"The Eoka organization, conforming with the spirit of the U.N. resolution, and in order to facilitate a resumption of such negotiations, declares that it is ready to suspend its operations at once if I were to be released. Thus a new situation has been created opening the way for the restoration of peace in the island.

"The British Government, however, was not satisfied with this truce offer by Eoka because its leaders declared only a suspension and not a cessation of operations. I would be extremely sorry if the road to peace thus opened were to be blocked by this argument. In my sincere desire to see peace restored in Cyprus I appeal to Eoka to declare the cessation of all operations, given that the British Government will show a spirit of understanding by abolishing simultaneously the present state of emergency . . .

"The Colonial Secretary has stated that after I had made a public statement calling on Eoka for a cessation of violence, I would be free to go anywhere except to Cyprus. I wish to make clear that my personal release will never be an object of barganing. As spiritual and national leader of the Greek people of Cyprus, I had, and always will have, as my first concern the interests of the people, and not my personal welfare. But I feel most deeply that my return to Cyprus will create a response from the people of the island, and this factor should not be under-estimated . . .

The Greek Government, correctly interpreting the spirit of the U.N. resolution, has already replied that it would not be willing to take part in discussion on the Cyprus problem within NATO, and that talks should be resumed directly between the British Government and the people of Cyprus. I sincerely believe that if the British Government think that any Greek Cypriot could be found to negotiate in my absence, it would be a waste of time.

"Finally, I express the hope that the British Government will understand and appreciate my sincere desire for the restoration of peace in the island. I also express the wish that the way now open will lead towards peace in a spirit of mutual trust and understanding."

Release of Archbishop Makarios.

Mr. Lennox-Boyd informed the House of Commons on March 28 that H.M. Government had agreed to release Archbishop Makarios from detention in the Seychelles and to allow him to go anywhere he chose except to Cyprus. In addition, the Governor of Cyprus was prepared to issue a safe-conduct out of the island to Colonel Grivas and any other foreign nationals who were members of Eoka, in order to promote a rapid return to peaceful conditions.

After referring to the Government's acceptance of Lord Ismay's mediation offer, to its request for a clear statement by Archbishop Makarios calling for a cessation of violence, and to the statement which had been issued by the Archbishop [which was not made public until March 28] Mr. Lennox-Boyd continued:

"While the Government cannot regard this statement as the clear appeal for which they asked, nevertheless they consider that in present circumstances it is no longer necessary to continue the Archbishop's detention. I have accordingly instructed the Governor of the Seychelles, with the full agreement of Sir John Harding, to cancel the orders for the detention of the Archbishop and his three compatriots and to arrange passages from the Seychelles by the first available vessel. I must repeat that there can be no question at this stage of their return to Cyprus.

"To promote a rapid return to normal peaceful conditions in Cyprus, the Governor is prepared to offer immediately a safe-conduct out of Cyprus to the leader of Eoka, Grivas. If he decides to avail himself of this offer, the Government of Cyprus will make the necessary arrangements with any member of the consular corps in Cyprus who agrees to act for him.

"This offer of safe-conduct is open also to any other foreign nationals who are members of Eoka and are at large in Cyprus. It will be extended to any British subjects who are members of the organization and are still at large, provided they give an undertaking not to enter any British territory so long as the state of emergency continues to exist in Cyprus.

'I should add that the Government cannot accept the Greek Government's interpretation of the U.N. resolution which the Archbishop has adopted in his statement. There is nothing inconsistent between the terms of that resolution and conciliation by NATO.

"Finally, I must make it clear that there can be no question of an immediate abolition of the state of emergency in Cyprus. As and when the Governor considers that it is safe for relaxations of the emergency regulations to be made, they will be made, and the House will be informed."

The Government's decision to release Archbishop Makarios was welcomed by spokesmen of the Labour and Liberal parties.

Mr. Callaghan (Lab.) said that there would be no dissent among the Opposition at this decision, and stressed that the Government were pledged to adhere to the principle of self-determination. He suggested that Archbishop Makarios, other Greek Cypriot leaders, and Turkish Cypriot leaders should be invited to London to discuss further measures aimed at a settlement of the Cyprus issue.

In his statement to the House of Commons on April 1, following his return from the Bermuda conference with President Eisenhower (see 15457 A), Mr. Macmillan had declared that there was "no truth whatsoever" in allegations that "some kind of bargain" had been struck at the conference involving the release of Archbishop Makarios.

The Prime Minister added: "It would have been quite unsuitable to discuss this matter with the President, and I did not do so." Although the strategic importance of Cyprus in the Middle East had been discussed, and also the NATO conciliation offer, in view of the fact that the U.S.A. was a member of NATO, neither he nor the President had made any reference to "a decision which must rest wholly within the responsibility of the British Government and of no-one else."

Greek and Turkish Reactions to Release of Archbishop Makarios.

The release of Archbishop Makarios was greeted with jubilation by the Greek Cypriots, church-bells being rung throughout the island and Greek flags being flown in many places. The Turkish Cypriots, however, heard the news with dismay, a telegram protesting against the Archbishop's release being sent to the Prime Minister of Turkey (M. Menderes) by Dr. Kütchuk, the leader of the Turkish Cypriot community. To prevent clashes between Greek and Turkish Cypriots, Sir John Harding imposed a dusk-to-dawn curfew on March 29 on all people in Cyprus under 27 years of age, including British nationals. The curfew was lifted, however, on April 1.

The British Government's decision was also welcomed in Athens, where M. Karamanlis issued a statement on March 28 describing it as a "decisive step" toward a solution of the Cyprus problem. He expressed the hope that the the Archbishop's release was "an indication of the British Government's desire to seek a peaceful and just solution which would lead to the restoration of the old friendship between our two nations." Student demonstrations in support of Archbishop Makarios occurred in Athens and other centres.

In view of the British decision to release the Archbishop, M. Mostras, the Greek Ambassador in London, who had been recalled in March 1956 after the Archbishop's deportation, returned to London on March 31 on the instructions of the Greek Government.

In Turkey, on the other hand, surprise and apprehension were expressed in the Press and in official circles at Britain's decision to release the Archbishop, without what was considered adequate condemnation of Eoka terrorism, and to offer a safe-conduct to Colonel Grivas.

The official Anatolian News Agency, in a moderately-worded statement, said that the Archbishop's release was less important in itself than for its possible consequences on the situation in Cyprus. After expressing satisfaction that the Archbishop would not be allowed to return to the island, and that British security measures would be continued, the statement added that Turkey was following developments in Cyprus "with keen interest" and supported the U.N. resolution recommending tripartite consultations.

Archbishop Makarios leaves the Seychelles.

After 13 months' detention in the Seychelles, Archbishop Makarios sailed from Mahé on April 6 for Tamatave (Madagascar) in the Greek tanker *Olympic Thunder*, which had been sent to the Seychelles by arrangement between the Greek Government and Mr. Aristotle Onassis, the Greek-born shipowner. The Archbishop's three fellow-exiles—Kyprianos, Bishop of Kyrenia; Polycarpos Ioannides, secretary to the Kyrenia bishopric; and Papastavros Papa-Agathangelou, a priest—also left in the *Olympic Thunder*.

At a press conference in Mahé on March 29, the Archbishop announced his intention of going first to Athens and then to London, and expressed his hope that he would later be allowed to return to Cyprus. He maintained that negotiations on the future of Cyprus could only be held between the British authorities and himself, as the representative of the Greek Cypriots, and rejected demands by the Turkish Cypriots that they should be represented in such discussions. Though he was prepared to see the rights of the Turkish Cypriots "internationally safeguarded," in particular in matters of education and religion, any solution involving the partition of the island was "impractical and definitely rejected." The Archbishop expressed his "great sorrow" that so many lives had been lost in Cyrpus as a result of what he called "the grievous consequences of the intransigent policy of the British Government." In conclusion he acknowledged the good treatment that had been accorded to him and his fellow-exiles during their detention in the Seychelles.

Internal Developments in Cyprus.

Internal developments in Cyprus during recent months are summarized below under cross-headings.

Executions of Eoka Terrorists. Three Eoka terrorists—Michael Koufsoftas (22), Andreas Panayides (22) and Stelios Mavromatis (23)—were hanged in Nicosia prison on Sept. 21. All three had been sentenced to death in June—Koufsoftas and Panayides after being found guilty of the murder of Corporal John Hale, of the R.A.F., who was shot dead on May 15 while on duty at Nicosia airfield, and Mavromatis after being found guilty of firing at two R.A.F. men in a Nicosia suburb with intent to murder them. [The two men concerned escaped injury, the bullets flying wide.] A fourth terrorist convicted of complicity in the murder of Corporal Hill was sentenced to life imprisonment. The condemned men had appealed first to the Cyprus Supreme Court, which rejected the appeals, and subsequently to the Judicial Committee of the Privy Council, which refused leave to appeal after finding that their trials had been conducted with complete fairness and impartiality.

Evagoras Palikarides (19) was hanged on March 13, 1957, for carrying firearms in contravention of the emergency regulations. Palikarides was the first terrorist to be executed for this offence (for which the death penalty had been imposed under a new emergency regulation of November, 1956) and the ninth to be executed since the emergency came into force on Jan. 1, 1955.

A number of other death sentences had been imposed between October, 1956 and April, 1957 but had not yet been carried out. The terrorists concerned were Nicos Tsardellis (22), sentenced to death on Oct. 8 for killing a British police sergeant at Larnaca on June 21; Hussein Kutchuk (18), sentenced to death under the emergency regulations on Feb. 5 for possessing a revolver; Christos Kyriacou (18), sentenced to death on Feb. 15 for being in possession of two bombs; Frixos Lambrou (17), sentenced to death on Feb. 22 for firing at a British warrant-officer (who was slightly wounded) in Limassol in November; and five Greek Cypriots who were sentenced to death under the emergency regulations on April 5 for firing at a British patrol in a village near Nicosia. The five terrorists concerned were Bassos Christofi (18), Manolis Himonas (21), Giorgios Zenopoulis (20), Demos Michaelides (21) and Kyriakos Nicolaou (18), two of whom pleaded "not guilty" whilst the others made no statement.

Nicos Xenophontos (23), who had been sentenced to death for shooting another Greek Cypriot (who was severely wounded but later recovered), had his sentence commuted to life imprisonment by Sir John Harding on Oct. 23, 1956.

Trials and Prison Sentences. Life sentences were imposed on a number of terrorists during September, October, December and February after the accused had been found guilty of conspiring to

overthrow the Government by force, unlawful possession of weapons or ammunition, and similar offences under the emergency regulations. It was announced during February that nine Greek Cypriots, seven of whom were serving life sentences, had been flown to the U.K. to serve their sentences in British prisons. [Six Cypriot prisoners had been transferred to Britain in August 1956.]

Two 17-year-old Greek Cypriot girls -Pitsa Constantinou and Rita Antholli, both employed as secretaries in Government departments -were sentenced on Dec. 3 to seven years' and two years' imprisonment respectively for possession of bombs. Both the accused pleaded "guilty," Miss Constantinou saying that bombs had been handed to her by a boy friend to be delivered to someone else. The bombs were discovered when a military patrol stopped a car in Nicosia being driven by Miss Antholli and discovered two bombs wrapped in a handkerchief in Miss Constantinou's possession. The sentences were the first to be imposed on women under the emergency regulations.

Charalambos Christodoulides (21), a Greek Cypriot accused of murdering a British soldier (Sergt. Edward Smith, of the Royal Engineers) in Limassol in November, was discharged on Feb. 18 by Mr. Justice Bernard Shaw, who ruled that a "confession" previously made by the defendant had not been freely and voluntarily made. During his trial Christodoulides had alleged that his interrogators at a Nicosia police-station had punched, kicked and maltreated him to extract a "confession," and that he had eventually signed such a document after being threatened with torture if he refused to do so. A Government mental specialist told the court that he had examined Christodoulides and found symptoms of a "state of anxiety" consistent with his having suffered violence or mental stress. Mr. Justice Shaw acquitted and discharged Christodoulides after finding that "the accused had succeeded in raising reasonable doubt as to whether his statement was freely and voluntarily made." He also found that the Crown had not proved its case and that there was no evidence against the defendant.

The Grivas Diaries. Further lengthy extracts from the captured diaries of Colonel Grivas were published on Sept. 28, 1956, by the British Colonial Office under the title *Terrorism in Cyprus*, together with copies of Eoka orders and of letters exchanged between Colonel Grivas and Archbishop Makarios. As in the case of the earlier extracts published, the Colonial Office claimed that their authenticity had been established beyond doubt by "the circumstances in which they were found alongside Grivas's personal possessions; by corroborative evidence of the facts mentioned in the diaries; by identification of the documents by captured terrorists; and by the evidence of hand-writing experts who have been able to compare the handwriting of the diaries with known specimens of the handwriting of Grivas in the possession of the authorities."

The overriding responsibility of Archbishop Makarios for the terrorist campaign in Cyprus was considered by the Colonial Office to be clearly established by an entry in the diaries, dated Jan. 29, 1955, in which Grivas wrote to the Archbishop: "I give you my word of honour . . . that I will not lay down my arms unless you yourself ask me to do so . . ." You must have complete trust in me and I hope you will grant me complete freedom to carry on the resumption of our struggle." [This letter was signed "Dhigenis" and addressed to "Makariotate," a form of address reserved for the Archbishop.] In addition, the text was given of an order issued by "Dhigenis" on June 24, 1955, stating that Eoka's "main target" was "the execution of police traitors, which will be followed by English military men," and its second target "the blowing up of Government buildings." Other extracts referred, *inter alia*, to the formation of "combat and killer groups," the enrolment of boys and girls in the terrorist campaign, and Eoka-sponsored demonstrations of schoolboys and schoolgirls.

In the extracts quoted, Grivas referred to Archbishop Makarios as "the real leader of the national liberation struggle" and, as such, "the competent person to decide." He also described how the Archbishop had communicated with Athens through the Greek Consulate in Cyprus; how students had been trained in sabotage in Crete; and how the Archbishop had arranged for the purchase of arms from Greece. The late Field-Marshal Papagos (M. Karamanlis's predecessor as Prime Minister of Greece) was named as being "in full agreement with our activities."

[It was disclosed in Nicosia on Sept. 27 that the discovery of the Grivas diaries was due to an anonymous letter, received on July 19, stating that a quantity of arms was to be moved from the village of Lyssi to Nicosia the same night. A patrol of the Royal Horse Guards had been sent to Lyssi and carried out searches which resulted in the capture of a number of arms caches, a terrorist hide-out, and the Grivas diaries, which were buried in glass jars. A subsequent announcement by the British War Office (March 12, 1957) disclosed that the diaries had been found by Sergt. Anthony Taylor, G.M., who had been a member of the patrol sent to Lyssi and who had found holes in the ground containing objects which, when dug out proved to be glass jars containing writings in Greek. When deciphered, these writings proved to be some of the diaries of Grivas.]

Complicity of Orthodox Church in Terrorist Campaign. A 37-page pamphlet (*The Church and Terrorism in Cyprus*) was published on Feb. 15, 1957 by the Government of Cyprus giving many details of the complicity of the Orthodox Church in the terrorist campaign and in the agitation for *enosis*. Among much other information, it gave many extracts from sermons by Church leaders combining threats of force with exhortations to continue the "liberation struggle"; a list of seven Church premises in which arms and equipment had been found "in circumstances revealing that the authorities concerned must not only have been aware of, and condoned, their presence there, but actually had a hand in arrangements for their distribution and use"; and cases in which revolvers, grenades, and other weapons had been found in the possession of priests

After alleging that Archbishop Makarios had told a big assembly of clerics and others on July 23, 1951, that "it is only through the exercise of violence that the British can be made to understand," the pamphlet gave the text of the Eoka oath which recruits were asked to sign in the presence of a priest: "I swear in the name of the Holy Trinity that (1) I shall work with all my power for the liberation of Cyprus from the British yoke, sacrificing for this even my life; (2) I shall perform without objection all the instructions of the organization. If I disobey my oath I shall be worthy of every punishment as a traitor, and may eternal contempt cover me."

Of the three bishops in Cyprus (the pamphlet stated), Anthimos, Bishop of Kition, had been most closely associated with Archbishop Makarios in his preparations for violence. Of all the hierarchy, only Photios, Bishop of Paphos, had appeared to have avoided implication in Makarios's plans. In this connexion the pamphlet quoted from a captured Eoka report which mentioned the "unreliability" of Photios and which concluded: "We are therefore obliged to recommend that no secret should be confided to him either by the Ethnarchy or by the Greek Consulate."

The pamphlet reached four general conclusions: (1) Archbishop Makarios had been the instigator of the terrorist movement and, up to his deportation, its general controller of operations. "Above all, it was he who brought to Cyprus a brutalized and disappointed soldier [Grivas] to organize the campaign of violence and to terrorize his compatriots into acquiescence in the pursuit of Makarios's political ambitions." (2) The Orthodox Church had been exploited as a "cover" organization at all stages. (3) Priests had been "deeply involved in the Archbishop's conspiracy." (4) The laity had "become so indoctrinated by political propaganda, cleverly disguised in religious dress by their pastors, that hatred and even murder have become endowed in the eyes of many with the aura of sanctity."

Detentions and Deportations of Priests. Nicos Kranidiotis, secretary of the Ethnarchy and a close confidant of Archbishop Makarios, was arrested on Sept. 5, 1956, and subsequently sent to the Kokkinotrimithia detention camp as a suspected terrorist. A statement by Sir John Harding said that evidence had become available showing beyond doubt that Kranidiotis had played a prominent part in the Eoka conspiracy from its early days. The secretary of the Ethnarchy (Yennadios, Bishop of Salamis) sent telegrams to the World Council of Churches, the Archbishop of Canterbury, the British Labour Party, Lord Attlee, President Eisenhower, and M. Karamanlis denouncing "this new instance of the oppressive policy of the British administration in Cyprus."

On Sept. 11 the Cyprus Government announced that Nicolaos Revelas, a priest of Greek nationality, had been declared a prohibited immigrant "as a person likely to conduct himself in such a manner as to be dangerous to good order, peace and good government, and to intrigue against her Majesty's power and authority in Cyprus." Revelas, who was ordered to leave the Island within a week, was stated to have been in communication with Papa-Agathangelou, one of the three priests deported to the Seychelles with Archbishop Makarios.

Detention orders were served on Feb. 19 on seven Orthodox priests from villages in the Troodos mountains, bringing the number of priests under detention to 57. An official statement said that the seven priests had been "cover men" for Eoka, had used their houses to shelter terrorists, and had participated in other subversive activities such as helping to form terrorist "cells."

The Emergency Regulations. In view of the intensification of the terrorist campaign, Sir John Harding announced on Nov. 22, 1956, that the death penalty would be extended to all persons discharging firearms at others, throwing bombs, carrying or manufacturing arms or explosives, or consorting with armed persons. Under a further regulation issued on Nov. 26, no prosecution could be instituted against any member of the armed forces, police, or Government for any offence alleged to have been committed while in the performance of duties.

On Dec. 18, however, Sir John Harding announced that the emergency regulations would be considerably relaxed in the hope that Lord Radcliffe's proposals (then about to be published) would "mark the beginning of a new and happier chapter for Cyprus and its peoples." The relaxations comprised the following measures:

(1) Revocation of the emergency regulations under which males under the age of 18 could be sentenced to whipping for certain specified offences.

(2) Revocation of the Emergency Powers (Collective Punishment) regulations under which fines could be levied collectively on the inhabitants of particular areas, and shops and dwelling houses in such areas closed.

(3) Places of public resort or entertainment would not in future be closed, except temporarily as part of a particular anti-terrorist operation in a given area or for the purpose of denying the use of particular premises to terrorists.

(4) Relaxation of the regulations requiring persons to obtain exit permits whenever they left the Colony. All categories of persons would, on application, be given exemption from this requirement, excepting only certain individuals known to have been implicated in Eoka activities.

(5) The new regulations providing for the suspension of publications [see below] would be amended in such a way " as to put it beyond all possible doubt that fair and honest comment or criticism regarding the Government's policy and actions will not expose the publication to suspension."

(6) A further review would be undertaken of the cases of all persons detained either under the Detention of Persons law or under the emergency regulations, " with a view to releasing any who can be set at liberty without serious prejudice to the conduct of security operations."

Further important relaxations of the emergency regulations were announced by Sir John Harding on April 14, 1957. The most important were : (1) the abolition of the death penalty for all offences under the emergency regulations except discharging a firearm at another person, possessing firearms without lawful authority, and throwing or using bombs or other explosives with intent to cause death or bodily injury ; (2) revocation of the Press Law of November 1956 (see below) which had enabled the Governor to suppress newspapers without appeal to a court of law ; (3) lifting of the order on the control of taxis and the ban on the riding of bicycles by males under 27 ; (4) the release of the Bishop of Kitium, who had been under house arrest, and of Nicos Kranidiotis, the secretary to the Ethnarchy (see above). It was announced that a further review would be undertaken of all detained persons " with a view to releasing any who can be set at liberty without serious prejudice to public safety and order."

The Governor's decision to relax the emergency regulations in the above-mentioned respects was officially described as being aimed at " creating conditions favourable to a peaceful solution " of the Cyprus question. The relaxations were introduced a month after Eoka's offer to call off the terrorist campaign if Archbishop Makarios was released - a period during which there had been a virtual suspension of terrorist activities.

Press Control Regulations. A new regulation was issued on Nov. 23, 1956, giving the Cyprus Government power to suspend any publication which, in its view, " prejudices the success of the measures being taken to bring to an end the state of emergency." The Governor was given power to suspend publications without prior notification to the papers concerned, who could not appeal to the courts against such action.

Strong protests against the new regulation were made on Nov. 28 by Mr. Charles Foley, editor and publisher of the *Times of Cyprus*, and Mr. Victor Bodker, editor of the *Cyprus Mail*, who made the following points :

(1) The Government already exercised stringent control over newspapers, under existing emergency regulations, " to a degree far greater than that used in Britain during the war."

(2) Despite these regulations, the Government had not found it necessary to prosecute any newspaper for any breach of security.

(3) Editorial comment had been " far more restrained than that published in responsible and influential organs of the British press which are freely distributed in Cyprus."

(4) The new regulation " swept away all processes of the courts," and no newspaper could continue to do its duty to the public " if it could be arbitrarily suppressed at the Governor's absolute discretion."

" In view of the above circumstances [the protest concluded] there can be neither objective reporting of facts nor fair and helpful comment until the regulation is withdrawn, amended, or hedged about with safeguards for the freedom of the Press."

The new press regulations also led to strong protests in the British Parliament, notably by Labour M.P.s. Lord Lloyd (then Under-Secretary at the Colonial Office) explained on Nov. 28 that the regulation had been introduced " following a spate of general and usually anonymous complaints and allegations in the local Press against the security forces, which have had the effect of worsening relations between the security forces and the civilian population and hampering the prosecution of the emergency." After pointing out that nearly all these allegations had been proved to be either untrue or grossly exaggerated, Lord Lloyd added : " Considering the difficult and unpleasant task that our troops have in Cyprus, it is monstrous that they should be subjected to this kind of slander, and I believe the House will agree that that kind of thing should be stopped."

As stated above, the new press regulation was abolished under the relaxations announced by Sir John Harding on April 14.

The "Times of Cyprus" Case. Summonses were issued on Nov. 28, 1956, against Mr. Foley, editor and publisher of the *Times of Cyprus*, for publishing a " disturbing report " in the paper's issue of Nov. 21. The article in question was a reproduction of a dispatch cabled to a London newspaper (the *News Chronicle*) by its special correspondent in Nicosia, dealing with the Cyprus situation and headed : " Hatred, Despair, and Anger."

The summons against Mr. Foley was not issued under the new press regulation but under Section 43 of the emergency regulations of 1955, which states : " Any person who publishes any report or statement which is likely to cause alarm or despondency or to be prejudicial to public safety or the maintenance of public order shall be liable on conviction to imprisonment for a term not exceeding one year or a fine not exceeding £100, or both."

Mr. Foley, whose defence was undertaken by Sir Frank Soskice, Q.C. (a British Labour M.P. and former Solicitor-General) pleaded " not guilty " on Dec. 2 to a charge of publishing a report " likely to cause alarm and despondency and likely to be prejudicial to the maintenance of public order." He had previously sent personal appeals to 150 leading British personalities—including the Archbishop of Canterbury, Sir Winston Churchill, and Mr. Hugh Gaitskell —to defend " press freedom in Cyprus."

In the Supreme Court of Cyprus on Jan. 2, 1957, Mr. Justice Ellison fined Mr Foley £50 for publishing the article, which was held to be prejudicial to the maintenance of public order. A nominal fine of £1 was also imposed on The Times of Cyprus Publishing Co., Ltd., the company owning the newspaper. Mr. Foley was acquitted on a charge of publishing an article likely to cause " despondency"—the word " alarm " having been struck out of the charge after the defence had submitted that the count in its original form was defective in law.

Mr. Foley subsequently announced his intention of applying for a writ of *mandamus* (command to an inferior court) and prohibition against Mr. Justice Ellison, alleging that the latter had taken out of the transcript of his original oral judgment certain phrases, or had amended it to such extent that he [Mr. Foley] had been deprived of substantial grounds of appeal against his conviction. Mr. Foley was given leave to apply for such a writ, but his appeal against Mr. Justice Ellison's judgment was rejected with costs on Feb. 9 by the Chief Justice of Cyprus, Sir Eric Hallinan.

Quashing of Collective Fine on Limassol. An appeal by the Mayor of Limassol and others against the collective fine of £35,000 imposed on Limassol in June 1956 was upheld in the Cyprus Supreme Court on Dec. 15 by Mr. Justice Zekia, who quashed an Order for payment of the fine on the ground that no proper inquiry had been held beforehand. The Cyprus Government announced on Dec. 17 that the amounts already collected from Limassol under this fine would be refunded immediately.

New Director of Security Operations. A reorganization of the command system for internal security forces came into operation in January, 1957, whereby General Douglas Kendrew, G.O.C. Cyprus District, combined the latter post with that of Director of Military Operations against the Eoka terrorists.

Ban on "Peka" Organization. The " Political Committee for the Cyprus Struggle " (Peka), the political wing of the Eoka organization, was proscribed by Sir John Harding on Sept. 27, 1956. " Peka " had first made its appearance during August, when leaflets were circulated in its name in different parts of the island.

The ban on the Communist Party of Cyprus and on various left-wing publications was extended on Nov. 29 for a further year.

Terrorist Activities and Security Operations.

Following the expiry on Aug. 27 of the truce called by Eoka, terrorist activities were renewed and reached a climax during November, when the number of casualties exceeded those of any month since the terrorist campaign began. The murder of two Turkish policemen, in Nicosia in January and in Famagusta in February gave rise to serious rioting by the Turkish communities in those towns. During the first three months of 1957, however, a series of successful security operations were carried out, resulting in the death or capture of many Eoka leaders. The principal incidents during this period are summarized below.

Aug. 30. Two British soldiers were wounded during raids by armed bands on police stations in two villages near Nicosia, and a Greek Cypriot was seriously wounded by armed men in a village near Paphos. A British ship was holed in Famagusta harbour by an explosion attributed to a limpet mine.

Aug. 31. Three armed men raided a Nicosia hospital in an attempt to rescue a captured terrorist (Polycarpos Georghiades) who was being brought there for treatment In the ensuing gun battle a British police sergeant, two members of the hospital staff, and two of the terrorists were killed, the third terrorist and Georghiades succeeding in making their escape.

Sept. 2. A bomb explosion caused a fire at the Government printing works in Nicosia. A Cypriot policeman was shot dead at Trikomo.

Sept. 4. A British officer was shot and wounded at Larnaca, and an exchange of shots followed in which a Turkish Cypriot was killed. In Nicosia a British official's house was seriously damaged by a bomb explosion.

Sept. 7 A Greek Cypriot was shot dead in Nicosia.

Sept. 8. Eight armed men raided Kyrenia police station and carried off a supply of arms and ammunition.

Sept. 9. A lorry carrying French troops was fired on between Famagusta and Nicosia, this being the first incident in which French troops had been involved. A British soldier was wounded by the explosion of a time-bomb on a beach near Limassol, and three others by an explosion in an Army camp near Nicosia.

Sept. 10. A time-bomb explosion started a fire which almost completely destroyed the official residence being built at Episkopi for the C.-in-C., Middle East Land Forces.

Sept. 11. A Greek Cypriot was shot dead at Akaki, 13 miles from Nicosia. A police station being built near Famagusta was set on fire.

Sept. 13. Four time-bombs exploded in a military hospital being built at Dhekelia, causing damage estimated at £5,500. Two masked men shot dead a Greek Cypriot believed to be an informer.

Sept. 15. A British soldier was shot dead by three youths in Nicosia. In the Paphos area a Greek Cypriot was killed and his wife seriously wounded when their car was ambushed by terrorists.

Sept. 23. An airman was killed and another wounded when four bombs exploded on a beach near Kyrenia. A Greek Cypriot was shot dead in Nicosia, and a soldier and his wife were wounded by terrorists who opened fire in the street in Larnaca.

Sept. 24. Three members of the security forces were injured in Famagusta by bombs thrown at their lorry.

Sept. 25. A sergeant was killed and 11 other soldiers injured by a bomb explosion in the Paphos district.

Sept. 26. A British officer was shot dead in a Nicosia suburb.

Sept. 27. Seven soldiers were wounded when a bomb exploded at an Army camp near Nicosia.

Sept. 28. Two British police sergeants were shot dead in Nicosia, while later the same day a soldier and a member of the Women's Voluntary Service were killed when two military cars were ambushed near Kyrenia. An all-day curfew (with an hour's break for shopping at midday) was subsequently imposed on the Greek section of Nicosia; all restaurants, bars, and places of entertainment owned or managed by Greeks in and around Nicosia and in Kyrenia were closed until further notice; and Greek Cypriots under 27 were forbidden to ride bicycles or motor-cycles in and around Nicosia.

Oct. 3. About 3,000 troops, supported by helicopters and spotter planes, began a large-scale operation over an area of over 200 square miles in the Kyrenian mountains.

Oct. 6. The curfew in Nicosia, which had given rise to protests from the municipal council, the editors of English and Greek newspapers which had been unable to appear, and British and other foreign residents affected by it, was lifted, though the ban on places of entertainment remained in force. A Greek Cypriot was shot dead by masked men near Limassol.

Oct. 11. The operation in the Kyrenia mountains ended after 31 Eoka terrorists had been captured, over 50 suspects held for interrogation, and large stores of arms and supplies seized. Six terrorists, who were suspected of complicity in the murder of Mr. and Mrs. Kaberry on July 8 and of seven other murders or attempted murders since December 1955, were discovered in a barn in an isolated farmhouse. They included Thassos Themistocleous, leader of the Kyrenia Mountain groups; Photis Christofi, his lieutenant; and Andreas Charalambous, who had escaped from Nicosia prison in June, and for whom a reward of £5,000 had been offered. 25 other members of Eoka village groups were also arrested. The arms captured included a 2-in. British mortar, machine-guns, revolvers, bombs, grenades, and nearly 2,000 rounds of ammunition.

Oct. 12. To prevent supplies of arms and ammunition from reaching Eoka by air, all planes flying over Cyprus were ordered to keep to set "corridors" and fixed altitudes. Large numbers of leaflets offering rewards for information about Eoka, and giving details of how to send it to the Government anonymously, were dropped by air over the island.

Oct. 14. Two Greek Cypriots suspected of being informers were shot dead in a village in the Paphos district, and a third near Limassol.

Oct. 15. It was officially announced that a body found during the operations in the Kyrenia Mountains had been identified as that of Lance-Corporal Hill, who had been missing since December 1955, and whom Eoka claimed to have hanged as a reprisal for the execution of two terrorists (see 14901 A).

Oct. 16. A Greek Cypriot suspected of being an informer was shot dead at a wedding reception in the Limassol district.

Oct. 19. Two Greek Cypriots were shot dead, one in Nicosia and the other in the village of Kato Pyrgos.

Oct. 20. A Greek Cypriot was shot dead in Nicosia, another in the village of Lyssi, and a third in the Famagusta district.

The military authorities announced that an operation in the south-eastern tip of Cyprus, which had been in progress for five days, had resulted in the arrest of 27 persons, including a complete village terrorist group, and the capture of arms and ammunition.

Oct. 21. A Greek Cypriot was shot dead in the Famagusta area.

Oct. 23. Two British soldiers were killed and four others wounded when a bomb exploded in the village of Lefkoniko, near Famagusta.

Oct. 28. Two British soldiers were killed when a bomb exploded under their lorry in the Paphos area.

Nov. 3. A soldier was shot dead in Limassol; another was killed when a bomb exploded under his car near Limassol; a third was killed by similar explosion near Polis, in the Paphos area; and an airman was shot dead in the village of Paralimni, near Famagusta. A Greek Cypriot who tried to break through a military cordon after the Polis incident was shot dead. In Nicosia a grenade was thrown at an Army vehicle, injuring two soldiers and a Greek Cypriot woman.

Nov. 4. A soldier was killed when a bomb was thrown at an Army truck in Nicosia, and two others when a bomb was detonated on the Limassol-Polymedia road. A Greek Cypriot police sergeant was shot dead in the Famagusta district. Security forces shot dead three Cypriots and seriously wounded a fourth after a bomb explosion in a village in the Paphos district.

Nov. 6. Mr. Douglas Williamson, assistant district commissioner in the Platres area, was killed when a bomb exploded in his office. An airman was killed and four others wounded by a bomb explosion in Limassol.

Nov. 10. A British civilian was shot dead in Limassol, and a Greek Cypriot in Famagusta.

Nov. 12. A soldier was killed and three others wounded in an ambush near Pedoulas village.

Nov. 14. Eoka gunmen murdered five Greek Cypriots, including a Limassol lawyer well known for his pro-British views (Mr. Yiannis Peligias), as well as a Turkish Cypriot. A Greek Cypriot was shot dead while attempting to escape from a detention camp. This was the largest number of casualties in any one day since the terrorist campaign began.

Nov. 15. A British businessman, Mr. Hallam, was shot dead and his partner seriously wounded by terrorists outside their office in Nicosia. Another British civilian was killed in Limassol when a mine exploded under his car.

Nov. 16. A sub-editor on the *Times of Cyprus*, Mr. McDonald, was shot dead in Nicosia. Three British soldiers were killed and 15 wounded by an explosion in a military camp near Paphos.

Nov. 18. A soldier was shot dead and a Turkish auxiliary policeman wounded in Limassol.

It was officially announced that a recent operation in the Troodos Mountains had resulted in the arrest of 17 Cypriots, including the members of a terrorist group, and the capture of large quantities of arms and ammunition.

Nov. 19. Terrorists opened fire from a house on military vehicles passing through the village of Nikitas (26 miles W. of Nicosia); in the ensuing gun battle a Cypriot was killed and four soldiers and two Cypriot civilians were wounded.

Nov. 28. A soldier was shot and wounded in Limassol by two youths aged 15 and 18, both of whom were arrested.

Dec. 4. It was officially announced that 34 people had been killed and 71 wounded in terrorist attacks during November, the largest number for any month since the emergency.

Dec. 8. Mr. Fox, a journalist who had taken Mr. McDonald's place on the staff of the *Times of Cyprus*, was shot dead in Kyrenia, and a Greek Cypriot was murdered in the village of Vialoussa.

Dec. 10. Two Greek Cypriots were shot dead at a village near Famagusta.

Dec. 11. The Abbot of Chrysorpyiatissa monastery, who was officially described as "a key man in the Eoka organization" in the Paphos district, was arrested and taken to a detention camp, together with a priest from the village of Panaya, near Paphos.

Dec. 13. It was officially announced that 52 people had been arrested in a seven-day operation in the Limassol and Larnaca areas. There was evidence, the statement added, that Eoka was very short of arms and ammunition as a result of recent searches by the security forces, and that it was making increasing use of youths and girls of school age for terrorist purposes in the belief that they would receive more lenient sentences if arrested.

Dec. 19. Two Greek Cypriots were shot dead, one in the Paphos area and the other near Larnaca. Two soldiers were shot at and wounded in Nicosia.

Dec. 21. A Greek Cypriot special constable was shot dead in Nicosia.

Dec. 25. An Eoka group attacked the police station at Alona, a mountain village in south-western Cyprus, but was repulsed by police and troops after an exchange of fire. Four bombs exploded in Nicosia, one at the *Times of Cyprus* office.

Dec. 27. An official communiqué stated that 130 people had been arrested as suspected terrorists since Nov. 18.

Dec. 31. An airman was shot dead in Nicosia. Michael Georgallas, a 20-year-old terrorist with a price of £5,000 on his head, was killed in a fight with security forces.

Jan. 2. A Greek Cypriot police sergeant was shot and seriously wounded at the village of Rizokarpaso.

Jan. 3. A British teacher was shot and wounded in Nicosia.

Jan. 4. A British private inquiry agent (Mr. R. W. James) was shot dead while entering his flat in Nicosia.

Jan. 9. A British civilian (Mr. Herbert Pritchard) was shot dead in Nicosia.

Jan. 11. Mr. Cook, the British district education officer, was shot dead in Famagusta.

Jan. 14. A British naval rating was shot dead in Nicosia, and a Greek Cypriot was murdered near the village of Cambos.

Jan. 15. The Greek quarter of Nicosia was sealed off by 3,000 troops who made a house-to-house search for those responsible for the recent murders in the city; 33 suspects, including some known members of Eoka, were detained for questioning. In the Troodos Mountains three terrorists were captured, two of whom had a price of £5,000 on their heads.

Jan. 18. Markos Drakos (24), a leading member of Eoka, for whom a reward of £5,000 had been offered, was shot dead during a fight with British troops in the Troodos Mountains. He had taken part in the attack on Nicosia broadcasting station in April 1955; had been arrested in the following June, but escaped from Kyrenia Castle; and was known to have directed a bomb attempt on Sir John Harding's life and a series of ambushes of military vehicles.

Jan. 19. A Turkish Cypriot policeman was killed and three others wounded in a bomb attack on a power station in Nicosia.

Jan. 20. Turkish rioters set fire to a timber yard and 10 other Greek-owned premises in Nicosia, a curfew subsequently being imposed.

Jan. 21. Following the lifting of the curfew in Nicosia, clashes occurred between Turkish and Greek youths in which 14 people were injured, with the result that the curfew was reimposed. The body of a Greek Cypriot who had apparently been battered to death was discovered.

Jan. 23. The Nicosia curfew was lifted, but Turkish youths under 21 were ordered to remain indoors until further notice.

Jan. 24. It was officially announced that during operations in the Troodos and Adelphi Mountains from Jan. 15-22 over 20 terrorists—including one complete mountain gang and leading members of three others, and comprising "nearly half the known Eoka hard-core leaders"—had been killed or captured. In addition to Drakos, another leading terrorist (Denos Herodotou) had been killed, while three Eoka leaders for whom a £5,000 reward had been offered had been captured—Polycarpos Georghiades, Argyrious Karademas (a Greek national known to be a trained saboteur and believed to be Grivas' deputy), and Nicos Spanos (a mountain gang leader). A number of secret Eoka hiding-places had been discovered, some in the homes of priests, Georghiades and seven other men having been found concealed in a secret room beneath a village constable's house. A large quantity of arms and ammunition had been seized, including a 3.5-in. rocket-launcher believed to have been stolen from Famagusta docks.

Jan. 25. An almost complete general strike by Greek Cypriots took place throughout Cyprus, except in Famagusta, as a protest against the Turkish riots of Jan. 20-21. In Famagusta, following the murder of a British civilian employed by the War Office, and the wounding of a soldier, all Greek Cypriot males were detained for questioning, while in Nicosia the house-curfew imposed on Turkish males under 21 was extended to Greek youths of the same age.

The Communist mayor of Limassol, Mr. Partassides, was released after having been detained since December 1955.

Jan. 27. A Greek Cypriot policeman was shot dead near Nicosia.

Jan. 30. A Royal Marine Commando force left Malta for Cyprus, where the internal security forces already comprised 14 infantry battalions and two artillery regiments, compared with 10 units a year earlier. Brigadier Baker, who had been in charge of anti-Eoka operations for a year, stated that during that time the number of mountain terrorist groups had been reduced from 16, totalling 150 men, to five, of which one had lost its leader and the others had suffered losses.

Feb. 1. A soldier was killed by a bomb explosion near Limassol, two others were wounded in an explosion in Famagusta; and a Turkish Cypriot was injured in Nicosia, where several bomb incidents occurred. In Larnaca a youth was shot dead and another wounded by a police patrol after failing to answer a challenge.

Feb. 2. The largest store of arms yet discovered, including 36 automatic pistols, over 2,000 rounds of ammunition, 53 bombs, 24 lbs. of T.N.T., 800 sticks of dynamite, and large quantities of other explosives and chemicals, was found in a Nicosia suburb hidden under the bedroom of a Greek Cypriot policeman, who was arrested together with his wife. The house was later blown up, as the removal of the explosives would have been too dangerous.

In Famagusta three bombs were thrown at a Turkish police patrol, killing one and wounding three others. Sir John Harding later broadcast an appeal to all leaders of public opinion to restrain their communities, and met Dr. Dervis (Mayor of Nicosia) and Dr. Kütchük (leader of the Turkish community), both of whom promised to co-operate in maintaining order. Shortly after the broadcast, however, a Maltese-owned cabaret in Nicosia was wrecked by a Turkish mob, which included several auxiliary policemen.

Feb. 3. After the murdered policeman's funeral in Famagusta, Turkish rioters attacked Greek Cypriots, eight of whom were injured, set fire to Greek-owned property, and damaged fittings in a Greek church. All Greek and Turkish males under 27 in all major towns and villages were placed under a house curfew, and in Nicosia the Greek members of the municipal council appealed to the Greek population to avoid at all costs any friction with the Turkish community.

A soldier was killed and another wounded when a military car was fired at in the Famagusta district, bringing the number of British servicemen and civilians killed in the terrorist campaign to 100.

Feb. 5. It was announced that 189 people had been arrested and several arms stores discovered during searches in the mountains of western Cyprus. Evangelos Evangelakis, a terrorist with a price of £5,000 on his head, and Andreas Chartas, a prominent Eoka operational leader, were arrested in Nicosia.

Feb. 6. Seven Greek Cypriot policemen, including an inspector and two detective sergeants, were arrested in connexion with the recent discovery of an arms store in Nicosia.

The body of Private Hilton, who was killed by Eoka as a reprisal at the same time as Lance-Corporal Hill, was officially reported to have been found near Famagusta. The statement said that Pte. Hilton had been shot by terrorists several months earlier.

Feb. 7. Two terrorists who had detonated a bomb near a military vehicle were shot dead by troops near Polis.

Feb. 9. A nine-year-old Greek Cypriot boy was killed in Nicosia by a bomb thrown by a terrorist at an Army vehicle.

Feb. 10. A British civilian was shot at and wounded in Limassol, shortly after the house-curfew on Greek Cypriots under 27 had been lifted. A terrorist was shot dead and five others captured by troops near Lyssi.

Feb. 17. Troops fired on a car which failed to stop when challenged near Limassol, killing a Greek Cypriot and wounding two others.

Feb. 18. During operations in the Troodos Mountains, Demetrakis Christodoulou (a terrorist for whose capture £5,000 had been offered), another terrorist, and a British officer were killed, while Christofi Lenas, also with a price of £5,000 on his head, was captured.

Feb. 25. Three airmen were injured near Famagusta by bombs thrown at their vehicle, a Greek Cypriot bystander being killed when the airmen opened fire at the terrorists.

March 2. A Turkish police sergeant was shot and wounded at Ktima, a curfew being imposed on the town to check attempts at reprisals. In the Limassol district a Greek Cypriot policeman was seriously wounded.

March 3. Gregoris Afxentiou (29), second-in-command of Eoka, was trapped and killed in a cave in the Troodos mountains after refusing to surrender and keeping up a lone fight for several hours. The cave was eventually destroyed by a powerful explosive charge after a British soldier had been killed by Afxentiou's sten-gun fire, the body of Afxentiou (who had had a price of £5,000 on his head) being found inside the cave. His four companions (two of whom also had prices of £5,000 on their heads) had surrendered previously. The abbot and monks of the nearby Makheras monastery—in whose compound the cave was situated, and where an arms dump had been found—were placed under house arrest.

March 7. Two terrorists were killed by troops in western Cyprus after firing on a patrol from ambush.

March 11. A Greek Cypriot was shot dead by troops at Akali after failing to answer a challenge.

March 15. Aristidou Droushiotis (24), who was believed to have succeeded Afxentiou as operational head of the Eoka oranization, and who had a price of £5,000 on his head, was captured in the Paphos area.

March 17. In Limassol four youths were injured and 12 people arrested when police made baton charges to break up demonstrations demanding the release of Archbishop Makarios.

March 18. In view of the success of the security forces in eliminating Eoka leaders, the rewards offered for information leading to the arrest of Grivas and of other leaders were reduced from £10,000 and £5,000 to £1,000 and £500 respectively.

March 19. A Greek Cypriot teacher was shot dead by terrorists near Famagusta.

March 21. Michalakis Rossides, Eoka commander for the Larnaca district, and Demetrious Ioannides, both with a price of £500 on their heads, were captured with a third terrorist near Larnaca.

March 22. Petrakis Kyprianou, a 17-year-old student who was wanted for two murders, was shot dead in the Larnaca area while attempting to escape.

It was officially announced in Nicosia on April 2 that 203 people had been killed and 708 wounded since the beginning of Eoka terrorism on April 1, 1955, and that there had been 1,382 bomb explosions during the past two years. The total of killed comprised 78 British servicemen, nine British policemen, 16 British civilians, 12 Greek Cypriot policemen, and four Turkish civilians, while five Greeks and two Turks had lost their lives in inter-racial riots. (White Paper, Cmd. 42 - Times - Daily Telegraph - Manchester Guardian - U.N. Information Centre London - Turkish Embassy Press Office, London)

A. INDIA. — Decimal Coinage System.

The decimal coinage system based on the *naya paisa* (one-hundredth of a rupee) as the smallest currency unit was introduced throughout India on April 1, when new coins and postage stamps were issued. Elaborate preparations had been made by the Government and the Reserve Bank of India to explain the change to the public, millions of ready reckoners and conversion tables having been printed to help the population. In view of the fact that the new decimal coinage values could in many cases not be expressed as the exact equivalent of the old comage, charges by the Post Office and other official bodies had to be adjusted to the nearest full multiple of a *naya paisa*, involving a certain "devaluation" of the old coinage.

In place of the former division of three pies to a pice (*paisa*), four pice to an anna, and 16 annas to a rupee, all business transactions will henceforth be calculated in rupees and *naye paise*. To assist the public in changing over to the new system, the conversion tables issued by the Government said that "in any single transaction the exact equivalent should be worked out at the rate of 100 *naye paise* to one rupee or 16 annas or 64 pice or 192 pies." All banks were closed on April 1 while their books were converted from the old to the new system, which came into force on the same day for bus, tram and taxi fares, postage stamps, etc. The former coinage will, however, be valid side by side with the *naya paisa* coinage for the next three years.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. Decimal Coinage, 14871 A; New Calendar, 15302 A.)**

A. SOVIET UNION. — Judicial Reforms.

Legislation providing for important changes in the Soviet legal system was unanimously approved by the Supreme Soviet on Feb. 12. The principal changes were (*a*) a re-definition of the status and functions of the Supreme Court, which would no longer hear cases not previously judged by lower courts, (*b*) the transfer to the 15 Union Republics of power to issue their own legal codes.

Supreme Court. The new Statute of the Supreme Court provided that it would be an "independent body guided only by the law"; be elected by the Supreme Soviet for a period of five years and be responsible to the Supreme Soviet (or, between sessions, to its presidium), and consist of a president, two vice-presidents, and a number of members (i.e. professional judges) and "people's assessors" (i.e. laymen with powers equal to those of the judges). The Presidents of the Supreme Courts of the 15 Union Republics would be *ex-officio* members.

The Court would be divided into civil, criminal and military sections. In addition to acting as the highest appeal court against decisions from lower courts, its functions would include the hearing of appeals by the President of the Supreme Court and the Procurator-General against decisions of the Court's civil, criminal, and military sections; giving general guidance to lower courts in the application of laws; initiating legislation on questions of legal interpretation; resolving disputes between the judicial organs of the Union Republics; and dealing with infringements of all-Union legislation by the Supreme Courts of the Union Republics, or infringements of the rights of other Union Republics.

The right of the Court to hear certain cases not judged by lower courts was abolished, and no cases could in future be brought before the Supreme Court which had not previously been heard by local courts, regional courts, and the Supreme Courts of the Union Republics.

After adopting the new Statute, the Supreme Soviet elected M. Alexander Gorkin (formerly secretary of the presidium of the Supreme Soviet) as President of the Supreme Court, and MM. Nikolai Morozov and Lev Smirnov as Vice-Presidents; the two latter had been President of the Criminal College of the Supreme Court and Assistant Procurator-General respectively. Nine members and 20 "people's assessors" were also elected. [The former Court had consisted of 78 members and 35 assessors.]

Legal Codes. This Act abolished the system under which the whole of the Soviet Union had one code of civil law, one of criminal law, and one of judicial procedure. Instead, it provided that while the principles of the legal system would continue to be laid down centrally, the individual Republics would adopt their own civil, criminal and procedural codes adapted to local conditions.

Other Changes. These included (i) the abolition of the special transport courts which dealt with crimes involving railways and waterways -such crimes being handled in future through normal judicial channels; (ii) the provision that a "people's assessor" should henceforth sit on military as well as civil courts.

The legislation was described as a further step towards increasing the authority of the Union Republics, which, it was stated during the debate, now possessed sufficiently large numbers of jurists and trained legal staff to deal themselves with the legislative and judicial tasks transferred to them. (Soviet Weekly) **(Prev. rep. 14059 A; 14817 A.)**

B. NETHERLANDS. — Social Legislation.

Two important social and economic measures came into force in the Netherlands on Jan. 1, 1957, after the necessary legislation had been passed by the States-General: (1) an old-age pension scheme whereby every man and woman reaching the age of 65 became entitled to a pension; and (2) a law whereby married women were given the right to dispose of their property and monies without needing the consent of their husband.

The old-age pension is basically 804 guilders a year for single people and 1,338 guilders for married couples. It differs from old-age pensions in other countries, however, in that the amount to be received by the pensioner is linked to the cost-of-living index. Premium payments, payable between the ages of 15 and 65, are proportionate to earnings, calculated at between 6½ and 7 per cent for the first five years. It had been estimated that only one-third of all wage-earners had hitherto made provision for their old age.

Under legislation dating back to the *Code Napoléon*, married women were previously unable to dispose of property brought into the marriage or to initiate legal action without their husband's authority. These handicaps are removed by the new law; e.g. a married woman no longer needs her husband's authority for the opening of a banking account, for entering into a legal contract such as a hire-purchase agreement, or for the purchase or sale of property.—(Netherlands News Agency - Algemeen Handelsblad, Amsterdam) **(15071 A.)**

C. UNITED NATIONS. — Dr. Lindt appointed U.N. High Commissioner for Refugees. - Death of Dr. van Heuven Goedhart.

Dr. Auguste Lindt, permanent Swiss observer at the United Nations since 1953, was nominated by Dr. Hammarskjöld on Dec. 6, 1956, as U.N. High Commissioner for Refugees in place of the late Dr. van Heuven Goedhart (Netherlands), who had died in Geneva on July 8, 1956. Dr. Lindt's nomination to this post was unanimously approved on Dec. 10 by the U.N. General Assembly.

Gerrit Jan van Heuven Goedhart (55) was born at Bussum (North Holland) in March 1901, studied at the University of Leiden, and after graduation was appointed to the editorship of the Amsterdam newspaper *De Telegraaf*. He resigned from that paper in 1933 owing to differences on editorial policy and became editor of the *Utrechtsch Nieuwsblad*, a paper distinguished for its strong opposition to Nazism. In 1938 he visited Czechoslovakia and subsequently wrote a book (*Unrest in Masaryk's Country*) in which he exposed Nazi methods in the countries bordering upon Germany. He also visited Finland during the Russo-Finnish War, writing a book on the situation in that country and helping to raise money in the Netherlands for the Finnish people.

After the German invasion of the Netherlands in 1940 he ceased his journalistic activities and became a member of the Commission for the Welfare of War Victims, with responsibility for the housing programme. He resigned when the Germans imposed a rule that no houses should be available for Jews. In 1941 Dr. van Heuven Goedhart became co-editor of the underground newspaper *Het Parool*, organ of the Dutch Resistance movement, which had a clandestine circulation of 60,000. Thirty-seven members of his staff were executed and many others arrested and put in concentration camps, but he himself evaded capture notwithstanding that the Germans placed a price of 100,000 marks on his head. In February 1944 he was chosen by the Dutch Resistance to report to the Netherlands Government in London, which he reached after an adventurous journey through France and Spain. He became Minister of Justice in the "London Government," and after the liberation was appointed Editor-in-Chief of *Het Parool*, now one of the leading Dutch newspapers.

In 1947 Dr. van Heuven Goedhart was elected to the Upper House of the States-General, but resigned from his parliamentary post and the editorship of *Het Parool* on his appointment in 1951 as U.N. High Commissioner for Refugees for a three-year term subsequently extended for four years until the end of 1958. His unremitting efforts to alleviate the world-wide refugee problem earned wide-spread recognition, notably when his Office was awarded the Nobel Peace Prize in 1955 (see 14509 D).

Dr. van Heuven Goedhart collapsed and died from a heart attack while playing a game of tennis. (U.N. Information Centre, London - New York Times - Netherlands News Agency - Algemeen Handelsblad, Amsterdam) **(Prev. rep. 13675 A.)**

D. ATOMIC RESEARCH. — First "Atoms for Peace" Award conferred on Professor Niels Bohr.

Dr. Killian, president of the Massachusetts Institute of Technology, announced at a press conference in New York on March 12 that Professor Niels Bohr, the Danish nuclear scientist and Nobel prizewinner, had been unanimously chosen as the first recipient of the Atoms for Peace Award instituted in 1955 through a grant of $1,000,000 by the Ford Motor Company (see page 14360, second column). The award consists of an honorarium of $75,000 and a gold medallion.

Dr. Niels Bohr (71), one of the founders of modern atomic theory, has been Professor of Theoretical Physics in the University of Copenhagen since 1916, and won the Nobel Prize for Physics in 1922 for his theoretical work on the structure of the atom. Before the First World War he worked with the late Lord Rutherford at Cambridge and Manchester, and was closely associated with Rutherford in the early discoveries into the nature of the atom. Of Jewish descent on his mother's side, Dr. Bohr fled to Sweden in 1943 at the time of the Nazi deportation of the Danish Jews. He was flown from Sweden to Britain in a British military plane and later went to the U.S.A., returning to Copenhagen at the end of the war.

The award was made by a committee consisting of Dr. Killian, Dr. Ralph Bunche (Assistant Secretary-General of the U.N.), Mr. Detlev Bronk (president of the U.S. National Academy of Sciences), Dr. Alan T. Waterman (Director of the National Science Foundation), Professor Arthur H. Compton (formerly Chancellor of Washington University), Mrs. Mildred Horton (formerly president of Wellesley College), and Mr. Marvin J. Kelly (president of the Bell Telephone Laboratories).

The Atoms for Peace Awards have a monetary value almost twice as great as the Nobel Prizes. (New York Times - Berlingske Tidende, Copenhagen - Politiken, Copenhagen) **(Prev. rep. 14360 A.)**

E. GHANA. — Abandonment of U.K. Honours.

A statement issued in Accra on April 2 from the Prime Minister's Office announced that Ghanian citizens would no longer be eligible for British honours and awards. -(Times)

APRIL 13—20, 1957

A. UNITED KINGDOM. — The Budget, 1957-58. - Increased Income Limit for Earned Income Relief. - Higher Children's Allowances. - Concessions to Old People. - Personal Allowances for Surtax. - Entertainments Duty on Living Theatre and Sports abolished. - Reduction for Cinemas. - Tax Relief for Overseas Trading Companies. - Higher Investment Allowance for New Ships. - Abolition of Emergency Petrol Duty.

The Chancellor of the Exchequer, Mr. Peter Thorneycroft, introduced the Budget for 1957-58 in the House of Commons on April 9. Estimates of Ordinary Revenue and Expenditure are shown in the following table:

ESTIMATED REVENUE	£
Inland Revenue—	
Income Tax	2,176,250,000
Surtax	149,000,000
Death Duties	170,000,000
Stamps	60,000,000
Profits Tax, Excess Profits Tax and Excess Profits Levy	255,000,000
Other Inland Revenue Duties	500,000
Total Inland Revenue	2,810,750,000
Customs and Excise—	
Customs	1,204,250,000
Excise	912,850,000
Total Customs and Excise	2,117,100,000
Motor Vehicle Duties	93,000,000
Total Receipts from Taxes	5,020,850,000
Post Office (net receipts)	20,000,000
Broadcast Receiving Licences	31,000,000
Receipts from Sundry Loans	32,000,000
Miscellaneous	185,000,000
TOTAL REVENUE	5,288,850,000

ESTIMATED EXPENDITURE	£
Interest and Management of the National Debt	*640,000,000
Sinking Funds	38,000,000
Payments to N. Ireland Exchequer	69,000,000
Other Cons. Fund Services	10,000,000
Total	757,000,000
SUPPLY SERVICES—**Defence—**	
Army Votes	445,500,000
Navy Votes	316,150,000
Air Votes	506,150,000
Ministry of Supply (Defence)	197,600,000
Ministry of Defence	17,634,000
	1,483,034,000
Less—Receipts from U.S.A. and Germany appropriated in aid of Defence Votes	62,750,000
	1,420,284,000
Civil—	
I. Central Government and Finance	16,014,000
II. Commonwealth & Foreign	86,359,000
III. Home Dept. Law & Justice	91,671,000
IV. Education & Broadcasting	478,983,000
V. Health, Housing & Local Government	792,991,000
VI. Trade, Labour & Supply	81,901,000
VII. Works, Stationery, &c.	78,409,000
VIII. Agriculture and Food	298,052,000
IX. Transport, Power and Industrial Research	202,709,000
X. Pensions, National Insurance & National Assistance	474,403,000
	2,601,492,000
Less—Net reduction in Supply Expenditure	†10,000,000
	2,591,492,000
Tax Collection—	
Customs and Excise and Inland Revenue Votes	58,101,000
	4,069,877,000
TOTAL EXPENDITURE	4,826,877,000
SURPLUS	461,973,000
	£5,288,850,000

SELF-BALANCING REVENUE AND EXPENDITURE	£
Post Office Revenue required to meet Post Office expenditure	307,604,000

* In addition £175,000,000 for Interest on the National Debt will be met from receipts under various Acts authorizing such application.

† This represents the net saving expected to accrue in 1957-58 from the receipt of £20,000,000 from the National Health Service contribution announced on Feb. 19, 1957, and the additional cost of the Agricultural Price Review (£10,000,000).

The principal changes brought about by the Budget are set out below:

Income Tax Earned Income Relief. Extension of earned income relief at two-ninths from the present limit of £2,000 up to £4,000, and thereafter at one-ninth up to £10,000.

Income Tax Children's Allowances. Raised from £100 to £125 as from the year in which a child becomes 12, and to £150 in which a child receiving full-time education becomes 17. For children under 12 the allowance will remain £100.

Income Tax Concessions to Old People. Income Tax exemption to be increased to £250 for single persons of 65 and over, and to £400 for married couples where either is 65. Where the total income slightly exceeds £250 or £400 the tax payable to be limited to one-half of the amount by which the total income exceeds these limits.

The income limit for old age relief was raised from £600 to £700.

Surtax. The starting point to remain at £2,000 for single persons, but the married allowance, the child allowance, and the housekeeper and dependent relative allowances to count for Surtax (as well as for Income Tax), applying for the first time to Surtax payable on Jan. 1, 1958, on 1956-57 income.

Companies' Taxation. Income Tax and Profits Tax exemptions of trading profits of "oversea trade corporations," i.e. those U.K.-controlled and managed companies which conduct their actual trading operations abroad (except shipping, banking, and insurance).

Shipping. The investment allowance for capital expenditure on the construction of new ships increased from 20 per cent to 40 per cent on expenditure due and payable from April 9.

Purchase Tax. Cut from 30 per cent to 15 per cent on floor coverings such as linoleum and carpets; furniture, other than domestic furniture at present liable at the rate of five per cent.: hardware, ironmongery, table-, kitchen- and toilet-ware; cutlery; and domestic appliances and apparatus, other than those operated by electricity or gas or sewing machines.

Entertainments Duty. Abolished for the living theatre and all sports, and cut for cinemas by £6,500,000 through substituting a simpler scale. The scope of exemption from duty for certain entertainments held in rural areas (including cinemas) to be extended for communities up to 3,000 inhabitants, instead of 2,000 as at present. All changes to come into effect on May 5.

Television Licences. Fee raised from £3 to £4 from Aug. 1.

Petrol Duty. The emergency additional duty of 1s. a gallon (imposed last December) to end forthwith.

National Land Fund. Capital to be reduced from £50,000,000 to £10,000,000.

The Chancellor also announced (*a*) that the existing restrictions on bank credit would continue, and that the Capital Issues Committee would once again resume examination of the need for such credits and the period of borrowing (left to the discretion of the banks since 1953); (*b*) that a committee of inquiry into the working of the monetary and credit system would be set up under Lord Radcliffe.

The Chancellor's Budget speech is given below under cross-headings:

Balance-of-Payments Position. Reviewing economic developments in the past year, Mr. Thorneycroft spoke on the external position as follows: "With 50,000,000 people living here upon a small island and dependent upon external trade and confidence in sterling, it is this which is always uppermost in the mind of any Chancellor . . . Up to the middle of last year the balance of payments was responding well to the measures introduced by the Leader of the House [Mr. Butler] and the Prime Minister [Mr. Macmillan]. The visible trade gap had been reduced and our invisible earnings were going up. As a result the U.K. earned in the first half of 1956 a surplus of around £150 million on our current transactions with the rest of the world. At the same time our gold and dollar reserves rose by nearly £100 million while other countries' holdings of sterling were reduced. Altogether, therefore, we seemed to be recovering fairly well from the difficulties which had arisen in 1955."

After explaining that the second half of the year was normally more difficult for the balance of payments, Mr. Thorneycroft said: "To the seasonal factors must be added, in 1956, the events in the Middle East. So far as I can judge, these events in fact affected our commercial position less than might have been expected. Shipping delays disturbed the monthly figures for visible trade, but did not appear to affect the average. As recorded by the balance-of-payments estimates, which, of course, deal with the payments rather than the arrivals, neither imports nor exports deteriorated appreciably in value between the first half of the year and the second. In the invisible account our net earnings on oil transactions were naturally reduced. On the other hand, the interest payments on the North American loans were on this occasion paid into a special capital account and so did not affect our current balance-of-payments position. In the event, despite the seasonal deterioration and all the difficulties of the Middle East situation, we earned in the second half of 1956 a surplus of £79 million, compared with a deficit of £102 million in the second half of 1955.

"But, of course, our problem was not on our current account. It was not concerned with the underlying strength of our position as a trader. It was a different problem, concerned with our function as a banker for a large part of the world. This is, indeed, established by the detailed balance-of-payments figures . . These show that during the second half of the year countries outside the sterling area reduced their holdings of sterling by £84 million and that there were other large adverse capital movements It was these factors which were responsible for most of the strain on our reserves."

After recalling Britain's mobilization of dollar reinforcements, Mr. Thorneycroft referred to the increase in reserves in the first quarter of 1957 "without any call being made upon our I.M.F. stand-by or the Export-Import Bank line of credit." He went on: "This is of course a great improvement on the stormy events of the previous quarter. Even so, our progress has not been all we could have wished. During the year we earned a current surplus of £233 million. This was much better than the deficit of about £80 million which we incurred in 1955. Nevertheless, by more exacting standards, we must judge it to be inadequate. Put in the simplest terms, we kept the exports rising while we checked the imports. The instruments which we used were the credit squeeze, deliberately high levels of taxation, and controls on hire-purchase transactions. The price we paid was a check to the growth of total industrial production and of personal consumption. Few men would judge us to have been wrong in thus deliberately channelling our resources into investments and into exports.

Economic Development in 1956. "The statistical story of these events is given in the Economic Survey. It is a story, not of stagnation, but of immense variety. Although total production and consumption did not rise, there were wide alterations in the pattern of what we made and of what we bought. 1956, then, was a year of considerable activity, but at the same time of vitally needed redeployment. The inflationary pressure fell - the number of jobs and the number of men seeking jobs came more closely into balance. A situation of acute labour shortage ended without losing the benefits, social as well as economic, of full employment.

"The criticism is made that 1956 saw a check in the growth of industrial output. I want to face that criticism fairly and squarely. In 1955 production was high and the rate of production was growing. But in the process we were bringing imports into the country faster than we could earn the money to pay for them. There was the beginning of a situation similar to that which got out of control in 1951. We had to apply a check As the Prime Minister put it in his Budget speech last year, 'I think we have learnt this lesson from the events of the past year. We cannot afford to run our economy flat out with more jobs than men to fill them, more orders than industry can meet, easy profits at home and rising costs. There is really no future in importing extra materials that we cannot afford in order to turn them into extra goods that we do not export.'

"We intended to reduce the pressure and we did reduce the pressure. We greatly improved the balance of the economy. In the process some potential production was lost and that was inevitable. It is the difference between driving a machine flat out with the risk of breakdown and slowing it temporarily in order to resume a normal sustainable speed. I would make this further point. While we deliberately used our industrial capacity less intensively in 1956 than in 1955, the capacity itself was growing . . . because investment was maintained at a high level. We were building the means to produce more and to produce it for export markets. The process of economic growth cannot be absolutely regular. There will be years of growth and years of consolidation. Our long-term growth will be all the sounder for the consolidation we undertook in 1956.

The Costs and Prices Problem. - Need for Restraint. "Now, as to cost and prices. What happens to them is crucial to our competitive position and therefore to our economic future. This is indeed a national rather than a party problem. In both technical and human terms it is the most difficult issue which this country had to face. My right hon. friend [Mr. Macmillan] spoke last year about a plateau [see 14977 A]. Indeed, retail prices rose only moderately since last April—an increase of about 2 per cent. Taken by itself this is not a bad record. At the worst it is not more than a gentle slope. In the same period the index of wage rates rose by about the same amount. But since then there has been a settlement on the railways for about 5 per cent. We all know that other discussions are going on, and I do not intend to comment upon them because it would be quite inappropriate to a Budget speech.

"I want, however, to comment upon a rather longer view. The truth is—and everybody knows it—that we have all been trying to take more out of the economy than we put into it. Between us we have all been forcing prices upward, with the increases in incomes putting up the cost of living and the cost of living leading to demands for higher incomes. Between 1946 and 1956 money incomes per unit of output increased by about 50 per cent. In other words we tried to get half as much again for doing the same amount of work. Is it any wonder that prices rose? Between 1955 and 1956 the nation's total output increased by £1,200 million in money value, but only by £240 million in real terms. We cannot take £1,200 million out and put £240 million in without doing a good deal of damage to our economy and to sterling in the process.

"Now what can we do about it? Should we try to hold the spiral by subsidizing the cost of living? Should we try to obscure the effect of rising costs by paying subsidies direct or indirect? This process, of course, requires that we should take back from the taxpayer what he is gaining in subsidized prices. As Sir Stafford Cripps found, it is a fantastically costly operation. It introduces a wide range of artificial factors into the economy. Unless it is accompanied by high taxation it adds to the very inflation it was designed to obscure. When at last we find that we cannot afford it and have to modify the subsidies, this process of itself lends force to further wage and other income demands. I could not recommend it to the House.

"What other courses are open? There are some who say that the answer lies in savage deflationary policies, resulting in high levels of unemployment. They say that we should depress demand to a point at which employers cannot afford to pay and workers are in no position to ask for higher wages. If this be the only way in which to contain the wage-price spiral it is indeed a sorry reflection upon our modern society. To slash production, to drive down investment, to push up unemployment to a level at which, despite high world demand, we have manufactured our own depression is, to say the least of it, a high price to pay for price stability.

"This does not mean that we must drift again into inflation, which puts profits so high and makes labour so scarce that dividends and wages are practically forced beyond our economic capabilities. It does mean that universal and permanent depression should not be regarded as a pre-requisite to true stability.

"But if we are not to rely upon the policies either of subsidy or of all-out deflation, then we must seek a degree of restraint and commonsense and recognition of common interest far stronger than exists to-day. Let us try, wherever we sit in this House and whatever part we play in the economy, whether we come from the ranks of management or workers, to face the realities which now confront us.

"Many of our competitors, friendly nations with whom we are allied or associated, are practising more restraint, making greater efforts, showing a better realization of world economic conditions, than we are. I will content myself by saying this we ought all to ask ourselves whether we have adjusted our outlook to the responsibilities as well as to the benefits of high levels of employment. A money income raised prematurely and beyond the real resources we possess is at best only a partial and ephemeral gain to the man who gets it and another blow to those who are living upon fixed incomes.

"We can earn only what we produce. Yet restrictions on production still exist on both sides of industry. In the difficult times which lie ahead businesses must be ready to change their methods and their products, just as those who work in them must be not only ready but anxious to seek a fresh approach, which is the only way that they can secure benefits that will not turn out to be illusory. If we are to find a solution to this problem we all have a part to play, and perhaps some sacrifice to make management and workers and the spending Departments of the Government.

"I am sure that no-one in this country wants to see our money steadily losing its value or sterling going the way of so many currencies in the past. If we are to find a solution to such problems as these we must at least have the courage in Government, in management, and the trade unions to state them bluntly and to be prepared to discuss them fully and frankly with one another. I make no party point of this. If as a nation we solve this problem, and we can only solve it together, there is no limit to the achievements which could be ours under any Government. If we fail there is no Government of any Party that this country has to offer that can stand between us and a drab decline in all our fortunes. The Government has its role to play in grappling with inflation, but no Government can solve the problem on its own."

Out-turn for 1956-57. "'Above the line' there was a surplus of £290 million, compared with an estimated surplus of £460 million, which is to be increased during the year by £100 million as a result of savings on expenditure provided for in the original Estimates. 'Below the line,' however, the position has turned out rather differently. Total payments were £836 million £185 million less than was estimated, whereas receipts were only £3 million below the estimate. The deficit was thus only £621 million, compared with an estimated £803 million.

"The main contribution to this saving was a substantial decline in the provision of capital for local authorities. Against an estimate of £220 million for this purpose, issues have had to be made of only £109 million. These figures reflect the successful application of sound financial principles to the capital expenditure of the local authorities. The authorities attract savings by borrowing in the market as far as possible and they now pay the market price for their capital whether they raise it from the market or from the Exchequer. I shall press forward with this policy in the coming year. I realize that the market cannot meet all the requirements of the local authorities, but I shall continue to rely on the sound judgment of the Public Works Loan Board to prevent any unnecessary demands on the Exchequer.

"Net Exchequer advances to the National Coal Board amounted to £26 million, £37 million below the estimate. This does not mean that the rate of investment in coal was reduced, but that the Board was able to finance rather more of its investment from its own resources. Last year's Finance Act provided that the Exchequer should supply the capital needs of the other nationalized industries for the two years ending March 31, 1958. The Prime Minister estimated that in 1956-57 issues of some £350 million might be required for this purpose. In the event, £284 million has been advanced under the Finance Act and £52 million under the new Transport (Railway Finances) Act, making a total of £336 million for this group of industries [see 15438 A].

"The out-turn can therefore be summed up as follows: Above the line there was a surplus of £290 million. Below the line the deficit was £621 million. Thus the overall Budget result which determined the amount of expenditure that had to be met by borrowing was a deficit of £331 million.

National Savings. "If I felt disappointment on learning that the fruits of the tax gatherers had not quite come up to expectations, it was offset by the knowledge that the National Savings Movement had had an exceptionally good year. In his Budget speech last year the Prime Minister improved and enlarged the whole range of National Savings and made a challenge to which it has risen nobly. As a result, the total of National Savings now stands at £6,240 million —£116 million more than a year ago.

"Both the Post Office Savings Bank and the Trustee Savings Banks did better than last year. But the major contributions to the net increase in savings were made by the new Savings Certificate and the Premium Savings Bond. Some people have been suggesting that the Premium Savings Bond is a failure. That is a curious way to describe a security which, even after the first rush had subsided, has continued to bring in several million pounds a month And let us see how these figures will look after the monthly prize drawings start in June. It is quite clear we shall need this help every bit as much in the coming year as in the past year. I am sure we shall get it.

National Debt. "The National Debt decreased by £34 million in total over the year." After giving details of the past year's borrowings, Mr. Thorneycroft said: "The effect of the year's operations has been a reduction of almost £600 million in the level of Treasury Bills outstanding. In other words, over the year the total of the National Debt was slightly reduced and there was a fairly substantial change from short-term to long-term borrowing."

Revenue Estimates for 1957-58. "In some respects the prospects are encouraging. On the basis of existing taxation Inland Revenue duties at £2,876 million are expected to yield £171 million more in the coming year. From income-tax we expect to collect £2,230 million —an increase of £116 million on last year, mainly owing to the effect of increased wages and salaries. We also expect to get from Profits Tax an extra £60 million, mainly as a result of the increase in the rates made last year. Surtax, death duties, and stamp duties are estimated to produce about the same yield as last year.

"The revenue from the Customs and Excise duties on the existing basis of taxation is estimated at £2,150 million, compared with receipts of £2,101 million last year. None of the estimated yields shows a substantial rise or fall on last year's figures. I expect £93 million from motor vehicle duties, £2 million more than last year."

The estimate for non-tax revenue was £268 million, compared with £261 million last year, but under this heading one receipt was not really revenue at all "but merely a book-keeping windfall," viz., the interest of £37 million due last December on the U.S. and Canadian loans, which was paid into a special account and was included in the charge for interest on debt in 1956-57. Agreement had since been reached with the U.S. and Canadian Governments for the deferment of this interest payment [see 15440 A], and after the U.S. Congress had ratified this agreement the interest would be returned to the Exchequer from the special account. "I am bound to include this £37 million in my estimate of miscellaneous revenue," he added, "but I shall not regard this windfall as having any significance when I come to consider my Budget proposals."

"Altogether, revenue is estimated at £5,387 million—£229 million higher than last year's yield."

Expenditure Estimates for 1957-58. - Exchequer Prospects on Existing Taxation Basis. "I estimate total expenditure 'above the line' in 1957-58 at £4,827 million—£41 million less than the actual out-turn for last year. The Consolidated Fund Services will require £757 million in the coming year: £21 million less than last year's estimate. This relief to the Budget results largely from the fall in the short-term interest rates. On the other hand, supply expenditure is estimated at a total of £4,070 million—£26 million more than last year's out-turn. This increase is, of course, the net effect of the big rise in civil expenditure, notably in social services and a reduction in defence expenditure.

"If, therefore, existing taxation were to remain unchanged we should have a total revenue estimated at £5,387 million against expenditure of £4,827 million, giving an estimated surplus 'above the line' of £560 million. This compares with an actual surplus last year of £290 million.

"I expect the net total of expenditure 'below the line' to be a little less than the actual total last year. I estimate the needs of local authorities' borrowing in the coming year at £100 million. The Coal Board will need to make a larger call on the Exchequer in order to continue its investment programme, with net advances of £45 million, compared with £26 million last year. Issues to the other nationalized industries may amount to some £290 million, against which repayments of £14 million may be expected, and £50 million is likely to be required for the Transport Commission under the Transport (Railways Finances) Act. The total net expenditure below the line is put at £587 million.

"Overall, therefore, remembering that on the existing basis of taxation we have an estimated surplus 'above the line' of £560 million the deficit—that is, the net expenditure we may need to meet by borrowing—will be £27 million next year, compared with £331 million in 1956-57. These figures are much better than at one time I thought they would be. At any rate they could be a good deal worse. I would emphasize that the improvement in the Budgetary position which the figures indicate has not been achieved just by luck. They are the outcome of considerable efforts by my two predecessors and recently by myself, with the co-operation and support of our colleagues, to keep the level of Government expenditure under control."

The Chancellor then referred to the £1,420 million required for Defence, which, as a result of the Defence policy review [see 15493 A], was £79 million less than the original estimate and £105 million less than actual expenditure last year. "On the civil side," he continued, "we are providing for expenditure of £2,650 million—that is, £189 million above the Budget estimate of last year. This figure takes credit for the £20 million which we expect to save this year by the new National Health Service contribution [see 15397 A], but also provides for an additional £10 million on account of the agricultural price guarantees [see 15465 A].

Need for Vigilance over Expenditure. "During recent months we have clipped and cut expenditure over a wide field, but we are still spending at a high level . . . Even after the changes we are making, the cost of the Social Services, at £1,677 million, will be £124 million more than the estimates of a year ago. Among them education, at £415 million, will be £63 million more, and the National Health Service, at £529 million, will be £28 million more. Exchequer grants to local revenues, at £105 million, will cost £21 million more.

"If expenditure upon this scale is to be supportable, and certainly if there is to be any expansion of the Social Services, several things are necessary. The Government must be free to continue to study ways and means of reducing costs without impairing the essential services themselves. Parliament must recognize that checks and limits must be placed on the growth of even the most useful forms of spending. Indeed, public pressure for economy in all fields is the greatest help a Chancellor can have, and the country as a whole must recognize that the surest way to provide against the need for further distasteful economies is to increase the total of the national product out of which these services have to be provided. Put simply, if we want to retain our Social Service State we must earn it by our own efforts."

National Land Fund. Referring to the position of this Fund, which was created in the 1946 Finance Act by Mr. Hugh Dalton, Mr. Thorneycroft said: "The intention was that much greater use should be made of the power of the Inland Revenue to accept land in payment of estate duty. Mr. Dalton's concept was, I think, an imaginative one, and we have developed it by taking power in 1953 and 1956 to accept works of art in settlement of estate duty. But the £50 million of securities with which the Fund began have by now grown, with accumulated interest, to a value at maturity of nearly £60 million. The Fund at present has an investment income of over £1.4 million a year. Its average expenditure since its creation has been less than £200,000 a year. In other words, its capital and its resources are out of proportion to its likely expenditure.

"In these circumstances it is hardly surprising that the Public Accounts Committee has recommended that we should return part of this large and growing balance to the Exchequer. I am proposing to reduce the Fund's capital to £10 million by cancelling some of the securities held in it. This will for a number of years suffice to meet all demands on the Fund under present policies, which we mean to continue. This will, of course, have no effect upon the Budget figures."

Economic Prospects for 1957-58. "What can and ought to be done in the Budget depends not only on issues of Exchequer arithmetic but also on the economic outlook for the coming year. I have every confidence that we can look forward to an increase in exports. World trade is growing, and our manufacturers have been making a strong effort to expand their markets abroad. Orders have been coming in at a high rate. There is wider appreciation of the opportunities for our goods in the vast North American market. Whether we shall this year expand or fall short of the increase of 6 per cent in the volume of exports achieved last year I cannot tell. It will depend on our ability to deliver the right goods at the right time and at a competitive price. I confidently hope for a substantial increase. Certainly the opportunity to export must be the first and most important answer to complaints about stagnation. The condition of an expanding economy is that we should sell more abroad. Increased production on any other terms will merely increase our import bill. If we sell more abroad we shall achieve not only our first objective, which is a larger trading surplus and an increase in our reserves, but our second, which is expansion at home upon a safe and sound basis."

Turning to consumption, the Chancellor said: "Last year there was virtually no increase in consumers' expenditure in real terms. Instead, there was a big increase in personal saving and repayment of debt. Part of this was a temporary adjustment due to the pressure of credit. Once people have paid their debts they not unnaturally tend to buy more. The latest retail trade figures confirm this expectation. It seems likely, therefore, particularly in view of recent wage settlements, that there will be some increase in consumption this year. It would be a stony-hearted economist who would altogether deplore this. The objective of production is, after all, consumption, but we must watch that we do not consume too much at the expense of other objectives vital to our economy.

"This brings me to investment. Of course, we have got to have a high investment economy. This is a condition of our survival. But people sometimes forget what a rapid increase there has been in investment. Since 1952 gross fixed investment has increased by 7 per cent a year, compared with a growth of just over 3 per cent a year in total national output. Thus year by year the proportion of our resources devoted to fixed investment has steadily increased. It was 12 per cent of the gross national product in 1947, 14 per cent in 1951 and 16 per cent in 1956.

"True, some countries do more than this, just as we must ourselves seek the opportunity to do more. Let us, however, not forget that circumstances in other countries are often quite different to our own. Some have rapidly growing populations to provide for. Some have smaller defence burdens. On the whole, we have a good record in home investment. I wish that we had an equally good record of investment in gold and dollar reserves.

"At any rate in the coming year, and indeed beyond, I see no sign of stagnation in investment. In the public sector the plans designed for atomic energy, for coal, for transport, are large. The problem posed by investment plans for the basic and in part publicly-owned sector of the economy is not in the main whether we contemplate too little, but how we can manage to do so much. And yet we are right to do it. Ask any industrialist. Few would say that in this sector we are guilty of being overbold. We need more power, more steel, and more transport facilities. Investment such as this is indeed vital to the economy of our country.

"As to the private sector itself, the rate of investment has mounted sharply in the the last three years. Future plans vary. Some firms may wish to pause before making a further advance. But the pressure for capital on all sides certainly suggests to me that too hasty or too vigorous encouragement might well lead us into just that over-extension of the economy which we have been at pains to correct and avoid.

"Investment is at a high level. If we can ensure that in both the basic and manufacturing sectors it is pushed quietly and steadily up over the years, if we can do it in a volume and at a pace within our material and monetary resources, we shall make a great contribution to our economy. But investment must be matched by savings. To spend too much too quickly, to watch inflation grow, to try to correct it by raising taxes and restricting credit —this is a sequence of events tempting to embark upon but to be avoided at all costs."

Summing up the economic outlook, the Chancellor forecast expansion in exports, some increases in consumption, and probably a slight increase in fixed investment as well. "Thus there is a fair promise of renewed growth this year," he said, adding: "It must be remembered that our first objective is the earning of a surplus on overseas current account substantially larger than that of recent years in order to build up the reserves, to repay borrowing, to finance overseas investment, and to provide for further drawings by the holders of sterling balances. We need this not only for our own security as a trading nation, but also to honour our commitments as a world banker. We hold, after all, the reserves of many other countries within the Commonwealth and outside it, and are the centre of the sterling system on which so much of world trade is based.

"After making full allowance for the factors I have mentioned I see some grounds for cheerfulness. As I see it, the temperature of the economy has been brought down to a more normal level by our disinflationary policies in the last 18 months. Resources appear to be at least adequate to the demand on them. It is reasonable to hope for further substantial export gains."

Monetary Policy. - Continuance of Credit Restrictions. "In this task the banks and the Exchequer have their part to play. So far as the Exchequer is concerned, we must clearly continue with our efforts to influence the monetary system by the maintenance of a satisfactory Budget balance, by vigorous National Savings, and by full use of market opportunities for funding." The monetary measures available are really: Bank Rate and the rest of the interest rate structure; measures connected with Exchequer financing and open market operations; and the specific controls over credit exercised through the Capital Issues Committee and the statutory restrictions on hire-purchase. Continued use has been made of these measures during the past year, and we can claim that they have been by no means ineffective in checking inflation.

"But . . . these measures would not have been as effective as they have been without the active co-operation of the banks in restricting credit. Given the practical limits to the monetary pressure that could be brought to bear on bank liquidity, it has been necessary for the Government to inform the bankers from time to time of the continuing need for credit restriction and to ask them to respond to the national need. My predecessor met representatives of the banking organizations last July and they undertook to meet the Chancellor's wishes and the national needs . . . I think the figures showed that, despite some recent increases in advances, the banks have lived up to their undertaking to do so. Over the year to Feb. 20, 1957, advances to customers other than the nationalized industries showed a net increase of £25 million on a total of £2,000 million. But the detailed figures reveal big increases in bank accommodation for just those industries that play the leading part in the export drive and provide the national economy with its basic services, offset on the other side by substantial reductions in the credit given for less essential purposes. Thus, in spite of rising costs and heavy demands, the banks have succeeded both in keeping the total volume of bank credit in check and in distributing it in accordance with national needs.

"It seemed to me appropriate before opening this Budget to discuss the credit situation with representatives of the banking organizations and to indicate to them the directions in which I need their continued co-operation. They were forewarned when on Feb. 7 last I said that the change in Bank Rate was 'not a signal for bankers or others controlling the sources of finance to relax credit or to ease restrictions on lending.' That statement holds good. The bankers cannot be expected to welcome such a statement, implying, as it does, a continued restriction on their enterprise and competition. But they recognize it as an unpleasant necessity, and I am glad to say that they have renewed their assurance that they will continue to maintain a restrictive attitude towards advances and will be particularly critical towards advances for the less essential purposes.

"I recognize that some increase in the level of advances may result from the provision of bank finance for purposes of the highest priority. I am confident, however, that the banks will keep credit within bounds by their vigilance over the whole field and by strict control over lending for purposes that are not of first importance to the national economy. I cannot say for how long this effort will be necessary, but I intend to keep in close touch with the banks through the customary channels in order to meet their desire to respond promptly to the national needs.

Tighter Bank Credit Control by Capital Issues Committee. "I also intend to support the bankers' efforts by a change in the arrangements for the statutory control over borrowing exercised by the Treasury on the advice of the Capital Issues Committee.

"The banks are aware that, notwithstanding the statutory exemption of borrowings made in the ordinary course of business, bank advances should not in general be made for capital expenditure. Accordingly, it has been, and will continue to be, their practice to treat all applications from their customers for bank credit to finance investment in buildings, plant, and other fixed capital as not being in the ordinary course of business and therefore as requiring Treasury consent under the Control of Borrowing Order. In December, 1953, the Capital Issues Committee were asked to confine their attention to the purpose of such loans, leaving the terms to the discretion of the banks. I have decided to do away with that limitation and I propose to reinstate the previous practice by which the Committee also concern themselves with the need for bank finance and the period of such borrowing.

"I must emphasize that my reason for wishing to restrict bank finance for such purposes is not that an overdraft would be commercially unsound the bankers, not the Treasury, must remain the judge of that - but because of the danger that long-term investment financed from bank credit may add to the volume of investment without a corresponding increase in real savings. That is why I have to-day written to Lord Kennet to ask the Capital Issues Committee that, in addition to examining the purposes of such borrowing, they should also consider whether bank overdraft is the appropriate method of finance. I have asked that they should not recommend consent, however good the purpose of the loan, unless they are satisfied, either that there are exceptional features in the case which make it impossible for the applicant to raise the loan from non-banking sources, or that the proposed bank loan is a strictly temporary and short bridging operation pending the completion of funding arrangements. By this means I am hopeful that control over credit will be maintained. But the very fact that these arrangements have to be made is evidence that the monetary machine is working under great difficulties.

Committee of Inquiry into Monetary and Credit System. "I think there is general agreement as to the objectives of monetary policy. This country stands determined to maintain a fixed and stable exchange rate. The primary requisite for this is that we shall be able and determined to avoid inflation at home. Equally it is also agreed policy to avoid slumps and severe unemployment, if these perils should again confront us. These objectives are not open to question. But there are the widest differences of opinion among those best qualified in this difficult field about how to attain them. These differences have little or nothing to do with political opinions. Examples of the various schools of thought are to be found right, left, and centre.

"We have in the Macmillan Report an authoritative exposition of the system as it worked before 1931. But the problem then was how to find a way to pump more credit into the system. That is not, to say the least, our main anxiety this afternoon. Moreover, much else has changed in this field since 1931. The problems of Exchequer finance, including the management of the vast debt so largely a legacy of wartime years, are altogether different in scale. There have also been considerable changes in the structure of the banks' assets, making them less susceptible to monetary pressure. Such changes in conditions have been widely recognized both in this House and outside, and for this reason suggestions for a Committee of Inquiry have been canvassed for the past year or more. Mr. Macmillan considered them carefully last Spring. He heard the views expressed to him by a small deputation led by Sir Robert Boothby. He considered at that time that an inquiry would be premature until we had more experience of the application of Bank Rate and of the credit 'squeeze.'

"In the last two months I have considered the matter afresh . . . I have now decided, after consultation with the Bank of England and with its full agreement, that the stage has been reached when an inquiry should prove useful and constructive. A committee will therefore be set up with the terms of reference: 'To inquire into the working of the monetary and credit system and to make recommendations.'

"The inquiry will be primarily directed to reviewing the working of the system in the conditions of to-day, taking particularly into account the great influence now exerted upon it by the public finances and the need to maintain a high level of savings and investment. It will be concerned with the achievement of the best possible system of money and credit while observing to the full the international obligations in the matter of the exchange rate, and in other matters, which H.M. Government have assumed and have every intention to honour. Lord Radcliffe has consented to serve as chairman and the names of the other members will be announced as soon as the appointments have been completed.

Taxation Policy. "Having thus as it were both guarded my flank upon the credit front and set in hand a study of our future strategy in these matters, I can turn from monetary policy to fiscal considerations and consider to what extent and in what direction I can properly reduce taxation, having regard to the state of the economy as a whole . . .

"The fact that our economic prospects cannot be assessed in advance with precision does not lessen my responsibility for exercising the best judgment I can in the light of the information and forecasts available to me. In this part of my task at least I have not been lacking in advice. Words of caution from some and of encouragement from others have been falling on my ears for weeks past.

"Let me say at once that I reject the extremes of both opinions which have been urged upon me. I reject unequivocally the view that the sole duty of a Chancellor is to remove taxation at whatever risk to the economy and without regard to the consequent inflation that would certainly result. That is the language of irresponsibility. Actions of that character might conceivably buy from the undiscerning a momentary popularity. It would indeed be the easiest possible task for any Chancellor to boost home consumption and investment at the cost of lower exports, of higher imports, and a thumping external deficit. It is, however, a policy in which I should be prepared myself to play no part whatever.

"Nevertheless I must fairly say that the other extreme of opinion contains elements of almost equal folly. I personally do not share the view of those who appear to consider that high rates of taxation will of themselves provide a sovereign remedy to all our ills. They are rather a reflection of an overstretched economy. The answer to an overstretched economy is not to tax it but to relax it.

"A satisfactory feature of the present Budget figures is the very great improvement in the overall Budget position compared with the out-turn for the past year. With a great deal of effort and through restraint of expenditure we have eased the problem of financing the public outlay. We have thus carved out some kind of opportunity now—not next year but now—to make at least a modest start towards a reduction in the burden of taxation which presses so heavily upon the people of this country.

"I cannot do much more today than to chart a pattern of progress, to place a few directing arrows upon it, and to take one or two firm steps along their paths. These arrows point to what I believe to be our necessary and desirable goals.

"First, greater industrial efficiency and competitiveness. Our industries must be given greater opportunities to compete more successfully in world markets.

"Second, the provision of better incentives and opportunities for initiative and effort.

"Third, the easing of the pressure of the tax system where this bears most hardly on individuals and families.

"In sum, I seek to create conditions in which our economic future, collective and personal, is seen by all to be worth striving for and saving for.

"I must emphasize once more that the general pattern of my Budget must be dictated by the need to place and keep our external position on a really sound footing. Therefore the room for manoeuvre is limited. But there is still room for some manoeuvre and we must try to use it wisely. I judge that, against the background of a Budget so nearly balanced overall, I can properly reduce the burden of taxation by a figure of around £100 million. This will leave us with a much bigger surplus than that realized last year, and an overall deficit that can be covered by real savings."

Entertainments Duty. - Television Licence Fee. After recalling that during the debates on the Finance Bill last year Mr. Macmillan had given an assurance that he would, in the course of the year, undertake a comprehensive review of the whole structure of the duty, Mr. Thorneycroft went on: "When I succeeded him as Chancellor of the Exchequer I continued his work. I now have a number of proposals to make. This duty now brings in about £40 million a year. There can be no question of abandoning a yield of this order of magnitude. Entertainment is not in itself an unreasonable object of taxation, and I must obviously continue to look to the patrons of entertainment for a substantial amount of revenue which I should otherwise have to collect in some different ways.

"On the other hand, there have been many changes since the duty was introduced in 1916, and indeed since it was last revised in 1954. Some forms of entertainment are expanding. As they expand they affect the profit of the other types. In particular, television has in recent years grown to be a powerful competitor with other entertainments, and I have had to consider whether it is bearing a share of taxation comparable with its rivals. I have not overlooked the fact that anyone who buys a television set pays a substantial amount of purchase tax upon it. But there is no tax on its use comparable with the tax on the admission price to a cinema.

"I am satisfied that a fairer balance in the taxation of these competitive entertainments is desirable. I accordingly propose that an Excise duty of £1 should be levied on each combined television and radio licence, which at present costs £3. There will, of course, be appropriate rates for the comparatively few cases where television licences are issued at something different from the standard charge. This new duty will not, of course, apply to licences for sound reception only. It will operate from Aug. 1, and I estimate that it will yield £6 million in this financial year and £8 million in a full year.

"As to the rest of the Entertainments Duty, this duty is at present charged under three scales. The highest scale applies to the cinemas, which in 1956-57 contributed some £34 million out of the total revenue of about £40 million a year . . . The lowest scale applies to theatres and other living stage entertainments, while sports are charged at intermediate rates. No-one has pretended for some time that the present arrangements for the duty are logical or satisfactory. After hearing a good deal of advice and considering with great care all the arguments that have been advanced by the many interests concerned, I have come to the following conclusions:

"First, I propose that the living theatre should be freed from duty altogether. The cost of this, including certain other entertainments at present charged under the first scale, will be £2½ million.

"Secondly, I propose that all sports should be freed from duty altogether. This, with other entertainments charged under the second scale, will cost the revenue £3¼ million.

"Thirdly, I propose that the cinemas should be relieved of duty to the extent of about £6¾ million. I propose to achieve this by substituting a much simpler scale for the present complicated scheme. The new scale will be 50 per cent of the amount by which the total admission price exceeds 11d.

"The exemption in favour of indoor entertainments in rural areas will continue to be necessary to cover cinemas in such areas, and I propose to widen its scope by raising the population limit from 2,000 to 3,000. In this way it will be possible to help a number of villages and rural areas which are within the purpose of the exemption but which are not, at present, within the letter.

"These changes in entertainments duty will operate from May 5 and will cost £12¼ million in a full year, or £11½ million this year. The net cost, allowing for the extra revenue from the television duty, will be £14¼ million in a full year and £5 million this year . . .

Taxation of Overseas Trade Companies. "The second major commitment which I inherited was an undertaking to consider the taxation of U.K. companies that carry on business overseas. Such companies, when they are controlled and managed in this country, have to pay tax at our very high rates on their profits earned abroad, subject to a set-off against the U.K. tax bill for similar taxes paid overseas. This position has been much criticized over many years on the ground that the U.K. concern trading in an overseas country where tax rates are lower than ours is at a disadvantage as compared with local competitors. It was fully reviewed by the Royal Commission under Lord Radcliffe's chairmanship which reported in 1955. The Commission put forward a novel idea for dealing with the problem, which I propose in substance to adopt.

"The idea is that our law should recognize as entitled to special tax treatment a class of Overseas Trade Corporations. Broadly speaking, these will be U.K. companies controlled and managed from this country but having all their actual trading operations abroad. Concerns that qualify as Overseas Trade Corporations will be exempted from income-tax and profits tax on their trading profits earned abroad.

"Of course, when they pay dividends or other distributions to shareholders out of those trading profits, those dividends will be liable to U.K. income-tax; and if they are received by a U.K. company, to profits tax also. In appropriate cases there would, of course, be relief for taxes paid abroad.

"The companies to be covered . . . will include those wholly engaged overseas in mining, oil-winning, agriculture, manufacture and processing, public utilities, and distribution. I do not propose to include shipping, since I am proposing to deal with the industry in a different way. Nor do I propose the inclusion of financial activities such as banking and insurance, since I do not think they could properly be brought within the underlying conception of the scheme.

"I must also give some precision to the proposed treatment of selling activities overseas. The Royal Commission contemplated that some Overseas Trade Corporations would be the exporting side of U.K. manufacturing businesses which would obtain merchandise from the U.K. and send it overseas for sale there. We must, however, be careful that this new relief has no possible suggestion of an export subsidy about it, and the legislation will make it clear that, to qualify as Overseas Trade Corporations, concerns dealing in U.K. goods must buy those goods 'free on board' at a U.K. port at the price appropriate to a transaction between independent persons. Thus only profits arising from that point onwards which can be seen to flow from selling activities outside this country will come within the exemption.

"There doubtless are some concerns which already have all their trading operations outside this country and can qualify as Overseas Trade Corporations immediately. But there are also many mixed businesses with their operations partly here and partly overseas. To secure the benefit of my proposals such concerns will have to 'hive off' their overseas business into a separate company that fulfils the conditions for qualification as an Overseas Trade Corporation.

The legislation to put through a major reform of this kind will inevitably be long and complicated . . . As well as a close definition of this new class of corporation there will clearly have to be provisions defining distributions that are to be taxable and the method of dealing with them, and possibly safeguards against abuse.

"I believe these proposals to be a justifiable reform in our tax system and a legitimate help to companies that plough back their profits overseas in competition with those who operate under easier tax laws. Many of them operate in Commonwealth countries and in the Colonies. Under the impetus of this reform more may well do so. As things stand at present a British company engaged in such overseas operations may be at a serious disadvantage compared with its competitors. We must seek to remove these disadvantages. Moreover, under the existing law any such British company is a somewhat tempting object for a take-over bid by foreign buyers, who can often base their offer upon a future tax position more favourable than would be open to any British bidder.

"Although the remission of the tax will represent an intitial loss to the balance of payments, these proposals are a step towards more investment, more trade, and more exports. I am confident that this

is a sound measure which will bring us increasing rewards in future years. The cost to the Revenue will not be negligible. I cannot, of course, give precise figures, but I estimate the cost at £25 million this year and something over £35 million next year."

Purchase Tax. Announcing the reduction of the tax rate from 30 per cent to 15 per cent for domestic kitchenware and tableware, cutlery, certain furniture, and floor coverings, the Chancellor said: "It is designed to benefit the ordinary householder, and in particular those families with low incomes who may fail to derive advantage from taxation relief in other fields. The concessions which I propose will be of help in the home and especially perhaps to those setting up house for the first time . . . These changes will operate as from to-morrow; their cost will be about £18 million this year and about £24 million in a full year. I believe that this will not only be welcomed by consumers but will be of help to a number of British industries affected . . ."

Petrol Duty. "When the additional duty of 1s. a gallon was imposed on petrol and certain other light oils last December," the Chancellor said, "it was made clear that the extra duty was temporary. In fact the Act lays down that it is to be removed not later than one month after the end of rationing of all the products liable to the duty. But we do not want to continue it any longer than we must. Although our oil supplies are not yet back to normal, they have improved sufficiently to justify the removal of the additional duty. I have therefore approved the issue of a Treasury Order under which the duty will be restored to the former rate of 2s. 6d. a gallon for light oil and derv delivered from the refinery or bonded storage from 6 p.m. this evening . . . In the immediate future this will mean a definite loss of revenue. On the other hand, as soon as rationing comes to an end—and we do not know when that will be - the yield of the duty will increase. It is impossible therefore to calculate the cost of the reduction of duty, but the least figure I can put on it is £10 million.'

Import Duties. Mr. Thorneycroft said that he proposed (*a*) to continue the Customs duty of £4 a cwt. on imported hops which would otherwise expire on Aug. 15; (*b*) to introduce a provision to simplify the administrative arrangements for levying duty on imported articles in respect of dutiable ingredients.

Furthermore, he would propose in the Finance Bill to give statutory effect to the new trade agreement with Australia which was signed in February.

Estate Duty. Turning to certain proposals for strengthening the tax code, Mr. Thorneycroft said: "The first concerns the estate duty that is levied when a gift is made within five years before death. At present the law gives rise to anomalies and lends itself to avoidance devices. One device, sometimes known as 'the disappearing trick,' takes advantage of the fact that no duty is payable if the property given away—for example, a security due for early redemption has ceased to exist before the death of the donor, even if he dies within five years of making the gift. I propose to put a stop to these devices and generally to rectify the anomalies that arise under the present law."

Investment Allowance. "My second [proposal] concerns the investment allowance. Under the law as it stands there might in certain circumstances be a legal claim to two investment allowances for the same asset. This clearly should be stopped . . ."

Continuing, the Chancellor referred to Mr. Macmillan's suspension of the 20 per cent investment allowances in February, 1956, in all but certain special cases, and declared: "It will, I think, be clear to hon. Members who followed my earlier remarks about investment that I do not consider the time has come to restore these allowances. But there is one exception. Strong representations have been made to me in the case of the shipping industry. This industry is indeed in a special position. It is faced with severe competition in a world market, often from ships sailing under 'flags of convenience' with small tax liabilities. It finds it increasingly difficult to build up finance for the replacement of its ships when they become obsolete.

"It has been suggested that I should give to shipping some specially favourable depreciation allowances which would enable the owners to build up, while a ship was operating, tax-free reserves against its eventual replacement. Much as I appreciate the problems of the shipping industry I cannot agree to do that. I have therefore looked for alternatives. There are clearly very real difficulties in giving any special tax relief to a selected industry, for inevitably the question arises where to draw the line.

"There is, however, already in existence one form of special relief to the shipping industry—namely, the 20 per cent investment allowance which it was allowed by my predecessor to retain last year. After careful thought I have reached the conclusion that as a recognition of its unique position I can increase that allowance. I propose, therefore, that the investment allowance for capital expenditure on the construction of new ships shall be increased to 40 per cent as regards expenditure becoming due and payable after to-day.

"This will cost nothing this year but the cost will rise to £11¼ million in a full year. I must repeat that this is a unique step for a unique industry which is the life-line of our country, and I must be rigid in my attitude to any requests by other industries for similar treatment. Capital expenditure on scientific research and approved fuel-saving equipment, which at present qualifies for the investment allowance, will continue to enjoy the present rate.

Income Tax Concessions to Old People. "Many people have for long held the view that our tax system is too hard on elderly folk living on comparatively small incomes . . . but we must not forget the many younger people with no greater incomes . . . One has, therefore, to hold a fair balance between the old and the young.

"I am sufficiently impressed by the case of the old to feel that I should take some action this year. I propose that there shall be two special income-tax exemption limits for the old; an exemption limit of £250 for single persons over 65 and of £400 for married couples where either husband or wife is over 65. In each case a marginal provision for incomes slightly over the limit will be necessary.

"As a second step, I propose an improvement in the 'age relief' arrangements. People over 65 with a total income of not more than £600 have the whole income treated as earned income whatever its source, and relatively small investment incomes from savings bear no more tax than pensions. I propose that the income limit for age relief shall be increased from £600 to £700.

"The two proposals will cost £2¼ million this year and £4½ million in a full year.

Child Allowance. "In a period when the amount of tax relief is limited, I believe that public opinion would favour a policy which concentrated somewhat upon the problems of the family. At present relief is given as a flat rate allowance of £100 for each child that qualifies. I have been examining the problem in the knowledge that children, particularly if they continue in full-time education, cost more as they grow older. This is true both for the parent who pays fees and for the many parents who, while not paying fees, make considerable sacrifices to keep a boy or girl at school or University who could otherwise have been contributing to the joint family income.

"I propose, therefore, that the child allowance shall remain at £100 for children under 12; but that it shall be increased to £125 as from the year in which the child becomes 12 and that there shall be a further increase to £150 as from the year in which the child becomes 17. A child above the age of 16 . . . ranks for allowance only if he or she is receiving full-time education or full-time training as an apprentice.

"These increases, which are rather different from the proposals of the Royal Commission, will apply irrespective of the amount of the parent's income. The father of the boy or girl who has won a scholarship to a grammar school or university will qualify, as well as the father who chooses to educate his child at his own expense. I propose no change in the limit of child's income of £85 that disqualifies a parent from receiving a child allowance. The cost of these proposals is £14¼ million this year and £17¼ million in a full year.

Surtax. "With this proposal for an improved income-tax child allowance I associate another reform. This is in the field of surtax and also stems from a recommendation of the Royal Commission. It, too, is based upon the proposition that the responsibilities of marriage can be costly. The Royal Commission recommended that the starting point for surtax should vary as between single persons, married couples, and married couples with children. They suggested reducing the starting point for a single person to £1,500, leaving the married couple to start at £2,000, and increasing the starting point of £2,000 by £160 for each qualifying child.

"I do not propose to reduce the surtax starting point - which is still where it was in 1920 for anybody, and I shall leave the single person at £2,000. I think, however, that there is a good case for some variation for the others. I propose that the ordinary income-tax personal allowances other than the single allowance - i.e. the married allowance, the child allowance, and the housekeeper and dependent relative allowance - shall run for surtax as well as for income-tax.

"Thus the surtax starting point for a married couple will become £2,100. For couples with children it will, in accordance with the proposal that I have just made on the child allowances, vary with the children's ages. For example in a family with two children, one aged 10 and the other 14, the starting point for surtax under the new arrangements will be £2,325, but that will apply as from 1957-58, the year now starting, the surtax for which is payable on Jan. 1, 1959. I propose, however, that the change shall apply to the surtax payable on Jan. 1, 1958, in respect of 1956-57. Since that year is already past, the child allowance to be taken into account will, of course, be the present flat rate of £100.

"This change will cost £6 million this year and £9¾ million in a full year.

Earned Income Relief. "Our objective is opportunity and expansion. A tax system which offers the minimum inducement to those with the maximum responsibility is inconsistent with this aim. This criticism has particular force round about the £2,000 level of income. Yet this figure of £2,000 and upward represents the income range of the very men whose activities and decisions do most to determine our rate of economic expansion. In their hands rests for good or ill much of the future of the national economy. In penalising them, the nation penalises itself.

"In few countries in the world is there less incentive to increased effort after the £2,000 figure has been passed. The fact that the earned income relief stops at £2,025, while surtax at 2s. in the pound starts at £2,000 means that on every extra pound of earned income at, say, £1,900, 6s. 7d. is paid in tax, while on every extra pound of earned income at £2,025, 10s. 6d. goes in tax. And after that point the graduation continues to be very steep indeed. Undoubtedly the right way to tackle this is to apply to incomes above £2,000 the same kind of relief as that applied to incomes below £2,000. The Royal Commission proposed that the present earned income relief at two-ninths of the income should continue from £2,025 to £2,500, and that a smaller relief at one-ninth should be given for the band of income from £2,500 to £3,000.

"I agree with the idea underlying the Royal Commission's proposal but I am disposed to carry it a good deal further. There are salaries well above the £3,000 maximum suggested by the Royal Commission which, without any doubt, are wholly the reward, and the well deserved reward, of some of the work most vital to our country. I think that it is right that such income should be treated for tax purposes differently from investment incomes of the same amount. I have accordingly decided to extend the two-ninths earned income allowance from the present limit of £2,000 up to £4,000 and thereafter at one-ninth up to £10,000. (The precise figures will for technical reasons vary a few pounds on either side of these levels).

"Even after these changes the effective rate of tax on total earned income for a single man will range from about a quarter at £2,000 to over a half at £10,000. These proposals will at least ensure that of every extra nine pounds earned, two pounds will go into the pocket of the earner free of the ordinary incidence of income-tax (though not of surtax) up to £4,000 and one pound after that until £10,000 is reached.

"These changes will cost £17 million this year and £24¾ million in a full year. A reform of this kind has been long overdue. We are determined that in the society which we seek to create there should always be room at the top. There must be rewards there too.

Conclusion. "The tax reliefs which I have proposed amount in total to £98 million in 1957-58 and to about £130 million in a full year. About a quarter of this total relief will take the form of assistance to our import trading operations overseas; about a quarter will take the form of additional incentives to those whose efforts are of particular importance to the expansion of the economy; about another quarter will give some measure of relief from the burden of indirect taxation and will thus help those outside the range of direct taxation. The remainder is designed to give some general easement of the tax burden, including something for the old, but concentrating on those who are seeking to educate their children for the opportunities ahead.

"Having made these remissions of taxation, I am left with a surplus 'above the line' of £462 million and an overall deficit of £125 million. On these figures I think it will be agreed that the Budget is making a striking contribution towards the strengthening of our balance of payments and the stability of the economy. Even after the tax remissions which I have proposed, and allowing for the windfall from the interest on the dollar loans, the surplus 'above the line' is nearly a third bigger than the actual surplus last year. At the same time, the overall deficit is reduced to little more than half that of last year. I am satisfied that such a deficit will be amply covered by small savings and other non-inflationary methods of finance. We have cut spending and reduced taxes. We must carve out even greater opportunities for the years which lie ahead."

As pointed out by the Chancellor, the estimated effect of the taxation changes will be as follows: (*a*) extension of earned income relief: a loss of £17,000,000 in 1957-58 and £24,500,000 in a full year; (*b*) increase in child allowances: a loss of £14,500,000 in 1957-58 and £17,500,000 in a full year; (*c*) higher income exemption limit for old people: a loss of £1,500,000 in 1957-58 and £2,500,000 in a full year; (*d*) increase in income limit for age relief: a loss of £750,000 in 1957-58 and £1,750,000 in a full year; (*e*) application of personal allowance to Surtax: a loss of £6,000,000 in 1957-58 and £9,750,000 in a full year; (*f*) exemptions of "overseas trade corporations" from Income and Profits Tax: a loss of £25,000,000 in 1957-58 (i.e. £20,000,000 Income Tax and £5,000,000 Profits Tax) and £35,000,000 in a full year; (*g*) higher investment allowance for new ships: a negligible loss in 1957-58, £7,000,000 in 1958-59, and £11,500,000 in later years; (*h*) abolition of petrol duty surcharge: a loss of £10,000,000 in 1957-58 and nil thereafter; (*i*) changes in Entertainments Duty: a loss of £11,200,000 in 1957-58 and £12,200,000 in a full year; (*j*) increase in Television licence: a gain of £6,300,000 in 1957-58 and £8,000,000 in a full year; (*k*) Purchase Tax reductions: a loss of £18,000,000 in 1957-58 and £24,000,000 in a full year. Total net loss: £97,650,000 in 1957-58 and £130,700,000 in a full year.

The Budget led to a firmer tendency in sterling, the sterling-dollar rate closing on April 9 at $2.78\frac{1}{16}$ and on April 10 at $2.79\frac{1}{16}$—its highest level since March 27.

National Savings.

The National Savings Committee announced on April 7 that net national savings in the financial year ended March 31, 1957, amounted to £119,548,000—the best result since 1947-48, and comparing with a net outflow of £35,118,000 in 1955-56 and a net gain of £60,383,000 in 1954-55. Allowing for accrued interest of £130,313,000 (against £130,269,000 in 1955-56) and for interest paid out on certificates of £94,812,000 (£51,125,000), the total sum invested was increased during 1956-57 by £155,049,000 (£44,026,000) to a new peak of £6,240,000,000.

The Committee stated that the improved result had been largely brought about by increased sales of Savings Certificates of the tenth issue introduced in August 1956, and the receipt of £65,000,000 from Premium Bond sales, with no adverse effect on other forms of national savings, and so far with negligible encashments. Another factor contributing to the improvement was the strengthening of the Savings Banks by the exemption from Income Tax of the first £15 of interest. (Times - Daily Telegraph - Financial Times - Manchester Guardian) **(Prev. rep. 1956-57 Budget, 14821 A; Supplementary Estimates, 15397 A; 1956-57 Revenue and Expenditure, 15462 A; Reductions in Government Expenditure, 15216 A; Bank Credit, 15046 A.)**

Note. The tables below show the amount of income tax and surtax (if any) payable on specimen incomes. They give the tax payable after deduction of personal allowances, married allowances, child allowances and other earned income relief.

* Age Relief.—Where the taxpayer (or his wife, if any) is over 65 and his total income does not exceed £700 (£600 for 1956-57) age relief is given; this reduces the tax payable to that chargeable on the earned income scale. Where the total income exceeds £700, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

† Age Exemption.—Where the taxpayer is over 65 and his total income does not exceed £250 (£400 for a married person without children) no tax is payable for 1957-58. Where the total income slightly exceeds £250 (or £400) marginal relief is given so that the full tax is not payable until the marginal relief runs out.

‡ The increases in child allowance for older children have been taken into account in these figures only for Income-tax and not for Surtax.

A. FRANCE. — Death of M. Herriot.

M. Edouard Herriot, the French Radical statesman, Prime Minister of France on three occasions, and Mayor of Lyons for over 50 years, died on March 26, aged 84.

Born at Troyes on July 5, 1872, Edouard Herriot graduated at the *Ecole Normale Supérieure*, became a professor in the Arts faculty of the *Lycée Ampère* at Lyons, and achieved a national reputation as lecturer, scholar and writer, his well-known book *Madame Récamier et ses amis* appearing in 1904. Joining the Radical Party, he entered municipal politics in Lyons, distinguished himself as a local administrator, and was first elected Mayor of the city in 1905, a position he held uninterruptedly until his death 52 years later.

Herriot entered national politics in 1912 as a Senator for the Rhône department, and during the First World War held the post of Minister of Public Works, Transport, and Supplies in M. Briand's Cabinet (1916-17). In 1919 he was elected to the Chamber of Deputies and in the same year became leader of the Radical Party, a position he held almost until the end of his life except for the years 1927-31 and 1935-38, when the Radical leadership fell to M. Daladier.

After the war Herriot led the opposition to Poincaré's policies and, in particular, to the French occupation of the Ruhr—an action which Herriot strongly opposed because of his belief that it would isolate France and was out of harmony with the ideals of the League of Nations. When Poincaré was defeated in the 1924 elections, M. Herriot became Prime Minister at the head of the *Cartel des Gauches*, an electoral union of Socialists and Radicals. As Prime Minister from June 1924 to April 1925, and concurrently Foreign Minister, his major preoccupations were the problems of German war reparations and general disarmament and, in particular, the Dawes Plan and the Geneva Protocol, both of which he supported: the former because it was based on international guarantees, and the latter because he believed it would provide security for France within a larger framework. His decision to accept the Dawes Plan, widely criticized in France, was taken after discussions at Chequers with Mr. Ramsay Macdonald (then Prime Minister of Britain) which were aimed at overcoming Franco-British differences on the war debts question. M. Herriot's Premiership was also notable for France's *de jure* recognition of the Soviet Union and for his strong support of the League of Nations—in which connexion he put forward the formula *arbitrage, sécurité, désarmement* (arbitration, security, disarmament) as the "fundamentals of peace" at the League's fifth session in 1924.

M. Herriot resigned in 1925 after his Government was defeated in the Senate on a financial issue. During the severe financial crises of 1926, marked by a number of short-lived Ministries, he held the Premiership for 48 hours before being superseded by M. Poincaré. From 1926-28 he was Minister of Education and thereafter served as President of the Chamber (a post he held intermittently during the 1930's) before becoming Prime Minister for the third time in June 1932. His Government, however, lasted for only six months before it was defeated on the war debts issue—specifically, on M. Herriot's proposal to continue the payment of war debts to America. He held the post of Minister of State in several succeeding Cabinets, but resigned in 1935 in opposition to Laval's foreign policy.

In 1940 (at which time he was President of the Chamber) M. Herriot was one of the 17 members who abstained from voting on the proposal to confer full powers on Marshal Pétain at the time of the Bordeaux armistice. In 1942, after Pétain and Laval had announced their intention to abolish the *bureaux* of the Senate and Chamber of Deputies, M. Herriot and M. Jeanneney (President of the Senate) sent a joint letter to Pétain protesting strongly at the anti-democratic actions of the Vichy Government and accusing the Marshal of seeking to make himself dictator. M. Herriot also renounced his Legion of Honour when the decoration was conferred on collaborationists. Shortly afterwards he was placed under house arrest by the Vichy authorities, and in 1944 refused an offer from Laval to secure his release if he (M. Herriot) would support the Pétain regime and join a "transitional" government. He was subsequently arrested by the Germans, deported to a prison camp near Berlin, but liberated in April 1945 by the Soviet Army, returning to France *via* Moscow.

After the liberation of France M. Herriot was re-invested with the Legion of Honour by General de Gaulle, unanimously re-elected Mayor of Lyons, where he was given a triumphal welcome, and also re-elected to the post-war Constituent Assembly for his former constituency. He presided over the two Constituent Assemblies and, from 1947-53, over the National Assembly. In the latter year he resigned the Presidency of the Assembly on grounds of age and health, and for the same reasons refused to allow his name to be put forward as a candidate for the Presidency of the Republic in the elections held in December 1953. In recognition of his services, however, he was elected life president (*président d'honneur*) of the National Assembly (see 13359 A).

A strong opponent of the projected E.D.C. treaty, M. Herriot delivered a number of speeches between 1952 and 1954—both in the National Assembly and at Radical Party congresses—attacking the treaty in general and German rearmament in particular, and pleading for a *détente* in the relations between France and the U.S.S.R. The last important speech of his political career, made in the National Assembly in August 1954 (see 13749 A) and delivered while in ill-health, was widely regarded in France as giving the *coup de grâce* to the E.D.C. treaty, which was rejected by the Assembly in the same month.

Owing to age and ill-health, M. Herriot played little part in the Radical congress of 1956 which resulted in the split between the "Mendesian" and "anti-Mendesian" Radicals (see 15247 A). He resigned from the life presidency of the party after unsuccessfully attempting to reconcile the two factions, but M. Mendès-France refused to become more than First Vice President of the party, declaring that the presidency should be open to M. Herriot to resume whenever he wished.

In the field of scholarship M. Herriot was the author of a number of literary, historical, and biographical works, notable among which were his biography of Madame Récamier, his *Précis d'histoire des lettres françaises*, and his *Vie de Beethoven*. A warm friend of Britain throughout his life, he was an honorary D.C.L. of the University of Oxford. He had been a member of the French Academy since 1946.

Edouard Herriot was buried at Lyons on March 31 with national honours, the funeral being attended by President Coty and the Prime Minister, M. Mollet. (Le Monde - Le Figaro)

B. UNITED STATES. — Armed Forces - New Chairman of Joint Chiefs of Staff. - New Air Secretary and Chief of Staff of Air Force. - Command Appointments. - Unified U.S. Command in Pacific and Far East.

President Eisenhower announced on March 26 the following appointments in respect of the U.S. armed forces:

(*a*) General Nathan F. Twining (59), Chief of Staff of the Air Force, as Chairman of the Joint Chiefs of Staff in succession to Admiral Radford (61), whose second two-year term will expire in August.

(*b*) Mr. Donald A. Quarles, Secretary of the Air Force, as Deputy Secretary of Defence in succession to Mr. Reuben Robertson jr., who had resigned.

(*c*) Mr. James H. Douglas, Under Secretary of the Air Force, as Air Secretary *vice* Mr. Quarles.

(*d*) General Thomas D. White, Vice-Chief of Staff of the Air Force, as Chief of Staff *vice* General Twining.

(*e*) Admiral Arleigh A. Burke was reappointed Chief of Naval Operations for a second two-year term.

Further appointments to senior U.S. Command posts were announced in Washington on April 4 and 8, as follows:

General Lyman L. Lemnitzer, U.S. C.-in-C. in the Far East and U.N. Commander in Korea, as Chief of Staff of the Army (from July 1) in succession to General Williston B. Palmer.

General George B. Decker, Deputy C.-in-C. of U.S. Forces in Europe, as U.S. and U.N. Commander in Korea *vice* General Lemnitzer.

General Williston Palmer, Chief of Staff of the Army, to succeed General Decker as Deputy C.-in-C. in Europe.

General Curtis LeMay, Chief of U.S. Strategic Air Command, as Vice-Chief of Staff of the Air Force in succession to General White.

Major-General Ernest Moore, Chief of Staff of the Military Air Transport Service, as head of the U.S. Third Air Force (the senior USAF Command in Britain) in succession to Major-General Roscoe C. Wilson, returning to the U.S.A. for reassignment.

It was also announced that the U.S. Far East Commands for the Army and Air Force would be abolished on July 1, from which date all U.S. land, naval, and air forces in the Far East would come under the general direction of the C.-in-C. of the U.S. Pacific Fleet, Admiral Stump, with headquarters in Hawaii. The U.S. Far East Army Command is at present held by General Lemnitzer in addition to his command of U.N. Forces in Korea. The Air Force Commander in the Far East is General Lawrence S. Kuter, who after July will command the Pacific Air Force with headquarters at the Hickham Air Base, Hawaii. (New York Times - New York Herald Tribune)

(Prev. rep. 14234 A; Mr. Quarles, 14375 A.)

C. BAGHDAD PACT. — Atomic Energy Centre.

The atomic energy training centre built in Baghdad under the aegis of the Baghdad Pact Powers was opened by King Faisal of Iraq on March 31. On the same date the Scientific Council of the Baghdad Pact Organization met for the first time and elected Sir John Cockcroft (Director of the U.K. Atomic Research Establishment at Harwell) as its chairman.

The atomic centre, for which most of the technical equipment has been supplied by Britain, includes a teaching laboratory for post-graduate courses of the same standard as those at Harwell. Sir John Cockcroft stated after his election that the first Director of the centre and four members of its scientific staff had come from the Harwell establishment. (Times - Daily Telegraph) **(Prev. rep. 14680 D.)**

D. PAKISTAN. — National Assembly. - Dr. Khan Sahib's Election declared Void.

The election to the Constituent Assembly of Dr. Khan Sahib—Chief Minister of West Pakistan until the imposition of President's rule, and leader of the Republican Party—was declared null and void by the West Pakistan High Court on March 25. The decision was taken on the ground that the Quetta Municipality, which formed part of the Electoral College for the Baluchistan seat (for which Dr. Khan Sahib was elected), was not legally constituted.—(Times) **(Prev. rep. 14341 A.)**

A. NIGERIA. — Allegations of Misconduct against Dr. Azikiwe in Connexion with Affairs of African Continental Bank. - Appointment and Report of Tribunal of Inquiry. - Tribunal's Criticisms of Dr. Azikiwe's Conduct. - Dissolution of Eastern Regional House of Assembly. - Electoral Victory for National Council of Nigeria and the Cameroons.

Allegations that Dr. Nnamdi Azikiwe, Premier of the Eastern Region of Nigeria and leader of the National Council of Nigeria and the Cameroons (the ruling party) had abused his office by allowing public funds to be invested in the African Continental Bank Ltd., in which he had an interest, were brought in a letter sent to him on May 5, 1956, by Mr. E. O. Eyo, the Chief Government Whip, who had resigned his office as chairman of the Eastern Region Development Corporation on April 15. Mr. Eyo gave notice in the Regional House of Assembly on May 17 of a motion calling for an independent commission of inquiry, but on June 20 Dr. Azikiwe instituted legal proceedings against him, claiming damages for libel on the ground that Mr. Eyo had sent copies of his letter to the Governor of the Region (Sir Clement Pleass) and to the Press. In consequence, when Mr. Eyo's motion came up for debate on June 26, the Speaker of the House of Assembly ruled it out of order as the matter was *sub judice*.

In a message to Dr. Azikiwe, the U.K. Colonial Secretary, Mr. Lennox-Boyd, proposed that he (the Colonial Secretary) should appoint a commission of inquiry, as banking was a matter reserved to the Federal Government and the Governor of the Region was not competent to appoint a commission to inquire into federal matters. This proposal was rejected on July 16, 1956 by Dr. Azikiwe, who accused Mr. Lennox-Boyd of "insulting high-handedness," a "continued attitude of antagonism against Eastern Nigeria," and "pronounced partiality." Dr. Azikiwe also demanded the removal of Sir Clement Pleass, who, he alleged, was "always playing politics," and announced his intention of resigning the Premiership. Statements subsequently issued by Dr. Azikiwe made clear that the dispute between the Governor and himself had arisen from the former's support for the Opposition's demand for a commission of inquiry.

Mr. Lennox-Boyd announced in the House of Commons on July 24 that he had decided to appoint a commission of inquiry, headed by Sir Strafford Foster-Sutton, Chief Justice of the Federation of Nigeria, in order to secure "a speedy, impartial, and full investigation as to the investments made in the bank, and the grave allegations that have been made." Its appointment would mean some delay in convening the constitutional conference on Nigeria which was to have met in London on Sept. 19, 1956, but he had asked the other Nigerian Governments to accept this delay because, in the interests of the territory as a whole, these serious allegations should first be fully investigated.

Dr. Azikiwe stated on July 27 that he was prepared to appear before the commission as he had "nothing to hide," but criticized the "dictatorial way" in which Mr. Lennox-Boyd had "by-passed the constituted authority of this country in appointing this commission," and alleged that the Colonial Secretary was "supporting British banking interests in order to destroy the African Continental Bank." Dr. Azikiwe also announced that he had decided not to resign, as to do so would amount to "an abdication of power to a power-drunk bureaucracy and a power-seeking microscopic minority." The Regional House of Assembly adopted on Aug. 7 (by 87 votes to nine) a motion demanding the immediate recall of Sir Clement Pleass, and on the following day another resolution calling for the appointment of a federal commission of inquiry into the activities of the Bank of British West Africa in Nigeria; the latter resolution declared that "this House views with grave apprehension the conspiracy of the bank to create a monopoly in banking throughout the Federation."

Mr. Lennox-Boyd announced on Aug. 1 that the commission, in addition to Sir Strafford Foster-Sutton, would consist of Sir Maxime de Comarmond, Chief Justice of the High Courts of Lagos and the Southern Cameroons; Mr. V. A. Savage, a chief magistrate in the Eastern Region of Nigeria; and Mr. G. F. Saunders, a senior partner of Harmood, Banner, Lewis, and Mounsey, chartered accountants. Its terms of reference would be to inquire into and report on:

(1) Allegations of improper conduct on the part of Dr. Azikiwe in connexion with the affairs of the African Continental Bank.

(2) The circumstances in which securities, or the proceeds of securities, belonging to the Eastern Regional Marketing Board were transferred to the Eastern Region Finance Corporation and invested in or deposited with the African Continental Bank.

(3) The relationship, direct or indirect, between Dr. Azikiwe and the African Continental Bank.

(4) The relationship between the Eastern Region Finance Corporation and the African Continental Bank.

(5) The relationship between any body or organization in which Dr. Azikiwe had had a direct or indirect interest and the African Continental Bank.

(6) The use made of the resources of the African Continental Bank, as far as appeared material.

(7) Whether, in respect of these matters, any person holding ministerial or other public office had infringed the standards of conduct required of the holder of such office.

The commission, which was officially described as a Tribunal of Inquiry, met in Lagos on Aug. 27, 1956, to decide questions of procedure, and subsequently held 50 public sessions between Sept. 3 and Nov. 16 to hear evidence and arguments, all the interested parties being represented by counsel. Mr. Brian MacKenna, Q.C., acted as counsel for the tribunal, and Dr. Azikiwe was represented by Sir Frank Soskice, Q.C., M.P., formerly Solicitor-General in the Labour Government.

The tribunal's report, which was published on Jan. 16, 1957, found that Dr. Azikiwe's conduct in his capacity as a Minister in connexion with the affairs of the African Continental Bank had "fallen short of the expectations of honest, reasonable people," and that he had been guilty of misconduct as a Minister in failing to relinquish his financial interest in the bank when the proposal to inject public monies into it was first mooted. The report, published as a White Paper (Cmd. 51), is summarized below with cross-headings inserted.

The African Continental Bank. The report stated that the allegations made by Mr. Eyo and members of the Opposition in the House of Assembly were "abuse of office and corruption in connexion with the deposit and investment of public monies of the Eastern Region in the African Continental Bank, in which Dr. Azikiwe had a substantial pecuniary interest." "Mr. Eyo," the report said, "impressed us as being a witness who was, by and large, speaking the truth in so far as he saw matters. In view, however, of the admitted antagonism between himself and Dr. Azikiwe and his late colleagues in the N.C.N.C. party, and his own admission that he was prepared to believe anything bad about Dr Azikiwe, however flimsy the evidence, we considered that it would be unsafe to rely upon his evidence unless it is corroborated or made more probable by proved facts."

The African Continental Bank (the report continued) had been originally incorporated in 1937, when it had been known as "Tinubu Properties Ltd." Dr. Azikiwe had bought all the shares in 1944 for £250, and the name of the company had been changed in 1946 to "Tinubu Bank Ltd." and in 1947 to "African Continental Bank Ltd." Between 1946 and 1949 the nominal capital had been progressively increased to £250,000.

In 1952 an Ordinance had come into force providing that every banking company operating in Nigeria should apply to the Financial Secretary for a licence. In the following year a licence had been refused to the African Continental Bank on the grounds that the ratio of cash reserves to the time-and-demand liabilities was inadequate, and that more information was required on the current value of the bank's investments. On March 19, 1954, Mr. A. K. Blankson, the general manager of the bank, had written to branch managers emphasizing the "absolute need for conserving sufficiently large reserves of liquid assets (cash) at the end of March," and advising house-to-house campaigns for cash deposits by customers, "even for one day," so that at the end of the financial year on March 31 the percentage of cash in hand to the total of accounts would, "if not conform to the requirements of the Banking Ordinance, at least meet them half-way."

Dr. Azikiwe, the report pointed out, had stated that the bank "was founded primarily to finance the activities of the Zik Group (of companies) whilst at the same time protecting the interests of the public so far as it is compatible with banking practice." At the end of 1953 Dr. Azikiwe, as founder, governing director, and chairman, had held 28,000 £1 Ordinary shares in the bank, and five other members of his family had held 16,100 shares. In addition, four companies of the Zik Group, in which Dr. Azikiwe had held an effective interest ranging from 44.9 to 63 per cent, had held a total of 55,900 shares.

Throughout 1950-55 the bank's capital had been inadequate to cover the cost of establishing and building up the business, and it had been necessary to have recourse to customer's deposits. In 1951, £205,000 had been advanced by the bank to companies in the Zik Group at the rate of 2 or 3 per cent, a favourable rate which could only be regarded as another aspect of the close relationship between the bank and the Zik Group. Having regard to this relationship, the almost continuous losses incurred by most of these companies during 1949-55—which had accumulated to a figure in excess of their issued capital—had constituted an additional drain on the bank's liquid resources.

On March 31, 1955, the report stated, only £28,276 had been paid up of the bank's nominal capital of £115,935. Almost the whole of the unpaid capital related to shares held by Dr. Azikiwe and his family and the companies of the Zik Group. Although Dr. Azikiwe had had a major interest in the bank on the basis of capital invested, the voting power he controlled had been greater still, as each ordinary shareholder had been entitled to one vote per share irrespective of whether it was fully paid up or not.

Dr. Azikiwe's Resignation of his Directorships. Following the 1953 general elections Dr. Azikiwe had been appointed a Minister, and, in answer to a question put to him by Sir Clement Pleass (then Lieutenant-Governor), he had fully disclosed the directorships and

other interests held by him in the bank and the Zik Group. On Jan. 30, 1951, he had resigned his chairmanship of the bank and all his directorships, and had appointed Mr. Blankson to be governing director and to act as chairman. On Oct. 1, 1954, the new Nigerian Constitution had come into force, and Dr. Azikiwe had become Premier of the Eastern Region.

N.C.N.C. Policy on Banking. The N.C.N.C.'s original policy had been, upon attaining self-government, to nationalize all banks in Nigeria. In the meantime, since legislation on banking was exclusively reserved to the Federal Legislature, the policy of the Government of the Eastern Region was stated to be based on the following principles: "(1) to discourage monopoly of monetary transactions by any one bank; (2) to liberalize credit facilities for Nigerian *entrepreneurs*; (3) to encourage the development of indigenous Nigerian banking; (4) to plan for the eventual establishment of a State bank."

In December 1954, as one step in the process of giving effect to this policy, the House of Assembly had enacted the Eastern Region Finance Corporation Law, which vested the Finance Corporation with power to finance agricultural, trading, and industrial projects by granting loans or subsidies or by taking up loan or share capital in Government agencies or companies. Before its introduction in the House of Assembly, this measure had been approved by the Eastern Region Executive Council on the express condition that "the Minister of Finance should exercise the powers it conferred upon him only in consultation with, and with the approval of, the Executive Council."

"The only indigenous banks operating in the Eastern Region at the end of 1954 and early in 1955," the report continued, "were the African Continental Bank and the National Bank of Nigeria. The latter had only one branch there. On the other hand, the African Continental Bank had five branches in the Region, and we are satisfied that the obvious vehicle for the N.C.N.C. to select in giving effect to their policy of supporting an indigenous bank was that one."

Deposit of £30,000 in the African Continental Bank. According to Mr. Eyo, Dr. Azikiwe had asked him to November 1954 to use his good offices in persuading the Production Development Board to deposit a substantial sum of money in the African Continental Bank. On Dec. 2, 1954, the Board had agreed to a proposal by Mr. Eyo that it should open accounts with the bank of £5,000 on current account and £25,000 on fixed deposit. "Dr. Azikiwe denied that he had ever had the conversation alleged by Mr. Eyo, but we are satisfied that it took place," the report stated. A letter from Mr. Obih, the bank's chief accountant, to Mr. Blankson, dated Nov. 2, 1954, and produced in evidence, stated that the liquidity of the bank was in "a very dangerous position," and predicted a run on the bank "before or immediately after the end of November, unless financial aid to the tune of £30,000 is received before Dec. 15, 1954." There was no evidence that Dr. Azikiwe had ever seen this letter, but the tribunal were "satisfied from the surrounding circumstances that he was aware of the situation disclosed by it."

The question of the deposit of £30,000 in the bank had been considered by the Executive Council on Dec. 13, 1954, at a meeting presided over by Mr. C. J. Mayne, then the Officer Administering the Government. In his evidence, Dr. Azikiwe had at first denied that he had taken any part in the Council's discussion, but when notes taken at the meeting had been produced he had "modified his position regarding the part he had played." According to these notes, Dr. Azikiwe had told the Executive Council that he had seen Mr. Blankson in Lagos, and that it was proposed to ask a British bank to take over the managing agency of the bank. Mr. Mayne had finally refused to agree to the deposit of the £30,000 until he had received a report on the bank from the Federal Financial Secretary. This report, which had been considered by the Executive Council on Dec. 30, 1954, stated that on Dec. 8 Mr. Blankson had informed the Financial Secretary that "negotiations were now near to finality for amalgamation of the bank with a U.K. banking house."

In his evidence before the tribunal Mr. Blankson had repeatedly denied ever having discussed any of the affairs of the bank or the Zik Group with Dr. Azikiwe after the latter's resignation on Jan. 30, 1954. Dr. Azikiwe had taken the same line "until extrinsic evidence became available which made further adherence to that story untenable, and he then said that what he really intended to convey was that he had never discussed day-to-day management affairs with Mr. Blankson as distinct from matters of high policy."

Before the tribunal Mr. Blankson had denied having told the Financial Secretary that there had ever been any question of "amalgamation of the bank with a U.K. banking house," but when sent a copy of the minutes of their meeting he had made no correction on this point. The tribunal were satisfied beyond doubt that Dr. Azikiwe had known Mr. Blankson's representations to the Financial Secretary to be false when the Financial Secretary's report was discussed in the Executive Council on Dec. 30, 1954, and that he had "allowed the false information to stand."

Agreement between Finance Corporation and African Continental Bank. In March 1955, the report continued, the Executive Council had decided that the Finance Corporation should be financed by a grant of £2,000,000 from the Eastern Regional Marketing Board, which had duly transferred to the Corporation £2,000,000 of 3 per cent savings bonds. At the Corporation's inaugural meeting on April 6, 1955, its chairman, Dr. Mbanugo, and the Finance Minister, Mr. Ojike, had proposed that the African Continental Bank should be its bankers. This had been agreed, and it had also been decided that the Corporation should invest £750,000 of its funds in the purchase of shares in the bank.

A draft agreement had been placed before the Corporation by Dr. Mbanugo on May 19, 1955, and had been signed by Dr. Mbanugo and Mr. Blankson on the following day, Mr. Okoye (deputy chairman of the Corporation) and Mr. Obih acting as witnesses. It provided *inter alia* (1) that the Finance Corporation should purchase from the bank 784,000 £1 ordinary shares and 93,000 £1 preference shares, a commission of 10 per cent being deducted; (2) that the Corporation should purchase at par any ordinary or preference shares from any shareholder of the bank willing to transfer them; (3) that the Corporation should use the bank as a main depository of its funds, and should also persuade its beneficiaries and customers to use it; (4) that the bank should increase its nominal share capital from £250,000 to £1,000,000; (5) that the Corporation should nominate five of the bank's directors and the bank four, who would be appointed by the founder (i.e. Dr. Azikiwe) and/or the governing director or the founder's nominee.

"The manner in which the draft agreement came into being is shrouded in mystery, since no witness who could have elucidated the matter chose to tell us the truth," the report commented. "We disbelieve Mr. Blankson's, Mr. Okoye's and Mr. Ojike's versions of the matter. What is certain, however, is that the draft agreement, in the exact form which it was eventually entered into on May 20, 1955, found its way into the minutes of a meeting of the board of directors of the African Continental Bank on March 5, 1955. This was even before the membership of the Finance Corporation had been determined . . . It is clear that the Minister of Finance, the chairman of the Finance Corporation, his deputy, and Mr. Blankson were in the know as to what was actually taking place, but we are quite satisfied that none of the other members of the Finance Corporation were kept informed . . ." The tribunal were also satisfied that a copy of the final agreement had never been placed before a full meeting of the Finance Corporation, and that their consent to the terms of the agreement, involving an investment of about 40 per cent of the total capital available to the Corporation, had not been obtained.

"In our view, having regard to the financial position of the bank at that time, the agreement was unduly favourable to the existing shareholders," the report went on. "That, and the fact that it was obviously not intended to change any clause in the draft agreement to meet the views of other members of the Finance Corporation, is, we think, the reason why it was executed in the circumstances described. The Minister of Finance attended every meeting of the Finance Corporation up to and including the one on June 21, 1955 that is to say up to the date when the money for the purchase of shares in the bank was paid over. We formed the impression that his purpose in doing this was to make quite certain that no hitch occurred, and that the transaction was put through. Thereafter he attended none of the meetings . . . In spite of the decision of the Executive Council at its meeting on Dec. 11, 1954, that the Minister of Finance should exercise his powers under the law 'only in consultation with and with the approval of the Executive Council,' he failed to refer the matter of this substantial investment to that body before it was made . . . Mr. Ojike admitted that he had not referred the investment to the Executive Council because he feared that objections might be raised. We think that his fear was well founded. . ."

Dr. Azikiwe had declared in evidence that he had never heard of the agreement until Nov. 10, 1955, when Mr. Lennox-Boyd had drawn his attention to certain of its clauses. The tribunal, however, were satisfied beyond doubt that he knew of it, and felt justified in concluding that he was aware of its general purport.

The Finance Corporation could not have acquired a very extensive knowledge of the bank's financial position at that time, the report continued, as on Sept. 8, 1955, they had agreed to ask for an inquiry as to "what real assets the bank at present possesses." If appropriate inquiries had been made, it would have been found that the bank was insolvent and its shares worthless. The state of insolvency which existed throughout the bank and the Zik Group of companies (with one exception) at March 31, 1955, could only have resulted in their liquidation, unless substantial amounts of new capital could have been provided. In the event of liquidation the bank's creditors would have received a dividend of 15s. in the pound and the secured and unsecured creditors of the Zik Group an average dividend of 5s. and 4s. in the pound respectively. Following the completion of the agreement, however, shares which had previously been worthless had increased in value to 14s. 10d. per share, and, if the benefit of the Corporation's undertaking to purchase them at par were taken into account, became worth 20s. per share. The financial benefits accruing to the holdings of Dr. Azikiwe, his family, the directors of the bank, and the companies of the Zik Group, at 14s. 10d. per share, would be £79,433, of which Dr. Azikiwe would receive £20,770, and at 20s. per share would be £107,100, of which Dr. Azikiwe would receive £28,000.

Following the Corporation's investment, the bank on Aug. 25, 1955, had paid its directors outstanding fees of £10,092, of which Dr. Azikiwe had received £5,252. "Bearing in mind that the payment was only rendered possible by the injection of public money into the bank, we think the transaction is open to question," the report observed. "It is relevant here to observe that the payment was made without the knowledge or consent of the members of the board appointed by the Finance Corporation."

On Nov. 10, 1955, at an interview with Dr. Azikiwe in London, Mr. Lennox-Boyd had informed him that it would be quite unthinkable in the United Kingdom for a bank set up by the Chief Minister "to receive £1,000,000 from public funds to keep it solvent, and that there could, of course, be no question of the Chief Minister of the Eastern Region of Nigeria retaining rights to the chairmanship or to nominate directors." At Mr. Lennox-Boyd's suggestion,

Dr. Azikiwe had agreed to drop these provisions in the agreement. After Dr. Azikiwe's return to Nigeria, press statements had been issued on Dec. 8 and Dec. 9 revealing that the Finance Corporation had acquired a controlling interest in the African Continental Bank. "In view of the fact that the investment by the Finance Corporation in the bank achieved one of the N.C.N.C.'s major points of policy, we think there was a surprising reticence in publicizing the matter," the report commented.

Conclusions. "Whatever the legal effect of Dr. Azikiwe's letter dated Jan. 30, 1954, resigning from the offices of chairman and governing director of the African Continental Bank, and of the instrument, made on the same date, appointing Mr. Blankson to act in his stead as governing director and chairman of the bank, we are satisfied that Mr. Blankson was appointed as his agent to act in his stead as governing director and chairman of the bank so long as he remained a Minister of State, and that upon relinquishing the office of Minister of State he would automatically resume the offices of governing director and chairman of the bank. In other words, that he intended those documents to create an agency, with himself in the background as principal, and we have no doubt that Mr. Blankson understood that to be the position.

"We believe that Dr. Azikiwe's primary motive was to make available an indigenous bank with the object of liberalizing credit for the people of this country, but we are satisfied that he was attracted by the financial power his interest in the bank gave him. Moreover, there can be no doubt that the control of the newspapers included in the Zik Group of companies gave Dr. Azikiwe a degree of political power which we think he was anxious to retain. It is clear that the continued existence of the bank was an important factor in the financing of the Zik Group of companies.

"In considering whether Dr. Azikiwe has been guilty of improper conduct, in his capacity as a Minister, in connexion with the affairs of the African Continental Bank, we apply what we think would be the standards of right-thinking citizens, unbiassed by their political opinions. Applying that test, we consider his conduct in this matter has fallen short of the expectations of honest, reasonable people. It is a fact that the deposit of £30,000 by the Eastern Region Production Development Board was made at a most appropriate time in the affairs of the bank, and that the purchase of the shares in the bank by the Finance Corporation made Dr. Azikiwe's investments in the bank and the Zik Group of companies more secure. It is not true that, except as a shareholder, Dr. Azikiwe severed his connexion with the bank in January 1954. It was clearly proved before us that, although he may not have interfered with day-to-day management of the bank, he did his best to further its interests and kept his hands on the helm. In the circumstances, we are of the opinion that Dr. Azikiwe ought to have relinquished his financial interest in the bank when the proposal to inject public monies into it was first mooted, and that he was guilty of misconduct as a Minister in failing to do so."

The tribunal considered that Mr. Ojike's conduct had infringed "the standards of conduct the public are entitled to expect from the holder of high ministerial office," although they were satisfied that "his over-riding motive was a desire to give effect to his party's policy of taking the first step towards creating a State Bank." The conduct of Dr. Mbanugo and Mr. Okoye in connexion with the agreement was also "open to question"; after the investment was made, however, the former had done his best to ensure that the bank was properly run. The evidence had not disclosed any good reason for criticism of the other members of the Finance Corporation or of the other Ministers in the Regional Government.

The Eastern Regional Ministers issued a statement on Jan. 19 declaring that the report of the Tribunal of Inquiry was "in many respects unacceptable."

The statement asserted that the tribunal had come to "the wrong conclusion of the fact in the light of the rules which govern ministerial conduct as laid down by the Secretary of State," and that its findings in this respect were "most unfair to Dr. Azikiwe." It was inconsistent to hold that Dr. Azikiwe had fallen short of his duty as a Minister and at the same time to make the comment that his motive was to set up an indigenous bank to liberalize credit facilities for Nigerians. The tribunal were also "wrong" in concluding that Dr. Azikiwe had not severed his connexion with the bank, as there was "uncontradicted evidence" that he had resigned his directorship and taken no part in the management. "In the circumstances," the statement concluded, "the Government of Eastern Nigeria could not help coming to the conclusion that the report of the tribunal has fallen short of the expectation of honest, reasonable people uninfluenced by the very nature of their appointment."

The national executive of the N.C.N.C. announced on the same day, however, that Dr. Azikiwe, to meet the tribunal's criticisms, had agreed to "transfer all his rights and interests in the bank to the Eastern Nigerian Government, which will henceforth own the African Continental Bank." Mr. Profumo (Under-Secretary, Colonial Office) told the U.K. House of Commons on Feb. 20 that Dr. Azikiwe had stated his intention to surrender his shares in the bank without compensation, and to repay to the bank the directors' fees of £5,252 paid to him after public money had been injected into it, on the understanding that this sum was a debt due to him which would be met out of the bank's current earnings.

Dr. Azikiwe announced on April 15 that his Government would seek an amendment to the Constitution to enable it to nationalize the African Continental Bank.

Dissolution of the House of Assembly. - General Elections.

The new Governor of the Region, Sir Robert Stapledon, issued a proclamation on Jan. 19, 1957, at the Regional Government's request, dissolving the Eastern Regional House of Assembly and ordering general elections for March 15.

The resignation of Sir Clement Pleass and the appointment of Sir Robert Stapledon (formerly Chief Secretary in Tanganyika) as his successor had been announced on Nov. 20 1956. Sir Clement Pleass stated on Nov. 22 that his resignation had been tendered in March because he had reached the retiring age, and had "absolutely nothing to do with the banking inquiry."

The elections resulted in a victory for the N.C.N.C., although its representation in the House was reduced from 72 to 64. The Action Group (the ruling party in the Western Region), which held only one seat in the Eastern House of Assembly before the elections, emerged as the largest Opposition group with 13 seats. The United National Independence Party, on the other hand, won only five seats as compared with 11 in the previous House, in which it had formed the official Opposition. The two remaining seats were won by Independent candidates, both supporting the N.C.N.C.

The Colonial Office announced on Jan. 27, 1957, that the five Governments of the Nigerian Federation had agreed that the postponed constitutional conference should be convened in London in May or not later than the middle of June. (White Paper, Cmd. 51 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14140 A; 13432 A.)**

A. SOVIET UNION. — Lower Rouble Rate for Tourists and Other "Non-Communist" Transactions.

It was announced in Moscow on March 31 that, with effect from April 1, premiums ranging up to 150 per cent would be paid on conversions of 29 foreign currencies into roubles by tourists and other visitors, as well as on transactions of a non-commercial character such as rouble purchases by foreign embassies, foreign correspondents, etc.

Currencies for which the premium will be paid are those of Austria, Belgium, Denmark, Finland, France, Great Britain, Greece, Iceland, Italy, Netherlands, Norway, Sweden, Switzerland, and Yugoslavia, as well as Afghanistan, Argentina, Burma, Canada, Egypt, India, Indonesia, Japan, Lebanon, Pakistan, Persia, Syria, Turkey, Uruguay, and the U.S.A.

In the case of the pound and the dollar, the premium brought the rate of exchange up to 27 roubles 60 kopecks to the £ sterling compared with an official rate of 11 roubles 20 kopecks, and of 10 roubles to the dollar against an official rate of four roubles.

It was emphasized that the new rates would not affect the "official" exchange rates as far as trade and other exchanges were concerned. The question of the artificially high pound-rouble exchange rate had been raised by the British Government at the Geneva Foreign Ministers' Conference of 1955, and subsequently during the visit of Marshal Bulganin and M. Khrushchev to London in April 1956. Under the rate hitherto applying, tourists had had to pay as much as 5s. for an apple and 12s. for a glass of beer.—(Soviet Weekly - Times)

B. ITALY. — New President of Constitutional Court.

The president of the Italian Constitutional Court, Signor de Nicola, resigned on March 26. No reasons were given for his resignation, but it was known that he had repeatedly criticized the Government's failure to implement fully the Court's decisions, especially one restricting the powers of the police; for this reason Signor de Nicola had once before proffered his resignation in September 1956, but had withdrawn it after President Gronchi had assured him of the Government's continued confidence in him.

Dr. Gaetano Azzariti (75), the senior judge of the Court, was unanimously elected as its president on April 7. Dr. Azzariti was Minister of Justice in the Badoglio Government of 1943, and, like Signor de Nicola, is one of the five judges named by the President of the Republic.—(Corriere della Sera, Milan) **(Prev. rep. 14708 A.)**

C. NORTHERN RHODESIA. — New Copper Mine.

The Bancroft mine in the Northern Rhodesian copperbelt was opened on March 29 by Sir Ernest Oppenheimer (chairman of the Anglo-American Corporation) in the presence of the Federal Prime Minister, Sir Roy Welensky, and of Dr. Bancroft, the South African geologist who discovered the copper deposits nearly 30 years ago. It was stated that the cost of opening the mine to date had been £18,000,000 (considerably more than the cost of opening a new gold mine in the Orange Free State), and that at least another £5,000,000 would have to be spent before the mine could double its present production in 1960, when it would produce 85,000 tons of copper a year. (Federal Information Department, Salisbury) **(14918 C.)**

A. BURMA. — U Win Maung elected President of Burma. - U Nu resumes Premiership. - New Cabinet.

U Win Maung, formerly Minister for Marine and Civil Aviation, was nominated as President of the Union of Burma on March 1 by the Anti-Fascist People's Freedom League (the ruling party), and was unanimously elected at a joint session of the two Chambers of the Burmese Parliament on March 11. The new President, who succeeded President Ba U, took the oath of office on March 13 for a five-year term.

President U Win Maung was born near Bassein on April 17, 1916, took a B.A. degree at Judson College (Rangoon), and subsequently worked for the Burma Oil Company and later in a Government department. From 1940-42 he served in the British Army as a second-lieutenant, and during the Japanese occupation of Burma took an active part in the resistance movement of the Anti-Fascist Organization, being sent to India in 1944 for training in military and guerrilla warfare tactics. In March 1945 he was parachuted into Burma and for two months commanded a band of Burmese and Karen guerrillas fighting the Japanese, despite the fact that he had broken one of his legs in the parachute landing. After receiving medical treatment in India he returned to Burma after the Japanese surrender, was elected vice-president of the Karen Youth Organization, and became a member of the Burmese Constituent Assembly in 1947. In 1949 he was appointed Minister for Transport and Communications in the U Nu Government, and after the 1956 elections became Minister for Ports, Marine, Civil Aviation, and Coastal Shipping in the Cabinet formed by U Ba Swe.

On Feb. 28 the Chamber of Deputies had unanimously elected U Nu as Prime Minister in succession to U Ba Swe, who had succeeded U Nu upon the latter's resignation from the Premiership in June 1956. U Nu completed his new Cabinet on March 1, its membership recruited entirely from the AFPFL—being as follows:

U Nu	Prime Minister.
†U Ba Swe	Deputy Prime Minister, Defence and National Planning.
*Sao Hkun Hkio	Deputy Prime Minister, Foreign Affairs, and Head of Shan State.
*U Kyaw Nyein	Deputy Prime Minister and National Economy.
*Thakin Tin	Deputy Prime Minister and Social Services.
*Dr. Saw Hla Tun	Minister for the Karen State.
*U Zan Hla Sin	Minister for the Kachin State.
*Sao Wunna	Minister for the Kayah State.
*U Zahre Lian	Minister for Chin Affairs.
*U Tin	Trade, Development and Supply.
*Bo Khin Maung Gale	Finance and Revenue.
*U Khin Maung Lat	Judicial Affairs.
Thakin Kyaw Tun	Agriculture and Forests.
*Thakin Tha Khin	Home Affairs.
*U Rashid	Mines.
*Bo Min Gaung	Transport, Posts and Telegraphs.
*U Ba Saw	Social Welfare, Mass Education, and Religious Affairs.
*U Shein Htang	Rehabilitation.
*U Tun Win	Co-operative and Commodity Distribution.
*Thakin Chit Maung	Information.
†U Aung Pa	Marine and Civil Aviation.
Sama Duwa Sinwa Nawng	National Solidarity.
*Thakin Pan Myine	Democratization of Local Administration.
*U Tin Nyunt	Labour.
†Thakin Tin Maung	Public Works and Housing.
*Thakin San Myint	Land Nationalization.
*Bo Khin Maung	Industries.
*Maha Thray Sithu Sao Htun E	Relief and Resettlement.
*U Htun Tin	Education and Culture.
*Dr. Soin Ban	Health.

* Held same portfolio in previous Cabinet.
† Held different portfolio in previous Cabinet.

The only changes in the composition of the new Government, compared with that headed by U Ba Swe, were (*a*) U Aung Pa exchanged the portfolios of Public Works and Housing for those of Marine and Civil Aviation, previously held by President U Win Maung; (*b*) Thakin Tin Maung, who succeeded U Aung Pa at the Ministry of Public Works and Housing, had previously been Minister of Agriculture and Forests; (*c*) the latter portfolio was taken over by Thakin Kyaw Tun—a newcomer to the Government; (*d*) the National Solidarity portfolio, dropped during U Ba Swe's Premiership was revived under Sama Duwa Sinwa Nawng, another newcomer.

In a policy statement on March 4, U Nu stressed that the change of Prime Ministers did not denote any change in the Government's policy.

U Nu promised that his Government would examine the grievances of Civil Servants about low remuneration and unfair service conditions; condemned the injection of party politics into academic life; and confirmed the policy of rejecting negotiations with the Communist rebels, referring to the failure of the Government's repeated negotiations with them in the past. With reference to the rebels' allegation that the Government considered it "beneath their dignity" to negotiate, he declared that they were prepared "to throw dignity to the winds" if a genuine peace could be assured. Past experience, however, showed that negotiations would only result in some rebels surrendering with unserviceable arms, while others would remain in revolt and yet others would go underground again after surrender. He appealed to the rebels to surrender after abandoning "the cult of the gun."

Dr. Ba Han was sworn in on March 14 as Attorney-General of the Union, which is not a Cabinet post. - (Burmese Government Information Department, Rangoon) **(Prev. rep. Cabinet, 14981 A; President, 12118 C.)**

B. UNITED KINGDOM. — Resignation of Lord Salisbury. - Opposition to Release of Archbishop Makarios. - Lord Home appointed Lord President of the Council.

It was announced from 10, Downing Street, on March 29 that the Marquess of Salisbury had resigned from the Government because of his disagreement with the decision to release Archbishop Makarios. The announcement added (1) that Lord Home, Secretary of State for Commonwealth Relations, would succeed Lord Salisbury as Lord President of the Council, while remaining at the Commonwealth Relations Office; (2) that Lord Home would also succeed Lord Salisbury as Leader of the House of Lords, with Viscount Hailsham (Minister of Education) as Deputy Leader; and (3) that the responsibility for atomic energy, hitherto exercised by the Lord President of the Council, would be transferred to the Prime Minister.

Lord Salisbury's letter of resignation was as follows:

"... You will have known, from what I have already told you, how disturbed I have been by the decision of my colleagues to release Archbishop Makarios, in the circumstances in which that action is being taken. Had he fulfilled what we have hitherto always regarded as the essential pre-requisite for his release and appealed unconditionally to Eoka to call a halt to its campaign of terrorism, the step which the Government are taking would, I believe, have been fully justified. But he has deliberately refrained from doing that. On the contrary, he has imposed a condition so far-reaching that the Government have had to state quite frankly that they cannot do what he asks.

"But what will the situation be then? We shall have put him in a position to say that we have not carried out the condition on which alone he made his appeal to Eoka, and that he is therefore no longer bound by his undertaking. From that moment, I gravely fear, we shall have a sword of Damocles hanging over our heads.

"There is no sign, so far as I know, that there has been any change of heart in Archbishop Makarios. As a British subject, he will be able to go where he will, except to Cyprus; the initiative will, I believe, pass more and more to him; and he will be able to edge us along from point to point, with increasing injury to that close and confident relationship with Turkey which should, to my mind, be the main basis of British policy in the Middle East at the present time.

"Events may falsify this forecast. I most sincerely hope they will. But, feeling as I do, I am afraid that I could not be a party to recommending to Parliament a course which I believe to be neither wise nor timely.

"May I, however, assure you that, in general, I remain a strong supporter of the Government and of you personally as Prime Minister. I am only sorry that a sincere difference of opinion on this issue of policy, important though it be, should have brought to an end our relationship in a Government in which I have been very happy to serve under your leadership."

In accepting Lord Salisbury's resignation "with the greatest regret," Mr. Macmillan pointed out that the Cabinet had given "a great deal of thought" to the decision to release Archbishop Makarios; that the decision had been made with the full approval of the Governor of Cyprus, Field-Marshal Sir John Harding; and that "no bargain of any kind" had been made with the Archbishop "regarding action which the Government think it right to take." After referring to the improved situation in the island "brought about by our security forces and the weakening of the terrorist movement," the Prime Minister expressed his conviction that "this act of generous statesmanship [i.e. the Archbishop's release] will reap its reward."

Lord Salisbury (63) had been Leader of the House of Lords since 1951 and Lord President of the Council since 1952. As Viscount Cranborne he sat in the House of Commons from 1929-41 as M.P. for South Dorset. After holding the post of Under-Secretary for Foreign Affairs from 1935-38, when he resigned from the Chamberlain Government with Sir (then Mr.) Anthony Eden in protest at its "appeasement" policy, he served from 1940 onwards as Paymaster-General, Dominions Secretary (1941-42 and also in 1943-45), Colonial Secretary (1942), Lord Privy Seal (1942-43) and also in 1951-52 and Commonwealth Relations Secretary (1952). Lord Salisbury is head of the Cecil family, which has a record of public service extending back to Elizabeth I.—(Times - Daily Telegraph) **(Prev. rep. Cyprus, 15418 A; Macmillan Cabinet, 15313 A.)**

APRIL 20—27, 1957

A. UNITED KINGDOM. — Radical Changes in Defence Policy. - Ending of National Service Call-up in 1960. - Reduction in Strength of Forces. - New Naval and Air Strategy. - Defence Estimates for 1957-58.

A White Paper outlining the Government's future defence policy and foreshadowing sweeping changes affecting all three Services—officially described as "the biggest change in defence policy ever made in normal times"—was published on April 5. The main points in the new policy were:

(1) A progressive reduction in National Service intake, with no further call-ups after the end of 1960.

(2) The building-up of the Regular forces to 375,000 men.

(3) High priority for the development of nuclear weapons for delivery by bombers, rockets, and guided missiles.

(4) Cessation of development work on the supersonic bomber and on the production of manned fighters more advanced than the P.1 (which would be replaced later by a ground-to-air guided missile system).

(5) Concentration of development work on rockets of more advanced types than those to be supplied by the U.S.A.

(6) Reorganization of the Royal Navy on the basis of (*a*) a small number of aircraft carrier groups, each with one carrier supported by guided-missile ships; (*b*) a reduced number of cruisers and smaller vessels; (*c*) the scrapping of ships (including battleships) in the Reserve Fleet.

(7) Withdrawal of the remaining British troops in Korea, and progressive reductions in the forces stationed in Libya.

(8) Maintenance of a central reserve in the British Isles, and the building-up of a substantial fleet of transport aircraft to ensure mobility.

(9) Fair compensation for redundant officers and men.

(10) Frank recognition of the fact that "there is at present no means of providing adequate protection for the people of this country against the consequences of an attack with nuclear weapons."

The White Paper on Defence (Cmd. 124) is summarized below under cross-headings:

The Need for a New Approach. "As previous Statements on Defence have emphasized, Britain's defence policy is determined by her obligation to make her contribution to NATO and other alliances for collective defence, as well as to discharge her own special responsibilities in many parts of the world.

"The present shape of Britain's defence forces was largely settled by the rearmament programme launched in 1950 at the time of the Korean War. However, the ending of hostilities in Korea radically altered the position. The immediate danger of major war . . . was replaced by the prospect of a prolonged period of acute international tension. It was clear that the plan for a short intensive rearmament spurt no longer fitted the needs of the situation, and that the conception of the 'long haul' must be substituted for it. It also became evident that a military effort on the scale planned in 1950, which envisaged expenditure amounting to £4,700 million over three years, was beyond the country's capacity. In an endeavour to keep the cost within bounds, the programme was slowed down and spread out over a longer period. In addition, it has been examined each year and pruned back as far as possible.

"However, the time has now come to revise not merely the size but the whole character of the defence plan. The Communist threat remains, but its nature has changed; and it is now evident that, on both military and economic grounds, it is necessary to make a fresh appreciation of the problem and to adopt a new approach towards it.

Scientific Advances. "In recent years military technology has been making dramatic strides . . . In less than a decade, the atom-bomb dropped at Hiroshima has been overtaken by the far more powerful hydrogen or megaton bomb. Parallel with this, the evolution of rocket weapons of all kinds, both offensive and defensive, has been proceeding apace. It has been clear for some time that these scientific advances must fundamentally alter the whole basis of military planning. But it is only now that the future picture is becoming sufficiently clear to enable a comprehensive reshaping of policy to be undertaken with any degree of confidence.

Demands on Economic Resources. "Britain's influence in the world depends first and foremost on the health of her internal economy and the success of her export trade. Without these, military power cannot in the long run be supported. It is therefore in the true interests of defence that the claims of military expenditure should be considered in conjunction with the need to maintain the country's financial and economic strength. Over the last five years, defence has on an average absorbed 10 per cent of Britain's gross national product. Some 7 per cent of the working population are either in the Services or supporting them. One-eighth of the output of the metal-using industries, upon which the export trade largely depends, is devoted to defence. An undue proportion of qualified scientists and engineers are engaged on military work. In addition, the retention of such large forces abroad gives rise to heavy charges which place a severe strain upon the balance of payments.

Britain's Responsibilities. "A defence plan, to be effective and economical, must be based on a clear understanding of the military responsibilities to be discharged. Britain's armed forces must be capable of performing two main tasks:

(i) to play their part with the forces of Allied countries in deterring and resisting aggression;

(ii) to defend British colonies and protected territories against local attack, and undertake limited operations in overseas emergencies.

"The aim must be to provide well-equipped forces sufficient to carry out these duties, while making no greater demands than are absolutely necessary upon manpower, money and other national resources.

"Frequent changes in defence policy are wasteful and disturbing . . . The rapid progress of scientific development and fluctuations in the international situation make it difficult to foresee future military requirements with any certainty, and consequently a good deal of flexibility must be maintained. Nevertheless, an attempt must be made to establish a broad framework within which long-term planning can proceed.

Collective Defence. "The growth in the power of weapons of mass destruction has emphasized the fact that no country can any longer protect itself in isolation. The defence of Britain is possible only as part of the collective defence of the free world. This conception of collective defence is the basis of the North Atlantic, South-East Asia, and Baghdad alliances. The trend is towards the creation of integrated allied forces. Therefore, provided each member-nation plays its fair part in the joint effort, it is not necessarily desirable that each should seek to contribute national forces which are by themselves self-sufficient and balanced in all respects. But whatever yardstick is taken, it is impossible to escape the conclusion that Britain has been bearing a disproportionately large share of the total burden of Western defence. Moreover, in assessing the value of her military effort, it must be remembered that, apart from the United States, Britain alone makes a contribution to the nuclear deterrent power upon which the peace of the world so largely rests.

The Nuclear Deterrent. "It must be frankly recognized that there is at present no means of providing adequate protection for the people of this country against the consequences of an attack with nuclear weapons. Though, in the event of war, R.A.F. fighter aircraft would unquestionably be able to take a heavy toll of enemy bombers, a proportion would inevitably get through. Even if it were only a dozen, they could with megaton bombs inflict widespread devastation. This makes it more than ever clear that the overriding consideration in all military planning must be to prevent war rather than to prepare for it.

"While comprehensive disarmament remains among the foremost objectives of British foreign policy, it is unhappily true that, pending international agreement, the only existing safeguard against major aggression is the power to threaten retaliation with nuclear weapons. The free world is to-day mainly dependent for its protection upon the nuclear capacity of the United States. While Britain cannot by comparison make more than a modest contribution, there is a wide measure of agreement that she must possess an appreciable element of nuclear deterrent power of her own. British atomic bombs are already in steady production and the R.A.F. holds a substantial number of them. A British megaton weapon has now been developed. This will shortly be tested and thereafter a stock will be manufactured.

"The means of delivering these weapons is provided at present by medium bombers of the V-class, whose performance in speed and altitude is comparable to that of any bomber aircraft now in service in any other country. It is the intention that these should be supplemented by ballistic rockets. Agreement in principle has recently been reached with the U.S. Government for the supply of some medium-range missiles of this type.

"Since peace so largely depends upon the deterrent fear of nuclear retaliation, it is essential that a would-be aggressor should not be allowed to think he could readily knock out the bomber bases in Britain before aircraft could take off from them. The defence of the bomber airfields is therefore an essential part of the deterrent and is a feasible task. A manned fighter force, smaller than at present but adequate for this limited purpose, will be maintained and will be equipped with air-to-air guided missiles. Fighter aircraft will in due course be replaced by a ground-to-air guided missile system."

Civil Defence. "It would be wrong not to take some precautions to minimize the effects of nuclear attack, should the deterrent fail to prevent war. Civil Defence must accordingly play an essential part in the defence plan. As in other fields, the country's economic capacity limits the effort which can be devoted to this purpose. In 1957-58 the main task will be to keep the existing local organization in being, so as to provide a basis on which realistic planning can continue. The necessary training equipment will be provided. Essential research will proceed; and work on emergency communications and on setting up the fall-out warning and monitoring system will go on. These preparations will provide a frame work for expansion, should that later be necessary.

Reduction of British Forces in Europe. "The possession of nuclear air power is not by itself a complete deterrent. The frontiers of the free world, particularly in Europe, must be firmly defended on the ground. For only in this way can it be made clear that aggression will be resisted. Britain must provide her fair share of the armed forces needed for this purpose. However, she cannot any longer continue to make a disproportionately large contribution.

"Accordingly, H.M. Government, after consultation with the Allied Governments in the North Atlantic Council and in the Council of the Western European Union, have felt it necessary to make reductions in the British land and air forces on the Continent. The strength of the British Army of the Rhine will be reduced from about 77,000 to about 64,000 during the next 12 months; and, subject to consultation with the Allied Governments, further reductions will be made thereafter. The force will be reorganized to increase the proportion of fighting units, and atomic rocket artillery will be introduced which will greatly augment their fire-power. The aircraft of the Second Tactical Air Force in Germany will be reduced to about half their present number by the end of March 1958. This reduction will be offset by the fact that some squadrons will be provided with atomic bombs. A similar reduction will be made in the light bomber force in England, which is assigned to NATO.

The Naval Role in Nuclear Warfare. "The role of naval forces in total war is somewhat uncertain. It may well be that the initial nuclear bombardment and counter-bombardment by aircraft or rockets would be so crippling as to bring the war to an end within a few weeks or even days, in which case naval operations would not play any significant part. On the other hand, there is the possibility that the nuclear battle might not prove immediately decisive; and in that event it would be of great importance to defend Atlantic communications against submarine attack. It is therefore necessary for NATO to maintain substantial naval forces and maritime air units. Britain must make her contribution, though on a somewhat reduced scale.

The Middle East. "Outside the area covered by the North Atlantic Alliance, Britain has military responsibilities in other parts of the world, in particular in the Middle East and South-East Asia. Apart from its own importance, the Middle East guards the right flank of NATO and is the gateway to the African continent. In the Arabian peninsula, Britain must at all times be ready to defend Aden Colony and Protectorates and the territories on the Persian Gulf for whose defence she is responsible. For this task, land, sea and air forces have to be maintained in that area and in East Africa.

"In addition, Britain has undertaken in the Baghdad Pact to co-operate with the other signatory States for security and defence, and for the prevention of Communist encroachment and infiltration. In an emergency, British forces in the Middle East area would be made available to support the Alliance. These would include bomber squadrons based in Cyprus capable of delivering nuclear weapons. As a result of the termination of the treaty with Jordan, Britain has been relieved of the responsibility for defending that country . . . and British forces are being withdrawn. The British troops in Libya will also be progressively reduced.

The Far East. "In South-East Asia, apart from defending her colonies and protectorates, Britain has agreed to assist in the external defence of Malaya after she attains independence. Britain also has an international commitment, as a member of the SEATO and ANZAM [ANZUS] defence systems, to help preserve stability and resist the extension of Communist power in that area. It is proposed to maintain in this theatre a mixed British-Gurkha force and certain air force elements, together with a substantial garrison in Hong Kong and a small naval force based on Singapore. In addition, there is a Commonwealth Strategic Reserve, including a brigade to which Britain contributes two battalions. Australia and New Zealand jointly provide the remainder of the brigade and some naval and air forces.

"After consultation with the U.S.A. and with the other Commonwealth countries concerned, the Government have decided to withdraw the remaining U.K. troops (approximately a battalion) from Korea. A liaison mission will be retained at the Headquarters of the U.N. Command.

Overseas Garrisons. "In view of the increasing strength and efficiency of Colonial forces and the growing capacity to send reinforcements rapidly from Britain, the Government propose to make considerable reductions in garrisons for British colonies and protectorates wherever practicable.

The Central Reserve. "With the reduction in the size of garrisons and other British forces overseas, it is more than ever essential to be able to despatch reinforcements at short notice. With this object, a Central Reserve will be maintained in the British Isles. To be effective, the Central Reserve must possess the means of rapid mobility. For this purpose a substantial fleet of transport aircraft is being built up in R.A.F. Transport Command. This is at present mainly composed of *Comet II's*, *Beverley* freighters and *Hastings* aircraft, to which a number of *Britannias* will later be added. These transport resources would be supplemented, when necessary, by civil aircraft and by naval and other vessels.

"Besides the land forces of the Central Reserve, additional military power can rapidly be provided by the Bomber, Fighter and Coastal Commands of the R.A.F.

Sea Power. "On account of its mobility, the Royal Navy, together with the Royal Marines, provides another effective means of bringing power rapidly to bear in peacetime emergencies or limited hostilities. In modern conditions the role of the aircraft carrier, which is in effect a mobile air station, becomes increasingly significant. With this consideration in mind, it is proposed to base the main elements of the Royal Navy upon a small number of carrier groups, each composed of one aircraft carrier and a number of supporting ships. Apart from carriers, the number of large ships will be restricted to the minimum. The cruisers in the active fleet will be reduced and, in due course, replaced by new ships of the *Tiger* class, now under construction. Similarly, in the various categories of smaller vessels, the policy will be to rely on a reduced number of more modern ships, some of which will be equipped with guided missiles. A considerable number of ships now in reserve, including battleships, will be disposed of or scrapped.

"It is the Government's intention to maintain British naval strength east of Suez at about its present level. One carrier group will normally be stationed in the Indian Ocean.

Manpower Requirements. "Provided that the Services are reshaped and redistributed on the lines indicated above, and that commitments are curtailed in the manner proposed, the Government are satisfied that Britain could discharge her overseas responsibilities and make an effective contribution to the defence of the free world with armed forces much smaller than at present . . . The revised defence plan, with its greatly reduced demands on manpower and its emphasis on highly trained mobile forces, now makes it possible to contemplate putting the Services on to an all-Regular basis; and the Government will endeavour to bring about this change as soon as practicable.

"National Service inevitably involves an uneconomic use of manpower, especially in the training organization. There are at present no less than 150,000 men training or being trained in the establishments of the three Services. This high figure is due, in large measure, to the continuous turnover inseparable from National Service, the abolition of which would make possible substantial savings in manpower.

"Parallel with this, economies in administrative overheads are being sought. The Service Departments and Ministry of Supply are already engaged in a further effort to cut down the numbers of headquarters and the size of staffs, to eliminate duplication on common tasks, such as signal communications, and to reduce the number of men serving in depots and base installations, by concentrating work in fewer places and curtailing the holdings of stores. Every endeavour will also be made to extend the practice of employing civilians or civilian contractors on tasks where it is not essential for military reasons to employ Service personnel, such as storekeeping, accounting, maintenance of equipment, policing, and catering."

After pointing out that the process of reducing the size of the Forces and building up Regular recruitment to the required level would take several years, the White Paper stated that during the coming 12 months it was proposed to reduce the combined strength of the three Services, at present about 690,000, to about 635,000. The rate of run-down in subsequent years would depend on the international situation and its effect on the military requirements of NATO and other regional alliances.

"In the light of the need to maintain a balanced distribution of the national resources," the White Paper went on, "the Government have made a comprehensive review of the demands of defence upon the economy and of the country's military responsibilities. They have concluded that it would be right to aim at stabilizing the armed forces on an all-Regular footing at a strength of about 375,000 by the end of 1962. This does not take account of Colonial troops and other forces enlisted overseas, which at present amount to about 60,000."

National Service. "The Government have accordingly decided to plan on the basis that there will be no further call-up under the National Service Acts after the end of 1960. It must nevertheless be understood that, if voluntary recruiting fails to produce the numbers required, the country will have to face the need for some limited form of compulsory service to bridge the gap. While the Regular element is building up and the total strength of the forces is being run down, the size of the National Service intake will have to be progressively reduced. The result will be that the number of men becoming available for National Service will, to a growing extent, exceed requirements. The Government have prepared plans to effect the call-up of the reduced numbers needed, and will shortly announce these to Parliament.

Regular Recruitment. "The task of increasing Regular recruitment to the required level will not be easy; nor is the problem the same in all three Services. The Royal Navy is already, in the main, a Regular force on long-service engagements, and it should not have much difficulty in attracting enough recruits to meet its needs. In the R.A.F., 127,000 other ranks, or about two-thirds of the present strength, are Regulars; but some 31,000 of these are serving on three-year engagements, and many of them would not have enlisted but for their liability for National Service. Nevertheless, the recent improvement in its recruiting makes it reasonable to hope that the R.A.F. will be able to enlist enough Regulars to meet the smaller numbers required under the revised plan.

"It is in the Army that the greatest difficulty arises. There are about 167,000 Regulars, but of these less than 80,000 are serving on engagements of over three years. A marked improvement in recruiting will therefore be needed to make the Army independent of National Service."

Pointing out that it was necessary to maintain a proper balance in the composition of the Forces, with an adequate proportion of skilled tradesmen, the White Paper stressed the problems presented by the need (*a*) to replace the professional and skilled men who at present were called up for National Service after deferment; (*b*) to obtain sufficient recruits to man the branches which performed the less popular duties. In order to make Service life more attractive and encourage recruiting, ration scales were being increased and the Government proposed to press ahead with the modernization of barracks and the provision of further married quarters and better

recreational facilities. Methods of improving Servicemen's prospects on returning to civilian life were aslo being examined. In order to waste no time in building up the Regular element, the recruiting campaign would be intensified and more money provided in 1957-58 for this purpose.

The Reserve Forces. "Individual reservists and certain reserve units will be needed to make good deficiencies in the Regular Army in emergencies. The Territorial Army will, as at present, be trained and equipped as a fighting force primarily assigned to the task of home defence. Under present plans Britain is due to provide two T.A. divisions as reinforcements for NATO. Since these would not be ready for action on the Continent in less than three months, which in nuclear war would be of little value, the Government consider that it would be more appropriate to assign them to home defence duties like the rest of the Territorial Army. This question is being discussed with NATO.

"Apart from the units of the Royal Auxiliary Air Force and the Royal Naval Volunteer Reserve which it has regretfully been found necessary to disband, the Naval and Air Force Reserves will be retained in their present roles, though they will have to be reduced and . . . reorganized to accord with the new plan.

Research and Development. "If the weapons and equipment of the armed forces are to be kept up-to-date, an adequate effort on research and development must be continuously maintained. However, in view of the shortage of scientists and technicians in civil industry, it is important to restrict the military programme to those projects which are absolutely essential.

"A central feature of the defence plan is the maintenance of an effective deterrent. High priority will therefore continue to be given to the development of British nuclear weapons suitable for delivery by manned bombers and ballistic rockets. Nuclear warheads are also being evolved for defensive guided missiles.

"The close co-operation with the U.S.A. in research on guided missiles and ballistic rockets, initiated under the agreement of 1953 . . . will be maintained and further developed. The agreement in principle for the supply of American rockets (see 15457 A) should result in savings of time and money and will enable work to be concentrated upon more advanced types.

"Having regard to the high performance and potentialities of the *Vulcan* and *Victor* medium bombers, and the likely progress of ballistic rockets and missile defence, the Government have decided not to go on with the development of a supersonic manned bomber, which could not be brought into service in much under 10 years.

"Work will proceed on the development of a ground-to-air missile defence system, which will in due course replace the manned aircraft of Fighter Command. In view of the good progress already made, the Government have come to the conclusion that the R.A.F. are unlikely to have a requirement for fighter aircraft types more advanced than the supersonic P.1, and work on such projects will stop.

"Increased emphasis will be placed on the development of nuclear propulsion for maritime purposes, which has great civil as well as naval importance.

"The Government have in recent months been exploring with the French Government and other member-States the possibility of closer co-operation on research and development within the framework of the Western European Union."

Commonwealth Co-operation. After referring to the Woomera guided-missile range in Australia as "an outstanding example of Commonwealth co-operation on research and development," the White Paper stated that the Government would maintain close co-operation with Commonwealth countries in defence matters generally by means of inter-governmental consultations, frequent meetings of Chiefs of Staff, the exchange and secondment of officers, the supply of training facilities, and regular conferences of the Commonwealth Advisory Committee for Defence Science.

Compensation for Redundant Officers and N.C.O.s. The White Paper stressed that the new defence plan involved "the biggest change in military policy ever made in normal times," and that the large reduction in the size of the Forces would "inevitably create some surplus of officers and N.C.O.s." Those whose careers had to be prematurely terminated would be given fair compensation and helped to find suitable employment in civil life. The curtailment of many kinds of defence work would mean that some establishments would have to be closed, but the Departments concerned would do everything possible to ensure that the manpower and industrial resources released were absorbed into productive use as quickly as possible.

Defence Expenditure. The White Paper estimated that if the defence programme planned for 1956-57 had been allowed to continue unchanged, gross expenditure for 1957-58 (i.e. before deducting receipts from Germany and the U.S.A.) would have risen to about £1,700,000,000. By strenuous efforts towards economy—in particular the substantial reduction in the overall strength of the Forces, the cutting down of production orders and purchases of stores, and some curtailment of the research and development programme—it had been possible to keep the Estimates down to a total of £1,483,000,000. Deducting receipts of about £50,000,000 from Germany and £13,000,000 from the U.S.A., the net Estimates of total defence expenditure for 1957-58 would thus amount to about £1,420,000,000.

Although no forecast of the level of expenditure in later years was yet possible (the White Paper concluded) it could not be expected to show a decline in any way comparable with the decline in manpower —primarily owing to the ever-increasing complexity of modern weapons and equipment, the higher cost per man of Regular forces, and the fact that proportionately more civilians would be employed. Nevertheless it could safely be assumed that the new plan, when fully implemented, would appreciably reduce the burden on the national economy and release skilled men, including badly-needed scientists and technicians, for employment in civilian industry.

Detailed analyses of the proposed active strength of the three Services and of the estimated cost of the 1957-58 programme as a whole were given in a White Paper (*Defence Statistics, 1957-58*, Cmd. 130) which was also published on April 5. A summary is given below:

Manpower Statistics.

The estimated strength of the Forces at April 1, 1957, and April 1, 1958, compared with the actual strength at April 1, 1956, was shown as follows:

	April 1, 1956 (actual)	April 1, 1957 (estimated)	April 1, 1958 (estimated)
Regulars	467,200	451,900	639,700
National Servicemen	289,000	251,700	
Women's Services	16,500	15,200	14,600
Total	727,700	718,800	654,300

The White Paper stated that the three Services would require about 160,000 male entrants in 1957-58. Of this total, about 121,000 were expected to be National Servicemen or those within the National Service age-group; 2,000 of these were expected to go to the Royal Navy, 84,500 to the Army, and 34,500 to the R.A.F.

Financial Statistics.

The gross cost of the 1957-58 programme was estimated at £1,483,000,000, or £115,670,000 less than the original 1956-57 estimate of £1,598,700,000. Receipts from the U.S.A. and Western Germany were expected to be only £62,750,000, or £37,250,000 less than the £100,000,000 originally estimated for 1956-57. The net cost of the 1957-58 programme (i.e. after deducting receipts from the U.S.A. and Germany) was therefore estimated at £1,420,280,000, or £78,420,000 less than the net estimate of £1,498,700,000 for 1956-57.

The division between Departments in 1957-58 and 1956-57 is shown below:

	Gross. Estimate 1957-58	*Net.* Original Estimate 1956-57	*Gross* Estimate 1957-58	*Net.* Original Estimate 1956-57
	(£ million)		(£ million)	
Admiralty	316.15	351.5	316.00	346.0
War Office	445.50	519.0	401.40	472.0
Air Ministry	506.15	527.0	487.65	479.5
Ministry of Supply	197.60	185.0	197.60	185.0
Ministry of Defence	17.63	16.2	17.63	16.2
	1,483.03	1,598.7	1,420.28	1,498.7

U.S. Aid. Of the estimated receipts of £12,750,000 in 1957-58, £3,250,000 had been allotted to the Army and £9,500,000 to the RAF.

Offshore Procurement. The value of new contracts placed in the U.K. by the U.S.A. in 1956 under the Offshore Procurement Programme was $34,000,000, bringing the total value of these contracts to $717,000,000.

Military Aid from the U.S.A. and Canada. During 1956 further deliveries of equipment had been received under the U.S. Mutual Security Act, and U.S. assistance for the re-equipment of certain ammunition production capacity had continued. The Canadian Government had provided further supplies of ammunition, propellants, and explosives under its Mutual Aid Programme.

German Contribution. During recent Anglo-German negotiations, the German representatives had agreed to recommend to their Government a contribution of £50,000,000 to the U.K. defence effort. On the assumption that this recommendation would be accepted, the 1957-58 Estimates provided for the appropriation-in-aid of £150,000 to Navy Votes, £40,850,000 to Army Votes, and £9,000,000 to Air Votes.

The White Paper also stated that £21,900,000 would be provided in 1957-58 for defence expenditure by civil Departments (including loan expenditure by the Post Office), against £30,810,000 in the revised Estimates for 1956-57.
(White Papers, Cmd. 124 and Cmd. 130 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15364 A; 14773 A; Defence Economy Cuts, 15344 A.)**

A. ISRAEL. — Par Value for Israel Pound.

The International Monetary Fund announced on March 13 that the initial par value for the Israel pound had been established by agreement with the Government of Israel at 1.80000 Israeli pounds to the U.S. dollar, the other new parities being £I.1=0.493706 grams of fine gold or 55.5556 U.S. cents.
(International Monetary Fund) **(Prev. rep. 15361 B.)**

A. UNITED STATES. — The 1957-58 Budget.

President Eisenhower submitted to Congress on Jan. 16 his Budget proposals for the fiscal year 1958 (i.e. July 1957 to June 1958). Total expenditure was estimated at $71,800,000,000 (of which $43,335,000,000, or over 60 per cent, was for major national security programmes) and revenue at $73,600,000,000, giving a budgetary surplus of $1,800,000,000. The Budget was the largest ever presented in the peacetime history of the U.S.A., detailed estimates of revenue and expenditure being shown below :

	Actual 1956	Estimate 1957	Estimate 1958
		($ million)	
Budget Receipts :			
Individual income taxes	35,334	38,500	41,000
Corporation income taxes	21,299	21,400	22,000
Excise taxes	10,004	10,691	11,071
Employment taxes	7,296	7,750	8,420
Estate and gift taxes	1,171	1,380	1,475
Customs	705	775	800
Miscellaneous receipts	3,012	2,991	3,283
Deduct—			
Transfers to trust funds	6,971	8,979	10,273
Refunds of receipts (excluding interest)	3,684	3,880	4,156
Net budget receipts	68,165	70,628	73,620
Estimated Expenditure :			
Major National Security	40,641	40,965	43,335
International Affairs and Finance	1,846	2,382	2,444
Veterans' Services and Benefits	4,756	4,851	5,027
Labour and Welfare	2,776	3,032	3,538
Agriculture and Agricultural Resources	4,913	4,701	4,965
Natural Resources	1,104	1,371	1,538
Commerce and Housing	2,028	2,269	1,748
General Government	1,629	1,870	1,451
Interest	6,846	7,200	7,360
Allowance for contingencies	—	200	400
Total	66,540	68,900	71,807
Budget Surplus	+1,626	+1,726	+1,813

The total amount of " new obligational authority " sought (i.e. authority to enter new commitments for which payment might not be made until future years) was $73,300,000,000, compared with $70,500,000,000 in the 1956-57 Budget.

For both new obligational authority and Budget expenditures about seven-tenths of the estimated increases between the two years were for the military functions of the Defence Department, " reflecting the higher costs of producing, operating, and maintaining the complex new weapons and equipment being delivered in growing quantities to our defence establishment." Other major increases were for health, education, and welfare, including the proposed aid for school construction (see below) and for the Atomic Energy Commission.

Extracts from the President's Budget message are given below :

Budget Policy. After saying that the U.S.A. had demonstrated that it was possible " to sustain a high-employment economy independent of war and continually unbalanced Federal budgets," and that " the prospect for continued economic growth is bright," the Message continued : " Attainment of that goal is possible only with prudent management of the Government's fiscal affairs. Our Federal budget must contribute to the nation's financial stability and to the preservation of the purchasing power of the dollar. Maintaining a sound dollar requires of us both self-discipline and courage. At a time like the present, when the economy is operating at a very high rate and is subject to inflationary pressures, Government clearly should seek to alleviate rather than aggravate those pressures. Government can do its part, but business and labour leadership must earnestly co-operate—or what Government can do in a free society at a time like this will not prevent inflation.

" For the Government to do its part in the coming year, taxes must be retained at the present rates so that receipts will exceed Budget expenditures and the public debt can be further reduced. The prospective Budget surplus in the fiscal year 1958 will reinforce the restraining effect of present credit and monetary policies. The present situation also requires that less pressing expenditure programmes must be held back and some meritorious proposals postponed . . .

" Continuation of balanced Budgets into the future requires that the total of new authority to incur obligations, as well as the Budget expenditures for the year, should be less than the total of realistically anticipated Budget receipts. This policy of controlling Budget authorizations, which has been followed since the beginning of this Administration, has helped us move from a Budget deficit of $9,400,000,000 in the fiscal year 1953 to balanced budgets in 1956, 1957 and 1958.

" In this Budget the total of new authority proposed for 1958 is $73,300,000,000—$279,000,000 less than estimated Budget receipts. Of the total recommended new authority, specific action by this session of Congress will be necessary for $56,300,000,000. Other new authority, such as that for paying interest on the public debt, will become available under previously enacted permanent authorizations . . .

" The figures in this Budget for the fiscal years 1957 and 1958 are not precisely comparable to the actual figures for prior years. Under the provisions of legislation enacted last year, the financial transactions for the greatly expanded Federal-aid highway programme are included in a self-liquidating trust fund and are not in the Budget totals."

On revenue policy the President said : " It is my firm belief that tax rates are still too high and that we should look forward to further tax reductions as soon as they can be accomplished within a sound Budget policy. Reductions in tax rates would give relief to taxpayers and would also release funds for the activity and investment necessary for sustained economic growth through private initiative. However, the reduction of tax rates must give way under present circumstances to the cost of meeting our urgent national responsibilities. For the present, therefore, I ask for continuation for another year of the existing Excise Tax rates on tobacco, liquor, and automobiles, which, under present law, would be reduced on April 1, 1957. I must also recommend that the present Corporate Tax rates be continued for another year. It would be neither fair nor appropriate to allow Excise and Corporate Tax reductions to be made at a time when a general tax reduction cannot be undertaken." The Message added, however, that some tax relief should be considered for small businesses.

Defence. Expenditure on defence, the main constituent of the item " major national security," was estimated at $38,031,000,000, compared with an estimated $36,005,000,000 for 1957-58 and an actual $35,791,000,000 in 1955-56. Of the 1957-58 total, $17,472,000,000 was for the Air Force, $10,349,000,000 for the Navy, and $9,131,000,000 for the Army. [These figures compared with estimated expenditures in the fiscal year 1956-57 of $16,890,000,000 for the Air Force, $9,730,000,000 for the Navy, and $8,580,000,000 for the Army.] The principal items were pay of the armed forces, $10,664,000,000 ; operation and maintenance, $9,847,000,000 ; major procurement and production, $12,030,000,000 (including $6,232,000,000 for aircraft, $1,555,000,000 for ships, $2,646,000,000 for guided missiles, and $1,597,000,000 for other supplies) ; $2,122,000,000 for military public works ; $1,651,000,000 for research and development ; and $1,237,000,000 for reserve components.

The Budget message said that total military personnel on active duty during the year would be approximately 2,800,000—the personnel of the Army, Navy, and Marine Corps maintaining " about their current numbers," while the Air Force would be increased by " several thousand " men. The composition of the three Services at the end of 1957-58 would be as follows :

Air Force. 128 wings ; 24,398 aircraft ; 925,000 men (an increase of 10,000). 100 more B-52 heavy jet bombers would be added to the Air Force during the year, bringing the total to 600. The fixing of the overall strength at 128 wings meant a cut of five wings as compared with the previous strength of 133, and the abandonment of the former target of 137 wings, the reduction being attributable to the growing number of Army missiles available for ground support tactical operations. Under a reorganization to be carried out, the Air Force would comprise 45 strategic wings, 32 air defence wings, and 51 tactical wings. Of the present strength of 133 wings, 121 were combat wings and 12 troop-carrier wings.

Navy : 983 active ships, including 422 warships and 561 other types (compared with 406 warships and 568 other types at present) ; 11,790 aircraft (including Marine Corps planes) ; 875,000 personnel (compared with 872,947), including 200,000 Marines. There would be 17 carrier air groups (unchanged) ; 20 carrier anti-submarine squadrons (an increase of one squadron) ; three Marine divisions and three Marine aircraft wings (both unchanged). New warships to be added to the Navy would include its first atomic aircraft carrier, four nuclear submarines, and 13 destroyers and frigate-type ships.

Army. Active Army—1,000,000 men (compared with 991,600) organized in 17 divisions (a decrease of two), nine regimental combat teams (unchanged), six new atomic support commands, and 127 anti-aircraft battalions (a reduction of six, indicating that the new atomic support commands might be made up of the A.A. battalions). Strength of the Reserve Army would be 697,000 (625,000), of which 297,000 would be in the Regular Army Reserve and 400,000 in the National Guard. The six new atomic support commands, comprising 5,000-6,000 men, would be organized in support of local military forces and equipped with nuclear combat weapons, including the *Honest John* and *Corporal* missiles. [Although the President did not disclose the disposition of the new units, it was stated in the U.S. Press that most of them would be stationed in Europe as soon as they were ready.]

Defence Policy. As regards defence policy as a whole, President Eisenhower said that new equipment and weapons with vastly greater combat capability had made it " no longer valid " to measure military power in terms of Army divisions, Air Force wings, and Navy warships. Major procurement and production expenditures would be $542,000,000 higher than in 1956-57, and expenditure for guided missiles would increase by 35 per cent and for ship construction by about 12 per cent, whilst expenditure on aircraft would remain at about the same level.

The Budget message summarized the functions of the armed forces in terms of " missions " which cut across the traditional objectives of the Army, Navy, and Air Force. It enumerated four basic defence " missions," as follows :

(1) To maintain ready nuclear-air retaliatory forces as a deterrent. Procurement in 1958, the President explained, would see the equipment of the heavy bomber wings of Strategic Air Command with 48 jet B-52 aircraft in place of the present smaller number of 30 B-36's. Strategic fighter wings would be eliminated as unnecessary. The striking power of the Navy would be enhanced with new cruisers, jet aircraft, atomic submarines, and guided missile ships.

(2) To build a defence system that would minimize the chances of successful attack on the American continent. In this connexion it was announced (*a*) that the Continental Air Defence Command's radar warning network, from the Central Pacific around the northern perimeter of North America and across the Atlantic approaches, would be largely in operation during the next fiscal year; (*b*) that interceptor squadrons of the Air Force, the anti-aircraft missile strength of the Army, and anti-submarine capabilities of the Navy would all be strengthened.

(3) To maintain mobile and versatile forces capable of deploying quickly in the event of aggression. The Army's new "pentomic" divisions, each of which had five groups for mobility in atomic warfare, were one element in this strategy. The Marines had been equipped with a variety of atomic weapons, and their assault capabilities improved.

(4) To maintain control of the essential sea areas and lines of communication in case of war. This was primarily the task of the Navy, although the Air Force and the Army had been given roles. The number of active ships in the Fleet would remain the same, but older ones would be replaced by new ships.

Atomic Energy. The message said that until an agreement for limitation of armaments was negotiated and an effective inspection system functioning, the U.S.A. would increase the number and variety of nuclear weapons, "with special emphasis on weapons for tactical purposes and weapons with reduced radioactive fall-out." In addition, the "substantial present effort" to develop military propulsion reactors would be continued; efforts to develop the peaceful uses of atomic energy, particularly the development of atomic power production, would be "greatly increased"; and training centres in the U.S.A. and abroad would be set up to help other countries develop their own atomic energy programmes.

In addition to increased efforts by the Atomic Energy Commission to "explore new power reactor concepts, operate reactor experiments, and develop the basic reactor technology," greater support would also be given to the development of commercial power reactors for private industry and public power bodies. No funds for the construction of such new large-scale reactors were proposed in the Budget, in the belief that basic responsibility for this should not have to be assumed by the Federal Government. "However," it was added, "if acceptable proposals for non-Federal construction of promising reactor types do not materialize within a reasonable time, a request will be made to Congress for funds for direct construction by the Federal Government."

To facilitate investment by industry in atomic power plants, legislation would again be proposed to authorize the Government to supplement commercially available insurance against liability arising from possible nuclear accidents. More resources would be applied to the longer-term efforts to develop thermo-nuclear power reactors; increased research was planned on such problems as reactor safety, radioactive waste disposal, and the biological effects of radiation; and support of research in nuclear physics and in new uses of atomic energy in biology, medicine, agriculture, and industry would be strengthened. Equipment grants and funds for the training of teachers would be increased to improve education in nuclear technology and to help alleviate the shortage of nuclear scientists and engineers.

Strategic Stockpile. By the end of the fiscal year 1956-57 the stockpile of strategic and critical materials such as rubber, aluminium, copper, and nickel would have reached a value exceeding $6,000,000,000. Further acquisitions would be limited in most cases to materials for which contracts had already been made, or those which could be procured at favourable prices, or those obtained in exchange for surplus agricultural products.

Mutual Security Programme. Military aid under the Mutual Security Programme was estimated to cost $2,600,000,000, and economic, technical, and other aid $1,750,000,000—a total of $4,350,000,000, compared with total appropriations of $3,804,000,000 enacted for 1956-57. New obligational authority for 1957-58 was recommended at $4,400,000,000 (including $2,540,000,000 for military aid and $1,950,000,000 for economic, technical, and other aid), compared with $3,767,000,000 in 1956-57 and $2,703,000,000 in 1955-56.

The Message stated that the armed forces of 38 countries were now receiving military equipment and training under the programme, and that (as in the case of the U.S. forces) a large part of aid funds in 1957-58 would be used for new types of weapons for air defence. An increasing amount of military equipment assistance, however, would be furnished on a reimbursable rather than a grant basis, for which changes in legislation would be recommended.

The recommended appropriations of $4,400,000,000 included $200,000,000 which would be available for discretionary use by the President in the Middle East, in addition to the specific programmes for countries in that area.

Total "Expenditures for Protection." A table given in the Budget message showed that total "expenditures for protection, including collective security," would amount to $45,300,000,000, compared with an estimate of $42,700,000,000 in 1956-57 and actual expenditure of $42,400,000,000 in 1955-56. Of the 1957-58 total, $38,000,000,000 was for defence, $2,600,000,000 for the military side of the Mutual Security Programme, $2,300,000,000 for the Atomic Energy Commission, $400,000,000 for stockpiling and defence production expansion, $1,800,000,000 for the economic and technical side of the Mutual Security Programme, and $100,000,000 each for the U.S. Information Agency and the Federal Civil Defence Administration.

The total amount under this head was equal to 63 per cent of the estimated Budget expenditure, compared with 24 per cent ($16,900,000,000) for civil benefits, 10 per cent ($7,400,000,000) for interest, and 3 per cent ($2,200,000,000) for all other civil operations, administration, and contingencies.

Agriculture. The Message said that agriculture was confronted with "serious adjustment problems" stemming from international as well as domestic developments. Technological advances in agriculture by other countries were resulting in increased production, which in many instances had restricted U.S. export markets. These problems were further complicated by the improved U.S. production capacity, as well as by the large agricultural stocks held by the Commodity Credit Corporation. The Soil Bank legislation (see 14906 A) was helping to curtail crop production and support farm income, besides facilitating the transfer of agricultural land to uses more consistent with long-term conservation objectives. Other programmes were helping to move large quantities of food and other farm products into consumption at home and abroad.

Total estimated expenditure for stabilization of farm prices and farm incomes was estimated at $3,514,000,000, compared with $3,432,000,000 in 1956-57 and an actual expenditure of $3,946,000,000 in 1955-56. The 1957-58 total included $1,950,000,000 for price support, supply, and purchasing programmes of the Commodity Credit Corporation; $1,023,000,000 for the Soil Bank; and $245,000,000 for removal of surplus agricultural commodities—the amounts being practically the same as in the 1956-57 Budget. The message requested (i) that authority to dispose of farm products abroad in return for foreign currencies, which would expire on June 30, 1957, should be extended for a further year; and that (ii) the present legal limit of $3,000,000,000 on the permissible loss under this programme should be increased by an additional $1,000,000,000.

Natural Resources. The total of $1,538,000,000 under this heading included $1,070,000,000 for conservation and development of land and water resources, $186,000,000 in respect of forest resources, and $99,000,000 in respect of mineral resources. The importance of ensuring the best use of water resources was again stressed, in accordance with recommendations made by a Presidential Advisory Committee on water resources policy. Among major projects mentioned in the message were the development of the Upper Colorado River Basin, on which work was in progress, and the Fryingpan-Arkansas multiple-purpose project, for which legislative authority was still needed. Increased appropriations for research and pilot-plant operations for converting salt water to fresh water for drinking, industrial, and agricultural uses were also recommended, as a further step in dealing with the problem of water scarcity.

Education. The Message underlined the urgency of implementing a programme of Federal aid for the construction of schools involving Federal expenditure of $2,000,000,000, including $1,300,000,000 for grants to States and $750,000,000 for the purchase of school-building bonds issued by local authorities. The President recommended that this programme, which had been planned in 1956 to extend over five years, should be completed in four years because of the present overcrowding in schools. Expenditure of $451,000,000 was proposed for the year 1957-58, including $325,000,000 in construction grants.

Public Health. Expenditures of $607,000,000 were recommended, or $106,000,000 more than in 1956-57. The largest components were $211,000,000 for National Institutes of Health and $100,000,000 for Federal aid to hospital-building.

Water Transportation. The $420,000,000 recommended under this head included $120,000,000 for appropriations for shipbuilding and maritime research in 1957-58. This would permit the construction of a sister-ship of the 60,000-ton super-liner *United States* and of several smaller vessels, while during the year the building of a nuclear-powered merchant ship (jointly by the Department of Commerce and the Atomic Energy Commission) would be "well under way." "The world-wide shortage of modern ocean-going ships," the Message said, "emphasized the importance of the ship replacement programme begun two years ago by the Department of Commerce. Most of the U.S. merchant fleet was built during World War II and should be replaced over the next 15-20 years."

Social Security. Expenditures for social insurance programmes and for the payment of Federal civilian employees' retirement benefits were not shown in the Budget expenditures because they are financed separately through trust funds. The Message stated, however, that total disbursements from these funds in 1957-58 would exceed $10,500,000,000, and that reserves for future payments invested in Government bonds would increase to about $46,000,000,000 at the end of that fiscal year. Benefits from the old-age, survivors, and disability insurance trust funds would be payable in 1957-58 to some 9,100,000 retired persons, 380,000 disabled workers, and 1,800,000 mothers and children. Women between 62 and 65 and disabled workers between 50 and 65 would receive these benefits for the first time under social security amending legislation enacted in 1956. The President recommended new legislation to extend and improve the unemployment insurance system.

Veterans' Services and Benefits. Compensation benefits for disability or death resulting from service with the armed forces would benefit 2,100,000 ex-Servicemen and 395,000 families of deceased ex-Servicemen respectively. There would be pension payments to an estimated 762,000 ex-Servicemen and 488,000 families of ex-Servicemen.

Postal Services. The President recommended increases in postal rates to place the Post Office on a paying basis and reduce the "huge postal deficit."

Labour Legislation. The President recommended legislation to assure "equal pay for equal work; extension of the Fair Labour Standards Act to additional workers; and "a revision of the eight-hour laws."

Constitutional Amendments. The President also proposed that legislation be enacted (*a*) to ensure "equal rights" for women, in accordance with the platforms of both the Republican and Democratic parties; and (*b*) to lower the voting age in Federal elections.

Hawaii and Alaska. Legislation was recommended to confer Statehood on Hawaii, as well as Statehood for Alaska "subject to area limitations and other safeguards for the conduct of defence activities vitally necessary to our national security."

Public Debt. The Budget surplus of $1,600,000,000 for 1955-56 had been used for a reduction of the public debt, which at the close of that year amounted to $272,800,000,000. The estimated total at the end of the year 1956-57 was $270,600,000,000, and that for the end of the year 1957-58 was $269,200,000,000.

It was pointed out in the U.S. press that the record expenditure in the 1957-58 Budget meant a *per caput* expenditure of $416, or $10 more than the estimated *per caput* amount for the year 1956-57.—(New York Times - New York Herald Tribune) **(Prev. rep. 1956-57 Budget, 14731 A.)**

A. PAKISTAN. — Khan Abdul Ghaffar Khan found Guilty of Sedition. - Sentence of Fine and Imprisonment.

The trial opened before the Lahore High Court on Sept. 3, 1956, of Khan Abdul Ghaffar Khan (67), leader of the illegal "Redshirt" movement, and Khan Abdus Samad Khan Achakzai, popularly known as "the Baluchi Gandhi," on charges of advocating in a number of public speeches the abolition of Pakistani sovereignty over the Pathan areas. The accused, both of whom had been in prison since June 1956, were also charged with creating hatred between different classes of people (i.e. Pathans and Punjabis), spreading disaffection against the Government, and threatening the stability of the Republic. Both defendants denied the charges and said in their defence that their aim was the creation, not of an independent State, but of an autonomous Pathan province of "Pakhtoonistan" within Pakistan.

On Jan. 24 Mr. Justice Shabir Ahmed found the accused guilty of having advocated the abolition of the sovereignty of Pakistan over part of its territory, and sentenced Khan Abdul Ghaffar Khan to a fine of Rs. 14,000 and Khan Abdus Samad Khan to a fine of Rs. 6,500; both were also ordered to be imprisoned until the rising of the court. It was subsequently reported that Khan Abdul Ghaffar Khan had filed an appeal against the Court's judgment.—(Dawn, Karachi - Times) **(Prev. rep. Ghaffar Khan, 15006 A.)**

B. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on April 3 that the sterling area's gold and dollar reserves had risen by $62,000,000 during March, after taking into account (*a*) the receipt of $5,000,000 in U.S. defence aid; (*b*) the receipt of $17,000,000 in gold or dollars from the E.P.U. in part settlement of the February surplus; and (*c*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral agreements. As a result, the reserves stood at $2,209,000,000 on March 31.

Provisional figures for the E.P.U. March settlement showed that Britain had a deficit of £3,000,000, three-quarters of which would be settled in gold or dollars and the remaining quarter by an increase of the U.K.'s debt to the Union.
(Treasury Press Office, London - Financial Times) **(15416 D.)**

C. NEW ZEALAND. — Bay of Plenty By-election.

The National Party retained the Bay of Plenty seat in the N.Z. House of Representatives in a by-election held on April 6 and caused by the resignation of the Minister of Labour, Mr. William Sullivan. The results were: P. B. Allen (National), 4,983; T. G. Santon (Labour), 3,917; R. J. Pedley (Liberal Federation), 300. Mr. Pedley, who lost his deposit, was the first candidate of the newly-formed Liberal Federation to contest a seat. At the general election in 1954 Mr. Sullivan polled 6,928 votes, against 3,866 for Mr. Santon and 1,434 for Mr. Blaymires (Social Credit).—(New Zealand Directorate of Information, Wellington) **(Prev. rep. 15251 B.)**

D. POLAND. — Further Reduction of Armed Forces.

It was announced in Warsaw on March 25 that the Polish Government had decided to reduce its armed forces by 44,500 officers and men in order "to make a new contribution by the Polish nation to disarmament and the development of peaceful relations between nations, as well as in an endeavour to obtain additional means for the development of the national economy." Two reductions totalling 97,000 men had previously been made in 1955 and 1956.—(Polish Embassy Press Office, London) **(Prev. rep. 15242 A; 14441 A.)**

E. SYRIA - IRAQ. — Resumption of Oil Supplies through Iraq Petroleum Company's Pipelines.

Following the Israeli withdrawal from the Gaza Strip and the Gulf of Akaba, oil from the Iraq Petroleum Company's fields at Kirkuk (northern Iraq) reached the Mediterranean pipeline terminal at Banias (Syria) on March 12 for the first time since Nov. 2, 1956, when three pumping stations in Syrian territory were blown up by the Syrian Army. On March 14 oil also began to arrive at the other pipeline terminal at Tripoli (Lebanon).

For some considerable time previously the Syrian Government had consistently refused to sanction the necessary repairs, although this action was severely criticized both by Iraq, which suffered great losses in oil royalties through the interruption of oil exports, and by the Lebanon, where the Tripoli refinery was cut off from its normal crude oil supplies and was kept operating only by the transfer of the remaining stocks from the Banias refinery.

The Syrian Minister for Economic Affairs (M. Khalil Kallas) declared on Dec. 15 that no Iraqi oil would pass through Syria "until the Middle East is as it was before the Anglo-French invasion." On Dec. 18 the Syrian Government rejected U.S. and Italian requests that emergency repairs should be carried out to the pipeline, informing both countries that nothing could be done until the British, French and Israeli forces had withdrawn from Egypt.

A delegation from the Iraq Petroleum Company visited Damascus from Dec. 23-26 for talks with the Syrian Government on the reopening of the pipeline, but it was announced on the latter date that Syria would refuse to allow any repairs to be undertaken until the Israeli forces had withdrawn from Sinai and the Gaza Strip. The statement added, however, that permission had been given for a team of I.P.C. experts to inspect the damaged installations, assess the extent of the damage, and estimate the time needed to effect repairs.

As a result of its subsequent investigations, the company informed the Syrian Government on Jan. 14, 1957, that pumping at a rate of 11,000,000 tons a year (compared with a normal flow of 25,000,000 tons) could begin within seven days of repair work being started. The company proposed for this purpose to undertake emergency repairs involving the laying of pipe to by-pass the three severely damaged pumping stations, as it would take at least a year to repair the pumping stations themselves and restore the normal flow.

Although the company again requested permission at the time for an immediate start on emergency repairs, the Syrian Government continued to withold its consent and maintained this attitude during further talks held in Damascus from Feb. 5-7 with an I.P.C. delegation headed by the company's managing director (Sir Stephen Gibson).

On March 6, however -the date of the Israeli evacuation of the Gaza Strip and the Sharm-el-Sheikh area -the Syrian Prime Minister (M. Sabry el-Assali) informed the chief representative of the I.P.C. in Syria that repair work on the pipelines could begin immediately. I.P.C. repair teams accordingly entered Syria on March 8 and began work on the following day.

The repairs on the 30-inch pipeline to Banias were completed within 48 hours and the pumping of oil was resumed on March 11 with the consent of the Syrian Government, which on the same day revoked the ban on the export of oil from Syria. The line to Banias, as temporarily reconstructed, will have a capacity of 7,700,000 tons a year, while the 16-inch line to Tripoli (the pumping of oil through which started on March 13) and the 12-inch line to Tripoli (which came into operation shortly afterwards) will have a joint annual capacity of 3,300,000 tons.

On March 7 the Syrian Parliament had passed legislation requiring the I.P.C. to reinstate in their former positions all employees dismissed after the closing of the pipelines, and to pay them full salaries for the period during which work was interrupted.

I.P.C. Payment of Transit Dues to Syria.

In spite of Syria's refusal to sanction the reopening of the pipelines, the Iraq Petroleum Company announced on Jan. 30 that it had paid to the Syrian Government the outstanding transit dues up to Nov. 2, 1956, amounting to £4,890,000.

The statement pointed out that although this payment was a legal obligation on the company, which had "scrupulously fulfilled all its obligations under its agreement with the Syrian Government," the I.P.C. had "not waived its right to claim compensation for damages."

I.P.C. Loan to Iraq.

To help the Iraqi Government to overcome its financial difficulties through the loss of oil royalty revenues, the I.P.C. agreed on March 9 to make to Iraq an interest-free advance on future royalties of £25,000,000. The Iraqi Minister of Economics, Dr. Pachachi, stated on March 10 that £5,000,000 would be paid by the Company immediately, and that the remainder would be payable in the financial year beginning on April 1. Dr. Pachachi explained that the money was required to overcome the budgetary deficit and to sustain the momentum of Iraq's major development projects.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - New York Times - Le Monde, Paris) **(Prev. rep. 15201 A, page 15211.)**

A. POLAND - SOVIET UNION. — Agreement on Repatriation of Poles from U.S.S.R. - Trade Protocol.

An agreement on the further repatriation of Polish nationals from the Soviet Union was signed in Moscow by the two Governments on March 25. The new agreement, which resulted from the Polish-Soviet agreement of Nov. 18, 1956 (see 15242 A), greatly increased the number of those who could demand repatriation, its principal provisions being as follows:

(1) The right to repatriation was extended to (*a*) all persons who were Polish nationals on Sept. 17, 1939 [the date of the Soviet annexation of the Eastern provinces of pre-war Poland following the Ribbentrop-Molotov agreement]; (*b*) the wives, children, and parents living with such repatriates in one household, even if they had not been Polish nationals on Sept. 17, 1939 (thus including Soviet citizens falling under this category); (*c*) children of such persons born after Sept. 17, 1939, who had no close relatives in the U.S.S.R. and whose relatives were or would be resident in Poland, or whose repatriation had been applied for by the Polish authorities; (*d*) persons of Jewish nationality who possessed Polish citizenship on Sept. 17, 1939. [The designation "Jewish nationality" was used by the Soviet authorities to describe Jews formerly living in those areas of Eastern Poland annexed by the U.S.S.R. in 1939.]

(2) Persons entitled to repatriation who were at present in Soviet prison or labour camps would be released or transferred to the Polish authorities, irrespective of their terms of detention.

(3) Persons leaving the Soviet Union would be entitled to take with them their personal belongings, and members of certain professions could take with them all objects indispensable for the performance of their profession or trade. Money paid in by them to the Soviet State Bank would be transferred to the Polish National Bank.

(4) Repatriation would remain voluntary and applications would be accepted until Oct. 1, 1958. The repatriation scheme would be completed by Dec. 1, 1958.

(5) The Soviet authorities would make every effort to ascertain the fate and place of residence in the U.S.S.R. of persons sought by Polish nationals or institutions.

The number of persons affected by the agreement was not officially stated, but British, U.S., and French press reports from Warsaw put the figure at between 120,000 and 500,000.

[When the U.S.S.R. occupied the former East Polish provinces in 1939 the population of these territories exceeded 10,000,000, the majority of them being Ukrainians, Jews, and Byelorussians. Of the million or so Poles who were deported to the U.S.S.R. after the annexation, several hundred thousand left the Soviet Union during the war, many of them to join the Polish forces in the West, while some were allowed to return to Poland after the war. At the same time the Soviet authorities in post-war Poland imprisoned and deported a number of Poles who, it was thought, might hinder the establishment of Communist rule or who, though being Communists, opposed the Stalinist nature of the regime. Repatriation was resumed in 1955 on a small scale, when some 7,000 Poles were allowed to leave the Soviet Union, while in 1956 a further 29,000 were repatriated following Polish pressure on the Soviet Government. During January and February, 1957, another 15,000-16,000 Polish repatriates left the Soviet Union, many of them from the Ukraine, Byelorussia and Lithuania].

A protocol on Soviet-Polish trade during 1957 was signed in Moscow on April 9.

Under the agreement the Soviet Union will supply to Poland iron, manganese and chrome ores, cotton, oil and oil products, ferrous and non-ferrous metals, various industrial equipment, and other goods, while Poland will export to the Soviet Union coal, zinc, fishing trawlers, locomotives, passenger coaches, goods wagons, etc.

It was provided that the value of trade exchanges would be considerably increased over 1956, when the Soviet Union's share of Poland's foreign trade had fallen to 27 per cent, although the U.S.S.R. continued to be Poland's main supplier and principal buyer.—(Polish Embassy Press Office, London - Times - Manchester Guardian) **(Prev. rep. 15242 A.)**

B. PERSIA - SOVIET UNION. — Frontier Delimitation Agreement.

A joint Soviet-Persian frontier demarcation commission, which had been working for the past 20 months on the delimitation of the frontier between the two countries, completed its work on April 11, when protocols were signed in Teheran defining the frontier in detail. The frontier has been mapped and marked with border signs along its entire length of some 2,000 kilometres from the junction of the frontiers of the U.S.S.R., Persia and Turkey in the west to the intersection of the Soviet, Persian and Afghan frontiers in the east.
(Soviet Embassy Press Department, London) **(13968 C.)**

C. TURKEY. — Cabinet Appointment.

It was announced at the beginning of April that Mr. Ahmet Özel, the Minister of Education, had been succeeded by Mr. Tevfik Ileri, who had held the same portfolio from 1950-53.
(Turkish Embassy Press Department, London)
(Prev. rep. Turkish Cabinet, 15310 A.)

D. YUGOSLAVIA. — Death of M. Pijade.

M. Moshe Pijade, President of the Yugoslav Federal Assembly and one of the closest associates of Marshal Tito, died in Paris on March 15 of a heart attack, aged 67. He was heading a Yugoslav parliamentary delegation then visiting the French capital after having first visited London.

Born in Belgrade on Jan. 4, 1890, of Jewish parents, Moshe Pijade studied art in Paris and Munich as a young man, returned in 1910 to Belgrade, and made a reputation as one of Serbia's best-known painters of the Impressionist school. During the next ten years he worked variously as teacher, painter and journalist before joining the Yugoslav Communist party in 1920. When the party was driven underground in the following year he helped to found the Independent Workers' Party of Yugoslavia, edited its newspaper, and was later entrusted with organizing an underground Communist printing press in Belgrade. This was discovered by the police and Pijade was sentenced to 20 years' imprisonment, later reduced to 14 years. It was during his long imprisonment from 1925-1939 that Pijade first met Marshal Tito (then Josef Broz-Tito), who was also serving a prison sentence for illegal political activities, and that he made the first translation into Serbo-Croat of Karl Marx's *Capital*. Shortly after his release in 1939 he was re-arrested and sent to a detention camp for political offenders, where he remained until two days before the Nazi attack on Yugoslavia in April 1941.

During the German occupation Moshe Pijade was one of Marshal Tito's principal aides in the anti-Nazi partisan movement, helping to organize the national uprising in Montenegro and holding leading positions in the partisan organization. In 1943 he became Vice-President of the Anti-Fascist Council of the National Liberation of Yugoslavia, which later became the first Provisional Government. After the war he played a large part in evolving the political and constitutional forms of the new Yugoslav Republic, and presided over the legislative committee which drew up the post-war Yugoslav Constitution.

A strong supporter of "national" as opposed to "Stalinist" Communism, Pijade was generally credited with providing much of the intellectual guidance behind the "Titoist" demands for greater national independence for Communist parties outside the Soviet Union. After the break between Yugoslavia and the Cominform he wrote a number of articles attacking Stalinism and the policy then being pursued by the Soviet Government and Communist Party, as well as a lengthy history of the origins of the dispute between Yugoslavia and the U.S.S.R. During this period he himself was the target of many bitter attacks in the Soviet and "satellite" press and radio.

Pijade had been President of the Yugoslav Federal Assembly since 1954, when he succeeded Milovan Djilas in that post after the latter's expulsion from the party.

Moshe Pijade was buried with national honours on March 18 in the historic Kalemegdan fortress outside Belgrade, the funeral oration being delivered by President Tito.

M. Petar Stambolich (45), President of the Serbian National Assembly, was unanimously elected President of the Yugoslav Federal Assembly on March 26. Like M. Pijade, he was a prominent partisan leader during the German occupation.

E. LITERATURE. — William Blake's Notebook acquired by British Museum. - Gift of American Donor.

The British Museum announced on April 15 that a notebook used by the poet William Blake, described as a "treasure" and as "the most important manuscript by William Blake in existence," had been presented to the Museum by the late Mrs. Frances White Emerson of Cambridge, Massachusetts, U.S.A.

The notebook, of 58 pages, was used by Blake for poems, sketches, memoranda, and prose drafts, each page being filled by entries made at various times down to about 1818. It contains drafts of some of the most celebrated of his *Songs of Experience*, including *The Tyger*, *The Chimney Sweep*, and *A Little Boy Lost*, a prose description of his *Vision of the Last Judgment*; and pencil sketches with ideas for designs and illustrations afterwards used in *The Vision of the Daughters of Albion* and *The Gates of Paradise*. The last major poetical entries are fragments of Blake's unfinished philosophical poem *The Everlasting Gospel*.

Blake's notebook is sometimes referred to as the "Rossetti manuscript" from the fact that it was sold to Dante Gabriel Rossetti in 1847 for ten shillings. After Rossetti's death in 1882 it was sold for £110, and in 1887 it was acquired by Mr. William Augustus White, father of Mrs. Frances White Emerson and a well-known Blake collector. In 1928 it was valued for probate at $40,000, or over £8,000 at the exchange rate than prevailing.

Mrs. Emerson, who died in March, had presented the British Museum in 1928 with Blake's 537 water-colour designs for Young's *Night Thoughts* (1797), believing that they should be returned to Britain. These drawings, like Blake's notebook, had also belonged to her late father.—(Times - Daily Telegraph)
(Prev. rep. 9635 C.)

A. CHILE. — General Elections. - Gains by Opposition Parties. - State of Siege imposed after Cost-of-Living Riots. - Disturbances in Santiago and Valparaiso.

General elections held in Chile on March 3 for a new Chamber of Deputies (147 members) resulted in important gains for the parties opposed to President Ibañez—notably the Radicals, who became the largest party in the new Chamber, and the *Falange Nacional* (of leftist tendencies)—and corresponding losses for the parties supporting the President, the most important of which is the Agrarian Labour party. The other two leading parties—the Liberals and the United Conservatives—give limited support to the Government. The election results as a whole favoured the "centre" and "moderate left" parties at the expense of the more extreme left-wing groups. Gains and losses of the major parties are shown below:

	New Chamber	Old Chamber
Radicals	35	20
Liberals	28	19
United Conservatives	21	20
Falange Nacional	14	5
Agrarian Labour	13	29
Popular Socialists	8	19
Chilean Socialists	9	9
Other parties	19	26

The Radicals, as shown, gained 15 additional seats and the *Falange Nacional* nine, while the Liberals also obtained nine more seats than in the former Chamber. The Agrarian Labour and Popular Socialist parties, both supporting President Ibañez, lost 16 and 11 seats respectively.

Elections were also held on the same day for 20 of the 45 Senate seats. The principal parties in the new Senate (including seats not affected by the elections) are the Liberals (10), Radicals (9), United Conservatives (6) and *Socialistas Populares* (6).

The election campaign was mainly fought on President Ibañez's anti-inflationary measures (see 14676 B), which were supported by the Agrarian Labour party and its allies (including the Popular Socialists), and to a certain extent by the Liberals and Conservatives, but were strongly opposed by the Radicals. The latter party's success was interpreted both in Chile and abroad as a repudiation of these policies by the electorate. The Minister of Economy, Señor Lazo (who had been responsible for implementing the anti-inflationary programme) resigned on March 8 after the announcement of the election results and was succeeded by Señor Roberto Infante, who had formerly held the portfolio of Agriculture.

Serious rioting occurred during the first three days of April in Santiago, Valparaiso, Concepción, and other Chilean cities in protest against the rising cost of living, the immediate cause of the disturbances being an increase in public transport fares. A state of siege and a curfew were imposed throughout the country on April 8 after the Army had been called out in Santiago to quell rioters attempting to attack the Presidential palace. Other groups of rioters in the capital tried to set fire to the Cathedral and the Congressional building, stoned the premises of *El Mercurio*, Chile's leading newspaper, looted shops, and burned vehicles. Troops opened fire on the demonstrators to restore order, unofficial estimates placing the number of dead at between 40 and 70 and the number of wounded at over 200. Over 1,000 arrests were made during the following week and tanks, armoured cars and heavily-armed infantry patrolled Santiago and Valparaiso to prevent a recurrence of the disorders, which were attributed by the Government to Communist influence.—(New York Times - Bank of London and South America, Fortnightly Review - Le Monde, Paris) **(Prev. rep. Chilean Elections, 13149 D; Anti-Inflationary Measures, 14676 B.)**

B. CANADA - UNITED KINGDOM. — Joint Construction of New Transatlantic Cable.

Following the success of the transatlantic cable opened in September last (see 15121 D), it was announced in London and Ottawa on April 9 that the British Post Office and the Canadian Overseas Telecommunications Corporation would jointly construct a second underwater cable which was expected to be in operation by 1961. The cost of the 2,000-mile cable from Scotland to Canada (about £8,000,000) will be shared between the Post Office and the C.O.T.C., the cable itself being made in Britain and laid by the British cable ship *Monarch*. The new transatlantic cable will have 50-100 British-made repeaters (amplifiers) in order to provide two-way telephone circuits between Canada and Britain.—(Times - Montreal Star) **(Prev. rep. 15121 D; Map, page 13282)**

C. SOVIET UNION - EASTERN GERMANY. — Agreement on Status of Soviet Troops in Eastern Germany. - Provisions and Signature.

A Soviet-East German agreement regulating the status of the Soviet troops in Eastern Germany was signed in East Berlin on March 12 by M. Gromyko (Foreign Minister) and Marshal Zhukov (Minister of Defence) for the Soviet Union, and by Herr Lothar Bolz (Foreign Minister) and Colonel-General Willi Stoph (Minister of Defence) for the German Democratic Republic. The main provisions of the agreement were as follows:

(1) Soviet forces would not interfere in East German internal affairs.

(2) The agreement of the East German authorities would be required for any change in the strength or location of Soviet forces.

(3) Soviet troops committing punishable offences would be subject to East German law, unless the offences were committed against the U.S.S.R. or Soviet personnel, or during the discharge of military duties.

(4) Any crimes committed against Soviet forces would be punished by the East German courts on the same basis as crimes against the East German forces.

(5) Any member of the Soviet forces who had violated East German law could be recalled from Eastern Germany at the request of the East German authorities.

(6) The two Governments would pay each other compensation for material damage caused respectively (*a*) by Soviet forces to East German citizens and institutions or nationals of third countries in Eastern Germany; (*b*) by East German citizens or institutions to Soviet forces and installations. These provisions would apply retrospectively from Sept. 20, 1955 [when the treaty on relations between the U.S.S.R. and Eastern Germany was signed].

(7) Soviet forces would continue to use the installations which they already possessed on East German territory. The construction of any new installations, however, would require the consent of the East German authorities. Soviet installations would revert to the German Democratic Republic free of charge when they were no longer required.

(8) The High Command of the Soviet forces in Eastern Germany would be empowered, after consultation with the East German Government, to take steps against "any threats to the security of the Soviet forces."

(9) A mixed Russo-German commission would be set up in East Berlin to settle questions concerning the application of the agreement.

(10) The agreement would come into force on the date of the exchange of ratification instruments, and would remain in force until Soviet troops withdrew from Eastern Germany.

The preamble stated that "the temporary presence of Soviet troops on the territory of the German Democratic Republic" was "necessary" because of the stationing of foreign troops in Western Germany and the setting up of bases there "by member-countries of the aggressive North Atlantic bloc."
(Soviet Embassy Press Office, London - A.D.N. News Agency) **(Prev. rep. 15352 A.)**

D. CANADA. — Naval Construction and Expansion.

The first aircraft carrier to be built for the Royal Canadian Navy, H.M.C.S. *Bonaventure* (20,000 tons), was commissioned at Belfast on Jan. 17, 1957. She will replace the aircraft carrier *Magnificent*, which had been on loan to Canada from the Royal Navy since 1948.

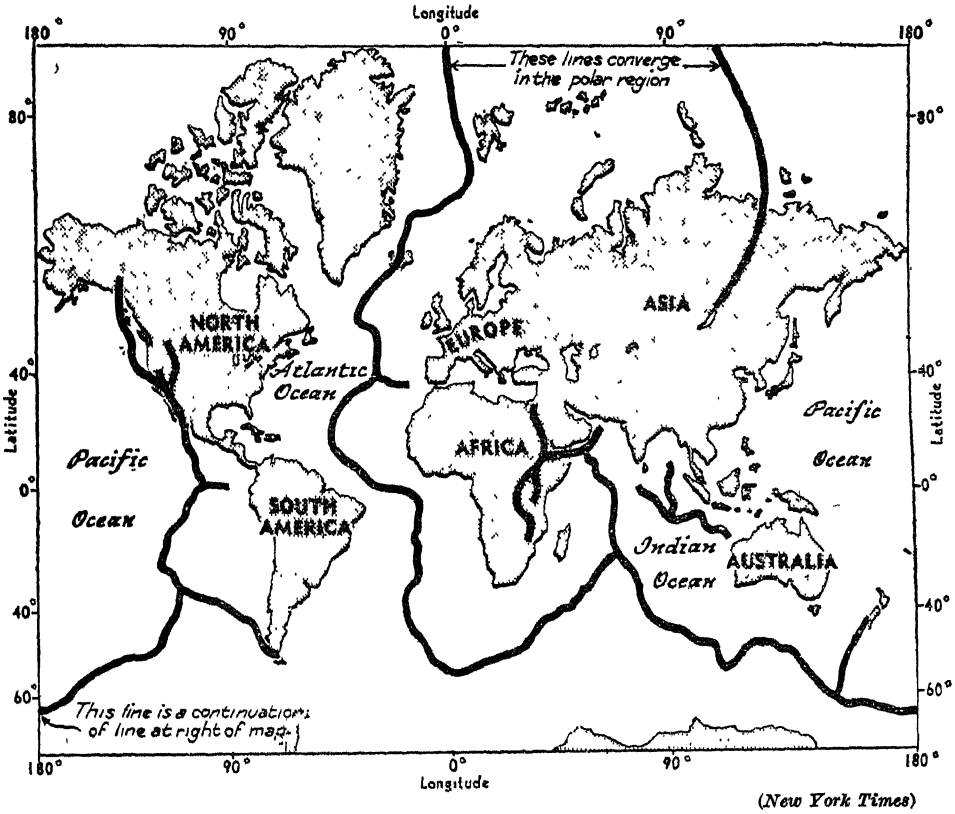
The *Bonaventure* was originally launched for the Royal Navy in 1945 as H.M.S. *Powerful*, a sister-ship of H.M.S. *Magnificent* which was launched in 1944 and completed in 1948. The *Powerful*, however, had remained uncompleted and was purchased by Canada in 1952. Extensively converted at the Harland & Wolff yards, she incorporates the most modern features of carrier design such as the angled deck, the steam catapult, and stabilized deck-landing mirror aids, in addition to radar and electronic devices. She will carry Canadian-built *Banshee* jet fighters, anti-submarine *Tracker* planes, and helicopters, and has a complement of about 1,200 officers and men.

The Royal Canadian Navy was also reinforced during 1956 by five of a new class of anti-submarine destroyer escorts—the *Assiniboine*, *Ottawa*, *Margaree*, *Saguenay* and *St. Laurent*—of all-Canadian design and construction. Nine further vessels of this class are under construction, some of which are expected to be in commission during 1957.

In addition to the *Bonaventure* and the new destroyer escorts, the other principal units of the Royal Canadian Navy are the 8,000-ton cruisers *Ontario* (ex-H.M.S. *Minotaur*) and *Quebec* (ex-H.M.S. *Uganda*), launched for the Royal Navy in 1943 and 1941 respectively and transferred to the R.C.N. in 1944-45; and the 2,700-ton destroyers *Athabaskan*, *Cayuga*, *Haida*, *Huron*, *Iroquois*, *Micmac* and *Nootka*, originally identical with the British wartime "Tribal" class and since altered in various respects. Three of these destroyers were transferred from the Royal Navy and four built in Canada. (Montreal Star - Canadian Department of External Affairs) **(Prev. rep. Royal Canadian Navy, 11295 A.)**

A. OCEANOGRAPHY. — Discovery of 45,000-mile Fissure in the World's Ocean Beds. - Connexion with World Earthquake Zone.

The existence of a 20-mile-wide, two-mile-deep fissure on the floor of the ocean beds, extending round the world in a continuous line 45,000 miles long, was announced on Jan. 30 by Columbia University (N.Y.) scientists who had been carrying out oceanographic researches in different parts of the world for the past five years. The announcement was made by Professor Maurice Ewing, director of the Lamont Geological Observatory (a unit of the university), and Dr. Bruce Heezen, both of whom took a leading part in the researches which led to the discovery of the world-wide " crack."



(*New York Times*)

Professor Ewing and Dr. Heezen explained that the main line of the rift [see accompanying map] extended southward along the Atlantic from about the Greenwich meridian in the Far North, bisecting Iceland, and running approximately midway between North and South America on the west and Europe and Africa on the east. After rounding the southern tip of Africa, the great trench then forked into two branches: a northern branch running into the Arabian Sea and looping sharply south again through the Belgian Congo, Northern Rhodesia and other areas of the African continent [i.e. the East African Rift Valley, a well-known earthquake zone]; and a southern branch continuing eastward through the Indian Ocean, passing south of New Zealand, and crossing the Southern Pacific until it forked into two branches near Easter Island. The northern branch ran up the Gulf of California, while the southern branch curved down to the Straits of Magellan. Professor Ewing said that there was " good evidence " of a connexion in the Arctic Ocean, although this link had not been confirmed.

Drs. Ewing and Heezen theorized that the rift had been caused by the pulling apart of the earth's crust—in which connexion it was pointed out that the locus of a great number of earthquakes in the North and South Atlantic in the last 40 years coincided exactly with the line of the great trench. Moreover, the Columbia research teams had discovered that earthquake zones elsewhere followed the rift. " On each side of the deep crack," it was stated, " rise mountains from 6,000 to 12,000 feet tall, but the tallest peak is 3,600 feet below the surface of the sea. Everywhere the formation is remarkably similar—two belts of high, jagged mountains, each belt about 75 miles wide, separated by the trench about 20 to 25 miles wide and from two to four miles deep."

Professor Ewing emphasized that the crack coincided with a world-wide earthquake zone along its entire length, as shown by data compiled on seismic activity in various parts of the world. He expressed the opinion that the discovery of the world-wide fissure in the earth's surface tended to weaken the theory of " continental drift "—i.e. the theory that North and South America, Europe, and Africa were a single immense land mass in early geological time but had " cracked " roughly in the middle and pulled apart, thereby forming the basin of the Atlantic Ocean.—(New York Times)

B. RHODESIAN FEDERATION. — Lord Dalhousie appointed Governor-General. - Death of Lord Llewellin.

It was announced in Salisbury on April 24 that the Queen had approved the appointment of Lord Dalhousie (42) as Governor-General of the Federation of Rhodesia and Nyasaland in succession to the late Lord Llewellin, who had died in January last.

Lord Dalhousie, one of the youngest Governors ever appointed, was educated at Eton and Oxford and served in The Black Watch throughout the Second World War. He won the M.C. in North Africa before being taken prisoner, and later escaped from Italy. As Major Simon Ramsay he was Conservative M.P. for Forfar from 1945 to 1950, when he succeeded his brother in the title. His ancestor, the tenth earl, was appointed Viceroy of India in his 35th year.

Lord Llewellin, the first Governor-General of the Federation, died in Salisbury on Jan. 24, aged 63. As Colonel J. J. Llewellin he was a member of the House of Commons for many years and had held a number of ministerial posts.

John Jestyn Llewellin was born at Sevenoaks in 1893, studied at Eton and Oxford, and served with distinction in the First World War, winning the M.C. He was called to the Bar in 1921, entered Parliament in 1929 as Conservative M.P. for Uxbridge, and represented that constituency until 1945, when he lost the seat to Mr. Frank Beswick (Lab.). Between 1931 and 1942 he held a number of junior ministerial posts, including those of Civil Lord of the Admiralty (1937-39) and Parliamentary Secretary to the Ministries of Supply (1939-40), Aircraft Production (1940-41) and War Transport (1941-42). In 1942 Colonel Llewellin entered the Cabinet as President of the Board of Trade, but held that post for only three weeks before being transferred to the Ministry of Aircraft Production, where he had previously assisted Lord Beaverbrook in building up Britain's air strength. In November 1942 he went to the U.S.A. to fill the new post of Minister Resident in Washington for Supply, but returned to London in 1943 to become Minister of Food in succession to Lord Woolton, consequent on the latter's appointment as Minister of Reconstruction. After his defeat in the 1945 election Colonel Llewellin was created a baron in the Resignation Honours.

In September 1953 Lord Llewellin became the first Governor-General of the newly created Federation of Rhodesia and Nyasaland. One of his first duties in this capacity was to appoint an advisory Cabinet to prepare for the Federation's first elections, which were held in December 1953. In the following February he opened the first session of the Federal Assembly in Salisbury.

Prior to Lord Dalhousie's appointment, the post of acting Governor-General had been held first by Sir Robert Tredgold (Chief Justice of the Federation) and subsequently by Sir William Murphy (acting Governor of Southern Rhodesia), who replaced Sir Robert on Feb. 10 to enable him to continue as chairman of the Southern Rhodesia Franchise Commission. (Times - Daily Telegraph - Federal Information Department)

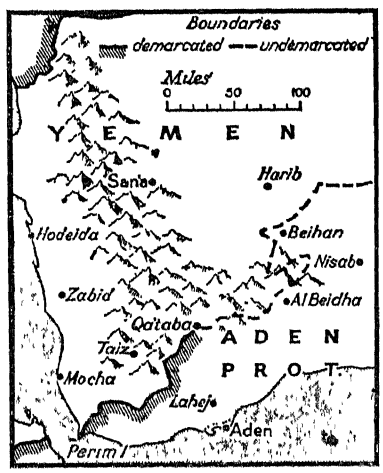
(Prev. rep. 13133 A.)

C. UNITED NATIONS.—Dr. Tuomija appointed Executive Secretary of Economic Commission for Europe.

It was announced in Geneva on April 17 that Dr. Sakari Tuomija, the Finnish Ambassador in London, had been appointed Executive Secretary of the U.N. Economic Commission for Europe in succession to Dr. Gunnar Myrdal (Sweden), who had resigned after holding the post for ten years. Dr. Tuomija, a former Governor of the Bank of Finland, has held several ministerial positions in the Finnish Cabinet, including that of Prime Minister.—(U.N. Information Centre, London)

A. ADEN - YEMEN. — Renewal of Frontier Incidents. - Yemeni Claim to Aden and Protectorates. - British Protests to Security Council. - Allegations of Communist and Egyptian Military Aid to Yemen.

The disorders on the frontier of the Yemen and the Western Aden Protectorate, where the situation had been comparatively peaceful for some months, were renewed during the last week of December 1956 and the first two months of 1957. Although the disturbances were largely the work of dissident tribesmen and tribal leaders, the Aden Government accused the Yemen of encouraging and arming the rebels and of sending regular troops to assist them, while the Yemeni Government repeatedly alleged that British aircraft and troops had violated its territory. The main centres of unrest were the Dhala Amirate, where fighting had broken out on Dec. 25 (see 15296 A), and the Beihan Amirate, about 100 miles to the north-east.



(*Economist*)

A Yemeni protest of Jan. 2 alleging that towns inside Yemeni territory had been bombed was rejected on Jan. 8 by the British Foreign Office, which declared that the allegations were "untrue," as the R.A.F. attack had been directed against Yemeni intruders operating inside Protectorate territory. The British Note at the same time made a counter-protest against the Yemen Government's "failure to restrain its subjects from entering Aden Protectorate territory." The Joint Army and R.A.F. Middle East Headquarters stated on Jan. 12 that air activity against hostile groups had been "strictly confined to Aden Protectorate territory" and denied that major operations were in progress. "For some weeks," the communiqué added, "dissident activity instigated by the Yemen in the Aden Protectorate and incursions of Yemeni tribesmen into British-protected territory have increased. For the first time since 1954 these raids have been supported by regular Yemeni troops. This has been accompanied by a widespread hostile propaganda campaign."

In the Beihan area Yemeni troops and tribesmen seized two frontier villages on Jan. 12-14, driving a wedge six miles deep by 10 miles long into the Protectorate. After the Yemeni authorities had ignored several requests to withdraw their forces, R.A.F. jet fighters attacked the villages on Feb. 1-2, expelling the occupying forces. The Foreign Office lodged a strong protest on Feb. 22 against an incident on the previous day in which Yemeni forces had fired on and partly destroyed a frontier fort.

The airfield at Dhala was attacked by insurgent tribesmen on Jan. 27, and when local levies pursued the attackers they were engaged by a considerable force of Yemeni troops and tribesmen. Cameron Highlanders and Protectorate Levies then launched a counter-attack which expelled the intruders with the loss of 30 killed and drove the Yemeni force across the frontier. A patrol of Cameron Highlanders was ambushed near Dhala by rebel tribesmen on Feb. 4, losing two killed and six wounded—this being the first action in the Protectorates for over a year in which British soldiers had been killed. As a reprisal, R.A.F. bombers destroyed the village of Danaba, from which the attack had been launched, on Feb. 11 after the inhabitants had been warned to evacuate the village.

In reply to proposals for talks on the frontier situation between officials of the two Governments, put forward by Yemen on Dec. 4, the Foreign Office announced on Jan. 17, after consultations with the Aden Protectorate rulers concerned, that it had agreed to such talks on condition that Yemeni intruders withdrew from Beihan. The Yemeni Government replied on Jan. 22 that it did not "object to reconsidering a meeting between officials of both parties if the purpose of the meeting is a cease-fire in both free Yemen and occupied Yemen, as a preliminary step resulting in negotiations towards solving the whole problem." Mr. Maclay (Secretary of State for Scotland), on behalf of the Colonial Secretary, stated in the House of Commons on Jan. 28 that the reference to "occupied Yemen" in the Yemeni Note was intended for propaganda purposes and was "a clear admission that the Yemeni authorities are directly fomenting warfare inside the Protectorate." In its reply, he added, the Yemeni Government seemed to be seeking to make its claims to the Protectorate the subject of the talks; this was entirely unacceptable, but the British Government was ready for talks on the conditions already stated, with a view to restoring peaceful relations.

Following the expulsion of the Yemeni forces from Beihan, the British Government again proposed on Feb. 12 that talks aimed at the restoration of peaceful conditions along the whole frontier should be held between representatives of the two Governments, and should be attended by the Protectorate rulers concerned.

The Yemeni delegate at the U.N., Mr. Tawfik Chamandy, claimed in the Trusteeship Council on Jan. 15 that Aden was an "integral part" of Yemen, of which Britain had taken possession by means of a "dubious treaty" concluded through "diplomatic manoeuvres and intimidation." He alleged that Britain was trying to extend her influence over parts of southern Yemen by establishing a federation in the Aden Protectorate against the wishes of the inhabitants.

In a memorandum submitted to the Security Council on Jan. 22, the British Government stated that "over a long period the Government of the Yemen has encouraged its tribes-people to violate the frontier of the Aden Protectorate, has subverted and armed the subjects of the rulers of the small Arab States under British protection, and has put up a smoke-screen of protests and propaganda against alleged British intrusions into the Yemen, all of which have on investigation been proved to be consistently and patently untrue." Despite this, H.M. Government hoped that it might be possible to settle outstanding frontier problems by direct talks, and that the Yemeni Government would agree to a joint commission to demarcate the disputed areas of the frontier.

A second British memorandum, submitted to the Security Council on Feb. 16, stated that there was "firm evidence" that the Communist countries and Egypt had supplied arms and military assistance to the Yemen. The statement alleged that a Soviet freighter had arrived at Salif in October with arms, ammunition, and military equipment from Czechoslovakia; that Yemeni sources in Cairo had recently announced the arrival in Yemen of Czechoslovak arms worth £3,035,000; that training centres staffed by Egyptian instructors had been set up to teach the Yemeni Army the use of these weapons; and that press correspondents who had visited Qataba had reported that modern Soviet rifles were among the arms carried by the Yemeni forces there.

The Imam of Yemen held a press conference (the first in the country's history) on Jan. 30, at his palace at Sukhne, at which he declared that his Government did not recognize any boundary between Yemen and the Protectorate areas, all of which "belonged to Yemen."

After alleging that the "motives behind the British actions in causing incidents on the so-called frontier" were economic, as there was a prospect of finding "a lot of oil in the area," the Imam Ahmed said that Yemen would submit her case to the United Nations in the absence of any "concessions" by Britain. Although Yemen would maintain her claim to Aden, she would have no objection to granting commercial concessions to Britain if agreement could be reached between the two countries by friendly negotiations. Britain's reply to the Yemeni request for talks, however, had been "delayed for so long" that the Yemen had decided that discussions on the whole problem were necessary, and not only on the frontier question.

The Yemeni Under-Secretary for Foreign Affairs (Sayed Hassan Ibrahim), who also took part in the press conference, denied that Yemen had supplied arms to anyone in the Protectorates or had received any arms from Eastern Europe for 20 years. When Yemen needed arms they would be obtained "with Yemeni money and unconditionally, either from East or West." He considered that the Yemen was "100 per cent safe" in making treaties with the Soviet Union, such as the recent commercial agreement between the two countries (see 14959 A, 14779 E), because there was no danger of the U.S.S.R. imposing Communism on the Yemen. The Arab countries, he added, looked to President Eisenhower to guarantee them against "aggression from whatever source," and to act as he had done in the Suez crisis.

Commenting on the Imam's statement, a Foreign Office spokesman said on Feb. 1 that Britain had welcomed in principle the Yemen's proposals for talks but had received no reply to a request for clarification. The Imam's claim to the Protectorates was in conflict with the Anglo-Yemeni Treaty of Friendship of 1934, which guaranteed the maintenance of the *status quo* on the frontier and was still in force. The spokesman also denied that oil had been found in the Protectorates. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 15296 A.)

Note. The dispute between Britain and the Yemen dates from 1918, when the Imam Yahya refused to recognize the authority established by Britain over the Protectorates. The treaty of 1934 provided for the maintenance of the *status quo* pending negotiations for the demarcation of the frontier, and in 1951 agreement was reached for the appointment of a joint demarcation commission (see 11329 B). This was not implemented, however, as the Yemen wished to extend the commission's scope to discussion of the status of the Protectorates.

The Imam, whose dynasty has ruled Yemen since the ninth century, is both an absolute monarch and the head of the Zeidi sect of Shiite Moslems. The Zeidis, though comprising only one-third of the population, form the ruling class, the remainder of the population belong to the Shafai sect of Sunnite Moslems, as do the people of the Protectorates and the great majority of the Arab population of Aden. In 1948 opposition "Zeidi" and "Shafai" elements, led by a pro-British section of the Royal house, staged a revolt with the aim of securing the accession of an Imam acceptable to both sects and of introducing a liberal Constitution. The Imam Yahya was assassinated by the conspirators, but the present Imam crushed the revolt with Saudi Arabian assistance. A second revolt in 1955 was also suppressed with the aid of Saudi Arabia (see 14167 C).

As a result of these movements, four of the Imam's 13 brothers were murdered or executed, two disappeared, and three are living in exile. A reformist movement, however, is known to exist, drawing its support from the Sayeds (direct descendants of the Prophet Mohammed), who hold many of the administrative posts; from Army officers, many of whom look to Egypt for inspiration; and from the Shafais, who favour the establishment either of a republic or of a separate Shafai State. The Aden Government alleged on Jan. 7 that the Yemeni Government was encouraging frontier incidents to divert attention from the increasing internal unrest.

(Daily Telegraph - Manchester Guardian - Le Monde, Paris)

A. INDIA. — Mr. Nehru's Apology to the Queen for Article in Congress Party Journal.

The Prime Minister of India, Mr. Nehru, issued a statement on March 6 in which he apologized to Queen Elizabeth II for an article which had appeared in the Congress Party journal *Economic Review* criticizing her recent visit to Portugal (see 15416 E). Mr. Nehru described the article in question as "wholly intemperate and in very bad taste"; pointed out that it had been published in the absence and without the knowledge of the paper's editor, Mr. Shriman Narayan; and said that he (Mr. Nehru) had been "greatly disturbed" when the article was brought to his attention. The Indian High Commissioner in London, Mrs. Pandit, sent a letter to the Queen expressing her sincere regret at the article.

The article in *Economic Review* (a fortnightly published by the All-India Congress Committee) was written by Mr. H. D. Malaviya, an assistant editor, and appeared in its issue of March 1. After an attack on "British imperialism" it added: "... In the course of a speech in Portugal the Queen said that the world 'is now living in more anxious days than it did 50 years ago and the civilizing work which we pursued has not always met the understanding which it would have been right to expect in view of the results achieved.' Her Majesty is apparently disappointed. Elizabeth II is sorry that the world is not able to appreciate the hanging by the neck of Greek patriots in Cyprus or the butcheries of the Portuguese in Goa."

It was pointed out in London that the speech to which the *Economic Review* referred was wrongly attributed to the Queen, the words quoted having in fact been spoken by President Craveiro Lopes at a State banquet.—(Indian High Commissioner's Office, London - Times - Manchester Guardian)

B. GHANA. — Technical Assistance from Britain.

The U.K. Secretary of State for Commonwealth Relations, Lord Home, announced on April 2 that a scheme for the provision of technical assistance on a reciprocal basis had been agreed upon in principle between the British and Ghanian Governments. Specifically, (1) officers nominated by the Government of Ghana from among their younger public servants would come to the United Kingdom, at British expense, for training in practical and technical subjects; (2) Britain would be ready to supply experts to fill specialist, technical, and professional posts in Ghana "of a temporary and advisory nature"; (3) the Government of Ghana had indicated their readiness "to provide reciprocal assistance in fields in which they are able to make a significant contribution, for example, in the study of scientific and technical tropical problems of concern to us and the colonies." Lord Home added that details of these arrangements would be discussed between the two Governments "on a basis of mutual co-operation which fully accords with the new status of Ghana."

(Times - Manchester Guardian) **(Prev. rep. 15427 A.)**

C. WESTERN GERMANY. — Ban on the Saar Communist Party.

On the instructions of the Federal Constitutional Court, the Saar Communist Party was banned on April 9 by the Saar Government, the two Communist members of the Saar *Landtag* automatically being deprived of their seats. The Constitutional Court had ruled that the Saar Communist Party was a substitute organization for the West German Communist Party which had been banned throughout the Federal Republic in August 1956—i.e. before the Saar was reunited with Western Germany on Jan. 1, 1957.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 15086 D.)**

D. ITALY. — Creation of Ministry of State Investments. - Dispute over Signor Togni's Appointment. - Social Democrats to remain in Coalition Government. - Republican Party ends Support for Coalition.

Following the passage by the Italian Parliament of legislation authorizing the setting-up of a Ministry of State Investments, in implementation of Signor Segni's policy statement (see 14320 A), Signor Giuseppe Togni was appointed head of the new Ministry on March 3. Signor Togni (53), whose candidature was supported by Signor Fanfani (secretary-general of the Christian Democratic Party), belongs to the right wing of the Christian Democrats and had been Minister of Industry in some of the late Signor de Gasperi's Cabinets. Objections to his appointment had previously been raised both by the Social Democrats and by the Republicans, who had proposed Signor La Malfa, a former Republican Minister, for the post.

The new Ministry will supervise hundreds of enterprises in which the Italian State has taken a financial interest over a long period of years. Employing over 200,000 workers, they include steel mills, motor-car factories, shipping companies, airlines, the Government-owned oil and natural gas corporation (*Ente Nazionale Idrocarburi*), and the national broadcasting and television network. Many of the enterprises, especially those engaged in heavy industry, engineering, the chemical industry, electricity, and transport, come under the State-owned Institute for Industrial Reconstruction (I.R.I.). In addition, the new Ministry will control the Government's interests in some of the big banks.

During the debates on the Bill establishing the new Ministry, Government spokesmen stressed that all concerns owned or controlled by the State would remain private enterprises in a competitive economy and would not be run like nationalized industries. The task of the new Ministry would be to reorganize and streamline many of the undertakings concerned, to introduce sound business methods, and to dispose of enterprises (many of them smaller firms) which were economically unsound. It was made clear, nevertheless, that concerns such as the big shipping lines would be maintained as essential to the national economy or prestige, in spite of the fact that they were not expected to be put on a profitable basis.

The appointment of Signor Togni led to a crisis in the Social Democratic Party, whose secretary-general (Signor Matteotti) announced on March 7 that he wished to resign; he also asked for the convening of a party congress and for the party's withdrawal from the Coalition Government, in which Signor Saragat, the Social Democratic leader, is Deputy Premier. After lengthy debates the party directorate decided on March 8 to remain in the Government and to refuse Signor Matteotti's resignation (which was subsequently withdrawn), but to summon a party congress in June.

In offering his resignation as party secretary, Signor Matteotti complained that he had learned of Signor Togni's appointment only from the radio announcement. He alleged that the Prime Minister (Signor Segni) had not kept him properly informed, and expressed the belief that the Coalition was no longer either united or useful. Signor Saragat, on the other hand, pointed out that while he shared many of Signor Matteotti's anxieties, the party's withdrawal from the Government would weaken its position in future negotiations with the Nenni Socialists on reunification. The Opposition parties, he said, were trying to encourage the Social Democrats to leave the Government in the hope that, weakened by the loss of their present allies, they would be more easily persuaded to join with the Nenni Socialists in a "false unity," i.e. one in which Communist influence would be predominant.

A motion approving Signor Togni's appointment was passed by the Senate on March 14 by 118 votes to 80, with 16 abstentions, the Government thus receiving a vote of confidence. Parties supporting the motion included the Christian Democrats, Social Democrats, and Liberals, while the opposition consisted of the Communists, the Nenni Socialists, and the Republicans, as well as the Left Independents. The Monarchists and the neo-Fascist M.S.I. abstained from voting.

On Feb. 24 the national executive of the Republican Party had decided by a large majority to end the support which it had extended to Signor Segni's Coalition Government, although it was not represented therein. The resolution stated that the crisis in the Italian Communist Party made a coalition for the protection of democratic institutions no longer necessary; that the existing coalition had fulfilled its task; and that growing conflicts within the coalition parties had made it desirable for the Republican Party to regain its full independence.

(Giornale d'Italia, Rome - Corriere della Sera, Milan) **(Prev. rep. Cabinet, 14709 C; Ministry of State Investments, 14320 A; Social Democrats, 15399 A.)**

Corrigenda. Two rectifications should be made in the text of the article (page 15401) dealing with the negotiations for reunification of the two Italian Socialist parties: (*a*) the Milan newspaper *Corriere d'Informazione* was incorrectly described as a Christian Democratic organ, whereas it is in fact non-party, like the *Corriere della Sera*; (*b*) Signor Giovanni Giolitti, to whom reference was made in the article, was Prime Minister several times before the First World War and not only after 1918. (Ed. K.C.A.).

A. AUSTRALIA. — Defence Reorganization. - Abolition of National Service for Navy and Air Force. - Arms Equipment standardized with United States.

Major changes in Australia's defence organization were announced by the Federal Prime Minister, Mr. Menzies, in the House of Representatives on April 4, following a recent review of the Government's defence policy by the Defence Department and the Chiefs of Staff. In addition to the abolition of National Service for the Navy and Air Force, and the reduction of the intake of National Servicemen by the Army, the most important change was the decision to standardize equipment for the Australian forces with that used by the U.S. Defence Services, with a view to ensuring safe supply lines in the event of war. The broad cost of the defence programme, Mr. Menzies stated, would remain at about £A190,000,000 a year, but the new programme contemplated an operational contribution to Allied strategy of highly trained men armed with the most modern weapons and equipment, the emphasis being not so much on numbers as on mobility, equipment, and fire-power.

Details of Mr. Menzies' announcement are summarized below under cross-headings.

National Service. Mr. Menzies stated that National Service would be "modified but not abandoned," and went on: "In order to make available a greater proportion of expenditure on equipment where there are at present disturbing deficiencies, National Service for Air and Navy will be abolished but the Army will absorb 12,000 trainees annually. Universal liability to serve remains. Selection will be made by ballot. There will be 77 days' continuous training in a total period of 140 days, followed by three years [instead of two, as at present] in the Citizen Military Forces. These modifications will free 2,000 Regular soldiers for active duty."

Arms Standardization with U.S.A. "Under both the SEATO and the ANZUS pacts it seems clear that in the event of war we shall be fighting alongside the United States. In the event of global war, it would be manifestly difficult for the United Kingdom to maintain a supply line to South-East Asia, though the U.S.A. undoubtedly could. Common sense dictates that in these circumstances we should pay considerable attention to the logistic aspect of war and standardize as far as we can with the Americans. Though this is a wholeheartedly British nation, this policy is not heresy; it merely recognizes the facts of war. It is based on exactly the same reasoning as that on which, I am sure, the U.S.A. would wish to see the NATO countries standardizing their weapons and techniques to eliminate the necessity for excessive stocks and spare parts, or precarious technical reinforcements over the waters of the Atlantic. It is for this reason that we have decided, both in aircraft, artillery, and small arms, to fit ourselves for close co-operation with the United States in the South-East Asian area."

Navy. There would be no major changes in the Navy. The Fleet Air Arm would continue to consist operationally of the aircraft-carrier *Melbourne*, the naval air station at Nowra (N.S.W.), and the front-line establishment of 40 aircraft in five squadrons. The aircraft-carrier *Sydney*, which had been used as a non-flying training ship, would resume flying training with *Sea Furies*. Naval construction would be expedited to correct the present shortage of ships of appropriate kind. The strength of the permanent naval forces would be maintained at an average of 11,000 for the next three years.

Army. "Army mobility and fire power is to be improved," Mr. Menzies said, "There will be a new Brigade group of 4,000 representing a cohesive battle formation equipped with the most modern weapons. This will be in addition to the infantry battalion group serving with the Commonwealth Strategic Reserve in Malaya. The Belgian FN rifle will be standard equipment. The total strength of the Army will be maintained at 21,000."

Air Force. "The Air Force plans to re-arm with fighter aircraft of a performance equivalent to that of the *Lockheed F-104* and with transport aircraft of the type of the *Hercules C-130*. The strength of the regular Air Force will be built up from 15,000 to 16,725. A ground-to-air guided weapons unit will be set up in the Sydney area, where a modern control and reporting unit has already been established, and mobile control and reporting units will be stationed in Darwin and Perth."

Guided Missiles Research. The *Jindivik* pilotless aircraft would continue in production, and in co-operation with the U.K., the Long Range Weapons Establishment would be maintained vigorously at about the existing level. What had been done at Woomera and Maralinga had "the highest priority as a contribution to the development of the nuclear deterrent in the global strategy of the Western Powers."

Defence and Chiefs of Staff Committees. "The Defence Committee, at present comprising the Secretary of Defence and three Chiefs of Staff, is to be made more comprehensive by the addition of the secretaries of the Prime Minister's Department, the Treasury, and the External Affairs Department. The Chiefs of Staff Committee, consisting of three Chiefs of Staff, will meet regularly on purely military matters and will otherwise maintain their normal relationships with their Ministers and the Minister of Defence." During 1959, 1,100 officers associated with the operation of the two committees would be transferred to Canberra, in order to concentrate defence policy units in the Federal capital.

The Minister for the Army, Mr. Cramer, stated on April 7 that while the Regular Army strength would be unchanged at 21,000, the Citizen Military Forces would be reduced by one-third from 79,000 to 50,700. [These forces consist at present of three infantry divisions and elements of two armoured brigades, including volunteers and National Servicemen.] He also said that the hard-hitting mobile field force, which would be the spearhead of Australia's new defence organization, would have an overall strength of 42,000 highly trained men.

The Minister pointed out that the strength of the new force had been determined not only by such factors as its role in the cold war and its readiness for quick deployment in actual war, but also by the necessity to have its size balanced against the overall manpower available. A feature of future Army practice would be the inclusion of Air Service units for reconnaissance behind enemy lines.

The Minister for Defence Production, Mr. Beale, announced on April 7 that a £A1,000,000 tooling-up programme for the production of the Belgian FN-30 rifle had begun at the Lithgow small arms factory (N.S.W.); that the manufacture of these rifles was expected to start in June 1958; and that delivery would begin in 1959.

After Mr. Menzies' statement the Lockheed Aircraft Organization announced that the Australian Government had placed orders with the company for two squadrons of *Starfighter* jet aircraft and one squadron of *Hercules* prop-jet transport planes. (Australian News and Information Bureau - Times) **(Prev. rep. Defence Policy, 13550 B; National Service, 13175 B; Weapons Research Establishment, 14001 A; Belgian Rifle, Adoption, 13988 B.)**

B. MIDDLE EAST. — Further Conference of Arab Heads of State. - Cairo Communiqué.

A further conference between the Heads of State of Egypt (President Nasser), Jordan (King Hussein), Saudi Arabia (King Saud), and Syria (President Kuwatly) was held in Cairo from Feb. 25-27, King Hussein and President Kuwatly being accompanied by their respective Prime Ministers, Mr. Suliman Nabulsi and Mr. Sabry el-Assali. The conference was a resumption of the four-Power talks held in January, part of its proceedings dealing with a report by King Saud on his recent visit to the U.S.A. (see 15450 A). The following communiqué was issued at the end of the conference:

"The participants were informed of and highly appreciated the efforts exerted by King Saud in the course of his visit to the U.S.A., and the elucidations given by His Majesty to statesmen regarding the Arab point of view on Middle East and other problems. His Majesty also gave an account of explanations given by him to President Eisenhower, with particular reference to Arab rights and problems . . .

"The Arab countries represented at the conference reaffirm their determination to protect the Arab world from the harm of the 'cold war' and to abide by the policy of 'positive neutrality,' thus preserving its real national interests. They also affirm that the defence of the Arab world should emanate from the Arab nations . . . outside the scope of foreign pacts.

"Noting that . . . Israel has not complied with the U.N. resolutions on unconditional withdrawal [from Gaza and Sharm-el-Sheikh] and holding, moreover, that peace and security in the Middle East are in jeopardy while the population of Gaza continues to suffer oppression and maltreatment at the hands of Israel, the conferees have decided:

(1) To work for an immediate and unconditional withdrawal of Israel beyond the armistice lines.

(2) To uphold in full the rights of the Palestine Arabs and the Arabs' sovereignty over their territories and territorial waters.

(3) On the necessity for the aggressor States to compensate Egypt for damages and losses caused through their aggression.

(4) To reject all attempts to reduce Egypt's sovereignty and rights over the Suez Canal, as the Suez Canal is an integral part of Egypt, her sovereignty over the Canal is absolute, and freedom of navigation in the Canal is regulated in accordance with the provisions of the 1888 Convention.

(5) To condemn British aggression against the Yemen and to assume an attitude of solidarity with Yemen in stemming this aggression.

(6) To support the rights of the Arabs of Algeria to freedom and independence."

The conference was held before Israel's decision to withdraw from the Gaza Strip and the Sharm-el-Sheikh area on the Gulf of Akaba.— (Times - Daily Telegraph - Manchester Guardian - New York Times - Le Monde, Paris) **(Prev. rep. 15340 A.)**

C. ISRAEL. — Return of Soviet Ambassador.

The Soviet Ambassador to Israel (M. Abramov), who had been recalled in November last at the time of the Sinai campaign, returned to Tel-Aviv on April 6. He said that his return was a sign of "improving relations" between the U.S.S.R. and Israel.—(Daily Telegraph) **(Prev. rep. 15201 A.)**

APRIL 27—MAY 4, 1957

A. UNITED NATIONS. — Eleventh Session of General Assembly. - Proceedings and Resolutions.

The 11th session of the U.N. General Assembly opened in New York on Nov. 12, 1956 and ended on March 9, 1957, after disposing of an agenda comprising over 70 subjects. The discussions were dominated by the crises in the Middle East and Hungary, which, after prolonged debate in the Assembly's emergency sessions at the end of October and the beginning of November, had been transferred to the agenda of the regular session—see 15221 A, 15201 A, 15173 A.

A summary is given below of the principal subjects discussed and resolutions adopted at the 11th session, other than the debates and resolutions on the Middle East, Hungary, and Cyprus, which are described in earlier articles. [See 15441 A, 15353 A, and 15316 A for Middle East; 15405 A for Hungary; 15469 A for Cyprus].

Election of Assembly President. - Chairmen of Assembly Committees.

Prince Wan Waithayakon, the Foreign Minister of Siam, was unanimously elected President of the General Assembly at its opening session. He succeeded Señor José Maza (Chile), who presided over the 10th session.

Prince Wan Waithayakon Krommun Naradhip Bongsprabandh is a grandson of King Rama IV of Siam and a cousin of the present monarch, King Phumiphon Aduldet. A graduate of Balliol College, Oxford, where he took an honours degree in history, he served before the war as his country's Ambassador to Great Britain, Belgium, and the Netherlands, leader of the Siamese delegation to the League of Nations, and as a member of the Permanent Court of Arbitration at The Hague. For several years in the 'thirties he was Professor of History at Chulalankarana University (Bangkok) and subsequently Dean of the Law Faculty. Since 1947 he has been Siamese Ambassador in Washington and permanent representative at the U.N., holding these posts concurrently with that of Foreign Minister of Siam. He has been chairman of the Trusteeship, Economic and Financial, Legal, and *Ad Hoc* (Special Political) Committees of the General Assembly, and had twice previously been a candidate for the Assembly presidency—in 1953, when he was defeated by Mrs. Pandit (India), and in 1954, when he withdrew in favour of Dr. van Kleffens (Netherlands).

The chairmen of the Assembly's committees were also unanimously elected on Nov. 12, as follows:

Political Committee	Dr. Victor Belaunde (Peru).
Ad Hoc Political Committee	M. Selim Sarper (Turkey).
Economic and Financial Committee	Mohammed Mir Khan (Pakistan)
Social, Humanitarian and Cultural Committee	Hr. Hermod Lannung (Denmark)
Trusteeship Committee	Señor Enrique de Marchena (Dominican Republic)
Administrative and Budgetary Committee	M. Omar Loutfi (Egypt)
Legal Committee	M. Petrzelka (Czechoslovakia)

Elections to Security Council.

The Philippines was elected to the non-permanent seat on the Security Council vacated by Yugoslavia under the "gentlemen's agreement" reached at the 10th session, when 35 ballots failed to give either candidate the required majority (see 14667 A). The Assembly also elected Colombia, Iraq and Sweden to the Council for two-year terms to succeed Peru, Persia and Belgium.

The Philippines was elected on the first ballot, receiving 51 votes against 20 for Czechoslovakia, with Spain, Yugoslavia and Afghanistan receiving one vote each. The Soviet delegate, M. Kuznetsov, protested against the "gentlemen's agreement" on the ground that it violated the principle of "equitable geographical representation."

With the above elections, the membership of the Security Council on Jan. 1, 1957, became as follows: Australia (until Jan. 1, 1958), China (permanent), Colombia (until Jan. 1, 1959), Cuba (until Jan. 1, 1958), France (permanent), Iraq (until Jan. 1, 1959), Philippines (until Jan. 1, 1958), Soviet Union (permanent), Sweden (until Jan. 1, 1959), United Kingdom (permanent) and United States (permanent).

Admission of New Members.

Morocco, Tunisia, and the Sudan were unanimously approved as new members of the U.N. at the opening session, while Japan was unanimously admitted on Dec. 18 and Ghana on March 8, bringing the total membership of the United Nations to 81 countries.

Resolutions calling for the admission of South Korea and South Vietnam, presented by the U.S.A. and 12 other co-sponsors, were approved by the Assembly by 40 votes to eight (with 16 abstentions) in the case of South Korea and by a similar vote (with 18 abstentions) in the case of South Vietnam. The opposing votes were cast by the Soviet-bloc countries on the ground that North Korea, North Vietnam and Mongolia were excluded. The resolutions requested the Security Council to consider the applications of South Korea and South Vietnam and to report to the Assembly as soon as possible.

The Algerian Problem.

After a protracted and at times embittered debate in the Political Committee, lasting nearly two weeks, the General Assembly unanimously adopted on Feb. 15 a compromise resolution which, after noting that the situation in Algeria was "causing much suffering and loss of human life," expressed "the hope that, in a spirit of co-operation, a peaceful, democratic and just solution [of the Algerian question] will be found through appropriate means, in conformity with the principles of the U.N. Charter." The resolution was adopted by 77 votes to nil, with France not participating in the vote and Hungary and South Africa absent.

The Algerian question had been put on the agenda at the request of 15 Afro-Asian countries, who presented a strongly-worded memorandum accusing France of "extensive military repression" in Algeria, of "violation of the Genocide Convention," and of pursuing a policy "based on the repression and extermination of the Algerian people." The memorandum recalled the concern previously expressed by the U.N. at the Algerian situation, alleged that France had rejected a policy of conciliation in Algeria, and recalled the resolution on Algeria's "rights" which had been adopted by the Bandung conference of Afro-Asian countries.

The French Foreign Minister, M. Pineau, made a lengthy defence of his Government's Algerian policy in a four-hour speech to the Political Committee on Feb. 4. As at the 10th Assembly session, he reiterated that the Algerian question lay solely within the domestic jurisdiction of France, that the U.N. was not competent to discuss the matter, and that France could not be bound by any resolutions which the Assembly might adopt. In the course of his speech he declared: "We have never accepted, we do not accept, and we shall never accept the competence of the U.N. with regard to a problem which, under international law, is of an essentially internal nature."

M. Pineau reiterated that Algeria was an integral part of France and gave a "solemn warning" that the French Government would not be bound by any resolutions that might be adopted. After a detailed analysis of those Charter provisions which, he maintained, prevented the Organization from interfering in the internal affairs of a member-country, he pointed out that the drafters of the Charter did not confer any powers on the Assembly with reference to the rights of peoples to self-determination. Moreover, responsibility for the preservation of international peace belonged solely to the Security Council and not to the General Assembly.

M. Pineau went on to review in detail the economic, social and political reforms which France had brought about in Algeria—e.g. the modernization of agriculture, creation of new industries, introduction of free medical assistance, extension of education, and raising of wages, all of which had been accomplished by French initiative and large-scale French investments. "In view of all this," he went on, "delegates may wonder why the crisis broke out and the rebellion reached its present proportions. Among the long-standing causes there are some for which we do not intend to shun responsibility—some of the reforms should have been made sooner, and the weakening effects on France of two long wars made it impossible for her to do all that she would have liked." M. Pineau also stressed the problems created by the existence of two big racial elements in the Algerian population—one of European and the other of Moslem origin.

"The real cause of the present crisis," M. Pineau continued, "should be traced to the action of the terrorist groups which have been gradually organized during the past few years, mostly with the support and upon the instructions of foreign powers." After enumerating the three principal rebel groups—the National Algerian Movement, the National Liberation Front, and the Algerian Communist party—M. Pineau analysed the structure, operation and aims of these organizations; stressed that they were engaged in constant rivalry with each other; and declared that none of them could be regarded as representative of the Algerian people, in which connexion he accused them of being "more bent on committing ruthless atrocities against French Moslems and each other than on achieving truly national aspirations." He went on to give numerous instances of crimes committed by the terrorists against civilians, both European and Moslem; refuted rebel allegations that French troops had been guilty of atrocities; and pointed out that such allegations had been investigated and found untrue, though some abuses were naturally unavoidable during military operations. With regard to protests against the arrest of five rebel leaders on board a plane bound from Morocco to Tunis (see 15329 A), M. Pineau pointed out that the persons concerned were being sought by the French judicial authorities, that they were travelling in a French plane, and that important documents concerning the organization of the rebel movement had been found in their possession.

As regards the Algerian Communist party, M. Pineau declared: "The purpose of the Algerian Communists is to support Soviet efforts towards penetration in the Middle East, and reveals the existence of a vast plan for the elimination of all Western influence on the southern shores of the Mediterranean. The aim is the creation in Algeria of a 'people's democracy' which would serve as an advance base for Soviet penetration towards the Atlantic and *Afrique Noire*."

The National Liberation Front, M. Pineau continued, was partly controlled from Cairo and largely dependent on support from the Arab world, and particularly from Egypt. In this connexion he mentioned that the training of terrorist "cadres" had begun in Egypt as early as 1953, referred bitterly to the Egyptian Government's actions in supplying arms and ammunition to the Algerian rebels, and recalled the recent *Athos* incident (see 15277 C) in which the French Navy had seized 70 tons of arms being sent by Egypt to the rebels. The third group—the National Algerian movement—was described by M. Pineau as the most independent of the three and as being more "Western" and "realistic" than the others.

The fact that the French Government had had contacts with the National Liberation Front, M. Pineau explained, was not because it recognized its representative character but because France had always tried, and was still trying, to seek a cease-fire to end the bloodshed in Algeria. All efforts, however, had failed because the rebels insisted on political stipulations which, if accepted, would mean that "out and out massacre would be substituted for individual assassination." M. Pineau declared: "We wish to preserve the following order: cease-fire, elections, discussions. The aims of France are to secure for the people of Algeria equal rights regardless of origin or religion; co-existence; the preservation of Algeria's individual characteristics while maintaining the necessary ties between Algeria and Metropolitan France; and continued French economic and social aid. On the other hand, France intends to retain a permanent power of arbitration in order to prevent the oppression of either community by the other."

After emphasizing that France was ready to conclude a cease-fire without reprisals and to hold general elections in Algeria within 90 days thereafter, M. Pineau said that France would not hesitate to invite representatives from other democratic countries to supervise the voting. There could, however, be no question of finding the same type of solution for Algeria as had been adopted in Morocco and Tunisia, since the two latter countries were in an entirely different position and possessed their own sovereign identity.

In the course of his speech M. Pineau stressed that France was in process of creating "a great Franco-African whole (*ensemble*) based on a community of cultural, economic and strategic interests," a task in which Morocco and Tunisia were "cordially invited" to participate. When this "Franco-African whole" had been created and a large common market established, France would embark on even "vaster plans" aimed at the creation of "Eurafrica," in which connexion M. Pineau declared: "Europe in its entirety, bringing to Africa its capital and techniques, should enable the immense African Continent to become an essential factor in world politics." Algeria, instead of being a land "pledged to fanaticism and by its very poverty open to Communism," could as part of Eurafrica enjoy comfort and prosperity, which were the true conditions of independence.

In the ensuing debate Dr. Zeineddine (Syria), as principal spokesman of the Afro-Asian nations presenting the memorandum, strongly attacked French policy in Algeria and demanded full independence for the Algerian people. He was supported by M. El-Mehdi Ben-Aboub (Morocco), M. Mongi Slim (Tunisia), M. Omar Loutfi (Egypt), Dr. Jamali (Iraq) and other Arab delegates. On the other hand Mr. Cabot Lodge (U.S.A.) and Commander Allan Noble (U.K.) upheld the French contention that the Algerian question was outside the jurisdiction of the United Nations. The Irish delegate, Mr. Boland, appealed to France to settle the Algerian dispute outside the U.N. on the pattern that had brought about Irish independence from Britain.

Dr. Zeineddine maintained that the Algerian problem was an international one; asserted that the "crux" of the problem was France's refusal to compromise; and refuted as a "legal fiction" the French contention that Algeria was part of France, declaring that France had "invaded and conquered Algeria 125 years ago and had kept the people subjugated by brute force ever since." The only practical objective, he insisted, was the granting of full independence and sovereign rights to Algeria while at the same time safeguarding the "legitimate interests" of the French settlers To enable this to be done gradually and without "abrupt changes," he suggested, firstly, a cease-fire and the creation of a provisional Algerian Government; secondly, negotiations between this Government and France on Algerian independence, to be carried out under international supervision; thirdly, the election of an Algerian Parliament which would enter into contractual relations with the French Parliament. This procedure should be based on a "prior understanding" between France and the Algerian National Liberation Movement, and negotiations between the two sides—which had been interrupted by the "kidnapping" of the five nationalist leaders—might be resumed with the help of mediation: perhaps by the U.N. Secretary-General, or by member-countries friendly to both France and Algeria.

Dr. Zeineddine said that the National Liberation Movement would agree to such a solution and that the U.N. could be of "real influence" in this field. For example, the U.N. could call for negotiations, or establish a Committee of Good Offices, or send observers or an international force to Algeria, or call for the withdrawal of all forces from that country. Summarizing what he described as the present position in Algeria, he claimed that the Algerian nationalist movement represented "a mass movement of the whole people"; that its organized fighting force still amounted to no more than one-tenth of its potential strength; and that it was democratic in organization and purpose.

Mr. Cabot Lodge said that the U.S. Government was of the opinion that the U.N. had no right to interfere in the Algerian question, and he would therefore oppose the 18-nation resolution [see below] or any similar resolution. If proposals interfering in domestic affairs were to be applied indiscriminately in the U.N., this could destroy the Organization. In the view of the U.S. Government, the U.N. should, above all, avoid any action which might hinder a cease-fire in Algeria and a programme which appeared to offer a reasonable prospect of a settlement; nor should there be external interference in Algerian affairs "from any quarter." He welcomed M. Pineau's "constructive and imaginative" statement; expressed his pleasure that France was willing to conclude a cease-fire without reprisals; and approved France's intention to hold general elections within 90 days of a cease-fire, and thereafter to work out a new structure for Algeria with the elected representatives. "There are clearly differences of opinion as to what would ultimately constitute a satisfactory settlement," Mr. Lodge declared, "but there are two immediate considerations which seem to be fundamental—to stop the flow of blood, and to allow Algerian representatives to help work out a solution."

Commander Noble similarly supported M. Pineau's contention that the matter was essentially within the domestic jurisdiction of France, and described the French Foreign Minister's statement as "far more accurate" than the "lurid picture" which had been painted by Dr. Zeineddine.

Mr. Boland described the Algerian question as one of the "most grave, complex and difficult" on the Assembly's agenda. Many member-countries—including the Irish Republic—had once been under the jurisdiction of other Powers, and those countries could not be expected to accept an interpretation of the Charter which would prevent the U.N. from discussing "any and every struggle for national independence." While sympathizing with the desire of the Algerian people for freedom, he appealed to France to settle the dispute outside the United Nations on the same pattern that had brought about Irish independence from Britain.

Three resolutions on Algeria were presented in the Political Committee, as follows:

(1) An 18-nation Afro-Asian resolution which, after referring to the "unrest and strife" in Algeria and upholding "the right of the people of Algeria to self-determination according to the principles of the U.N. Charter": (*a*) requested France "to respond to the desire of the people of Algeria to exercise their fundamental right to self-determination"; (*b*) invited France and "the people of Algeria" to "enter into immediate negotiations with a view to the cessation of hostilities and the peaceful settlement of their differences in accordance with the U.N. Charter"; and (*c*) requested the U.N. Secretary-General "to assist the parties in conducting such negotiations and to report to the 12th session of the Assembly."

The resolution was sponsored by Afghanistan, Burma, Ceylon, Egypt, Indonesia, Jordan, Iraq, Lebanon, Libya, Morocco, Nepal, Pakistan, Persia, Saudi Arabia, Sudan, Syria, Tunisia and Yemen.

(2) A six-nation resolution, sponsored by Italy and five Latin American countries (Argentina, Brazil, Cuba, Dominican Republic and Peru), which expressed "the hope that a peaceful and democratic solution of this question can be found."

(3) A three-nation resolution (sponsored by Japan, Siam, and the Philippines) which expressed (*a*) the belief that "the unsatisfactory situation now prevailing in Algeria may be normalized by the joint efforts of France and the Algerian people to find an equitable solution in conformity with the principles of the U.N. Charter"; and (*b*) the hope that "France and the Algerian people will endeavour through appropriate negotiations to bring about the end of bloodshed and the peaceful settlement of the present difficulties."

The Japanese-Siamese-Philippine resolution was regarded as a compromise between the Afro-Asian resolution, with its implicit condemnation of France, and the Italo-Latin American resolution, which made no reference to the United Nations.

When the Political Committee met on Feb. 13, after the Algerian debate had ended, the first two operative clauses of the Afro-Asian resolution were rejected, in each case by a single vote—34 against and 33 in favour. Accordingly, no vote was taken on the third clause, nor was the resolution as a whole put to the vote. The second (six-nation) resolution was adopted by 41 votes to 33, with three abstentions, and the third (three-nation) resolution was also approved by 37 votes to 27, with 18 abstentions.

The voting on the Afro-Asian resolution was almost wholly along regional lines—nearly all members of the Afro-Asian group and all the members of the Communist bloc supporting the resolution, and all the members of the Latin American, North American and European groups opposing it with the exception of Ecuador, Greece and Turkey.

In the plenary session on Feb. 15, the President of the Assembly (Prince Wan Waithayakon) explained that as neither of the two resolutions adopted by the Political Committee had received the two-thirds majority needed for adop-

tion by the full Assembly, the sponsors of the two resolutions (i.e. Italy, the five Latin American countries, Japan, Siam and the Philippines) had jointly agreed to present a new "conciliatory" resolution to the Assembly. This resolution, as stated above, was adopted by 77 votes to nil.

The defeat of the Afro-Asian resolution on Algeria, and the adoption of the above-mentioned resolution, was warmly welcomed by French official spokesmen and in the French press. In a press statement at U.N. Headquarters on Feb. 15, M. Marcel Champeix (French Under-Secretary for the Interior in charge of Algerian affairs) said that France, though opposed to any U.N. intervention in Algeria or any resolution on the matter, was nevertheless "realistic enough to welcome one that was so favourable to France, if a resolution had to be adopted." M. Champeix declared that the unanimous adoption of this resolution represented a "great victory" for France and a "capitulation and surrender" on the part of the spokesmen for the Algerian *fellaghas* (rebels); "the Arabs had had to yield," and he thanked "all the friends of France, and particularly her American friends," for their support in the Assembly.

Soviet Charges against United States.

The Assembly took no action on a complaint by the U.S.S.R. alleging "intervention" and "subversion" by the United States in the affairs of the Soviet-bloc countries, although the U.S. delegation itself voted for discussion of this item. In addition, the Assembly also rejected a Soviet request for a debate on U.S. "aggression" in the Middle East and elsewhere.

The matter had been raised on Dec. 12 by the Soviet delegation, which presented a memorandum asking for the inclusion in the Assembly's agenda of the item: "Intervention by the United States in the domestic affairs of the people's democracies and subversive activities against those States."

The memorandum asserted that "hostile activity" was being directed by the U.S.A. against the Soviet Union, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria and Albania with the object of "undermining the political system which was freely chosen by the peoples of those countries." This "hostile activity," it was stated, had been "demonstrated clearly by recent events in Hungary" and by "the intensification of diversionary activities and espionage in other people's democracies."

Detailing the forms of this alleged "subversive activity," the memorandum mentioned the dispatch of specially trained agents to organize "diversionary activities and espionage" in the Socialist countries; the annual appropriation by Congress of funds to finance these "organizations and diversionary groups"; "incitement" by Radio Free Europe and other "American-controlled" stations in Western Europe; the sending of balloons over Eastern Europe with messages calling on the people to revolt, etc.; and statements by "responsible U.S. statesmen" calling for the overthrow of the political and economic systems in those countries.

The Assembly's Steering Committee agreed on Dec. 13 by 12 votes to one, with two abstentions, to place the Soviet complaint on the agenda, but (with Soviet approval) deleted the reference to "people's democracies" and replaced it by the names of the seven Communist countries concerned. The U.S. delegate (Mr. Wadsworth) supported a discussion, declaring that the U.S. Government "believes in the cleansing power of free debate" and was "willing and indeed anxious to have the full truth made known at this international forum." The Political Committee, however, meeting on Feb. 25, rejected by 53 votes to eight (with 11 abstentions) a Soviet resolution accusing the U.S.A. of "subversive activities" against the East European countries, and calling upon the U.S. Government to cease "interference" in the affairs of those countries and to base its relations with them "on the principles of the U.N. Charter." The resolution was supported only by the Communist countries (Hungary being absent), with Finland and ten Afro-Asian countries abstaining.

M. Kuznetsov made a bitter attack on the U.S.A. during which he accused the U.S. Government of responsibility for the Hungarian uprising by smuggling "gangs of saboteurs" into Hungary "during the "counter-revolutionary *putsch*." He also attacked the NATO, SEATO, ANZUS and Baghdad alliances; accused the U.S Government of spending "billions of dollars" to subvert the regimes in the "people's democracies"; and denounced the "Eisenhower doctrine" for the Middle East, which he described as designed to establish U.S. "colonial domination" in that area.

Senator Knowland (U.S.A.), in reply, described M. Kuznetsov's arguments as "a mockery of the facts," and said that the Soviet Government was obviously trying "to divert world attention from its own year-in-year-out programme of using foreign Communist parties to subvert and undermine the Governments of free countries all over the world." "Also," he added, "the Soviet Union would no doubt like to obscure the truth revealed in the Assembly's recent discussions on Hungary, and for this purpose produces the myth of U.S. intervention in Eastern Europe."

A second Soviet memorandum was presented on Feb. 13 calling for a General Assembly debate on the "Eisenhower doctrine," which was described as "direct intervention by the United States in the domestic affairs of sovereign States in the Near and Middle East" and as aimed at "the economic and political enslavement of the peoples of the countries in this area." The memorandum also accused U.S. "ruling circles" of setting up bases for atomic warfare in Western Europe, the Far East and the Middle East.

The Soviet request for a debate on this matter was rejected by the Steering Committee on Feb. 14 by eight votes to six, with one abstention. The U.S. delegate, Mr. Cabot Lodge, described the Soviet charges as "a gigantic cock-and-bull story" but said that he would vote for a discussion because "every member-Government has the right to make a fool of itself, as the Soviet Government is now doing." Mr. Lodge added that the U.S.A. could present a "devastating" item against the Soviet Union regarding its "repression of the satellites, its discrimination against Christians, Jews and Moslems, its fomenting of Korean aggression, and its bloody deeds in Hungary."

The eight countries voting against a debate on the second Soviet memorandum were Nationalist China, Denmark, the Dominican Republic, El Salvador, France, Italy, Peru, and Turkey, with Pakistan abstaining and Siam (represented by the Assembly President, Prince Wan Waithayakon) taking no part in the vote. The U.S.S.R., the U.S.A., Britain, India, Egypt and Czechoslovakia voted for a debate in the Assembly.

Resolutions on South African "Apartheid" Policy. - South African Walk-out from General Assembly.

Two resolutions on South Africa's *apartheid* (racial segregation) policies, similar to those adopted at earlier sessions, were approved by the General Assembly on Jan. 30 after previous approval by the *Ad Hoc* Political Committee. They were (1) a resolution calling on the Union Government to "reconsider" its *apartheid* policies "in the light of its obligations and responsibilities under the Charter and of the principles subscribed to . . . in other multi-racial societies," and inviting it to "co-operate in a constructive approach to this question"; (2) a second resolution "noting with regret" that South Africa had not yet agreed to negotiations with India and Pakistan on the treatment of persons of Indian or Pakistani origin living in the Union, and requesting the South African Government to "co-operate" in this matter.

The resolutions were adopted in the absence of the South African delegation, which had again walked out of the Assembly's session as it had done a year earlier. The first resolution was adopted by 56 votes to five (Britain, France, Belgium, Australia and Portugal) with 12 abstentions, and the second by 42 votes to nil with 12 abstentions.

In a statement to the Assembly on Nov. 27, the Union Minister of External Affairs (Mr. Eric Louw) had announced that South Africa was "not prepared any longer to be even an unwilling party to the continued interference in the Union's domestic affairs." Accordingly, South Africa would in future maintain only a token or nominal representation at the United Nations in protest against the Assembly's repeated attempts to interfere in the Union's domestic affairs. In the course of his speech Mr. Louw made a bitter attack on India, accused that country of pursuing a "vendetta" against South Africa, and gave a warning that South Africa might be forced to leave the United Nations unless the organization returned to "the ideals and objectives of its founders."

"In contravention of the U.N. Charter," Mr. Louw declared, "South Africa has annually been subjected to interference in her domestic affairs—interference, moreover, which has been accompanied by violent attacks on successive Governments and also on the European population of South Africa . . . For the past ten years my country has been the object of baseless accusations and violent attacks both in the Assembly and its Committees. These demonstrations of malevolence and hostility . . . were invariably led by India, acting in concert with her Soviet and Eastern associates . . ."

After accusing India of carrying on a "vendetta" against South Africa, Mr. Louw referred to statements by Mr. Krishna Menon on the racial situation in South Africa which, he said, "as so often in the past, contained allegations which were not in accordance with the facts." He added: "I do not intend to deal with his allegations regarding the treatment of Indian and other non-White peoples of our country except to deny emphatically and categorically that they are oppressed . . . The delegate of India has sufficient information in his possession to know that his statement is not true . . ."

Mr. Louw concluded: "There is a strong and growing feeling in my country that South Africa should withdraw from the United Nations. The Union Government has, however, not entirely given up hope that the more responsible members may yet prevail upon the Assembly to return to the ideals and objectives of its founders."

The South African walk-out from the 11th session was followed by the Hungarian walk-out on Dec. 11 (see page 15407) in protest at the Assembly's resolutions on Hungary. As a result, the South African and Hungarian delegations were absent during the greater part of the 11th session.

Western New Guinea.

A resolution was presented in the Political Committee by 12 Afro-Asian and Latin American countries requesting Dr. Hammarskjold to appoint a three-member Good Offices Commission to assist Indonesia and the Netherlands in settling their dispute about the status of Western New Guinea (West Irian), "in order that a just and peaceful solution of the question may be achieved in accordance with the principles and purposes of the Charter." The resolution was adopted by the Political Committee but failed to obtain the necessary two-thirds majority in the full Assembly and was therefore not carried.

As at previous Assembly sessions, the Indonesian delegate reiterated his country's claim to sovereignty over "West Irian," while the Netherlands delegate denied that Indonesia had any rightful claim on Netherlands New Guinea. Whereas Mr. Sudjarwo (Indonesia) described the dispute as one of "freedom versus colonialism" and contended that "West Irian" was historically and geographically part of Indonesia, Mr. Schuurman (Netherlands) stressed that the Papuans of Western New Guinea were completely distinct from the Indonesian people and had no racial, cultural, religious or national affinities with them whatsoever.

The voting in the Political Committee was 39 in favour of the resolution, 25 against, and nine abstentions, and in the General Assembly 40 in favour, 25 against, and 13 abstentions, including the United States. The resolution was supported by the Afro-Asian group, the Soviet bloc, and some Latin American nations, and was opposed by most of the Western Powers and a number of Latin American countries.

Palestine Arab Refugees.

By 68 votes to nil, with Iraq abstaining and 12 delegations absent, the Political Committee (and subsequently the General Assembly) passed a resolution which (*a*) directed the U.N. Relief and Works Agency for Palestine refugees (UNRWA) to continue its relief and rehabilitation programmes for the 900,000 Arab refugees under its care; (*b*) noted that the "host" Governments (i.e. Egypt, Syria, Jordan and Lebanon) had expressed their willingness to continue their co-operation with the Agency; (*c*) continued the Agency's "rehabilitation fund"; and (*d*) gave the Director of UNRWA (Mr. Henry Labouisse) discretion to disburse available finances to the Arab Governments concerned for "general economic projects," provided each recipient country undertook to assume financial responsibility for an agreed number of refugees "commensurate with the cost of the project" in question. In addition, all member-countries were asked to give "every appropriate assistance" to UNRWA and to make contributions to enable it to carry out its work on behalf of the refugees.

Mr. Labouisse had presented a report to the U.N. on Jan. 3 emphasizing that the Agency's funds were inadequate for its tasks, and warning that UNRWA might have to cease its activities after the end of June unless more contributions were forthcoming from member-countries. He pointed out (i) that whereas $43,000,000 had been budgeted for the Agency for 1956-57, only $14,700,000 had actually been received, with a further $10,000,000 promised; (ii) that $20,000,000 would be required for relief funds in 1957, in addition to $22,000,000 for programmes aimed at making the refugees self-supporting; and (iii) that the United States was paying 70 per cent of UNRWA's budget and, together with Britain, was virtually supporting the undertaking.

Mr. Labouisse's report (which covered the period July 1, 1955 to June 30, 1956, and therefore did not take into account the situation created by the Israeli operations in the Gaza Strip and the Sinai peninsula) pointed out that the number of Palestine Arab refugees registered with the Agency had increased from 905,980 to 922,279, of whom there were approximately 512,000 in Jordan, about 217,000 in the Gaza Strip, 102,000 in the Lebanon, and 90,000 in Syria. The report described the refugee question as the "core" of the Palestine problem and as one of the most explosive issues in the Middle East. As in previous reports, M. Labouisse stressed that the refugees' desire to return to their homelands "continues unabated."

Strong criticisms of the attitude of some of the "host countries"—Egypt and Syria in particular—were contained in the report. In this connexion Mr. Labouisse complained that these States had tended increasingly to control and restrict the Agency's operations, had interfered with the movement of Agency personnel, and had imposed duties on relief goods destined for the refugees; moreover, Egypt and Syria had refused entry to some of the Agency's officials—including British nationals—and the Press of both countries had made "virulent attacks" against UNRWA itself. Mr. Labouisse also pointed out that the bitterness of the refugees had been consistently exploited by "unscrupulous political agitation," and that the result had been to encourage ill-will and even open resistance to the Agency.

The above-mentioned resolution was presented in the Political Committee by the U.S.A., Great Britain, New Zealand, Argentina and the Philippines, and included a proviso that any assistance to the refugees would be without prejudice to their rights to eventual repatriation or, alternatively, to compensation. Mr. Labouisse, addressing the Committee, pointed out that the rehabilitation fund mentioned in the resolution did not exist in terms of "ready cash"; emphasized that his Agency would need new funds to carry out the terms of the resolution; and appealed to member-countries for "prompt pledges" of contributions.

Pledges of continued co-operation with UNRWA were given during the debate by spokesmen of several Arab countries, including Syria, and were welcomed by Mr. Labouisse. **Dr. Jamali** (Iraq), explaining his abstention from the vote, declared that the refugees should be "returned to their own homes" in Palestine, but said that Palestine itself should be "a haven for Moslems, Jews and Christians alike." Pending a solution of the whole Palestine problem, he added, "Israel should at least be made to repatriate Arab refugees whose homes were in those territories allotted to the Arabs by the U.N. in the 1947 [partition] resolution."

Mr. Michael Comay (Israel) asked that the Arab Governments should stop regarding the refugees as "a weapon in their vendetta against Israel and an instrument for changing the political *status quo*." He reaffirmed his Government's opinion that resettlement of the refugees, rather than repatriation, provided the "answer to the problem."

British and French Togoland.

By 63 votes to nil, with nine abstentions, the Assembly approved on Dec. 13 a resolution which (1) noted that a majority of the people of British Togoland had voted for union with the Gold Coast in the plebiscite held under U.N. auspices in May 1956; (2) noted that the Gold Coast had been given its independence by the United Kingdom and would become a sovereign State (Ghana) on March 6, 1957; and (3) declared that U.N. trusteeship over British Togoland should cease from the latter date, when the territory would be united with the Gold Coast.

The resolution was introduced in the Trusteeship Committee by eight countries (Canada, Ceylon, Ecuador, Ethiopia, Haiti, India, Liberia and Nepal) after the British Minister of State for Colonial Affairs (Mr. J. S. Maclay) had asked for the formal ending of U.N. trusteeship over British Togoland when the latter territory was united with the Gold Coast. Many countries paid tribute to Britain for her administration of the Togoland Trust Territory and her policy in guiding the Gold Coast toward independence. Señor Eduardo Prieto, of Mexico, who served as U.N. Plebiscite Commissioner, informed the Assembly that the plebiscite in British Togoland had been carried out in a fair and impartial manner and in accordance with the Assembly's wishes.

The Assembly also passed a resolution (by 53 votes to 16, with seven abstentions) for a six-member commission to visit French Togoland and examine "the situation . . . resulting from the practical application of the new [French] statute under which the inhabitants of that territory voted in October last for independence within the French Union" (see 15511 A). The commission was also asked to study the conditions under which the statute was being applied and to report to the next Assembly session.

The French delegation had informed the U.N. Trusteeship Council that, as a result of the plebiscite in October, French Togoland had become independent within the French Union—under the name of the Republic of Togoland—in all spheres except foreign relations, defence, and fiscal matters. In view of this development, France had requested that U.N. trusteeship over the territory should be ended. However, as the plebiscite had not been held under U.N. auspices, the Trusteeship Council withheld recognition of the change in French Togoland's status and voted to set up the above-mentioned commission to visit the territory.

Chinese Representation in United Nations.

On the recommendation of its Steering Committee, the Assembly decided—by 47 votes to 24, with eight abstentions—not to discuss the question of Chinese representation in the U.N. during the 11th session. A resolution calling for the admission of Communist China to the U.N. and the unseating of Nationalist China had been moved by India, whereas in former years this resolution had always been introduced by the Soviet Union.

The Steering Committee, meeting on Nov. 14, adopted by eight votes to five, with one abstention, a U.S. resolution asking that the debate on China's representation should be postponed to the next session of the Assembly. Despite Indian and Soviet efforts to reverse this decision, it was upheld on Nov. 16 by the full Assembly, which adopted the U.S. resolution by 47 votes to 24 with eight abstentions.

The 24 opposing votes were cast by the Soviet bloc, six Asian countries (India, Burma, Ceylon, Nepal, Indonesia, and Afghanistan), four Arab countries (Egypt, Syria, Yemen, and Sudan), and the Scandinavian group (Norway, Denmark, Sweden and Finland). The countries abstaining were Cambodia, Israel, Jordan, Laos, Libya, Portugal, Saudi Arabia and Tunisia. Three African countries (Ethiopia, Morocco and Liberia) and several Asian countries (including Persia, Siam and the Philippines) voted for the U.S. resolution.

Mr. Krishna Menon (India), who moved the admission of Communist China and the unseating of Nationalist China, made a violent attack on Senator Knowland (Republican leader in the U.S. Senate) in reply to a personal statement which had been issued by the latter on the previous evening (Nov. 15). In this statement Senator Knowland said that he was "shocked" that Mr. Menon had "apparently become the floor-leader for the Soviet drive to bring

Communist China into the U.N.," and recalled that the Peking regime had been branded by the U.N. for its aggression in South Korea. Mr. Menon took strong objection to these comments, described them as "a disservice to international friendship," and said that Senator Knowland should "visit a psychiatrist."

Mr. Menon was also involved in an altercation with the Chinese Nationalist delegate, Dr. Tsiang, after he had made critical remarks of alleged corruption in the Chiang Kai-shek Government. In reply, Dr. Tsiang accused Mr. Menon of "slander" and said that he was merely echoing "the propaganda themes of the Chinese Communists with the same disregard for truth and fact."

The Korean Problem.

By 57 votes to eight (the Soviet bloc), with nine abstentions, the Assembly approved on Jan. 11 a U.S. resolution which (*a*) reaffirmed the U.N. objective of "bringing about by peaceful means the establishment of a unified, independent and democratic Korea under a representative form of government, and the full restoration of international peace and security in the area"; (*b*) urged "continued efforts to achieve these objectives"; (*c*) called on the U.N. Commission for the Unification and Rehabilitation of Korea (UNCURK) "to continue its work in accordance with existing resolutions of the General Assembly"; and (*d*) asked that the Korean question should remain on the agenda of the Assembly's 12th session.

Two other resolutions on Korea were adopted without opposition: (1) a resolution expressing gratitude to India, Argentina and Brazil for helping to solve the problem of resettling former Korean and Chinese prisoners-of-war who did not wish to return to their homelands: and (2) a resolution commending the U.N. Korean Reconstruction Agency (UNKRA) for its assistance to the Korean people.

The U.S. resolution was adopted in the Political Committee by 57 votes to eight (the Soviet bloc) with 13 Afro-Asian countries abstaining, including India and Indonesia. Dr. Katz-Suchy (Poland), supported by M. Tsarapkin (U.S.S.R.), believed that UNCURK was no longer of any value and urged that a new international body should be set up to promote negotiations between North and South Korea with the aim of eventual unification. He also proposed a new international conference on Korea and an offer of economic assistance to both Korean Governments.

Mr. Krishna Menon, reporting on the 88 P.O.W.s who had chosen to go to India rather than be repatriated, stated that 55 had since decided to go to Brazil, 11 to Argentina, and nine to Mexico; of the remainder, six had elected to stay in India, five had chosen repatriation to North Korea, and two had asked for repatriation to Communist China.

In addition to the subjects mentioned above, the General Assembly adopted a large number of other resolutions, the most important of which are summarized briefly below:

South-West Africa.

For the tenth year in succession the Assembly passed a series of resolutions (by 74 votes to nil, with 16 abstentions) calling for South-West Africa to be placed under U.N. trusteeship. The South African Government was asked to take action on recommendations for progressive self-rule, universal representation, revision of the land settlement policy, repeal of discriminatory racial legislation, and elimination of restrictions on movement, while the U.N. Secretary-General was requested to explore "ways and means" for a solution of the territory's international status and to report to the Assembly "at his earliest convenience."

The South African delegation was absent during the debate on South-West Africa.

Non-self-governing Territories.

By 65 votes to 3, with 3 abstentions, the Secretary-General was asked to prepare for the 12th session, in collaboration with the specialized agencies, a report on economic, social and educational progress in non-self-governing territories since the establishment of the United Nations.

The resolution to this effect (sponsored by Burma, Chile, Cuba, Ecuador, Egypt, El Salvador, Ethiopia, Liberia, and Yugoslavia) was adopted in the Trusteeship Committee by 58 votes to one (Belgium), with Australia, France, Pakistan and the United Kingdom abstaining.

Trust Territories.

Member-countries administering Trust Territories were asked (by 45 votes to 14, with 16 abstentions) to take measures to achieve "self-government or independence at an early date" for Tanganyika, the British and French Cameroons, and Ruanda-Urundi, and to estimate the time required for those territories to gain such status. The British Government was also asked (47 votes to 15, with 11 abstentions) to state its future policy in Tanganyika, while France was asked (46 votes to 9, with 10 abstentions) to "restore political activity" in the French Cameroons to "normal conditions" and to end political tensions in that territory.

The resolution, presented in the Trusteeship Committee by the U.S.S.R. and subsequently amended in certain respects, was adopted by 44 votes to 14, with 17 abstentions. With the exception of Italy, which abstained, all countries administering Trust Territories (Britain, France, Belgium, Australia, New Zealand, and the U.S.A.) opposed the resolutions both in committee and in the full Assembly. [Italy administers the Trust Territory of Somalia, which is due to become independent in 1960.]

Disarmament.

The Disarmament Commission was unanimously requested to reconvene its sub-committee (the "London sub-committee") at an early date so that it could give "prompt attention" to the various proposals on disarmament and present a progress report to the Commission not later than Aug. 1, 1957. The Commission was also asked to consider the advisability of recommending a special Assembly session on disarmament or a general conference "at the appropriate time."

The sub-committee comprises the five major Powers administering nuclear resources—the U.S.A., Great Britain, France, the U.S.S.R. and Canada. The proposals it was asked to study included President Eisenhower's plan for aerial inspection (the "open skies" plan) and exchange of military blueprints; the Soviet plan for ground inspection posts; a request by Canada, Japan and Norway (made jointly during the Assembly session) for advance registration of all nuclear weapon tests with the United Nations; and a U.S. suggestion that inter-continental guided missiles should be included in a future arms-control programme.

Under-developed Countries.

The establishment of a Special U.N. Fund for Economic Development (SUNFED), considered at the last session, was again postponed but the Assembly unanimously asked for a special committee to examine the legal framework for the projected Fund, so as to spur economic development in the under-developed countries. By 63 votes to nil, with nine abstentions, the Secretary-General was requested to complete, as quickly as practicable, studies of taxation of foreign investments, particularly those made in under-developed areas.

World Food Reserve.

By 47 votes to eight, with seven abstentions, the Assembly asked the Secretary-General to explore the possibilities of carrying out findings of the U.N. Food and Agriculture Organization recommending the establishment of a World Food Reserve. Dr. Hammarskjold was also unanimously requested to study the prospect of utilizing surplus foodstuffs to build up national reserves to be used in accordance with internationally agreed principles.

Human Rights.

The Assembly decided that its work on two draft covenants on Human Rights should be completed, if possible, for adoption at the next session. [The draft covenants were submitted in 1954 by the Human Rights Commission, one dealing with economic, social and cultural rights, and the other with civil and political rights.] Discussion of proposals to establish commissions on political self-determination was postponed until the next session.

In addition, the Assembly "took note" of a report by Dr. Hammarskjöld that 18 countries had expressed their willingness to attend an international conference to prepare a convention for reducing or eliminating Statelessness. The Assembly had decided in 1954 to convene such a conference if 20 countries agreed to participate.

Convention on Nationality of Married Women.

By 48 votes to two (Egypt and Syria), with 24 abstentions (including the U.S.A.), the Assembly approved an international convention on the status of married women, drawn up under U.N. auspices. This convention, which had been in preparation for five years, consists of 11 Articles, the first of which asserts that neither the contracting nor the dissolution of a marriage between a national and an alien in the contracting States shall automatically affect the nationality of the wife. The convention is based on Article 15 of the Declaration of Human Rights, which proclaims that "everyone has a right to nationality" and that "no-one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality."

U.N. Budget. - Technical Assistance Fund.

A record Budget of $50,815,700 for 1957 was approved by 63 votes to eight (the Soviet bloc) with six abstentions. The Assembly also authorized, against the votes of the Soviet bloc, a supplementary increase of the 1956 Budget from $48,566,350 to $50,683,350 to cover the costs of the two emergency sessions held in the autumn as a result of the crises in the Middle East and Hungary. A "ceiling" of $16,500,000 was authorized for the expenses of the U.N. Emergency Force in the Middle East (UNEF), the Soviet bloc opposing.

A record allocation of $30,127,600 was made for the Technical Assistance Programme for 1957.

Election to International Court.

Dr. V. K. Wellington Koo (Nationalist China) was elected a judge of the International Court of Justice in succession to his fellow-countryman, Judge Hsu Mo, who had died at The Hague in June 1956. Dr. Koo will serve on the International Court for the unexpired term of his predecessor—until Feb. 5, 1958.

The election was postponed from Dec. 11 (when the General Assembly and the Security Council were unable to choose between Dr. Koo and Mr. Shigeru Kuriyama, of Japan) to Jan. 11, when Dr. Koo obtained eight votes in the Security Council against three for Mr. Kuriyama, and 42 votes in the General Assembly against 36 for Mr. Kuriyama and one for Dr. Claro Recto (Philippines). The U.N. Charter provides that the Assembly and the Security Council, meeting separately but concurrently, shall elect judges of the International Court by secret ballot.

Credentials of Hungarian Delegation.

By eight votes to one, the Assembly's Credentials Committee adopted on Feb. 12 a U.S. proposal that no action should be taken on the credentials of the Hungarian delegation at the United Nations. The decision did not imply the expulsion of the Kadar Government's delegation but meant that approval of its credentials was witheld - a decision which had little practical effect since the Hungarian delegation had walked out of the General Assembly on Dec. 11.

Other actions taken by the Assembly included the following: (*a*) a request that its Advisory Committee on the Peaceful Uses of Atomic Energy should negotiate an agreement with the International Atomic Energy Authority on the relationship between that body and the United Nations; (*b*) a call for continued efforts to solve the problems of European refugees through "voluntary repatriation, resettlement and integration," together with an appeal for contributions to the U.N. High Commissioner's Office for Refugees; (*c*) adoption of a Latin American resolution increasing the size of the International Law Commission from 15 to 21 members so as to obtain "an adequate representation of the main forms of civilization and of the principal legal systems of the world"; and (*d*) approval of a proposal for a conference in March 1958 to examine the Law of the Sea, the venue to be either Rome or Geneva at the discretion of the Secretary-General. The last conference on this subject was held at The Hague in 1930. (U.N. Information Centre, London - United Nations Review - New York Times - New York Herald Tribune - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Tenth Assembly Session, 14667 A; 14637 A; 14461 A.)**

A. FRANCE - WESTERN GERMANY. — Inaugural Meeting of Franco-German Cultural Commission.

The first meeting of the Franco-German cultural commission, set up under the La Celle-Saint-Cloud agreements of October 1954 between M. Mendès-France and Dr. Adenauer, was held in Bonn on March 25-26.

It was announced that the commission had agreed on the restitution to the Federal Republic as from November 1, 1957, of the Goethe House in Paris, which would be used again for German cultural purposes. [France maintains 17 French Institutes in Western Germany.] In addition, a German high school would be set up in Paris for the education both of the children of German residents and of young Frenchmen, on the lines of the French high school in Berlin - an institution founded 200 years ago, and one of the leading educational institutions in the former German capital. Other questions discussed included the possibility of mutual recognition of higher degrees and diplomas; the study of the French language in German high schools, which since 1955 had been given second place to English; and greater exchanges of research workers and scientists.

The French delegation was led by M. François-Poncet, the former French Ambassador to Germany, and the German delegation by Professor Gerhard Hess, Rector of Heidelberg University.—(Le Monde - Frankfurter Allgemeine Zeitung) **(Prev. rep. 14390 B.)**

B. NETHERLANDS. — Revised Agreement on Use of U.S. Counterpart Funds. - New Projects.

Under an agreement concluded in April, the U.S. and Netherlands Governments arranged for changes in the use of the counterpart funds which had been accumulated out of U.S. economic aid to Holland between 1948 and 1953.

Under the new agreement certain new projects considered to be of greater importance were substituted for others which had been previously agreed upon, but it was stated that no additional dollar aid would be involved. The new projects were:—reinforcement of dykes—30,000,000 guilders; works for the "Delta Plan" (see 14292 A), 40,000,000 guilders; road construction under the European Roads Plan, 30,000,000 guilders; a tunnel under the North Sea Canal near Velsen, 10,784,000 guilders; and works for the final recovery of Walcheren Island, 5,000,000 guilders.

The Netherlands Finance Ministry added that the total of counterpart funds, upon the use of which agreement had been reached, amounted to 863,585,000 guilders ($111,803,500). (Netherlands News Agency) **(Prev. rep. U.S. Aid, 14442 B; Counterpart Funds, 15164 C.)**

C. ISRAEL - UNITED KINGDOM. — Convention on Reciprocal Social Security Benefits.

A convention was signed in London on April 29 by the U.K. Minister of State for Foreign Affairs (Commander Noble) and the Israeli Ambassador (Mr. Elath) providing that nationals of either country living in the other would be eligible for the social security benefits of the country concerned—e.g. medical treatment, industrial injury awards, widow's benefits, death benefits, etc. The convention was the first of its kind concluded by Britain with a non-European or non-Commonwealth country.—(Times - Manchester Guardian) **(15398 C.)**

D. UNITED KINGDOM. — Setback in Condition of Sir Anthony Eden. - Successful Operation in Boston Hospital for Relief of Bile-duct Obstruction.

Sir Anthony Eden, who had been convalescing for five weeks in New Zealand, was flown to the United States on April 4 to undergo a thorough medical examination at the New England Baptist Hospital, Boston, by Dr. Richard Cattell (of the Lahey Clinic), the surgeon who operated on him in 1953 for gall-bladder trouble. During his convalescence in New Zealand Sir Anthony had had a number of feverish attacks of increasing frequency and severity, and on April 2 a medical bulletin had been issued in Auckland stating that there was "increasing evidence of bile-duct trouble and signs of early jaundice which require investigation without delay." Sir Anthony accordingly had to cancel his proposed visit to Australia, and, accompanied by Lady Eden, was flown to Boston, where he entered hospital.

A successful operation was performed on Sir Anthony on April 13 by Dr. Cattell in the presence of Sir Horace Evans (Sir Anthony's physician), who had flown from London at Dr. Cattell's invitation. A bulletin was subsequently issued stating that Sir Anthony had undergone an operation for relief of bile-duct obstruction, that the site of the obstruction had been found in the right hepatic duct, and that the constricted area was dilated, this condition having caused the attacks of fever. The bulletin added that the tube inserted at the operation in 1953 had passed "as so often occurs," that it had not been found necessary to insert a new tube, and that there was no inflammation of the colon and no malignancy.

Dr. James Fish (administrator of the Lahey Clinic) explained that a small Y-shaped tube placed in the bile-duct when Dr. Cattell operated in 1953 had been eliminated, probably passing through Sir Anthony's body without his knowing it. Dr. Cattell and Sir Horace Evans expressed their satisfaction at the result of the operation and the manner in which Sir Anthony had stood it, the former saying that there was "a reasonable prospect of complete relief."

Sir Anthony Eden made a good recovery from his operation - the fourth undergone by him since 1953 - and left hospital on April 29. It was announced that he and Lady Eden would shortly visit Ottawa as the guests of the Governor-General of Canada, Mr. Vincent Massey. (Times - New York Times) **(Prev. rep. 15327 C.)**

E. ASIA. — First Session of Asian Legal Consultative Committee. - Mr. Nehru's Denunciation of Nuclear Tests and "Cold War."

The Asian Legal Consultative Committee opened its first session at New Delhi on April 18, the countries represented being Burma, Ceylon, India, Indonesia, Iraq, Japan, and Syria.

Addressing the opening session, Mr. Nehru (the Indian Prime Minister) asked the Committee to give its unbiased opinion as to whether any country had "the right under international or moral law to poison the earth's atmosphere through test explosions of nuclear weapons which might endanger human existence." He also suggested consideration of the "present-day concepts governing international relationships between different nations," which, he said, had led to the revival of the 19th-century "holy alliances" and to a "state of suspended belligerency known as the cold war." After asking the Committee to examine whether this development was in keeping with international law, whose purpose should be to settle problems and disputes by methods other than war, he reiterated his conviction that the five principles of *Panch Sila* could alone establish healthy international relationships.

On April 24 the Committee adopted its rules of procedure, including the admission of new members and observers at its sessions.—(The Statesman, Calcutta) **(Prev. rep. 15229 D.)**

F. INDIA. — First Meeting of Northern Zone Council.

The Northern Zone Council constituted under the Reorganization of States legislation held its first meeting in New Delhi on April 23 under the chairmanship of Pandit Pant, the Home Minister. The areas represented on the Council are the States of Punjab, Rajasthan, and Jammu and Kashmir [i.e. the Indian-held areas of Kashmir] and the Centrally-administered territories of Delhi and Himachal Pradesh.

The Council decided that its headquarters should be located in Delhi, and that its next meetings should be held in rotation in Kashmir, the Punjab, and Rajasthan. Among questions discussed by the Council were the setting-up of a committee to study manpower planning; inter-State irrigation; and road transport problems.

The States constituting the Northern Zone have a total population of about 39,000,000 and cover an area of nearly 284,000 sq. miles.—(Indian High Commissioner's Office, London) **(Prev. rep. States Reorganization, 15172 A.)**

A. FRENCH TOGOLAND AND CAMEROONS. — New Status of French Togoland as Autonomous Republic within French Union. - Formation of Togolese Cabinet. - Togoland Plebiscite. - Self-Government for French Cameroons. - Elections to Cameroonian Assembly.

The Territorial Assembly of French Togoland, meeting at Lomé on Aug. 14, 1956, approved (subject to a number of amendments) a new statute conferring self-government on the territory within the French Union. The statute, which was drawn up by the French Government and published at the beginning of August, provided (1) that Togoland would have home rule in all spheres except foreign relations, defence, currency, and internal security, which would remain the responsibility of France; (2) for the creation of a Legislative Assembly, elected by universal suffrage, which would choose a Prime Minister who in turn would select a Cabinet of eight Ministers with the approval of the Governor or High Commissioner; (3) for equal rights for all inhabitants of the territory, whether Togolese or French; (4) for continued Togolese representation in the French National Assembly, the Council of the Republic, and the Assembly of the French Union. It also provided for a plebiscite to be held in October 1956 to enable the territory's inhabitants to decide whether they wished Togoland to become a self-governing territory within the French Union or to retain its existing status as a U.N. trust territory administered by France.

All the amendments proposed by the Territorial Assembly were accepted by the French Government on Aug. 24, when the statute came formally into effect. The most important of these amendments provided (1) that Togoland would have the status of an autonomous republic within the French Union; (2) that the French Government would be represented by a High Commissioner and not, as hitherto, by a Governor; and (3) that the future Togolese Prime Minister and Cabinet would have control of local administration and internal security in conjunction with the High Commissioner—thus representing a concession by France, since the original draft had envisaged internal security as a "reserved" subject.

The Territorial Assembly in Lomé, meeting on Sept. 10 as the territory's first Legislative Assembly, requested M. Nicholas Grunitzky—the leader of the Togolese Progress Party (*Parti togolais du progrès*)—to become the first Prime Minister of Togoland and to form a Cabinet in accordance with the statute. In accepting this task, M. Grunitzky said that the principal aims of his Government would be to raise the standard of living, to promote economic, social and educational reforms, and to offer more responsible positions to suitably qualified Africans. He appealed to French officials to remain in Togoland and help to build up an efficient administration.

M. Grunitzky (44), who is of German-African parentage, had represented French Togoland in the French National Assembly since 1951, and was president of the former Territorial Assembly of French Togoland. His party is the largest in the new Legislative Assembly and the most important political group in French Togoland.

The first Cabinet of the Republic of Togoland was formed by M. Grunitzky on Sept. 16, comprising three representatives of the *Parti togolais du progrès*, three representatives of the Chiefs' Organization, and two French officials. M. Grunitzky took the portfolio of the Interior in addition to the Premiership, and, jointly with the French High Commissioner, will also be responsible for Justice. The other seven portfolios were for Public Works, Finance, Economy and Development, Commerce and Industry, Public Health, Labour and Social Welfare, and Information. Under the statute, External Relations and Defence remain the responsibility of the High Commissioner.

The referendum in French Togoland, though boycotted by the Opposition parties, passed off without incident on Oct. 28, 1956, when a majority of the 437,000 electors (varying from about 62 per cent in the south to 80 per cent in the north) approved the new status of the territory as an autonomous republic within the French Union, and the consequent abolition of the former trusteeship status.

The Opposition groups in French Togoland—the *Comité de l'unité togolaise, Mouvement populaire togolais*, and various other organizations—issued a statement on Sept. 30 alleging that the plebiscite would result in a "fraudulent manipulation" of public opinion and would not be conducted with sufficient impartiality to reflect the true state of public opinion. Cables were sent to the United Nations and the French Government repeating these allegations and alleging that a Constitution was being "imposed" on the Togolese people in contravention of the trusteeship agreement.

The principal opposition to the new status of French Togoland came from the Ewe tribe in the south, large numbers of whom also live across the international boundary in British Togoland. Fearing that the tribe would be irrevocably split by the new status of French Togoland, the Ewes of that territory voted against the French statute just as the Ewes of British Togoland had voted against the incorporation of their territory in the Gold Coast (Ghana). Both in French and British Togoland the Ewes have for some years past urged a union of the two Togolands.

[As stated on page 15508, second column, the U.N. General Assembly withheld recognition of the new status of French Togoland because the plebiscite in that territory—unlike the earlier plebiscite in British Togoland—had not been held under the auspices of the United Nations.]

Elections in French Cameroons. - New Statute.

Elections were held on Dec. 23, 1956, in the French Cameroons (a trust territory) for a new Territorial Assembly with wider powers than the former Assembly, and with 20 more members (70, instead of 50 as hitherto). It was stated in Paris and Yaoundé (the Cameroonian capital) that the new Assembly would discuss the future constitutional status of the territory with the French Government. The programmes of the various parties ranged from immediate independence and unification with the British Cameroons to continued co-operation with France and the maintenance of the existing trusteeship status.

Prior to the elections, the French National Assembly had voted an amnesty law on Dec 11 for all persons who had been implicated in a series of riots, centred in Duala, which occurred in May 1955 and were instigated by the Communist-led *Unions des populations camerounaises* (U.P C.). This organization was dissolved three months after the riots and its principal leaders fled to the British Cameroons. During 1956, however, a number of U.P C. leaders had been released from detention, surveillance of members of the organization had been relaxed, and the French Government had decided to introduce the above-mentioned amnesty law as a measure of reconciliation. In a report to the French National Assembly, the *rapporteur* of its Justice Commission announced that out of 778 persons arrested or sought as a result of the events of May 1955, 456 had been freed, 166 had fled the territory, 116 had been imprisoned after being found guilty on various charges, and 30 were still awaiting trial.

Nationalist disturbances in the week preceding the elections —including cases of arson and sabotage to road and rail communications—led to two platoons of French paratroops being dropped at Eseka airport (50 miles south-west of Yaoundé) on Dec. 21 to maintain order and prevent a recurrence of such incidents. The elections themselves, however, took place in a peaceful atmosphere and resulted in a large majority for the moderate elements and a corresponding setback for the more extreme groups—the most important of which, the *Union Nationale*, had demanded immediate independence for the Cameroons.

African and European electors of both sexes voted for the first time on a single electoral roll, 320 candidatures being presented for the 70 seats in the enlarged Assembly. Sixty-two African and eight European candidates were elected, about 55 per cent (942,268) of the total electorate of 1,752,904 voting for "moderate" parties and candidates. Eight candidates were returned for the *Union Nationale* led by M. Soppo Priso, the chairman of the former Assembly. The left-wing U.P.C. had been banned after the disturbances of May 1955 and took no part in the elections. The 28 Northern councillors in the new Assembly, mostly representing the traditional Fullani chiefs, claim a separate Assembly for the predominantly Moslem areas of the Northern Cameroons.

A draft statute introducing self-government for the Cameroons within the French Union was approved by the French Cabinet on Jan. 23, 1957 and adopted by the Cameroon Territorial Assembly on Feb. 23 with a number of amendments. The voting was 59 in favour and eight against, the opposing votes being cast by the *Union Nationale*. The statute was broadly similar to that for French Togoland except that, unlike the latter, it made no alteration in the trusteeship status of the territory.—(Le Monde - Le Figaro) **(Prev. rep. British Togoland Plebiscite, 14898 C; 14868 B.)**

B. NORWAY. — Discovery of Extensive Copper Deposits in Finnmark.

The discovery of large deposits of copper on the Reppar Fjord in Finnmark (the northernmost province of Norway) was announced during April. It was stated that a group of U.S. and Canadian financiers would invest 70,000,000 kroner (£3,500,000) in exploiting the field; that a mine would be constructed, and also a refinery plant for turning out pure copper; and that an annual production of 20,000 tons of copper was anticipated. The copper field is at present under Swedish ownership but has not been worked for over 50 years. (Aftenposten, Oslo)

A. ARGENTINA. — Ministerial Resignations. - New Ministers of Air, Finance, and Trade and Industry. - Announcement of Dates for Elections. - Suppression of Peronista Plot. - Escape of Imprisoned Peronista Leaders. - Warnings on Economic Situation by President Aramburu and Dr. Verrier. - Rejection of "Verrier Plan." - U.S. Credits for Argentina.

Three members of the Argentine Government resigned during March for varying reasons: (1) Commodore Julio C. Krause, Minister of Air and a member of the Military Revolutionary Council (the *junta* at present governing Argentina), on March 30; (2) Dr. Roberto Verrier, the Minister of Finance, on March 25; and (3) Señor Rodolfo Martinez, the Minister of Trade and Industry, on March 9. They were succeeded respectively by Commodore Eduardo Macloughlin (Air), Dr. Adalberto Krieger Vasena (Finance), and Dr. Julio Cesar Cueto Rua (Trade and Industry).

Commodore Krause tendered his resignation a few hours after a broadcast by President Aramburu in which the latter had announced the dates for four important steps towards the restoration of democratic government in Argentina. These were: July 28—election of a Convention to reform the Constitution; Nov. 15—issue of a writ for general elections; Feb. 23, 1958—the holding of general elections; May 1, 1958—transfer of power to an elected Administration.

Commodore Krause protested against the postponement of the elections until February 1958, maintaining that it "compromised the honour of the armed forces" as General Aramburu had previously promised elections for the last quarter of 1957. He was supported in his attitude by other Air Force leaders, who threatened to withdraw the Air Force's participation in the Military Revolutionary Council. Eventually, however, the crisis was settled by the appointment of Commodore Macloughlin (a departmental head in the Air Ministry), who had been recommended by Commodore Krause himself and who, in addition to becoming Air Minister, also succeeded Commodore Krause as a member of the Military Revolutionary Council.

[It was reported in the British and U.S. press that Commodore Krause was supporting the views of Dr. Arturo Frondizi, the Radical Party leader, who objected to President Aramburu's plan to call a Convention for the reform of the Constitution before the holding of general elections, and who urged that constitutional reform should not be undertaken until an elected Government had assumed office.]

Dr. Verrier resigned from the Finance Ministry because his plans for stabilizing the Argentine economy (see below) had met with opposition both from other Ministers and from the political parties supporting the Government.

Señor Martinez resigned after a Radical newspaper had published five letters strongly criticizing him which had been sent to President Aramburu by Rear-Admiral Rial, Under-Secretary at the Ministry of Marine. Rear-Admiral Rial also resigned subsequently after having been sentenced by the Minister of Marine to 30 days' arrest for failure to ensure the inviolability of correspondence on State affairs. [It was commented in the foreign press that no action was taken against Rear-Admiral Rial for writing these letters, the conclusion being drawn that officers of the armed forces were apparently obliged to report to the President on the conduct of civilian Ministers.]

Economic and Financial Position. - The Verrier Plan. - Dr. Krieger Vasena's Policy Statement.

The grave economic situation of Argentina had been underlined in statements made by President Aramburu and Dr. Verrier on March 20, a few days before Dr. Verrier's resignation.

President Aramburu said that the facts of Argentina's economic and financial plight were "evident to all." Although the country had enormous potential wealth, it was at present "decapitalized" and "disastrously badly equipped"; it was in debt, its output was low and of poor quality, its transport system old-fashioned, its road network insufficient, and there was a shortage of electric power. The responsibility for this situation, the President declared, lay largely with those "who believe that the supreme social achievement is well-remunerated idleness," but also with those capitalists who had "not always shown an understanding of the problems or a willingness to co-operate."

Dr Verrier pointed out that the gravity of the situation was particularly reflected in the balance of international payments and the national finances. In 1956 there had been a deficit with the dollar area of U.S. $250,000,000, only partially offset by a surplus of $40,000,000 with other monetary areas. The gold and free exchange reserves with which the dollar deficit would have to be covered had amounted to $237,000,000 at the end of 1956, and at the end of 1957 would be wholly used up. With foreign currency reserves exhausted, it would be impossible to import fuel and raw materials; the country would be helpless to deal with an emergency such as crop failure; foreign confidence would be lost; and foreign capital investments and the granting of credits curtailed. Part of the balance-of-payments deficit, Dr. Verrier explained, was due to the Suez crisis, which had raised the cost of oil imports by $100,000,000, while the maize crop had been ruined by drought with a resultant loss of $60,000,000 in foreign exchange earnings.

The internal problem, he went on, was even worse than the balance of payments. State expenditure in 1957 was estimated at 60,000,000,000 pesos against an ordinary revenue of only 33,000,000,000 pesos, with a possible additional 10,000,000,000 pesos from the sale of bonds. Even if non-essential public works were suspended, there would still be a deficit of 14,000,000,000 pesos.

Dr. Verrier maintained that as the "Prebisch plan" (see 14553 A) had not been carried out in full, it could not succeed. It had been hampered by a social policy of large wage increases involving excessive retroactive payments, while other factors contributing to Argentina's economic difficulties were the earlier policy of creating industries which could not compete with free imports without protection, and the existence of rigid labour regulations which seriously diminished productivity.

To overcome this situation, Dr. Verrier—a strong advocate of private enterprise and traditional orthodox finance—had put forward a number of drastic proposals, the main points of which (published after his resignation) were as follows:

(1) Liberation of the importation of machinery and other capital goods through the free exchange market.
(2) Measures to reduce the dollar deficit in the official exchange market.
(3) Immediate suppression of existing subsidies.
(4) Elimination of price controls in all branches of production where there was active competition.
(5) The extension for an additional year of collective wage agreements and measures for the rationalization of labour.
(6) Increase or adjustment of certain taxes such as those on motor-car imports, sales of luxury goods, luxury travel, lotteries, cinema tickets, and certain types of buildings and land.

The opposition to Dr. Verrier's plan was mainly based on the ground that it contemplated the simultaneous increase of prices and the freezing of wages, and would thus result in a sharp rise in the cost of living—which Dr. Verrier regarded as essential in order to achieve an ultimate fall in prices through reduced purchasing power and taxation.

In a statement on March 27 Dr. Krieger (the new Finance Minister) said that he would not submit a new plan but would apply the "Prebisch plan" with the modifications already adopted. His policy would involve austerity but no contraction of consumption, thus avoiding unemployment; what the country needed, he added, was an expansion of production and a gradual diminution of subsidies to achieve the necessary adjustments in the pattern of consumption. Dr. Krieger also said that all unnecessary public and private spending at home and overseas must be suppressed; that he would seek temporary foreign credits to prevent a further fall in the monetary reserves; and that he considered that the official exchange rate should not be modified.

Prevention of Peronista Plot. - Escape of Imprisoned Peronista Leaders to Chile.

It was officially announced on Feb. 27 that a Peronista counter-revolutionary plot with international implications had been frustrated and that a number of persons (known to have included six former generals and two admirals) had been arrested.

The plot, it was stated, had been planned in three stages, the first of which aimed at creating economic chaos, especially by bringing about conflicts in the trade union field. The second "terroristic" stage would have aimed at creating unrest and fear by means of a campaign of rumours, sabotage and terrorism, while the final "subversive" stage would have involved the provocation of a general strike, to be followed by "open subversive activities."

It was also alleged that there were five counter-revolutionary command headquarters abroad under the direct leadership of ex-President Perón (now in exile in Caracas, the Venezuelan capital), located respectively in Paraguay, Chile, Brazil, Bolivia, and Uruguay.

It was announced in Santiago on March 19 that the Chilean Government had ordered the preventive arrest of six Peronista leaders who had entered Chile the previous day after escaping from the Rio Gallegos prison in southern Argentina. The Chilean action was taken at the request of the Argentine Government, which had invoked the Inter-American Convention on Extradition signed at Montevideo in 1933.

The six Peronistas concerned were Señor Jorge Antonio, one of General Perón's closest associates; Señor Guillermo Patricio Kelly, the former head of the National Liberation Alliance (General Perón's personal bodyguard); Señor Campora, President of the Chamber of Deputies during the Perón regime; Señor John William Cooke, president of the Peronista Party; Señor José Gregorio Espejo, former head of the Peronista General Confederation of Labour; and Señor Pedro José Gomez, a former Peronista deputy. The arrest was also ordered of Señor Manuel Araujo (a friend of Señor Antonio), who was said to have driven the six others across the Argentine-Chilean border.

New Political Parties.

Four new political parties and groups were granted legal recognition in March. They were the National Committee of the Radical Party, under Dr. Frondizi; another Radical faction, the *Agrupación Intransigencia y Renovación*, led by Sr. Roberto Gabiche and opposed to Dr. Frondizi; the *Unión Republicana*; and the *Unión Cívica Nacionalista*.

[The split in the Radical Party (*Unión Cívica Radical*), which had already led to the formation of three other dissident Radical groups (see page 15378), had followed the election by the party congress in November 1956 of Dr. Frondizi as the party's candidate in the next presidential election.]

The Federal Court of Appeal reversed on Feb. 15 the ruling of Judge Botet, delivered on Nov. 13, 1956 (see 15377 A), which had deprived the Communist Party of legal recognition for electoral purposes. The Appeal Court held that the party had not been given a fair chance of stating its case during the previous hearing.

New Status of Central Bank.

A decree issued on Aug. 13, 1956, restored to the *Banco Central* much of the autonomy which it had enjoyed before its nationalization by President Perón in 1946.

It was laid down that the Bank was an autonomous State institution; that its liabilities would be guaranteed by the State; that it would carry out the Government's financial and economic policy; and that it would act as the Government's adviser and agent in internal and external credit operations and in the issue and servicing of public loans. The Bank would be authorized to fix its re-discount rates and interest rates on advances. [Under the Peronista regime the Central Bank had been merely a department of the Ministry of Finance.]

U.S. Credits to Argentina.

The U.S. Export-Import Bank and an Argentine financial mission visiting Washington announced on Sept. 17, 1956, that agreement had been reached on Export-Import Bank credits to Argentina of up to $100,000,000, which would be used for the modernization of Argentina's road, rail and sea transport systems.

The Argentine Minister of Trade and Industry (then Sr. Martinez) stated on Oct. 10, 1956, that U.S. firms supplying transport equipment had agreed to grant the Argentine Government credits amounting to $25,000,000, in addition to the Export-Import Bank loan of $100,000,000. He added that it had been decided to spend $100,000,000 on railway material, particularly locomotives, goods wagons, and signalling equipment. Of the remaining $25,000,000, a sum of $10,000,000 would be spent on the merchant fleet and ports, $10,000,000 on road-building equipment, and $5,000,000 on the modernization of urban transport.

The $100,000,000 loan from the Export-Import Bank was the second large credit extended by that institution to Argentina in recent years. A credit of $60,000,000 had been approved on March 10, 1955, to assist in financing U.S. exports of equipment, materials, and technical services to Argentina for the construction of a steel mill at San Nicolás, on the River Paraná. This credit was contracted under the Peronista regime and extended in March 1956 under the Lonardi Government. The mill, which is being built by the *Sociedad Mixta Siderurgia Argentina* (a semi-State corporation), is estimated to cost $258,000,000 and is eventually expected to produce 588,000 metric tons of steel ingots annually.

Argentine Foreign Trade in 1956.

Figures released in Buenos Aires on Feb. 3 showed that the unfavourable balance in Argentina's foreign trade had dropped from U.S. $244,400,000 in 1955 to $202,500,000 in 1956. Imports in 1956 totalled $1,113,400,000 ($1,172,500,000 in 1955), while exports amounted to $910,900,000 ($928,100,000 in 1955). As regards U.K.-Argentine trade, official British figures revealed that in 1956 there had been an unfavourable balance against the U.K. of £74,904,000.

Foreign Investments.

Statistics recently issued by the Argentine *Banco Central* showed that the total of foreign investments in Argentina on Dec. 31, 1955, was 17,500,000,000 pesos. The chief sources of capital were: U.S.A.—5,751,000,000 pesos; Great Britain—4,007,000,000 pesos; Belgium—1,867,000,000 pesos; Switzerland—1,684,000,000 pesos; and France—1,312,000,000 pesos. Of the total amount, 42 per cent was invested in industry, 17 per cent in public utilities, and 17 per cent in commercial firms. (Bank of London and South America, Fortnightly Review - Times - Daily Telegraph - New York Times - Financial Times)

(Prev. rep. 15377 A; 15021 A.)

A. CHESS. — New World Champion.

Mikhail Botvinnik, the Soviet chessmaster who had been world champion since 1948, lost the title on April 28 to his fellow-countryman Vassily Smyslov, at the end of 22 games played in Moscow. Six of the 22 matches were won by Smyslov and three by Botvinnik, with 13 drawn. Smyslov became the seventh recognized world chess champion, his predecessors being Wilhelm Steinitz, Dr. Lasker, Señor Capablanca, Dr. Max Euwe, Dr. Alekhine, and Botvinnik.—(Times)

(Prev. rep. 9307 B.)

B. UNITED KINGDOM. — Membership of Committee of Inquiry into Working of Monetary System.

The membership of the committee which, under the chairmanship of Lord Radcliffe, will inquire into the working of the monetary and credit system was announced on May 3 by the Chancellor of the Exchequer (Mr. Thorneycroft), who had announced his intention of setting up such a committee in his Budget speech (see page 15484, second column). In addition to Lord Radcliffe, the members are:

Professor A. K. Cairncross, Professor of Applied Economics in the University of Glasgow and formerly economic adviser to the O.E.E.C.; Sir Oliver Franks, chairman of Lloyds Bank Ltd. and formerly Ambassador in Washington (1948-52); Lord Harcourt, a managing director of Morgan Grenfell and Co. Ltd., formerly U.K. Financial Adviser and Economic Minister in Washington and U.K. Executive Director of the International Bank and the International Monetary Fund; Mr. W. E. Jones, president of the National Union of Mineworkers; Professor R. S. Sayers, Sir Ernest Cassel Professor of Economics in the University of London, formerly economic adviser to the Cabinet Office (1945-47); Sir Reginald Verdon-Smith, chairman and joint managing director of the Bristol Aeroplane Co. Ltd., and a member of the Economic Planning Board; Mr. George Woodcock, assistant general secretary of the T.U.C. and formerly secretary to the T.U.C. Research and Economic Department; and Sir John Woods, formerly Permanent Secretary to the Board of Trade and now a director of the English Electric Co. Ltd. and other companies.

The committee consists of four businessmen, two economists and two trade union leaders.—(Times - Daily Telegraph)

(Prev. rep. 15481 A.)

C. CANADA. — Repayment of Government Advances to Trans-Canada Pipe Lines Ltd.

The Canadian Minister of Trade and Commerce, Mr. C. D. Howe, announced at the beginning of March that all advances made by the Northern Ontario Pipe Line Crown Corporation to Trans-Canada Pipe Lines Ltd. to finance the construction of the western section of the all-Canadian natural gas pipeline had been repaid.

Mr. Howe stated that although, under the provisions of the Northern Ontario Pipe Line Crown Corporation Act, the Corporation had been authorized to make loans to Trans-Canada Pipe Lines of 90 per cent of the cost of construction of the western section, or $80,000,000, whichever was less, the actual advances made had amounted only to $49,750,000. This sum, together with five per cent interest and costs, had now been fully repaid—a total of $50,716,603.

The Northern Ontario Pipe Line Crown Corporation, in addition to administering the loan to Trans-Canada Pipe Lines Ltd. for building the Western section of the gas pipeline, is also responsible for the construction of the Northern Ontario section, which will extend from the Manitoba-Ontario border to the vicinity of Kapuskasing (Ontario), a distance of 675 miles.—(Canadian Department of External Affairs, Ottawa)

(Prev. rep. 15067 A.)

D. SPAIN. — New Exchange Rate System. - Adjustment of Peseta Rates.

It was announced in Madrid on April 6 that the Government had decided to abolish the special multiple exchange rates for exports and imports which had been in force since December 1948, and to "modify and unify" the existing peseta rates. New Government-controlled "free" exchange rates were announced on April 9, the sterling rate being increased from 109.06 to 117.60 pesetas to the pound and the dollar rate from 38.95 to 42.00 pesetas to the dollar. Similar adjustments were made for other currencies. The new rates will not only benefit Spanish exports but also foreign tourists, although they are below the peseta rates on the free markets in Tangier and Switzerland, where the peseta had been fluctuating around 139 to the pound or 50 to the dollar.—(Financial Times - Bank of London and South America, Fortnightly Review)

(Prev. rep. 9720 B; 9758 E.)

E. CHILE. — Extension of I.M.F. and U.S. Exchange Stabilization Credits.

It was announced in Santiago and Washington on April 1 that the one-year "stand-by" arrangement with the International Monetary Fund, under which Chile could purchase up to $35,000,000 from the Fund in support of her programme of exchange reform and economic stabilization, had been extended for a further year—i.e. to March 31, 1958. It was stated that no drawing had been made by Chile during the first year of the arrangement.

As from the same date the U.S. Treasury credit of $10,000,000 and the $30,000,000 credit granted to Chile by eight leading U.S. banks for currency stabilization purposes were also renewed for a furtner year.—(International Monetary Fund, Washington - New York Times) **(Prev. rep. 14875 B.)**

A. INDONESIA. — Cabinet of Experts selected by President Sukarno. - Dr. Djuanda becomes Prime Minister. - Discussions with Sumatran Military Commanders. - Conference of Territorial Commanders. - Mr. Abdulgani found Guilty of Violation of Foreign Exchange Regulations.

Following the resignation of Dr. Sastroamidjojo's Cabinet, President Sukarno called on Mr. Suwirjo, chairman of the Nationalist Party, on March 15 to form a new Cabinet which would be capable of taking "decisive action" and of setting up a National Council, in accordance with the President's proposals of Feb. 21. Mr. Suwirjo accordingly opened negotiations with the party leaders with a view to forming a coalition of which the Nationalist Party and the Moslem *Nahdlatul-'Ulama* would constitute the nucleus. He was unable to do so, however, as the *Nahdlatul-'Ulama* demanded that the *Masjumi* should also be represented and the Communists excluded, whilst the Communist Party insisted that if the *Masjumi* were included the Cabinet should also contain Communist representatives.

In view of Mr. Suwirjo's failure to form a Government which could command a parliamentary majority, President Sukarno asked him on March 26 to form a Cabinet of experts within a week. After further discussions, Mr. Suwirjo proposed that five portfolios should be assigned to the *Nahdlatul-'Ulama* and two to the *Masjumi*; that the Communists should be excluded; but that Professor Prijono (Dean of the Faculty of Literature in the University of Indonesia and a Stalin prize-winner) and Dr. Sadjarwo (leader of the Indonesian Peasants' party)—both of whom the Moslem parties regarded as Communist sympathizers—should be included. The *Masjumi*, however, refused to accept the portfolios of Health and Education which had been offered to it, and the United Moslem Party (PSII) demanded the portfolio of Education. In view of these difficulties, Mr. Suwirjo abandoned his attempt to form a Government on April 2.

President Sukarno announced on April 4 that he would himself select an "emergency extra-parliamentary Cabinet of experts," its membership being announced on April 8 as follows:

Dr. Djuanda (non-party) ..	Prime Minister and Defence (*ad interim*).
Dr. Hardi (Nationalist) ..	First Vice-Premier.
Mr. Idham Chalid (*Nahdlatul-'Ulama*)	Second Vice-Premier.
Dr. Subandrio (non-party) ..	Foreign Affairs.
Mr. Sanusi Hardjadinata (Nationalist)	Home Affairs.
Mr. G. A. Maengkom (non-party)	Justice.
Dr. Sutikno Slamet (Nationalist)	Finance.
Dr. Ingkiriwang (non-party) ..	Industries.
Professor Sunardjo (*Nahdlatul-'Ulama*)	Trade and Commerce.
Mr. Sudibjo (PSII)	Information.
Dr. Sadjarwo (Indonesian Peasants' Party)	Agriculture.
Colonel Nazir (non-party) ..	Shipping.
Dr. Pangeran Noor (*Masjumi*)	Public Works.
Dr. Samjono (non-party) ..	Labour.
Colonel Dr. Abdul Aziz Saleh (non-party)	Health.
Kyahi Hadji Iljas (*Nahdlatul-'Ulama*)	Religious Affairs.
Professor Prijono (non-party) ..	Education.
Dr. Sunarjo (*Nahdlatul-'Ulama*)	Agrarian Affairs.
Dr. Sukardan (non-party) ..	Communications.
Mr. A. M. Hanafi (People's Congress)	Minister of State for Development.
Mr. Chairul Saleh (1945 "Revolutionary Generation") ..	Minister of State for Veterans' Affairs.
Dr. F. L. Tobing (Indonesian People's Union)	Inter-Regional Relations.
Dr. J. Leimena (Christian Party)	Social Affairs.

Dr. Djuanda (45), the new Prime Minister, was Minister of State for Planning in Dr. Sastromaidjojo's Cabinet, in which Dr. Sunarjo was Home Minister. Mr. Chalid, Mr. Sudibjo, Dr. Noor, and Mr. Iljas held the same posts as in the new Ministry. Among the "expert" members of the Government, Dr. Subandrio was Secretary-General of the Foreign Ministry; Mr. Hardjadinata was Governor of West Java; Dr. Slamet is a director of the International Bank; Colonel Nazir was Commander of the Surabaya Naval Base; Colonel Saleh was head of the Military Health Service; and Dr. Sukardan was Director-General of Posts and Telegraphs.

The new Ministry (which was reported to have been selected by President Sukarno partly from persons recommended by the Army leaders) was warmly welcomed by the Nationalist press but was criticized on constitutional grounds by Dr. Hatta, the former Vice-President, and by the *Masjumi*, which announced on April 9 that it had expelled Dr. Noor for accepting office. The PSII also issued a statement prohibiting its members from joining the Cabinet or the proposed National Council.

At a press conference on April 20, President Sukarno stated that the new Government's foreign policy would be based on co-operation with all countries, regardless of their political and social systems; continuance of the "struggle against colonialism" and for the return of Western New Guinea; and the maintenance of an independent line in the "international ideological struggle." Referring to his plan for a National Council, he said that political activities should not yield material profit to a small group of people while being injurious to the interests of the country as a whole, and that his plan would abolish a system of opposition which had aimed solely at the downfall of the Government of the day. His conception of an Opposition was rather one which would compete in bringing forth original and fresh ideas for the solution of the country's problems, and he was convinced that such competition would benefit the country.

After the formation of the new Government, Dr. Djuanda accompanied by Mr. Hardjadinata, Dr. Tobing, and senior Army officers paid a visit to Sumatra, where he discussed measures for the normalization of relations between the Central Government and the regions with Lieut.-Colonel Hussein and Lieut.-Colonel Barlian, the respective military commanders in Central and South Sumatra. During their talks Colonel Hussein called on the Government to recognize the "Banteng Council" as the representative of the people of Central Sumatra, and appealed for renewed co-operation between President Sukarno and Dr. Hatta.

In a speech at Padang (Central Sumatra) on April 23, Dr. Djuanda said that all parties had agreed on the principle of regional autonomy, but that no agreement had yet been reached on the extent of the autonomy to be granted. Proposals had been put forward by the regions that the National Council should constitute a Senate whose members would represent the various regions, and those proposals would be taken into consideration by the Government when setting up the Council.

A conference of military commanders called by the Chief of Staff, General Nasution, opened in Jakarta on March 15 and was attended by all the territorial commanders except Colonel Hussein, who was reported to be ill.

A statement issued at the conclusion of the talks (March 20) said that the commanders fully realized the importance of maintaining the Government's authority and creating stability in the armed forces, and called upon President Sukarno and Dr. Hatta to work together to solve the political crisis. They had also decided to do all in their power to combat corruption, subversive activities, smuggling, and other activities harmful to the State.

On April 16 the Supreme Court found Mr. Abdulgani, Foreign Minister in Dr. Sastroamidjojo's Government, guilty of violating the foreign exchange regulations by "unintentionally taking foreign currency, valuable documents and papers abroad in his capacity as a Government servant without the consent of the Foreign Exchange Institute." He was sentenced to a fine of 5,000 rupiahs (about £150) or one month's imprisonment, and ordered to pay the costs of the trial. (Indonesian Embassy Press Office, London - Times - Manchester Guardian)

(Prev. rep. 15421 A.)

B. MEDICAL RESEARCH. — First Department of Virology at British University.

The establishment at the University of Glasgow of a new Department and Chair of Virology, the first of its kind at any British university, was announced on April 26 by Sir Hector Hetherington, the Principal of the university. Established by a grant of £225,000 from the Scottish Hospital Endowment Research Trust, it is expected to begin functioning by 1960 and will carry out fundamental research into virus diseases similar to the work already being done in this field at Melbourne, Harvard and Yale, the principal universities at present engaged in virological studies. (Times - Glasgow Herald)

C. CORRIGENDA. The following corrections should be made to articles published in recent issues:

(1) In 15463 A, a few words were inadvertently dropped in the sixth paragraph of the first column. The tenth and subsequent lines of this paragraph should correctly read: "between the peoples of Asia and Africa in order to 'frustrate such attempts to destroy one by one the Asian and African countries which have recently attained independence.'

(2) A misprint occurred in the heading of 15491 A, which should correctly read: "Lower Rouble Rate for Tourists and Other Non-Commercial Transactions." (Ed. K.C.A.)

A. UNITED KINGDOM. — Motor Industry. - Production and Exports in 1956. - Temporary Decline in Sales after Petrol Rationing. - Relaxation of Hire-Purchase Restrictions. - Ending of Recession in Motor Industry.

Figures published in the March issue of the *Board of Trade Journal* showed that the British motor industry had produced 1,044,544 vehicles in 1956, or 18.79 per cent fewer than the record output of 1,287,068 vehicles (revised figure) in 1955. The 1956 output comprised 707,594 cars, 287,272 goods vehicles, and 9,678 buses and coaches, compared with 897,560 cars, 329,851 goods vehicles, and 9,657 buses and coaches produced in 1955.

Vehicles exported in 1956 numbered 463,164, or 12.7 per cent fewer than the 530,407 exported in 1955. The 1956 total comprised 337,052 cars, 122,374 goods vehicles, and 3,738 buses and coaches, compared with 390,533 cars, 136,671 goods vehicles, and 3,201 buses and coaches sent overseas in 1955.

The severe recession in the automobile industry which occurred in the spring and summer of 1956 was intensified by the Suez crisis and the announcement on Nov. 7 of the forthcoming introduction of petrol rationing.

As a result, only 157,747 cars were produced in the fourth quarter of the year, compared with 236,615 in the fourth quarter of 1955—a decline of 33 per cent. Output of cars in December fell to 51,175, or 40 per cent fewer than the 86,042 produced in December 1955. At the same time shipping difficulties caused by the blocking of the Canal resulted in a reduction of exports, only 20,930 cars and 9,001 goods vehicles being exported in December, compared with 25,823 cars and 12,261 goods vehicles exported in December 1955, representing decreases of 19 and 26 per cent respectively.

The consequent accumulation of vehicles at the factories necessitated the introduction of four-day working at the Vauxhall works at Luton on Nov. 10 and at Rootes' Coventry factories on Nov. 16, whilst on Nov. 19 redundancy dismissals began at the Cowley (Oxford) body works of the Pressed Steel Company (a division of the British Motor Corporation) and by Dec. 8 had reached the 1,200 mark. From Dec. 3 about 9,000 of the 20,000 Ford workers at Dagenham and elsewhere and about 7,000 employees of the Ford subsidiary, Briggs Motor Bodies Ltd., were placed on a four-day week and 800 Rover employees at Solihull (Birmingham) put on three-day week working.

The recession continued during December and January, between 11,000 and 12,000 employees of the Ford and Briggs companies at Dagenham being placed on a three-day week on Dec. 31, whilst some Briggs workers at Doncaster were declared redundant. Other action taken by the motor manufacturers on that date included (1) the adoption of three-day working at Rootes' Coventry factories (6,000 affected); (2) redundancy dismissals at the B.M.C. Morris engine factory at Coventry (affecting 300-400): (3) partial four-day working at the Rolls-Royce works at Crewe (400 affected). On Jan. 3, 1957 a further 700 men were declared redundant at Coventry (450 at the Daimler works and 150 and 100 respectively at the Singer and Standard factories), bringing the number idle or on short time in the Coventry area to over 20,000. Redundancy dismissals also occurred in mid-January in the Birmingham area, including 200 at the Rover (Solihull) and 300 at the Austin (Longbridge) factories).

The first redundancy dismissals from the Ford group factories at Dagenham for many years took place on Jan. 7, when over 1,000 Briggs workers were laid off following a 30 per cent cut in production. On Jan. 15 it was announced that a further 1,350 workers would be dismissed by the end of the month, owing to the decision to revert to four-day working as the three-day week introduced on Dec. 31 had proved uneconomic. Although no redundancy dismissals took place at the parent Ford works, 4,700 Ford employees were working a four-day week by Jan. 15, whilst a further 2,300 were working on three days only.

Mr. Iain Macleod, the Minister of Labour and National Service, announced in the House of Commons on Dec. 20, during a debate on the economic situation, that in order to help the automobile industry to overcome its immediate difficulties, hire-purchase restrictions on cars, light vans, and motor-cycles would be relaxed as from Dec. 21, 1956 by reducing the minimum deposit required from 50 to 20 per cent. No change would be made in the maximum period of repayment, which would remain at two years. At the same time the Order restricting the terms of hiring vehicles by requiring nine months' rental and service charges to be paid in advance had been revoked.

Mr. Macleod explained that the Government believed that the measures taken earlier in the year to counter inflationary tendencies (see 14705 A and 14332 A) were "vital for the steadiness of the price level," and that it had no intention of modifying its general policy. At the same time it recognized that the motor industry had been "hit harder than any other by the shortage of petrol" and had therefore considered whether anything could be done to assist it. He added that workers on short time currently numbered about 90,000 (including about 46,000 engaged in automobile and accessories manufacture), against 70,000 on short time before the petrol restrictions were introduced. The Government feared that there might be a break in employment in the automobile industry in the New Year, but could not agree to a request by motor manufacturers for a reduction in purchase tax, since this would involve a large loss of revenue.

The easing of the petrol situation early in the New Year, and the relaxation of hire-purchase restrictions announced by Mr. Macleod in December (see above), led, however, to a marked improvement in the employment situation in the industry. This improvement was experienced by all leading automobile manufacturers but was particularly notable in sales of smaller cars, increasing numbers of which were exported to the United States and Canada.

Resumption of normal working began on Jan. 24 at the Vauxhall works at Luton, followed by a return to five-day working at the parent Ford factory at Dagenham and the Standard (Coventry) works on Feb. 13, at Briggs Bodies' Dagenham works on March 3, at the Morris and Pressed Steel Company's works at Cowley (Oxford) on March 10, and at the Rolls-Royce Crewe factory on March 11. The Austin Motor Company announced on March 1 that it planned to expand production at its Longbridge (Birmingham) works by 50 per cent to meet the growing demand for its smaller models, while on May 2 the company announced that the Longbridge plant would return to full overtime working in view of heavy demands for all types of vehicles both at home and abroad.

Mr. Frederick Erroll (Parliamentary Secretary, Board of Trade) stated in the House of Commons on Feb. 22 that, following the relaxation of restrictions in December, hire-purchase sales of cars and light commercial vehicles in January had been respectively 70 per cent and 60 per cent higher than sales in December. As a consequence, the number of workers on short time in the automobile industry had fallen from about 60,000 in the first weeks of January to 35,000 in the week ended Feb. 16.—(Board of Trade Journal - Times - Daily Telegraph - Manchester Guardian)

C. IRISH REPUBLIC - UNITED STATES. — Agreement on Partial Use of U.S. Grant Counterpart Fund.

An agreement between the Irish Republic and the U.S.A. on the use of the American Grant Counterpart Fund was signed in Dublin on March 16. It provided that £500,000 from the fund, which totals £6,142,000, should be allotted to promote further mutual understanding between the peoples of the two countries by wider exchange of knowledge through educational contacts. About £25,000 would be spent each year to finance studies, research, and other educational activities of Irish citizens in American schools, universities and other institutions of higher learning, and of U.S. citizens in similar educational institutions in the Irish Republic.—(Irish Times, Dublin)

A. AUSTRALIA. — Labour Split in Queensland. - State Premier expelled from Labour Party. - Mr. Gair to continue in Office. - Formation of Queensland Labour Party. - First Congress of Democratic Labour Party.

The Premier of Queensland, Mr. Vincent Gair, was expelled from the Labour Party on April 24 by the central executive of the party's Queensland branch, the voting being 35 to 30. Mr. Gair was expelled for refusing to accept the party's directions on social policy—specifically, for resisting a party decision (adopted in 1956) that legislation should be introduced to provide for three weeks' annual leave for all workers in Queensland. This proposal had been resisted by Mr. Gair on the ground that the State's finances could not stand the change involved, although he had made it clear that he was not opposed to the three-weeks' leave in principle. Moreover, Mr. Gair had stressed that, as the leader of a responsible Government, he could not accept dictation by a body which had no responsibility to the electorate.

The Labour members in the Queensland Parliament, meeting on the same day, gave Mr. Gair a vote of confidence by 26 votes to 21. Mr. Gair also received the support of all the Ministers in the Queensland Labour Government except Mr. John Duggan, the Deputy Premier, who subsequently resigned from the State Cabinet. In statements issued on April 25-26, Mr. Gair announced that he did not propose to resign the Premiership; that he would organize his own Parliamentary Labour Party in opposition to the State party "machine"; and that he would not join the breakaway Democratic Labour Party—formerly known as the Labour Party (Anti-Communist)—which had been formed in several other States. It was reported from Brisbane that the party to be formed by Mr. Gair would probably be known as the Queensland Labour Party, and that its rules and constitution would in general follow those of the Australian Labour Party.

At the time of Mr. Gair's expulsion, party strengths in the Queensland Parliament were: Labour 47, Country Party 16, Liberals 8, Independents 4. In view of the support expressed for Mr. Gair by the majority of Labour members, the Premier will still control the largest single parliamentary group, the new position being: Mr. Gair's group 26, Labour Party 22, Country Party 16, Liberals 8, Independents 4. Mr. Gair has been Premier of Queensland since 1952, and was re-elected in 1956 for a three-year term expiring in May 1959. The Labour Party has been in power in Queensland for 25 years.

Mr. Duggan, the former Deputy Premier, was appointed leader of the "official" Labour Party in Queensland on April 30.

The anti-Communist Labour parties which broke away from the official Labour Party in various States before the last Federal election, and which had been collectively known as the Labour Party (Anti-Communist), subsequently took the title of the Democratic Labour Party. At its first congress in Sydney in March 1957, the new party adopted a policy declaration which, *inter alia*, expressed support for SEATO, opposed the recognition of Communist China, and urged that the intake of immigrants should not be reduced on the grounds of economy or shortage of housing.—(Australian News and Information Bureau - Office of the Agent-General for Queensland, London) **(Prev. rep. Queensland, 14957 B; Anti-Communist Labour Parties, 15024 A, 14178 A.)**

B. SCIENTIFIC RESEARCH. — Synthetic Diamonds. - Discovery of Borazon.

The discovery of a new man-made material known as Borazon, harder than a diamond and able to stand more than twice as much heat, was announced on Feb. 12 by the General Electric Research Laboratory at Schenectady, N.Y., where the production of synthetic diamonds had been successfully accomplished a year earlier (see 15107 C). The new material, a compound of boron and nitrogen, was produced under pressures of millions of pounds to the square inch and at temperatures of 3,000 degrees Fahrenheit. The discovery was made by Dr. Robert Wentorf jr., a member of the General Electric Research team that succeeded in making synthetic diamonds.

Dr. Wentorf and other General Electric scientists pointed out that Borazon, the hardest substance ever made by man, was able to scratch diamonds and might, in time, supersede industrial diamonds in a variety of industrial uses. Its resistance to oxidization, for example, might make possible superior methods for mounting stones in industrial tools to those now employed, and might also allow bits and wheels to be operated at higher speeds and thus perform cutting and polishing jobs more speedily and efficiently than at present. It was also pointed out by Dr. Wentorf that whereas a diamond burned at about 1,600 degrees F., Borazon did not melt until subjected to temperatures of over 4,000 degrees.

The word "borazon" is coined from bor (boron) and azon (referring to nitrogen).—(New York Times) **(15107 C.)**

C. UNITED STATES. — Foreign Service.

Further important appointments in the U.S. Foreign Service made during the past three months are listed below (date of Presidential nomination in parentheses):

Australia. Mr. William J. Sebald, Assistant Secretary of State for Far Eastern Affairs, as Ambassador in Canberra *vice* Mr. Douglas Moffat, who died towards the end of 1956. Mr. Sebald has had long experience in the Far East and was political adviser to General MacArthur when the latter was Supreme Allied Commander in Japan. (Feb. 25).

France. Mr. Amory Houghton, an industrialist and a member of the Republican Party, as Ambassador in Paris *vice* Mr. C. Douglas Dillon, who became Deputy Under-Secretary of State for Economic Affairs. Mr. Houghton, chairman of the Corning Glass Corporation (Corning, N.Y.), had never previously held a diplomatic post, though he held Governments posts in war production and lend-lease agencies during the Second World War. (Feb. 25).

German Federal Republic. Mr. David K. Bruce, Ambassador to France from 1949-52, and U.S. representative with the European Coal and Steel Community in 1954, as Ambassador in Bonn *vice* Dr. James B. Conant, whose resignation had been announced in January. One of the few Democrats to be given a diplomatic assignment by the Eisenhower Administration, Mr. Bruce had served at the Paris Embassy during the Truman Administration and was concurrently head of the E.C.A. mission in France. At the time of his nomination to the Bonn Embassy he was a member of the President's board of consultants on foreign intelligence activities. (Feb. 25).

Irish Republic. Mr. Scott McLeod, head of the State Department's Bureau of Security and Consular Affairs, as Ambassador in Dublin *vice* Mr. William Howard Taft, returning to the State Department. (April 9).

[As chief security officer of the State Department since the Eisenhower Administration took office, Mr. McLeod had become well known for his zeal in uncovering "security risks" in the Department. The *New York Times* (April 10) wrote that Mr. McLeod had "directed the hunt for security risks in the Department in 1953 with such gusto that Secretary of State Dulles once reportedly considered dismissing him," while Mr. McLeod's appointment to the Dublin Embassy was also adversely criticized in the *Irish Times*. After prolonged questioning of Mr. McLeod by the Senate Foreign Relations Committee, the latter body approved his appointment to the Dublin Embassy on May 2 by nine votes to six. His nomination was supported by all seven Republican members of the committee and two of the Democratic members (Senators Mansfield and Long), and opposed by the remaining six Democratic members. It was understood that several Democratic members of the committee had criticized Mr. McLeod's activities during the period of "McCarthyism."]

New Zealand. Mr. H. Russell Maine, a career diplomat, as Ambassador in Wellington *vice* Mr. Robert C. Hendrickson (formerly Republican senator for New Jersey), who had resigned to return to private life. (March 22).

Norway. Miss Frances E. Willis, Ambassador to Switzerland, as Ambassador in Oslo *vice* Mr. L. Corrin Strong, retiring. Miss Willis, who joined the Foreign Service in 1921, was the first woman in the State Department to reach the rank of Foreign Service Officer Class 1. (April 9).

Philippines. Mr. Charles E. Bohlen, Ambassador in Moscow for the past four years, as Ambassador in Manila *vice* Mr. Albert F. Nufer, who died in November last. (March 22).

Soviet Union. Mr. Llewellyn E. Thompson jr., Ambassador in Vienna, as Ambassador in Moscow *vice* Mr. Bohlen. Mr. Thompson, who had been Second Secretary at the Moscow Embassy in 1941, played an important part in the discussions which led to the conclusion of the Austrian State Treaty. (April 28).

Commenting on Mr. Bohlen's transfer from the U.S.S.R. to the Philippines, the *New York Times* pointed out that the Manila and Moscow embassies "are of equal rank under State Department regulations."—(New York Times - New York Herald Tribune) **(Prev. rep. U.S. Foreign Service, 15344 B.)**

D. AUSTRIA. — Provincial Elections in Styria.

Landtag elections held in Styria on March 10 resulted as follows, the distribution of seats after the previous elections in 1953 being shown in parentheses: People's Party, 24 (21); Socialist Party, 21 (20); League of Independents and Free Austrian Party, 3 (6); Communists, nil (1). The polling percentage was 96.9 compared with 97.6 at the 1956 general elections, although voting had since become compulsory. (Wiener Zeitung) **(Prev. rep. 14889 A.)**

E. UNITED KINGDOM. — Industrial Accidents, 1956.

The number of fatal industrial accidents (excluding accidents to seamen and fishermen) during 1956 was 1,250 (compared with 1,351 in 1955), comprising 376 in mining and quarrying, 708 in factories, foundries, engineering works, shipyards, gas works, power stations, docks, and building operations, and 171 in the railway service. There were 117 fatal accidents to seamen and fishermen.—(Ministry of Labour Gazette) **(Prev. rep. 14707 D.)**

MAY 4—11, 1957

A. DISARMAMENT. — Disarmament Negotiations between Western Powers and Soviet Union. - Meeting of U.N. Disarmament Commission. - The Bulganin-Eisenhower Correspondence. - Discussions at U.N. General Assembly. - Reconvening of U.N. Sub-committee. - U.S., British, and Soviet Disarmament Proposals. - Joint Norwegian - Canadian - Japanese Proposal for Registration of Nuclear Tests.

The progress of the disarmament negotiations between the Western Powers and the U.S.S.R. during the past twelve months is summarized below under cross-headings, in continuation of report 14851 A. The principal developments during this period were: (1) a meeting of the U.N. Disarmament Commission in July 1956 which made little or no progress towards reconciling the Western and Soviet viewpoints; (2) a lengthy exchange of correspondence between President Eisenhower and Marshal Bulganin, extending over eight months (June 1956 to January 1957); (3) the presentation of new disarmament proposals by the U.S.S.R. and the United States, in November 1956 and January 1957 respectively; (4) discussion of the disarmament question at the recent (11th) session of the U.N. General Assembly, and the adoption of relevant resolutions; (5) the reconvening in March 1957 of the Disarmament Commission's sub-committee (the "London sub-committee"), which continued its discussions throughout April and the first fortnight of May, and at which new proposals on disarmament were presented by the U.S.S.R., Great Britain, and the United States.

Meeting of U.N. Disarmament Commission.

The Disarmament Commission met at U.N. Headquarters from July 3-16, 1956, two separate resolutions being presented —one jointly by the U.S.A., Great Britain, France, and Canada, and the other by the Soviet Union.

Western Resolution.

This resolution urged the Commission's sub-committee to "continue its search for agreement," paying due regard to the following guiding principles:

"(1) The disarmament programme should proceed by stages. Progress from one stage to another must depend upon the satisfactory execution of the preceding stage and upon the development of confidence through the settlement of major political problems.

"(2) The programme should begin, under effective international control, with significant reductions in armed forces to such levels as are feasible in present unsettled world conditions. There should be corresponding reductions in conventional armaments and military expenditures. Further reductions would be carried out as world conditions improved.

"(3) The programme should provide that, at an appropriate stage and under proper safeguards, the building-up of stockpiles of nuclear weapons would be stopped and all future production of nuclear material devoted to peaceful uses.

"(4) The programme should provide for a strong control organization with inspection rights, including aerial reconnaissance, operating from the outset and developing parallel with the disarmament measures. The control measures should also provide against major surprise attack.

"(5) The programme might also include preliminary demonstrations of inspection methods on a limited scale as a help in developing an effective control system and as a means of bringing nearer agreement on a disarmament programme.

"(6) Provision should be made for the suspension of the programme, in whole or part, if a major State failed to carry out its obligations or if a threat to peace should occur under Chapter VII of the U.N. Charter."

Soviet Resolution.

The resolution presented by M. Gromyko on behalf of the Soviet Government contained the following proposals:

(1) The great Powers should assume "a solemn obligation" not to use atomic and hydrogen weapons, which should be prohibited. The resolution called for agreement on the prohibition of weapons of mass destruction; elimination of all stocks of atomic weapons; and cessation of the production of such weapons.

(2) The armed forces of the great Powers (the U.S.A., the U.S.S.R., China, Great Britain, and France) should be reduced to the levels earlier proposed. [That is, the U.S.A., the U.S.S.R and China should reduce their forces to between 1,000,000 and 1,500,000 men, Britain and France to 650,000 men, and other countries to maxima of 150,000-200,000 men: the levels proposed by the U.S.S.R. at the "London sub-committee's" sessions two months earlier—see page 14854, first column.]

(3) An effective control system should be set up to ensure the prohibition of atomic weapons and the reduction in armaments and armed forces. Such a control system should include "provisions for verification and inspection of military units and stores, land, naval and air bases, and other military plants."

(4) Pending the complete prohibition of all nuclear weapons, all States—whether members of the U.N. or not—should renounce the use of such arms, as well as the use or threat of force in international relations.

In presenting these proposals, M. Gromyko made a bitter attack on the NATO, SEATO, and Baghdad alliances and also on President Eisenhower's "open skies" plan [i.e. the plan for mutual aerial inspection], which he described as having "no relation whatever" to disarmament and as "opening no door to the deadlock into which we have run." He also attacked the Western contention that disarmament measures should be accompanied by a "step by step" solution of political problems—declaring in this connexion that to make German unification a pre-condition for reduction of armed forces would "mean the wrecking of any disarmament proposals" and would "not help the German problem." M. Gromyko announced, however, that the U.S.S.R. was prepared to accept the arms "ceilings" previously proposed by the Western Powers—i.e. maximum levels of 2,500,000 for the armed forces of the U.S.A., the U.S.S.R., and China, 750,000 for Britain and France, and 150,000-200,000 for all other countries. Reduction to these levels, he suggested, should be followed by further reductions to the levels proposed by the Soviet Union.

After an inconclusive two-weeks' debate, the Disarmament Commission ended its session by adopting a resolution proposed by its Peruvian member, Dr. Victor Belaunde, the voting being 10 in favour and one against (the U.S.S.R.), with Yugoslavia abstaining. The resolution:

(1) Declared that the resolution presented by the U.S.A., Britain, France, and Canada (see above) "sets forth the principles upon which an effective programme for the regulation and limitation of arms and armed forces can be based."

(2) Welcomed "the narrowing of differences on certain aspects of the disarmament problem that has been achieved both in the sub-committee discussions and in the present session of the Disarmament Commission" [an apparent reference to the Soviet acceptance of the Western "ceilings" for armed forces.]

(3) Noted that "major difficulties remain to be solved before agreement is reached on an international disarmament programme with safeguards which will ensure the faithful observance of the programme by all States."

(4) Expressed the Commission's conviction that "a reconciliation of opposing points of view is both possible and necessary."

(5) Instructed the sub-committee to study the various proposals which had been put forward and to report to the Disarmament Commission at its next (1957) session.

The Peruvian resolution was strongly opposed by M. Gromyko on the grounds previously stated—notably that the Western proposals linked a settlement of the disarmament problem with a concurrent settlement of political questions. M. Gromyko also complained that Dr. Belaunde's resolution took no account of the Soviet proposals and was therefore of a "unilateral" and "highly controversial" character with which the Soviet Union "cannot be expected to agree."

The Bulganin-Eisenhower Correspondence.

In continuation of the sporadic correspondence between Marshal Bulganin and President Eisenhower, initiated by the Soviet Prime Minister on Sept. 19, 1955 (see page 14855), Marshal Bulganin sent a further letter to the U.S. President on June 6, 1956, urging the importance of "practical steps to reduce armaments without waiting for agreement [on disarmament] to be reached in the United Nations," and proposing specifically that the U.S.A., the U.S.S.R., Britain, and France should make "sharp reductions" in their forces in Germany. Similar letters were sent by Marshal Bulganin to the Prime Ministers of Great Britain, France, Canada, Italy, and Turkey, and to the German Federal Chancellor.

Marshal Bulganin to President Eisenhower (June 6, 1956).

After recalling that the Heads of Government participating in the Geneva Conference of 1955 had expressed "the common desire to eliminate the threat of war and diminish the burden of armaments," Marshal Bulganin commented that the disarmament negotiations in the U.N. Sub-committee had "not yielded positive results" and had in fact "retarded progress on this matter." The Soviet Government had therefore "decided to make a new approach to a solution of the disarmament problem." Accordingly, "until such time as an international agreement on disarmament is reached," it proposed that "the efforts of States should be directed toward concrete measures for reducing armaments, which could be carried out without waiting for an international agreement." Such measures, if adopted, would "contribute to the lessening of international tension and the strengthening of mutual trust among nations, which in turn would lead to the creation of more favourable conditions for the realization of an all-embracing universal programme of disarmament."

Marshal Bulganin recalled that the Soviet Government, "without waiting for a disarmament agreement," had unilaterally reduced its forces by 1,200,000 men [see 14878 A], in addition to an earlier cut of

640,000 men; that military expenditures in the State budget of the U.S.S.R. had been cut accordingly, and that 63 divisions were being demobilized, including over 30,000 Soviet troops stationed in Eastern Germany. If corresponding reductions in their forces in Germany were carried out by the U.S.A., Great Britain and France, this could lead to "an agreement on sharp reductions in foreign armed forces in Germany or the withdrawal of foreign armed forces from German territory."

President Eisenhower to Marshal Bulganin (Aug. 4, 1956).

The U.S. President replied as follows on Aug. 4 to Marshal Bulganin's letter:

"... Some time ago I agreed to your proposal for ground inspection on the assumption that you would also agree to my proposal for aerial inspection and exchange of military information, made at Geneva a year ago. So far, I understand that you reject this on the ground that it would be an intelligence operation ... Also I recall my letter to you of March 1, 1956, when I proposed that, after a date to be agreed upon, production of fissionable materials anywhere in the world would no longer be used to increase the stockpiles of explosive weapons. I had hoped that this proposal ... would appeal to you as an important step toward bringing the nuclear threat under control. However, you have never responded to that proposal, and your letter of June 6 makes no reference to the control of nuclear weapons. May I again urge careful consideration of the matter, and especially my proposal of last March?

"You refer in your letter to a possible reduction of our respective forces in Germany. Obviously the problem of forces in Germany cannot be dealt with as an isolated matter. In this respect I must confess that I am greatly disturbed by the developments which have occurred since we met at Geneva last year. We there agreed that the reunification of Germany was a common responsibility of the four Governments, and we also agreed that Germany should be reunified by means of free elections ... Not only has this not happened, but I hear of statements from your side which seem to imply that your Government is determined to maintain indefinitely the division of Germany.

"I must confess that I am perplexed as to how we can work together constructively if agreements which are negotiated at the highest level after the most thorough exploration do not seem dependable. Nevertheless, it is my earnest hope that we will find ways to make progress toward a meaningful control of armaments—a hope shared not only by ourselves but by the peoples of the world ...

"I must say that I do not share your views about the activities of the U.N. Disarmament Sub-committee. Discussions there have done much to shed light on this difficult problem and, I hope, to narrow somewhat the gap between our points of view. May we not do more to realize the hopes which were born of our meeting at Geneva? We then made promises, notably about Germany, which desperately need to be fulfilled ..."

Replies in broadly similar terms were also sent to Marshal Bulganin by Sir Anthony Eden, M. Mollet, and the other Prime Ministers approached. Dr. Adenauer, in his reply, gave an assurance that German reunification would not be sought in any way which could endanger the security of the Soviet Union.

Sir Anthony Eden pointed out that Britain, like the U.S.S.R., had made substantial unilateral reductions in her armed forces in recent years, apart from the still greater reductions carried out after the Second World War. With reference to the Soviet arms cuts mentioned by Marshal Bulganin, Sir Anthony wrote:

"My own feeling is that unilateral reductions of this kind are helpful. I do not think, however, that they are, of themselves, sufficient if international confidence and security are to develop as we wish. To promote such confidence it is essential that disarmament should take place under an international agreement which provides for effective control and inspection, and for adequate measures of protection against surprise attacks.

"During the past 10 years the Western Powers have made persistent efforts to bring about such an agreement. For their part H.M. Government will continue to make every effort to achieve through the United Nations an agreement covering the limitation, reduction, and control of armaments, including nuclear weapons. Perseverance in the work of the U.N. Disarmament Commission and its sub-committee is necessary in order to reach an agreement which will ensure the security of all by means of an adequate system of international control."

As regards Marshal Bulganin's suggestions for reducing armed forces in Germany, Sir Anthony commented: "It does not seem to me to be practicable to consider in isolation your suggestions so far as they concern Germany. I am anxious to find means of reducing armed forces and armaments. But to bring about a real *détente* in Europe it is also necessary that the peoples of Western Europe should feel that the existing guarantees for their security are being retained. On the other hand, comprehensive arrangements to take into account both disarmament and urgent political questions, notably the reunification of Germany, would make real progress possible ..."

Marshal Bulganin to President Eisenhower (Sept. 11, 1956).

Another letter was sent to President Eisenhower by Marshal Bulganin on Sept. 11 in which the Soviet Prime Minister, after regretting that his disarmament proposals had "not met with support on the part of the U.S. Government," dwelt at length on the Soviet objections to the President's "open skies" plan. Marshal Bulganin also expressed his "astonishment" that the Western Powers were linking the question of German unification with an agreement on disarmament, and reiterated the Soviet Government's attitude to the German problem.

Marshal Bulganin commented as follows on the President's "open skies" plan: "Air inspection and aerial photography mean that data about the territory of States, and their industry and other resources, is put at the disposal of other countries. One must not close one's eyes to the fact that military leaders and, let us not conceal the facts, also individual politicians in some countries have repeatedly expressed their wish to obtain fuller intelligence data about the military and industrial resources of the U.S.S.R. ...

"Judge for yourself: Can the Soviet Government, and the Soviet people in general, approach without fear the demands for aerial reconnaissance and aerial photography? Clearly they cannot, and I think that this view is shared by many Western countries which are perfectly well aware of the fact that in the present circumstances, with the existence of military groupings and of distrust in relations between nations, mutual intelligence activity would only increase mutual fear of the danger of an unexpected attack and would generate a war psychosis ...

"What I have said above does not signify that we deny the importance of agreed measures aimed at averting the danger of an unexpected attack by one State on another ... We ourselves have proposed definite measures for the purpose. I refer to our proposals for the setting-up of control posts in important centres railroad junctions, airfields, highways, ports, etc. The setting-up of such posts, which is entirely possible even in the present state of international distrust, would eliminate the dangerous secrecy of the concentration of armed forces by this or that State, and thereby also the danger of an unexpected attack. It is clear that this proposal is of value only if it is implemented in close relation with the reduction of armaments and armed forces. Otherwise it loses its importance, like any other kind of control ..."

On the question of Germany, Marshal Bulganin wrote as follows "I and my colleagues do not hide our astonishment that of late, during negotiations on disarmament, new preliminary conditions have been put forward on the solution of the German and other unsolved international problems. I think you will agree with me that to make agreement on disarmament dependent on, for instance, the settlement of the German problem, means in fact a renunciation of the search for agreement on disarmament.

"The Soviet Government remains an advocate of the reunification of Germany ... At the same time the Soviet Government has already drawn the attention of the U.S. Government and of other Powers to the fact that in Western Germany the militarist forces which were guilty of unleashing the Second World War are being restored.

"Developments in Western Germany acquired a particularly dangerous aspect after the conclusion of the Paris treaties and after the German Federal Republic joined the Atlantic Pact. The introduction of compulsory national service in Western Germany creates conditions for the development of the largest army in Western Europe. The production of arms is being restored in the German Federal Republic and large-scale purchases of armaments are being made abroad.

"It becomes obvious that the remilitarization of Western Germany, which is accompanied by the suppression of the elementary democratic rights and freedoms of the West German population, tends to make impossible the creation of a united Germany as a peaceful and democratic State ... One must draw the conclusion that the question of German reunification is primarily a question of changing the present political course of the Government of the Federal Republic, which is leading to the transformation of Western Germany into a hotbed of war danger in Europe ..."

Marshal Bulganin to President Eisenhower (Oct. 17, 1956).

In a further letter to President Eisenhower on Oct. 17 (sent before the President had replied to Marshal Bulganin's letter of Sept. 11), the Soviet Prime Minister urged an immediate U.S.-Soviet agreement to ban tests of atomic and hydrogen weapons. In the course of this letter which was written during the American presidential election campaign—Marshal Bulganin accused Mr. Dulles of "not stopping short of direct attacks on the Soviet Union and its peaceable foreign policy." In addition, Marshal Bulganin expressed his "entire agreement with the view that has been taken of late by certain prominent public figures in the United States about the necessity and possibility of agreement on the banning of atomic tests." [The reference to "prominent public figures" was believed to refer to Mr. Adlai Stevenson, the Democratic presidential candidate, who had declared that he would open negotiations with the U.S.S.R. and Britain for the immediate suspension of nuclear weapon tests if elected to the presidency—see page 15238, second column.]

"We realize," wrote Marshal Bulganin, "that a debate on problems of international importance, including those of disarmament, is apt to take on a polemical form in the United States at the moment, as the election campaign is in progress. We cannot, however, disregard the fact that in some instances official pronouncements are giving evidence of manifest misrepresentation of the Soviet Union's policy on these matters. This is, unfortunately, particularly true of statements made by Mr. Dulles ..."

Marshal Bulganin went on to refer to the Soviet Government's "unfailing advocacy of the unconditional prohibition of atomic weapons", mentioned the growing apprehensions of all nations, including the U.S.A., at "the possible consequences of the continuing atomic arms race"; and deplored "the fact that the U.S. Government does not consider it possible to join its efforts with those of many other States directed toward banning atomic weapons and concluding an appropriate international agreement to this end." Nevertheless, the Soviet Government believed it possible to conclude an agreement between the two countries on the banning of atomic tests, as a "first step" toward an international agreement covering all aspects of the disarmament problem.

"Should such an agreement be reached on this matter," said Marshal Bulganin, "there would be no particular difficulty in supervising its implementation, since in the present state of science no atomic or hydrogen explosion can be carried out without being recorded in other countries . . . Consequently, no Government which had given a solemn undertaking to cease tests would be able to break it without exposing itself in the eyes of the whole world as a violator of the agreement."

In conclusion, Marshal Bulganin said that he was "surprised" that President Eisenhower had "expressed doubts about the Soviet Union's willingness to end tests of its atomic and hydrogen weapons"; declared that there was "no reason at all" for such doubts; and said that the U.S.S.R. could cast equal doubt upon American assurances on this matter. After expressing the Soviet Government's conviction that it was "impossible to make the settlement of the question of atomic tests dependent on agreement on the disarmament problem as a whole," Marshal Bulganin reiterated that the U.S.S.R. was ready to conclude an immediate agreement with the U.S.A. for the ending of such tests "on the assumption that other countries possessing atomic weapons will also accede to such an agreement."

President Eisenhower to Marshal Bulganin (Oct. 21, 1956). - Rejoinder to Soviet Premier's References to Mr. Dulles.

The above-mentioned letter from Marshal Bulganin aroused strong resentment in Washington, particularly because its text had been issued in Moscow before the State Department had had the opportunity of translating the letter and delivering it to President Eisenhower. In a brief reply to Marshal Bulganin, sent on Oct. 21, the President described the Soviet Premier's remarks about Mr. Dulles as "offensive," and expressed his regret that Marshal Bulganin's letter had "departed from accepted international practice in a number of respects."

"First," wrote President Eisenhower, "the sending of your note in the midst of a national election campaign, expressing your support of the opinions of 'certain prominent public figures in the United States,' constitutes an interference by a foreign nation in our internal affairs of a kind which, if indulged in by an Ambassador, would lead to his being declared *persona non grata* in accordance with long-established custom.

"Second, having delivered a lengthy communication in the Russian language, you have published it before it could be carefully translated and delivered to me. Because of this, and of the necessity of placing the facts accurately before the public, I am compelled to release this reply immediately.

"Third, your statement with respect to the Secretary of State is not only unwarranted but is personally offensive to me.

"Fourth, you seem to impugn my own sincerity.

"However, I am not instructing the State Department to return your letter to your Embassy. That is not because I am tolerant of these departures from accepted international practice, but because I still entertain the hope that direct communications between us may serve the cause of peace.

"You and I have exchanged a number of letters since our meeting in Geneva on the reduction of armaments and related matters in our effort to make progress toward the goal of peace. I hope that that practice may be resumed in accordance with accepted standards.

"The United States has for a long time been intensively examining, evaluating, and planning dependable means of stopping the arms race and reducing and controlling armaments. These explorations include the constant examination and evaluation of nuclear tests. To be effective, and not simply a mirage, all these plans require systems of inspection and control, both of which your Government has steadfastly refused to accept. Even my 'open skies' proposal of mutual aerial inspection, suggested as a first step, you rejected.

"However, though disappointed, we are not discouraged. We will continue unrelenting in our efforts to attain these goals. We will close no doors which might open a secure way to serve humanity. We shall entertain and seriously evaluate all proposals from any source which seem to have merit, and shall constantly seek for ourselves formulations which might dependably remove the atomic menace."

[As mentioned below, a further letter was sent by President Eisenhower to Marshal Bulganin on Jan. 2, 1957, in connexion with new disarmament proposals put forward by the Soviet Government in November.]

New Soviet Proposals on Disarmament.

New proposals on disarmament put forward by the Soviet Government were sent by Marshal Bulganin on Nov. 17, 1956 to President Eisenhower, Sir Anthony Eden, and M. Mollet, together with a renewed suggestion for a "summit" conference as previously proposed by the Swiss Government (see 15216 B). The new proposals generally followed the line of previous Soviet statements but, for the first time, included willingness to examine President Eisenhower's "open skies" plan for an area of 800 kilometres (500 miles) east and west of the present dividing line between the NATO and Warsaw Treaty forces in Europe. The proposals contained the following points:

(1) The armed forces of the U.S.A., the U.S.S.R., China, Great Britain and France to be reduced within the next two years to between 1,000,000 and 1,500,000 for the first three countries and to 650,000 for Britain and France. As a first step, the U.S., Soviet and Chinese forces to be reduced during the first year (i.e. 1957) to 2,500,000 each, and the British and French forces to 750,000 each. Maxima of 150,000-200,000 to be set for the forces of all other States. Armaments to be reduced correspondingly with the reduction of armed forces.

(2) A ban on atomic and hydrogen weapons to come into force during the same two-year period, together with the ending of the manufacture of such weapons, prohibition of their use, and destruction of existing stocks. The immediate cessation of atomic and hydrogen weapon tests was urged as a first step to this end.

(3) A reduction of one-third in the U.S, British, French and Soviet forces in Germany during 1957.

(4) A "considerable reduction" during the same year of the armed forces of the U.S.A, Britain and France stationed in NATO countries and of Soviet forces stationed in the Warsaw Pact countries.

(5) Liquidation within two years of "foreign military, naval and air bases situated on the territories of other States"

(6) Reductions in military expenditure during the next two years *pari passu* with the above-mentioned measures.

(7) The setting-up of control posts at rail junctions, main motor-roads, and aerodromes in the respective States, on a reciprocal basis, "with a view to preventing a sudden attack by one State on another," and to ensure that there were "no dangerous concentrations of armed forces or armaments."

(8) As regards aerial inspection, the statement declared: "The Soviet Government has repeatedly expressed its attitude toward the so-called plan for aerial photography, and has stated that this proposal solves neither the problem of disarmament nor that of preventing aggression. But taking into account that the proposal has been advanced as a condition for an agreement on disarmament . . . the Soviet Government is prepared to examine the use of photography in the areas of Europe where forces of the North-Atlantic bloc and of the Warsaw Treaty countries are stationed, these aerial surveys to be carried out to a depth of 800 kilometres (about 500 miles) to the east and west of the demarcation line between the above-mentioned forces and with the agreement of the States concerned."

The Soviet memorandum—issued during the Suez crisis, and shortly after the Hungarian uprising—denied that the U.S.S.R. had any aggressive aims, and denounced "fabrications . . . concerning the alleged concentration of Soviet forces in countries of Eastern Europe, exceptional troop movements on the western and southern frontiers of the U.S.S.R., etc."

After asserting that the Anglo-French "military gamble against Egypt" had weakened the political and strategic positions of both countries in Europe, and that the NATO forces in Europe as a whole had also been "seriously weakened," the statement referred to "attempts being made to whip up a slanderous campaign against the U.S.S.R. in connexion with the failure of the counter-revolutionary plot against the people of Hungary." It added:

"If the Soviet Union . . . really had the aggressive intentions ascribed to it, it could accomplish the military aims ascribed to it in Western Europe, even without utilizing nuclear and rocket weapons. It may be openly said that the present strategic situation in Western Europe is even more favourable for the armed forces of the Soviet Union than was the case at the end of the Second World War, when the fully mobilized Soviet Army was capable of gaining a firm foothold in all of Western Europe had the Soviet Union set itself such aims. However, both at the end of the war and at present, the Soviet Union did not have, and does not have, any aims other than the preservation and consolidation of peace . . ."

The statement said in conclusion: "The Soviet Government considers it useful to convene a conference of the Heads of Government of the U.S.S.R., the U.S.A., Great Britain, France, and India, as proposed by the President of the Swiss Confederation. This . . . could pave the way for a broader conference . . . in which the Heads of Government of the NATO and Warsaw Pact countries could participate. The Heads of Government of a number of other States should participate in such a conference, primarily China, Yugoslavia, Indonesia, and Burma, who are neither members of the Warsaw Pact nor of NATO, SEATO, or the Baghdad Pact."

President Eisenhower's Reply to Marshal Bulganin (Jan. 2, 1957).

In a letter to the Soviet Prime Minister on Jan. 2, 1957, President Eisenhower said he had given "careful consideration" to Marshal Bulganin's proposals of Nov. 17 but found himself "in basic disagreement with the analysis of your Government as it relates to the source of international tension." The President wrote:

"The people of the United States cannot accept the [Soviet] declaration's attempt to dismiss as a 'slanderous campaign' the world's indignant reaction to the Soviet armed actions against the people of Hungary. While the Soviet Government has not responded to the constructive recommendations of the U.N. with respect to Hungary, the parties at dispute in the Middle East have accepted the assistance of the United Nations. A similar response by the Soviet Union to the U.N. resolutions concerning Hungary would constitute a significant step toward the reduction of the tensions to which the Soviet declaration addresses itself.

"Your Government's statement suggests that the strategic situation in Western Europe is now advantageous to the armed forces of the Soviet Union. This statement does not seem calculated to relieve international tensions. Moreover, I am convinced in the light of my long association with the North Atlantic Treaty Organization that it is fully capable of carrying out its mission of collective defence.

"You suggest further meetings of Heads of Government. I could agree to a meeting whenever circumstances would make it seem likely to accomplish a significant result. But, in my opinion, deliberations within the framework of the United Nations seem most likely to produce a step forward in the highly complicated matter of disarmament. Accordingly, the United States will make further proposals there.

"I take hope from your apparent willingness to consider aerial inspection as a positive factor in the problem of disarmament. Much to my regret, however, your Government's declaration does not signify willingness to seek agreement on the basic element of my Geneva proposal of averting surprise attack through aerial inspection of the centres of our military power.

"The United States is giving this and your other disarmament proposals careful study. We are prepared to discuss them, as well as the further U.S. proposals, in forthcoming meetings of the Disarmament Sub-committee . . ."

The replies of Sir Anthony Eden and M. Mollet (made public on the same day) similarly expressed the view that in present circumstances the best forum for a discussion of disarmament was the U.N. Disarmament Commission and its sub-committee, and not a conference of Heads of Government as proposed by Marshal Bulganin.

U.N. General Assembly Discussions. - U.S. Disarmament Plan. - Proposed Control of Intercontinental Missiles. - British Statement. - U.N. Resolution.

At the eleventh session of the U.N. General Assembly, new American proposals on disarmament were put forward in the Political Committee on Jan. 14 by Mr. Cabot Lodge, the U.S. delegate. These proposals—a notable feature of which was the international control of intercontinental missiles—were as follows:

(1) Agreement that "all future production of fissionable materials shall be used or stockpiled exclusively for non-weapon purposes under international supervision." Once "firm commitments" to this effect were obtained, it would be possible to move towards the reduction of existing stockpiles, and the U.S.A. was prepared, under the international Atoms-for-Peace programme, to "make generous, progressive transfers of fissionable material to peaceful uses . . ."

(2) If such an arrangement were put into effect, "it would then be possible in a secure manner to limit and ultimately to eliminate all nuclear test explosions." Pending the attainment of this, the U.S.A. was willing "to work out promptly methods for advance notice and registration of all nuclear tests."

(3) Immediate action toward a "first stage" reduction of "conventional" forces and armaments, using as a basis the figures upon which the five members of the Sub-committee appeared to agree 2,500,000 men for the U.S.S.R. and the U.S.A., and 750,000 for France and the United Kingdom. This would be achieved concurrently with the progressive establishment of an effective inspection system to verify the commitments. In this connexion the United States accepted Marshal Bulganin's proposal for ground observer posts in key positions, in addition to its own scheme for mutual aerial reconnaissance.

(4) The testing of "objects to be propelled through outer space," including inter-continental missiles, long-range unmanned weapons and "space platforms," should be placed "under international inspection and participation" as a first step toward ensuring that future developments in this sphere "would be devoted exclusively to peaceful and scientific purposes."

(5) "The progressive installation of inspection systems which will provide against the possibility of surprise attack." In this connexion the U.S.A. urged that an international agency for the regulation of armaments should be installed concurrently with the beginning of the disarmament programme.

In presenting this resolution, Mr. Lodge stressed that future negotiations on disarmament should be directed toward attaining the following objectives: reversal of the trend toward larger stockpiles of atomic weapons; provision against surprise attack, thereby reducing the danger of major war; lessening of the burden of armaments, thereby making possible improved living standards; ensuring that research and development concerning "the propulsion of objects through outer space" would be devoted exclusively to scientific and peaceful purposes; and the easing of international tensions, thus facilitating the settlement of difficult political issues. Mr. Lodge reiterated that the U.S.A. was ready and willing to take steps toward arms reductions, whether extensive or small, but emphasized that each step must be subject to effective inspection. "This insistence on adequate inspection," he added, "is not a whim. It arises from the deep conviction, after thorough study, that only an inspected agreement would serve the objective of a reliable peace."

The Soviet delegate, M. Kuznetsov, moved a disarmament resolution similar to his Government's proposals of Nov. 17, 1956 (see above). Though denouncing American and NATO policy in general, and the "Eisenhower doctrine" for the Middle East in particular, he said that the Soviet Government would give "careful study" to the proposals presented by Mr. Lodge.

The British delegate, Commander Allan Noble (U.K. Minister of State for Foreign Affairs), made an important speech on Jan. 15 in which he laid emphasis, *inter alia*, on the need to control intercontinental missiles, as proposed by the U.S.A., and on the menace of long-range submarines capable of being used as launching platforms for guided missiles.

Commander Noble suggested that when the five-Power Disarmament Sub-committee resumed its negotiations, it should concentrate on three main points "conventional armaments, experiments in control, and the problem of nuclear test explosions. After expressing continued support for the phased disarmament plan presented by Britain and France in the U.N. Sub-committee in March 1956 (see page 14853, second column), and recapitulating the arguments in its favour, Commander Noble added: "There are other instruments of war, not necessarily in the nuclear category, which are scarcely less menacing than nuclear weapons themselves. The U.S. Government now propose that the development of vehicles entering outer space should be internationally supervised, and that these projectiles should be devoted exclusively to scientific and peaceful ends. This would mean, in fact, the banning provided an adequate control system can be agreed of intercontinental ballistic missiles. The United Kingdom agrees that this question should be urgently studied."

Recalling his own experience as an official observer at the Bikini atom-bomb tests in 1946, Commander Noble declared: "There was a moment in 1945 and 1946 when united action might have prevented the whole development of atomic and thermo-nuclear weapons. We missed that moment to our cost. Today, however, there may be another opportunity which will not long remain to agree on the banning of these new intercontinental ballistic weapons while they are still only in the development stage. We should be failing in our responsibilities if we did not face these facts and give this question the priority it deserves."

Commander Noble (himself a naval officer) went on to emphasize that the long-range submarine was "another weapon of a particularly menacing nature, capable of underwater endurance of up to 15,000 miles. Further," he added, "they can be used as launching platforms for guided missiles. Such submarines are offensive and not defensive weapons. Clearly a disarmament programme which banned the atomic bomb but left such offensive weapons uncontrolled would give little real security." Declaring that long-range ballistic missiles and long-range submarines were "only two examples of the weapons that will have to be covered by a comprehensive disarmament plan," he added: "It will also be necessary to limit and control military aircraft, warships, armoured vehicles, guns of all types, flamethrowers, rockets and other weapons. The U.K. suggests, therefore, that the Disarmament Sub-committee should embark on a study of the problems posed by these weapons."

After debate, the Political Committee adopted on Jan. 25 a 12-nation resolution co-sponsored by the five members of the U.N. Disarmament Sub-committee (the U.S.A., U.S.S.R., Great Britain, France, and Canada) plus Argentina, Brazil, El Salvador, India, Japan, Norway, and Yugoslavia—by 77 votes to nil, with no abstentions. The resolution:

(1) Welcomed "the progress made on certain aspects of the disarmament problem by the Disarmament Commission and its sub-committee since the tenth General Assembly."

(2) Requested the Disarmament Sub-committee "to reconvene at an early date."

(3) Recommended that the Disarmament Commission and the sub-committee should give "prompt attention to the various proposals that have been submitted to the United Nations . . . and continuing consideration to President Eisenhower's plan for exchanging military blueprints and mutual aerial inspection and Marshal Bulganin's plan for control posts at strategic centres."

[The "various proposals submitted to the U.N." included the U.S., Soviet, and Anglo-French resolutions presented during the previous two years; a joint Canadian-Norwegian-Japanese proposal (made during the 11th Assembly session) that all nuclear tests should be registered with the United Nations; an Indian proposal for the suspension of nuclear tests and the establishment of an "arms truce"; and a Yugoslav proposal that the U.N. Sub-committee should seek an early agreement on carrying out "such initial disarmament measures as are now feasible."]

(4) Recommended further that the U.N. Sub-committee should present a progress report to the Disarmament Commision not later than Aug. 1, 1957.

(5) Invited the Disarmament Commission "to consider the advisability of recommending that a special session of the General Assembly or a general disarmament conference be convened at the appropriate time."

In view of the unanimous adoption of the 12-nation resolution, no vote was taken by the Political Committee on the Soviet resolution, nor on the joint request by Canada, Norway, and Japan for registration of nuclear tests with the U.N. The 12-nation resolution was unanimously adopted by the General Assembly on Feb. 14, together with another resolution (also unanimous) asking the U.N. Sub-committee to reconvene in London on March 18.

London Session of U.N. Sub-committee.

In conformity with the U.N. resolution, the sub-committee of the U.N. Disarmament Commission reconvened in London on March 18 and agreed to discuss the various aspects of the disarmament problem in the following order: (1) nuclear tests; (2) reduction of conventional armaments; (3) reduction of nuclear armaments; (4) international control; (5) missiles and rockets; (6) other matters.

The meetings—which continued during April and the first fortnight of May—were held in secret session, but from time to time details were made public of the various proposals and counter-proposals presented. These included (*a*) U.S. proposals for exchanges of information with the U.S.S.R. on nuclear tests, for "first stage" reductions in armed forces, and for international inspection to ensure that fissionable materials were used for peaceful purposes only; (*b*) new disarmament proposals by the Soviet Union including, for the first time, an aerial inspection plan; and (*c*) British proposals for the advance registration and eventual cessation of nuclear tests. Summaries are given below:

American Proposals on Nuclear Control and Arms Reductions.

These were presented on various dates by Mr. Harold Stassen, the U.S. representative on the sub-committee, and dealt with the following subjects:

Exchange of Information on Nuclear Tests. Mr. Stassen proposed on March 28 that the U.S.A. and the U.S.S.R. should exchange information on all nuclear weapon tests carried out by either country during the past two years. While emphasizing that the U.S.A. would be willing "under appropriate conditions" to stop or limit nuclear tests, he stressed that conflicting contentions by U.S. and Soviet experts about the detection of nuclear explosions must first be settled. [Soviet experts had contended that all such tests could be detected, no matter in what part of the world they were carried out, but U.S. experts had expressed doubt whether this was in fact the case.]

The "appropriate conditions" under which the U.S.A. would limit or suspend nuclear tests were outlined by Mr. Stassen as follows: (i) adequate international inspection; (ii) safeguards against the possibility of surprise attack; (iii) reduction of future nuclear arms threats by halting the manufacture of these weapons and ensuring that fissionable materials were used only for peaceful purposes. After pointing out that the U.S.A. and Britain had a policy of minimizing radioactivity resulting from their nuclear tests, and asking if the U.S.S.R. had a similar policy, Mr. Stassen proposed that the question should be discussed between U.S. and Soviet experts.

[Mr. Stassen's statement reflected the agreement between President Eisenhower and Mr. Macmillan at Bermuda on the limitation of nuclear tests and the precautions to be taken in connexion with such tests—see 15457 A.]

Arms Reductions. In a statement on April 8, Mr. Stassen said that if agreement could be reached on an initial cut of 10 per cent in conventional armaments, the U.S.A. would be ready to consider a "second stage" reduction of 15 per cent. He recalled that all five countries represented on the Sub-committee had agreed on initial manpower reductions to 2,500,000 for the U.S.A. and the U.S.S.R. and 750,000 for Britain and France, and suggested that these reductions should be accompanied by a 10 per cent cut in armaments, to be carried out within 12 months under international supervision.

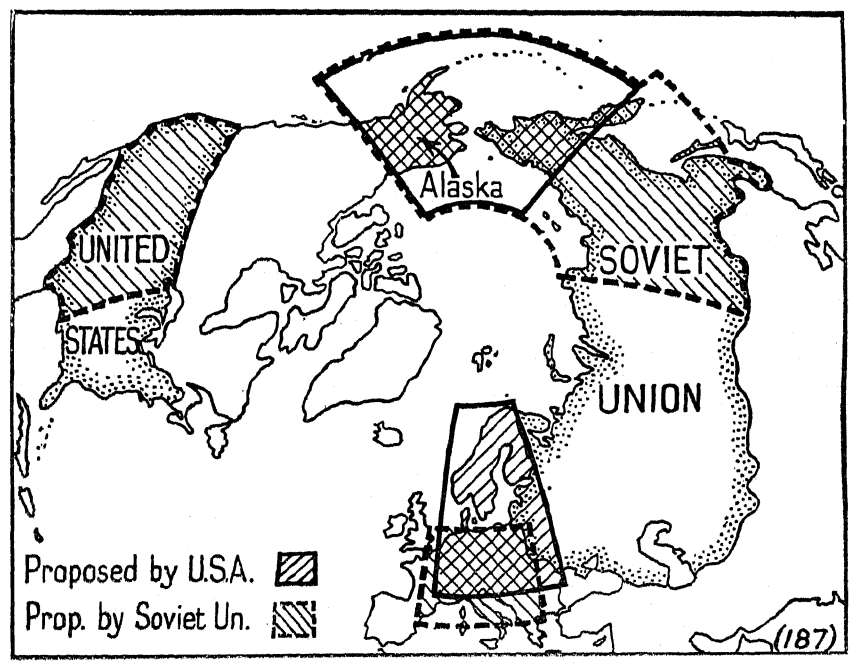
The Soviet representative (M. Valerian Zorin) described this suggestion as an "important step" and promised to consult his Government. No comment was made by the British, French and Canadian delegates.

Nuclear Control Plans. Proposals for the creation of an international inspectorate to ensure that fissionable materials were used only for peaceful purposes were put forward by Mr. Stassen on April 12. The aims of such an organization would be: (1) supervision of further production of such materials; (2) prevention of their use for weapon purposes; (3) gradual transfer of stocks of existing materials to peaceful purposes. Mr. Stassen proposed that technical experts of the five countries should meet in September 1957 to prepare an inspection system and that the inspectorate should begin operations on March 1, 1958.

Commander Noble (U.K.) and M. Jules Moch (France) gave general support to these proposals, though pointing out that they did not go as far as the Anglo-French proposals of March 1956, which provided for an ultimate ban on nuclear armaments in the last stage. M. Zorin criticized the U.S. proposals on the grounds that they did not provide for the elimination of stocks of nuclear weapons or for an unconditional ban on their use.

Soviet Proposals. - Aerial Inspection Plan.

New Soviet proposals for partial disarmament were presented to the sub-committee by M. Zorin on April 30. Among other features, they offered reciprocal aerial inspection differing widely from that proposed by the United States, and covering a large part of the Eastern U.S.S.R. (mainly Siberia) in exchange for an area covering most of the U.S.A. from the Great Lakes westward. In Europe, it was proposed that aerial inspection



The map shows (i) the areas proposed by the United States for reciprocal aerial inspection; (ii) the areas proposed by the U.S.S.R. (By permission of *The Times*)

should extend over an area which would include England east of the Greenwich meridian and up to latitude 54 degrees N., France and the Low Countries, Italy, Germany (East and West), Central Europe, the greater part of the Balkans down to the southern frontier of Albania, Poland, and a small part of the Western areas of the Soviet Union.

The Soviet proposals included the following:

Reduction in Armed Forces. A two-stage reduction in armed forces to be carried out as follows: (1) in the first stage, reductions to 2,500,000 men each for the U.S.S.R., the U.S.A. and China, and to 750,000 men each for Britain and France; (2) in the second stage, further reductions to maxima of between 1,000,000 and 1,500,000 men each for the U.S.S.R., the U.S.A. and China and 650,000 men each for Britain and France.

[On the question of reducing armed forces, the Soviet plan made use of an argument not previously advanced—namely, that the U.S.S.R.'s need for armed forces was greater than that of the United States. It was argued that whereas the Soviet Union had long frontiers which were "threatened" by the NATO, SEATO, and Baghdad Pact powers, the U.S.A. was separated from Europe and Asia by oceans and bordered on the north and south by countries (i.e. Canada and Mexico) which presented no threat to her security.]

Reduction in Armaments. A 15 per cent cut during the first stage of troop reductions, accompanied by corresponding reductions in military expenditures. Further arms cuts during the second stage.

Controls and Ground Inspection. The above-mentioned reductions would be carried out under "an appropriate international control" which, during the first stage, would include examination (by a control

organ established under the aegis of the Security Council) of information provided by the States concerned on measures taken by them. Ground control and inspection would be carried out in the following manner :

(i) During the first stage, reciprocally at large ports, rail junctions, and main motor-roads so as to check dangerous concentrations of troops. Such posts would be established in the Western border regions of the U.S.S.R., the territories of the NATO and Warsaw Pact countries, and the eastern part of the United States ; also, possibly, in other States within the zones subject to aerial photography.

(ii) During the second stage, control posts would also be established at airfields. [This stage would only be carried out *pari passu* with an agreement for complete prohibition of nuclear weapons.]

Nuclear Weapons and Tests. It was proposed that agreements for the reduction of conventional and nuclear weapons should be concluded simultaneously ; that States should renounce such weapons - including bombs, rockets, atomic artillery, etc.—with effect from the beginning of the first-stage reductions ; and that agreement should be reached on the banning of nuclear weapons, the ending of their production, and the destruction of existing stocks. The discontinuation of nuclear weapon tests should be given the highest priority and achieved without delay.

Foreign Bases. - Forces in Germany. The proposals repeated the earlier Soviet calls for the liquidation of foreign bases within one or two years, and for the reduction of the NATO and Warsaw Pact forces in Germany.

Aerial Inspection. As regards Europe, it was recalled (i) that the U.S.S.R. had proposed (on Nov. 17, 1956) aerial inspection to a depth of 500 miles on either side of the east-west demarcation line in Germany and along the Western frontiers of Czechoslovakia ; (ii) that the U.S.A. had proposed an area limited in the West by longitude 5 deg. E., in the east by longitude 30 deg. E., and in the south by latitude 45 deg. N. (see map on page 15521). The Soviet Union would accept the latter area with modifications, keeping the dividing line of the area near the present demarcation line in Germany, limiting the sector in the north to the northern limits of Germany, and drawing its southern boundary through the extreme south of Albania. Accordingly, the U.S.S.R. proposed that aerial inspection in Europe should be carried out in an area " limited in the west by zero [Greenwich] meridian, in the east by longitude 25 deg. E., in the north by latitude 54 deg. N., and in the south by latitude 39 deg. 38 sec. N."

As regards the Far East, the U.S.A. had proposed aerial inspection within a sector from longitude 140 deg. W. to longitude 160 deg E., limited in the south by latitude 45 deg. S. (See map). The Soviet Government would expand this area to include (*a*) territory of the Soviet Union east of longitude 108 deg. E. ; (*b*) territory of the United States west of longitude 90 deg. W., thus making the two areas approximately equal (Soviet Union, 7,129,000 square km., or about 2,780,000 square miles ; United States, 7,063,000 square km., or about 2,730,000 square miles).

The Tass Agency issued a statement on the same day (April 30) saying that the Soviet Government's aerial inspection proposals were " designed to meet the Western Powers halfway," in view of the importance attached to this question by the U.S. Government and by President Eisenhower.

As shown on the map, the respective aerial inspection plans for Europe differed in the following respects : (1) The American plan would exclude the British Isles, much of France, the greater part of Italy, and most of the Balkans except Rumania, but would include Scandinavia, Finland, and a considerable area of the Western U.S.S.R., including Leningrad and the Baltic republics. (2) The Soviet plan, on the other hand, would exclude Scandinavia, Finland, and the Western regions of the U.S.S.R., apart from a small strip of territory adjoining the Polish frontier, but would include practically the whole of France, south-east England (including London), north-eastern Spain, almost the whole of Italy, and the Balkan peninsula with the exception of Greece, eastern Bulgaria and eastern Rumania.

As regards the Far East and the American continent, the U.S. plan envisaged aerial inspection in Alaska, the Aleutians, and north-eastern Siberia, including part of the Kamchatkan peninsula. The Soviet plan included these areas but broadened them to include (*a*) a large part of eastern Siberia, including Sakhalin and the whole of Kamchatka, and extending southward to the Chinese and Korean frontiers ; and (*b*) the Western United States from the Pacific Coast to the Great Lakes.

No comment was made by the Western delegates on the new Soviet proposals, apart from a statement by the French delegate (M. Moch) that France was prepared to renounce nuclear tests if the U.S.S.R., the U.S.A., and Britain also renounced the production of nuclear weapons and agreed to a procedure for reducing nuclear stocks.

British Proposals for Registration and Limitation of Nuclear Tests.

At the sub-committee's meeting on May 6, Commander Noble put forward the following British proposals for the registration, limitation, and ultimate cessation of nuclear weapon tests :

Registration. The British, U.S., and Soviet Governments should draw up an agreement whereby nuclear tests carried out by the three countries would be registered in advance with the United Nations, as proposed in the Canadian-Norwegian-Japanese draft resolution submitted to the General Assembly. Britain would agree to " limited international observation " of such tests.

Limitation. A committee of technical experts should be established (within the framework of the Sub-committee) to consider possible methods of limiting nuclear test explosions and to investigate " the requirements of effective supervision over an agreement to limit such explosions." The results of this investigation might be co-ordinated with the work of the body of experts which, as suggested by Mr. Stassen, should prepare a general system of nuclear control.

Cessation. The cessation of all nuclear test explosions should follow the prohibition of the production of fissile materials for weapons purposes, as part of a general disarmament agreement.

No official comment on the British proposals was made by the U.S., French, or Canadian delegates, but M. Zorin, though not specifically rejecting them, suggested that they contained " nothing of practical value " which would help toward the banning of nuclear weapon tests.

Norwegian Memorandum on Registration of Nuclear Tests.

Details of the proposals for registration of atomic tests, put forward jointly by Canada, Japan, and Norway at the U.N. General Assembly, were submitted by the Norwegian Government on April 26 to the Disarmament Sub-committee in London. The Norwegian memorandum proposed (1) that any Government intending to carry out test explosions should notify the U.N. Secretary-General at least six months in advance, and (2) that all relevant information should be sent to the Secretary-General at least three months in advance. Specific information to be disclosed should include the number of tests planned, the dates and location of each, the limits of the danger zone, relevant reports on meteorological and oceanographical conditions, estimates of the type and quantity of radioactive " fall-out " both inside and outside the danger zone, and the geographical area likely to be affected.

(Prev. rep. Disarmament Negotiations, 14851 A)

A. UNITED KINGDOM. — Gold and Dollar Reserves.

The Treasury announced on May 2 that the sterling area's gold and dollar reserves had risen during April by $111,000,000, after taking into account (*a*) the return to the reserves of the $104,000,000 of interest on the U.S. and Canadian loans which had been paid into special accounts at the end of 1956 but had now been paid back under the new debt service arrangements with the U.S.A. and Canada (see 15442 A) ; (*b*) the receipt of $2,000,000 of U.S. defence aid ; (*c*) the payment of $6,000,000 in gold or dollars to the E.P.U. in respect of the March settlement ; and (*d*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral agreements. As a result, the reserves stood at $2,320,000,000 on April 30.

It was pointed out in the Press that, leaving out of account the above-mentioned receipts and payments, the residual balance with the dollar area and the rest of the world outside the E.P.U. was in surplus by $14,000,000, reflecting a marked underlying improvement. It was also stressed that in spite of further dollar expenditure on oil imports, none of this extra cost had necessitated drawing on the Export-Import Bank credit. The gold and dollar figures did not benefit in April from any further Indian drawings from the International Monetary Fund, whereas in March such drawings had amounted to $60,500,000, part of which was transferred to London, while in February these drawings had been $59,000,000, the whole of which was passed to the sterling area's reserves.

Provisional figures for the E.P.U. March settlement showed that Britain had a surplus of £16,000,000, three-quarters of which would be settled in gold or dollars and the remaining quarter by a reduction of the U.K.'s debt to the Union.

The improvement in Britain's position *vis-à-vis* the E.P.U. was reflected in the persistent improvement in the transferable sterling rate in Switzerland over the past few weeks, which on May 2 reached $2.7765—the highest point since June 14, 1956, and within a fraction of the lower point of the official dollar rate.—(Treasury Press Office - Financial Times) **(15498 B.)**

B. RUMANIA. — Attaché expelled from Britain.

The Rumanian Minister in London (M. Corcinschi) was summoned to the Foreign Office on May 6 and handed an *aide-mémoire* asking for the recall within one week of M. Eugen Perianu, an attaché at the Rumanian Legation. The *aide-mémoire* said that it had come to the notice of H.M. Government that M. Perianu had " been putting pressure on persons who are of Rumanian origin or who have relatives in Rumania in attempts to recruit them as spies," and that M. Perianu had been asked to leave Britain " in view of these improper activities." A Foreign Office spokesman said that H.M. Government " will not tolerate any interference with refugees in the U.K. and have . . . taken immediate steps to deal with any instances which are brought to their notice." (Times)

A. FRANCE. — State Visit of Queen Elizabeth II.

H.M. Queen Elizabeth II and the Duke of Edinburgh paid a four-day State visit to France from April 8-11 as the guests of President Coty. The first three days were spent in Paris, where her Majesty and the Duke stayed at the Elysée (the Presidential palace), and the fourth in a visit to Lille and Roubaix. Throughout their visit her Majesty and the Duke were greeted with the greatest enthusiasm in Paris—the crowds being the largest ever assembled to greet a visiting Head of State—and in the industrial cities of Northern France.

The Queen and the Duke of Edinburgh arrived at Orly airport on the morning of April 8, where they were welcomed by President Coty, M. Mollet and other senior Ministers, and the British and Commonwealth Ambassadors. From Orly they drove to the Elysée Palace, entering Paris at the Porte d'Orléans to a salute of 101 guns and being escorted to the Elysée by mounted squadrons of *Gardes Républicaines*. After a private luncheon, at which the Queen presented President Coty with the insignia of Knight Grand Cross of the Order of the Bath and the President conferred the Grand Cross of the Legion of Honour (which the Queen already holds) on the Duke of Edinburgh, her Majesty and the Duke drove along the Champs Elysées to the Arc de Triomphe, where they laid a wreath on the Tomb of the French Unknown Warrior.

After receiving the heads of the diplomatic missions in Paris, the Queen and the Duke attended a State banquet at the Elysée at which her Majesty, speaking in French, replied to an address of welcome from President Coty. After referring to the *entente cordiale* which King Edward VII had helped to create, and which had since become "an alliance whose bonds have been forged in the fires of two World Wars," the Queen continued :

"Mutual trust between our two countries was fostered and developed during the reigns of my grandfather and my father, until it has become to-day the firmest link holding together two nations of the Old World which can still play a role in the future as inspiring as in the past. Our rivalries in earlier times, while they contrast with the mutual understanding of to-day, were only its prelude. Sir Winston Churchill, after playing his part in the events of our times, has looked back over the centuries and this simple truth emerges from his *History of the English-Speaking Peoples*—that in the heroic ages of the past the lives of our great men and yours were inextricably bound. We find that our greatest families, statesmen, churchmen, were often born on this side of the Channel. The names of French provinces are associated with our very first memories and have inspired our poets : proud Brittany, whose seafaring traditions we share, valiant Normandy and Anjou, the nurseries of our kings in the past.

"Down the centuries our traditions, our customs, have been moulded by yours. They in turn have been influenced by ours. It is therefore natural that the flame of free France should have remained bright so long as England stood. It is natural also that our soldiers, and those of all the English-speaking peoples, should have made common cause with yours During the darkest days our people were cheered by the comradeship and support of French airmen, soldiers, and sailors, by their feats of arms, and by the daring exploits of the Resistance. I pay tribute to-day to their courage, their faith in France, and their devotion to our common traditions. Our two nations are each the complement of the other . . . "

After the State banquet her Majesty and the Duke, accompanied by President Coty, drove to the Opéra to attend a gala performance of a ballet by Serge Lifar. During the interval the Queen and the Duke appeared on the balcony of the Opéra and were enthusiastically greeted by the vast crowds—estimated at over 150,000—gathered outside the building.

On April 9 the Queen and the Duke drove through the Quartier Latin, the Boulevard St. Germain and the Boulevard St. Michel to the Hôtel de Ville, where they attended a reception given by the President of the Paris Municipal Council (M. Ruais) and the civic authorities. From the Hôtel de Ville they drove to Versailles where, after lunching with 300 guests in the Galérie des Glaces, they attended the inaugural performance (Rameau's *Les Indes Galants*) in the newly restored Royal Opera House at the Château de Versailles. [This theatre, built by Jacques-Ange Gabriel in the 18th century for Louis XV, fell into disuse and decline during the 19th and 20th centuries. During the past five years it has been completely restored at a cost of some 600,000,000 francs (£600,000), and is today one of the most beautiful opera houses in the world.]

After their visit to Versailles her Majesty and the Duke drove to the Grand Trianon to receive the representatives of the Commonwealth countries, returning to the Elysée after a brief visit to the Paris Chamber of Commerce. In the evening more than half a million Parisians lined the Seine to watch a brilliant river pageant in which the Queen, the Duke, and President Coty sailed for an hour and a quarter in a decorated motor-launch from the Port du Gros Caillou (between the Pont d'Alma and the Pont des Invalides) to the Ile St. Louis and back, followed by a flotilla of nine vessels which included one for Deputies of the National Assembly and another for the members of the Paris Municipal Council. Historical *tableaux vivants*, fireworks, massed choirs of children, and dancers in the provincial costumes of Normandy, Brittany, and other regions greeted the Queen as she sailed past the *quais* and bridges on the Seine. The day's events concluded with a reception given by the Queen at the British Embassy for President Coty.

On the third day of their visit to Paris (April 10) the Queen drove in the morning to the Rue Bayard to lay the foundation-stone of the new Scottish Presbyterian Church to be erected in place of that damaged in the war ; the ceremony was attended by the Moderator of the Church of Scotland, and the Queen was greeted by pipers of the Scots Guards, The Royal Scots, and the Argyll and Sutherland Highlanders. After a visit to Meudon (a south-western suburb of Paris) to open a new sports pavilion for the British and Commonwealth community in Paris, her Majesty drove to the Château de La Celle-St.-Cloud to attend a luncheon given by M. Pineau, the French Foreign Minister. The Duke of Edinburgh, who had spent the morning visiting the French Atomic Energy Centre at Saclay, joined the Queen in the afternoon for a visit to the Renault motor works at Flins, 25 miles west of Paris, after paying a call on General Norstad (Supreme Allied Commander in Europe) at the latter's residence at Marnes-la-Coquette. In the evening her Majesty and the Duke attended a banquet and reception given by the French Government at the Louvre, in the Salle des Cariatides.

The Queen and the Duke of Edinburgh flew from Le Bourget in the morning of April 11 to Lille, where they attended a municipal reception at the Hôtel de Ville, lunched at the Préfecture, and visited the annual flower market in the Place du Général de Gaulle. After driving to Roubaix, where they visited the Hôtel de Ville and the Prouvost textile factory, one of the largest and most modern of its kind in Europe, they returned to Lille and boarded a plane for London.

B. BRITISH WEST INDIES. — Lord Hailes appointed Governor-General of the West Indies.

It was announced in London on May 10 that the Queen had approved the appointment of Lord Hailes (formerly Mr. Patrick Buchan-Hepburn, Minister of Works in Sir Anthony Eden's Government) as the first Governor-General of the West Indies—i.e. the new West Indian Federation.

Lord Hailes (56), educated at Harrow and Trinity College, Cambridge, served at H.M. Embassy at Constantinople (1925-27) and on the London County Council (1929-30) before entering Parliament in 1931 as Conservative M.P. for the East Toxteth division of Liverpool, a constituency he represented for nearly 20 years. From 1950 onwards he sat for Beckenham until his recent elevation to the peerage at the time Mr. Macmillan formed his Government (see 15313 A). He was Conservative Chief Whip from 1948, Government Chief Whip from 1951-55, and Minister of Works from 1955 until January 1957, with Cabinet rank.

On his elevation to the peerage Mr. Buchan-Hepburn took the title of Baron Hailes, of Prestonkirk in the County of East Lothian—thereby reviving a title which had been dormant since the 16th century, when it was forfeited to the Crown. The title of Hailes—taken from an ancient castle of that name, now in ruins—was granted to the Hepburn family in 1343, Patrick Hepburn of Hailes (an ancestor of the present Lord Hailes) being created the first Baron Hailes in 1455. The second Lord Hailes became Earl of Bothwell in 1455 and the fourth Earl, James Hepburn, was the husband of Mary Queen of Scots.

"The West Indies" is the name given to the new Federation comprising the colonies of Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, St. Christopher-Nevis and Anguilla, St. Lucia, St. Vincent, and Trinidad and Tobago.

C. RELIGIOUS LIFE. — Roman Catholic Church. - New Archbishop of Liverpool.

It was announced on May 7 by the Apostolic Delegation to Great Britain that the Pope had appointed Dr. J. C. Heenan, Roman Catholic Bishop of Leeds, to the Archdiocesan See of Liverpool in succession to Dr. William Godfrey, consequent upon the latter's appointment as Roman Catholic Archbishop of Westminster in place of the late Cardinal Hinsley. Dr. Heenan, Bishop of Leeds since 1951, was born at Ilford (Essex) in 1905 and ordained in 1930. He is well known as broadcaster, lecturer and author, and has been Superior of the Catholic Missionary Society.—(The Universe) **(15259 A.)**

D. UNITED STATES. — Lifting of Restrictions on Travel to Middle East Countries.

Restrictions on the travel of U.S. citizens to Egypt, Israel, Jordan and Syria, imposed in November last during the Suez crisis, were lifted on April 1 by the State Department. American officials who had been evacuated from the Middle East at the time were authorized to return to their posts in those countries.

E. NATIONALIST CHINA. — Formosan Elections.

Elections on April 21 for the Formosan Provincial Assembly resulted in President Chiang Kai-shek's Kuomintang party winning 46 of the 66 seats, the party having entered 55 candidates. The Kuomintang also won four out of five mayoral elections in the leading cities, including Taipeh, the capital.

A. CANADA - UNITED STATES. — Suicide of Canadian Ambassador in Cairo following Allegations of "Communist Associations" by U.S. Senate Sub-Committee. - Allegations rejected by Canadian Government. - Denunciation of Sub-committee's Methods by Canadian Political Leaders. - Canadian Protests to U.S.A. - Request for Assurances on Use of Security Information.

The Canadian Ambassador to Egypt, Mr. E. H. Norman (48), jumped to his death from the roof of an apartment building in Cairo on April 4. His suicide was believed to have been caused by depression arising from the revival of allegations by the U.S. Senate Internal Security Sub-committee that he was a Communist. A note found in his pocket after his death, addressed to his friend, Mr. Carl Eng (the Swedish Minister in Cairo), ran: "I have no option. I must kill myself, for I live without hope."

Egerton Herbert Norman was born in Japan, where his parents were missionaries. He studied at the Universities of Toronto, Cambridge, and Harvard, and in 1939 joined the Canadian Foreign Service as language officer at the Canadian Legation in Tokio. Interned in Japan at the outbreak of war, he was released in July 1942 and thereafter worked in Ottawa, Manila, and Washington. After the Japanese surrender he returned to Tokio in 1946 as head of the Canadian liaison mission. From 1950-53 he was acting chief of the Canadian delegation to the United Nations; in the latter year was appointed High Commissioner to New Zealand; and in August 1956 became Ambassador in Cairo. A Japanese scholar and an expert on Asian affairs, he was the author of three authoritative works on Japan.

Allegations that Mr. Norman was a Communist were first made by the U.S. Senate Internal Security Sub-committee in 1951. As a result, the Canadian authorities subjected Mr. Norman to an exhaustive security check which completely cleared him of the charges made by the sub-committee. The allegations were renewed, however, at a hearing of the sub-committee on March 12, 1957. Although Mr. J. K. Emmerson (Counsellor at the U.S. Embassy in Beirut) testified at this hearing that he had known Mr. Norman since 1940 and had no reason to believe that he was a Communist, Mr. Robert Morris (the sub-committee's counsel) said that the sub-committee had "quite a few" security reports to the effect that Mr. Norman was, in fact, a Communist.

The renewal of these allegations against Mr. Norman was strongly resented by the Canadian Government.

In a statement to the Dominion House of Commons on March 15, Mr. Lester Pearson (Canadian Minister for External Affairs) spoke scathingly of the activities of the U.S. Senate Sub-committee, and described its references to Mr. Norman as "slanders and insinuations which will be treated with the contempt they deserve." Mr. Pearson complained particularly that "Senator **Jenner** [a member of the sub-committee] and his counsel, Mr. **Morris**, whose methods of investigation we already know about and for which we have very little respect, gave this record of an executive session to the U.S. press before passing it on to the Canadian Government, although it made serious allegations against a senior Canadian diplomatic representative." Mr. Pearson emphasized that the Canadian Government had had the fullest confidence in Mr. Norman and that "the strongest possible protest" would be made to Washington.

On March 16 the U.S. State Department issued a statement publicly repudiating the allegations made by the Senate Sub-committee and declared that "the allegations which have been made regarding Mr. Norman . . . do not represent opinions of the U.S. Government." The statement added that the United States "maintains the friendliest relations with Canada and has every confidence in the Canadian Government's judgment in the selection of its official representatives."

The Canadian Government's formal protest was delivered in Washington on March 18.

After protesting against "the action taken by an official body of the legislative branch of the U.S. Government in making and publishing allegations about a Canadian official," the Note declared: "This procedure is both surprising and disturbing because it was done without the U.S. Government consulting or even informing the Canadian Government and without taking account of relevant public statements made earlier by the Canadian Government." After recalling that Mr. Norman's loyalty had been confirmed by earlier investigations, the Note concluded: "The repetition of such irresponsible allegations . . . is the kind of action which is inconsistent with the long-standing and friendly co-operation characterizing relations between our two countries."

Despite the U.S. Administration's disavowal, the Senate Internal Security Sub-committee reiterated its charges against Mr. Norman on March 28, when it made public testimony by the sub-committee's counsel (Mr. Morris) that the Federal Bureau of Investigation had given the State Department information confirming the allegations made in 1951 that Mr. Norman had Communist associations.

Canadian and U.S. Reactions to Mr. Norman's Suicide.

The news of Mr. Norman's suicide aroused widespread anger and indignation in Canada, leaders of all the political parties strongly denouncing the methods of the U.S. Senate Sub-committee and the unfounded nature of the allegations made against Mr. Norman.

Mr. Lester Pearson said on April 4 in the Canadian House of Commons, that Mr. Norman had been depressed by "the resurrection by one or two persons in Washington of certain old charges affecting his loyalty which were disposed of years ago." He added:

"The reason for these renewed attacks may be obscure but the tactics used degrade those who adopted them. The combined effect of overwork, overstrain, and the feeling of renewed persecution on a sensitive mind and a not very robust body produced a nervous collapse, the tragic result of which has brought to me personally both shock and grief and a sense of great loss. For 18 years Mr. Herbert Norman served his country with loyalty, devotion, and ability. During that time all his actions served only to confirm and strengthen my faith in him and my admiration for him. During recent critical months in the Middle East he has been working or rather over-working - under great pressure at Cairo, at times right round the clock."

Mr. Diefenbaker, leader of the Progressive Conservative Opposition, said that Mr. Norman's death seemed "to be attributable to the witch-hunting proclivities of certain Congressional inquisitors in Washington, who, lacking local targets, felt impelled to malign and condemn Canadian public servants as well. Desirable as it is to preserve our freedom against Communism, this is but further evidence that trial by suspicion and conviction by innuendo have terrible results on the lives of those subjected to it."

Mr. Macdonald, a prominent member of the C.C.F. (Canadian Labour Party) declared that "there is little doubt that the insinuations against this respected Canadian diplomat played a role in the tragedy. All who knew him personally . . . recognize how completely malicious these suggestions were."

Spokesmen of the Progressive Conservative, C.C.F., and Social Credit parties expressed their full agreement with the Canadian Government's attitude.

The U.S. Secretary of State, Mr. Dulles, sent a personal message of condolence to Mr. Pearson on receipt of the news of Mr. Norman's death, while on April 11 President Eisenhower expressed his regrets to the Canadian Ambassador.

On behalf of the Senate sub-committee, however, Senators Eastland and Jenner (chairman and former chairman respectively) issued a statement on April 4 which said:

"We would not be living up to our obligations of presenting a record to the U.S. Senate if we deleted references to foreign nationals in connexion with these investigations of Communism in the United States. If foreign nationals enter the U.S.A. and join Communist units here and participate with American Communists in the subversion of our institutions, these facts should be known to the Senate . . . [The above] is the practice of the sub-committee, and we shall continue this practice because it is our duty to do so."

Canadian Request for Assurances on Use of Security Information.

Mr. Lester Pearson told the Canadian House of Commons on April 10 that the Canadian Government had asked the U.S. Government to give an assurance that any security information received from Canada concerning Canadian citizens would not be passed to any bodies outside the control of the Executive Branch, except with the express consent of the Canadian Government in each case. Otherwise Canada "must reserve the right in future not to supply security information concerning Canadian citizens to any U.S. Government Agency."

[Under a long-standing arrangement, the Royal Canadian Mounted Police and the American F.B.I. exchange security information, the R.C.M.P. maintaining an agent in Washington and the F.B.I. one in Ottawa. The loss of Canadian information could have a serious effect on U.S. internal security, as the R.C.M.P. helps to prevent subversive elements from penetrating into the United States from Canada.]

Mr. Pearson also announced that he had received a reply to the Canadian Note of March 18 from the U.S. Acting Secretary of State, Mr. Herter. After offering his condolences on the death of Mr. Norman, Mr. Herter said:

"I wish to assure you [Mr. Pearson] that any derogatory information developed during hearings of the sub-committee was introduced into the record by the sub-committee on its own responsibility. As you are aware, under our system of government the Executive Branch has no jurisdiction over views or opinions expressed by members or committees of the U.S. Congress . . ."

An interim reply to the Canadian request of April 10 was made on April 19 by Mr. Robert Murphy (U.S. Deputy Under-Secretary of State) who gave an assurance that the Canadian Government's views were receiving "the serious attention" of the State Department. Mr. Murphy added: "The Department is bringing to the attention of the appropriate executive agencies your Government's position in the exchange of information, which, as stated in your Note, has assisted substantially in maintaining the security of our two countries." (Canadian Department of External Affairs, Ottawa - Montreal Star - New York Times - New York Herald Tribune)

A. KASHMIR. — Security Council Resolution for Hr. Jarring to consult Indian and Pakistani Governments. - Indian Criticisms of Resolution. - Denial of Pakistani Allegations of Indian Troop Movements. - Statements by Mr. Suhrawardy and Mr. Nehru. - Hr. Jarring's Mission to India and Pakistan. - Report to Security Council.

A resolution calling on Hr. Jarring, the Swedish representative on the U.N. Security Council and its president for February, to examine with the Governments of India and Pakistan proposals for the settlement of the Kashmir dispute was submitted to the Council on Feb. 15 on behalf of the United Kingdom, the U.S.A., Australia, and Cuba, four of the five countries which had sponsored the earlier resolution presented on Jan. 24.

The preamble to the resolution stressed the importance of earlier resolutions calling for a plebiscite under U.N. auspices, and, in particular, of their emphasis on demilitarization; expressed concern at "the lack of progress in settling the dispute"; and stated that Pakistan's proposal for a U.N. Force in Kashmir would "deserve consideration." The resolution proper, as previously stated (see 15381 A), asked Hr. Jarring to examine proposals "likely to contribute to the achievement of demilitarization in Kashmir or to the establishment of other conditions for progress" with the two Governments, bearing in mind "the proposal for the use of a temporary U.N. force," and to report to the Security Council by April 15.

Sir Pierson Dixon (U.K.), who submitted the resolution, stressed that Britain's only concern was to achieve a solution acceptable to both sides. Neither side denied that a solution was urgent and both agreed that the next step must be demilitarization, since no subsequent step was possible until this was achieved. What had held up progress over the years had been (1) India's contention that the "Azad Kashmir" forces would be a threat to the security of the State, and (2) Pakistan's contention that if 21,000 Indian and State forces were allowed to remain on the Indian side of the cease-fire line, as against only 6,000 "Azad Kashmir" forces, the security of "Azad Kashmir" would be in serious jeopardy. The root cause of the breakdown on both sides had been fear of the dangers which might arise from the forces on the other side, and for this reason Britain thought that the idea of a small, temporary U.N. force was worthy of further examination with the two Governments.

The representatives of Australia, the U.S.A., Cuba, the Philippines, and Nationalist China also spoke in support of the resolution.

Hr. Jarring said that his Government was "fully prepared to accept the idea behind the draft resolution," but if it proved impossible to solve the problem in this manner Sweden might wish to revert to the suggestion of having the legal background of the question clarified by reference to the International Court of Justice for an advisory opinion.

Mr. Krishna Menon (India) assured Hr. Jarring that he would be welcome at any time, but that "the question of the functional character of such operations as you propose to undertake would be another matter which we should have to discuss in substance." Sir Pierson Dixon, he continued, had laid stress on what was called demilitarization, but this must be interpreted in the connotation which it had acquired over years of negotiation. "Demilitarization" was a word which had arisen as one of the methods for creating the conditions laid down in the first part of the agreement of Aug. 13, 1948 (see 9661 A).

Mr. Menon went on to say that in the area of Kashmir "administered by the legitimate Government" there were units of the Indian Army and about 6,000 men of the Kashmir militia, which was a State force intended for internal security purposes, and that the total strength of India's military position in Kashmir was far below what it had been at the time of the cease-fire. On the other side of the cease-fire line there were some 45 battalions of "Azad Kashmir" forces, officered by the Pakistani Army, as compared with some 35 battalions at the time of the cease-fire. In addition the Pakistani Army, which was "out of all proportion to its strength at the time of partition" and consisted of over 200,000 men equipped by Britain and the U.S.A., was stationed within a very short distance of the Indian frontier. After accusing Pakistan of having violated the cease-fire clauses of the U.N.C.I.P. resolutions by introducing military personnel and material into Kashmir, Mr. Menon reiterated that India's basic position was that Pakistan had originally committed aggression and that it was the task of the Security Council to address itself to this position.

Rejecting the proposal for a U.N. force, Mr. Menon said that such a force was not necessary to achieve demilitarization. All that was necessary was for Pakistan to withdraw and give international guarantees that her forces would not move out of their present positions. "The Indian Government will in no circumstances permit foreign troops on its soil," Mr. Menon declared. "That is the categorical statement which I am asked to make to the Council."

Mr. Firoz Khan Noon (Foreign Minister of Pakistan), replying to Mr. Menon on Feb. 18, said that India had recently ordered 65 long-range *Canberra* bombers and 300 tanks from Britain, and alleged that they were intended for aggression against Pakistan. Pakistan's armed forces were one-third the size of India's and India's expenditure on defence, which constituted 40 per cent of its Government revenue, was four times as large as Pakistan's. India, he alleged, had six divisions, four independent brigades, and an armoured brigade on the border of West Pakistan, and more troops were said to be moving in that direction He denied that the "Azad Kashmir" forces had been increased

Continuing, Mr. Noon said that he agreed with India that the U.N.C.I.P. resolutions were the only international agreements existing on this question. What now faced the Council was the implementation of the agreement to hold a plebiscite. It was an "untenable argument" to contend, as India did, that the plebiscite had to await demilitarization and, since demilitarization had not been achieved, that the agreement for a plebiscite had fallen through A settlement had to be achieved step by step. Pakistan had tried every means available under the U.N. Charter, the Security Council, and other methods proposed by U.N. bodies to reach a settlement, but Kashmir was still not demilitarized.

The Government of Pakistan, he announced, would accept the resolution and give Hr. Jarring all possible co-operation. On the proposal for a U.N. force, he said that its object was not to disarm or disband the forces in Kashmir—which was a task for the U.N. representative or a Plebiscite Administrator, as the case might be—but simply to create confidence in the minds of the two sides so as to enable them to carry out their agreement without the fear that the other side would invade if they withdrew. As India had already agreed to demilitarization, she would be retracting her own agreement if she refused entry to a U.N. force. Presuming India's agreement, Pakistan would allow a U.N. force to pass through her territory and take up positions on the cease-fire line, but might not be willing to do so if India did not also agree. He therefore hoped that Hr. Jarring would be able to obtain India's agreement.

The Soviet delegate, M. Sobolev, submitted on Feb. 18 three amendments to the draft resolution eliminating the references to a plebiscite, to the introduction of a U.N. force, and to the time-limit of April 15. Dr. Urrutia (Colombia) also submitted three amendments which (1) replaced the preamble by the words: "The Security Council, recalling its previous resolutions and the letter addressed to the president of the U.N.C.I.P. on Dec. 23, 1948 . . ." (by Mr. Nehru); (2) requested Hr. Jarring to "examine with India and Pakistan proposals which in his opinion are likely to contribute to the achievement of . . . the U.N.C.I.P. resolutions of Aug. 13, 1948, and Jan. 5, 1949, or to the establishment of other conditions for progress toward a settlement of the problem, bearing in mind statements of the representatives of the Governments of India and Pakistan, proposals for the use of a temporary U.N. force if accepted by the parties, or the possibility of referring the problem to the International Court"; and (3) asked Hr. Jarring to report to the Security Council, if possible, "not later than April 15."

M. Sobolev maintained that there was no point in referring to the holding of a plebiscite which was rejected by one of the parties. Furthermore, the U.N. Charter did not provide for the use of armed force for any other purpose than to repel aggression and to restore international peace, and therefore did not envisage "the use of U.N. forces for the purpose of forcibly holding a plebiscite in Kashmir." If the purpose of the resolution was to entrust Hr. Jarring with a mission to consider the possibility of settling existing differences, it could encounter no objection, but there was no need to tie his hands with proposals which could lead to objections from one side.

Dr. Urrutia maintained that Hr. Jarring could not be asked to seek a juridical solution and obtain conciliation at the same time "Either we must define the juridical status of Kashmir, which means turning to the International Court," he declared, "or we follow the resolution of the U.N.C.I.P., according to which we would not examine the legal status of Kashmir but would attempt to obtain an agreement to hold a plebiscite, on the condition that all prerequisites were fulfilled before the status of the territory was decided by a plebiscite." The resolution should also mention Mr. Nehru's letter of Dec 23, 1948, to the president of the U.N.C.I.P., which specified that India's agreement to a plebiscite was conditional on the withdrawal of the Pakistani forces from "Azad Kashmir," as this was "the only legal basis" on which the Council could demand a plebiscite.

Mr. Menon alleged on Feb. 20, in reply to Mr. Noon, that "feverish war preparations" were going on in Pakistan and that "Azad Kashmir" had been turned into a base for attack on India. He alleged also that General Ayub Khan (C.-in-C. of the Pakistani Army) had recently referred to exercises envisaging the use of tactical atomic weapons to cross riverine obstacles; this, said Mr. Menon, could only refer to India, as the only rivers in the sub-continent were on the Indian side of Pakistan. Denying Mr. Noon's allegations of Indian troop movements, he said that India had done nothing in the way of concentrating troops, "even though we acknowledge the danger we are facing," and pointed out that negotiations for the bombers which India was buying from Britain had begun 2½ years ago. Mr. Menon again criticized the reference to a U.N. force in the resolution, and declared that in India's view the entry of such a force even into that part of Kashmir "now under enemy occupation" would violate the U.N. Charter, and that any State whose soldiers were part of that force would "individually violate our sovereignty."

The Soviet amendments were rejected on Feb. 20 by two votes (Cuba and the Philippines) to one, with eight abstentions. Voting on the Colombian amendments was one vote in favour and none against, with 10 abstentions. The resolution itself was carried by nine votes to one (the Soviet Union), with Sweden abstaining, and was thus vetoed by the U.S.S.R.—the first occasion on which the Soviet veto had been used against a resolution on Kashmir.

A new resolution, which made no reference to a plebiscite or a U.N. force, was then introduced by the United Kingdom, the U.S.A. and Australia. After a preamble recalling earlier resolutions, and specifically that of Jan. 24, the resolution proposed that the Security Council should (1) request Hr. Jarring to "examine with India and Pakistan any proposals which, in his opinion, are likely to contribute towards the settlement of the dispute, having regard to the previous resolutions of the Security Council and of the U.N.C.I.P.; to visit the sub-continent for this purpose; and to report to the Security Council not later than April 15, 1957; (2) invite India and Pakistan to co-operate with Hr. Jarring in the performance of these functions; and (3) request the Secretary-General and the U.N. representative for India and Pakistan "to render such assistance as he [Hr. Jarring] may request."

Mr. Menon said before the vote that India would take the resolution into consideration as soon as a new Government was formed after the forthcoming general elections, pointing out that this would be in the latter half of March at the earliest. He expressed regret at the "unnecessary and provocative pinpointing" of the resolution of Jan. 24, and emphasized that the first step toward any solution must be the ending of Pakistan's "war of hatred" against India. "India cannot afford to disregard the internal and external security of her land," he went on. "Under that heading must be taken into account the enormous amount of war material that has come to Pakistan through U.S. military aid, and which includes the possibility, either at present or in the future, of the use of atomic tactical weapons." He also drew the Council's attention to the "Azad Kashmir" Government's statement of Feb. 6 that its forces were 35,000 strong and could easily be increased to over 80,000 (see 15381 A).

Mr. Noon stated that the sole purpose of his request for the introduction of a U.N. force was to facilitate the withdrawal of Pakistani troops so that demilitarization could take place, and that it was never intended to be utilized in the holding of a plebiscite. The introduction of such a force, he added, would "amount merely to an augmentation of the U.N. observers in Kashmir."

M. Sobolev announced that he would not oppose the resolution, as the idea of Hr. Jarring's mission was acceptable and the wording appeared preferable to that of the earlier resolution. Its reference to previous decisions which were not acceptable to the Indian Government, however, could impair the chances of success of Hr. Jarring's mission.

The U.K.-U.S.-Australian resolution was adopted on Feb. 21 by 10 votes to nil, the Soviet Union abstaining. After the vote Hr. Jarring told the Council that he would accept the mission on the understanding that the parties had declared themselves willing to co-operate with him in performing his functions.

Hr. Gunnar Jarring, well known as an Orientalist before entering the Swedish diplomatic service, travelled widely in Central Asia in the 1930's and spent some time in Kashmir. He served as Swedish Minister to India from 1948-51, and as Minister to Persia, Pakistan and Iraq from 1951-52.

Indian Reactions to Security Council Resolution.

In an interview on Feb. 16, Mr. Nehru strongly criticized the resolution introduced in the Security Council on the previous day, on the grounds that it ignored basic issues and opened the door to "entirely misconceived" proposals.

"The proposal to send a U.N. force to any part of Kashmir is against international law and the U.N. Charter, unless India accepts it," Mr. Nehru declared. "It was made clear that in no circumstances will we accept any foreign force on our territory." The U.N.C.I.P. had admitted all along that there had been aggression, that Pakistan must withdraw her forces, and that India had an obligation to defend Kashmir, yet "the way this is now put is to equate India with Pakistan, and indeed to indicate that India is at fault... The question of a plebiscite, when it was first raised, was made conditional, and the first condition was Pakistan's withdrawal of all her forces from Kashmir. Even that first and essential condition has not been fulfilled, and Pakistan's aggression is still continuing."

For nine years, Mr. Nehru added, the Security Council had failed to consider "the major and basic issues, that is, Pakistan's aggression and Kashmir's accession to India." In order to arrive at a peaceful settlement India had discussed many proposals which had failed to produce any result, and now India was told that "those intermediate proposals and discussions were commitments by us and we need not go back to the real causes of the dispute." India opposed the latest resolution, Mr. Nehru declared, because it "opens the door to encourage certain proposals and suggestions which are, according to us, wholly wrong—and this is done without considering the basic issues."

Mr. Nehru met Mr. Malcolm MacDonald (the British High Commissioner in Delhi) on Feb. 19, prior to the latter's temporary return to London for consultations with the U.K. Government, and also saw Mr. Bunker, the new U.S. Ambassador. At the same time the Secretary-General of the Indian Foreign Ministry, Mr. Pillai, and the Commonwealth Secretary, Mr. Desai, summoned the heads of foreign diplomatic missions in Delhi to hear India's objections to the Security Council resolution. The principal points stressed were reported to be the impropriety of the suggestion for the despatch of a U.N. force to Kashmir, and India's resentment at the British Government's attitude, which was attributed to a desire for "revenge" for India's attitude during the Suez crisis.

The attitude of the Western Powers was unanimously condemned in the Indian press. The *Times of India* said on Feb. 20 that the Security Council's proceedings had intensified Indian feeling against Britain to "a pitch possibly never reached before," while the *Hindustan Times* gave warning that unless the present British Government was replaced by a Labour Government, India might be forced to dissociate herself from the Commonwealth. The latter paper also stated on Feb. 19 that India's relations with the United States had "touched a new low."

Pakistani Allegations of Indian Troop Movements.

In a broadcast on Feb. 16 Mr. Suhrawardy repeated the allegations, made in the Security Council by Mr. Noon, that Indian troops had been concentrated on the Pakistani border, and declared that Pakistan expected SEATO support against India.

Under the terms of the Baghdad and SEATO pacts, Mr. Suhrawardy said, "our allies, some of whom are very powerful, are bound to come to our assistance in case of aggression, and I have no doubt they will do so." He considered it unlikely that India would attack Pakistan, and ruled out the possibility that the alleged troop concentrations were meant for defensive purposes "unless India is suffering from a sense of frustration and defeat which has clouded her sense of proportion." The only other possible reason was that they were meant to serve political purposes. "Whatever may be the reason for these movements," he went on, "the action of India may have dangerous consequences. So many troops moving along the border, digging trenches, taking up strategic positions, may provoke border incidents which may become serious. I have issued instructions to our Army and our people not to be provoked in any circumstances. Clashes on the border will suit India and may even be engineered by her in an attempt to prevent the U.N. from considering the matter coolly and calmly. We have, therefore, to be all the more careful that we do not get excited and do not fall into the trap laid for us."

The Pakistani delegation at the U.N. had previously issued a statement on Feb. 13 alleging that Indian forces had been strengthened on the Punjab - West Pakistan border. This statement was described as "completely without foundation" by the Indian delegation, which emphasized that there had been no increase in the number of troops either on the border or in the Punjab as a whole.

[The Prime Minister of New Zealand, Mr. Holland, said on Feb. 19 that New Zealand had never regarded herself as bound under the SEATO Pact to take military action against a fellow-member of the Commonwealth, and had made her position quite clear to Pakistan before the treaty was signed.]

Foreign Affairs Debate in Pakistan Assembly.

Opening a foreign affairs debate in the Pakistani National Assembly on Feb. 22, Mr. Suhrawardy declared that Pakistan had joined the SEATO and Baghdad Pacts in order to obtain U.S. military aid for defensive purposes against India, and claimed that this policy had "paid dividends" during the Security Council's debate.

Defending Pakistan's participation in these pacts, Mr. Suhrawardy alleged that India had twice massed troops on Pakistan's frontiers, in March 1950 and July 1951. He continued: "Our resources are limited. We therefore found it necessary to request our friends, the United States, for military assistance, and an agreement was drawn up. Under this agreement we have received a certain amount of military aid which has enabled us to be strong enough to meet aggression from any quarter. This aid would not have come in the measure in which it has come unless we had contributed to the peace and security of the Middle East. It was therefore necessary for us to take advantage of the agreement between Turkey and Iraq and join the Baghdad Pact."

Mr. Suhrawardy denied that Pakistan had any aggressive intentions against India, but added that "situations can develop in which a country may think it necessary to give up its life at one sweep rather than be throttled inch by inch." He added: "Our foreign policy has paid dividends to this extent, that our friends have stood by us and those opposed to us have been exposed. We now know who are our friends and who are not." Contending that the Indian Government's "closed mind" on the Kashmir question had rendered a solution through consultations impossible, he delared that "it is clear that any attempt on our part to have mutual consultations to arrive at a solution is doomed to failure, and I am not prepared for a single moment to give the slightest heed to this method."

Mr. Amjad Ali (Finance Minister) expressed the opinion that Hr. Jarring's mission would fail because of India's "intransigent attitude," and said that if this occurred Pakistan would take the matter to the U.N. General Assembly. The Government's foreign policy was strongly criticized, however, by **Mr. Daultana** (Moslem League), who maintained that Pakistan's membership of the Baghdad Pact had alienated other Moslem States; by **Mr. Iftikharuddin** (Azad Pakistan party), who declared that Pakistan was "more isolated than any other Afro-Asian country in the world"; and by other Opposition members.

Mr. Suhrawardy, in reply to the debate, referred to Pakistan's relations with the U.S.A. and declared that "we have given her our wholehearted support, so we expect her to be wholeheartedly with us . . ." As a result of her support of the Baghdad Pact, Pakistan was also supported on the Kashmir issue by Turkey, Iraq, and Persia. Referring to a recent statement by Mr. Nehru that Pakistan was threatening to use atomic weapons against India, Mr. Suhrawardy went on: "We have no atomic weapons. More than that, I have declared in this House that we shall not use such weapons as we have coming from American sources against India, and I have said that we propose to abide by the undertaking that we have given to our friends and allies, the U.S.A., that these weapons will not be used in aggressive war . . . I do not want to create enmity and hatred between peoples because we are contesting the Kashmir case in the international forum. But we must steel our hearts and our determination. Not all the pots of honey will deflect me from the path which we have taken—namely, that we are not going to leave Kashmir . . . Our approach to the U.N. in the matter of Kashmir is our very last throw of the dice. We cannot continue to live under these conditions."

A vote of confidence in the Government's foreign policy was passed on Feb. 25 by 40 votes to 2, with 16 Moslem League and United Front members abstaining.

Mr. Nehru's Statement to Indian Parliament.

During a debate in the *Lok Sabha* on March 25, Mr. Nehru made a statement on the Kashmir question reiterating India's position and accusing Pakistan of having "annexed" the Pakistani-held areas of Kashmir State. He continued:

"It has been surprising that little reference has been made to this annexation of nearly half the area of Kashmir, while a great deal of discussion is taking place about what is called the annexation of Kashmir by India. There has been no annexation by us. The very word itself is wrong and improper. There was accession in October 1947. Nothing has happened since then to lessen that factor and nothing was necessary to add to it."

After asserting that adherence to the "two-nation theory" had made Pakistan "rootless," Mr. Nehru continued: "If I may with all humility say so to the people and leaders of Pakistan, their major difficulties have been caused by uprooting themselves from their own past . . . and trying to develop something in their area on the basis of the two-nation theory. The result is that they cannot get a grip and have to rely more and more on external forces, on external aid, because they think in terms of transplanting religion to nationalism and to Statehood. That is a medieval conception . . . The conception of equating Statehood with religion is so out of place that no amount of repetition can make it real. It is unreal; it becomes still more unreal when it is sought to be applied to Kashmir; and it becomes fantastic when our friends in some countries of the West talk about it. We see in the Kashmir issue a basic conflict between the modern age and medievalism . . .

"By virtue of the accession of Kashmir to India, it is clear that in every sense, legal and constitutional, the whole State should form part of the Union of India. In our desire to come to some peaceful arrangement, we may in the course of these nine years have discussed various suggestions, proposals, etc. But these discussions did not lead to any result, and there they ended—although sometimes the fact that we had put forward, in the course of discussion some idea, or proposal, or thought, is held out to us as a kind of commitment . . ."

Turning to the question of atomic weapons for Pakistan, Mr. Nehru denied that either he or Mr. Krishna Menon had said that Pakistan possessed such weapons. He had, however, quoted a statement by the Pakistani C.-in-C., who had said that the use of tactical atomic weapons had been envisaged in Pakistani military exercises carried out last December. On the strength of that statement he (Mr. Nehru) had said that those exercises had been carried out as a stage of preparation for the use of atomic weapons. Since then the U.S. Government had denied that they had given any atomic weapons to Pakistan and, Mr. Nehru added, "naturally we accept that denial." He added, however: "The fact remains that these preparations and exercises are matters of some concern to us, more especially when all this is tied up with large-scale military aid which comes from the U.S.A. to Pakistan . . . It was and is my conviction that it could have been far easier for Pakistan and India to solve their problems, difficult as they were after partition, if outside countries had not interfered so much . . ."

Mr. Nehru also said in the course of his speech that despite the "painful shocks" which India had experienced recently, especially over Kashmir, it was desirable to remain in the Commonwealth "in the present context." He added, however, that India's membership of the Commonwealth was one of the matters which were open to review "from time to time in the light of changing conditions."

Hr. Jarring's Mission to Pakistan and India. - Report to Security Council. - Failure to reconcile Indo-Pakistani Differences on Kashmir.

After visiting Stockholm for consultations with his Government, Hr. Jarring arrived in Karachi on March 14, where he had discussions with Mr. Suhrawardy, Mr. Firoz Khan Noon, and Pakistani officials from March 15-20. He then went to Delhi for talks with Mr. Nehru, Mr. Krishna Menon, and Indian officials from March 24-28; had further talks in Karachi from April 2-5; paid a second visit to Delhi from April 6-9; and before leaving the sub-continent had another conversation on April 10 with the Pakistani Ministers.

After returning to New York, Hr. Jarring completed his report to the Security Council, which was published on April 30. In his report Hr. Jarring expressed his inability to make "any concrete proposals" likely to contribute to a settlement of the Kashmir question. The principal sections of the report are given below:

After explaining that, in accordance with the first operative part of the Security Council's resolution, his conversations had been held exclusively with representatives of the Governments of India and Pakistan [i.e. not with the "Azad Kashmir" or Kashmir State governments], Mr. Jarring continued: "The co-operation of the two Governments envisaged in the second operative part of the Council's resolution has been complete in all respects. Our conversations took place in an atmosphere of complete frankness and cordiality . . .

"During the last debate in the Security Council the representative of Pakistan stated that his country recognized 'no international obligations with regard to the State of Jammu and Kashmir except those she had voluntarily accepted . . . in the resolutions of the U.N. Commission for India and Pakistan dated Aug. 13, 1948 and Jan. 5, 1949.' The representative of India declared that these two UNCIP resolutions were the only ones which bound his Government. In view of these declarations, I felt it was appropriate to explore what was impeding the full implementation of these resolutions. My efforts were therefore directed toward finding a solution for the problems that had arisen in connexion with these two resolutions.

"The resolution of Jan. 5, 1949, envisages the holding of a free and impartial plebiscite to decide on the question of accession of Kashmir to India or Pakistan. On exploring this question, I was aware of the grave problems that might arise in connexion with and as a result of a plebiscite. I therefore felt it incumbent on me to devise ways and means by which these difficulties could be met or at least be substantially mitigated. Consequently, I made a number of suggestions to this end to both Governments, which, however, for different reasons, did not prove to be mutually acceptable.

"During our conversations the Government of India laid particular emphasis on the fact that, in their view, two factors stood in the way of implementing the two UNCIP resolutions. The first of these was that Part I of the Resolution of Aug. 13, 1948, and in particular sections B and E, had in their view not been implemented by Pakistan. For that reason it was, in their submission, premature to discuss the implementation of Parts II and III of that resolution, or of the resolution of Jan. 5, 1949.

"The second of these impediments, which concerned rather Part II of the first resolution, was that the Government of India, which had brought the case before the Security Council on Jan. 1, 1948, felt aggrieved that the Council had so far not expressed itself on the question of what in their view was aggression committed by Pakistan on India. In their view it was incumbent on the Council to express itself on this question, and equally incumbent on Pakistan 'to vacate aggression.' It was argued that, prior to fulfilment of these requirements on the part of the Security Council and of Pakistan, India's commitments under the Resolution could not reach an operative stage.

"I explained to the Government of India that the Security Council had properly taken cognizance of their original complaint, and that it was not for me to express myself on the question whether its resolutions on the matter had been adequate or not. I pointed out that, regardless of the merits of the present position taken by their Government, it could not be overlooked that they had accepted two UNCIP resolutions.

"The Pakistani Government, on their part, maintained that Part I of the first resolution had been implemented by them in good faith and in full, and that the time had come to proceed to the implementation of Part II.

"Under the circumstances I decided that it might be appropriate to approach the first question—implementation of Part I of the first UNCIP resolution—as I had been given to understand that this was the primary impediment to the implementation of the resolutions. It was my impression that . . . substantial weight was given by the Government of India to the absence of 'an atmosphere favourable to promotion of further negotiations' as envisaged in Section E of that part of the first resolution. Another point which was repeatedly stressed by the Government of India was that the military *status quo* envisaged in Part B of the same section did not obtain, in their view, owing to the policy pursued by the Government of Pakistan.

"In order to break the deadlock concerning Part One, I enquired of the two Governments if they would be prepared to submit to arbitration the question of whether Part I had been implemented or not. In substance my question to the two Governments did not envisage

simple arbitration; but the arbitrator or arbitrators would also have been empowered, should they have found that the implementations had been incomplete, to indicate to the parties which measures should be taken to arrive at full implementation. It was also envisaged that in the latter case, and after a given time-limit, the arbitrator or arbitrators would determine whether given indications had been followed and implementation had taken place.

"Being aware of the earlier negative attitude of the Government of India on the question of arbitration with relation to the Kashmir problem as a whole, I made it a point to explain to them that I was not suggesting anything of that nature and that what I was proposing, while termed arbitration, would in all likelihood be more in the nature of determination of certain facts which in their view were incontrovertible. In addition, the procedure suggested might lead to improvement in Indo-Pakistani relations in general—a development which I assumed could not be unwelcome to either of the countries.

"While the Pakistani Government, after certain hesitations, agreed with my suggestion in principle, the Government of India did not feel that arbitration as outlined by me would be appropriate. They explained that while they were not opposed to the principle of arbitration as a method of conciliation, and had indeed agreed to this procedure to arrive at a solution of certain other problems outstanding between their country and Pakistan, they felt that the issues in dispute were not suitable for arbitration because such procedure would be inconsistent with the sovereignty of Kashmir and the rights and obligations of the Union of India in respect of this territory. They were furthermore apprehensive that arbitration even on isolated parts of the resolutions might be interpreted as indicating that Pakistan had *locus standi* in the question.

"In dealing with the problem under discussion as extensively as I have during the period just ended, I could not fail to take note of the concern expressed in connexion with changing political, economic and strategic factors surrounding the whole of the Kashmir question, together with the changing pattern of power relations in Western and Southern Asia. The Council will furthermore be aware of the fact that implementation of international agreements of an *ad hoc* character which has not been achieved fairly speedily may become progressively more difficult because the situation with which they were intended to cope has tended to change.

"While I feel unable to report to the Council any concrete proposals which, in my opinion, at this time are likely to contribute toward a settlement of the dispute . . . my examination of the situation as it obtains at present would indicate that, despite the present deadlock, both parties are still desirous of finding a solution to the problem. In this connexion the Council may wish to take note of the expressions of sincere willingness to co-operate with the United Nations in the finding of a peaceful solution which I received from both Governments."

Mr. Jarring's report was received with satisfaction in India, where particular emphasis was placed by the Press on his reference to the "changing political, economic, and strategic factors surrounding the whole of the Kashmir question, together with the changing pattern of power relations in Western and Southern Asia." This phrase was interpreted to mean that Mr. Jarring had been impressed by India's contention that Pakistan's membership of the Baghdad and SEATO pacts had affected the solution of the Kashmir question, and that he had also taken into account the situation in Kashmir on both sides of the cease-fire line, especially the considerable political and economic progress made in Indian Kashmir. Moreover, Mr. Jarring's observation that "on exploring this question of a plebiscite I was aware of the grave problems that might arise in connexion with and as a result of the plebiscite" was interpreted as an appreciation of the communal passions that would be aroused in the sub-continent by a plebiscite, irrespective of its result.

In Karachi, Mr. Firoz Khan Noon issued the following statement on Mr. Jarring's mission:

"When the Security Council asked Mr. Jarring to undertake this work . . . I was sure that they had placed an impossible task on his shoulders, knowing full well that Mr. Nehru would never accept any solution which meant granting self-determination to the people of Kashmir in accordance with the Security Council Resolution: because Mr. Nehru knows, just as the whole world knows, that he is in unlawful and forcible possession of Kashmir, depriving the people of that unfortunate State of their freedom. They are living under the shadow of his bayonets. Mr. Nehru has introduced the worst kind of imperialism and colonialism. It is now for the United Nations to consider how they are to deal with a gentleman who is defying the united opinion of the civilized world. Pakistan will never rest until the people of Kashmir are free."

Pakistani Protest to Security Council against Inclusion of Kashmir in Northern Zone Council.

Following the first meeting of the Northern Zone Council in Delhi (see 15510 F), the Pakistani Government sent a letter to the Security Council protesting against the incorporation of Kashmir into the zonal arrangements. After describing this as "a new move on the part of the Government of India . . . towards determining unilaterally the future shape and affiliation of Kashmir," the letter said that the Pakistani Government "takes a grave view of the situation that will develop as a result of the present action of the Government of India, particularly in view of its timing, which aims at frustrating the objectives of the Jarring mission and thus creating further difficulties in the way of a peaceful settlement of the dispute." It added that Pakistan "reserves the right to seek further action by the Security Council in regard to this matter." (Indian and Pakistani High Commissioner's Offices, London - U.N. Information Centre, London - The Hindu, Madras - The Statesman, Calcutta - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. 15381 A.)**

A. ISRAEL. — Arrival of U.S. Tanker at Eilat. - Opening of Eilat-Beersheba Oil Pipeline. - Saudi Arabian Threats against Israeli Shipping in Gulf of Akaba. - Saudi Memoranda to United Nations.

The U.S. tanker *Kern Hills*, carrying a cargo of 16,700 tons of crude oil from the Persian Gulf, arrived on April 6 at the Israeli port of Eilat (Elath), at the head of the Gulf of Akaba. On April 14 the pumping of the oil began through a newly completed pipeline from Eilat to Beersheba.

The oil shipment was the first major cargo to reach Eilat since the creation of the State of Israel. The Egyptian batteries at Sharm-el-Sheikh, which had dominated the Straits of Tiran (the entrance to the Gulf of Akaba) since the Arab-Israeli war of 1948, were destroyed by Israeli forces during the Sinai campaign and the area was subsequently taken over by the U.N. Emergency Force. As a result, the *Kern Hills* had an uneventful passage up the Gulf to Eilat.

The *Kern Hills* was one of three U.S. tankers on charter to *Delek* (the Israeli State oil organization) and was routed to Eilat on Israeli initiative. The U.S. State Department was not, however, informed until April 5 that the ship would be entering the Gulf of Akaba. Nevertheless, the fact that the first large foreign ship to reach Eilat was of American registry was widely regarded in Israel as at least a partial fulfillment of the U.S. promise (made in Mr. Dulles's *aide-mémoire* of Feb. 11) "to exercise the right of free and innocent passage" in the Gulf of Akaba.

The 8-inch pipeline from Eilat to Beersheba on which work had begun as an emergency measure in November, 1956, after the blocking of the Suez Canal is expected to cost about $7,000,000. It has a length of 150 miles and when in full operation will carry about two-thirds (800,000 tons) of Israel's total annual oil consumption. To achieve this goal, however, about 40 to 50 tankers of medium tonnage would have to call at Eilat annually.

For the time being the oil arriving at Beersheba will be carried to the Haifa refinery in rail tankers, but work is proceeding on a 16-inch pipeline from Beersheba to Ashdod (near Askalon), on the Mediterranean, which is expected to be ready by the end of the summer. When it is in operation, oil will be carried from Ashdod to Haifa in small tankers.

Saudi Arabian Memoranda on Gulf of Akaba.

In two memoranda published on April 11 and 12 respectively, the Saudi Arabian Government announced that it would take all measures to prevent Israeli ships from using the Gulf of Akaba.

The first memorandum, which had been circulated to other Governments on March 31, claimed that the islands of Tiran and Sanafir at the mouth of the Gulf were Saudi territory and that the Straits of Tiran were Saudi territorial waters. The Gulf could therefore in no way be considered an open waterway, and the Saudi Government would do all in its power to ensure that its traditional use as a pilgrim route was not endangered.

The second memorandum, delivered to the U.N. Secretary-General on April 12, said that any attempt to turn the Gulf of Akaba into an international waterway would "constitute an encroachment of the sovereignty of Saudi Arabia and a threat to its territorial integrity." The Note alleged that "Israeli planes and ships some four months ago attacked positions inside Saudi Arabia," and added: "This proves that Israel intends to force a right of passage through the Gulf, threatening the security of the area." In support of its contention, the Saudi Government cited Paragraph 3 of Article 10 of the 1888 Treaty of Constantinople on the status of the Suez Canal. This paragraph, it was claimed, "specified that the stipulations contained in that treaty do not apply to the Arab States lying on the Red Sea and the Gulf of Akaba." The Note added that the records of the negotiations leading to the 1888 Treaty "clearly reveal that the Gulf of Akaba and its straits were intended to be excluded from the proposed freedom of international navigation in the Suez Canal."

A further Saudi memorandum was sent to the U.N. Secretary-General on May 8 formally protesting against "recent Israeli naval and air activity" in the Gulf of Akaba. Israeli air and naval units, it was alleged, had engaged in manoeuvres in Saudi territorial waters, and their activity was described as "a provocation to a member-State of the United Nations." A. RHODESIA AND NYASALAND FEDERATION. — Sir Roy Welensky's London Talks on Constitutional Advancement. - Agreement on Federal Reponsibility for External Affairs. - Non-interference by Britain in Federal Legislation. - Constitutional Review in 1960.

Sir Roy Welensky, the Prime Minister of the Federation of Rhodesia and Nyasaland, and Mr. J. M. Greenfield, the Federal Minister of Law, visited London from April 12-17 for talks with Lord Home (Secretary of State for Commonwealth Relations) and Mr. Lennox-Boyd (Colonial Secretary) on certain aspects of the Constitution of the Federation. Sir Roy Welensky was also received in audience by H.M. the Queen.

Following the Rhodesian Ministers' return to Salisbury, a joint statement was issued on April 26 by the U.K. and the Rhodesian Federal Governments announcing *inter alia* (1) that the Federation would be entrusted with greater responsibility for its external affairs; (2) that the Prime Minister of the Federation would in future have direct access to the Sovereign; (3) that the U.K. Government would not in future initiate any legislation to amend or repeal any Federal law or deal with any matter on which the Federal Government was competent to legislate, except at the Federal Government's specific request; (4) that both Governments were opposed to any proposal either for the amalgamation of the Federation's component territories into a unitary State or for the secession of any territories from it; and (5) that a review of the Federal Constitution would take place at a conference to be convened in 1960.

The principal points of the joint statement are given below:

Introduction. "They [the Rhodesian and U.K. Ministers] reviewed the progress made by the Federation since it was established in 1953. They agreed that this progress had justified the hopes of its founders and provided a sound basis for further development of the policy of partnership between races which the Federation is pursuing."

External Affairs. "The Federal Constitution provides that matters of External Affairs may, from time to time, be entrusted to the Federation. The Federal Prime Minister represented that the time had come for the Federation to assume more responsibility in this sphere, particularly in the field of relations with other countries and the appointment of representatives of the Federation in such countries. The U.K. Government have agreed to entrust responsibility for external affairs to the Federal Government to the fullest extent possible, consistent with the responsibility which H.M. Government must continue to have in international law so long as the Federation is not a separate international entity."

Direct Access to the Sovereign. "In recognition of the constitutional position of the Federation, H.M. the Queen has been pleased to approve that in future the Prime Minister of the Federation should have direct access to the Sovereign on Federal matters affecting the Sovereign personally, on the award of Honours for services to the Federation, and on a number of ceremonial matters."

Administrative Arrangements in the United Kingdom. "There was discussion of a proposal by the Federal Prime Minister that a separate department of the U.K. Government, responsible to the Secretaries of State for Commonwealth Relations and the Colonies jointly, should handle relations with the Federal Government and with all three Territorial Governments. U.K. Ministers explained that this was part of the general question of the responsibility of different Ministers for relations with the various parts of the constantly evolving Commonwealth. The whole question would have to be examined, and in this examination Sir Roy Welensky's suggestion would be borne in mind."

Legislation. "The Federal Government having represented that the Federal Legislature should have the power to legislate with extra-territorial effect, the U.K. Government have agreed that legislation for this purpose will be introduced at Westminster at a convenient opportunity.

"The Federal Prime Minister drew attention to doubts which had arisen in regard to the purpose and effect of Article 29 (7) of the Federal Constitution and to the subject of legislation in the U.K. for the Federation. U.K. Ministers made it clear that the U.K. Government recognize the existence of a convention applicable to the present stage of the constitutional evolution of the Federation, whereby the U.K. Government in practice does not initiate any legislation to amend or repeal any Federal Act or to deal with any matter included within the competence of the Federal Legislature, except at the request of the Federal Government."

Public Services in the Federation. "The U.K. Ministers said that in principle it was accepted that all Civil Services in the Federation, whether Federal or Territorial, would eventually be locally based and look for their future to the Federal area. Accordingly, steps would be taken to work towards this objective and, in particular, the question of interchangeability of officers would be examined in consultation with the four Governments of the Federation."

Proposals for Enlargement of Federal Assembly and for Federal Franchise. "The Federal Prime Minister informed U.K. Ministers of the position reached in his discussions with the Prime Minister of Southern Rhodesia and the Governors of Northern Rhodesia and Nyasaland in regard to the enlargement of the Federal Assembly and to the Federal franchise. U.K. Ministers accepted in principle proposals for the enlargement of the Federal Assembly. The Federal Prime Minister stated that he would not be able to inform H.M. Government of the Federal Government's definite proposals for the franchise, or to present a Bill on this subject to the Federal Legislature, until further discussions had been held in Salisbury. Meanwhile, however, he could assure U.K. Ministers that a Franchise Bill would be introduced and would ensure that British-protected persons otherwise qualified would not be required to change their status in order to be eligible for the Federal franchise, and that the qualifications for that franchise would permit of a reasonable number of such persons acquiring the franchise U.K. Ministers took note with satisfaction of these assurances."

Review of the Constitution. "The Federal Constitution provides for a review not less than seven nor more than nine years from the date when it came into force (October, 1953). In this connexion the two Governments have agreed on the declaration annexed:

Joint Declaration on Review of Federal Constitution.

1. "H.M. Government in the United Kingdom and the Government of the Federation of Rhodesia and Nyasaland have already made it clear and take this opportunity of reaffirming that they are opposed to any proposal either for the amalgamation into a unitary state of the Territories now composing the Federation, or for the secession of any of those Territories from the Federation.

2. "Article 99 of the Federal Constitution provides that not less than seven nor more than nine years from the date of the coming into force of the Constitution there shall be convened a conference consisting of delegations from the Federation, from each of the three Territories, and from the United Kingdom, chosen by their respective Governments, for the purpose of reviewing that Constitution. The Constitution came into force in 1953, and it is agreed that the conference shall be convened in 1960.

3. "The purpose of this conference is to review the Constitution in the light of the experience gained since the inception of Federation and in addition to agree on the constitutional advances which may be made. In this latter context the conference will consider a programme for the attainment of such a status as would enable the Federation to become eligible for full membership of the Commonwealth."

Sir Roy Welensky, in a supplementary statement, explained that in conformity with its increased responsibility for external affairs the Federal Government would now have the right to:

(1) Conduct all relations and to exchange representatives with Commonwealth countries without consultation with the U.K. Government:

(2) Conduct all negotiations and agreements with foreign countries, subject to the need to safeguard the U K Government's international responsibilities;

(3) Appoint representatives to the diplomatic staffs of H.M. embassies;

(4) Appoint its own diplomatic agents, who would have full diplomatic status and would be in charge of Federal missions in any foreign country prepared to accept them, and to receive such agents from other countries;

(5) On its own authority to acquire membership of international organizations for which it was eligible.

"It will be seen," Sir Roy added, "that the entrustments now made are considerable, and give the Federation the fullest practicable independence in external affairs."

Speaking at a press conference on April 17 before leaving London, Sir Roy made it clear that he had not come to the U.K. to demand independence for the Federation forthwith, but added: "I do not want you to assume that we are not determined to attain independent status within the Commonwealth. We are—but I believe the time to settle that is in 1960, when the Constitution comes up for review."

On the Federal franchise Sir Roy said that he hoped soon to produce a system which would go a long way towards a solution of the problem. "One thing is certain," he said. "The dogma of 'one man one vote' cannot apply in our part of Africa in the foreseeable future, and any pretence that it could is only mischievous and dangerous. Those who speculate on this premise do harm."

Sir Roy added that there had also been discussions on defence. "We want to play our part in imperial defence," he said, "and I should like to be certain that the part we are playing is the best we are capable of."

In another press statement in Salisbury on April 27 Sir Roy Welensky said that the convention agreed with the U.K. Government [see section "Legislation" above] would rule out the risk that a future Labour Government in Britain might try to interfere with subjects at present within the competence of the Federation.

Sir Roy declared: "As a result of recent utterances by spokesmen of the British Labour Party, the fear has grown here that if returned to power the Labour Party would endeavour to inflict some of their half-baked ideas on us by legislative act. The convention rules this out. If any British Government in the future began ignoring undertakings and agreements, we are in a very similar position to do the same."

Sir Roy Welensky added that the British Government would not have considered granting the Federation any advanced status in the future if the Federal Government had not agreed to extend the franchise to British-protected persons. This concession would strengthen the Federal Government's hands in arguing in 1960 for the granting of independence within the Commonwealth.

The constitutional discussions between the Federal Prime Minister, the Prime Minister of Southern Rhodesia, and the Governors of Northern Rhodesia and Nyasaland, referred to in the announcement, had taken place on Dec. 13-14, 1956. It was stated afterwards that the main subjects discussed had been certain proposals on franchise, citizenship, and the enlargement of the Federal Assembly, presented by the Federal Government; that the proposals in the form presented had met with certain objections of principle; that agreement had been reached, however, on the desirability of enlarging the Federal Assembly; and that unanimous proposals had been formulated to achieve this.—(Federal Information Department, Salisbury - Times - Daily Telegraph) **(Prev. rep. 15324 A.)**

A. UNITED KINGDOM. — Coal Production Statistics. - N.C.B. Appointments. - Ending of "Bonus Shift" System. - Miners' Wage Increases.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output and absenteeism, in the first quarter of 1957:

	Saleable Mined Coal Produced Tons	Plus Open-cast Tons	Total Production Tons	Inland Consumption Tons	& Bunkers Tons
January ..	3,385,540	175,720	3,561,260	4,646,200	162,600
February	4,496,750	236,025	4,732,775	4,747,250	121,250
March ..	4,416,975	241,100	4,658,075	4,521,500	165,250
1st Quarter	4,099,755	217,615	4,317,370	4,638,317	149,700

	Wage-earners on colliery books Total	at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	overall Tons	Percentage of absentee-ism
January	706,210	286,280	4.41	3.337	1.206	16.08
February	709,900	286,225	4.92	3.425	1.271	12.63
March	711,100	286,725	4.93	3.416	1.263	13.05
1st Quarter	709,080	286,410	4.75	3.399	1.247	13.92

Other recent developments in connexion with the coalmining industry are summarized below:

Ending of "Bonus Shift" System. The National Coal Board announced on April 16 that, subject to coal output remaining satisfactory to the end of May, it had agreed to the ending of the "bonus shift" system (introduced in 1947) whereby miners were paid for six shifts weekly so long as they worked for the full five, any man voluntarily missing a shift losing his bonus. The system would be replaced by a new arrangement under which miners would be paid one-and-a-fifth times the present rate per shift irrespective of absence for any shift, unless due to strikes.

N.C.B. Appointments. The appointment as full-time members of the N.C.B. of Mr. H. W. Hembry, deputy chairman of the Board's Northern Division, and of Mr. H. E. Collins, Director-General of Reconstruction at N.C.B. headquarters, was announced on Jan. 21 and Feb. 16 respectively. On March 13 it was announced that Mr. W. V. Sheppard, general manager of the No. 1 (Chesterfield) Area of the Board's East Midlands Division, would succeed Mr. Collins as Director-General of Reconstruction at headquarters.

Lord Mills, the Minister of Power, on Feb. 8 appointed Mr. James Crawford, general president of the National Union of Boot and Shoe Operatives, as industrial relations member of the N.C.B. in place of Mr. W. H. Sales (see 15349 A). Mr. Crawford was already a part-time member of the Board.

New Opencast Site. The N.C.B. announced on Jan. 29 that it had placed a contract, valued at about £13,250,000, for the development of a new opencast coal site near Morpeth (Northumberland), expected to produce about 6,250,000 tons of coal over the next 10 years.

It was announced on May 2 that, after lengthy negotiations, the National Coal Board and the National Union of Mineworkers had reached agreement on wage increases for about 380,000 day-wage miners. The settlement will be submitted to the union's national delegate conference, and, if approved, will come into effect retroactively from the first full pay week in March. The increases ranged from 1s. 7d. a shift (equivalent to 9s. 6d. weekly for a six-day week) for men on minimum rates to 1s. 10d. a shift for craftsmen and enginemen, and raised basic rates for day-wage men to £8 10s. weekly (surface workers) and £9 10s. weekly (underground workers). Juvenile workers obtained from 5s. 6d. to 8s. a week more according to age.

The N.U.M.'s original claim (approved by its executive committee on Jan. 10) was for an increase of 8s. 8d. a shift for day-wage men, equivalent to about 19s. 6d. in a full week and estimated to cost about £15,000,000 in a full year. The present increases (involving an all-round increase for day-wage men of over five per cent) will cost the industry about £10,000,000 a year.—(Ministry of Fuel and Power - Times) **(15349 A.)**

B. CHILE. — New Cabinet Crisis. - Government reorganized by President Ibañez.

All the members of the Chilean Cabinet resigned on April 22 at the request of President Carlos Ibañez, who appointed a new Cabinet on the following day composed of personal friends, technicians, and officers of the armed forces. Only one political party—the pro-Government Agrarian Labour party—was represented in the new administration, the members of which were as follows:

Interior - Sr. Jorge Aravena Carrasco; Foreign Affairs and Mines—Sr. Osvaldo Sainte-Marie; Education - Rear-Admiral Manuel Quintana; Economy - General Horacio Arce; Finance Sr. Eduardo Urzua; Justice—Sr. Arturo Zuniga; Defence - General Adrian Barrientos; Public Works General Eduardo Yanez; Agriculture—Sr. Mario Astorga; Lands and Colonization—Sr. Oscar Pinochet; Labour - Sr. Raul Barrios; Health Dr. Muñoz Urrutia. Five of the 12 Ministries changed hands, including those of the Interior, Defence, Agriculture, and Economy. The new Minister of the Interior held the portfolio of Agriculture in the previous Cabinet.

The Cabinet crisis—the 18th since President Ibañez assumed office in 1952—was precipitated by the resignation of four Ministers (all from the Agrarian Labour party) following the arrest of four lawyers who were defending the interests of the Horizonte printing works, which had been wrecked by unidentified elements during the recent rioting in Santiago.

The arrest of the four lawyers, though defended by Government circles on the ground that they were allegedly Communists, had been strongly criticized by the political parties, and also in the law courts and the Press. As a result of these protests, President Ibañez (who had been absent from the capital at the time) revoked the detention orders and granted immediate freedom to the four lawyers, who had meanwhile been exiled to remote parts of the country. The then Minister of the Interior (Sr. Roberto Infante), who had signed the order for their arrest, stated that he done so without having been informed that they were investigating the wrecking of the Horizonte premises, and accused the Under-Secretary of the Interior (Sr. Carlos Ferrer) of having withheld this information. Señor Infante and Señor Ferrer subsequently tendered their resignations to President Ibañez.

The Horizonte concern printed the Chilean Communist organ *El Siglo* and other newspapers, and the four lawyers concerned had been investigating the circumstances in which the printing works were wrecked.—(Times - New York Times) **(Prev. rep. 15500 A.)**

C. UNITED KINGDOM. — Bernard Shaw's Will. - "Alphabet Trusts" held invalid.

Mr. Justice Harman ruled in the Chancery Division on Feb. 20 that provisions in George Bernard Shaw's will for the establishment of a trust to promote the replacement of the English alphabet by a new phonetic alphabet were invalid. The will had been disputed by two of the residuary legatees, the British Museum and the Royal Academy of Dramatic Art.

Mr. Shaw's will, which was drawn up shortly before his death on Nov. 2, 1950, left the residue of his estate to finance research into how much time, labour, and money could be saved by the introduction of an alphabet containing at least 40 letters, which would allow the language to be written without indicating single sounds by groups of letters. The will also directed that Shaw's *Androcles and the Lion* should be published in a page-by-page version, with the proposed alphabet on one side and the present alphabet on the other, as a means of propaganda for the adoption of the former. After 21 years the residuary estate was to devolve on the British Museum, the National Gallery of Ireland, and the Royal Academy of Dramatic Art, in equal shares. Mr. Justice Harman ruled that the proposed "alphabet trusts" were not for purposes which the law regarded as charitable, but were rather analogous to trusts for political purposes and were therefore invalid.

It was announced on Feb. 20 that Mr. I. J. Pitman, M.P., and the Shaw Society intended to launch a fund to cover the costs of an appeal against the judgment; or, if this were not possible, to finance Shaw's project privately. Mr. Pitman (the Conservative Member for Bath) is an advocate of spelling reform (see 9942 D) and was a personal friend of Bernard Shaw.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Bernard Shaw, 12507 C; 11861 B.)**

D. AUSTRIA. — Adherence to European Multilateral Exchange Arbitrage Scheme.

Austria joined the scheme for multilateral arbitrage between the principal European exchange markets as from Jan. 2. The members of the scheme, which was first introduced in 1953, are Belgium, Britain, Denmark, France, Western Germany, Italy (which joined in August 1955), the Netherlands, Norway, Sweden, and Switzerland.—(Wiener Zeitung) **(Prev. rep. 13278 A; 12943 A.)**

A. UNITED KINGDOM. — Trebling of Nuclear Power Programme. - Exchanges of Information with U.S.A. - Annual Report of Atomic Energy Authority. - National Research Institute for Nuclear Science.

Plans for the trebling of the nuclear power programme outlined in February 1955 (see 14045 A) were announced in the House of Lords on March 5 by the Minister of Power, Lord Mills. The new plans involve the construction of 16 nuclear power stations in addition to the three (Berkeley, Bradwell, and Hunterston) for which orders have already been placed, at a total cost for the 19 stations of £1,460,000,000. The 19 plants are expected to provide a nuclear power capacity of 5,000-6,000 megawatts by 1965, instead of the 1,500-2,000 megawatts scheduled to be produced by the 12 nuclear power stations envisaged under the 1955 scheme. Lord Mills's statement was as follows :

" The Government, in conjunction with the English and Scottish Electricity Authorities and the Atomic Energy Authority, have completed their re-examination of the nuclear power programme outlined in the White Paper of February 1955, which set a target of some 1,500-2,000 megawatts of nuclear capacity in operation in the country by the end of 1965. Since we already spend some £250,000,000 per annum on importing fuel, chiefly oil, and this burden on our balance of payments will continue to grow, the importance of our need to develop nuclear power as a source of energy cannot be in doubt. Our task has therefore been to consider the extent to which the 1955 programme can be accelerated in view of technical advances in the last two years.

" It is the considered opinion of our expert advisers that in the light of present knowledge the English and Scottish Electricity Authorities can reasonably aim at having at least 5,000 mW. of nuclear capacity in operation by the end of 1965, and that if technological development continues to be favourable, and the necessary physical and financial resources can be found, a figure of 6,000 mW. could be achieved by that date.

" The Government have accordingly decided, with the full agreement of the Electricity Authorities and the Atomic Energy Authority, to adopt as a basis for present planning a range of 5,000-6,000 mW. of nuclear capacity in operation by the end of 1965. This means that the supply of raw materials for nuclear generation, the acquisition of sites, and the planning of the transmission network will be on a scale sufficient to bring 6,000 mW. of nuclear capacity into operation by the end of 1965. The actual amount of nuclear capacity to be installed by that date will be subject to technical experience and development as planning progresses, including the trend of capital costs, and to the availability of physical and financial resources.

" The Government of Northern Ireland are today announcing that the Electricity Board for Northern Ireland intend . . . to bring into commission a 150 mW. nuclear station in 1963 or 1964.

" The execution of this nuclear programme would make a major contribution to our energy resources : a full year's operation of 6,000 mW. generating capacity would save some 18,000,000 tons of coal. But it would also mean a large increase in the annual investment programme of the Electricity Authorities during the early 'sixties, and this would represent a very heavy burden on the nation's capital resources during a period when those resources are likely in any event to be seriously strained.

" The programme will moreover involve the erection of new power stations and of overhead transmission lines in parts of the country which have not hitherto felt the impact of the nation's requirements for electricity. This is unfortunately inevitable because nuclear stations raise special siting problems. H.M. Government and the Electricity Authorities are determined to carry through the programme with the least possible interference with the amenities of our countryside or the rights of individuals. But we believe that this can be done and at the same time some provision be made for that acceleration of the present procedure which is essential if the programme is not to be seriously delayed. The Paymaster-General will accordingly be tabling amendments to existing legislation for inclusion in the Electricity Bill which is at present being considered.

" I would add that nothing said about the prospects of the nuclear power programme in any way affects the importance of the coal industry. However rapidly we develop nuclear energy, coal will remain the basis of our economy, and the need to exploit to the full our national coal resources remains as urgent as ever."

In reply to questions, Lord Mills stressed that the programme would remain flexible and subject to periodic review. On the question of costs, he stated that conventional power stations to give the same amount of power would cost £810,000,000, or £650,000,000 less than the nuclear power stations. He added, however, that the Government would take every advantage of improvements and discoveries, believing that the cost would fall as they went along. On the possibility of exporting power stations, Lord Mills said that the programme had been phased in such a way that at the time when exports might be expected to be growing, those concerned would be best able to handle them.

As regards the difference between nuclear and conventional stations, the Minister explained : " The cost of generation by the three nuclear power stations which have been ordered is expected to be very slightly more than that of a conventional power station. That is taking into account capital cost as well as operating cost. The capital cost is very much higher : the operating cost very much lower. It is confidently expected, however, that while conventional stations will go on improving in efficiency, the efficiency of nuclear power stations will improve much more rapidly, so that ultimately we can hope that the cost of a nuclear station compared with a conventional station will be less."

A similar statement was made in the House of Commons by the Paymaster-General, Mr. Maudling.

In a subsequent press statement **Lord Mills** said that there would be 19 nuclear stations in England and Scotland, one of a smaller type in Northern Ireland, and possibly another in Wales. This did not mean, however, that 19 different sites would have to be found in England and Scotland, since it would be possible on some sites to build two power stations.

Lord Citrine, chairman of the Central Electricity Authority, stated that the planned nuclear capacity of 5,000-6,000 megawatts would represent about 15 per cent of the anticipated total generating capacity in 1965. Because nuclear power stations would be in continuous use, however, their real contribution would be nearer to 25 per cent of total electricity production.

Sir Edwin Plowden, chairman of the Atomic Energy Authority, said that " if all goes well, as we in the A.E.A. believe, conventional power stations will not be built after 13 years from now."

In the Northern Ireland House of Commons, Lord Glentoran (Minister of Commerce) gave further information on March 5 about the station to be built in Ulster.

Lord Glentoran said that it was expected to cost £25,000,000 and would provide about a fifth of Northern Ireland's total generating capacity. In view of this new development, the N.I. Government had decided to abandon the Bann and Mourne hydro-electric schemes

Anglo-American Exchanges of Information.

Following complaints in the U.S. Congress that Britain had failed to provide the United States with sufficient information about the Calder Hall reactors, the U.K. Atomic Energy Authority issued a statement on March 8 claiming that it had fully discharged its obligations in that respect.

The statement was worded as follows :

" Among the wide range of information which has been exchanged to mutual advantage, the information on reactors has been one of the most important subjects. Valuable information has been exchanged on a considerable number of reactor types. The Atomic Energy Authority consider that they have given to the [U.S.] Atomic Energy Commission all the information on Calder Hall which is required under the [Anglo-American] agreement. Similar information on the Electricity Authorities' reactors is being compiled for transmission to the A.E.C., subject to the limitations of Article 1-D [of the above-mentioned agreement] The A.E.A. has offered to the A.E.C. detailed information on Calder Hall for A.E.C. use under Article 11A2 of the agreement in exchange for similar information on Shippingport [the first U.S. atomic power station]. This offer is still under discussion. No information has yet been received from the United States on military reactors (including the *Nautilus*) under the amendment to the agreement."

The matter had been raised by Senator Anderson, vice-chairman of the Joint Congressional Committee on Atomic Energy, who said that, while the U.S.A. had agreed to give the U.K. full information about military reactors, he doubted whether Britain was giving sufficient information in return. On March 6, representatives of the U.S. Atomic Energy Commission informed the Joint Congressional Committee that Britain had so far supplied little data on the Calder Hall reactors.

Other developments in the atomic energy field are summarized below :

Creation of Nuclear Research Institute.

Mr. Enoch Powell, Financial Secretary to the Treasury, announced on Feb. 17 in a written reply that the Government had decided to set up a National Institute for Research in Nuclear Science.

Mr. Powell explained that the Institute would provide, for the common use of universities and other bodies, facilities and equipment beyond the scope of individual institutions conducting nuclear research. The creation of the new institute would not, however, affect the research being done in individual universities with assistance from Government funds, nor would it affect British participation in the international scheme for common facilities at Geneva.

The Institute would be financed mainly by grants, through the Atomic Energy Authority, from the Lord President's Atomic Energy Vote and would be managed by a governing board appointed jointly by the Lord President of the Council and the Chancellor of the Exchequer. Lord Bridges (who, as Sir Edward Bridges, was Permanent Secretary to the Treasury from 1945-56) had been appointed chairman of the board.

The names of the other members of the board were announced on March 12, as follows :

Universities—Sir Philip Morris, Sir James Mountford, Professor N. F. Mott, Professor H. S. W. Massey, Professor J. Diamond, Professor R. L. Peierls, and Dr. D. H. Wilkinson.

University Grants Committee—Sir George Thomson and Mr. J. C. Gridley.

Royal Society -Sir David Brunt.

Atomic Energy Authority —Sir John Cockcroft, Sir Donald Perrott, and Dr. B. F. J. Schonland.

Department of Scientific and Industrial Research Dr. H. W. Melville and Professor P. M. S. Blackett.

Second Annual Report of U.K. Atomic Energy Authority.

The main points of the second annual report (1955-56) of the U.K. Atomic Energy Authority, published on July 25, 1956 and amplified at a press conference on that date, were as follows :

(1) A total of 21 reactors were in operation, under construction, or planned by the Atomic Energy Authority alone.

(2) The capacity of power stations of the Calder Hall type would be in the region of 300 megawatts and not half this amount, as had been stated in the White Paper of February, 1955. This achievement had been made possible by the discovery of how to increase the working temperature of reactors to a level substantially higher than at first contemplated.

(3) As there were few countries which could accomodate large nuclear power stations in their electricity generating systems, efforts were being made to develop smaller reactors suitable for export.

(4) Work on the peaceful application of the thermo-nuclear reaction as used in the hydrogen bomb had been proceeding since 1948 but remained in the laboratory stage.

(5) Research was proceeding on more advanced types of reactors than those used at Calder Hall, and for the needs of the second stage of the power programme great hope was placed in the sodium-graphite reactor [in which graphite is used to slow down neutrons and from which the heat is removed by liquid sodium.]

(6) The Authority was planning to build a large " proton synchroton."

(7) A research reactor would be built at the Weapons Research Station at Aldermaston, which would take over all research on reactors for military purposes.

(8) About 15,000 curies of Cobalt-60 had been produced in atomic reactors and made available to industrial concerns and hospitals (in the latter case, for cancer treatment).

(9) At the end of its second year the Authority's staff totalled 23,973, an increase of 21 per cent.

(10) The Authority's capital account stood on March 31, 1955, at £174,118,304, and the net cost of operations during 1955-56 was £10,385,000.

New Equipment at Harwell. - "Hermes" and Nero "Machines."

Two new items of equipment, the *Hermes* and the *Nero*, came into operation at Harwell during the period under review.

The *Hermes* (a machine for separating the mixture of isotopes of which most elements consist) began to operate on Jan. 29. Its name was derived from the machine's full title " Heavy Element and Radioactive Material Electromagnetic Separator," the machine being described as the largest and most complex in Western Europe.

Nero (a new experimental low-energy reactor), which began to operate on Feb. 23, will be used to investigate design problems associated with the more advanced types of reactor under study by the Authority. As the sodium-graphite type of reactor was amongst those to be studied with the aid of *Nero*, its name had been derived derived from " NA [chemical symbol for sodium] experimental reactor," the " o " being added to indicate that it was a zero energy reactor.

Atomic Research Station in Dorset.

The Ministry of Housing and Local Government announced on Feb. 1 that the Minister had given permission to the Atomic Energy Authority to proceed with the development of a new atomic research station on a 688-acre site at Winfrith Heath, in Dorset.

The Minister said in his letter to the Authority that objections to the proposals had been raised mainly on the grounds that local water supplies would be impaired ; that the beauty of the landscape would be marred ; that the rural economy would be upset ; that there would be excessive pressure on local housing and schools ; and that the effluent from the establishment would damage fisheries. The Minister believed, however, that water supplies would be sufficient to fulfil all needs ; that the countryside need not become " industrialized or suburbanized " as a result of the project ; and that, while a further detailed examination of the matter would be undertaken, there was no reason to believe that the safety of local fisheries would be endangered. In granting permission, the Minister nevertheless stipulated that the A.E.A. should submit its building plans for the approval of the local planning authority and, specifically, that screens of trees should be erected as and where the two authorities considered desirable.

The matter had been referred to the Minister for decision after the Dorset County Council had accepted the A.E.A.'s proposals by 71 votes to 16 on Nov. 9, 1956.—((Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. Ten-Year Plan, 14045 A ; Atomic Power Stations, 15135 A ; Harwell, 15242 A ; Anglo-American Agreement on Exchange of Information, 15315 A.)

A. PERSIA. — New Cabinet. - Ending of Martial Law.

M. Hussein Ala, who had held the Premiership for the past two years, resigned on April 3 and was succeeded as Prime Minister by Dr. Manouchehr Eghbal (Minister of the Court), who formed a new Government at the Shah's request. No official explanation was given for M. Ala's resignation, but it was understood to have been caused by the murder of three American citizens by a bandit gang in south-eastern Persia, which had led to the suspension of U.S. foreign aid activities in that area. The U.S. citizens concerned were Mr. Kevin M. Carroll, International Economic Co-operation adviser for the Kerman area of Persia ; his wife, Mrs. Anita Carroll ; and Mr. Brewster A. Wilson, an I.E.C. official.

Mr. and Mrs. Carroll and Mr. Brewster were ambushed on March 24 while travelling by jeep through a desolate region of south-eastern Persia near the Pakistani border, and murdered together with two Persians travelling with them. The ambush was carried out by a gang led by a notorious bandit leader, Dad Shah, for whom intensive searches were made by the Persian authorities. It was announced in Karachi on April 18 that a Pakistani border patrol had captured 18 members of the gang including Ahmed Shah, brother of Dad Shah who had crossed into Baluchistan and were apparently trying to make their way to the port of Gwadar, which is under the political control of the Sultan of Muscat, Ahmed Shah was said to have confessed to the murder of Mrs. Carroll, and to have stated that Dad Shah had been killed in a clash with Persian police.

The membership of Dr. Eghbal's Cabinet was announced in Teheran on April 4, as follows :

Dr. Manouchehr Eghbal, Prime Minister and Minister of the Interior ; M. Ali Ardalan, Foreign Minister ; Dr. Mohammed Majlissi, Justice ; M. Ali Asghar Nasser, Finance ; General Ahmed Vossough, National Defence ; M. Mohammed Mehran, Education ; General Ali Akbar Zargan, Customs and Monopolies ; Dr. Abul Hossein Rajdim, Health ; M. Aga Khan Bakhtiar, Labour ; M. Mustafa Tadjadod, Commerce ; M. Hassan Akhrani, Agriculture ; M. Sherif Emami, Industry and Mines ; General Vali Ansari, Transport and Communications ; M. Ghassem Echragui, Posts ; M. Khali Taleghani, Minister of State without portfolio. Four State Secretaries were appointed for the *Présidence du Conseil*, Information, Administrative Affairs, and administration of the Seven-Year Plan (see 10018 A).

Several Ministers of the former Government remained in office, including the Foreign Minister, M. Ardalan. The Ministry of Customs and Monopolies, a newly-created department, will be responsible *inter alia* for tobacco and other State monopolies.

Dr. Eghbal (49) was born at Meshed and is a doctor of medicine by profession, having graduated at the Universities of Paris and Montpellier and being married to a Frenchwoman. A personal friend of the Shah, he has held ministerial posts in a number of Cabinets and was Governor of Persian Azerbaijan in 1950-51. As Minister of the Interior he issued the decree outlawing the Tudeh (Communist) party after the attempt on the Shah's life in 1949.

Immediately after taking office Dr. Eghbal issued a decree ending martial law, which had been imposed during the war and had remained in force in Teheran for 16 years. In a policy statement on the same day (April 5) Dr. Eghbal announced his intention of encouraging a free Press and free speech ; of forming a democratic two-party system from which members of the armed forces would be excluded ; and of developing the concept of a Parliamentary Opposition " His Majesty's Opposition "—in the Majlis (Parliament). He stated in this connexion that the formation of political parties (banned since 1953 under the martial law regulations) would be permitted for all groups except the Communists. Dr. Eghbal also dwelt on the need to create an efficient administrative machine ; to reduce the number of Civil servants ; to introduce budgetary reforms ; and to eradicate poverty and Communism. In foreign affairs the Government would continue to co-operate with friendly Powers and would not tolerate any interference in Persian affairs.

Dr. Eghbal was given a vote of confidence by the Majlis on April 14, the voting being 110 votes to nil with four abstentions.—(Le Monde, Paris - Times - New York Times)

(Prev. rep. 14151 B.)

B. NORWAY. — Compulsory Insurance Scheme for Bereaved Children.

A new compulsory insurance scheme came into force in Norway on April 1 under which an amount of 600 kroner (£30) will be paid annually to all children (including illegitimate children) belonging to families who have lost their breadwinner through any cause. To cover the expenditure, a special premium at the rate of 15 öre (about 2d.) a week will be payable by all employees paying National Health Insurance contributions, another 9 öre per week being payable by all employers for each of their employees. It was stated that 86,000 children would benefit at once under the new scheme.

(Norwegian Embassy, London - Aftenposten, Oslo)

MAY 11—18, 1957

A. INDIA. — General Elections to House of the People and State Assemblies. - Congress Majority in House of the People and 11 State Assemblies. - New Cabinet formed by Mr. Nehru. - Reorganization of Ministries. - Changes in State Governments. - Communist Ministry in Kerala. - National Conference Victory in Kashmir State Elections. - Re-election of President Prasad and Vice-President Radhakrishnan.

The final results of the elections to the House of the People (*Lok Sabha*), the lower House of the Indian Parliament, and to the State Assemblies, voting in which concluded on March 14, were officially published on April 5. Candidates were returned for 488 of the 500 seats in the House of the People filled by election; voting was postponed owing to adverse weather conditions in Himachal Pradesh, which returns four members, and in two Punjab constituencies. The six members for Kashmir are elected indirectly by the State Assembly.

The Congress Party won 365 seats, about the same number as in the 1951-52 elections, and increased its proportion of the total vote from 45 to 47 per cent. It also won an absolute majority in 11 of the 13 State Assemblies, although securing a majority of the total vote only in Assam (56 per cent) and Mysore (51 per cent). In Orissa, where no single party obtained a majority, Congress as the largest party formed a minority Government with the support of certain other groups. In Kerala the Communist Party emerged as the largest single group, and was able to take office with Independent support.

The elections passed off peacefully except in Mysore, where one man was killed in a clash between Congress and Communist supporters in the Kolar district, and in certain areas of Bombay State, where strong anti-Congress feeling had been aroused by the linguistic controversy. Out of an electorate of 193,120,024, about 121,400,000 people voted in the parliamentary and 112,300,000 in the State Assembly elections; 118,821,705 valid votes were cast in the parliamentary elections against 105,987,318 in the 1951-52 elections, when the electorate totalled about 173,000,000. The number of candidates for the House of the People showed a considerable decrease, from 1,975 in 1951-52 to 1,493. Only 12 candidates (all Congress) were returned unopposed.

Elections to House of the People.

The following table shows the seats and votes won by the four "all-India" parties—the Congress, Praja Socialist Party (P.S.P.), Communist Party, and *Jan Sangh*. All voting figures are provisional.

	1957		1951-52	
Party	Seats	Votes	Seats	Votes
Congress	365	57,278,612	362	47,528,911
P.S.P. . ..	19	11,642,726	21*	17,285,126*
Communists ..	29	12,068,452	23	4,712,009
Jan Sangh ..	4	7,216,800	3	3,286,361
Others	71	30,615,115	80	38,224,911

*Figures are for Socialist Party and *Kisan Mazdoor Praja* Party combined.

"Others" included 23 Independents and 48 representatives of minor parties, as follows: Socialists 7, Scheduled Castes Federation 7, *Ganatantra Parishad* (Orissa) 7, *Jharkhand* Party (Bihar) 7, Peasants' and Workers' Party (Bombay) 4, Forward Bloc 3, *Janata* Party (Bihar) 3, *Dravida Munnetra Kazhagam* (Madras) 2, Congress Reforms Committee (Madras) 2, Hindu Mahasabha 2, Revolutionary Socialist Party 1, Moslem League 1, *Lok Sewak Sangh* (West Bengal) 1, Eastern Tribal Union (Assam) 1.

The election results as they affected the various parties are analysed below.

Congress Party. The distribution of Congress seats among the various States was as follows, the total number of members returned by each State to the House of the People being shown in parentheses: Andhra Pradesh 37 (43), Assam 9 (12), Bihar 41 (53), Bombay 38 (66), Kerala 6 (18), Madhya Pradesh 35 (36), Madras 31 (41), Mysore 23 (26), Orissa 7 (20), Punjab 19 (22, two seats unfilled), Rajasthan 19 (22), Uttar Pradesh 70 (86), West Bengal 23 (36), Delhi 5 (5), Manipur 1 (2), Tripura 1 (2).

Congress—which, in addition to its 12 unopposed candidates, contested 484 seats—increased its overall percentage of votes from 45 per cent to nearly 48 per cent; it also increased its poll in most States, and notably in the Punjab (where it had gained the support of the Sikh *Akali Dal* since the previous elections), Andhra Pradesh, Madras, Mysore, and Rajasthan. This improvement in the party's position, however, was not reflected in increased parliamentary representation—primarily because of the fall in the number of Opposition candidates, as a result of which fewer Congress candidates were returned on a minority vote. The Congress suffered a series of reverses in the Maharashtra area of Bombay, where it won only two seats out of 22; in the Gujerat area of the same State; in Uttar Pradesh, where its percentage of the vote fell from 48 in 1952 to 42; in Kerala; and in Orissa.

All the members of the Central Government were returned except the Ministers of Labour and Law and three Deputy Ministers. Mr. Nehru was elected by a majority of 193,000 in an Allahabad constituency, his three opponents (one *Jan Sangh* and two Independents) all forfeiting their deposits. Mr. Krishna Menon (Minister without portfolio) was elected in a Bombay constituency, defeating Mr. Alvares, a prominent Praja Socialist. Elsewhere in Bombay State, however, where the elections were fought largely on the linguistic issue, three members of the Government lost their seats—Mr. Khandubhai Desai (Minister of Labour), who was defeated by a 127,000 majority in a straight fight in an Ahmedabad constituency, Mr. H. V. Pataskar (Minister for Law and Civil Aviation), and Mr. Jagannathrao Bhonsle (Deputy Minister for Rehabilitation). Also in Bombay State, Mr. N. V. Gadgil (a former Minister) lost the Poona seat which he had held for nearly 20 years. In Madras two Deputy Ministers, Mr. Alagesan (Railways) and Mrs. Chandrasekhar (Health) were defeated at Chingleput, a double-member constituency, while Mr. V. V. Giri, a former Minister of Labour, was defeated in an Andhra constituency.

All the leaders of the Indian National Trades Union Congress, which is supported by the Congress Party, failed to secure election, including Mr. Khandubhai Desai (the Labour Minister) and Mr. G. D. Ambekar, its former president.

The Congress Parliamentary Party (comprising the Congress members in both Houses) unanimously re-elected Mr. Nehru as its leader on March 29.

Communist Party. The Communist Party—which contested 121 seats and concentrated its efforts particularly on Kerala and West Bengal—more than doubled its vote, and by increasing its parliamentary representation to 29 replaced the Praja Socialists as the second largest group. Its seats were won in the following States: Andhra Pradesh 4, Bombay 4, Kerala 9, Madras 2, Orissa 1, Punjab 1, Uttar Pradesh 1, West Bengal 6, Tripura 1. Its strongest support came from Kerala, West Bengal, Bombay, and Andhra Pradesh, which together returned 23 Communist members; on the other hand the party lost ground in Madras, the Telengana area of Andhra Pradesh, and Tripura, and failed to secure any seats in Assam, Bihar, Madhya Pradesh, Mysore, Rajasthan, Delhi, and Manipur. Among leading Communists elected were Mr. A. K. Gopalan and Mr. S. A. Dange, who were returned from Kerala and Bombay respectively.

Praja Socialist Party. The P.S.P., although contesting more seats (179) than any other Opposition party, won only 19, compared with the 21 won in 1951-52 by the Socialists and the K.M.P.P., the two parties which later united to form the P.S.P. Its candidates were returned from the following States: Assam 2, Bihar 2, Bombay 5, Kerala 1, Mysore 1, Orissa 2, Uttar Pradesh 4, West Bengal 2. The party gained ground in Bombay and West Bengal, where it had failed to secure representation in the previous elections, and also in Uttar Pradesh and Orissa, but failed to return any candidates in Madras (where it had won eight of its 21 seats in 1952), Andhra Pradesh, Madhya Pradesh, the Punjab, Rajasthan, Delhi, Manipur, or Tripura.

The P.S.P. leader, Mr. J. B. Kripalani (who was not opposed by Congress), was elected in Bihar, but several other prominent members lost their seats, including Mr. Asoka Mehta and Mr. H. V. Kamath, who were both defeated by Congress candidates. Mr. P. T. Pillai, the former Chief Minister of Travancore-Cochin, was defeated by a Communist-supported Independent in his home constituency of Trivandrum. Mr. N. G. Goray, a member of the party executive who had been released in February after serving a term of imprisonment in Goa for participating in the *satyagraha* movement, won Mr. Gadgil's seat at Poona.

Reasons suggested in the Indian press for the P.S.P.'s comparative lack of success were internal dissensions within the party and lack of leadership—in particular, the secession of Dr. R. M. Lohia and his followers, and the withdrawal from political life of the party's most popular leader, Mr. J. P. Narain.

Other Left-wing Parties. The Socialist Party won seven seats (three in Uttar Pradesh, two in Andhra Pradesh, and one each in Madras and Manipur), although its leader, Dr. Lohia, was defeated by a Congress candidate in Uttar Pradesh. Dr. Lohia stated on April 14 that the party would challenge the legality of the elections, as its candidates, unlike those of other parties, had been allotted different symbols at different places.

The one Revolutionary Socialist Party candidate returned, Mr. T. K. Choudhury, was elected from a West Bengal constituency, where he was not opposed by Congress. Mr. Choudhury had been released with Mr. Goray in February after a period of imprisonment in Goa.

Right-wing Parties. The *Jan Sangh*—which contested 129 seats—more than doubled its previous vote, but only increased its representation by one seat. It won two of its seats in Bombay, where it enjoyed the support of the *Samyukta Maharashtra Samiti*, and the other two in Uttar Pradesh, where it had put up 60 of its 129 candidates. The party was unsuccessful in West Bengal and Rajasthan, where its three members in the former *Lok Sabha* were returned in 1951-52, and in the five other States where it presented candidates.

The Hindu Mahasabha, which had previously held four seats, won only two; its president, Mr. N. C. Chatterjee, was defeated by a Communist in West Bengal, and its general secretary, Mr. V. G. Deshpande, by a Congress candidate. The *Ram Rajya Parishad*, which won three seats in the previous elections, is not represented in the new House.

Other Parties. The Scheduled Castes Federation won most of its seats in Bombay, where it profited from anti-Congress feeling on the linguistic issue; its president, Mr. Sivaraj, defeated Mrs. Chandrasekhar (the Deputy Health Minister) in Madras. The Moslem League won its only seat in Kerala, where it had formed an electoral alliance with the P.S.P.

Details for the *Ganatantra Parishad* (Orissa), *Jharkhand* Party (Bihar), Peasants' and Workers' Party (Bombay), *Janata* Party (Bihar), *Dravida Munnetra Kazhagam* (Madras), Congress Reforms Committee (Madras), *Lok Sewak Sangh* (Bihar and West Bengal), and Eastern Tribal Union (Assam) are given below in connexion with the elections to the Assemblies of those States.

Appointment of Nominated Members.

Mr. Frank Anthony and Mr. A. E. T. Barrow were nominated by President Prasad on April 5 to represent the Anglo-Indian community, and Mr. C. Gohain to represent the tribal areas of Assam.

New Central Government.

A new Congress Government, consisting of 13 Cabinet Ministers, 14 Ministers of State, and 12 Deputy Ministers, was formed by Mr. Nehru on April 17, this being the third Ministry since the achievement of India's independence. Its membership was as follows:

Cabinet Ministers.

Mr. Jawaharlal Nehru ..	Prime Minister, External Affairs, and Atomic Energy.
Dr. Abul Kalam Azad ..	Education and Scientific Research.
Pandit Govind Ballabh Pant	Home Affairs.
Mr. Morarji Desai	Commerce and Industry.
Mr. Jagjivan Ram	Railways.
Mr. Guzarilal Nanda ..	Labour and Employment, and Planning.
Mr. T. T. Krishnamachari ..	Finance.
Mr. Lal Bahadur Shastri ..	Transport and Communications.
Sardar Swaran Singh ..	Steel, Mines and Fuel.
Mr. K. C. Reddy	Works, Housing and Supply.
Mr. Ajit Prasad Jain ..	Food and Agriculture.
Mr. Krishna Menon	Defence.
Mr. S. K. Patil	Irrigation and Power.

Ministers of State.

Mr. S. Narayan Sinha ..	Parliamentary Affairs.
Dr. B. V. Keskar	Information and Broadcasting.
Mr. D. P. Karmarkar ..	Health.
Dr. P. S. Deshmukh ..	Minister of State in the Ministry of Food and Agriculture.
Mr. K. D. Malaviya ..	Minister of State in the Ministry of Steel, Mines and Fuel.
Mr. M. C. Khanna	Rehabilitation.
Mr. Nityanand Kanungo ..	Minister of State in the Ministry of Commerce and Industry.
Mr. Raj Bahadur	Minister of State in the Ministry of Transport and Communications.
Mr. B. N. Datar	Minister of State in the Ministry of Home Affairs.
Mr. M. M. Shah	Minister of State in the Ministry of Commerce and Industry.
Mr. S. K. Dey	Community Development.
Mr. A. K. Sen	Law.
Dr. K. L. Shrimali .. .	Minister of State in the Ministry of Education and Scientific Research.
Mr. Humayun Kabir ..	Minister of State in the Ministry of Transport and Communications.

Deputy Ministers.

Sardar Surjit Singh Majithia	Defence.
Mr. Abid Ali	Labour.
Mr. A. K. Chanda	External Affairs.
Mr. V. M. Krishnappa ..	Food and Agriculture.
Mr. J. L. Hathi	Irrigation and Power.
Mr. Satish Chandra	Commerce and Industry.
Mr. S. N. Mishra	Planning.
Mr. B. R. Bhagat	Finance.
Dr. M. M. Das	Education and Scientific Research.
Mr. Shah Nawaz Khan ..	Railways.
Mrs. Lakshmi Menon ..	External Affairs.
Mrs. Violet Alva	Home Affairs.

The total membership of the Government was thus 39, compared with 44 previously. The rank of Minister of State replaced the former category of "Ministers of Cabinet rank but not members of the Cabinet."

In addition to those Ministers who failed to secure re-election (see section "Congress Party" above), six members of the previous Government were dropped: viz., two Cabinet members Mr. C. C. Biswas (Law Minister) and Rajkumari Amrit Kaur (Minister of Health) and four Ministers of State Dr. Syed Mahmud (External Affairs), Mr. Mahavir Tyagi (Defence), Mr. M. C. Shah, and Mr. A. C. Guha (Finance). The portfolios of Health and of Law were entrusted to Ministers of State, instead of being held by Cabinet Ministers.

Mr. Krishna Menon, previously Minister without portfolio and, in that capacity, adviser to Mr. Nehru on foreign affairs, became Defence Minister. After the formation of the new Cabinet, however, Mr. Nehru announced that Mr. Menon would continue to be associated with the External Affairs Ministry for questions relating to the United Nations, Egypt, Kashmir, Goa and other important foreign issues.

Mr. Shastri returned to the Cabinet, from which he had resigned as Railway Minister in November last. Dr. Shrimali had hitherto been Deputy Minister of Education, while Mr. Patil, Mr. Sen, Mr. Kabir, Mrs. Menon, and Mrs. Alva took office for the first time.

Mr. S. K. Patil (56), educated at London University, was several times imprisoned for taking part in civil disobedience movements. He was general secretary of the Bombay Pradesh Congress Committee from 1929-46, when he became its president, and has been a member of the All-India Congress Committee since 1931. He has represented a Bombay City constituency in the *Lok Sabha* since 1952.

Mr. A. K. Sen was called to the Bar at Gray's Inn in 1941 and practised in Calcutta, being appointed Junior standing counsel to the West Bengal Government in 1950. He was a member of the Indian delegation at the U.N. in 1955.

Mr. Kabir (51), educated at Oxford, is a well-known writer in Bengali and English. He was secretary to the Ministry of Education until 1954, when he was elected to the Council of States from West Bengal.

Mrs. Menon (58) was a member of the Indian delegation at the U.N. in 1948 and 1950, and has served in the U.N. Secretariat. She is a member of the Council of States, and was appointed Parliamentary Secretary to the External Affairs Ministry in 1952.

Mrs. Alva (49), also a member of the Council of States, is a Bombay lawyer and journalist, and a former vice-president of the All-India Christian Congress.

The working of several Ministries was reorganized as follows under a Presidential order issued on April 17: (1) Two existing Ministries were abolished, those of Production and Natural Resources and of Scientific Research; (2) three new Ministries were created for Transport and Communications; Steel, Mines, and Fuel; and Education and Scientific Research; (3) the Ministry of Commerce and Consumer Industries and that of Heavy Industries were again combined as the Ministry of Commerce and Industry, thus restoring the position before Sept. 1, 1956; and (4) the separate Ministries of Food and Agriculture—created only on Oct. 17, 1956—were again merged into a single Ministry. The former Ministry of Labour was renamed the Ministry of Labour and Employment.

Clearly defined departments were set up within the new Ministries to deal with specific subjects. The Ministry of Commerce and Industry was composed of three departments—those of Heavy Industries, which deals *inter alia* with all State-owned heavy engineering projects, of Commerce and Light Industries, and of Chemical and Pharmaceutical Industries. The Ministry of Transport and Communications was divided into a Department of Transport, dealing with shipping and road and inland water transport, a Department of Communications dealing with radio, posts, and telegraphs, and a Department of Civil Aviation. The Ministry of Education and Scientific Research will contain three departments—for Education, Scientific Research and Technical Education, and Fine Arts and Physical Culture. The Ministry of Steel, Mines, and Fuel will contain Departments of Iron and Steel, Mining, and Fuel.

Elections to State Assemblies.

Simultaneously with the Parliamentary elections, voting took place for the Legislatures in all the States except Andhra Pradesh, where voting was confined to the Telengana area (transferred from Hyderabad under the States Reorganization Act) as elections to the Andhra Assembly had been held in 1955. Of 2,899 seats filled as a result of the State elections, the Congress won 1,888, the Communists and their allies 189, the P.S.P. 195, and the *Jan Sangh* 46.

The Congress obtained a majority in 11 of the 18 States (excluding Kashmir), and formed the largest single party in Orissa. As in the Parliamentary elections, it improved its position in Andhra Pradesh, Madras, the Punjab, and Rajasthan, but suffered setbacks in Bihar, the Maharashtra and Gujerat areas of Bombay, and Uttar Pradesh. The Com-

munists secured representation for the first time in all the State Assemblies, and in Kerala formed the first Communist government in any Indian State. They constituted the largest Opposition group in Andhra Pradesh and West Bengal and considerably increased their representation in Bombay, but lost ground in Telengana and Madras. The P.S.P. formed the largest Opposition group in Assam, Bihar, Bombay, Madhya Pradesh, Mysore, and Uttar Pradesh. The right-wing parties (apart from the Orissa *Ganatantra Parishad*) met with little success except in Madhya Pradesh, the Punjab, Rajasthan, and Uttar Pradesh.

Details of the elections and of subsequent changes in the State Governments are given below. [Except where otherwise stated, party strengths in the Assemblies as reconstituted on November 1, 1956, under the States Reorganization Act are given in parentheses for purposes of comparison; it should be noted, however, that certain of the Assemblies have since been reduced or increased in size.]

Andhra Pradesh.

The results of the elections to the 105 Telengana seats were as follows: Congress 68 (50), People's Democratic Front 22 (34), P.S.P. 1 (6), Scheduled Castes Federation 1 (nil), other parties and Independents 13 (11). In consequence, the position in the State Assembly became as follows: number of seats 301 (295), of which Congress 215 (197), Communists and People's Democratic Front 35 (49), Andhra Nationalist Party 21 (20), Socialists 16 (18), P.S.P. 2 (6), Scheduled Castes Federation 1 (0), Praja Party 1 (nil), Independents 10 (4).

The elections constituted a serious setback for the Communists, who had allied with the Democratic People's Party and left-wing Independents to form the People's Democratic Front, and who had regarded Telengana as one of their main strongholds. Their percentage of the votes fell from 31.2 in 1951 to 26.5, while that of Congress rose from 37.5 to 46.5. The Andhra Nationalist Party was formed after the 1955 elections from Independents and members of minor Opposition groups.

Following the elections, the Chief Minister of Andhra Pradesh (Mr. N. Sanjiva Reddi) reshuffled his Cabinet as follows:

Mr. Sanjiva Reddi—Chief Minister, General Administration, Information, Industries, Commerce, Transport, and Health; Mr. Gopala Reddi—Finance; Mr. Kala Venkata Rao—Revenue, Land Reforms, and Excise; Mr. K. V. Ranga Reddi—Home Affairs; Mr. V. B. Raju—Planning and Development; Mr. M. N. Jung—Co-operation and Housing; Mr. D. Sanjiraiah—Labour and Social Welfare, Mr. J. V. Narasingh Rao—Irrigation and Power; Mr. K. Brahmananda Reddi—Local Administration; Mr. S. B. P. Pattabhirama Rao—Education; Mr. P. Thimma Reddi—Agriculture and Forests; Mr. G. V. Naidu—Law; Mr. M. Narasingh Rao—Highways, Buildings, and Relief and Rehabilitation.

Mr. Gopala Reddi, Minister of Home Affairs in the outgoing Ministry, had held the Finance portfolio both in the composite Madras State and in Andhra State. Mr. K. V. Ranga Reddi had hitherto been Revenue Minister.

Assam.

Number of seats 108 (105), of which: Congress 71 (76), P.S.P. 8 (5), Communists 4 (1), Garo National Council 4 (3), Tribal Union 3 (nil), United Mizo Freedom Organization 2 (nil), Mizo Union 1 (3), Revolutionary Communist Party 1 (nil), Independents 13 (14).

Though increasing its percentage of the total vote from 43 9 in 1952 to 56.6, Congress was returned with a reduced majority, largely because the Opposition parties had reached an agreement to avoid three-cornered fights. Congress suffered a major defeat in the autonomous hill districts, where it won only one out of 15 seats contested, all the remaining seats being won by local groups advocating an autonomous Hills State or by Independents. In the Naga Hills district, where the 1952 elections were boycotted by the electorate, two Independents were returned unopposed; the third seat remained vacant, as the only candidate nominated withdrew. Among Independent candidates returned from the hill districts was the Rev. J. J. M. Nichols Roy, who had recently resigned from the Assam Government in order to support the movement for a Hills State. Elections to district Councils in the hill districts, which were held at the same time, also resulted in an overwhelming victory for autonomist groups.

The Chief Minister of Assam, Mr. Bishnuram Medhi, formed a new Government on April 22, the distribution of portfolios being as follows:

Mr. Bishnuram Medhi—Chief Minister in charge of General Administration, Appointments and Tribal Areas; Mr. Doveswar Sarmah—Finance and Supply; Mr. Siddhinath Sarmah—Public Works, Transport, Rural Development and Local Self-Government; Mr. Motiram Bora—Home and Education; Mr. K. P. Tripathi—Labour, Industries, Development and Planning; Mr. Hareswar Das—Revenue and Relief; Mr. Rupnath Brahma—Forests, Public Health, Medical, Judicial, Legislative, Printing and Stationery Departments; Mr. M. H. Choudhury—Food, Agriculture, Veterinary and Co-operatives; Mr. C. S. Teron—Excise, Prohibition, Jails, Tribal Welfare and Development of Backward Areas. There were also six Deputy Ministers.

Mr. Siddhinath Sarmah, Mr. Bora, and Mr. Brahma had been members of the previous Ministry, while Mr. Hareswar Das had been a Deputy Minister.

Bihar.

Number of seats 318 (318), of which: Congress 210 (233), P.S.P. 31 (24), *Jharkhand* Party 30 (31), *Janata* Party 23 (11), Communists 7 (nil), Socialists 2 (nil), *Lok Sewak Sangh* 1 (4), *Ganatantra Parishad* 1 (1), Independents 13 (12).

The *Jharkhand* Party, led by Mr. Jaipal Singh, draws its support from the Adibasi tribes of the Chota Nagpur area, and demands the formation of an Adibasi State comprising areas of Bihar, Orissa, and West Bengal. The *Janata* Party is headed by the former Raja of Ramgarh, its main objective being the grant of peasant proprietorship. The aims of the *Lok Sewak Sangh* are the development of the Bengali language, and the amalgamation with West Bengal of those parts of southern Bihar inhabited by Bengalis.

The Chief Minister of Bihar, Dr. S. K. Sinha, was re-elected leader of the Congress Legislature Party on April 7, defeating Mr. A. N. Sinha (Finance Minister) by 145 votes to 109. He formed a new Ministry on May 6.

Bombay.

Number of seats 396 (470), of which: Congress 232 (391), P.S.P. 36 (14), Peasants' and Workers' Party 31 (20), Communists 18 (1), Scheduled Castes Federation 15 (3), *Jan Sangh* 4 (nil), Hindu Mahasabha 1 (nil), Independents 55 (19). Elections to four seats were postponed, as two candidates for double-member constituencies died during the election campaign.

Although Congress secured an absolute majority, it nevertheless suffered a serious setback in certain parts of the new Greater Bombay State, five Ministers losing their seats: Mr. B. Patil (Development), Miss Chimanlal (Social Welfare), Mr. Sathe (Industries), Mr. Naik-Nimbalkar (Public Works), and Mr. Tapase (Local Government). These reverses were attributed entirely to the fact that the Opposition parties jointly fought the elections on the linguistic issue and were thus helped by popular feeling in both Maharashtra and Gujerat against the union of these areas in a bilingual State. In Bombay City and Maharashtra the Opposition parties had united in the *Samyukta Maharashtra Samiti* to advocate a separate Marathi State with Bombay as its capital, while in Gujerat a similar alliance (the *Mahagujerat Janata Parishad*) had been formed on a basis of support for a separate Gujerati State. In consequence, gains were made at the expense of Congress by the P.S.P., the Peasants' and Workers' Party (a Socialist organization which broke away from Congress in 1948), and the Communists on the left, by the *Jan Sangh* and Hindu Mahasabha on the right, and by the Scheduled Castes Federation.

In Maharashtra the Congress secured only 32 seats out of 133, two of its candidates forfeiting their deposits. In Greater Bombay it won 13 seats out of 24, though receiving fewer votes than the *Samiti*, and in Gujerat 57 out of 89. In other areas of the State, however, it obtained large majorities—40 seats out of 41 in Kutch and Saurashtra, 55 out of 63 in Vidarbha, and 35 out of 42 in Marathwada. Mr. Nehru described the "swing towards linguism" in Maharashtra and Gujerat as "a temporary phase," and stated that Congress would not change its policy of a bilingual Bombay State because of it.

Mr. Chavan, the Chief Minister of Bombay, formed a new Congress Ministry after he had been re-elected leader of the Congress Party in the State Assembly. The membership and distribution of portfolios was announced on April 11 as follows:

Mr. Y. B. Chavan—Chief Minister, Home and Political Affairs, and Services; Dr. J. Mehta—Finance; Mr. U. Parikh—Revenue; Mr. Shantilal Shah—Labour and Law; Mr. M. S. Kannamwar—Public Health, Mr. V. P. Naik—Agriculture; Mr. R. Adani—Prohibition, Village *Panchayats* and Cottage Industries; Mr. B. Ghade—Forests; Mr. M. C. Shah—Local Self-Government; Mr. S. K. Wankhede—Planning, Development, Electricity and Industries; Mr. D. S. Desai—Public Works; Mr. H. K. Desai—Education; Mr. S. G. Kazi—Civil Supplies, Housing, Printing Office and Fisheries; Mr. T. S. Bharde—Co-operatives; Mr. N. K. Tirpude—Social Welfare and Rehabilitation. There were also 12 Deputy Ministers.

Mr. Bharde, the Minister for Co-operatives, was secretary of the Maharashtra Pradesh Congress Committee, while Mr. D. Chauhan, a Deputy Minister, was chairman of the Marathwada Congress Committee. The Cabinet included one Moslem and one member of the Scheduled Castes, while the Scheduled Tribes were represented by one of the Deputy Ministers.

Kerala.

Number of seats 126 (118), of which: Communists 60 (27), Congress 43 (60), P.S.P. 9 (16), Moslem League 8 (nil), Independents 6 (3). [The figures in parentheses show party strengths in the Travancore-Cochin Assembly at the time of its dissolution in March 1956.] Five of the six Independents supported the Communist Party, which thus obtained an absolute majority.

Before the elections unsuccessful negotiations for an electoral alliance had taken place between the Communists, the Praja Socialists, the Revolutionary Socialist Party, and the Kerala Socialist Party, and also between the Congress and the Moslem League. An agreement was reached, however, between the P.S.P.

and the Moslem League whereby the former agreed to support the League's candidates in Malabar (which has a considerable Moslem population), while the League agreed to support Praja Socialist candidates in Travancore-Cochin.

The Congress, which put forward 124 candidates, received 2,210,251 votes against 2,059,548 for the Communists, who put forward 100 candidates; the position was thus almost exactly the reverse of that in the parliamentary elections, in which the Communists received about 160,000 more votes than the Congress. Several prominent Congress members lost their seats, including Mr. Govinda Menon (Chief Minister of Travancore-Cochin from 1955-56), and a number of Congress candidates forfeited their deposits. The Revolutionary Socialists and Kerala Socialists, who had won nine and three seats respectively in the 1954 elections, when they had formed the "United Front of Leftists" with the Communists, failed to win a single seat.

Mr. Nehru, in a press statement on March 29, expressed the opinion that the Communist victory in Kerala represented "discontent with local matters" rather than "positive support for Communism." Broad issues, national or international, had hardly affected the elections, which had primarily been influenced by "local difficulties, local issues, and local irritations." Replying to questions, he added that according to his information the land problem had not been a major factor in Kerala. He expressed the view that the local conditions which had led to the Communist victory in Kerala would not be found elsewhere, and stressed that even in Kerala the Congress Party had obtained more votes than in the first general election.

Dr. Ramakrishna Rao, the Governor of Kerala, had previously expressed the view that the Communist victory had no relation to President's rule in the State. The people of Kerala, he said, had for a long time been unhappy that they had had no stable Government, and "rightly or wrongly they thought this was the only way to ensure a stable Government, and voted for the Communists."

According to the *Manchester Guardian*, the following social and political factors were believed to have contributed to the Communist victory: (1) Kerala has the highest population density of any Indian State but very little industry, with the result that unemployment was widespread. (2) The fact that the State has the highest literacy rate in India contributed to produce an acute problem of "educated unemployed." (3) The peasantry are largely landless, and agrarian reforms drafted by the Praja Socialist Government of 1954-55 had not been implemented by Mr. Govinda Menon's Government. (4) Under the States Reorganization Act the Tamil Nad district of Travancore-Cochin, which was solidly Congress, had been transferred to Madras, and the Malabar district of Madras, in which Congress was in a minority, had been transferred to Kerala. (5) Travancore-Cochin had had five Chief Ministers since 1948 and had been under President's rule since March 1956, as neither Congress nor the Opposition parties had been able to form a majority Government; the general desire for political stability thus worked in favour of the Communists, the only Opposition party capable of forming a stable Government, at the expense of the smaller left-wing parties. (6) The Congress leadership in the State was divided by internal dissensions.

The Governor of Orissa nominated Mr. D'Cruz, a Congress supporter, to represent the Anglo-Indian community in the State Assembly.

President's rule in Kerala was brought to an end on April 5, when a Ministry headed by Mr. E. M. S. Nambudiripad — described by a Communist Party spokesman as "the first Communist Government in the world through the ballot-box" —took office. The P.S.P. had previously rejected an invitation from the Communist Party to co-operate in forming a Government. The membership of the new Ministry was as follows:

Mr. Nambudiripad—Chief Minister, General Administration, Law and Order, and Planning; Mr. C. Achutha Menon—Finance and Agriculture; Mr. K. C. George—Food and Forests; Mr. K. P. Gopalan—Industries, Mining, Community Development, and Commerce; Mr. T. V. Thomas—Transport and Labour; Mr. P. K. Chathan—Local Government and Housing; Miss K.R. Gouri—Revenue; Mr. T. A. Najeed—Public Works, Communications, and Information; Professor Joseph Mundasseri—Education, Co-operatives and Fisheries; Dr. A. R. Menon—Health; Mr. V. R. Krishna Aiyar—Law, Irrigation, and Electricity.

Mr. Nambudiripad (48), the son of a Brahmin landowner in Malabar, joined the Congress in 1932, helped to found the Congress Socialist Party in 1934, and became a Communist in 1937, being elected to the party's Politburo in the early 'forties and subsequently becoming one of its most prominent members. Mr. Achutha Menon (44), deputy leader of the Communist party in the Assembly, is a lawyer and writer, and has translated H. G. Wells's *Short History of the World* into Malayalam. Dr. Menon, the first president of the Cochin Congress, and Mr. Aiyar, a leading Malabar lawyer, were elected as Independents.

Madhya Pradesh.

Number of seats 288 (338), of which: Congress 232 (274), P.S.P. 12 (23), *Jan Sangh* 10 (4), Hindu Mahasabha 7 (12), Socialists 6 (4), *Ram Rajya Parishad* 5 (7), Communists 2 (nil), Independents 14 (10).

Dr. K. N. Katju, who had succeeded Pandit R. S. Shukla as Chief Minister following the latter's death on Jan. 31, formed a new Congress Ministry on April 14, the distribution of portfolios being announced on April 23 as follows:

Dr. K. N. Katju—Chief Minister in charge of General Administration, Home Affairs, Planning and Development, and Co-ordination; Mr. B. A. Mandloi—Revenue, Land Reforms, and Local Self-Government; Mr. T. M. Jain—Commerce and Industries, and Agriculture; Mr. S. N. Shukla—Forests and Natural Resources; Dr S. D. Sharma—Education and Law; Mr. M. Gangwal—Finance; Mr S. L. Tewari—Public Works, Irrigation, and Electricity; Mr. V. V. Dravid—Labour, Rehabilitation and Housing; Raja Naresh Chandra Singh—Tribal Welfare; Mr. A. Q. Siddiqui—Prisons, Food and Supplies; Mr. G. R. Anant—Social Welfare and Co-operatives; Rani Padmavati Devi—Public Health.

The only change was that Mr. Siddiqui, formerly a Deputy Minister, became a full Minister, while Maulana Tarzi Mashriqui, formerly a Minister, became one of the nine Deputy Ministers.

Madras.

Number of seats 205 (190), of which: Congress 151 (127), Congress Reforms Committee 16 (nil) *Dravida Munnetra Kazhagam* 15 (nil) Communists 4 (17), P.S.P. 2 (nil), Socialists 2 (3), Independents 15 (5).

The outstanding features of the elections were the strengthening of the position of Congress at the expense of the left-wing parties, and the success achieved by two new groups. The Congress Reforms Committee was formed on the eve of the elections by a number of dissident Congressmen as a protest against the party's method of selecting candidates, and put forward 50 candidates against the official Congress nominees. The *Dravida Munnetra Kazhagam*, which is led by Mr. C. N. Annadurai, opposes "North Indian domination of the south" and advocates the union of Madras, Andhra Pradesh, Kerala, and Mysore in an independent "Republic of Dravidastan" from which any of the constituent States would have the right to secede. It also opposes the introduction of Hindi in South India, and favours the retention of English as the language of inter-State communication.

The Chief Minister, Mr. Nadar, who had been unanimously re-elected leader of the Congress Legislature Party on April 2, formed a new Government on April 15 as follows:

Mr. Kamaraj Nadar—Chief Minister and Development; Mr. M. Bhaktavatsalam—Home Affairs, Food and Agriculture, Railways, Posts and Telegraphs, and Civil Aviation; Mr. C. Subramaniam—Finance, Education, Information, and Law; Mr. M. A. Manickavelu—Revenue and Public Health; Mr. P. Venkataraman—Industries, Labour, and Co-operatives; Mr. P. Kakkan—Public Works and *Harijan* Welfare; Mr. V. Ramaiah—Electricity and Transport; Mrs. Lourdhammal Simon—Local Administration and Fisheries.

Mysore.

Number of seats 208 (210), of which: Congress 150 (178), P.S.P. 18 (7), Scheduled Castes Federation 2 (1), Peasants' and Workers' Party 2 (2), Communists 1 (1), Independents 35 (18).

The most notable feature of the elections was the gains made by Praja Socialist and Independent candidates at the expense of Congress, which, however, retained a large overall majority. Congress suffered its main setbacks in the Kolar goldfields area, where it won five seats out of 12, and in the Belgaum district, where it won seven out of 18. In the Kolar district, where demands had been put forward for the repeal of prohibition, a Communist and five Communist-supported Independents were returned, while in the Belgaum district the Opposition fought the elections on the linguistic issue, demanding the inclusion of part of the area in a Maharashtra State. Prominent Congressmen defeated included two Ministers, Mr. Rama Rao and Mr. J. H. Chandriki, and the president of the Mysore Pradesh Congress Committee, Mr. S. Chenniah.

Mr. Nijalingappa, the Chief Minister, was unanimously elected leader of the Mysore Legislature Congress Party on April 6, and formed a new Cabinet on April 19. The distribution of portfolios was announced on April 22 as follows:

Mr. S. Nijalingappa—Chief Minister, General Administration, Planning and Development, Co-operatives and Marketing; Mr. M. P. Patil—Revenue; Mr. C. M. Poonacha—Home Affairs and Industries; Mr. H. S. Rudrappa—Agriculture, Forests and Fisheries; Mr. T. Mariappa—Finance and Local Affairs; Mr. R. Channigaramiah—Local Government; Mr. H. K. Veeranna Gowda—Public Works and Electricity; Mr. V. Venkatappa—Education; Mr. B. Vaikunta Baliga—Labour; Mr. R. M. Patil—Health; Mr. M. A. Mehtab Ali—Excise and Rural Industries.

Orissa.

Number of seats 140 (140), of which: Congress 56 (67), *Ganatantra Parishad* 51 (31), P.S.P. 11 (10), Communists 9 (7), *Jharkhand* Party 5 (nil), Socialists 1 (nil), Independents 7 (21).

The *Ganatantra Parishad*, which was formed in 1950, has been described as a party of "right-wing feudalists with a left-wing programme." Its leader, Mr. R. N. Singhdeo, is the former Maharaja of Patna, and it won many of its seats in areas formerly belonging to the Princes' States. The main item in its programme is the demand for the transfer to Orissa of certain areas of Bihar, Madhya Pradesh, and Andhra Pradesh. The Chief Minister, Dr. Mahatab, attributed the Congress Party's reverse *inter alia* to weaknesses in the party's organization and popular discontent at corruption in the administration.

As in previous elections, no party succeeded in securing a majority; whereas, however, Congress had been able in 1952 to form a Government with Independent support, in the new Assembly the Opposition parties were in a majority. The *Ganatantra Parishad* and the P.S.P. proposed on March 21 the formation of a coalition Government including Communist but not Congress representatives, the Communists, on the other hand, refused to support either a coalition dominated by the "feudal" *Ganatantra Parishad* or a Congress Ministry, and the one Socialist member adopted a similar attitude. After the *Jharkhand* Party had announced its support for the formation of a Congress Government in order to avoid President's rule, and a *Ganatantra Parishad* member had transferred his support to Congress, the Governor (Mr. Sachar) invited Dr. Mahatab—the outgoing Chief Minister—on April 1 to form a minority Government.

Dr. Mahatab's new Ministry took office on April 6, the distribution of portfolios being as follows:

Dr. Harekrushna Mahatab—Chief Minister, Finance, Agriculture, Co-operatives and Forests; Mr. L. Panigrahi—Home Affairs, Law, and Education; Mr. D. Sahu—Industry and Mining; Mr. S. P. Mahanta—Revenue, Excise, and Local Government; Mr. S. N. Bhanjdeo—Works; Mr. B. M. Devi—Health, and Relief and Rehabilitation; Mr. N. R. Roy—Supply, Transport, and Labour; Mr. P. M. Pradhan—Tribal Affairs, Rural Welfare and Commerce.

The Ministry was supported by about 65 members (Congress, *Jharkhand*, and Independents) against an Opposition numbering at least 62 (*Ganatantra Parishad*, P.S.P., and Independents). It was therefore dependent for survival on the neutrality of the Communist Party, which announced that its attitude toward any Government's policies would depend on how those policies affected the State.

Punjab.

Number of seats 154 (186), of which: Congress 118 (172), *Jan Sangh* 9 (nil), Communists 6 (10), Scheduled Castes Federation 5 (nil), P.S.P. 1 (1), Independents 13 (nil). Voting was postponed in two snowbound constituencies.

The *Jan Sangh*, which had not been represented in the previous State Assembly, replaced the Communists as the strongest Opposition party, its success being attributed to resentment among urban Hindus in the Punjabi-speaking areas at certain aspects of the regional formula adopted under the States Reorganization Act. Mr. L. J. Narain (formerly Education and Transport Minister in the Punjab Government), who had resigned from the Congress as a protest against this formula, defeated a sitting Congress member at Jullundur with *Jan Sangh* support.

Although the *Akali Dal* had merged with Congress in October, its leader, Master Tara Singh, supported 25 Opposition candidates in Punjabi-speaking areas (including a number of Communists) against Congress candidates on the ground that the latter were "corrupt." Only one of the candidates whom he supported was successful, however—Raja Maheshinder Singh, who defeated Mr. Brish Bhan, the Deputy Chief Minister and former Chief Minister of PEPSU.

A new Ministry was formed on April 9 by Sardar Pratap Singh Kairon, the outgoing Chief Minister, the distribution of portfolios being as follows:

Sardar Pratap Singh Kairon—Chief Minister in charge of General Administration, Law and Police, Transport, Anti-Corruption, Social Welfare, Planning, Community Projects, Political Sufferers, Integration, Health and *Panchayats*; Mr. Mohan Lal—Finance, Industries, Food and Supplies, Prisons and Justice, Excise and Taxation; Giani Kartar Singh—Revenue, Local Government, Relief and Rehabilitation, Co-operative Societies, and Cottage Industries; Mr. G. S. Rarewala—Irrigation and Electricity; Mr. A. N. Vidyalankar—Labour, Education, Housing, and Language; Mr. Gurbanta Singh—Forests, Agriculture, Animal Husbandry, Fisheries, and Scheduled Castes and Backward Classes; Mr. Birinder Singh—Public Works and Sports. There were also five Deputy Ministers.

The Ministry included the leaders of the two wings of the *Akali Dal*—Giani Kartar Singh, who had consistently followed the policies of Master Tara Singh, and Mr. Rarewala, head of the interim Government in the then newly-formed PEPSU in 1949 and again of the "United Front" PEPSU Ministry in 1952-53. In recent years Mr. Rarewala had dissented from certain of the *Dal's* policies.

Some of the portfolios held by the Chief Minister will be allocated to an eighth Minister when appointed.

Rajasthan.

Number of seats 176 (160), of which: Congress 119 (82), *Ram Rajya Parishad* 17 (24), *Jan Sangh* 6 (8), P.S.P. 1 (2), Communists 1 (1), *Kisan Sabha* 1 (nil), Independents 31 (34). [Figures in parentheses refer to the Rajasthan State Assembly before reorganization.]

Congress considerably strengthened its majority, mainly at the right-wing parties' expense, the Chief Minister (Mr. Sukhadia) having a majority of over 10,000 at Udaipur; on the other hand, the Food Minister (Mr. R. K. Joshi) and a Deputy Minister lost their seats. As before the elections, Rajasthan remained the only State in which the *Ram Rajya Parishad* was the strongest Opposition party. The *Kisan Sabha* is a left-wing peasant organization.

Mr. Mohanlal Sukhadia, the Chief Minister, was unanimously re-elected leader of the Congress Party in the State Assembly on April 4, and formed a new Cabinet on April 9 with the following membership:

Mr. Sukhadia—Chief Minister in charge of General Administration, Planning and Development, Education, Industries and Mines; Mr. H. Upadhyaya—Finance, Excise and Taxation, Village Industries, and Social Welfare; Mr. Ramkishore Vyas—Home and Judicial Affairs, Law, Irrigation, and Power; Mr. D. L. Vyas—Revenue, Relief and Rehabilitation; Mr. B. P. Gupta—Local Self-Government, Legislative Assembly and Elections, Community Projects, Health, Food and Civil Supplies, and Labour; Mr. N. Mirdha—Agriculture, Co-operatives, Forests, Public Works and Transport. There were also five Deputy Ministers.

Uttar Pradesh.

Number of seats 430 (430), of which: Congress 286 (383), P.S.P. 44 (25), Socialists 25 (6), *Jan Sangh* 17 (3), Communists 9 (1), Independents 49 (1).

The loss of nearly 100 Congress seats in this State, where the party had previously had an overwhelming majority, was regarded as a serious blow to its prestige. Among prominent Congressmen defeated was Mr. C. B. Gupta (Minister of Health and Planning), who lost his seat to Mr. Triloki Singh (general secretary of the P.S.P.) by an 11,000 majority in a Lucknow constituency, this result being attributed to popular discontent with the Government's food and housing policy. Five of the 15 Deputy Ministers also failed to secure re-election.

The outgoing Chief Minister, Dr. Sampurnanand, was unanimously re-elected leader of the Congress Legislature Party on April 7, and formed a new Cabinet on April 10 with the following membership:

Dr. Sampurnanand—General Administration and Planning; Mr. H. M. Ibrahim—Finance, Power and Industries; Mr. H. S. Visen—Agriculture, Forests, and Health; Mr. Girdhari Lal—Public Works, Mr. Charan Singh—Revenue; Mr. Ali Zaheer—Justice, Food and Civil Supplies, Co-operatives, Legislative Affairs and Housing; Mr. K. Tripathi—Home, Education and Information; Mr. V. N. Sharma—Local Self-Government; Mr. J. Kishore—Labour and Social Welfare.

The following Ministers without Cabinet rank were also appointed. Mr. M. Prasad—Legislative Affairs and *Haryan* Welfare; Mr. M. Hasan—Social Security; Mr. R. Murti—Irrigation; and Dr. R. Sita Ram—Excise and Transport. There were also seven Deputy Ministers.

West Bengal.

Number of seats 252 (238), of which: Congress 152 (150), Communists 46 (28), P.S.P. 21 (15), Forward Bloc 8 (2), *Lok Sewak Sangh* 7 (nil), Revolutionary Socialist Party 3 (nil), Forward Bloc (Marxist) 2 (11), Socialist Unity Centre 2 (nil), Independents 11 (16). Figures in parentheses refer to the West Bengal State Assembly before reorganization.

Congress increased its percentage of votes from 38.4 in 1952 to 46.3, though its representation remained virtually unchanged. The left-wing parties, which had formed an electoral alliance, considerably strengthened their position—especially in Calcutta, where the Chief Minister, Dr. B. C. Roy, defeated a Communist opponent by only 540 votes. The *Jan Sangh* and Hindu Mahasabha, on the other hand, lost all the 13 seats which they had previously held. In the Purulia district, which had recently been transferred from Bihar, the *Lok Sewak Sangh* won seven of the 11 seats.

Dr. Roy, the outgoing Chief Minister, was asked by the Governor on April 26 to form a new Ministry. Its composition was announced later the same day as follows:

Cabinet Ministers: Dr. B. C. Roy—Chief Minister, Home (except Police and Defence), Finance, Education, Development, Co-operatives, Cottage and Small-scale Industries; Mr. P. C. Sen—Food, Relief and Supplies, and Refugee Relief and Rehabilitation; Mr. Kalipada Mukherjee—Home (Police and Defence); Mr. K. N. D. Gupta—Works and Building, and Housing; Mr. Ajoy Mukherjee—Irrigation and Waterways; Mr. H. C. Naskar—Fisheries and Forests; Mr. S. P. Burman—Excise; Dr. R. Ahmed—Agriculture; Mr. I. D. Jalan—Local Self-Government and *Panchayats*; Mr. B. C. Sinha—Land and Land Revenue; Mr. B. Majumdar—Commerce and Industries; Mr. S. S. Ray—Judicial and Legislative Affairs and Tribal Welfare; Mr. Abdus Sattar—Labour.

Ministers of State: Mrs. Purabi Mukherjee—Refugee Relief and Rehabilitation; Mr. T. K. Ghosh—Development and Refugee Relief and Rehabilitation; Dr. A. B. Roy—Health. Twelve Deputy Ministers were also appointed.

Of the four new Cabinet Ministers, Mr. Sinha and Mr. Majumdar had been members of Dr. Roy's first Ministry; Mr. Sattar assumed ministerial office for the first time; and Mr. Ray, a barrister, was a newcomer to the State Assembly. Four Ministers, including two with Cabinet rank, are Moslems, while one Minister of State and one Deputy Minister are women.

Elections in Union Territories.

In the Union Territories of Manipur and Tripura elections were held to the Territorial Councils, the results being as follows:

Manipur. Congress 12, Socialists 7, Communists 4, Independents 7.

Tripura. Congress 15, Communists 12, other parties 1, Independents 2.

Elections in Kashmir.

Elections to the Jammu and Kashmir Assembly were held in Jammu on March 25 and in Kashmir on March 30, the results being as follows:

National Conference	..	60
Praja Parishad	.. ..	6
Harijan Mandal	.. ..	1
Independents	.. ..	1

Voting for seven other seats was postponed because of snowbound conditions.

Of the National Conference candidates, 30 were returned unopposed and 10 more were declared elected after their opponents' nomination papers had been rejected—in three cases because the candidates were under the qualifying age, in six because nomination forms had been filled in incorrectly, and in one because the candidate was a Government contractor. Candidates returned unopposed included Bakshi Ghulam Mohammed (the Prime Minister), Mr. G. M. Sadiq (Health Minister), Mr. S. L. Saraf (Development Minister), Mr. D. P. Dhar (Deputy Home Minister), and Bakshi Abdul Rashid (general secretary of the National Conference). Of the unopposed returns, 35 were in Kashmir and five in Jammu.

For the remaining 28 seats (20 in Jammu and 8 in Kashmir), all of which were contested by the National Conference, 17 candidates were put forward by the Hindu *Praja Parishad*, which is affiliated to the *Jan Sangh*, eight by the P.S.P. (which failed to win a seat), and six by the *Harijan Mandal* (a Scheduled Castes' organization similar to the P.S.P. in outlook), in addition to 28 Independent candidates. The elections were boycotted by the Plebiscite Front, the organization of Sheikh Abdullah's followers, and the Political Conference, a Moslem organization demanding the unconditional accession of Kashmir to Pakistan.

In Jammu over 70 per cent of the electorate went to the polls - a much higher proportion than in most of the Indian States despite heavy rain. Of the 20 seats contested, 13 were won by the National Conference, six by the *Praja Parishad*, and one by the *Harijan Mandal*. Successful candidates included Mr. G. L. Dogra (finance Minister) and Mr. Premnath Dogra (president of the *Praja Parishad*). The Government's victory was attributed to the conciliatory attitude toward the Hindus of Jammu adopted by Bakshi Ghulam Mohammed, in contrast to the policy which had formerly been pursued by Sheikh Abdullah.

In Kashmir, where polling also took place in heavy rain and intense cold, nearly 60 per cent of the electorate cast their votes. Seven of the eight contested seats were won by National Conference candidates; in a Srinagar constituency, however, Mr. A. R. Ghazi (a dissident National Conference supporter standing as an Independent) defeated the Speaker of the Assembly, Mr. G. R. Renzu, by 328 votes. Mr. Ghazi afterwards stated that he supported the State Government's policy of accession to India, but disapproved of its support for Mr. Renzu, Mr. Sadiq, Mr. Qasim (Revenue Minister), and Mr. Dhar, whom he accused of being Communists.

The election of the President of the Indian Union took place on May 6, the three candidates being Dr. Rajendra Prasad (the outgoing President, nominated by Congress), Mr. Nagendra Narayan Das (of Assam), and Mr. Hari Ram (a Punjab lawyer). The Electoral College consisted of the elected members of the two Houses of the Central Parliament and of all the State Assemblies, numbering altogether 3,897; the members of the Central Parliament could vote either in Delhi or in the capital of the State to which they belonged, while members of the State Assemblies voted in their State capitals.

Dr. Prasad was re-elected President of India for a further five-year term on May 10, having polled 459,698 votes, or nearly double the minimum quota of 237,500 votes fixed by the Constitution for the election of the President. Mr. Das polled only 2,000 votes, and Mr. Ram 1,498.

In the vice-presidential election Dr. Sarvapalli Radhakrishnan, the Congress nominee and outgoing holder of the office, was re-elected on April 23. No other nomination was put forward for the vice-presidency, Dr. Radhakrishnan thus being re-elected without opposition.

President Prasad and Vice-President Radhakrishnan were sworn-in for their new terms of office on May 18.

(Hindustan Times, Delhi - Times of India, Bombay - The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London - All-India Election Guide - Times - Manchester Guardian) **(Prev. rep. Elections, Party Manifestos, 15435 A; 1951-52 Elections, 12356 A; 12081 A; Cabinet, 15364 C; Andhra Elections (1955), 14124 A; Travancore-Cochin Elections (1954), 13490 A; State Governments, Andhra Pradesh, Bombay, Madhya Pradesh, Mysore, Orissa, Punjab, Rajasthan, 15282 A; Travancore-Cochin, 15172 A; 15037 A; Uttar Pradesh, 14054 A; Bihar, West Bengal, 12291 A; Assam, 12081 A; Kashmir Elections (1951), 11845 A.)**

A. RHODESIA AND NYASALAND FEDERATION. — Permanent Trust Fund as Memorial to Lord Malvern.

The Chief Justice of the Federation of Rhodesia and Nyasaland, Sir Robert Tredgold, announced on March 14 that a permanent trust fund was to be set up as a memorial to Lord Malvern's services to Rhodesia and the Federation, for the dual purpose of promoting the country's health services and allowing Lord Malvern "to continue to play a full part as an elder statesman."

Appealing to the people of the Federation, irrespective of party or race, to contribute to the fund, Sir Robert said that a committee had already been formed with himself as chairman to build up the fund "as a medium through which the people of the Federation may do honour to one who has done so much for them over so many years." He stressed that the fund should be "entirely personal and without trace of political colour," and added: "The committee realizes that he [Lord Malvern] can still play a valuable part in public life, especially if the way is open to his attendance in the House of Lords. There he can voice the points of view of the Federation and, for that matter, of all the overseas territories of the Commonwealth in a manner that no other person, however sympathetic, could achieve without his background and experience."

The Chief Justice explained that, in deciding on the objects of the Fund, it had been borne in mind that Lord Malvern (then Sir Godfrey Huggins) was once a surgeon. The income from the fund would be used to provide bursaries for students of all races in the Federation to study medicine or allied subjects, to assist the promotion and development of the country's health services, and in such other ways as the trustees might think fit. At their discretion the trustees would also apply funds to allow Lord Malvern to play his part as an "elder statesman" in the House of Lords.

Lord Malvern was Prime Minister of Southern Rhodesia from 1933 to 1953, and became the first Prime Minister of the Rhodesia and Nyasaland Federation on its formation. He retired in 1956. -(Federal Information Department, Salisbury) **(Prev. rep. Lord Malvern, 15236 E.)**

B. SOVIET UNION - RUMANIA. — Agreement on Status of Soviet Troops.

An agreement was signed in Bucharest on April 15 between the Soviet and Rumanian Governments on the legal status of Soviet troops stationed on Rumanian territory.

The agreement, which was on similar lines to those concluded by the U.S.S.R. with Poland (see 15275 B) and Eastern Germany (see 15500 C), stated that the "temporary stationing of Soviet troops in Rumania will in no way affect the sovereignty of the Rumanian State or entail interference in Rumania's domestic affairs." It provided that the strength and location of the Soviet forces in Rumania would be subject to arrangements between the two Governments; placed these forces and their families under Rumanian law, except for offences committed solely against the Soviet Union or against persons serving with the Soviet forces; regulated reciprocal compensation for possible damage and the procedure for the Soviet use of Rumanian land, communications, services, and other facilities; and provided for the creation of a mixed commission to settle questions arising out of the agreement.

The agreement, which takes effect on exchange of ratifications, was signed by the Foreign and Defence Ministers of the two countries.—(Soviet Embassy Press Department, London) **(Prev. rep. 15283 C.)**

C. BELGIUM. — New Foreign Minister.

It was announced in Brussels on May 11 that M. Paul-Henri Spaak had resigned to take up his post as Secretary-General of NATO and had been succeeded as Foreign Minister by M. Victor Larock, the Minister of Foreign Trade. M. Henri Fayat succeeded M. Larock in the latter portfolio.

M. Larock (52) studied philosophy and literature at Liège University and sociology at the Sorbonne in Paris, taking doctorates at both universities. He later became a secondary school teacher. During the German occupation in the Second World War he belonged to the clandestine underground organization of the Socialist Party, and after the liberation became editor-in-chief of *Le Peuple*, the Socialist Party's official organ. He had been Minister for Foreign Trade since 1954.

M. Fayat, a former secretary and vice-chairman of the Anglo-Belgian Parliamentary Group, escaped from Belgium during the war and joined the Belgian Army in Britain.

The Coalition Government headed by M. Van Acker continued, as hitherto, to consist of nine Socialists and seven Liberals. (La Nation Belge) **(Prev. rep. 14755; M. Spaak, 15285 A.)**

D. BERMUDA. — Withdrawal of British Garrison.

The War Office in London announced on May 10 that the British garrison in Bermuda would be withdrawn at the end of the month and would not be replaced. The statement said that this decision was in connexion with the reduction of the Army's strength and "has been taken with regret in view of the Colony's long and intimate association with H.M. Forces." Apart from a short break in 1953-54, British troops have been in Bermuda continuously since 1701.—(Times) **(13396 B.)**

A. UNITED KINGDOM.—The Briggs Motor Dispute. - Report of Court of Inquiry. - Warning on Dangers of Shop Stewards' Organization outside Trade Union Control.

A serious dispute which temporarily affected automobile production throughout the Ford group of factories broke out at the end of January at the Dagenham works of Briggs Motor Bodies Ltd., a member of the group. The dispute, which eventually centred on the dismissal of a shop steward for calling an unofficial strike, resulted in the appointment by Mr. Macleod (the Minister of Labour) of a court of inquiry into the matter.

The dispute began on Jan. 28, when production at the Briggs factory was brought to a standstill by an unofficial strike in protest against the temporary suspension of five shop stewards who, during working hours and without permission, had attended a meeting of the trade union side of the National Joint Negotiating Committee at Fords, despite previous notification by the secretary of the trade union side that their presence was unnecessary. One of the five, Mr. James McLoughlin, who had later tried to convene a workers' meeting during working-hours, was subsequently dismissed for "calling and inciting a stoppage of work before any attempt had been made to resolve the issue through normal procedure." The stoppage was the culmination of a long series of minor strikes at Briggs, where 289 stoppages had taken place in the past 15 months, mainly for trivial reasons. As a result of the latest stoppage, about 21,000 of the Ford group's 33,000 workers were estimated to have been made idle by Jan. 31.

Although the strikers on Feb. 1 rejected an A.E.U. proposal that they should return to work pending investigation of Mr. McLoughlin's case by a joint management-union committee, they voted three days later to resume work on the understanding that the stoppage would recommence if the A.E.U. executive failed to secure his reinstatement within 48 hours. On Feb. 6, however, the Briggs management decided against reinstating Mr. McLoughlin, and after the breakdown of further negotiations the A.E.U. resolved on Feb. 11 to hold a strike ballot of its members at the Dagenham factories. This ballot (Feb. 14) resulted in a vote of 1,118 to 429 in favour of a strike, whereupon the A.E.U. executive decided to call an official strike at Briggs from Feb. 27 unless Mr. McLoughlin had meanwhile been reinstated. Proposals by the Ford-Briggs management for independent arbitration were rejected by the unions.

In view of this development, Mr. Macleod announced in the House of Commons on Feb. 22 that he proposed to appoint a court of inquiry into the dispute, and appealed to the A.E.U. to cancel the proposed strike in the meantime. This the union agreed to do, and on March 1 Mr. Macleod further announced that the court would consist of Lord Cameron (a Judge of the Scottish Court of Session), who would sit with two assessors drawn respectively from the Ford-Briggs management and the trade unions.

The court held its first meeting on March 4, and after hearing evidence from both sides and visiting Briggs' Dagenham factory published its report on April 11. The report is summarized below.

Lord Cameron found that Mr. McLoughlin had "brought about a stoppage without any justification or necessity"; that there was "ample material to warrant his immediate suspension and subsequent dismissal"; and that his reinstatement on the insistence of the shop stewards' organization at Briggs "would be interpreted as a gesture of appeasement to the extreme elements in the organization, rather than as a measure of prudence to strengthen the authority of the unions." Lord Cameron also strongly criticized the "irresponsible power" enjoyed by the shop stewards' organization, and suggested that the trade unions concerned should carefully scrutinize its activities and control over funds. As regards the possibility of the dispute having been fomented by Communists, he stressed that although Communist elements had doubtless exploited the shop stewards' desire to protect their own interests, it did not appear that their influence was the main cause of the trouble at Briggs.

The report explained that labour relations at Briggs' Dagenham factory had been bad for some years before the Ford group took over control, and that "no substantial improvement had followed the change." Prolonged negotiations between the Ford-Briggs management and the trade unions represented on the Ford National Joint Negotiating Committee had resulted in the signing in August, 1955, of a "procedure agreement" which the unions had tried to persuade their members to abide by, but without success. There was ample evidence that the unions were seriously concerned at the frequency of unofficial strikes at Briggs, and on at least one occasion union officials at national level had sent "strongly-worded remonstrances and advice" to their members at the works.

While there had been faults on the company's side since Ford's took over the Briggs works (the report continued), all the evidence indicated that the major responsibility for the "dis-peace" there lay with the workers, whose immediate representatives were the shop stewards. "If the means of persuasion and propaganda available to the shop stewards' committees had been devoted to the support of the procedure agreement, a very great measure of success would have been achieved and a much more peaceful atmosphere at Briggs would have been created." In this connexion the report explained that in conjunction with the corresponding body at Ford's, the joint shop stewards' committee at Briggs published a journal known as *The Voice of Ford's Workers*, and also possessed substantial funds, mainly raised from works' lotteries, over the raising and expenditure of which the unions had no power of supervision. The report added: "There can be no doubt that such a freedom from union control, combined with liberty to direct the expenditure of any funds raised, places a very powerful weapon of propaganda in the hands of a body which is answerable to no higher authority for its actions. It would not be difficult . . . for irresponsible or subversive persons to use these weapons for their own purposes. To judge from the extracts produced, *The Voice of Ford's Workers* has been raucous and belligerent in tone, and not by any means devoted to the promotion of the avowed policy of the unions concerned or to support of the agreement . . . In short, here is a private union within a union, enjoying immediate and continuous touch with the men in the shops, answerable to no superiors, and in no way officially or constitutionally linked with the union hierarchy."

Lord Cameron emphasized that he neither under-estimated the value of shop stewards nor criticized the existence of a shop stewards' organization at Briggs. "The irresponsible power to which I have adverted," he said, "appears to lie in the hands of a small nucleus, and not with the Briggs shop stewards as a body, among whom . . . I found strong elements of good sense and goodwill . . . Affairs at Briggs give an illuminating example of the extent to which it is possible for apathy in the rank and file of the trade union movement to impair its healthy operation by surrendering power to small but highly organized interests . . The moral . . . is that though there is nothing unsound in principle in the methods of election of shop stewards and trade union committees, those methods possess dangerous possibilities, and provide an avenue for the introduction into the organization of sinister interests, if they . . . are used to further the aims or ambitions of an organized few . . . This is the most serious and fundamental lesson to be learned from the inquiry. It is not difficult to foresee that the situation disclosed here contains the seeds of possible organized developments which, if unchecked, could prove a grave embarassment to the unions themselves."

Regarding the extent of Communist influence at Briggs, the report stated that although the court did not consider this a main factor in bringing about bad labour relations, both Mr. C. W. Berridge (until recently A.E.U. district organizer in the area) and Mr. Moore (a convenor of the shop stewards' committee at Briggs) were members of the Communist Party, while Mr. McLoughlin had not denied membership. "It may of course be purely coincidental that at least three figures prominently associated with the dispute appear to owe this particular political allegiance," Lord Cameron went on, "but in the light of the circumstances disclosed . . . I feel that there is good ground for the company's belief that it has a trouble-making clique in its midst, which is concerned to exacerbate relations between workpeople and management." The report also drew attention to the fact that A.E.U. members at Briggs "appeared to have established an ascendancy quite out of proportion to their numbers"—viz., 54 shop stewards out of about 160 were A.E.U. members, although only about one-fifth of Briggs workers belonged to that union, whilst nine of the 13 trade union members on the Briggs main and river-plant works committees were also A.E.U. men.

Turning to the management's share of the responsibility for the trouble at Briggs, Lord Cameron said that this appeared to fall under two heads: (1) imperfections in factory organization, likely in large measure to disappear when the substantial reorganization now in progress had been completed; (2) a "certain insensitivity" in the company's mental attitude toward its employees With regard to (2) he explained that while there had doubtless been faults on the part of the lower supervisory staff, "who had to bear the heat and brunt of the day," he thought that there were also "indications of an attitude of mind at higher levels which had not been entirely in touch with the minds of the workpeople"—e.g. such phrases as "disciplinary measures" and "disciplinary action" used in warning notices seemed to "tend towards regimentation."

In order to improve labour relations at Briggs in the future, leadership and initiative must come from the management at all levels, and time and patience spent in the handling of the joint works committee would yield "handsome returns." In particular, respect for the procedure agreement was likely to be enhanced if there were more frequent regular meetings of the committee than hitherto, and if reasonable requests for special meetings to deal with matters of urgency were not discouraged. There was also room for improvement in the company's attitude to the Ford National Joint Negotiating Committee, there being evidence that at present it seemed "more concerned to confront the unions with general criticism of the behaviour of their members than to attempt to identify individual examples of misbehaviour and seek satisfaction through the machinery of the procedure agreement."

In conclusion, Lord Cameron pointed out that his recommendation that Mr. McLoughlin's dismissal should stand, and that the unions should not seek for his reinstatement, was "without prejudice to the company's right to decide if they would accept an application from him for employment on some future occasion if such an application were made by him in good faith."

The Ford Company announced on the same day that it accepted Lord Cameron's report in its entirety, and hoped to meet the unions concerned to discuss how its recommendations could be put into practice.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald - News Chronicle)

A. NUCLEAR WEAPON TESTS. — British, Soviet and American Nuclear Tests. - Japanese Appeals to "Nuclear Powers" for Suspension of Tests. - Unilateral Suspension rejected by British, U.S. and Soviet Governments. - Japanese Precautions against High Radioactivity following Soviet Explosions. - Dr. Matsushita's Mission to Britain and America. - Appeals by the Pope, Dr. Schweitzer and Mr. Nehru for Ending of Nuclear Tests. - German Scientists' Refusal to participate in Development of Nuclear Weapons. - British Labour and Liberal Appeals for Suspension of Tests.

Recent important developments in connexion with the testing or projected testing of nuclear and thermo-nuclear weapons are described below under cross-headings, notably in connexion with the British hydrogen bomb tests to be carried out in the Pacific in the spring and summer; the series of Soviet tests which had previously been reported (see 15468 B) and which continued at intervals during April; and a new series of U.S. tests which will begin in Nevada during May and continue intermittently throughout the summer.

British Nuclear Tests in Pacific Ocean.

The British Ministry of Supply announced on May 15 that a "nuclear device" had been exploded in the first of the series of British tests to be held in the Central Pacific during the spring and summer. No details were given of the type of "device" detonated, the official announcement stating only that it had been dropped by a *Valiant* jet bomber and had exploded at high altitude. It was added that "scientific records are being collected for accurate evaluation" and that a further statement would be made "in due course."

The Minister of Supply (Mr. Aubrey Jones) disclosed on May 17 that the explosion was "in the megaton range" (i.e. equivalent to 1,000,000 tons or more of T.N.T.). He added that detonation had taken place "high in the air above the sea," that fall-out was "insignificant," and that there was "very little contamination even below the point of burst." Safety arrangements had been "entirely successful" and official observers from Canada, Australia, New Zealand and the U.S.A. had witnessed the explosion from a ship of the task force. [The reference to an explosion "in the megaton range" was regarded in the British press as indicating that a hydrogen bomb had been detonated].

The British Government's intention of holding such tests in the area of Christmas Island had been announced to the House of Commons in June 1956 by Sir Anthony Eden, who stated that the tests would take the form of "nuclear explosions in the megaton range" and would be high air-bursts which would not involve heavy radioactive fall-out.

A Note had been sent by the British Government on Jan. 7, 1957, to all diplomatic missions in London informing them that an area of the Pacific Ocean 900 miles north and south of Christmas Island and 780 miles east and west would be declared dangerous to shipping and aircraft between March 1 and August 1 owing to the British nuclear weapon tests.

Japanese Appeals for Suspension of British Tests. - Representations to H.M. Government. - British Reassurances to Japan.

The projected British nuclear tests in the Pacific aroused nation-wide agitation in Japan, which grew in intensity throughout February, March and April. The Japanese Parliament passed a resolution in February calling upon Britain, the U.S.A. and the Soviet Union to suspend all tests of nuclear weapons, while large-scale demonstrations against the holding of such tests culminated on March 1 in a mass protest rally in Tokio at which representatives of all Japanese political parties adopted a resolution condemning Britain for her refusal to stop the tests.

Similar protests against the British tests were made by many private organizations, by 180 Japanese physicists (including Dr. Yukawa, the Nobel prizewinner), by fishermen's organizations, and by students, a number of petitions being handed in at the British Embassy and peaceful demonstrations organized outside the Embassy itself. The Japanese Council against Atomic and Hydrogen Bombs—an organization with a nation-wide membership—originally announced its intention of sending a "suicide fleet" of Japanese fishing vessels into the Christmas Island area as a protest against the British tests, but subsequently abandoned this plan and decided on May 8 to send "civilian envoys" to Britain, the Soviet Union and the United States, and to convene a world conference in Tokio later in the year to demand the abolition of all nuclear weapons.

A resolution denouncing nuclear and thermo-nuclear tests, adopted on March 15 by the House of Councillors (the Upper House of the Japanese Diet), was sent by the Japanese Government on March 18 to the U.N. Secretary-General, Dr. Hammarskjold, for transmission to all U.N. member-countries. The resolution (1) "deeply regretted that no steps have yet been taken for the international control of atomic energy, that atomic and hydrogen bomb tests continue to be conducted, and that the United Kingdom is preparing to carry out tests at Christmas Island, notwithstanding requests from the Japanese Government" [see below]; (2) urged the United Nations and the Powers concerned to take "speedy, effective and appropriate measures for limiting the use of atomic energy exclusively for peaceful purposes and for the total prohibition of the production, use and testing of atomic and hydrogen bombs"; and (3) called upon the British, Soviet and U.S. Governments to suspend all atomic or hydrogen tests at present under contemplation, "in view of the likelihood of an increase in the amount of fall-out from nuclear explosions to the point of irremediably affecting human life."

Two Notes appealing to Britain to suspend the projected nuclear tests in the Pacific were sent by the Japanese Government on Feb. 1 and Feb. 12. At the same time specific assurances were sought that all necessary measures would be taken to ensure the safety of Japanese ships and aircraft if the tests should be held. In addition, the Japanese Government reserved the right to claim compensation for any damage or injuries suffered by Japanese nationals which could be directly traced to the tests.

In a statement to the House of Commons on Feb. 11, Mr. Selwyn Lloyd (U.K. Foreign Secretary) had announced in connexion with the receipt of the first Japanese Note that the tests would take place far from any inhabited islands and would be so arranged as to avoid danger to persons and property; that they would be "high air bursts which would not involve heavy fall-out"; that the fullest safety precautions would be taken; and that firing would not take place "under any conditions in which inhabited islands might be affected by radioactive material."

The British Government's reply to the Japanese Notes was made public in London on March 26. It reiterated the assurances given by Mr. Selwyn Lloyd in the above-mentioned statement and gave details of the precautionary measures being taken in the area of Christmas Island to ensure that no vessels or aircraft entered the danger zone.

The British Note said that arrangements had been made for aircraft to search the danger area for any vessel which might be in danger. "If such a vessel is sighted, warning leaflets will be dropped in several languages, including Japanese, advising the vessel to leave the danger area at once. If such a warning is disregarded, a ship will be sent to the spot to make sure that, in its own interests, the vessel leaves the danger area. Radar precautions will be taken against firing when any unidentified aircraft is in the vicinity."

After stressing that "navigation of ships through the territorial waters round Christmas and Malden Islands is suspended from March 1," and that permission for overflying would not be granted during the period of the tests, the Note added: "Any person who enters or remains in this danger area does so at his own risk, and it is important that ships and aircraft should not consider the area less dangerous to persons and property than the territorial waters and air space around and above Christmas and Malden Islands. H.M. Government wish to emphasize the extreme importance of all persons remaining clear of the danger area throughout the period March 1-August 1, and to reiterate that any person who disregards the warning does so at his own peril. Any person knowingly entering or staying in the danger area will . . . have no right to compensation for damage or loss."

The British Note rejected the Japanese contention that the area around the Line Islands (the group of islands on the Equator which include Christmas and Malden Islands) was a traditional fishing-ground for Japanese vessels, saying in this connexion: "Information in the possession of H.M. Government shows that if Japanese fishermen are now regularly visiting this area, this has only happened within the last three or four years."

Expressing regret that advance notice of each test in the series could not be given, the Note pointed out that "their timing will depend on a number of factors, including the meteorological position, and it is for this reason that the 'danger area' has been declared for a continuous period. A public announcement will be made after each test in the series . . ."

The Japanese Government sent a Note to Britain on June 16 protesting at the nuclear weapon test at Christmas Island on the previous day, expressing regret that the tests had not been cancelled, holding Britain responsible for any damage or losses which might be caused to Japanese nationals or property as a result of the tests, and reserving Japan's right to demand compensation for such damage or losses. Large-scale demonstrations took place outside the British Embassy in Tokio on May 16-17 in protest against the tests at Christmas Island, some 10,000 students being dispersed by the police after trying to break into the Embassy compound.

Continuation of Soviet Tests. - Soviet Rejection of Japanese Appeal for Cessation. - Japanese Population warned against High Radioactivity following Soviet Tests.

Detonations of Soviet nuclear weapons on April 3, 6, 10, 12 and 16 were announced by the U.S. Atomic Energy Commission and the British Defence Ministry, no statements being issued in Moscow. The Soviet tests were apparently in continuation of those begun in August 1956 (see 15124 A) and continued during subsequent months (see 15122 D, 15468 B). The explosion on April 16 was described by the U.S. Atomic Energy Commission as "one of the largest in the current Soviet series" and as having taken place "at a site in Central Asia previously used for such operations." No indication was given whether fission (atomic) or thermo-nuclear (hydrogen) weapons had been detonated.

The exceptionally high degree of radioactivity over Japan as a result of five Soviet nuclear tests within a fortnight caused the Japanese Ministry of Social Welfare to issue official warnings to the population on April 18 to avoid radioactive contamination. Housewives throughout Japan were warned to boil all drinking water and wash all fresh fruit and vegetables, these warnings being disseminated by radio and television broadcasts, police loud-speakers in the streets, and on public hoardings and in the Press. Broadcasts from Tokio Radio warned the Japanese people that Japan's atmosphere was "rapidly becoming contaminated" as a result of the Soviet nuclear tests, while the National Meteorological Observatory said that the amount of radioactivity over Japan had reached "unusual proportions" and was far in excess of the amounts recorded after the U.S. tests at Bikini in 1954.

Professor Shiokawa (of Shizuoka University, near Tokio), one of Japan's leading atomic physicists, expressed the opinion on April 21 that the U.S.S.R. had exploded a new type of bomb in the last explosion on April 16. He stated that chemical analysis of the radioactive fall-out over Japan, carried out by himself, showed that a large percentage of the fall-out consisted of Neptunium-239 and Plutonium-239, whereas he had been unable to find any traces of Uranium. The Neptunium content had been particularly large, accounting for 28 per cent of the total radioactivity, and this evidence, in his opinion, showed that the Soviet Union had exploded a "dirty" bomb and not a "clean" one. Professor Shiokawa laid special emphasis on the serious danger to mankind represented by Plutonium fall-out, since Plutonium had a half-life of 24,000 years and emitted deadly alpha rays.

[Neptunium-239 is a relatively short-lived isotope formed from Uranium-238 (the main constituent of natural uranium), while Plutonium is formed by the breakdown of Neptunium. The implications of Professor Shiokawa's statement were described as follows by the Science Correspondent of the London *Times*: "The explosive material of an ordinary atomic bomb is either plutonium or uranium-235; under normal conditions, uranium-238 is not fissile. The presence of neptunium-239 in the products of an explosion, and hence of uranium-238 in the bomb materials, implies something on the lines of the so-called three-decker bomb—the kind in which successive stages of explosion are contributed by fission, fusion, and fission reactions ... In this type of bomb the chief energy comes from the final fission reaction, and the quantity of fission products released is proportional to the energy of explosion. The finding of neptunium-239 in high proportion in the products of explosion implies that these conditions applied also in the Soviet weapon ..."

The Japanese Government presented a Note in Moscow on March 9 asking the U.S.S.R. to suspend further nuclear weapon tests, stressing the dangers of these tests to Japan, and complaining that the tests were being carried out without advance notice. The Soviet reply, presented in Tokio on March 29, said that the U.S.S.R. could not suspend such tests by unilateral action, but was willing to do so on the basis of an agreement with the Western Powers. The Note recalled the various Soviet proposals for the abolition of nuclear and thermo-nuclear weapons (see 15517 A) and asserted that the Soviet tests could not cause harm in other countries because they were carried out within Soviet territory.

The Soviet Ambassador in Tokio (M. Tevosyan) presented an *aide-mémoire* from his Government on May 9 proposing that Japan and the U.S.S.R. should issue a joint appeal to the U.S. and British Governments for the conclusion of an agreement on the immediate ending of tests of atomic and hydrogen weapons, or at least the suspension of such tests for a specified period. The *aide-mémoire* said that the U.S.S.R. was prepared to give up tests of atomic and hydrogen weapons "as soon as other Powers undertake to do the same"; asserted that the Western Powers had "given no support" to the Soviet proposals for the suspension of these tests "as a first step toward the complete prohibition of tests of atomic and hydrogen weapons"; and added: "This attitude of the Western Powers ... compels the Soviet Union to give due attention to tests of atomic and hydrogen weapons in the interests of strengthening its security." [These arguments had also been put forward by the U.S.S.R. in reply to the Japanese Note of March 9.]

U.S. Rejection of Japanese Appeal for Suspension of Atomic Tests in Nevada.

The U.S. Atomic Energy Commission announced on April 30 that nine test explosions would take place in a new series of atomic tests to be held in Nevada from mid-May to September. The announcement said that all nine tests would be "low-yield detonations of fission devices" [i.e. "conventional" atomic explosions] to which press correspondents would be admitted.

A Japanese Note was presented in Washington on April 29 urging the United States to call off the nuclear weapon tests scheduled to begin in Nevada during May. The U.S. reply, transmitted by Mr. Dulles to the Japanese Chargé d'Affaires on May 13, said that the United States could not abandon nuclear tests "under present circumstances" since they were designed "for the purpose of deterring aggression and preserving the peace." In the absence of "adequately inspected agreements for the control and reduction of armaments," the U.S. Government had "a responsibility to its people, as well as to the rest of the world, to strengthen its defensive and deterrent capacities ..." After stating that the U.S. Government would willingly co-operate in a system of registering nuclear tests, as proposed in the joint Japanese-Norwegian-Canadian plan (see page 15522, second column), and would also welcome agreement on international observation of tests, the Note blamed the Soviet Government, "by its repeated rejection of U.S. disarmament proposals," for obstructing "progress toward control of the nuclear threat and the ending of nuclear weapon tests." Assurances were given that the Nevada tests would be conducted under "extreme safety measures" and only in the most favourable weather conditions, that only "low-yield fission devices" would be tested, and that there would be "no significant addition to radiation levels throughout the world."

Dr. Matsushita's Mission. - Meetings with Mr. Macmillan and Mr. Dulles. - Macmillan-Kishi Correspondence.

In view of the failure of the Japanese representations to the British and Soviet Governments, Dr. Masatoshi Matsushita (an eminent Japanese scholar) visited Britain and the U.S.A. during April as the personal representative of the Japanese Prime Minister (Mr. Kishi), on whose behalf he presented further appeals for the cessation of the nuclear weapon tests projected by both countries. Dr. Matsushita, a Christian, is Rector of St. Paul's (Christian) University in Tokio, one of the leading institutions of higher learning in Japan.

Dr. Matsushita arrived in London on April 1, explaining in a press interview that Japan was protesting against the projected British tests largely on moral grounds, and was making or had made similar protests to the U.S.A. and the Soviet Union in connexion with the tests held or projected by those countries. He had a meeting at Downing Street on May 2 with Mr. Macmillan, to whom he explained the Japanese Government's attitude and transmitted a personal letter from Mr. Kishi; held further discussions at the Foreign Office on April 5 with Commander Noble, Minister of State for Foreign Affairs; and paid another visit to Downing Street on April 10, when he received Mr. Macmillan's reply to Mr. Kishi's letter. While in London Dr. Matsushita also saw Sir Winston Churchill at the latter's home, together with the Japanese Ambassador.

The text of the correspondence between Mr. Kishi and Mr. Macmillan was released in London on April 18:

Mr. Kishi to Mr. Macmillan.

In his letter to the British Prime Minister (dated March 29) Mr. Kishi emphasized that the Japanese people, "having been made victims of atomic bombs toward the end of the Second World War, and having suffered directly from the dreadful effects of nuclear tests conducted by the United States in the Pacific Ocean, sincerely desire the prohibition of the production, use, and testing of nuclear weapons." The letter continued:

"The Japanese Government ... fully appreciates the need on the part of free nations, under the existing world circumstances, to maintain effective means to cope with aggression. But the wish of the Japanese people for the prohibition of nuclear tests is one of humanity, which transcends all such considerations. That is the reason why the Japanese Government continues to repeat its request to the countries concerned; and that is why it requested the U.K. Government to suspend the proposed tests ... What the Japanese people really desire is that all nations, rejecting the use of nuclear weapons, which are injurious to the human race and which ultimately spell its annihilation, will turn to the peaceful utilization of nuclear energy for the welfare of mankind. Needless to say, we are eager to see at the same time the realization of an effective disarmament scheme. It is in this sense that Japan's appeal for the suspension of nuclear tests is being made to all countries which conduct or are preparing to conduct such tests."

After recalling the Japanese representations to the U.S.S.R. on March 9, and the resolution by the House of Councillors transmitted to the United Nations on March 18, Mr. Kishi concluded: "I am dispatching Mr. Matsushita as my personal representative to your

country in order that he may . . . convey fully the sincere desire of our Government and people to you and to other British leaders . . . Mr. Matsushita is a devout Christian and an eminent educator . . . I am sure he will be able to make known thoroughly the feelings of the Japanese people to you and all British authorities concerned . . ."

Mr. Macmillan to Mr. Kishi.

Mr. Macmillan (whose reply was dated April 10) wrote to the Japanese Prime Minister as follows :

" Dr. Matsushita handed your letter to me on April 2, and further drew my attention to the political effect which he considered our nuclear tests would have on the ' uncommitted countries ' and to the state of Japanese opinion. He said that, in the view of the Japanese Government, were H.M. Government to insist on carrying out their proposed tests, although they might gain some short-term practical advantage, they would in the long term suffer serious political disadvantages. If the U.S.A. and the U.K. took no account of public opinion and went on with their tests, he feared that the Asian countries would be forced to take up a neutral position, though this might run counter to their instincts.

" I told Dr. Matsushita that I had nothing to add to the exchange of Notes which had already taken place between our two Governments. But I reaffirmed my view that the peace of the world at present depends on the possession by the U.K. and the U.S.A. of a formidable deterrent to aggression. The U.K. deterrent would not, however, be fully effective until it had been tested and shown to work effectively.

" I am sure your Excellency would agree that it would be irrational for Japan or for other Asian nations to take up a neutralist position simply because we are taking the necessary steps to ensure that our policy, which is based purely and simply on defence, has the necessary technical and, practical backing to make it fully effective. The free Asian nations themselves stand to benefit as much as the nations of the West from the protection accorded by this policy.

" I emphasized to Dr. Matsushita that our decision to hold these tests had not been taken lightly. I explained that it remained the policy of H.M. Government to work for the abolition of nuclear tests at the appropriate stage in a scheme of general disarmament, and that they were prepared to study any practical proposals that might be devised for achieving the limitation of tests with adequate safeguards. Meanwhile, we hope to find support for the idea of advance registration and limited observation of tests, which is in accordance with the resolution recently referred to the Disarmament Sub-committee by the General Assembly, of which Japan was a co-sponsor with Canada and Norway [see page 15522, second column].

" I should like to assure your Excellency that the special sensitivity of the Japanese people to questions concerning the use of atomic weapons . . . is fully realized by H.M. Government, who have not forgotten that the Japanese people suffered the effects of atomic bombing in 1945. Nor have the resolutions of the Japanese Diet passed unnoticed in this country. But I must maintain the view, which I honestly hold and which I expressed in the House of Commons as lately as April 1 [see page 15459], that from the medical and biological point of view the radiation effects of our forthcoming nuclear tests will be insignificant. Extensive safety precautions are being taken and I cannot agree that there will be any danger to Japan, which lies some 4,000 miles from the test area . . ."

Dr. Matsushita went from London to Rome, where he was received in private audience by the Pope on April 14. In the course of this audience the Pope handed a message to the Japanese envoy, for transmission to his Government, stressing the " catastrophic " menace of nuclear weapons and containing an appeal to the Powers to renounce them. [The text of this message is given below in the section dealing with the appeals made by the Pope, Dr. Schweitzer, and Mr. Nehru.] Dr. Matsushita, who said that he had been " greatly encouraged " by the Pope's attitude, flew from Italy to New York, where he saw Dr. Hammarskjöld at U.N. Headquarters on April 18. On April 21 he saw Mr. Dulles at the latter's home and explained to the U.S. Secretary of State the Japanese Government's reasons for requesting the suspension of the projected U.S. atomic tests, as well as those held or projected by the Soviet Union and Great Britain. Mr. Dulles, while expressing sympathy with the Japanese Government's attitude, emphasized that the United States could not abandon nuclear tests unilaterally, and stressed that America's responsibilities in defending the free world made the continuance of such tests essential in present circumstances.

Dr. Matsushita returned to Tokio on April 29 and subsequently reported on his mission to Mr. Kishi and the Japanese Cabinet. In a press statement after his return he expressed regret at the failure of his mission to London and Washington ; pointed out, however, that the British and American people were no less anxious than the Japanese that nuclear tests should be discontinued and nuclear weapons forbidden ; and announced that he would make three recommendations : (1) that Japan should make a request to the International Court, through the United Nations, for an advisory opinion on the validity of the projected British nuclear tests ; (2) that all Powers not possessing nuclear weapons should make a joint declaration warning the " nuclear Powers " of the dangers to mankind involved in the continuation of such tests ; and (3) that Japanese scientists should compile a report, similar to that of the British Medical Council, on the effects of radiation on the individual.

M. Gromyko's Speech to Supreme Soviet. - Responsibility for Nuclear Tests placed on Western Powers. - Soviet Appeal to U.S. Congress and British Parliament.

In a speech on May 10 to the Supreme Soviet, the Foreign Minister of the U.S.S.R. (M. Gromyko) reiterated previous accusations that the policy of the Western Powers was " forcing " the Soviet Government to continue nuclear tests, and accused those Powers - " in the first place the United States " - of keeping the world " on the brink of war." *Inter alia*, he accused America and Britain of wanting the U.S.S.R. to discontinue nuclear tests unilaterally ; declared that this was " out of the question because the Soviet Union would then find itself in an unequal and disadvantageous position " ; and said that the U.S.S.R. would only end nuclear tests if Britain and America did the same. In the course of a lengthy speech, M. Gromyko accused the Western Powers of having " retracted their own proposals on various pretexts " in the U.N. Disarmament Commission and its sub-committee, and of ignoring " repeated Soviet proposals to end atomic and hydrogen weapon tests if the United States and Britain agree to do likewise."

After M. Gromyko's speech the Supreme Soviet adopted a resolution which (1) appealed to the U.S. Congress and the British Parliament " to agree on the immediate cessation of nuclear tests," and (2) appealed for an " inter-parliamentary committee of the three atomic Powers " to work out " the best means of achieving the complete banning of nuclear tests and atomic and hydrogen weapons."

The British Foreign Office commented that M. Gromyko's speech and the above-mentioned resolutions " seem to be the latest move in the Soviet propaganda campaign designed to mislead public opinion on the matter of nuclear tests." A similar view was expressed in Washington.

Appeals by Pope Pius XII, Dr. Albert Schweitzer, and Mr. Nehru for Ban on Nuclear Tests and Weapons.

Appeals for the ending of nuclear tests and the banning of all nuclear and thermo-nuclear weapons, combined with serious warnings on the dangers which would confront humanity if such tests were continued, were issued during April by the Vatican, by Dr. Albert Schweitzer, the famous humanitarian and medical missionary, and by Mr. Nehru, the Prime Minister of India. The Vatican released on April 24 the text of the message given by the Pope to Dr. Matsushita on April 14 (see above) ; Dr. Schweitzer's message was addressed to the Norwegian Nobel Committee on April 23 ; and Mr. Nehru's appeal was delivered during a speech in Delhi on April 14.

Appeal by Pope Pius XII.

In his message to the Japanese Prime Minister, handed to Dr. Matsushita, the Pope wrote as follows :

" Man's growing mastery of the terrifying forces of nature gives rise to new and insistent reasons for anxiety. In effect, the destructive power of nuclear weapons has become unlimited. It is no longer braked by the critical mass which put a natural limit on the already terrible power of the first atomic weapons.

" This unlimited power is now being used as a menace which, tossed back and forth from one camp to the other, becomes ever more catastrophic as each seeks to surpass the other with the growing and unfortunately real terror. In the case of natural disasters, one cannot but bow before what happens at the command of the Almighty. But if disaster were to be caused by one man's perverse lust for dominion—with all the reprisals implied therein how could such action not be condemned by every righteous soul ?

" Instead of the useless waste of scientific activity and material resources represented by the preparation of a catastrophe whose ultimate biological, and especially hereditary, effects on living species —in addition to its immense immediate damage no-one can predict with certainty, and instead of the exhausting and costly race towards death, scientists of all nations and faiths must feel a grave moral obligation to pursue the noble aim of harnessing these energies for the service of man. And scientific, economic, industrial and political organizations ought to give their whole-hearted support for efforts directed at using these energies on a scale adapted to human needs."

Appeal by Dr. Albert Schweitzer.

In his letter, sent from his hospital at Lambaréné (French Equatorial Africa), Dr. Schweitzer—who is 82—urged the mobilization of world opinion to ban nuclear tests and nuclear weapons, and emphasized that failure to consider the consequences of continued tests would be " a folly for which mankind will have to pay a terrible price."

After saying that "radiation resulting from the explosions which have already taken place represents a danger to the human race not to be underrated," and that "further explosions of atomic bombs will increase this danger to an alarming extent," Dr. Schweitzer continued: "My age, and the sympathy that I have gained for myself through advocating the idea of reverence for life, permit me to hope that my appeal may contribute to preparing the way for the insight so urgently needed.

"There are two kinds of atom bombs—uranium bombs and hydrogen bombs. To these two bombs has recently been added the cobalt bomb, a kind of super-atom bomb. The effect of this bomb is estimated to be many times stronger than that of hydrogen bombs.

"The explosion of an atom bomb creates an inconceivably large number of exceedingly small particles of radioactive elements. Of these elements, some exist for hours, some for weeks, months, years, or millions of years, undergoing continuous decay. They float in the higher strata of air as clouds of radioactive dust. The heavy particles fall down first. The lighter ones will stay in the air for a longer time or come down with the rain or snow. How long it will take before everything carried up in the air by the explosions which have so far taken place has disappeared, no-one can say with any certainty. According to some estimates, this will be the case not earlier than 30 or 40 years from now.

"What we can state with certainty, however, is that the radioactive clouds will constantly be carried by the winds around the globe and that some of the dust, by its own weight, or by being brought down by rain, snow, mist and dew, will fall little by little on the surface of the earth and into the rivers and oceans.

"Particularly dangerous are the elements combining long life with a relatively strong efficient radiation. Among them Strontium-90 takes the first place. It is present in very large amounts in radioactive dust. Cobalt-60 must also be mentioned as particularly dangerous.

"The radioactivity in the air, increased through these elements, will not harm us from the outside, not being strong enough to penetrate the skin. But the danger to be stressed above all others is that which arises from our drinking radioactive water and our eating radioactive food as a consequence of the increased radioactivity in the atmosphere.

"Following the explosions in Bikini and Siberia, rain falling over Japan has, from time to time, been so radioactive that the water from it cannot be drunk. And not only there: reports of radioactive rainfall are coming from all parts of the world where analyses have recently been made. In several places the water has proved to be so radioactive that it was unfit for drinking.

"Wherever radioactive rainwater is found, the soil is also radioactive- and in a higher degree. And with the soil the vegetation will also have become radioactive. The radioactive elements deposited in the soil pass into the plants, where they are stored. The radioactive elements in grass, when eaten by animals whose meat is used for food, will be absorbed and stored in our bodies . . .

"From official and unofficial sources we have been assured time and time again that the increase in radioactivity in the atmosphere does not exceed the amount which the human body can tolerate without any harmful effects. This is just evading the problem. Even if not directly affected by the radioactive material in the air, we are indirectly affected through that which has fallen down, is falling down, and will fall down. We are absorbing this through radioactive drinking water and through animal and vegetable foodstuffs, to the same extent as radioactive elements are stored in the vegetation of the region in which we live. Unfortunately for us, nature hoards what falls down from the air. None of the radioactivity in the atmosphere, brought into existence by the exploding of atom bombs, is so unimportant that it may not in the long run become a danger to us through increasing the amount of radioactivity stored in our bodies.

"What are the diseases caused by internal radiation? . . . They are mainly serious blood diseases. If the cells in the bone-marrow are damaged by radiation, they will produce too few or abnormal, degenerating blood corpuscles. Both cases lead to blood diseases and, most often, to death. These were the diseases that killed the victims of X-rays and radium rays. It was one of these diseases that attacked the Japanese fishermen who were surprised in their vessel by radioactive ashes falling 240 miles from Bikini after the explosion of a hydrogen bomb. With one exception, they were all saved, being strong and relatively mildly affected, through continuous blood transfusions.

"In the cases cited, the radiation came from the outside. It is unfortunately very probable that internal radiation affecting the bone-marrow and lasting for years will have the same effect, particularly since the radiation goes from the bone tissue to the bone marrow. Not only is our own health threatened by internal radiation, but also that of our descendants. The fact is that the cells of the reproductive organs are particularly vulnerable to radiation. Profound damage to these cells means profound damage to our descendants.

"To find out how the existing radioactive radiation has affected posterity, comparative studies have been made between the descendants of doctors who have been using X-ray apparatus for years and those of doctors who have not. Among the descendants of radiologists, a percentage of still births of 1.403 was found, while the percentage among the non-radiologists was 1.222. In the first group, 6.01 per cent of the children had congenital defects, but only 4.82 per cent in the second . . .

"The total effect of the damage done to descendants of ancestors who have been exposed to radioactive rays will not, in accordance with the laws of genetics, be apparent in the generations coming immediately after us. The full effects will appear only 100 or 200 years later.

"Every increase in the existing danger through further creation of radioactive elements by atom-bomb explosions is a catastrophe for the human race—a catastrophe that must be prevented under all circumstances. There can be no question of doing anything else, if only for the reason that we cannot measure the responsibility for the consequences it might have for our descendants. They are threatened by the greatest and most terrible danger.

"That radioactive elements created by us are found in nature is an outstanding event in the history of the earth, of the human race. To fail to consider its importance and its consequences would be a folly for which humanity would have to pay a terrible price. When public opinion has been created in the countries concerned and among all nations, an informed opinion of the dangers involved in going on with the tests may lead statesmen to reach an agreement to stop them. A public opinion of this kind stands in no need of plebiscites or of committees to express itself. It works through just being there . . ."

Appeal by Mr. Nehru.

In a speech in New Delhi on April 14, the Prime Minister of India made a further appeal to the great Powers to find a way of stopping further test explosions of atomic and hydrogen bombs. After emphasizing that three test explosions in rapid succession had taken place in the Soviet Union while similar appeals were being made in many parts of the world, he denounced "this mad contest" between the great Powers and declared that it was the duty of all nations to persuade those Powers that they must find some way out of their present *impasse*, "however much they may dislike each other's policies."

Declaration by West German Scientists. - Refusal to co-operate in Development of Nuclear Weapons. - Dr. Adenauer on Need for Tactical Atomic Weapons for West German Forces.

Eighteen of Western Germany's leading nuclear physicists, including four Nobel prizewinners, issued a joint declaration on April 12 declaring that they would refuse to co-operate in any way in the production, use or testing of nuclear weapons. The signatories included Professors Otto Hahn (the first physicist to split the atom), Werner Heisenberg, Max Born, and Carl-Friedrich von Weizsäcker, all of whom are among the world's leading nuclear scientists.

The 18 scientists (whose declaration was issued from the Max Planck Institute of Physics in Göttingen) pointed out that a single atomic shell would have the same destructive effect as the atom-bomb dropped on Hiroshima in 1945; that one such "tactical" missile could, in their opinion, destroy an entire town; and that a single hydrogen bomb would make the whole of the Ruhr uninhabitable. The entire population of the Federal Republic could be annihilated by radioactivity from hydrogen bombs, and, in the view of the signatories, there was no defence against this weapon so far as large masses of population were concerned. For the above-mentioned reasons, and because of the responsibilities placed on them by the nature of their work, the signatories, though not politicians, could not remain silent on political issues and would therefore refuse all co-operation in the manufacture, testing, or destructive use of nuclear weapons. They were ready, however, to promote the peaceful applications of nuclear science in all possible ways. It was stressed that one of the primary reasons for issuing the declaration was that the population of the Federal Republic had not been sufficiently informed of the consequences which nuclear warfare would entail. In the opinion of the signatories, the best protection for the Federal Republic and the best means of serving world peace lay in a refusal to possess any form of nuclear weapon.

The declaration was issued in reply to a press statement by Dr. Adenauer, made on April 4, in which the Federal Chancellor intimated that the new West German armed forces would have to be equipped with tactical atomic weapons in view of similar developments in the defence forces of other countries.

Dr. Adenauer had said that one had to distinguish between "big nuclear weapons" and "tactical atomic weapons" which were "nothing more than a development of artillery." He went on: "Naturally, we cannot renounce the right of our troops to be equipped with the most modern normal arms. We do not possess the 'big' atomic arms. The whole development is in a state of flux and we Germans cannot stop it. All we can do is to adapt ourselves and to see to it that there will be a relaxation of tension somewhen and somewhere. I am convinced it would not lead to such a relaxation if the Federal Republic were the only country to deprive itself of such arms." The Chancellor expressed the view that the possession of "tactical" atomic weapons would not expose Germany to the danger of nuclear retaliation, since any nuclear attack by the Soviet Union would immediately bring about a counter-attack and the Russians were aware of this.

A statement was issued by Dr. Adenauer a few hours after the publication of the scientists' declaration in which he

expressed regret that the scientists had not discussed the matter with him as the responsible political head before issuing their declaration. Dr. Adenauer's statement continued:

"If the scientists intended to advocate a general ban on atomic weapons, valid for all countries, it would coincide completely with the views of the Government. I hope this was their intention. It appears to me that they do not possess the results of the tests made in the United States for the protection of civilians and soldiers. We should willingly have given them these results. If however, they meant to say that a small country like the Federal Republic should renounce such weapons, then I must say that has nothing to do with physical science--it is purely a foreign policy matter."

In conclusion, the Chancellor declared that the Federal Government would do their utmost to protect the German people from the effects of atomic war.

At the invitation of Dr. Adenauer, a number of leading West German scientists, including signatories of the declaration, had a meeting in Bonn on April 17 with Government representatives, including the Ministers of Defence and Atomic Affairs. Generals Speidel and Heusinger were also present at the meeting, over which the Federal Chancellor presided.

A statement was issued after the meeting saying that the discussions had ranged over the whole international and strategic situation, and that the Federal Republic would abide by its decision under the Paris agreements not to manufacture atomic weapons. [By implication, this meant that the Federal Republic might obtain tactical atomic weapons from other countries but would not manufacture them itself.] A Government spokesman pointed out that re-equipment of the *Bundeswehr* with tactical atomic weapons might take another two years, during which period every effort would be made to bring about controlled disarmament.

The West German *Bundestag* (Lower House) adopted a resolution on May 10 calling upon the great Powers to stop nuclear tests for a limited period "as a visible sign of their desire for general controlled disarmament." The resolution was introduced by the coalition parties supporting Dr. Adenauer, and adopted unanimously by a show of hands.

Suspension of H-Bomb Tests urged by Labour and Liberal Parties. - Resolution by British Council of Churches.

After two meetings of the Parliamentary Labour Party and a meeting of the Labour "Shadow Cabinet," a resolution submitted by Mr. Gaitskell was unanimously adopted on April 3 declaring that the Parliamentary Labour Party, "conscious of the dangers to humanity of the continuance of nuclear explosions, reaffirms previous decisions of the party calling for the abolition of H-bomb tests through international agreement and strongly urges H.M. Government to take an immediate initiative in putting forward effective proposals for this purpose to the other Governments concerned, meanwhile postponing the tests for a limited period so that the response of those Governments to this initiative may first be considered."

The Labour Party's official policy of accepting British production of the hydrogen bomb, while at the same time seeking the abolition of nuclear tests by international agreement, had been strongly challenged by a number of Labour M.P.s advocating the unconditional abandonment of the British tests as an example to the other two nuclear Powers, America and Russia. The Shadow Cabinet, meeting on April 2, had approved the text of a motion (moved by Mr. Gaitskell) which, reflecting the party's official policy, was worded identically to the motion eventually adopted, but ended at the words "Governments concerned"—i.e. it made no reference to the postponement of tests for a limited period.

When this motion was submitted to the Parliamentary Labour Party in the morning of April 3, however, Mr. George Thomas (M.P. for Cardiff West) and some 80 other Labour M.P.s moved an amendment to the official motion calling for the "immediate cessation of H-bomb tests"; urging the Government to "initiate a meeting of the three States manufacturing the H-bomb with a view to reaching common agreement on this question"; and further urging the Government "to give a lead to the world by abandoning the proposed tests at Christmas Island."

After lengthy discussion, during which considerable support was expressed for the amendment, the Shadow Cabinet held a further meeting at which it was decided to add to the original (official) motion the words "... meanwhile postponing the tests for a limited period so that the response of those Governments to this initiative may first be considered." The amended motion was then put to the Parliamentary Labour Party a second time and was unanimously accepted.

[It was commented in the Press that the motion in its final form represented a compromise between the two opposing viewpoints within the Labour Party on the question of nuclear tests. Moreover, it was pointed out that the amendment moved by Mr. Thomas and other M.P.s, if accepted, might have led to the resignation of prominent members of the Labour Shadow Cabinet—e.g. Mr. George Brown (the "shadow" Minister of Defence), who had publicly upheld the view that Britain should not suspend nuclear tests by unilateral decision but only if the United States and the Soviet Union took similar action.]

The Parliamentary Liberal Party had passed a similar resolution on Feb. 19 proposing the cessation of nuclear tests by all countries, and asking the Government to set an example by cancelling the tests planned to take place at Christmas Island.

By a narrow majority (39 votes to 32, with five abstentions), the British Council of Churches passed a resolution on April 2 deploring "the Government's decision to carry out nuclear tests in the megaton range."

Three other resolutions were also adopted by unanimous vote: (1) expressing the "profound concern" felt by Christian people in Britain at the continuation of nuclear tests and the grave danger they might involve for humanity by the increase of world radiation; (2) appealing to the British, U.S. and Soviet Governments to reach an agreement on the prohibition of such tests and the banning of nuclear weapons; (3) urging the "London sub-committee" of the U.N. Disarmament Commission to use every effort to reach agreement on the prohibition of all weapons of mass destruction.

The resolution deploring nuclear tests was moved by the Bishop of Chichester (Dr. Bell) in support of a resolution by the National Christian Council of Japan protesting against the continuation of such tests.--(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Japanese Embassy Press Office, London - Soviet Embassy Press Department, London) **(Prev. rep. Disarmament Negotiations, 15517 A; Soviet Tests, 15468 B; British Tests, 15248 A; U.S. Tests, 15060 C.)**

A. AUSTRIA. — Presidential Election.

Dr. Adolf Schärf, the Austrian Vice-Chancellor and Socialist candidate, was elected President of Austria on May 5 in succession to the late President Körner. Dr. Schärf received 2,250,975 votes (51.1 per cent) against 2,160,551 (48.9 per cent) for Professor Wolfgang Denk (non-party), who had been nominated by the People's Party and the right-wing Freedom Party. With voting being compulsory, the total poll in the presidential election (4,502,258) was 97.2 per cent of the electorate, 81,732 votes being invalid. Dr. Schärf's majority of 99,424 was the smallest in any Austrian presidential election.

President Schärf (67) was born in 1890 in Moravia (then part of the Austro-Hungarian Empire), studied at Vienna University, and became a lawyer. After the First World War he became secretary to the chairman of the Parliamentary Socialist Party in the National Council, and in 1933-34 was a member of the Federal Council. He was three times imprisoned--first in 1934 under the Dollfuss regime, a second time by the Nazis after the *Anschluss*, and a third time by the Nazis in 1944 shortly before the end of the Second World War. After the liberation of Austria, Dr. Schärf was elected chairman of the Socialist Party and joined Austria's first post-war Government as State Secretary under Dr. Renner. Since December 1945 he had held the post of Vice-Chancellor in the Coalition Governments headed by Dr. Figl and subsequently by Dr. Raab, the present Chancellor. He took part in the negotiations with the Soviet Government which prepared the basis for the conclusion of the Austrian State Treaty.

It was reported in the Austrian press that in spite of the electoral alliance between the People's Party and the Freedom Party, many adherents of the latter party withheld their votes from Professor Denk and cast them for Dr. Schärf.

President Schärf is the third post-war President of Austria and, like his two predecessors (Presidents Renner and Körner), is a Socialist as stated above. He declared on May 6 that he would rise above party politics, be "the President of all the people," and strive to complete the work of reconstruction which had been carried out during the past ten years.
(Wiener Zeitung - Neue Zürcher Zeitung)
(Prev. rep. President Körner, 15346 C.)

B. MOROCCO - UNITED STATES. — Agreement on American Economic Aid.

An agreement providing for U.S. economic assistance to Morocco was signed in Rabat on April 2 by M. Balafrej, the Moroccan Foreign Minister, and Mr. Cavendish W. Cannon, the U.S. Ambassador.

Under the agreement, the U.S. International Co-operation Administration will provide $20,000,000 to be used for the purchase of consumer goods for Morocco. The funds realized by their sale in Morocco will be used to finance development projects, principally in agriculture. Though full details have still to be worked out, it was stated that sugar and edible oils would be among the commodities imported. The agreement also provides for technical assistance if Morocco should request it.

It was stated by U.S. and Moroccan officials that the question of the U.S. bases in Morocco was not connected with the economic agreement.—(New York Times - Le Monde, Paris)

MAY 18—25, 1957

A. SUEZ CANAL. — Canal reopened to Navigation. - Unilateral Egyptian Declaration on Future Working of Canal. - Western Criticisms of Omission of "Six Principles." - Security Council Debates. - Statement by Canal Users' Association. - British Decision to use Canal. - Mr. Macmillan's Statement. - Eight Conservative M.P.s resign Party Whip. - Continued French Boycott of Canal. - French Insistence on Egyptian Compliance with "Six Principles." - Israeli Demands for Right of Navigation in Suez Canal.

As a result of intensive efforts by the U.N. Salvage Organization headed by Lieut.-General Raymond Wheeler, the Suez Canal was reopened to navigation for ships of maximum draught on April 10—one month ahead of the target date (mid-May) which had been set by General Wheeler. The Egyptian Government issued a statement on that date announcing that the Canal was "completely cleared" of wrecks, while General Wheeler also issued a statement pointing out that the clearance operations had been completed "well ahead of schedule" and that all obstructions to navigation had been removed. The U.N. Salvage Organization was disbanded on May 2, by which date all vessels under charter to the organization had been withdrawn from Egyptian waters.

The three major obstructions to navigation—the tank-landing craft *Akka*, the tug *Edgar Bonnet*, and the frigate *Aboukir*, all of which had been scuttled by the Egyptian authorities after the Anglo-French military intervention—were removed by the U.N. Salvage Organization on Feb. 14, March 25 and April 8 respectively. The 3,000-ton *Akka*, which had been laden with cement before being sunk in the Canal just south of Ismailia, was raised by the German salvage vessels *Ausdauer* and *Energie* and towed to the Great Bitter Lake outside the traffic channel. The *Edgar Bonnet*, sunk in the narrowest part of the Canal north of Ismailia, was raised by Dutch salvage craft and towed to Lake Timsah, while the *Aboukir*, sunk near the southern entrance of the Canal, was raised by a combined German and Italian salvage team and towed to the Great Bitter Lake after frogmen had removed explosives from the vessel. The removal of the *Akka* opened the Canal to ships up to 3,000 gross tons; the removal of the *Edgar Bonnet* made it possible for ships up to 10,000 gross tons to navigate the Canal; while the raising of the *Aboukir*, the last major obstruction, made navigation possible by vessels of maximum draught.

In a statement at U.N. Headquarters on May 7, General Wheeler said that although the clearance of the Canal had been completed a month ahead of schedule, it might have been shortened by another month if Egypt had not at first refused to let U.N. salvage crews work on two vessels because they were loaded with explosives. Despite the delay thus caused, the explosives had eventually been removed from these vessels by U.N. crews.

The first convoy to enter the Suez Canal since October left Suez for Port Said on March 29, consisting of nine freighters (four Italian, two Soviet, and the others of West German, Greek, and Rumanian registry) ranging from 1,800 to over 7,000 gross tons; all the vessels paid tolls to the Egyptian Canal Authority in U.S. dollars, Swiss francs, Italian lire or West German Deutschemarks. On April 10, when the Canal was fully reopened as stated above, large vessels passing through the Canal included two oil tankers of 20,000-tons deadweight—one Italian and one Belgian—and the 13,000-ton Italian liner *Oceania*, bound for Australia with 800 passengers.

The first British vessel to pass through the Canal since October—the freighter *West Breeze* (3,600 gross tons), registered in Hong Kong—did so on April 19 after paying tolls in Swiss francs equal to about £1,300; she was bound from Singapore to Rotterdam with a cargo of groundnuts. The first American vessel to transit the Canal since the Suez crisis—the 9,000-ton *President Jackson*, bound from Karachi to Genoa with cargo and passengers—sailed though on April 23 after paying tolls to the Egyptian Authority "under protest."

Daily convoys in each direction—one northbound and one southbound—were resumed on March 30 by the Egyptian Canal Authority, which announced that it had 224 pilots at its disposal—99 Egyptians, 29 Greeks, 25 Germans, 15 Russians, 12 Yugoslavs, 10 Poles, and the rest of other nationalities, including American, Dutch, Norwegian, Swedish, Spanish, Italian, Hungarian, Rumanian, South African, and Persian. The convoys were increased on May 18 from two to three a day—two southbound and one northbound—following the British Government's decision to use the Canal (see below).

Colonel Younes, financial administrator of the Egyptian Canal Authority, explained on March 27 that the Authority was prepared to accept payment of canal tolls in different currencies so long as they were transferable within the European Payments Union and available to an Egyptian account. Among "acceptable" currencies listed by Colonel Younes were U.S. and Canadian dollars, Swiss and Belgian francs, Dutch guilders, the Scandinavian currencies (except Finnish), West German Deutschemarks, Italian lire, and Indian rupees. He explained that the absence of sterling and French francs from the list was a "temporary" measure until such time as both currencies were freed from the present financial restrictions and became available for Egyptian use. As regards the omission of Russian roubles, Colonel Younes explained that Soviet vessels had normally paid canal dues in sterling when it was free, but had generally paid in U.S. dollars since the freezing of Egyptian accounts by Britain.

As from May 1, the Egyptian Canal Authority required all users of the Canal to pay tolls in freely convertible currencies, and no longer accepted settlement through clearing accounts with those countries having trade agreements with Egypt. This regulation particularly affected Italy and Greece (two important users of the Canal), and especially Italy, whose vessels had hitherto paid canal tolls under a system whereby the sums involved were set off against the large trading debts owed by Egypt to Italy. [See pages 15129-30]. Following an Italian protest, an Egyptian Government delegation arrived in Rome on May 16 for discussions with the Italian Government on new clearing and payments arrangements.

Egyptian Declaration on Administration and Operation of Suez Canal. - Insistence on Egyptian Control of Canal and Payment of Tolls to Egyptian Authority. - Breakdown of U.S.-Egyptian Talks.

The Egyptian Government sent a memorandum on March 18 to all foreign diplomatic missions in Cairo stating that all canal dues would have to be paid in advance to the Egyptian Canal Authority or its authorized agents when the Suez Canal was reopened to navigation. After giving an assurance that Egypt would abide "by the letter and spirit" of the 1888 Convention, the statement added that questions of claims and compensation arising out of the nationalization of the Suez Canal Company "can be settled either by direct agreement or by arbitration"; that the Egyptian Authority would create a special fund for carrying out improvements to the Canal, earmarking for this purpose a percentage of Canal dues "not lower than the percentage set aside by the former Canal Company for this purpose"; and that "a further detailed statement will be issued covering the above-mentioned principles."

A further memorandum (the contents of which were not officially made public) was sent on March 29 to the United States and six other countries setting forth the Egyptian Government's detailed proposals for the administration and operation of the Canal after the resumption of navigation.

The U.S. State Department announced on April 1 that a U.S. Note had been delivered in Cairo containing "suggestions" whereby the latest Egyptian proposals for the operation of the Canal could be brought into line with the "six principles" enunciated by the Security Council on Oct. 13, 1956 (see 15252 A) as essential conditions for a permanent settlement. A State Department spokesman explained that the U.S. Government had not departed from its view that the "six principles" should provide the basis for the future operation of the Canal, and added that "the suggestions we have made to Egypt are in terms of achieving an arrangement consistent with these principles."

Though, as stated above, the Egyptian memorandum was not officially published, it was understood to contain no reference to the Security Council's "six principles" which Egypt, as well as the U.S.A., Britain and France, had accepted as a basis for settlement of the Canal question. The *New York Times* said that the U.S. Government had expressed its "displeasure" to Egypt and had stressed (*a*) that the Egyptian proposals were unilateral; (*b*) that they made no mention of the "six principles"; and (*c*) that they ignored the proposal, made jointly by the U.S.A., Britain, France and Norway, that canal tolls should be collected by an international agency—e.g. the International Bank—and half the proceeds made available to Egypt. [This latter proposal had been submitted jointly by the four countries on Feb 19 and was transmitted to Egypt on their behalf by the U.N. Secretary-General, Dr. Hammarskjöld.]

The American Ambassador in Cairo (Mr. Raymond Hare) presented the U.S. Note to the Egyptian Foreign Minister (Dr. Fawzi) on March 31. During the next three weeks Mr. Hare had a number of meetings with President Nasser, Dr. Fawzi, and other Egyptian officials, but no progress was made toward reconciling the Egyptian and U.S. points of view. Although no statements were issued on the talks between Mr. Hare and Dr. Fawzi, press reports from Cairo and Washington said that there was a deadlock on all major issues, including "completely different interpretations" of the Security Council's six principles by Egypt and the United States. In addition to his discussions with Mr. Hare, Dr. Fawzi also had separate meetings with the Indian, Soviet, and Yugoslav Ambassadors in Cairo.

On April 24 the Egyptian Government issued a declaration on the future administration of the Suez Canal which was sent to Dr. Hammarskjold with the request that it be deposited with the U.N. Secretariat as an "international instrument." A covering letter from Dr. Fawzi described the declaration as the "detailed statement" which had been promised by the Egyptian Government in its earlier statement of March 18

(see above). After giving formal notification that the Canal was again "open for normal traffic" the letter expressed the Egyptian Government's "gratitude and appreciation" to the United Nations, and to all the countries concerned, for their efforts "which made it possible for the clearance of the Canal to be accomplished peacefully in a short time."

The declaration rejected all idea of international control of the Suez Canal, but set limits to the amount of tolls which would go to the Egyptian Government and provided for arbitration on any increases in canal tolls. No mention was made of the "six principles," beyond a statement in Dr. Fawzi's letter noting the Egyptian Government's "understanding" of the Security Council's resolution of Oct. 13, 1956. The text of the declaration was as follows:

"In elaboration of the principles set forth in its memorandum of March 18, 1957, and in accordance with the Constantinople Convention of 1888 and the U.N. Charter, the Government of Egypt makes the following declaration on the Suez Canal and the arrangements for its operation:

1. **Reaffirmation of 1888 Convention.** It remains the unaltered policy and firm purpose of the Government of Egypt to respect the terms and spirit of the Constantinople Convention and the rights and obligations arising therefrom . . .

2. **Observance of the 1888 Convention and U.N. Charter.** While reaffirming their determination to respect the terms and spirit of the Constantinople Convention of 1888 and to abide by the principles and purposes of the U.N. Charter, the Government of Egypt are confident that the other signatories of the said Convention, and all others concerned, will be guided by the same resolve.

3. **Freedom of Navigation, Tolls, and Development of the Canal.** The Government of Egypt are determined:

(*a*) To afford and maintain free and uninterrupted navigation for all nations within the limits of and in accordance with the provisions of the Constantinople Convention.

(*b*) That tolls shall continue to be levied in accordance with the agreement concluded on April 28, 1936, between Egypt and the Suez Canal Maritime Company; and that any increase in the current rate of tolls within 12 months, if it takes place, shall be limited to one per cent; and that any increase beyond that level shall be made through negotiations and, failing agreement, shall be settled by arbitration according to the procedure set forth below [Paragraph 7 (*b*)].

(*c*) That the Canal shall be maintained and developed in accordance with the progressive requirements of modern navigation, and that such maintenance and development shall include the eighth and ninth programmes of the Suez Canal Maritime Company, with such improvements thereto as are considered necessary.

4. **Operation and Management.** The Canal shall be operated and managed by the autonomous Suez Canal Authority established by the Government of Egypt on July 26, 1956. The Government of Egypt look forward with confidence to continued co-operation with the nations of the world in advancing the usefulness of the Canal . . . [and] . . . will welcome and encourage co-operation between the Canal Authority and representatives of shipping and trade.

5. **Finance.** (*a*) Tolls shall be payable in advance to the account of the Canal Authority at any bank chosen for this purpose by the Authority. The Canal Authority has authorized the National Bank of Egypt to undertake this operation, and is also negotiating with the Bank for International Settlements to accept payment of the canal tolls on its behalf.

(*b*) The Canal Authority shall pay to the Government of Egypt five per cent of all gross receipts as royalty.

(*c*) The Canal Authority will establish a Suez Canal Capital and Development Fund into which shall be paid 25 per cent of all gross receipts. This Fund will ensure that there shall be available to the Canal Authority adequate resources to meet the needs of development and capital expenditure for the fulfilment of the responsibilities they have assumed and are determined to discharge.

6. **Canal Code.** The regulations governing the administration and operation of the Canal are embodied in the Canal Code, which is the law of the Canal. Due notice will be given of any alteration in the Code. Any such alteration, if it affects the principles and commitments in this declaration and is challenged or complained against for that reason, shall be dealt with in accordance with the procedure set forth in Paragraph 7 (*b*).

7. **Settlement of Complaints relating to Canal Code.** (*a*) In accordance with the principles laid down in the Constantinople Convention of 1888, the Canal Authority, by the terms of its Charter, can in no case grant any vessel, company, or other party any advantage or favour not accorded to other vessels, companies or parties on the same conditions.

(*b*) Complaints of discrimination or of violation of the Canal Code shall be referred by the complaining party to the Canal Authority, which shall consider the complaint and take action to solve it. If no solution is reached by this procedure, the matter may be referred, at the option of the complaining party or the Authority, to an arbitration tribunal composed of one nominee of the complaining party, one of the Authority, and a third to be chosen by both. In case of disagreement, such third member will be chosen by the President of the International Court of Justice upon the application of either party.

(*c*) The decisions of the arbitration tribunal shall be taken by a majority of its members. They shall be binding upon the parties and must be carried out in good faith.

(*d*) The Government of Egypt will give further study to appropriate arrangements for fact-finding, consultation, and arbitration on complaints relating to the Canal Code.

8. **Compensation and Claims.** The question of compensation and claims in connexion with the nationalization of the Suez Canal Maritime Company shall, unless agreed between the parties concerned, be referred to arbitration in accordance with established international practice.

9. **Disputes, Disagreements or Differences arising out of the Convention and Declaration.** (*a*) Disputes or disagreements arising out of the Constantinople Convention of 1888 or this Declaration shall be settled in accordance with the U.N. Charter.

(*b*) Differences arising between the parties to the 1888 Convention in respect of the interpretation or applicability of its provisions, if not otherwise resolved, shall be referred to the International Court of Justice. The Government of Egypt will . . . accept the compulsory jurisdiction of the International Court of Justice in conformity with the provisions of Article 36 of its statute.

10. **Status of Declaration.** The Government of Egypt make this declaration, which reaffirms and is in full accord with the terms and spirit of the Constantinople Convention of 1888, as an expression of its desire and determination to enable the Suez Canal to be an efficient and adequate waterway linking the nations of the world and serving the cause of peace and prosperity.

This declaration, with the obligations therein, constitutes an international instrument and will be deposited and registered with the U.N. Secretariat."

Security Council convened by U.S. Delegate. - French and U.S. Criticisms of Omission of "Six Principles" from Egyptian Declaration.

Following the publication of the Egyptian declaration, the U.S. delegate at the United Nations (Mr. Cabot Lodge) sent a letter to the president of the Security Council—Sir Pierson Dixon (Britain), holder of that post during April—requesting an immediate meeting of the Council to consider the Suez question, of which it had remained "seized."

Mr. Lodge's letter, sent on April 25, recalled that the Security Council's resolution of Oct. 13, 1956, had stipulated that any settlement of the Suez question should be based upon the "six principles" unanimously adopted. As the Canal had been reopened to traffic, and in view of the declaration issued by the Egyptian Government, the U.S. Government believed that the Council "should now meet to take note of the situation regarding passage through the Suez Canal."

The Security Council was accordingly convened on the following day (April 26) by Sir Pierson Dixon, who invited the Egyptian delegate at the U.N. (Dr. Omar Loutfi) to take part in the debate in accordance with precedent. Mr. Lodge, who opened the debate, said that the Egyptian declaration "in its present form does not fully meet the six requirements" set forth by the Security Council in October last; moreover, it contained no assurance that the "six requirements" would in fact be implemented. He suggested, nevertheless, that the system proposed by Egypt should be "given a trial," the Suez question meanwhile remaining on the Council's agenda. The Security Council accepted Mr. Lodge's suggestion without a vote, and adjourned *sine die* after debating the matter.

Mr. Cabot Lodge recalled that the U.S.A. had made a number of suggestions to the Egyptian Government "designed to facilitate an effective and generally acceptable international agreement in conformity with the six requirements unanimously approved by the Security Council." After commenting that the Egyptian declaration did not appear to conform to the six principles, he continued:

"A fundamental difficulty lies in the fact that there is no provision for the organized co-operation referred to in the exchange of correspondence last November between Dr. Hammarskjöld and the Egyptian Government. In view of this lack of provision for organized and systematic co-operation between Egypt and the users, there is no assurance that the six requirements will in fact be implemented. Perhaps no final judgment can be made regarding the regime proposed by Egypt until it has been tried in practice. Therefore any *de facto* acquiescence by the United States must be provisional, and we reserve the right to express ourselves further on the matter in future.

"Obviously there remain a number of practical arrangements which will have to be worked out in giving effect to the Egyptian declaration. The salient practical fact is that the question of whether confidence among the users of the Canal can be established will depend on the manner in which the Egyptian declaration is carried out in practice. Pending a settlement with the Suez Canal Company, and in view of the possibility of double jeopardy, U.S. vessels will be authorized to pay Egypt only under protest, as has been the case since last July. We think that the interests of Egypt and the users would both be served if the arrangements for the Canal and its operation are such that Governments and private concerns can base their economic and business plans on the assumption that there will in fact be, as there should be, free and non-discriminatory use of the Canal at all times by ships of all nations."

In conclusion, Mr. Lodge proposed that the Egyptian plan should be given a trial while the Security Council continued to remain "seized" of the Suez question.

Dr. Omar Loutfi (Egypt) maintained that his Government's declaration accorded fully with the "six principles" and, in particular, with the third and "most delicate" one—that of "insulating" the Canal from the politics of any country. He claimed that this was provided for by entrusting the Canal's operation to the Egyptian Suez Canal Authority, "an independent body with its own independent budget." After asserting that the Egyptian declaration complied fully with the Constantinople Convention, the U.N. Charter, and the "six principles," and saying that Egypt fully supported the principle of free navigation, Dr. Loutfi expressed his Government's determination to operate the Canal in the interests of the user-countries in spite of the "tragic events" of recent months.

M. Georges-Picot (France) described the Egyptian declaration as "vague and nebulous" and as conforming to only one of the "six principles"—namely, the second, which stated that Egyptian sovereignty must be respected. He maintained that the declaration was unilateral and could be modified unilaterally; that it contained "unambiguous threats of discrimination" against shipping; that the principle of free passage through the Canal was accompanied by reservations, "the meaning of which we know so well"; and that it was completely devoid of essential guarantees and safeguards. Moreover, Egypt was reserving the right to impose her own interpretation of the Constantinople Convention, as she had already done by preventing the passage of Israeli ships through the Canal in spite of the Security Council's resolution of 1951 to the contrary.

Dr. Walker (Australia) similarly declared that Egypt had not adhered to the "six principles," which constituted an "essential minimum" for any settlement. He added that if the present insecurity were prolonged, international capital would be "diverted to other projects designed to make world commerce less vulnerable to the policies of those who control the Canal." It was thus a matter of "elementary prudence" for Egypt's rulers to take account of this, instead of following the path of "a chauvinistic and onerous self-sufficiency."

The U.S. State Department had advised American shipowners on March 28 not to use the Suez Canal until all "physical and legal hazards" had been "fully eliminated." The State Department spokesman (Mr. Lincoln White) emphasized, however, that there was no prohibition on the use of the Canal by American vessels. As stated by Mr. Cabot Lodge, U.S. vessels passing through the Canal had been instructed to pay canal tolls to the Egyptian Authority "under protest"—the procedure adopted by the *President Jackson*, the first U.S. vessel to pass through the Canal after its reopening (see above).

Statement by Suez Canal Users' Association. - Resignation of Mr. Bartels.

The council of the 18-nation Suez Canal Users' Association (S.C.U.A.), after several meetings in London, issued a statement on May 9 declaring (1) that it was "the general consensus of the member-countries that the Egyptian declaration is insufficient and falls short of the six requirements for a settlement of the Suez Canal question which were embodied in the Security Council's resolution of Oct. 13, 1956"; (2) that "insofar as use of the Canal is resumed by the shipping of member-States, this does not imply their acceptance of the Egyptian declaration as a settlement of the Suez Canal question"; and (3) that the member-States of the S.C.U.A. "accordingly reserve existing rights under the Convention of 1888 and otherwise with respect to the operation of the Canal." The statement added (*a*) that the French delegate had "expressed a reservation to the effect that, in the opinion of his Government, it was not possible in present circumstances to recommend the use of the Canal to member-States"; and (*b*) that the Spanish delegate had "expressed a reservation to the effect that it is solely within the competence of the United Nations to decide whether or not the Egyptian declaration is consistent with the Security Council's resolution of Oct. 13, 1956."

Commenting on this statement, the Diplomatic Correspondent of *The Times* said that it was "clear . . . that the Association has been unable to reach agreement on what recommendation should be made to its members in face of the Egyptian declaration," and "equally clear that it is left to member-States to make their own decision."

The S.C.U.A. announced on May 16 that Hr. Bartels, the Danish diplomat who had been Administrator of the Association since October last, had resigned on May 1. The announcement intimated that S.C.U.A. itself would continue when arrangements had been made for the administration of its future work. It was understood that Hr. Tabor, the assistant administrator (also a Dane), would serve as acting administrator of S.C.U.A. for the time being.

[The decision whether or not to use the Suez Canal was left by most member-governments of the S.C.U.A.—e.g. the Scandinavian countries, Holland, Italy, and Western Germany—to the individual shipping companies concerned.]

British Ships authorized to use Suez Canal. - Statement by Mr. Macmillan. - Eight Conservative M.P.s resign Party Whip. - Criticism of Government's Decision.

In a statement on May 13 to the House of Commons, Mr. Macmillan announced that the British Government, while reserving all their rights, would no longer advise British shipowners to refrain from using the Suez Canal. The Prime Minister spoke as follows:

"A few weeks ago H.M. Government, together with the Governments of the United States, France, and Norway, made certain proposals designed to lead to an interim agreement for the use of the Canal, which would at the same time safeguard the interests of users for the future. Shortly afterwards the Egyptian Government put forward counter-proposals. These were made informally to certain Governments, including the United States. Since it seemed that these proposals were not in final form, the U.S. Government undertook a detailed negotiation in an effort to secure improvements before the proposals were formally communicated to all the Governments of the user-countries. As a result, certain modifications were secured, particularly with regard to arbitration procedures.

"On April 24 the Egyptian Government published, as a unilateral declaration, the terms on which it proposed that the Suez Canal would be open to shipping. This position was reported to the Security Council, who are still seized of this whole problem. Although the improvements were acknowledged, objection was still strongly taken to the unilateral character of the Egyptian declaration.

"It was the virtually unanimous view of the Suez Canal Users' Association that the unilateral Egyptian declaration was insufficient, and fell short of the six requirements for a settlement of the question which were embodied in the Security Council's resolution of Oct. 13, 1956. The member-States have reserved all their rights about the operation of the Canal and do not accept the Egyptian declaration as a permanent and satisfactory settlement of this question. We share this view to the full.

"The great majority of the foreign lines serving the principal trades east of Suez have indicated that they will henceforth route their ships through the Canal, as many of them have already done. The shipowners' associations in Western Germany and the Scandinavian countries have officially informed their members that the S.C.U.A. statement should be interpreted as meaning that every country and every shipowner is now free to use the Canal at their own discretion.

"In these circumstances, and with the reservation of their rights which has been stated on behalf of the member-countries of the S.C.U.A., the Government can no longer advise British shipowners to refrain from using the Canal.

"Payments made in connexion with the Canal—for canal dues and other purposes such as port dues, or water—will be made in sterling. A new transferable account, to be known as the No. 1 (Special) Account, has been opened by the Bank of England in the name of the National Bank of Egypt. So far as payments by residents of the U.K. are concerned, this Account can be used only for Canal dues and other shipping disbursements. As non-resident holders of transferable sterling will be able to make payments to the account in the normal way for current transactions, the Government will examine the possibility of extending its use to British residents also for such transactions.

"The Government will not interfere with the free disposal of the No. 1 Special Account. The existing No. 1 Account remains blocked. Removal or modification of the existing restrictions must naturally depend upon satisfactory arrangements covering all financial claims against Egypt. Discussions will be held on this basis in a neutral centre.

"In addition, it will be possible to consider favourably allowing payments to be made by Egyptian traders from the existing No. 1 Account for certain contracts entered into before July 28, 1956. One result of this would be to enable British exporters who had entered into these contracts in good faith, and have been prevented by our own restrictions from receiving payment, to recover their debts. The necessary statutory instrument to enable the new Account to be opened has been made and will be laid before both Houses."

In reply to requests by Mr. Gaitskell (Leader of the Opposition) and other Members, the Prime Minister agreed that the House should hold a two-day debate on the Suez Canal question during the following week.

Mr. Gaitskell said that the House had heard "with regret but without surprise" the Prime Minister's announcement that British shipowners were henceforth free to use the Canal; he added that "the terms we must now accept are substantially worse than those obtaining before Oct. 30." **Mr. Macmillan** did not agree that negotiations on the basis of the October terms would have led "to any more satisfactory result or any multilaterally-agreed settlement."

Mr. Herbert Morrison (Lab.) said that the Prime Minister's statement was "seriously deficient in relation to future action by the Government to resolve through the U.N. a number of outstanding matters"—viz., the "six principles," the question of Israeli shipping, compensation for the former Suez Canal Company, and the possibility of an appeal to the International Court or other legal action.

Mr. Macmillan agreed that all these were important issues for the future, but thought that "the House and the country would like to have a short, factual and objective account of the arrangements we are to make in the interim so that commercial arrangements can be made and people can know where they are." The issues raised by Mr. Morrison could best be discussed in the forthcoming debate.

Mr. Shinwell (Lab.) said that there could be no permanent solution until the Canal was made free for shipping of all nations, including Israel. He asked the Prime Minister to "appreciate that Israel must not be regarded as expendable to reach an understanding with the Egyptian Government." **Mr. Macmillan** replied: "What the Rt. hon. gentleman says on these matters commands general support, and certainly great sympathy from me."

Mr. Grimond (the Liberal leader) asked whether any settlement made in accordance with the "six principles" would be acceptable to the Government, and if negotiations were continuing with a view to reaching a settlement.

Mr. Macmillan said the United Nations and the Security Council had tried to reach a genuine, agreed multilateral settlement broadly on those principles, but had not been successful. It was on the basis of the "six principles" that the negotiations should, in the Government's opinion, proceed.

Mr. Emrys Hughes (Lab.) described the Government's decision as "the most spectacular retreat from Egypt since Moses," to which **Mr. Macmillan** retorted: "You are making too short-viewed a judgment on a matter of which only a much longer view will decide the rights and wrongs. This is by no means the end of the story. It is only a stage in it."

Later the same day, and after the Prime Minister's announcement, eight Conservative M.P.s issued a joint statement criticizing the Government for "capitulating to Nasser," and announcing that they had resigned the party Whip in protest and would sit in the House as Independent Conservatives. The M.P.s concerned were Lord Hinchingbrooke (Dorset South), Sir Victor Raikes (Liverpool, Garston), Mr. Patrick Maitland (Lanark), Mr. Angus Maude (Ealing South), Mr. Biggs-Davison (Chigwell), Mr. Lawrence Turner (Oxford), Mr. Anthony Fell (Great Yarmouth) and Mr. Paul Williams (Sunderland South). The statement ran as follows:

"H.M. Government have announced their capitulation to Nasser. This is one more episode in a long series of retreats that started with the Labour Government's weakness at the time of Abadan. Throughout the most recent series of retreats we have tried to persuade the Government to stand firm. We have urged it to stick to the six principles adopted by the Security Council and accepted by Nasser. Appeasement leads only to disaster. While refusing the Canal to Israel shipping, Nasser has already broken his latest pledge to abide by the 1888 Convention and reversed his acceptance of the six principles. It is folly to nurture his prestige just when it has been shaken by his failure to swallow Jordan and when Britons are on trial [in Cairo] for their lives

We believe that . . . this final surrender to Nasser will be interpreted by the people of Britain and by friends of Britain overseas as a sign both of material weakness and, far worse, of decaying will. Protests, appeals to Ministers, motions on the Order Paper, all have failed to stiffen the Government's policy. If this betrayal be accepted, how can we avert the surrender of Cyprus? We should be untrue to our deepest political convictions if we did not make the only protest left and refuse the party Whip. We remain Conservatives. We shall continue to support all truly Conservative measures . . ."

A statement in similar terms to the Prime Minister's was made in the House of Lords on May 14 by Lord Home on behalf of the Government. Lord Salisbury, speaking for the first time in the Lords since his recent resignation (see 15492 B), described the Government's decision as going "far too near to a complete capitulation to Colonel Nasser than many of us would have felt either palatable or, I was almost going to say, endurable."

Lord Russell of Liverpool announced on the same date that he had resigned the Conservative Whip and would sit in the House of Lords as an Independent Conservative. Viscount Lambton (Conservative M.P. for Berwick-on-Tweed) resigned as Parliamentary Private Secretary to Mr. Selwyn Lloyd in protest against the Government's decision, but did not relinquish the party Whip.

After a meeting of the Labour "Shadow Cabinet" in the evening of May 13, it was announced that a vote of censure would be moved in the forthcoming debate expressing "concern at the outcome of the Government's Suez Canal policy" and deploring "the damage to British prestige and economic interests resulting therefrom."

Instructions from the Bank of England were received by all banks on May 13 with regard to the new Exchange Control Order announced by the Prime Minister. As explained by Mr. Macmillan, U.K. shipowners will pay "canal dues and other shipping disbursements" in sterling to the National Bank of Egypt in a new No. 1 Special Account. Egypt will return to the transferable sterling account area, but the restrictions imposed on Egypt's sterling balances in July 1956 will remain in force.

Payments for exports to the Egyptian Monetary Area may be received in sterling from a Transferable, American, Canadian, and Registered Account or in any specified currency. Transferable sterling payments will go into the new Special No. 1 Account; otherwise payments for goods from Egypt will continue to be made into the blocked No. 1 Account.

The present balance in the No. 2 (permanently blocked) Account of the Bank of Egypt with the Bank of England was given as £80,000,000, and that in the No. 1 (temporarily blocked) Account as £27,000,000.

[It was confirmed in London on Jan. 1, 1957, that the Bank of England had transferred £20,000,000 sterling from Egypt's blocked No. 2 Account to the No. 1 Account. The National Bank of Egypt had requested that the transfer should be made on the first of the month in accordance with the Anglo-Egyptian sterling agreement of August 1955, and the U.K. authorities met this request in accordance with the provisions of that agreement. For all practical purposes, however, the £20,000,000 remained out of Egypt's reach, as the No. 1 Account had been effectively blocked since July 27, 1956.]

Immediately after the Prime Minister's announcement diversion orders were sent out to a number of British ships in the Indian Ocean and the Mediterranean authorizing them to use the Suez Canal. The first British vessels to pass through the Canal since the Suez crisis—the 9,000-ton cargo liner *Egidia* and the 7,000-ton P. and O. cargo liner *Devenha*—sailed through on May 17 after paying canal tolls in sterling. British oil tankers bound to and from the Persian Gulf passed through the Canal on May 20, for the first time since the closing of the Canal last autumn.

France maintains Boycott of Suez Canal. - "Last Appeal" to United Nations for Egyptian Compliance with "Six Principles." - Security Council convened at French Request. - Declaration by M. Pineau.

The British decision to use the Suez Canal was received with surprise and regret in France, where it was officially stated that the French Government would continue to boycott the Canal. After a Cabinet meeting on May 15 it was announced that France would call for an immediate meeting of the Security Council and make a "last appeal" to the United Nations to secure Egyptian compliance with the "six principles."

M. Mollet (the Prime Minister) issued a statement on the same day saying that the French Government had "noted with regret the decisions taken by the Suez Canal Users' Association, which has agreed that transit dues should be paid direct to Egypt although that country has not given the minimum guarantees on freedom of transit or on how the dues will be spent." He added: "The French Government cannot consider as acceptable, and even less as definitive, a solution of the Canal problem which is in flagrant contradiction to the six principles unanimously voted by the Security Council last October . . . It considers that it is not possible that different standards should be established in international relations, to the detriment of the democracies and to the advantage of dictators. Experience has shown that such discriminations encourage the worst kinds of adventure and will finally jeopardize world peace. France has therefore decided to make a last appeal to the United Nations, whose authority has been challenged. We have decided to take this matter as quickly as possible to the Security Council, and to ask it to invite Egypt to conform to the six principles. The reply which will be given to the French request is far more important than the Canal question itself. On its nature will depend the confidence which the world can retain in the international organization which it has entrusted with the task of maintaining peace and of ensuring respect for law and justice."

M. Mollet also disclosed that he had tendered his resignation to President Coty before the Cabinet meeting as a protest against the manner in which the Canal problem was being handled. The President, however, had refused to accept his resignation and he had therefore withdrawn it.

Mr. Cabot Lodge (president of the Security Council during May) accordingly convened a meeting of the Council on May 20 to resume discussion of the Suez question at the request of the French delegation. M. Pineau (the French Foreign Minister), who had flown to New York to present his Government's case, emphasized that France's motive in bringing the matter before the Council was to ascertain whether the United Nations had two different standards: one "valid for nations which by tradition and principle comply with decisions and recommendations, and another for "countries which can with impunity consider them as null and void without any sanctions being imposed on them." In the first case the U.N. would have real and undisputed powers; in the second it could not hope to retain any kind of authority.

"We are no doubt well aware," said M. Pineau, "that our votes are often prompted by political considerations of a circumstantial nature. But if we systematically disregard all notions of law, justice, or simply of loyalty to our own attitudes, there is danger that we will cast discredit on the United Nations. This organization is at the present time the object of sharp criticism on the part of world opinion. There is need to restore the confidence which the peoples have placed in it. We have the opportunity to do so today . . ."

M. Pineau emphasized that France asked nothing more than that the Security Council should uphold the principles which it had itself adopted by unanimous vote. To reject the French request would mean that the Council would be reversing its own decision. The Egyptian declaration meant that Egypt would be free at any future time to bar the use of the Canal to any country, and it was "impossible to imagine a unilateral settlement of the Canal problem which Egypt would always be free to repudiate." He therefore called for the reopening of negotiations between Egypt and the users of the Canal "as soon as possible," with a view to a solution in accordance with the Security Council's terms for a settlement.

The debate was adjourned after the Australian delegate (Dr. Walker) had expressed whole-hearted support for the French attitude and had commented that "it will be a sorry day for the world community if the Egyptian method of negotiation by unilateral *diktat* should become a fashionable method of reaching agreement between nations."

After a meeting at the State Department with Mr Dulles on May 21, M. Pineau said that the U.S. Secretary of State shared his views as to how the Suez situation might be improved, and that he and Mr. Dulles were in "entire agreement" that Egypt's terms for running the Canal were "provisional." Asked by press correspondents whether France intended to bring a resolution before the Security Council and whether Mr Dulles had tried to dissuade him from such a move, M. Pineau replied: "He did not try to persuade me or me him—we tried together to find the best possible solution." The question of a resolution, M. Pineau added, would be decided at the end of the Security Council's debate.

Israel demands Right of Passage in Suez Canal.

The Israeli Ambassador in Washington (Mr. Eban) called at the State Department on March 9 to urge the United States to take the lead in ensuring free passage for Israeli ships when the Suez Canal was reopened to navigation. In view of the possibility that Egypt might refuse to let Israeli or Israeli-bound vessels use the Canal, he recalled President Eisenhower's declaration in his broadcast of Feb. 20 (see page 15443): "We should not assume that if Israel withdraws [from Gaza and Sharm-el-Sheikh] Egypt will prevent Israeli shipping from using the Suez Canal or the Gulf of Akaba. If, unhappily, Egypt does hereafter violate the armistice agreement or other international obligations, then this should be dealt with firmly by the society of nations."

President Nasser, however, at a press conference to U.S. journalists in Cairo, declared on March 30 that the question of Israeli use of the Canal was "irrevocably linked" with a solution of the Palestine Arab refugee problem, and emphasized that the ban on Israeli shipping would remain in force until a solution of the refugee question had been achieved. Commenting on this statement, a spokesman of the Israeli Foreign Ministry said that any interference with Israeli shipping in the Suez Canal or the Gulf of Akaba would constitute "an act of war," adding that Israel was "not interested in the pretexts Colonel Nasser puts out from time to time to justify his determination to interfere with freedom of navigation." A further statement was issued by the Israeli Foreign Ministry on April 26 reminding the Security Council of its resolution of 1951, in which Egypt was called upon to open the Canal to Israeli ships; reiterating Israel's demand for freedom of navigation through the Canal equally with other nations; and declaring that "Israel expects the United Nations to ensure the implementation of its decisions."

On May 13, after the user-nations (except France) had announced their intention of using the Canal again, an official Israeli spokesman said that Israel intended to send a test ship to the Canal "at a suitable time"; the spokesman declined to say what action Israel would take if Egypt refused to let the vessel pass through, beyond reiterating that any such action by Egypt would be regarded as an "act of war." Colonel Hatem (head of the Egyptian Government's Information Bureau) declared on May 17 that "no power in the world" would stop Egypt from "exercising her right to maintain her security"—a remark interpreted as meaning that Egypt would continue to ban Israeli ships from using the Canal.

Mr. Dulles, at a press conference on May 14, said that the United States believed that Israel should have the right of free access to the Canal equally with all other nations, but added that the U.S.A. would "oppose any attempt to settle the matter by acts of war." President Eisenhower made a similar statement on the following day.

U.N. Secretary-General's Attitude to Egyptian-Israeli Dispute on Use of Canal. - Visits to Middle East. - Meetings with President Nasser and Mr. Ben-Gurion.

At press conferences in New York on April 25 and May 16, Dr. Hammarskjöld expressed the opinion that the International Court was the proper organ to decide whether the Constantinople Convention permitted Egypt to exercise belligerent rights against Israeli shipping in the Suez Canal. Replying to questions about Egypt's ban on Israeli shipping, he said that the Security Council's resolution of 1951 was "the law, at least for the Secretary-General." As regards the interpretation of the 1888 Convention, he recalled that the Egyptian declaration specifically mentioned reference of disputes to the International Court, and it therefore appeared that the question of Israel's navigation rights on the Canal "can properly be brought before the Court." The Egyptian declaration itself, he added, was "a binding international instrument" as long as it was registered with the U.N. Secretariat, but Egypt was entitled to revoke it "as long as it remains a purely unilateral instrument." As that declaration could be supplanted by another declaration or agreement, he was not yet in a position to say whether it was of a permanent or interim character.

Dr. Hammarskjöld, accompanied by Dr. Ralph Bunche (U.N. Under-Secretary) and other U.N. officials, paid a visit to Cairo and the Canal area from March 20-26, during which he had discussions with President Nasser and other Egyptian leaders. No statement was issued on these talks, which were understood to have dealt with Middle East problems generally and, in particular, with the question of Egypt's assertion of belligerent rights against Israel and the Egyptian attitude to Israeli shipping in the Suez Canal. On his return to New York Dr. Hammarskjöld described his talks with President Nasser as "exploratory" and "helpful."

The U.N. Secretary-General visited Israel on May 9-10 for discussions with Mr. Ben-Gurion, the Israeli Prime Minister. Dr. Bunche, Mrs. Meir (Foreign Minister of Israel), General Dayan (Israeli Chief of Staff), and Colonel Byron V. Leary (representing General Burns, Commander of UNEF) also took part in the talks. An official statement said that there had been "a full and frank exchange of views on some of the underlying causes of tension in the area"; that Dr. Hammarskjöld and Mr. Ben-Gurion had "welcomed the opportunity to clarify problems relating to the Middle East of common concern to Israel and the United Nations"; and that they had "reaffirmed their determination to spare no effort to advance the cause of peace in the area in pursuance of the objectives of the U.N. Charter." Dr. Hammarskjöld, after his return to New York, said that he was "very satisfied" with his talks with Mr. Ben-Gurion.

French Law on Status of Suez Canal Company.

By 430 votes to 149 (the minority consisting entirely of Communist deputies) the French National Assembly passed a Bill on April 10 laying down that the Suez Canal Company remained subject to French law, in spite of the unilateral action of the Egyptian Government in nationalizing it. The Bill was presented by the *rapporteur* of the Assembly's Foreign Affairs Commission (M. de Lipkowski), who explained that the legislation was necessary in order to secure the company's assets in foreign countries, principally in Great Britain (20 milliard francs, or about £20,000,000) and in the United States (12 milliard francs, or about £12,000,000).

M. de Félice, Under-Secretary of State at the Quai d'Orsay, pointed out that the Egyptian Government could not dissolve a company whose head offices were in France and the majority of whose shareholders were French. The provisions of the Convention of 1866 (under which the Suez Canal Maritime Company was established) made it clear that considerations of real estate alone had led the company to base itself in Egypt. Moreover, the convention stipulated that the constitution of the company, and the relationships with its associates, "shall be governed by those French laws which, in France, regulate limited liability companies." As they had so far been unable to obtain the agreement of the Egyptian Government for the continuation of the company's functions, its statutes would have to be modified accordingly. M. de Félice emphasized that the French Government were not entering into any engagement with the shareholders but were simply seeking the Assembly's confirmation of the company's French character. A. INTERNATIONAL MONETARY FUND. — New Managing Director and Chairman of Executive Board.

Mr. Per Jacobsson assumed his duties as Managing Director and Chairman of the Executive Board of the International Monetary Fund on Dec. 3, 1956, in succession to Mr. Ivar Rooth. Mr. Jacobsson, whose appointment for a five-year term had been announced on Sept. 19, 1956, was previously a member of the Management of the Bank for International Settlements in Basle, where he had served since 1931 as economic adviser and head of the Monetary and Economic Department. Like Mr. Rooth, he is a Swedish national. (International Monetary Fund) **(Prev. rep. 11452 D.)**

A. UNITED KINGDOM. — Parliamentary Approval for New Defence Policy. - Rejection of Opposition Amendment. - Mr. Macleod on Government's Proposals for ending National Service. - No Call-up for 1940 Class.

The Government's new Defence policy, as outlined in the White Paper of Feb.5 (see 15493 A), was approved by the House of Commons on April 17 by 308 votes to 250 after a two-day debate. The House rejected by 309 votes to 258 an Opposition amendment which (1) refused approval to the White Paper policy on the ground that it "lacked the firm decisions essential to an effective defence policy"; (2) regretted "the undue dependence on the ultimate deterrent" on which the policy appeared to be based; (3) called on the Government "to take an immediate initiative in putting forward effective proposals for the abolition of hydrogen bomb tests through international agreement." and meanwhile to postpone the U.K. tests "for a limited period so that the response to this initiative of the other Governments concerned may first be considered."

Mr. Macleod, the Minister of Labour, announced during the debate that it was not proposed to call up men born in 1940, and therefore liable for call-up under the existing National Service Acts, although they would remain legally liable.

Mr. Sandys (Minister of Defence), who opened the debate, stressed that the new policy was founded on the recognition of two basic facts: (1) that it was impossible effectively to defend Britain against an attack by hydrogen bombs; (2) that Britain could not go on devoting such a large part of her resources, and particularly of manpower, to defence. The Government believed that there would be no real safety in the world until there was disarmament, but that nuclear disarmament by itself would be disastrous, since it would give decisive military support to Russia, which would always be able to maintain larger conventional forces. It would continue, however, to do everything in its power to promote universal and comprehensive disarmament, and did not despair of reaching agreement.

"Unhappily," Mr. Sandys continued, "there reigns between east and west at present such complete mutual distrust that neither dares to lower its guard. Before we can hope to reach agreement on disarmament, I believe we must find ways of creating some measure of confidence, and that is not going to be easy and will certainly take a time. Meanwhile we must recognize the grim fact that the only means which the free world possesses to protect itself against Communist aggression and domination is the power to threaten retaliation with nuclear weapons, and for this protective power the free world at present depends almost entirely on the nuclear strength of the United States. While America with her immense resources is bound to remain the major partner, it is desirable that Britain should possess some element of nuclear deterrent power of her own. There is, I think, agreement on both sides of the House about that."

After recalling that the National Executive of the Labour Party had passed a resolution in 1955 supporting the production of hydrogen bombs by Britain, and that this attitude had been confirmed by Mr. Strachey in the Defence debate in February 1957 (see 15403 A) and by Mr. George Brown in a recent broadcast, the Minister went on: "As long as large U.S. forces remain in Europe and U.S. bombers are based in Britain it might conceivably be thought safe . . . to leave to the U.S.A. the sole responsibility for providing the nuclear deterrent. But when they have developed the 5,000-mile inter-ballistic rocket, can Britain really be sure that every U.S. Administration will go on looking at things in quite the same way? We think it just as well to make certain that an appreciable element of nuclear power shall in all circumstances remain on this side of the Atlantic, so that no-one shall be tempted to think that a major attack could be made against Western Europe without the risk of nuclear retaliation. I am quite sure our European neighbours feel the same and are glad to know that Britain intends to remain a nuclear Power. One of the basic principles of our defence policy is therefore that Britain must manufacture the hydrogen bomb." This, Mr. Sandys contended, necessarily implied the carrying-out of tests, since the mere possession of a bomb which had never been tested might not prove an effective deterrent.

Turning to the agreement concluded with the U.S.A. in January (see 153464 A), Mr. Sandys explained that whilst the ballistic rockets which Britain expected to receive under the agreement would be subject to certain restrictions on their use, the only alternative would have been to have no rockets available until several years later. He emphasized that Britain's acceptance of the U.S. offer did not mean that she was "going out of the rocket business" but that she would be able to concentrate, in collaboration with the U.S.A., on the development of more advanced types. In the meantime, British V-bombers and nuclear bombs would give her "a far from negligible element of deterrent power" under her own control. The Minister pointed out, however, that the "replacement of fighter aircraft by guided missiles and of bombers by ballistic rockets" would "not happen overnight"; the introduction of the new weapons would be gradual over a number of years, during which period man-operated aircraft would be needed.

Dealing with that phrase in the Opposition amendment which criticized the Government for placing "undue dependence on the ultimate deterrent," Mr. Sandys suggested that it had been prompted by the fear that every war might become a nuclear war—an "understandable anxiety" which arose from a tendency to generalize about the nature of war. It would, of course, be "unrealistic" to imagine that a full-scale offensive launched by Russia against Western Europe would be fought on conventional lines according to rules, and "inconceivable" that either the Soviet Union or the free world "would allow itself to be defeated without throwing everything into the battle, including nuclear weapons." There might, however, be limited acts of aggression, e.g. by Communist "satellite" countries, which could be resisted with conventional arms or with tactical atomic weapons that could be confined to the battle area.

In reply to **Mr. Crossman** (Lab.), who asked whether it was suggested that a non-major effort could be repelled by tactical nuclear weapons without involving the world in nuclear warfare, **Mr. Sandys** said that it was conceivable that in certain circumstances this might be possible. He added, however: "I am sure that if you get a head-on collision between Russia and the United States involving the defeat and domination of one by the other, it is unrealistic to imagine that it could be decided by anything short of the whole works."

After explaining that whilst Britain was "to a limited extent adopting certain tactical nuclear weapons," her major effort was and would continue to be in the conventional field, Mr. Sandys turned to other aspects of the White Paper policy. He emphasized that although Britain could "no longer afford to bear more than her fair share" of the joint burden of contributions to NATO, SEATO, and the Baghdad alliance, "no-one need have any fear that she will bear less than her fair share." "We are not contracting out of our obligations. Even at the end of the five-year plan, when all the reductions proposed have taken effect, there is little doubt that we shall still be making a more powerful contribution to the defence of the free world than any other country apart from the U.S.A."

The Minister then dealt with the Government's new policy regarding overseas garrisons and the Royal Navy. As to the former, he pointed out that although adequate forces must be maintained in Colonies and territories where there was a special threat of local attack, or some internal security problem, large garrisons were unnecessary because the vastly increased size and speed of modern transport aircraft enabled reinforcements to be dispatched to any place where trouble occurred. In this connexion he stated that besides the *Britannias* on order for R.A.F. Transport Command, a further number of *Beverley* freighters would be ordered. Regarding the Royal Navy, he claimed that its projected reorganization would make it "a highly effective, mobile force well constituted to meet all kinds of overseas emergencies and to play its part in sustaining NATO and the other alliances."

After stating that the policies set out in the White Paper would reduce the armed forces sufficiently to enable National Service to be brought to an end, Mr. Sandys continued: "I would like to make it quite clear that from now on all action is proceeding on the basis that the call-up will end in 1960 and the last National Serviceman will leave the forces in 1962. The Government do not intend to cut down the two-year period of National Service. While the strength of the Forces is being run down some loss of efficiency will be inevitable, and we do not think it right to add to this by increasing training commitments and losing a large part of a man's service when he is of greatest value."

Regarding the projected reduction of the total strength of the Forces to 375,000 men, Mr. Sandys explained that about one-fifth of these would be for the Royal Navy, two-fifths for the Army, and rather less than two-fifths for the R.A.F. Although voluntary recruiting must always be a little uncertain, the Government had every reason to expect that the required numbers would be obtained. The proposed contraction of the Forces would inevitably create redundancy problems among officers and senior "other ranks," and in general those most affected would be officers in the middle range—e.g. in the Army, majors and lieutenant-colonels. Although it was impossible at present to calculate precisely the total number affected, it was estimated that the surplus of the three Services might be 5,000-7,000 officers and about half as many warrant officers and n.c.o.'s. The Government's aim would be to reduce the number of officers and n.c.o.'s progressively as the Forces contracted, and they had in mind compensation based on (i) special lump sum payments; (ii) a relaxation of the qualifying conditions for retired pay and pensions in favour of those who left the Service prematurely under the scheme.

Mr. Sandys concluded by referring to suggestions that, as it was proposed to reduce the Forces to a combined strength which was less than the present strength of the Army alone, it might be unnecessary to retain three Service departments. He said in this connexion: "We should not lightly embark upon major changes in the structure of the fighting Services and their relations with one another. Nevertheless the Government recognize that with the reduction in the size of the Forces, and the changed characters of their weapons, the question of some measure of integration or closer co-ordination must be seriously considered. This we are now doing. . . . Meanwhile the Service Ministers and I have set up machinery to carry out a comprehensive review of the administration aspects of this question. The object is to reduce the number of headquarters, depots, and establishments of all kinds, and to eliminate overlapping between the Services. This administrative overhaul is a big task, and I am convinced it will not produce effective results unless it is directed from a high level by a combined inter-Service organism. I have therefore set up a Defence Administration Committee under the chairmanship of the Permanent Secretary to the Ministry of Defence. The other members are the Permanent Secretaries of the three Service Departments and of the Ministry of Supply, together

with Service members of the Board of Admiralty and of the Army and Air Councils, who will attend when matters affecting their responsibilities are being discussed. The committee will have a small staff of its own of senior officers and officials who can, when necessary, be sent out to study particular problems in Commands at home or overseas."

The principal Opposition speakers in the debate were Mr. George Brown (the Labour Party's spokesman on Defence matters, who moved the Opposition amendment), Mr. Crossman, Mr. Shinwell, and Mr. Strachey.

Mr. Brown, referring to disagreements within the Labour Party on the question of hydrogen bomb tests, maintained that such differences were "inevitable when defence is in a state where many people are uncertain where certain courses of action will lead." Describing the Government's recognition of the "realities of the nuclear situation" as "long overdue," he asserted that every one of the rapid succession of Defence Ministers had "felt that he must start all over again," with the result that nearly £8,000,000,000 had been wasted. Even now, he added, many decisions inherent in the resolve to end National Service had not been taken, e.g. the BAOR would have to be cut considerably, and there would also have to be a vast change in army structure and divisional formations if the "new model" Regular Army were to do its job efficiently. The failure to make provision for such changes, he contended, was "a fundamental omission from the White Paper," and the Government, by approaching the whole question of Defence reorganization as an economy measure and not as a planned military operation, had encouraged the feeling abroad that they had bypassed NATO and made a unilateral decision which was not in keeping with the spirit of the alliance.

Turning to the question of the manufacture and testing of the hydrogen bomb, Mr. Brown said: "The problem of the ultimate deterrent, the conditions in which it is used, the influence it has on other weapons, and the impact upon foreign policy, is an issue on which there is the gravest division in the nation. I stand by what I said in the past, but I am bound to take account of the great movement of opinion in the last two years. In his attempt to deal with the problem of the ultimate deterrent . . . the Minister is as uncertain as anyone. People are bound to be worried and divided because of the uncertainty of life or of what will happen to future generations. My approach is that of someone who is prepared to defend the view that Britain should have the nuclear deterrent. But we do not know what we are doing, or the consequences, or whether we might be using the devil's means to interfere with the Creator's purpose. It is no use pretending that we do."

After stressing the importance of taking into account public opinion on the subject, Mr. Brown warned the Government that unless it were shown that degrees of deterrent were available and that Britain might hope to employ one without being blown up herself, "it might be found that we had all the weapons, all the means of delivering the deterrent, and yet it would be no deterrent at all because no-one would believe we should have the will to employ it when the day came."

Mr. Brown concluded: "For a long time the Government have refused obstinately to face nuclear realities. Now they have become so obsessed by the desire for economy that they have rushed into an uncharted field. We need to make the most careful appraisal of the kind of forces and weapons which must be maintained if we are to have this deterrent approach. This the Government have not yet done . . . They have rushed a whole lot of fences to get £70,000,000 worth of economies into this year. As a result, they have left Britain gravely unprepared for the risks she could face, gravely overprepared for the one thing she never wants to face, and vastly dependent on other people for policy decisions of the gravest import to us."

Mr. Shinwell said that while the Labour Party officially accepted the need to produce the hydrogen bomb, there were differences of opinion within the party as to whether the bomb, when produced, should be tested. In consequence, the Parliamentary Labour Party had asked the Government to postpone the Christmas Island tests for a limited period (see page 15544) in order to ascertain whether the U.S.S.R. and the United States would make a favourable response. Mr. Shinwell argued that this was the right approach in the circumstances, and declared that he could "imagine a situation where it might be more endurable to suffer defeat and humiliation in a conventional war than take the risk of using nuclear weapons and being completely destroyed." He urged the Government to proceed with conventional forces and weapons; to streamline the Services and give them mobility and effective striking power; and to "keep in the background the dread possibility that we might some day have to use the so-called deterrent actively in retaliation."

Mr. Crossman said that he had come to the conclusion that the right defence policy for Britain was, in collaboration with France and Western Germany, to "opt out" of the nuclear arms race and renounce all nuclear weapons. "If we want to secure peace," he declared, "we shall have more chance of doing so if we renounce them than we should by having them." Instead, however, the Government's White Paper policy was "leading the Gadarene swine down the slope," and their decision would make every other major country feel that it must do the same.

Mr. Strachey warned the Government that there was little chance that a war in which tactical weapons were used would stop short at that point, as it seemed "more and more likely" that such a war would "go to the ultimate lengths and involve the use of the ultimate weapons of mass destruction." He argued that the White Paper placed far too much emphasis on the "nuclear deterrent" and underestimated the "vitally important role of efficient, mobile, conventional forces." Britain must not "get into the tragic dilemma that, faced by some frontier episode, she must either accept a small but perhaps vital *fait accompli* or blow up the world."

Details of the Government's proposals for the ending of National Service were given by the Minister of Labour on the second day of the debate (April 17), in the course of a statement on the probable effects of the new Defence Policy on the employment situation.

Mr. Macleod first pointed out that the changes announced in the White Paper and the consequent curtailment of defence production would mean that many people would have to find new jobs and even move to new localities. Since 1953, he pointed out, the number employed on defence work had already fallen by 200,000, including a fall of 70,000 in 1956. The reductions in 1957 would probably be much less than this, and would include cuts of 5,000-6,000 and 15,000 respectively in the numbers employed by ordnance factories and in the aircraft industry, while a further 7,000 workers would probably become available through reductions in Admiralty contracts. Although the nation's economy, and especially the export trade, would benefit from the reduction in the burden of defence expenditure, there would be concern about the effects on employment, particularly in areas where alternative work was not easy to find.

The Government had therefore arranged for close consultation between the Supply Departments, the Board of Trade, and the Ministry of Labour to ensure that workers were absorbed into other employment as soon as possible. Where there was some scope for choice as to where cuts should be made, labour considerations would be given full weight; and where there was no alternative to a significant reduction in the size of the labour force, the Government would try to ensure that the longest possible notice was given by the Supply Departments and the Board of Trade to his Ministry to enable arrangements to be made with the firms concerned to find new tenants, where appropriate, for the factories. "I am confident," the Minister declared, "that the great majority of these people are going to be quickly absorbed into other employment. A recent report estimated that by 1959 there would be vacancies in manufacturing industry for 37 per cent more qualified scientists and engineers than in 1956, while last month there were 4,000 vacancies for draughtsmen, 20,000 for skilled engineers, and 40,000 in the metal-using industries . . ."

Turning to the arrangements for helping ex-Regulars to find employment, Mr. Macleod said that over half the "other ranks" who registered with local Ministry of Labour offices in 1956 were found employment before their terminal leave expired, while most of the remainder found employment shortly afterwards. Of the "scores of thousands" who left the Services during the year, only 97 had been unemployed for more than 12 weeks on Jan. 9, 1957. The problem of finding suitable employment for officers, who naturally tended to look for employment at managerial or executive level, was more difficult, but arrangements were being made to provide appointment services at 40 of the larger employment exchanges; in addition, there would be the Ministry of Labour's business training schemes, whilst valuable assistance would be given by the officers' association and the national associations for the employment of ex-Regulars. Another problem was the finding of living accommodation, but over 90 per cent of local housing authorities had stated that they were prepared to relax residential qualifications for ex-Regulars who had found employment or had family connexions in their districts. What was required was not the establishment of new machinery but the adaptation of old; the Government were having existing arrangements examined by an inter-departmental committee of officials and would carefully consider any measures deemed necessary. "It is an essential part of the Government's conception," Mr. Macleod stressed, "that a man making his career for part of his life in the Regular forces should have confidence in his ability at the end of his service to obtain suitable and congenial work."

Dealing with National Service, Mr. Macleod said: "Under the existing National Service Acts I have the power to call up men born before the end of 1940. This power continues so long as they are within the age-limits of liability. But I have no power under existing legislation to call up men born after 1940, and the Government has decided it is not necessary to amend the present Acts to give me that power. Men born in 1941 or later will not, therefore, be brought into the call-up field. So we are left with the men at present liable. We estimate that we could, if necessary, call up between now and the end of 1960, some 570,000 fit men. Of that total, 330,000 have not yet registered for National Service. The remaining 240,000 are older people, either in process of call-up or who will become available following a period of deferment. Against this figure of 570,000 we have to set the total demand of the Forces for National Servicemen over the same period. It is unlikely, so far as we can foresee at the moment, that we will need much more than half the potential field. That leaves a surplus of at least 250,000 . . ."

It would be impracticable and unfair (the Minister went on), to try to meet the situation by a wholesale extension of deferments on industrial grounds; unless they could find a way of maintaining the principle of universal service while reducing the surplus to manageable proportions, they would have to rely on a ballot. Now, however, that a date had been fixed for the ending of National Service, the Government rejected the ballot method as a solution.

"The present position," Mr. Macleod explained, "is that men born before October 1938 have already registered and those due for National Service are either in deferment or in process of being called up. The Government intend to rely to a considerable extent on men who have enjoyed the advantages of deferment to complete training or studies and whose contemporaries have been called up for military service. But if the Government were to rely on these older and more highly skilled men alone, there would be the difficulty—apart from the fact that their numbers are not sufficient—that in the terminal years of National Service the people called up would be the skilled or trained men, many of whom would be employed on routine tasks which the country would regard as a wasteful process. So we intend to supplement them by younger men, of whom about 30,000 become immediately available from each quarter's registration. Men born in the last quarter of 1938 are due to register next month and we shall call as necessary on men born in 1939, who have not yet registered. I cannot tell the House exactly how far into the 1939 age-group it will be necessary to go. So far as men born in 1940 are concerned, we are planning on the basis that although they may remain legally liable for service, they need not expect to be called up. I do not intend to ask for power to call up those born in 1941 or later years. The 1939 class will be needed . . ."

To carry out the scheme (Mr. Macleod explained) the register from which men were posted to the Forces would be divided into two sections: (1) for men who had had deferment and became available for call-up after successfully completing their training or studies; (2) for younger men not eligible for deferment. Within each section call-up would proceed as at present and the existing arrangements for deferment would continue. The new scheme would come into operation on April 1, 1958, and it was unlikely that the next group for call-up—men born in the first quarter of 1939—would be asked to register until early in 1958. He hoped to be able to announce, long before the end of 1960, that it would not be necessary to call up any more men beyond those already in process of being called up.

The debate was wound up by the Prime Minister.

Mr. Macmillan stressed that questions of the size and character of the forces must necessarily depend on the nature of the weapons with which they were to be armed. He added: "If we are to accept anything like a cut of nearly half in the manpower of our Forces, and pin ourselves on the determination to raise all-Regular forces, it is clear that not only must forces be made mobile by the provision of modern transport, but they must be armed and backed by the most effective weapons available. Therefore, whether we like it or not, the decision on weapons governs the whole issue. For without the nuclear deterrent it is obvious that a reduction of forces of this kind becomes impossible, and, indeed, much larger forces would be required if we were to rely entirely on conventional forces. In that case there is no hope of raising the necessary men on a voluntary basis, and it is all over with any chance of abolishing conscription . . . The fundamental question which the House must face, without vacillation, is whether or not the nuclear deterrent is to form the basis of British defence planning. If this is not faced, no-one, except perhaps a genuine pacifist, has the right to urge the ending of National Service. Short of general disarmament, the ending of conscription must depend on the acceptance of nuclear weapons."

Referring to the clause in the Opposition amendment regretting "undue dependence on the ultimate deterrent" on which Government policy seemed to be based, Mr. Macmillan said: "It seems to me that you must either depend on the deterrent to stop global war, or not depend on it. It is quite true that to prevent the dangers of infiltration, or the gradual seepage by aggressive forces into neighbouring territories without actually bringing into play a massive counter-attack, conventional forces are necessary, as, of course, they are necessary for our manifold commitments overseas. It may well be that these forces, especially in Europe, will have, as they have already, an element of tactical atomic weapons. They serve a double purpose. Their first purpose is to prevent some minor frontier incident developing into a serious situation. But they have a second purpose. If a really major attack were developed, if the enemy was determined to launch a major war with the aim of absolute victory—then these forces must be able to hold the position long enough for the nuclear counter-measures to become effective.

"I want to make it clear here, and I hope overseas, that in making a reduction in the actual number of men we shall have in Europe, I do not believe we shall be reducing the striking power of our forces. In replanning our contribution to NATO we propose to make a very small reduction in the teeth; to give them more bite; and, by various means, to make drastic reductions in the tail . . .

"Those who carry responsibility, and even those who aspire to responsibility, must make decisions, and on this matter a decision must be made now. Individuals, private persons, can enjoy the luxury of vacillation, but those who govern, or wish to govern, must boldly proclaim their opinion and act in accordance with duty."

Describing the Opposition's amendment as an unsatisfactory compromise between "those who wish Britain to give a lead by abandoning nuclear tests and reliance on nuclear weapons, and those who believe that possession of the nuclear deterrent is the only way to prevent a global war," Mr. Macmillan argued that if the tests of the hydrogen bomb were abandoned now they would never be held. He added: "Let no-one think that if nuclear weapons were banned it would be possible to continue wars with conventional weapons. We must strive for full disarmament—unconventional and conventional weapons alike. Until that comes we have only two choices. We must rely on the nuclear deterrent or throw up the sponge."

The Prime Minister concluded by stressing that the Government fully supported the proposals put forward by Mr. Stassen in the U.N. Disarmament sub-committee (see page 14583). It believed, moreover, that the area of agreement between the major Powers might be widened as the work of the sub-committee proceeded, since the atmosphere seemed better and less polemical than in recent years. (Times - Daily Telegraph)

(Prev. rep. Defence White Paper, 15493 A.)

A. AUSTRIA - SOVIET UNION. — M. Mikoyan's Visit to Vienna. - Discussions with Austrian Leaders.

M. Mikoyan, First Deputy Premier in the Soviet Council of Ministers, visited Austria from April 23-27 as the guest of the Austrian Government, this being the first official visit by a Soviet leader since the conclusion of the Austrian State Treaty. During his stay in Vienna M. Mikoyan had discussions with Dr. Raab (the Federal Chancellor) and other Austrian Ministers, and also met businessmen, scientists, and artists, as well as provincial leaders. He also toured many parts of Austria outside the capital.

A communiqué issued on April 27 said that M. Mikoyan's visit and the "ensuing frank exchange of views" had "helped to reaffirm the friendly relations established during the Austrian delegation's journey to Moscow" (see 11151 A); that both sides had stressed the supreme need of maintaining world peace; and that the Austrian Ministers had emphasized Austria's "concern for the maintenance of good relations with all neighbouring States in accordance with Austria's traditions."

The statement also declared that both sides had agreed that Austria, "with sound co-operation from the appropriate Soviet institutions, was duly and accurately carrying out her deliveries under the State Treaty." It was felt, however, that the present volume of Soviet-Austrian trade was "not fully satisfactory," and it had been agreed that early negotiations should be held on the question of expanding Austro-Soviet trade exchanges. It had also been agreed to extend cultural contacts between the two countries.

It was further stated that Dr. Raab had asked M. Mikoyan to use his influence to make possible the early repatriation from the Soviet Union of all Austrians who wished to return home. M. Mikoyan had promised that if there were still any Austrian citizens on Soviet territory, their requests for repatriation would be granted.

In conclusion, the communiqué stated that M. Mikoyan had invited Dr. Raab, as well as Dr. Schärf (the former Vice-Chancellor and now President), Dr. Figl (Foreign Minister), and Dr. Kreisky (State Secretary for Foreign Affairs) to visit the Soviet Union.

In a press statement before leaving Vienna, M. Mikoyan spoke of the "spirit of friendly frankness and mutual understanding" which had characterized his talks with the Austrian Ministers. After referring to Austria's permanent neutrality, which enabled her "to stand aloof from military blocs and avoid the heavy burden of the arms race," he added: "We know that there are forces inside Austria, and especially beyond her frontiers, which are trying to drive Austria off the neutral path. We therefore attach great significance to the statement made by the Austrian Government during our talks that Austria will strictly adhere to the principles of permanent neutrality. As for the Soviet Union, I can declare that our Government will give unswerving support to the neutrality and independence of Austria."

Dr. Raab, speaking at St. Pölten on April 27, stated that there were good prospects that the Russians would now meet Austrian interests in the matter of the free oil deliveries to the U.S.S.R. under the State Treaty. It was hoped that other types of goods could be substituted for part of the oil deliveries, thereby relieving the strain on Austria's fuel economy. (Wiener Zeitung - Soviet Embassy Press Department, London)

(Prev. rep. State Treaty, 14331 C; Austrian Deliveries to U.S.S.R., 15058 B.)

B. EUROPEAN TRANSPORT. — Loan Issue for Eurofima Company.

A 4½ per cent loan of 30,000,000 Swiss francs by Eurofima (the European Company for the Financing of Railway Stock) was issued for public subscription on the Swiss market from April 26 to May 3. The loan, the first of its kind, will be used for financing orders placed by the company for goods-wagons; it was stated that 2,000 of these had already been ordered, with an order for another 2,000 in preparation.

A conference of European Transport Ministers opened in Paris on May 16 to consider *inter alia* the effect of the European Common Market project on the transport policies and systems of non-member countries, the financial position of European railway undertakings, questions of tariff policy, and general traffic policy.—(Neue Zürcher Zeitung - Le Monde, Paris)

(Prev. rep. Eurofima, 15283 B.)

A. UNITED STATES. — Vice-President Nixon's African Tour. - Report to President Eisenhower.

Vice-President Nixon left Washington on Feb. 28 for a three-week "goodwill" tour of eight African countries. The original purpose of the journey was for Mr. Nixon to represent President Eisenhower at the Ghana independence celebrations (see 15427 A), but its scope was later extended as a means of emphasizing American recognition of the increasing importance of Africa in world affairs.

After visiting Rabat on March 1-2, where he discussed with Sultan Mohammed V the question of Moroccan economic development and the future of U.S. bases in Morocco, Mr. Nixon arrived in Accra on March 3 to represent the U.S. Government at the Ghana independence ceremonies (March 6). In a subsequent press statement he said that he had been deeply impressed by the way Britain had trained Africans for self-government, and by the striking progress in the field of African education. On March 7 Mr. Nixon proceeded to Monrovia for talks with President Tubman of Liberia on increased American aid to that country.

After a brief stay at Entebbe (Uganda) on March 10, Mr. Nixon visited Addis Ababa on March 11-12 for talks with the Emperor Haile Selassie.

At a press conference on March 12 Mr. Nixon stated that the discussions had dealt with U.S. military and economic assistance to Ethiopia, the question of the Suez Canal and Ethiopia's "great stake" in its reopening, the "Eisenhower doctrine," the Somali-Ethiopian boundary dispute, and the prospects for quadripartite development of the Nile. It was authoritatively stated in Washington on the same date that the U.S. Government had requested permission to establish an Air Force communications centre in Ethiopia and to make use of the anchorage at Massawa, on the Red Sea. The Ethiopian Foreign Minister (Ato Aklilu Abtewold) said on March 12 that, in return for Ethiopian collaboration with the United States "on an equal footing," the Emperor had stressed the need for increased U.S. military aid, notably in building up the Ethiopian Air Force.

On March 13 Mr. Nixon had talks in Khartoum with the Sudanese Prime Minister and Foreign Minister, respectively Mr. Khalil and Mr. Mahgoub.

Mr. Nixon said later that he had explained that U.S. aid and the "Eisenhower doctrine" were designed to strengthen the independence of sovereign nations. Mr. Khalil, while making no firm commitment, had emphasized that the Sudan would welcome assistance provided there were no conditions limiting Sudanese sovereignty. Mr. Azhari, the Leader of the Opposition and former Prime Minister, declined an invitation to meet Mr. Nixon.

During Mr. Nixon's visit to Tripoli (March 14-15) the Libyan Prime Minister, Mustapha Ben Halim, indicated Libya's endorsement of the "Eisenhower doctrine."

The Libyan Premier said at a dinner in Mr. Nixon's honour that the Eisenhower doctrine "is aimed at assisting us to maintain our independence in the face of any attempt to sabotage that independence, and is not just another form of imperialism. We are aware that Communism is 'public enemy No. 1' and that all measures possible should be taken to counter it."

After a visit to Rome (March 16-17), where he met the Italian Prime Minister and Foreign Minister (Signor Segni and Dr. Martino) and had an audience with the Pope, Mr. Nixon arrived on March 8 in Tunis, where he was received by the Bey and had talks with the Prime Minister, M. Bourguiba.

Mr. Nixon's report to President Eisenhower on his tour was issued in Washington on April 6, after his return from North Africa. It was worded as follows:

"No-one can travel in Africa, even briefly as I did, without realizing the tremendous potentialities of this great continent. Africa is the most rapidly changing area in the world today. The course of its development, as its people continue to emerge from a colonial status and assume the responsibilities of independence and self-government, could well prove to be the decisive factor in the conflict between the forces of freedom and international Communism.

"The leaders and peoples of the countries I visited in Africa have many things in common. They cherish their independence, which most of them have only recently acquired, and are determined to protect it against any form of foreign domination. They rightfully expect recognition of their dignity and equality as individuals and peoples in the family of nations. They want economic progress for their undeveloped economies.

"The great question which is presented to the leaders of Africa is whether they can attain these justifiable objectives and at the same time maintain and develop governmental institutions which are based on principles of freedom and democracy. I believe they are all convinced that they can, and that the free world has a vital interest in assisting them to do so. The success or failure of these new members of the family of nations to realize their aspirations in this manner will have profound effects upon the development of Africa and on the world in the years to come. Herein lies the wider significance of the new nation of Ghana . . .

"Africa is emerging as one of the great forces in the world today. In a world in which, because of advances in technology, the influence of ideas and principles is becoming increasingly important in the battle for men's minds, we in the United States must come to know, to understand, and to find common ground with the peoples of this great continent."

After stressing that the present leaders of the countries he had visited "certainly compare most favourably with the great leaders of the world," Mr. Nixon continued:

"The United States must come to know these leaders better, to understand their hopes and aspirations, and to support them in their plans and programmes for strengthening their own nations and contributing to world peace and stability. To this end, we must encourage the greatest possible interchange of persons and ideas with the leaders and peoples of these countries. We must assure the strongest possible diplomatic and consular representation . . . and stand ready to consult these countries on all matters affecting their interests and ours.

"There is no area in the world today in which the prestige of the United States is more uniformly high than in the countries which I visited. The President is respected as the acknowledged leader of the free world. There is a most encouraging understanding of our programmes and policies. These countries know that we have no ambitions to dominate, and that the cornerstone of our foreign policy is to assist countries in resisting domination by others. They understand that the American doctrine for the Middle East is dedicated to the principle of assisting the States of the Middle East to maintain their independence. They know that the U.S.A. stands for the evolution of dependent peoples toward self-government and independence, as they become able to discharge the responsibilities involved. This understanding of the principles for which we stand as a nation is a tremendous asset to us in this area."

Dealing with the importance of U.S. economic assistance to the new independent countries of Africa, Mr. Nixon declared:

"Africa is a priority target for the international Communist movement . . . The Communist leaders consider Africa today to be as important in their designs for world conquest as they considered China to be 25 years ago. Consequently, they are mounting a diplomatic propaganda and economic offensive in all parts of the continent. They are trying desperately to convince the peoples of Africa that they support more strongly than we do their natural aspirations for independence, equality, and economic progress.

"Fortunately, their efforts thus far have not been generally successful and, for the present, Communist domination in the States of the area is not a present danger. All the African leaders to whom I talked are determined to maintain their independence against Communism or any other form of foreign domination. They have taken steps to bring under control subversion of their political, economic and social life.

"It would be a great mistake, however, to be complacent about this situation, because the Communists are without question putting their top men in the fields of diplomacy, intrigue, and subversion into the African area to probe for openings which they can exploit for their own selfish and disruptive ends."

Mr. Nixon also said that he had talked to leading labour leaders wherever possible, summing up his impressions as follows: "I was encouraged to find that the free trade union movement is making great advances in Africa, particularly in Ghana, Morocco, and Tunisia. The leaders of these countries have recognized the importance of providing an alternative to Communist-dominated unions, and they are thereby keeping the Communists from getting a foothold in one of their favourite areas of exploitation."

In order to maintain the present high prestige of the U.S.A. in Africa, and effectively to counteract Communist influence, Vice-President Nixon made the following recommendations:

(1) Everything should be done to hasten the ending of racial discrimination in the U.S.A. "We cannot talk equality to the peoples of Africa and Asia and practice inequality in the United States."

(2) U.S economic assistance programmes should be approved only when they were in the mutual interest of the U.S.A. and the recipient country, and should be concentrated more than hitherto on key projects.

(3) The U.S.A. should encourage wider private investment in Africa and support the grant of loans by such international bodies as the World Bank. Mr. Nixon said in this connexion that all the leaders he had seen had expressed preference for developing their economies through encouraging the investment of private capital, and through loans from international agencies such as the World Bank, rather than through Government-to-Government grants.

(4) U.S. diplomatic and consular missions, which were "generally under-staffed," should have sufficient personnel for their tasks and "sufficient funds to enable them to travel about the vast territories within their jurisdiction" in order to report on developments outside the major centres of population and to make contact with the peoples of those areas. In staffing these posts "the emphasis should be on youth, vigour, and enthusiasm."

(5) A substantial increase in the funds for libraries and reading rooms in overseas centres, for exchanges of students, and for bringing Africans to the U.S.A. for study and travel, as well as assistance in developing indigenous educational facilities in Africa.

(6) An improvement in U.S. radio and news programmes for the African area.

(7) A Bureau of African Affairs should be set up in the State Department, and similar bureaux created in the International Co-operation Administration and the U.S. Information Agency. U.S. diplomatic missions in Africa should also be strengthened.

As regards the special relations between the European and African countries, Mr. Nixon commented: "Africa and Europe have much in common. To a large extent their economies are complementary. Certain of the independent States on the African continent maintain close historical, cultural and economic ties with the States of Europe. The maintenance of these relationships, on a basis of equality, can greatly benefit both Africa and Europe. We should encourage the continuance of these special ties where they are considered mutually advantageous by the States concerned..." (New York Times)

(Prev. rep. Vice-President Nixon, 15297 A.)

A. UNITED KINGDOM. — Municipal Elections.

Polling took place on May 9 for one-third of the seats in 357 of the 401 English and Welsh boroughs, the remaining vacancies being filled by unopposed returns. There were no elections in the London metropolitan boroughs, where the complete councils are elected every three years and the next elections are not due until 1959.

Final results of the borough council elections showed that Labour had gained 202 seats and the Liberals 11 seats, while the Conservatives and Independents lost 176 and 36 seats respectively. Detailed figures were as follows:

	Gains	Losses	Net gains (+) or losses (—)
Conservatives	57	233	—176
Labour	261	59	+202
Liberals	30	19	+ 11
Independents	45	81	— 36
Communists	—	1	— 1

Labour gained control of 12 boroughs (Banbury, Bridgwater, Brighouse, Dover, Gloucester, Keighley, Llanidloes, Lowestoft, Middleton, Northampton, Watford, and Widnes) but lost control at Chard (Somerset) to the Independents. The Conservatives lost their former overall control at Chatham, Thetford, and Wallasey; Labour lost overall control at Colchester; and the Liberals lost their former control at Mossley (Lancs.). There was no change in the control of the large cities. Polling varied in different parts of England and Wales, being substantial in some areas but low in others.

Urban and Rural District Council Elections.

Elections for one-third of the seats on 423 urban district councils and 139 rural district councils in England and Wales also took place between May 6 and May 11.

The Labour Party claimed a net gain of 83 seats in the urban district councils (144 gains, 61 losses) and of 25 seats in the rural district councils (32 gains, 7 losses). The Conservative Central Office stated that Conservative and Conservative-supported candidates had gained 23 seats and lost 37 in the U.D.C. elections, Labour had gained 39 and lost 26, the Liberals had gained one and lost none, and Independents had gained 11 and lost 11.

Among the places where Labour gained control were Billericay (Essex), Canvey Island (Essex), Portslade-on-Sea (Sussex), Mexborough (West Riding), and Stroud (Glos.). Anti-Labour parties gained control from Labour at Ammanford (Carmarthenshire), Chesham (Bucks.), Chepstow (Mon.), Melksham (Wilts.), and Wolverton (Bucks.). The Liberals gained control from the Conservatives at Royton (Lancs.).

Scottish Municipal Elections.

Municipal elections were held on May 6 in about 150 Scottish cities and burghs, the Labour Party claiming a net gain of 23 seats—36 gains and 13 losses. Labour lost control at Kirkcaldy, Motherwell, and Wishaw but gained control at Paisley, Campbeltown, Musselburgh, and Newmilns. Labour's biggest gain was at Clydebank (where there was a general municipal election after a redistribution of wards), the party winning all 21 seats on the council and displacing six Independents and a Communist. There was no change in the leading cities, Labour remaining in control at Glasgow, Aberdeen and Dundee and the Moderates in Edinburgh.

Only 11,000 votes were cast for 27 Scottish Nationalist candidates, who won two seats (at Stirling and Rothesay) but polled negligibly in Glasgow and Edinburgh, where many Nationalist candidates stood for election. The Communists also polled poorly, losing seats in Greenock and Clydebank and dropping votes in Glasgow, Dundee, and Cowdenbeath, where, however, they retained one seat.

Polling in Scotland averaged about 50 per cent but was very low in a number of areas—notably in Glasgow, where only 28 per cent of the electors voted, the lowest figure for any municipal election in that city.—(Times - Daily Telegraph - Manchester Guardian - Daily Herald - News Chronicle - The Scotsman, Edinburgh) **(Prev. rep. 14877 A.)**

B. SHIPPING. — World Launchings in 1956. - Construction in First Quarter of 1957.

Lloyd's Register annual summary of merchant shipbuilding, published on Feb. 27, gave the number of ships launched throughout the world in 1956 (excluding ships launched in the U.S.S.R. and China, or under 100 gross tons) as 1,837, aggregating 6,673,701 gross tons, compared with 1,447 ships aggregating 5,316,742 gross tons launched in 1955.

The largest volume of tonnage (1,776,429 gross tons, or 26.17 per cent of the world total) was launched in Japan, which more than doubled her 1955 figure of 828,730 tons. Other principal shipbuilding countries were: Great Britain and Northern Ireland 1,383,387 tons (20.72 per cent of world launchings); West Germany 1,000,498 tons (14.99 per cent); Sweden 489,157 tons (7.33 per cent); the Netherlands 449,899 tons (6.74 per cent); Italy 358,006 tons (5.36 per cent); France 299,034 tons (4.18 per cent); Norway 171,510 tons (2.57 per cent); the U.S.A. 169,076 tons (2.53 per cent); Denmark 130,255 tons (1.95 per cent); Poland 103,784 tons (1.56 per cent); Spain 93,878 tons (1.41 per cent); Belgium 92,292 tons (1.38 per cent). The total included 1 steamer of over 40,000 tons launched in Japan, 1 steamer of 30,000-40,000 tons each launched in the U.K. and in France; and 7 steamers of 25,000-30,000 tons launched in Japan, 2 in the U.K., and 1 in the U.S.A.

Oil tankers launched throughout the world numbered 233, of 2,267,063 gross tons. They included 62 (772,683 tons) in Japan, 46 (518,126 tons) in the U.K., 17 (197,774 tons) in Sweden, 9 (149,734 tons) in the U.S.A., 9 (142,903 tons) in the Netherlands, 9 (128,291 tons) in Italy, and 6 (103,885 tons) in France.

Lloyd's Register shipbuilding returns for the first quarter of 1957, published on April 24, gave the gross tonnage under construction throughout the world (with the usual exceptions, as above) as 8,381,697 tons, of which 24.89 per cent was building in the United Kingdom and 75.11 per cent elsewhere.

Ships building in Great Britain and N. Ireland numbered 348 of 2,086,262 tons (steamers 951,797 tons, motorships 1,134,465 tons), including 4 steamers of 25,000-30,000 tons and 19 of 20,000-25,000 tons. Of the total, 275 ships (1,619,252 tons) were building for Great Britain and N. Ireland, 16 (31,355 tons) for other British Commonwealth countries, 18 (175,068 tons) for Liberia, 12 (136,450 tons) for Norway, 3 (32,950 tons) for Greece, 4 (31,910 tons) for the Irish Republic, 1 (17,900 tons) for Panama, 12 (8,180 tons) for the U.S.S.R., 1 (6,687 tons) for Nicaragua, 1 (2,500 tons) for Cuba, 1 small vessel for Iraq, and 4 ships (20,520 tons) for unnamed countries. Principal shipbuilding centres were: the Clyde (105 ships of 651,189 tons), the Tyne (41 ships of 399,644 tons), the Tees (22 ships of 234,328 tons), Sunderland (27 ships of 206,473 tons), Belfast (16 ships of 199,940 tons), and Liverpool (16 ships of 153,593 tons).

Ships building abroad numbered 1,250 of 6,295,435 tons (steamers 2,450,871 tons, motorships 3,844,564 tons), divided as follows: Japan 161 (1,433,835 tons), Germany 238 (856,914 tons), Italy 84 (668,060 tons), the Netherlands 184 (600,642 tons), France 63 (494,019 tons), Sweden 62 (482,226 tons), U.S.A. 35 (365,445 tons), Norway 79 (290,101 tons), Spain 88 (207,927 tons), Denmark 30 (154,138 tons), Belgium 16 (151,280 tons), British Commonwealth countries 47 (150,745 tons), Finland 52 (149,521 tons), Poland 56 (129,467 tons), Yugoslavia 26 (124,996 tons), Portugal 15 (20,054 tons), Turkey 8 (7,741 tons), Peru 1 (4,297 tons), Argentina 1 (1,600 tons), and 1 small vessel each in Indonesia, Iceland, Hungary, and the Irish Republic. The total included 2 steamers of over 30,000 tons in France, 2 in Japan, and 1 each in Italy and the Netherlands; and 11 steamers of 25,000-30,000 tons in Japan, 2 each in Sweden and the U.S.A., and 1 in France.

Tankers building throughout the world numbered 277 of 3,729,134 tons, including 68 (877,110 tons) in Great Britain and N. Ireland, 50 (832,290 tons) in Japan, 17 (306,190 tons) in Sweden, 20 (305,440 tons) in Italy, 15 (296,650 tons) in France, 13 (271,190 tons) in the U.S.A., 14 (218,200 tons) in the Netherlands, and 20 (209,173 tons) in Norway.

The Canadian Pacific liner *Empress of England* (25,000 tons, see 15338 A), sailed from Liverpool on April 18 on her maiden voyage to Canada. On May 7 the Israeli liner *Theodor Herzl* (10,000 tons), built at the Deutsche Werft yard at Hamburg for the Zim Navigation Company under the Israeli-German reparations agreement (see 12621 A), sailed from London on her maiden voyage to Haifa.—(Lloyd's Register of Shipping)

(Prev. rep. 15338 A.)

C. ETHIOPIA. — Death of Duke of Harar.

The Duke of Harar, second son of the Emperor Haile Selassie, was killed in a motor accident some 50 miles from Addis Ababa on May 12.

Prince Makonnen, Duke of Harar, was born in 1923 and during the Emperor's exile in Britain first lived with his parents in Bath, where he went to school, and later proceeded to Wellington College before attending the Soba Military Academy in Khartoum. He married in 1946 and had five sons. He revisited Britain in 1951 and 1954, on the latter occasion accompanying the Emperor Haile Selassie on his State visit.

The Duke was Governor of Harar Province, which adjoins British Somaliland and the Italian trust territory of Somalia. (Times - Daily Telegraph) **(Prev. rep. 14026 D.)**

A. EGYPT. — "Egyptianization" of Foreign Banks, Insurance Companies, and Manufacturers' Agencies. - Taking-over of British and French Concerns. - Sequestration of Anglo-Egyptian Oilfields Ltd. - Creation of Egyptian Economic Organization.

Three decree-laws ordering the "Egyptianization" of foreign banks, foreign insurance companies, and sales agencies in Egypt of foreign manufacturers or exporters, were signed by President Nasser on Jan. 31. They laid down that all these concerns would have to become Egyptian limited companies, that all shares therein must be owned by Egyptians, that all directors and senior administrators must be Egyptian by birth, and that the Minister of Finance would be empowered to fix a period (not exceeding five years) for implementing the decrees. The agencies within the scope of the third decree were defined as those of "a purely commercial nature based on monopolistic representation or upon sales against commission." [Foreign industrial establishments in Egypt were thus excluded.] No mention was made of the payment of compensation for sequestrated British and French banks and insurance companies, although the Minister of Finance (Dr. Kaissouny) had previously announced that "fair compensation" would be paid to the owners of "Egyptianized" firms.

In this latter statement (made on Jan 15) Dr. Kaissouny had announced the Government's intention of "Egyptianizing" all British and French banks and insurance companies immediately, and those of other countries within five years. He also announced that all agents of foreign manufacturers in Egypt would have to be Egyptian citizens, although the Government might in certain cases allow foreign nationals to continue as agents for another five years. After giving assurances that fair compensation would be determined by a judicial body, Dr. Kaissouny said that the "Egyptianization" measures would not affect the rights of depositors in the banks or of persons insured with the insurance companies concerned. He justified the taking-over of "enemy" banks and insurance companies by alleging that they had been carrying out "policies drawn up for them in London and Paris" regardless of whether or not they were in the interests of the Egyptian national economy.

British banks affected by the "Egyptianization" decree were Barclays (Dominion, Colonial and Overseas), with some 40 branches in Egypt, the Ottoman Bank (13 branches), the Ionian Bank (eight branches), and the Commercial Bank of the Near East (three branches). The French banks affected were the *Crédit Lyonnais, Crédit Foncier Egyptien, Crédit d'Orient, Banque des Monts-de-Piété,* and the *Comptoir d'Escompte de Paris.* All nine banks had been sequestrated by the Egyptian authorities after the Anglo-French military intervention, the expatriated British and French staffs having nearly all left the country and the branches carrying on with local staff. Egyptian business had represented about five per cent of Barclays (D.C.O.) total business. Dr. Kaissouny said that the capital of the British and French banks in Egypt totalled £E2,000,000, with deposits ranging from £E70,000,000 to £E100,000,000.

A decree deleting from the Register of Insurance Companies in Egypt the names of 64 companies and associations owned by "enemy" countries, including Lloyds' of London, was announced by the Middle East News Agency on Jan. 27. The Egyptian Finance Ministry stated on Feb. 3 that the total assets of those companies were just over £E10,000,000; that the assets of Egyptian insurance companies, the capital of which was at least 60 per cent British or French, were over £E7,200,000; and that all these companies would be "Egyptianized" under the decree of Jan. 31 and their capital transferred from foreign to Egyptian nationals.

On April 8 a decree was issued by the Egyptian Finance Ministry empowering the Administrator of "enemy" property to sell or liquidate the British and French banks and insurance companies under sequestration. Dr. Kaissouny announced on April 18 that the transfer of all sequestrated banks and insurance companies to Egyptians had been completed on the basis of sale and transfer contracts signed the previous day; he added that banks of "friendly" countries had been given a five-year time-limit for their "Egyptianization."

Dr. Kaissouny stated that the "Egyptianized" banks and insurance companies had been handed over to five Egyptian institutions—the *Banque d'Alexandrie, Banque de la République, Banque du Caire (Kahira), Banque de l'Union des Commerçants,* and the *Société de Solidarité Financière.*

It was reported from Cairo on May 21 that the Administrator of "enemy" property had reported to the Egyptian Finance Ministry on the disposal of British and French banks, insurance companies, and other undertakings.

It was stated that in addition to seven banks and 16 insurance companies which had been sold, the Egyptian Government had also purchased the Eastern Telegraph Company and the Marconi Radio Company of Egypt, whose telegraphic and wireless services were now being carried on by the Ministry of Communications. On the following day the Finance Ministry announced that the Government-controlled Egyptian Economic Organization had bought out British and French shareholdings in nine enterprises—the Eastern Tobacco Co., Nile Textile and Yarn Co., Heluan Cement Co., Beida Dyers Co., Egyptian Dyeing Co., Sinai Minerals Co., Metal Casting Co., United Mines Co., and Egyptian Phosphate Co. The number and value of the shares involved were not mentioned.

The Economic Organization had been set up under a decree-law of Jan. 13 to promote the national economy. Dr. Kaissouny stated that the new body would establish industrial, agricultural, commercial, financial, and property concerns, and would invest the Government's royalties from profits of joint-stock companies and other public economic bodies.

The sequestration of Anglo-Egyptian Oilfields Ltd. had previously been announced under a military decree issued on Nov. 3, 1956, after the start of the Anglo-French military operations against Egypt. The company—the largest British interest in Egypt—operated five oilfields (three in the Sinai peninsula and two near Suez) and had assets in Egypt totalling about £35,000,000, including a £20,000,000 refinery at Suez.

A spokesman of the company in London said that 60 per cent of the shares were held equally by British Petroleum and Shell, the remainder of the shares being held as to 22 per cent by the public in Egypt, 10 per cent by the Egyptian Government, and six per cent by individual British shareholders.

The decision to "Egyptianize" all foreign businesses gave rise to great concern among the large and old-established Greek community in Egypt—the biggest foreign community in the country, numbering some 70,000 persons.

In an open letter to President Nasser, published in the French-language newspaper *Le Progrès Egyptien,* leaders of the Greek community described the "Egyptianization" decrees as a "deadly blow to the majority of Greeks living in this country" and spoke of the "bitterness, concern and confusion" to which the decrees had given rise. It was announced in Athens early in February that the Greek Foreign Minister (M. Averoff), then in New York, had asked the Egyptian Foreign Minister (Dr. Fawzi) for assurances that Egyptian citizenship would be given to all Greeks in Egypt who wished to remain in that country after the "Egyptianization" of foreign business. It was nevertheless reported from Cairo that many Greeks in Egypt were liquidating their businesses and returning to Greece or emigrating to other countries.

An Egyptian decree issued on Feb. 10 stipulated that the Arabic language would be obligatory for all business concerns "in all dealings, including records, contracts, receipts, minutes, and signs." A foreign language could also be used on signs in addition to Arabic, but it would have to be in small letters and under the Arabic writing.—(Times - Manchester Guardian - Daily Telegraph - Le Monde, Paris - New York Times)

B. UNITED KINGDOM. — Privy Councillors' Study Group to inquire into Easing of Burden on Senior Ministers. - Appointment and Membership.

The Prime Minister announced on May 21 that he had appointed a small group of five Privy Councillors, all with long experience of the House of Commons, to give preliminary study to the problem of reducing the burden of work falling upon senior Ministers. After pointing out that the inquiry would be informal, Mr. Macmillan said that he would consider "whether a more formal type of inquiry would be profitable" in the light of the recommendations.

The study group will be headed by Lord Attlee (74), the former Labour Prime Minister. The other four members are Lord Crookshank (64), former Conservative leader of the House of Commons; Mr. Clement Davies, M.P. (73), former leader of the Liberal Party; Mr. James Stuart, M.P. (60), lately Secretary of State for Scotland; and Mr. J. Chuter Ede, M.P. (75), Home Secretary and Leader of the House of Commons in the Labour Government.

The appointment of a Select Committee to examine this question had been suggested to the Prime Minister before Easter by Mr. Donnelly (Labour M.P. for Pembrokeshire), in reply to whose further question Mr. Macmillan made his statement of May 21. The Prime Minister had intimated a month earlier, in reply to a Commons question, that he was considering means of lightening the burden of work falling upon Lord Home, who, while retaining the post of Secretary of State for Commonwealth Relations, had also been appointed Lord President of the Council and Leader of the House of Lords following the resignation of Lord Salisbury (see 15492 B).

The Prime Minister appointed the study group after consultation with Mr. Gaitskell, Leader of the Opposition. The Political Correspondent of *The Times* commented that "the five Privy Councillors do not appear to have been given precise terms of reference" and would "presumably be free to consider the responsibilities of Ministers in the context of the whole machinery of government."—(Times - Daily Telegraph)

C. INDIA. — Re-election of Speaker of Lower House.

Mr. Ananthasayanam Ayyangar, Speaker of the previous House of the People, was unanimously re-elected Speaker of the new *Lok Sabha* on May 11.—(The Hindu, Madras)

(Prev. rep. 14764 C.)

A. SWITZERLAND. — The Dubois Case.

It was announced in Berne on March 24 that M. René Dubois, the Federal Public Prosecutor, had committed suicide earlier the same day. The statement said that recent investigations into certain espionage allegations had disclosed evidence that M. Dubois might have given some information, not concerning Swiss affairs, illegally to a foreign Power.

M. Dubois (49) had been directing official inquiries into allegations that an inspector of the Federal police (M. Ulrich) had been tapping telephone lines to the Egyptian Embassy in Berne and had passed recordings of telephone conversations to the French Embassy. It was later reported that it was part of M. Dubois' task to keep watch on the movements of foreign agents in Switzerland, and that he had allegedly given information on the actions of Egyptians and North Africans in the country to a French friend employed by the French Intelligence Service. M. Dubois was described as having held Socialist views and been strongly opposed to any form of dictatorship; it was stated in the Swiss press that he had acted as he did because of his dislike of President Nasser's régime and his admiration for France.

The Swiss Government announced on March 26 that it had ordered an inquiry into all the circumstances of the espionage affair; that Dr. Fürst (president of a district court) had been appointed acting Federal Public Prosecutor; and that a judge, Dr. Hans Walder, had been designated as Extraordinary Federal *Juge d'Instruction* in charge of the investigations.

In view of the fact that reports about the espionage affair had first been published on March 21 by the Geneva office of the Associated Press and by the *Tribune de Genève*, Dr. Walder on March 26 summoned Mr. Michael Goldsmith (Swiss correspondent of the Associated Press, and a British national) to testify on the source of his information. As Mr. Goldsmith, in conformity with instructions from the agency's headquarters, refused to disclose his sources on the grounds of professional secrecy, he was detained for 24 hours but was released on the following day.

The Judge's action was taken under Article 88 of the Federal Code of Criminal Procedure, which empowers a judge to detain for up to 24 hours any witness who, without one of the reasons recognized by law, refuses either to testify or to affirm his testimony by oath. Mr. Goldsmith, in a statement after his release, said that his refusal to testify was based on Article 55 of the Swiss Federal Constitution, which guaranteed freedom of the Press. He also referred to Article 79 of the Federal Code of Criminal Procedure, which allows a witness to refuse to answer questions that "might expose him or one of his close relatives to criminal prosecution or bring serious discredit to his honour," and which also lays down that a judge should not deliberately put such questions. The fact that a journalist betraying his source was acting dishonourably, Mr. Goldsmith emphasized, was so obvious that Dr. Walder should not even have gone so far as to ask him about the source of his (Mr. Goldsmith's) information.

A formal complaint by Mr. Goldsmith alleging wrongful arrest was rejected on May 14 by the Federal Tribunal at Lausanne, which ruled that Article 77 of the Swiss procedural law excluded journalists from the list of those persons entitled to claim professional secrecy—such as ministers of religion, lawyers, doctors, pharmacists, and midwives. The Tribunal held that the principle of freedom of the Press did not cover the right of a journalist to refuse to testify in criminal proceedings, and that the interest of the State in its own security must prevail. A Swiss journalist in Geneva who had also been summoned by Dr. Walder and, like Mr. Goldsmith, had refused to disclose the source of his information, had similarly been threatened with 24 hours' detention but was given time to consider the matter.

The International Press Institute in Zürich, the Swiss committee of that Institute, and the executive of the Swiss Press Association issued statements on April 26 and 29 strongly criticizing the measures applied by Dr. Walder to force journalists to break their professional secrecy, and insisted that the latter was inherent in the freedom of the Press and should be respected.

In view of these criticisms it was authoritatively pointed out in Berne that the purpose of the investigation was to discover, *inter alia*, the sources through which the secret information on the Dubois case had reached the Press. It was suspected that publication might have taken place in order to warn other participants or to disturb or frustrate the secret official investigations then in progress.

Dr. Walder announced on May 5 that he had arrested Federal Police-Inspector Ulrich on May 2, as the investigations had shown that Ulrich was seriously implicated in the affair. In a further statement on May 16 Dr. Walder announced that Inspector Ulrich had admitted that he had communicated secret official documents of various kinds to a foreign agent; that, in addition, an incriminating letter which he had attempted to smuggle out of prison had been intercepted; and that the inquiry had further shown that M. Dubois had also passed on official transcripts. Dr. Walder added that Inspector Ulrich, as well as the late M. Dubois, had committed the offence of "passing on prohibited information."

It was announced by the Federal Political Department on May 20 that Colonel Marcel Mercier, an attaché at the French Embassy in Berne, was no longer on the embassy's staff and had left Switzerland; it was later disclosed that Colonel Mercier had left the country at the request of the Swiss Government. Several Swiss newspapers had named Colonel Mercier (a close friend of M. Dubois, and officially Commercial Attaché) as the recipient of information from M. Dubois and M. Ulrich, and had alleged that he had been head of a French intelligence service.—(Neue Zürcher Zeitung - Le Monde, Paris - Times)

B. DENMARK. — General Elections. - Resignation of Hansen Government.

Elections for a new *Folketing* (Lower House) took place in Denmark on May 14. The results were as follows, comparison being given with the results of the elections held in September 1953:

	Votes		Seats	
	1957	1953	1957	1953
Social Democrats ..	910,862	894,913	70	74
Radicals	179,568	169,295	14	14
Conservatives ..	383,918	364,060	30	30
Agrarians (*Venstre*)	578,500	499,656	45	42
Retsforbund	122,629	75,449	9	6
Communists ..	73,310	93,824	6	8
Independents' Party	52,890	58,573	0	0
Schleswig Party ..	9,207	9,721	1	1
Total	2,310,884	2,166,391	175	175

Although remaining the strongest party, the Social Democrats lost four seats and, together with the Radicals, will command only 74 seats as against 75 held jointly by the Agrarian and Conservative Opposition—of whom the Agrarians increased their poll by nearly 79,000 and gained three additional seats. An outstanding feature of the elections was the gain of over 47,000 votes and three seats by the *Retsforbund*, the Single-Tax party led by Dr. Viggo Starcke. The Communists lost over 20,000 votes and two seats, reflecting popular sentiment against Soviet policy in the "satellite" countries and especially in Hungary. The Independents' Party (a group of dissident Liberals), as in the previous elections, fell short of the required minimum quota of 65,000 votes and consequently will not be represented. The Schleswig Party represents the German minority in North Schleswig.

Polling was 83.7 per cent of the electorate (2,758,034), compared with 80.6 per cent (2,695,554) in 1953. In addition to the 175 members elected in Denmark, two more members will be elected by the Faröe Islands on May 21 and another two for Greenland on July 2, bringing the *Folketing* up to its total membership of 179.

In view of the election results, Hr. H. C. Hansen, (the Social Democratic leader) tendered his Government's resignation to King Frederick on May 15. The Social Democratic minority Government, first headed by the late Hr. Hedtoft and since 1955 by Hr. Hansen, had been in office since 1953 with the support of the Radicals.—(Berlingske Tidende, Copenhagen - Politiken, Copenhagen - Socialdemokraten, Copenhagen)

(Prev. rep. Elections, 13172 A; Cabinet, 14023 C.)

C. ISRAEL. — French Credit. - Resumption of U.S. Economic and Technical Assistance.

After discussions in Paris between the Finance Ministers of France and Israel (M. Ramadier and Mr. Eshkol respectively), it was announced by Mr. Eshkol on April 3 that the French Government had agreed to open in favour of Israel credits equivalent to $30,000,000, which would be utilized for the purchase from France of both equipment and consumer goods. It was stated in Paris that the credits would be for eight to nine years in respect of Israeli purchases of industrial equipment, and for a shorter period in respect of consumer goods.

It was announced in Washington on April 20 that the U.S. Government was resuming its programme of economic and technical assistance to Israel, which had been suspended after the Israeli military operations against Egypt last autumn.

(Le Monde, Paris - New York Times)

D. INDIA - PAKISTAN. — Canal Waters Dispute. - Extension of Indo-Pakistani Discussions.

A joint statement issued in Delhi, Karachi and Washington on May 6 announced that, at the suggestion of the World Bank, the Indo-Pakistani talks on the use of the waters of the Indus system had been extended for a further six months—i.e. from March 31 to Sept. 30, 1957. (The Statesman, Calcutta) **(15144 D.)**

A. SINGAPORE. — Constitutional Conference. - Agreement on Internal Self-government. - Approval by Singapore Legislative Assembly.

The Singapore constitutional conference met in London from March 11 to April 11, the U.K. delegation being led by Mr. Lennox-Boyd, the Colonial Secretary, and the Singapore delegation by Mr. Lim Yew Hock, the Chief Minister. It was announced on April 11 that the conference had reached agreement on full internal self-government for Singapore (to come into effect on a date after Jan. 1, 1958), including the question of internal security, over which the previous talks with Mr. Marshall's Government had broken down in 1956. The proposed constitutional arrangements were as follows:

Status. In recognition of its advanced status, the territory would be known as the State of Singapore and no longer as a colony.

Head of State. The office of Governor would be abolished and a Malayan-born person, to be known as the *Yang di-Pertuan Negara* (Head of State), would be appointed as the Queen's representative. The appointment would be made by the Queen on the advice of the U.K. Government after consultation with the Singapore Government, and would normally be for a four-year period.

The *Yang di-Pertuan Negara* would act in accordance with the advice of his Ministers, would be head of the Executive branch of Government, and would have power to assent to laws passed by the Legislative Assembly. He would exercise the prerogative of mercy on the Queen's behalf and, in certain circumstances relating to internal security, would have power to make Orders having the force of law.

U.K. Representation. The U.K. Government would be represented by a Commissioner. For the first six months after the new Constitution came into force, the offices of *Yang di-Pertuan Negara* and U.K. Commissioner would be held by one person, not necessarily Malayan-born.

Division of Responsibilities. It was agreed that:

(1) The U.K. Government would continue to be responsible for the external defence of Singapore. For this purpose, and for the fulfilment of Commonwealth and international obligations, they would have the full right to occupy, control, and use the bases and installations in Singapore.

(2) The U.K. Government would also remain responsible for the external relations of Singapore.

(3) The Singapore Government would be responsible for all other matters.

On matters of trade, commerce, and cultural relations it was agreed that the Constitution should contain a provision on the following lines. "H.M. Government to have the conduct of external defence and external relations, provided that the Government of the State of Singapore, acting with the assent of H.M. Government, shall have the power to initiate and conduct matters concerning trade and cultural relations with other countries."

The report said that it was clear that such a practical division in the handling of external relations would make it necessary that there should be continuous consultation between the two Governments, and it had therefore been agreed to establish, by administrative action at the time the new Constitution came into force, an inter-governmental committee under the chairmanship of the U.K. Commissioner. This committee would meet regularly, and not less than once a month.

Internal Security. The Singapore Government would take over full responsibility for preserving internal security, but the U.K. Government would retain a vital interest in the subject. A Singapore Internal Security Council would be set up, composed of the Prime Minister and two other Ministers of the Singapore Government, the U.K. Commissioner and two other U.K. members, and (subject to that Government's agreement, terminable on six months' notice) a Minister from the Government of the Federation of Malaya. The U.K. Commissioner would be chairman of the Council, which would have two secretaries (one British and one from Singapore) and would meet at least once a month.

If the Singapore Government failed to meet any requirement placed on them by a decision of the Council, the latter's chairman would be empowered "so as to inform the *Yang di-Pertuan Negara* and to advise him to make an Order to secure its fulfilment." The *Yang di-Pertuan Negara* would then be obliged to make such an Order, which would have the force of law.

Minorities. The conference proposed that the following clause should be included in the preamble to the Constitution: "It shall be the responsibility of the Government of Singapore constantly to care for the interests of racial and religious minorities in Singapore. In particular, it shall be the deliberate and conscious policy of the Government of Singapore at all times to recognize the special position of the Malays, who are the indigenous people of the island and are in most need of assistance; and accordingly it shall be the responsibility of the Government of Singapore to protect, safeguard, support, foster and promote their political, educational, religious, economic, social and cultural interests and the Malay language."

Legislature. The present *ex officio* and nominated members of the Legislative Assembly would be abolished, and the number of elected members increased to 51. A Speaker would preside over the Assembly, and the present Speaker would be invited to remain in office for at least one year after the Constitution came into force.

Executive. The title of Chief Minister would be changed to Prime Minister. The posts of *ex officio* Ministers would be abolished; the portfolios of the Chief Secretary and the Financial Secretary transferred to elected Ministers; and the office of Attorney-General discontinued, his functions being divided between an elected Minister, a permanent secretary to the legal department, and a new office to be known as State Advocate-General.

Public Service. The Public Service Commission would be incorporated in the Constitution, which would also provide safeguards for the rights of members of H.M. Overseas Civil Service on the basis of the provisions in the White Paper on the reorganization of the Colonial Service [see 14936 A].

Judiciary. The Chief Justice would be appointed by the *Yang di-Pertuan Negara* on the advice of the Prime Minister, who would be obliged to consult the outgoing Chief Justice if he remained available for consultation. Other Supreme Court judges would be appointed by the *Yang di-Pertuan Negara* on the advice of a council consisting of the Chief Justice, all other Judges of the Supreme Court, and the State Advocate-General. Judges of the Supreme Court would not be removable except on grounds of incapacity or misbehaviour.

Constitutional Revision. The Singapore Legislature would have power to amend the Constitution as regards internal affairs. The U.K. Government would retain the right to amend the Constitution by Order-in-Council but would only exercise it in agreement with the Singapore Government, unless the Constitution had been suspended (see below).

Suspension of Constitution. The U.K. Government would retain the right to suspend the Constitution if, in their opinion, the internal situation in Singapore "had so far deteriorated as to threaten their ability to carry out their responsibilities for external affairs or defence, or if the Singapore Government had acted in contravention of the Constitution."

Citizenship. A separate Singapore citizenship would be created by legislation enacted in Singapore. The U.K. Government would take steps to amend the British Nationality Act, 1948, so that Singapore citizens would be recognized under that Act as British subjects and Commonwealth citizens. Agreement was reached on the provisions of the proposed Singapore citizenship, which took due account of the special position of Commonwealth citizens.

Elections. Elections would be held under the extended franchise resulting from the implementation of the citizenship proposals before the Constitution came into force. For this reason, the Constitution would not come into force until a date after Jan. 1, 1958, when the Governor was satisfied that all those entitled to the new citizenship had had time to acquire it and to be placed on the electoral roll.

The conference report also dealt with the following matters:

(*a*) Because of the pressure of business, it would not be possible to introduce the legislation embodying the constitutional proposals during the current session of the British Parliament. The U.K. Government, however, would endeavour to introduce such legislation as soon as possible in the following session, although it could not guarantee that the Bill would pass through all its stages by any specific date.

(*b*) The U.K. Government had been unable to accede to the Singapore delegation's request that the responsibility for relations with Singapore should be transferred from the Colonial Office to the Commonwealth Relations Office. [Mr. Lim Yew Hock stated on his return to Singapore that his delegation had yielded on this point, as they understood that the British Government were planning to amalgamate the two departments.]

The only point on which no agreement was reached was the provision—introduced by the British delegation at the final plenary session of the conference—that persons known to have been engaged in subversive activities should not qualify for election to the first Legislative Assembly.

The report stated that the U.K. Government had made it clear that their agreement to the Constitution as a whole, and to the internal security arrangements in particular, was dependent on the acceptance of this provision. The Singapore delegation had expressed their opposition to this "departure from normal democratic practice" and had protested at the "unilateral imposition of this condition." It had been emphasized on the British side, however, that it was "the view of H.M. Government that some temporary restriction of this kind was essential to safeguard the orderly development of democratic government in Singapore against the danger of Communist subversion," whilst "future policy in this respect would be a matter for the Singapore Legislature to decide after the first elections." "In the circumstances," the report said, "the Singapore delegation took note with regret of the intention of H.M. Government."

Mr. Lim Yew Hock said in a press statement in London on April 11 that it had been "a considerable shock to be told by the Colonial Secretary of the decision to disallow detainees under the Preservation of Public Security Ordinance from contesting the first elections." He added: "As far as I know, there are about 10 people detained; we can fight them and we feel it is wrong to debar them from contesting the elections." [The most important detainee is Mr. Lim Chin Siong, secretary-general of the People's Action Party and a member of the Legislative Assembly, who was arrested following the riots in October 1956 (see footnote below). Other detainees include the leaders of the dissolved Factory and Shop Workers' Union.]

Constitutional Proposals approved by Legislative Assembly. -Rejection of Clause excluding Subversive Detainees from contesting First Elections. - Resignation of Mr. David Marshall.

In protest against certain provisions of the London agreement, Mr. David Marshall resigned on April 12 from the Labour Front (of which Mr. Lim Yew Hock is leader) and announced that he would henceforth sit in the Legislative Assembly as an Independent.

While supporting the British Government's stipulation that subversive detainees should not be allowed to stand as candidates in the first general election, Mr. Marshall objected to (*a*) the functions of the proposed Internal Security Council - which, he contended, would give the Council direct control of internal security, contrary to what he (Mr. Marshall) had fought for in last year's negotiations; (*b*) the method of choosing the Head of State—which, he argued, gave the last word to the British Government, made it possible (by requiring only Malayan birth as a necessary qualification) that a Briton born in Malaya might be appointed, and in any case made it "quite obvious" that the British Government would appoint "an imperialist acceptable to their Colonial traditions"; (*c*) the delay in introducing the new Constitution, i.e. its coming into force only after the next elections—which, he asserted, might enable Colonial rule to continue for two years or longer.

After a four-day debate (April 26-30) on the London agreement, the Singapore Legislative Assembly accepted a motion by the Chief Minister approving the constitutional proposals, but rejecting the clause banning persons known to have taken part in subversive activities from contesting the first election; the voting was 23 in favour and two against, with five abstentions. An amendment by Mr. Marshall "regretting" the terms of the London agreement but proposing, nevertheless, that the new Constitution should come into effect immediately and that elections should take place on the basis of the present electoral roll, was defeated by 22 votes to two, with three Independents and the three official members abstaining.

The four-day debate was marked by bitter exchanges between Mr. Marshall and Mr. Lee Kuan Yew, who had been a member of the delegation to London and who defended the Constitutional proposals against Mr. Marshall's violent attacks on them. In reply to a challenge by Mr. Marshall to contest the issue in Mr. Lee's own constituency, Mr. Lee announced on April 26 that he would resign his seat at the end of the debate in order to fight a by-election against Mr. Marshall, and on April 29 submitted his resignation accordingly. Mr. Marshall, however, finding himself completely isolated and bitterly attacked by his former colleagues during the debate, announced on the latter date that he thought he could best serve the interests of Singapore by "disappearing from the political scene at this stage." Mr. Marshall resigned his seat on April 30.

In reply to Mr. Marshall's arguments, Mr. Lim Yew Hock (the Chief Minister) had pointed out that it would be impossible to introduce the new Constitution by Order-in-Council immediately before the general election, as it had been clearly stated in London that there must first be the authority of a British Act of Parliament. Mr. Lim Yew Hock also refuted Mr. Marshall's contention that the clause empowering the Internal Security Council "to maintain the efficiency of all organs of the Singapore Government concerned with internal security" meant that the Council would "control" internal security, pointing out that the recognized meaning of "maintain" was "to support" and not "to control." The Chief Minister, who paid tribute to Mr. Marshall's earlier work in "blazing the trail for Constitutional advance," declared that if his (Mr. Lim's) motion was accepted the drafting of a new Constitution could begin without delay. Under the second part of the motion, the Colonial Secretary could be approached to consider amending the clause concerning subversives.

Following the Assembly's vote Mr. Lim Yew Hock announced on May 8 that he intended to convene an all-party conference to consider what should be done to secure the withdrawal of the clause regarding subversives.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15293 A.)**

The Singapore Riots of 1956. The riots of 1956, referred to above, arose out of action taken by the Singapore Government in September and October to counteract Communist and subversive influences in the trade unions, and, in particular, in students' organizations and among school-children of the Chinese community. The arrest and subsequent deportation to China of five teachers—three of whom were on the staff of the Chung Cheng Secondary School—on the ground that their activities were "not in the best interests of the people of Singapore" was followed by protest meetings at that school, as a result of which the Government ordered on Sept. 24 the dissolution of the Chinese Middle (i.e. secondary) School Students' Union on the ground that it was a "Communist front" organization and had persistently carried on political agitation among schoolchildren. To reduce left-wing influence in the schools, the Minister of Education (Mr. Chew Swee Kee) directed the principals of nine Chinese schools to dismiss two teachers, to expel 142 leading members of the Students' Union, to forbid political meetings in the schools, and to remove pupils who were over age. These measures were strongly criticized by the People's Action Party, which accused Mr. Lim Yew Hock of agreeing to the "repression of anti-colonial forces" as the price of constitutional concessions by the British Government.

As a protest against these measures over 1,000 pupils of the Chung Cheng School and the Chinese High School staged a sit-down strike on the school premises on Oct. 10 which continued for nearly a fortnight, despite appeals to the parents by Mr. Lim Yew Hock to remove their children from the premises. On Oct. 25 large crowds gathered outside the two schools to demonstrate in support of the students, leading to a number of clashes between the demonstrators and the police, and the imposition of a curfew.

On Oct. 26 police entered the two schools and ejected the students with the aid of tear-gas. Serious rioting occurred during the day in which police stations were attacked, Government buildings set on fire, and cars and other vehicles wrecked and burned; the demonstrators were mainly students, but also included a number of workers who had gone on strike in support of the students, other Chinese opposed to the Government's educational policy, and hooligan elements. Some 5,000 British troops were called in from Malaya to reinforce the police, who were forced to open fire several times. By the end of October, however, the situation had virtually returned to normal and the curfew was finally lifted on Nov. 2. It was officially stated that 13 people had been killed in the riots and about 150 injured.

Between Oct. 27-31 the police raided a number of trade union branches and arrested some 250 trade unionists, including Mr. Lim Chin Siong, secretary-general of the People's Action Party. It was subsequently announced that Mr. Lim would be detained for two years under the Preservation of Public Security Ordinance.

All the pupils of the Chung Cheng School and the Chinese High School were required to register for readmission by Nov. 15 and to produce a declaration signed by a parent or guardian vouching for their future good behaviour. Over 5,500 of the 7,500 pupils in the two schools had fulfilled these conditions by the required date. (Times - Daily Telegraph - Manchester Guardian)

A. GERMANY. — Release of Walter Funk.

A four-Power communiqué issued in Berlin on May 16 announced that Walter Funk (66), Minister of Economics and president of the Reichbank during the Hitler régime, had been released from Spandau prison because of ill-health. He had been seriously ill with kidney trouble in 1954 and had had two operations since then. Funk was sentenced to life imprisonment in 1946 by the International Military Tribunal at Nuremberg, after being found guilty of having played an active part in the Nazi conspiracy to wage aggressive war.

Of the seven major war criminals originally serving their sentences in Spandau Prison, only three remain Rudolf Hess (Hitler's deputy), who is serving a life sentence, and Baldur von Schirach (the Hitler Youth leader), and Albert Speer (the Minister for Armaments), both of whom are serving 20-year sentences.

Of the three who had been released before Funk, only Admiral Dönitz had fully served his 10-year sentence. Both Admiral Raeder and Baron von Neurath had been set free in view of their age and poor health, von Neurath having died on Aug. 15, 1956.—(Times - Le Monde - New York Times) **(Prev. rep. 15124 D.)**

B. UNITED KINGDOM. — Financial and Monetary Policy. - New Issue of Conversion Stock.

A new cash issue of £100,000,000 4½ per cent Conversion Stock, 1962, was made by the Treasury on May 8, the issue price being 99 per cent. It was announced the same evening that applications for amounts up to £500,000 had been allotted in full and those above £500,000 as to 63 per cent of the amounts applied for.

The issue was made to repay in cash a number of stocks maturing on June 15 as far as they were still held by the public. These were the 5 per cent Exchequer Stock 1957 and the 2½ per cent Funding Stock 1952-57. Of the former, £300,000,000 is outstanding and of the latter £101,000,000, but the fact that the new issue was only for £100,000,000 and that the Treasury did not make a conversion offer was interpreted in the Press as indicating that the great bulk of the two maturing stocks was already held by Government Departments. (Financial Times) **(Prev. rep. 15376 E.)**

C. VATICAN. — Cardinal Wyszynski's Visit to Rome. - Formal Investiture in Sacred College.

The Primate of Poland, Cardinal Wyszynski, formally received the Red Hat (i.e. investiture in the College of Cardinals) from the Pope at the Vatican on May 18. His visit to Rome was the first to be made by any cardinal from an "Iron Curtain" country. Though Mgr. Wyszynski had been raised to the Sacred College in 1952, he was unable to visit Rome at the time owing to the political conditions then prevailing in Poland and the conflict between the Roman Catholic Church and the State.—(Catholic Herald) **(Prev. rep. Church-State Relations, 15312 A; Cardinal Wyszynski, 12822 A.)**

A. ITALY. — Social Democrats withdraw from Coalition Government. - Resignation of Signor Segni. - Christian Democratic Cabinet formed by Senator Zoli. - Signor Pella succeeds Dr. Martino as Foreign Minister.

The Italian Prime Minister, Signor Segni, tendered his resignation to President Gronchi on May 6 after Signor Saragat (the Vice-Premier) had advised the Social Democratic Party to withdraw from the Coalition Government.

At a party meeting the previous evening Signor Saragat had criticized the Government on the ground that it was too weak to carry out essential reforms effectively, and had accused small groups within the coalition parties of undermining inter-party co-operation for their own ends. For these reasons he proposed that the Social Democratic Party should withdraw from the Government, and also expressed the opinion that such action would facilitate an eventual merger of the two Italian Socialist parties. Though favouring the break-up of the present Government, he believed that a coalition of centre parties "free from the mistakes of the present coalition" remained desirable in the interests of political stability.

The following morning (May 6) Signor Saragat explained to Signor Segni the reasons for his suggestion that the Social Democrats should withdraw from the Government. After consulting leaders of the other coalition parties (the Christian Democrats and Liberals) the Prime Minister proposed at a Cabinet meeting that the Government should resign forthwith, instead of waiting to see whether the directorate of the Social Democratic Party would give formal approval to Signor Saragat's suggestion. This proposal was accepted unanimously, and Signor Segni accordingly tendered the Government's resignation to President Gronchi the same evening.

Since the Venice congress of the Italian Socialist Party (i.e. the Nenni Socialists) in February, at which unanimous approval was expressed for a merger of the two Socialist parties (see page 15400), a number of left-wing members of the Social Democratic Party—including Signor Matteotti, the party's secretary-general—had urged the party's withdrawal from the Government as a means of promoting Socialist reunification. After having withdrawn his resignation over this issue in March (see 15503 D), Signor Matteotti presented to the party directorate on April 17 a formal resolution in favour of a withdrawal from the Segni Government, but the "centre" and "right" wings of the party executive—including Signor Saragat himself—again opposed the breaking-up of the Coalition. Signor Matteotti accordingly resigned as secretary-general on the same date and was succeeded by Signor Mario Tanassi, his deputy. Signor Saragat's eventual support for the party's withdrawal from the Government, in contrast to his earlier attitude, was regarded as an attempt to overcome the differences between the party's "right" and "left" wings on this issue. As stated above, however, Signor Saragat continued to uphold the principle of Social Democratic participation in a coalition of the centre parties.]

The position of the Segni Government had previously been weakened by the withdrawal of the Republican Party's support (see 15503 D) and by disputes within the coalition parties on the controversial Land Tenancy Bill—the issue on which the Scelba Cabinet fell in 1955 before Signor Segni formed his administration. [The Segni Cabinet was formed in July 1955 after the resignation of Signor Scelba and had thus been in existence for twenty-two months.]

Throughout the lifetime of Signor Segni's Cabinet the coalition parties—notably the trade union wing of the Christian Democrats and the Liberals—had differed on detailed provisions of the Land Tenancy Bill. Whereas Christian Democratic trade union leaders, headed by Signor Pastore, had urged that some of the more contentious clauses in the Bill should be amended in favour of tenant farmers, the Liberals had insisted that compromises on the measure reached in 1955 between the coalition parties (and the Republicans) should be adhered to, and that no further substantial amendments should be made to the Bill.

After a Cabinet crisis in February on this issue, the three coalition parties eventually agreed on Feb. 28 upon the text of a motion approving the general lines of the Farm Tenancy Bill. This motion, regarded by Signor Segni as a vote of confidence, was passed by the Chamber of Deputies on March 1 by the narrow majority of five votes (282 in favour and 277 against, with one abstention). Though supported by the Christian Democratic, Liberal, and Social Democratic deputies (three of the latter, however, absenting themselves), Signore Pastore and other C.D. trade union leaders reserved the right to propose substantial amendments to the Bill when it came up for detailed consideration at a later stage. The leaders of the three coalition parties held a series of round-table meetings during the first week of April in an attempt to resolve their differences on the Bill before it was debated clause by clause in the Chamber of Deputies; the only result, however, was an agreement to suspend debate on the individual clauses until after the Easter recess. At the time of Signor Segni's resignation the Bill had not yet come before the Chamber for detailed consideration.

Following the resignation of Signor Segni, the leaders of the Christian Democratic, Liberal, and Social Democratic parties all expressed their support for a four-party coalition to include the Republican Party. The directorate of the latter party, however, decided on May 12 (by 13 votes to eight) against participation in such a coalition—a decision which led to the resignation from the Republican Party of Signor Pacciardi, a former Minister of Defence, who had strongly supported a four-party "centre" government.

Meanwhile President Gronchi had had a number of meetings with the leaders of all the political parties and also, in accordance with precedent, with the presidents of the Senate and Chamber and with former Presidents and Prime Ministers. On May 15 he invited Senator Adone Zoli (Christian Democrat), Minister of the Budget in the Segni Cabinet, to form an administration. Senator Zoli accepted this task and on May 19 formed a government drawn entirely from the Christian Democratic Party with the exception of a non-party expert. The new Cabinet was sworn-in by President Gronchi on May 20, its membership being as follows:

Senator Adone Zoli ..	Prime Minister and Minister of the Budget (*Bilancio*).
Signor Guiseppe Pella ..	Vice-Premier and Minister of Foreign Affairs.
Signor Pietro Campilli ..	Minister without portfolio and president of the Ministerial Committee for the *Cassa Mezzogiorno* (Development Fund for Southern Italy).
Senator Mario Zotta ..	Minister without portfolio for Administrative Reform.
Signor Rinaldo Del Bo ..	Minister without portfolio for Relations with Parliament.
Signor Fernando Tambrioni	Interior.
Signor Guido Gonella ..	Justice and Constitutional Co-ordination.
Signor Giulio Andreotti ..	Finance.
Senator Giuseppe Medici ..	Treasury.
Signor Emilio Taviani ..	Defence.
Signor Aldo Moro	Education.
Signor Giuseppe Togni ..	Public Works.
Signor Emilio Colombo ..	Agriculture.
Signor Armando Angelini	Transport.
Signor Bernardo Mattarella	Posts and Telegraphs.
Senator Silvio Gava ..	Industry.
Signor Luigi Gui	Labour.
Dr. Luigi Carli	Foreign Trade.
Signor Gennaro Cassiani	Merchant Marine.
Senator Giorgio Bo ..	State Investments in Industry (*Partecipazioni*).

Apart from the change in the Premiership, the most important change was the appointment of Signor Pella (55) as Foreign Minister in place of Dr. Martino, who is a member of the Liberal Party. Signor Pella was Prime Minister from August 1953 to January 1954 after the general elections in the former year, but had not held office in any Cabinet since then. [For biographical details see page 13100, second column].

Many of the Ministers held the same portfolios as in the Segni Cabinet, or exchanged their former portfolios for others—e.g. Signor Togni, formerly Minister of State Investments (an office he had held for only two months, see 15503 D) was moved to the Ministry of Public Works. Ministers entering the Cabinet for the first time were Dr. Carli (the non-party expert, and not a member of Parliament) and Signori Bo, Del Bo, Gui and Zotta. Dr. Carli played a leading part with the late Signor Vanoni in drafting Italy's ten-year development plan, commonly known as the "Vanoni plan."

Senator Zoli (69), a lawyer from Tuscany, succeeded the late Signor De Gasperi in 1954 as president of the National Council of the Christian Democratic Party (see 13796 A) During the war he played a distinguished role in the clandestine resistance movement, being sentenced to death for anti-Fascist activities but succeeding in escaping from prison. He became a founder-member of the Christian Democratic Party at the end of the war. As stated above, he retained the portfolio of the Budget concurrently with assuming the Premiership.

As the Christian Democrats are in a minority in both Houses of the Italian Parliament (263 deputies in a Chamber of 590 members, and 111 senators in a Senate of 245), the new Government will be dependent on the support of other parties. (Corriere della Sera, Milan - Giornale d'Italia, Rome)

B. INDIA - RUMANIA. — Cultural Agreement.

A cultural agreement between India and Rumania was signed in New Delhi on April 30 by Dr. Azad, the Indian Minister for Education and Scientific Research, and M. Magheru, the Rumanian Minister. Valid for five years, it comes into force upon ratification and is the seventh cultural agreement signed by India since 1951, following those concluded with Turkey, Iraq, Indonesia, Japan, Persia, and Poland. (The Hindu, Madras) **(Prev. rep. 15272 B; 14641 F.)**

A. EASTERN GERMANY. — The Harich Trial. - Official Admission of Student Unrest.

In a report presented to the Central Committee of the Socialist Unity Party on Feb. 5, 1957, and published in *Neues Deutschland*, Herr Ulbricht (the party's first secretary) alleged that students of the Humboldt University in East Berlin had planned to revolt on Nov. 2, 1956, under the leadership of Dr. Wolfgang Harich, professor of social sciences in the university, who was subsequently arrested.

Herr Ulbricht admitted that unrest had been aroused inside the party, and particularly among intellectuals, by M. Khrushchev's secret report on Stalin, the influence of the Yugoslav League of Communists, and recent events in Poland and Hungary, and that requests had been made for the publication of the Khrushchev report, which the Central Committee had refused. A "counter-revolutionary group" headed by Professor Harich had fallen under the influence of the Petöfi Circle (the Hungarian writers' organization which largely inspired the anti-Stalinist revolt) and "some acquaintances from Warsaw," and had planned to "break the ties linking the German Democratic Republic with the U.S.S.R." and to "abolish the leadership of the Communist Party." Students of the medical faculty of the university had met on Nov. 2 and had proposed to "go out into the streets" and "pass to action"; as a result of the vigilance of the Communist Party organization and its "fighting groups," however, the students had "realized where power really lay and renounced the idea." Professor Harich had been arrested on Nov. 29 on his return from a visit to Hamburg, where, Herr Ulbricht alleged, he had discussed his plans with "Western espionage services."

The trial of Professor Harich opened before the East German Supreme Court in Berlin on March 7. Accused with him on charges of conspiring against the regime were Herr Bernhard Steinberger, co-publisher with Dr. Harich of the *Zeitschrift für die Philosophie*, and Herr Manfred Hertwig, a university lecturer. The indictment conceded that the defendants regarded their aims as part of the "revolutionary class struggle" and had intended to "make Eastern Germany attractive to Western Socialists." It alleged, however, that they had for this purpose established contact with "counter-revolutionary groups in Hungary," the illegal East German section of the German Social Democratic Party, and certain unnamed persons and organizations in Poland; had planned to restore a capitalist economy; and had organized underground cells. The accused, who had been held *incommunicado* for three months since their arrest, all pleaded "guilty," Professor Harich being sentenced on March 9 to 10 years' penal servitude for treason, Herr Steinberger to four years, and Herr Hertwig to two years. Professor Gerhard Hasse and Professor Joachim Hofmann, both on the staff of the Karl Marx Institute at Leipzig, were sentenced on April 5 to five and two years' hard labour respectively on similar charges.

Shortly before his arrest Professor Harich had explained his views in a memorandum which he had passed on to Social Democrats in West Berlin.

In this memorandum he stated that his supporters included many party officials and intellectuals, including the late Herr Bertold Brecht (the famous dramatist, who died on Aug. 15, 1956), and that early in 1956 they had submitted their proposals first to the party leadership, which had refused to consider them, and then to the Soviet Ambassador. They proposed to reform the party from within by expelling the Stalinists, democratizing its organization, and adopting an ideology based on Marxism-Leninism which would reject Stalinism and take into account recent developments in Yugoslavia, Poland, and China. The main features of their political and economic programme were restoration of the supreme power of Parliament and of complete freedom of thought; abolition of the State security police and secret trials; organization of elections which would give the voters a real choice; replanning of production with a view to raising living standards; the introduction of profit-sharing; the establishment of workers' councils on the Yugoslav model; and the ending of forced collectivization of agriculture.

The memorandum declared that conditions for German reunification through free elections were the attainment of these reforms in Eastern Germany, and the return of a Social Democratic majority in Western Germany which would reverse the policy of "militarization," withdraw from NATO, remove "Fascists and militarists" from the administration, nationalize key industries, and carry out agrarian reforms.

In a reunited Germany unification of the labour movement could be achieved provided the Socialist Unity Party was freed from Stalinism and thereby "converted into a leftist Marxist movement which has nothing more in common with the old-type Communist Party and its disastrous degeneration . . . Since in Western Germany the unity of the working class has been realized by the Social Democratic Party, a future united workers' movement would inevitably, through the greater weight of the Social Democratic Party, bear more likeness to the latter than to the reformed Socialist Unity Party; but it would doubtless have a stronger leftist orientation than the present Social Democratic Party. However, before we can approach the Social Democrats and make demands on them we must remove all that separates us . . . the chief obstacle being our own Stalinism."

"As a first step towards future co-operation," the memorandum went on, "there should be secret co-operation between oppositional comrades in the Socialist Unity Party and Social Democrats in combating Stalinism. Once the anti-Stalinist opposition has gained control of the Socialist Unity Party from within, official contacts between the Social Democratic Party and the reformed Socialist Unity Party should follow. From them the germs of future unity might develop, though neither party must swallow up the other. No Stalinists who have participated in the crimes of the Ulbricht group must be admitted to the new workers' party, but only people who have actively fought against the Stalinist degeneration of the Socialist Unity Party."

An official admission of student unrest at a number of places in Eastern Germany—including East Berlin, Leipzig, Dresden, Jena, Rostock and Babelsberg—was made on May 16 by Colonel Emil Bormann (head of the State security police) at a press conference at the Humboldt University in East Berlin. Colonel Bormann accused Western intelligence services of fomenting unrest among students, disclosed that a number of students had been arrested, and announced the suppression of a "plot" among students of the Humboldt University to start a Hungarian-type uprising. The State Secretary for Education (Herr Wilhelm Girnius) announced on the same day that travel by students to West Berlin and Western Germany would be strictly controlled.

During the previous week students at the Humboldt University had staged a protest strike in support of the Dean of the Veterinary faculty, Professor Schützler, who had fled to Western Germany and who had been accused of "encouraging Western secret service influence" among students. The Rector of the University (Dr. Werner Hartke) said at the above-mentioned press conference that the entire third-year class of veterinary students (132 in number) had been suspended for boycotting lectures, several students having been expelled. (Neues Deutschland, East Berlin - Social Democratic Press Service, Bonn - Frankfurter Allgemeine Zeitung)

B. SOVIET UNION. — Industrial Output in 1956.

A report by the Soviet Government's Central Statistical Bureau on the development of the Soviet national economy in 1956, published in March, gave the following details of industrial output in 1956, the percentage increase over 1955 being shown in parentheses:

Pig-iron, 35,800,000 tons (107); steel, 48,600,000 tons (107); rolled metal, 37,800,000 tons (107); steel tubing, 3,800,000 tons (108); iron-ore, 78,000,000 tons (109).

Coal, 419,000,000 tons, of which coking coal 83,000,000 tons (107); shale oil, 11,600,000 tons (107); oil, 83,800,000 tons (118); electric power, 192,000,000,000 k.w.h. (113), including 29,000,000,000 k.w.h. of hydro-electric power (125); gas, 13,700,000,000 cubic metres (132).

Mineral fertilizers, 10,900,000 tons (113); soda ash, 1,545,000 tons (108); sulphuric acid, 4,323,000 tons (114); dyes, 77,000 tons (105).

465,000 motor vehicles (104), including 358,000 lorries (100); 98,000 motor cars (91), and 9,000 buses (108); 184,000 tractors (112); 124,000 tractor-drawn ploughs (120); 109,000 tractor-drawn drills (162); 148,000 tractor-drawn cultivators (132); 27,200 tractor-drawn mowing machines (120); 82,000 grain combine harvesters (170); 45,300 maize and silage crop combine harvesters (408); 297,000 motor-cycles (122); and 3,100,000 bicycles (108).

Metallurgical equipment, 177,000 tons (103); chemical equipment, 109,000 tons (98); oil equipment, 49,300 tons (101).

Metal-cutting machine-tools, 121,300 (104); forge-press machines, 6,900 (127).

Electric generators, 5,184,000 k.w. (115); large electric machines, 4,229 (120); electric motors 1,714,000 (111).

Electric locomotives, 216 (111); diesel locomotives, 161 (120); goods wagons, 40,000 (117); passenger coaches, 1,799 (102).

Cement, 24,900,000 tons (104); cut timber, 204,000,000 cubic metres (104).

Cotton fabrics, 5,500,000,000 metres (92); woollen fabrics, 268,000,000 metres (106); artificial fibre, 129,000 tons (117).

It was claimed that gross output in 1956 was nearly 11 per cent higher than in 1955, including 11.4 per cent more for capital goods and 9.4 per cent more for consumer goods. (Soviet Embassy Press Department, London) **(14717 A.)**

C. SWEDEN - UNITED KINGDOM. — Reciprocal Social Security Agreement in Force.

It was announced in Stockholm and London on May 23 that the reciprocal social security agreement signed between Sweden and the United Kingdom on June 9, 1956, would come into force on June 1. The agreement covers family allowances, health services, and cash benefits for unemployment, sickness, maternity, old age, widowhood, orphanhood, and industrial injury.—(Times - Svenska Dagbladet) **(14929 D.)**

MAY 25—JUNE 1, 1957

A. JORDAN. — Cabinet and Army Crises. - Dismissal of Nabulsi Government. - Allegations of Army Plot against King Hussein. - Flight of Generals Nuwar and Hayyari. - Mr. Hashem succeeds Dr. Khalidi as Prime Minister. - Imposition of Martial Law. - Dissolution of Political Parties. - Arrest of Opposition Leaders and Communists. - U.S. Sixth Fleet sent to Levant. - Soviet Protest at U.S. Naval Movements. - U.S. Economic Aid for Jordan. - Discussions between Egyptian, Syrian and Saudi Arabian Leaders. - Meeting between King Hussein and King Saud. - King Hussein's Denunciation of Egyptian Propaganda against Jordan. - Cancellation of Decision to establish Diplomatic Relations with U.S.S.R. - Jordanian Allegations of Egyptian-Syrian-Soviet Plot to overthrow Monarchies in Arab Countries and establish Republics. - Syrian Troops withdrawn from Jordan. - Jordanian Allegations of Syrian Support for Conspiracy.

A major political crisis developed in Jordan during April following the dismissal of Mr. Nabulsi's Government by King Hussein on April 10. Fighting between left-wing and royalist elements in the Army took place on April 13, and the Chief of Staff, General Nuwar, went into exile in Syria on the following day. A Government headed by Dr. Khalidi, in which Mr. Nabulsi became Foreign Minister, was formed on April 15, but from April 22-24 demonstrations in favour of the reinstatement of the former Government took place in Amman and the other leading towns. To end the crisis, which had been further intensified by the flight to Syria of General Hayyari (General Nuwar's successor as Chief of Staff), King Hussein installed a right-wing Cabinet on April 25 which proclaimed martial law, dissolved all the political parties, carried out numerous arrests, and purged the civil service of Opposition supporters.

The stages in the development of the Jordanian crisis, and its international repercussions, are described below under cross-headings.

Dismissal of Nabulsi Cabinet.

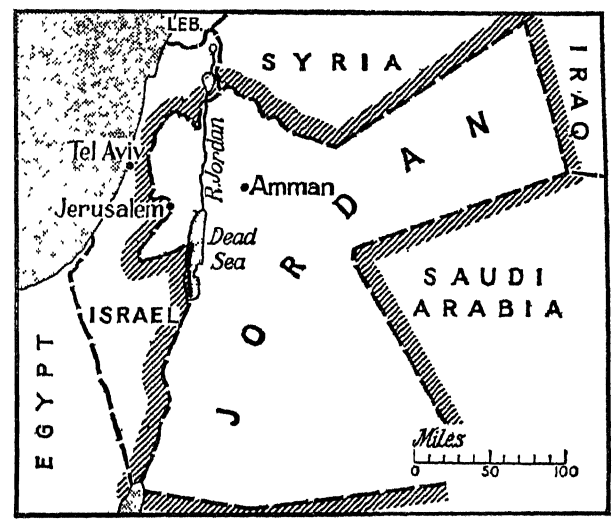
The existence of differences between King Hussein and Mr. Nabulsi's Government first became evident on Feb. 2, with the publication of a letter from the King to Mr. Nabulsi warning him of "the danger of Communist infiltration" in the guise of nationalism and calling on him to "take the necessary steps to destroy destructive propaganda." The Government carried out the King's wishes at the time by ordering the confiscation of all Communist propaganda publications and Soviet newspapers, banning the daily bulletin issued by the Tass Agency (which had been printed and imported from Syria), and prohibiting the display of Soviet films in public cinemas. Growing tension between the King and the Government, however, was reported to have arisen in subsequent weeks by the King's personal intervention in domestic and international affairs, including the issuing of direct orders to the Army and police without consulting or notifying the Government, and by his apparent support for the acceptance of U.S. economic aid, to which the Cabinet was opposed.

On April 1 the Cabinet decided to resign as a protest against the King's action in sending, without consulting it, the Chief of his Cabinet (Mr. Bahgat Talhouni) to Damascus, Cairo and Riyadh with personal messages to President Kuwatly of Syria, President Nasser of Egypt, and King Saud of Saudi Arabia in which King Hussein proposed a four-Power meeting to discuss the preservation by the Arab States of their independence, religion, and way of life. Although the Government was persuaded to withdraw its resignation, a new cause for disagreement immediately arose by its decision on April 2 to open diplomatic relations with the Soviet Union at embassy level (see 15468 C), whereas the King was prepared to accept diplomatic relations with the U.S.S.R. only at *chargé d'affaires* level. The crisis was finally brought to a head on April 10 by the Cabinet's proposal to dismiss or pension off about 20 senior officials, most of whom were either personal supporters of the King or moderates, and who were reported to include Mr. Talhouni, Chief of the Royal Cabinet.

Later the same day King Hussein ordered the Cabinet to resign but to remain in office until a new Ministry was formed. Dr. Khalidi, a former Foreign Minister, accepted the task of forming a Government on April 11, but was unable to do so because the National Socialist and *Baath* parties and the National Front—which together with the Communists had supported the Nabulsi Government—refused to co-operate. Mr. Nimr (Minister of the Interior in the outgoing Government), next tried to form a Cabinet and submitted a list of names on April 13; the King, however, refused to agree to the inclusion of certain of the Ministers proposed, and asked Sayed el-Mufti (president of the Senate and a former Premier) to form a Ministry. Demonstrations in favour of an all-party Government and against the "Eisenhower doctrine" for the Middle East took place in Amman on April 13.

The Zerqa Incident. - General Nuwar's Flight to Syria. - Formation of Khalidi Ministry.

Fighting between a royalist Bedouin regiment and troops commanded by left-wing officers broke out at Zerqa (the Army headquarters a few miles north of Amman) on April 13, though the exact circumstances remained obscure. Major-General Ali Abu Nuwar, the Chief of Staff, crossed the frontier into Syria on the following day, Major-General Ali Hayyari being appointed as his acting successor.



(*Economist*)

An official communiqué issued on April 14 stated that "certain irresponsible elements have tried to penetrate into the ranks of the Army and spread rumours intended to harm the unity of national feeling in the Army, its close loyalty to its King, and the sacred interests of the country. All these ignoble attempts have failed and everything has returned to normal. The Army and its officers hastened to express their sincere loyalty to the King, promising God and their country to devote their lives to the prosperity of the nation." Reports from unofficial sources suggested that pro-Nabulsi elements in the Army, headed by General Nuwar, had planned to carry out a military *coup d'état*, although the conspirators' aim was variously reported as the establishment of a republic headed by General Nuwar and the replacement of King Hussein by his cousin, Prince Zeid. The fighting was said to have broken out when the Bedouin 3rd Regiment, on hearing of a plot against the King, surrounded the camp at Zerqa during the evening of April 13; firing then started with a regiment commanded by Colonel Maan Abu Nuwar (a relation of General Nuwar), which was said to have prepared to march on Amman to overthrow the King, a number of officers of the latter regiment being killed. On being informed by loyal officers of the plot, King Hussein summoned General Nuwar to the palace and drove with him at midnight to Zerqa, where the King's personal intervention ended the fighting.

After ordering that General Nuwar (who was accused by some of the troops of being a traitor) should be brought back to the palace and 22 other officers arrested, King Hussein drove back to Amman in the early morning of April 14, escorted by loyalist officers. A strong guard, including armoured cars and artillery, was posted round the royal palace; the city was occupied by Bedouin troops; and Mr. Nabulsi and leaders of the parties supporting his Government were placed under house arrest. General Nuwar was variously reported to have been deported to Syria by the King's order and to have been granted 14 days' leave prior to dismissal.

Left-wing demonstrations took place during the next three days in towns west of the Jordan. At Ramallah a broadcast of a message from the King thanking the Army for its support was interrupted on April 14 by supporters of Mr. Nabulsi, who seized part of the radio station and sabotaged the transmitter. A general strike was called in Ramallah on the

following day, while demonstrations demanding General Nuwar's return occurred in Jerusalem and Nablus on April 16 —the demonstrators in Jerusalem clashing with members of the Moslem Brotherhood, which supported the King's action. In Amman, on the other hand, 300 Army officers and a number of Bedouin sheikhs pledged their loyalty to the King at the Royal palace on April 16.

On April 15 King Hussein summoned some 60 former Ministers, including Mr. Nabulsi, to the palace for a conference, and informed them that if they were unable to reach agreement on a new Cabinet he would form a Government himself. In consequence a Cabinet was formed later the same day under Dr. Khalidi's leadership, its membership being: Dr. Hussein Khalidi (Prime Minister and Defence); Sayed el-Mufti (Deputy Premier and Interior); Suliman Nabulsi (Foreign Affairs and Communications); Fawzi el-Mulki (Education and Public Works); Suliman Sukkar (Finance and Economy); Majid Abdulhadi (Justice); Dr. Amin Majjaj (Health and Social Affairs).

Dr. Khalidi (63), a Palestinian by origin, was formerly a supporter of the Mufti of Jerusalem and was exiled to the Seychelles by the British authorities in 1937. He settled in Jordan in 1951 and was Foreign Minister from 1953-54. Fawzi el-Mulki had held the Premiership on several occasions. All the members of the Government were Independents except Mr. Nabulsi.

At a press conference on April 21 Mr. Nabulsi said that the new Government would establish diplomatic relations with the Soviet Union and was prepared to receive President Eisenhower's special envoy in the Middle East, Mr. Richards.

Mr. Nabulsi said that the decision taken by his Government to establish diplomatic relations with the U.S.S.R. would be carried out, and in this connexion accused "other diplomatic missions" of interfering in Jordanian affairs. [The U.S. Embassy had previously denied allegations that it was responsible for the dismissal of Mr. Nabulsi's Government.] Describing himself as an Arab Nationalist but as anti-Communist, he said that he wanted "to fight Communism on my own account and not as Mr. Eisenhower's hired hand." He was ready, however, to accept any foreign aid that was offered without conditions and had informed the U.S. Embassy that Mr. Richards would be welcome if he came, but had received no reply. Mr. Nabulsi expressed confidence that Egypt, Syria and Saudi Arabia were ready to pay the subsidies which they had agreed to grant to Jordan [see 15340 A] "to the last penny."

Flight of General Hayyari. - Generals Hayyari and Nawar leave Damascus for Egypt. - Resignation of Khalidi Ministry. - Mr. Hashem appointed Prime Minister.

The political situation again deteriorated following the resignation of General Hayyari, who had been officially appointed Chief of Staff on April 18, and who on the following day had publicly pledged his support for King Hussein, while assuring Egypt and Syria of Jordan's readiness to "march by their side." According to a statement issued by Dr. Khalidi on April 20, General Hayyari had gone to Damascus "on official duty" on April 19 but in the early hours of April 20 had telephoned the Prime Minister to submit his resignation, stating that he had confirmed this in a letter which he had left in Amman. At a meeting later the same day the Cabinet decided to appoint Major-General Habes Majali (a Bedouin officer) as Chief of Staff, and to form a committee consisting of Dr. Khalidi, Sayed el-Mufti, and Mr. Abdulhadi to supervise the work of a military committee which had been set up by General Hayyari to investigate the Zerqa incident.

Both General Hayyari and General Nuwar made statements in Damascus in which they expressed their opposition to King Hussein and their support for Mr. Nabulsi's policy of close alignment with Egypt and Syria.

General Hayyari, at a press conference in Damascus on April 20, said that he had been asked at the beginning of the crisis to discover whether senior officers would be prepared to use their troops against the people, if the latter resisted the formation of a Government pledged to end the policy of alliance with Syria and Egypt. When the Army leaders had categorically refused to do so, Palace circles had, he alleged, formed a "plot" against General Nuwar and other officers, in collaboration with "foreign non-Arab military attachés," in order to prepare the way for a "pro-Western dictatorship." [The only non-Arab countries with military attachés in Jordan are the U.S.A. and Britain.] This "plot" had consisted in spreading the story that the Army was preparing a *coup d'état* against the King, which, General Hayyari emphasized, was completely without foundation. On his appointment he had been invited to act as an instrument of this plot, but he had preferred to leave the country in order to warn world opinion of what was happening, using the pretext that it was necessary for him to see the Syrian Chief of Staff.

General Nuwar, in an interview on April 22 to the Damascus paper *Al Alam*, said that about a month before the beginning of the crisis the U.S. military attaché (Colonel Sweeney) had asked him if he was prepared to form a military Government which would dissolve Parliament and accept the "Eisenhower Doctrine"; similar suggestions, he alleged, had subsequently been made to him by members of Palace circles, including ex-Premier Samir Rifai. He had rejected these proposals, however, and had informed Mr. Nabulsi of them. General Nuwar completely denied the story of a military conspiracy against the King, and accused the Court of seeking to eliminate all nationalist and patriotic elements from the Army and the Administration. Calling for the resignation of Dr. Khalidi's Government, he said that it was intended to be "the bridge imperialism will cross to liquidate certain liberal military and civilian elements" and that its objectives were "to impose the Eisenhower Doctrine, tie Jordan to the Baghdad Pact, and split Jordan from Syria and Egypt."

Dr. Khalidi, broadcasting on April 22, said that it was "unfortunate to see some of those who, until a few days ago, were invested with the high responsibility of protecting the country issuing statements . . . which have caused confusion and have been used in a way detrimental to the country's internal security. He added that "the statements which have been made by General Hayyari and others, and by certain elements of the Arab Press and Radio, are groundless." [The "elements of the Arab Radio" referred to were the Cairo and Damascus radios, which had given great prominence to General Hayyari's and General Nuwar's statements. The two generals, who had been ordered by the Syrian Government to refrain from further political activities, left Damascus for Cairo on May 5.]

The "Committee of National Guidance," which consists of the leaders of the National Socialist and *Baath* parties and the National Front, submitted demands to Dr. Khalidi on April 23 for the resignation of his Government, the restoration of the Nabulsi Government, the rejection of the Eisenhower doctrine, the reinstatement of the former Army Command, and the dismissal of several of King Hussein's advisers. Small-scale demonstrations organized by the left-wing parties in support of these demands broke out at Nablus and Ramallah on April 22, and spread to Jerusalem and Jericho on the following day. In Amman, where a general strike was called on April 24, about 3,000 demonstrators marched through the streets shouting anti-American slogans; although there was considerable stone-throwing and a number of minor clashes with the police, the latter were able to prevent any major incidents.

King Hussein gave an interview on April 24 to U.S. press correspondents in which he attributed the crisis to "international Communism and its followers inside and outside the country," and declared that he was prepared to take all necessary measures, including the imposition of martial law, to save Jordan from these forces. He also said that the leaders of some parties were working in co-operation with parties in other Arab countries—mentioning in this connexion the *Baath* party, which has links with the Syrian party of the same name; declared that these groups had attempted to penetrate the Army but had been checked by loyal officers and men; and claimed that he had the full support of both the Army and the people in spite of "false propaganda and efforts to break the country."

Dr. Khalidi's Government resigned during the evening of April 24, and at midnight the King appointed a new Cabinet of right-wing politicians, headed by Mr. Ibrahim Hashem, with the following membership:

Ibrahim Hashem (Prime Minister), Samir Rifai (Deputy Premier and Foreign Minister), Falah Madadha (Interior and Public Works), Suliman Toukan (Health and Social Affairs), Khalousi el Khairy (National Economy, Education, and Culture), Anastas Hanania (Finance and Communications), and Akef el-Fayez (Agriculture, Development, and Reconstruction).

Mr. Hashem, who is about 80, had been Prime Minister many times before, the last occasion being as head of a "caretaker" Government from July-October 1956. All the other members had previously held ministerial office except Mr. Fayez, who is a son of the paramount chief of a Bedouin tribe, the Beni Sukr.

King Hussein's Attack on Nabulsi Government and Egyptian Propaganda.

In a broadcast on April 25 King Hussein violently attacked the Nabulsi Government, and accused the Egyptian Press and radio of spreading untrue propaganda against him.

After declaring that "I have been patient so far in the face of propaganda and rumours, but my prestige will allow me to be patient no longer," King Hussein warned the people against "subversive influences aiming to destroy the country." He accused the political parties of taking orders from outside Jordan; denounced the "hypocrisy" of the Nabulsi Government in claiming to be "the champion of true Arab policies"; and declared that it had "undermined his morale" when he [the King] had wished to intervene on Oct. 29 during the Israeli invasion of Sinai and the Nabulsi Government sent "the Ambassador of a certain great Power" to dissuade him from taking action.

King Hussein went on to say that many people had complained about the Nabulsi Government while it was in office, and that it had been a constitutional step to dismiss it because it had made many mistakes. He accused it of having favoured party men in the Administration; of having given a free hand to the Communists (who, he alleged had received instructions from the Communists in Israel); and of having tried to penetrate the Army. "These so-called nationalists," he said, "had relations with Israel. In Jordan there are ten different parties, and all their work is plotting and conspiring." After stressing that it was Mr. Nabulsi's Government which had invited the Richards mission [see page 15419, second column] to visit Jordan, the King affirmed that it was not his policy to invite Mr. Richards or to approve the Eisenhower Doctrine without consulting other free Arab States.

In conclusion, King Hussein reproached the Egyptian press and radio for spreading "propaganda and fabricated stories against me and Jordan." He added: "I believed that obligations of friendship would at least have prevented our brothers in Egypt from provoking the Jordanian people in broadcasts and newspapers and from attacking me, who devoted my blood to Egypt during its crisis." After denouncing "those Egyptian tongues and pens which attack us, try to instigate part of our nation against us, distort the real situation in our country, and send into the atmosphere propaganda and rumours full of lies" [a reference to the "Voice of the Arabs" Radio in Cairo], the King declared that he would not allow any outside interference in Jordan's affairs. After reaffirming that there had been a plot against him, and that the escape of certain officers was proof of this, he concluded with an appeal for calm and order.

Imposition of Martial Law. - Dissolution of Political Parties. - Creation of Military Courts. - Mr. Toukan appointed Military Governor of Jordan.

On April 25 martial law was proclaimed throughout the country; an all-day curfew was imposed in Amman, Jerusalem, Nablus, and Ramallah; the police and all security forces were brought under Army control; all political parties were dissolved by Royal decree; a strict censorship was established; and all telegraph and telephone offices were taken over by the Army. In addition the frontiers were sealed, air services to Cairo, Damascus and Beirut suspended, and all telephone communications with neighbouring countries interrupted; outward air services, however, were resumed on the following day. Mr. Sulciman Toukan was appointed Defence Minister and Military Governor of Jordan on April 26.

Under emergency regulations published on April 28, Military Governors were appointed for the country's six districts and the military and police were given unlimited powers of entry, search, and arrest. Two military courts staffed by senior Army officers were established—one in Amman for the area east of the River Jordan, and one in Jerusalem for the area west of the Jordan—with powers to punish offences against the security of the State, violations of the martial law regulations, activity on behalf of any of the dissolved political parties, and attacks on or obstruction of the Army, the police, or civil servants in the performance of their duties. No appeal was provided for, but death sentences were required to be approved by the National Military Governor (Mr. Toukan) and confirmed by the King. An Order issued on May 16 provided that persons printing or spreading false news would be liable to terms of imprisonment from six months to two years.

The imposition of martial law was followed by numerous arrests. At least 200 people were reported to have been arrested on April 25-26, including Mr. Nabulsi, and other persons seized during the next two weeks included a Communist member of Parliament, the public prosecutor in Jerusalem, the director and other members of the staff of the Ramallah broadcasting station, a number of Government officials, and several Jordanian employees of UNWRA. Mr. Abdul Kader el-Saleh and Mr. Naim Abdulhadi (Ministers of Agriculture and National Economy respectively in the Nabulsi Government) were arrested on May 15 but released two days later. Other left-wing political leaders and Army officers escaped arrest by fleeing to Syria, among them Mr. Rimawi, leader of the *Baath* Party and Foreign Minister in the Nabulsi Government. Lieut.-Colonel Halwani, commander of the artillery, escaped over the Syrian border on May 15, although wounded by shots from frontier guards; he sent a letter resigning his post to King Hussein from Damascus, in which he accused a group of officers of "criminally plotting" against him.

Although the curfew was gradually relaxed, the measures against Opposition organizations continued. The offices of all political parties and of the "all-party guidance committees" set up by the Nabulsi Government during the Suez crisis were closed on April 28; all trade unions and employees' associations were banned on May 1; the Arab Student Congress (described as an "extremist leftist organization") was dissolved on May 5; and five weekly papers associated with the National Socialist, *Baath*, and Communist parties and the National Front were suppressed on the same day. It was officially stated on May 13 that a letter sent by the secretary of the Venezuelan Communist Party to Dr. Zayadin, a leading Jordanian Communist, had been discovered which indicated that Dr. Zayadin was the secretary of the Jordanian Communist Party and had been receiving funds regularly from Venezuela.

The suppression of all Opposition elements was accompanied by a drastic purge of the Civil Service, officials appointed by the Nabulsi Government being dismissed and those dismissed by that government being reinstated. On May 5 the Cabinet assumed power to dismiss senior officials and empowered individual Ministers to dismiss junior officials, in order to "clean the service from corruption and affiliation to parties," while on May 16 it was announced that officials belonging to political parties would be debarred from employment. The entire staff of the Jordanian Embassy in Cairo was recalled on May 13, and Mr. Fawzi el-Mulki was replaced as Ambassador by Mr. Abdul Munim Rifai (a brother of the Foreign Minister), who had been removed by the Nabulsi Government from the post of Ambassador in Washington.

U.S. Sixth Fleet sent to the Levant. - Soviet Protest at American Naval Movements in Eastern Mediterranean.

After telephone discussions with Mr. Dulles, a statement was issued on April 24 by President Eisenhower (then on holiday in Georgia) saying that both he and Mr. Dulles regarded "the independence and integrity of Jordan as vital."

A State Department spokesman said that the President's statement "represents a reminder to the world by the President that a finding has been made in a joint resolution of Congress on the Middle East [i.e. the Eisenhower Doctrine] that preservation of the independence and integrity of nations of the Middle East was vital to the national interest of the United States and to world peace [see 15417 A.] The reminder was appropriate because of the threat to the independence and integrity of Jordan by international Communism, as King Hussein stated yesterday." The spokesman added that, to his knowledge, King Hussein had not requested armed U.S. assistance and the President had not invoked the emergency powers granted him by Congress.

The State Department announced on April 26 that Israel, Syria, Egypt, and other Governments in the area had been advised to exercise "caution and prudence" and to avoid any action that might aggravate the situation. The Israeli Foreign Minister, Mrs. Meir, had informed the U.S. Ambassador on the previous day that Israel would not intervene in Jordan so long as the *status quo* there was maintained, but reserved the right to freedom of action if Jordan was dismembered by other Arab States.

Units of the U.S. Sixth Fleet, including the 60,000-ton aircraft-carrier *Forrestal* and the heavy cruisers *Salem* and *Des Moines*, sailed on April 25 from the French Riviera for the Eastern Mediterranean at three hours' notice, and were joined by the battleship *Wisconsin* and 12 smaller vessels which had been visiting Italy. Six U.S. transports with 1,800 Marines on board anchored off Beirut on April 20, while 50 ships of the Sixth Fleet, described as "the most formidable naval striking force ever assembled in the Eastern Mediterranean," carried out air defence manoeuvres in the open sea. Mr. Brucker, the Secretary of the Army, said in a television interview on April 29 that U.S. troops were ready to be parachuted into Jordan "in a matter of days."

In London, the Under-Secretary for Foreign Affairs (Mr. Harvey) told the House of Commons on May 6 that the British Government had been informed in advance of the U.S. fleet movements and had been in close touch with the U.S. Government over recent developments in the Middle East. The Sixth Fleet, he added, was exclusively under national command in peacetime, and NATO sanction was not required for its movements.

The Soviet Foreign Ministry issued a statement on April 29 strongly protesting against the U.S. fleet movements as "an open military demonstration against the countries of the Arab East." The statement ran:

"During the last two or three weeks gross pressure from outside has been exerted on Jordan and the Jordanian Government, accompanied by threats to dismember her territory and deprive the Jordanian people of its national independence, and by promises to give financial and other aid if Jordan will deal severely with the patriotic forces fighting against the subordination of their country to foreign dictation. It is not concealed that, after Jordan, the object of similar colonialist actions might become Syria and Egypt, which have resolutely rejected the Dulles-Eisenhower doctrine and all attempts to drag them into aggressive military blocs, undermine their national independence, and subordinate their foreign policy to the plans of the colonialist powers.

"The situation created in Jordan cannot but cause serious anxiety among peace-loving States, including the Soviet Union, in whose interest it is to preserve peace and tranquillity in the Middle East . . The Soviet Union cannot ignore the events in this area, because the situation created in Jordan and in the area as a whole is the product of flagrant foreign intervention, a new imperialist plot representing a serious threat to peace. This plot is aimed at destroying the unity of the Arab peoples fighting against colonialism and . . . at setting the Arab States against each other, based on the calculation that in the resulting situation it would become easier to reimpose on the Arab States the yoke of colonial oppression and to plunder their wealth."

After accusing Iraq and Israel of planning "to attack Jordan should the internal situation in that country develop in a manner displeasing to the colonial Powers and the members of the aggressive Baghdad Pact," the Soviet statement continued: "The United

States has dispatched the Sixth Fleet to the eastern shores of the Mediterranean, which is an open military demonstration against the countries of the Arab East . . . This is an example of how the U.S. imperialists are trying to establish themselves in the Near and Middle East and to squeeze out Britain and France . . . The events in Jordan offer a typical illustration of the widely publicized Dulles-Eisenhower Doctrine. Although little time has passed since it first saw the light of day, its imperialistic content has already become obvious. Yesterday it was Egypt, today it is Jordan, and tomorrow any other Arab State may become the object of imperialist conspiracy"

The Soviet charges of U.S. interference were refuted in Washington, where the State Department spokesman (Mr. Lincoln White) issued the following statement on April 30:

"There has indeed been foreign intervention in that country [Jordan]—namely, as King Hussein said on April 24, the intervention of international Communism The respective records of the United States and the Soviet Union speak for themselves. Since World War II the United States has encouraged and welcomed the movement towards independence which has led to the formation of 19 new States. During the same period the Soviet Union has subjected 10 once independent nations to its rule. The harsh character of that rule was recently demonstrated in Hungary."

The U.S. Ambassador in Amman, Mr. Mallory, was received by King Hussein and Mr. Samir Rifai on April 26. He subsequently announced on April 29 that the U.S. Government, "recognizing the brave steps taken by H.M. King Hussein and by the Government and people of Jordan to maintain the integrity and independence of their nation," was prepared to provide the Jordanian Government with $10,000,000 in economic aid "to assist in economic development and the maintenance of political stability" in Jordan, and would "maintain a continuing review of Jordan's problems" with the Jordanian Government "to determine what further steps may be required." Mr. Lincoln White stated on the following day that Jordan had officially accepted the U.S. offer.

At a press conference on April 29 Mr. Rifai said that the Eisenhower Doctrine was "not an issue before the present Government" and that the Government had no intention of inviting Mr. Richards to visit Jordan. "We welcome any assistance from anywhere," he added, "provided it is offered unconditionally and does not interfere in any way with our freedom, sovereignty, and independence."

Syrian President's Meetings with President Nasser and King Saud. - King Hussein's Meeting with King Saud.

President Kuwatly of Syria, accompanied by the Syrian Foreign Minister (M. Bitar) and the C.-in-C. (Major-General Nizam ed-Din), flew to Cairo on April 25 to discuss the Jordanian situation with President Nasser. On the following day he flew to Mecca, where he met King Saud. In response to a request from King Saud, President Kuwatly was accompanied on his visit to Mecca by Wing-Commander Ali Sabry, President Nasser's political adviser, and two other Egyptian representatives, who took part in his talks with the King. Instead of returning directly to Damascus as he had originally intended, President Kuwatly flew back to Cairo on April 27 for further discussions with President Nasser before returning to Syria on April 28.

King Hussein, together with Mr. Rifai and Mr. Talhouni (Chief of the Royal Cabinet), flew to Riyadh on April 28 for conversations with King Saud, who was reported to have sent him a telegram congratulating him on the steps taken to restore order. A joint communiqué issued on April 29 described the Jordanian crisis as an "internal affair," and reaffirmed the adherence of Jordan and Saudi Arabia to the policy laid down at the Cairo conference in January (see 15340 A). After King Hussein's return to Amman, Mr. Rifai told a press conference on April 29 that Jordan's relations with Egypt and Syria remained those of "brotherhood and deep friendship in complete unity of aims and efforts in the service of Arab interests," and that the Government did not intend to ask Syria to withdraw her troops from Jordan. Mr. Rifai also said that Jordan was "not interested in the Baghdad Pact."

Jordanian Allegations of Egyptian-Syrian-Soviet Plot to overthrow Arab Monarchies and establish Republics.

Despite the assurances given by Mr. Rifai, the formation of the Hashem Government was regarded as marking a break with Mr. Nabulsi's policy of close Jordanian co-operation with Egypt and Syria, and of friendship with the Soviet Union, in favour of closer relations with the other Arab monarchies—Saudi Arabia and Iraq. On April 28 King Hussein formally refused his assent to the Nabulsi Government's decision to establish diplomatic relations with the Soviet Union. All offices in Jordan of the Egyptian-owned Middle East News Agency had been closed on the previous day, and all Egyptian journalists expelled from Jordan except an employee of a Western agency who was personally known to the King.

At a press conference on April 30 King Hussein strongly refuted the Soviet allegation that the U.S.A. was interfering in Jordan's internal affairs; reiterated that Jordan's foreign policy had not changed; and reaffirmed that there was "no difference whatsoever" in Jordan's attitude towards the Baghdad Pact. He declared, however, that "whoever tries to attack Jordan or to create difficulties in this country will be the one to blame for anything that might affect relations between Arab countries" apparently a reference to the anti-Jordanian propaganda by the Cairo press and radio.

The Egyptian Government was violently attacked in an unsigned article which appeared in the Jordanian newspaper *Al Urdon* on May 11 and was broadcast by the Government radio on the same day. The article, which was unofficially reported to have been written by Mr. Rifai, alleged that the Egyptian Government, with Syrian and Soviet support, had formed a conspiracy to overthrow the monarchies in Jordan, Saudi Arabia, Iraq, and Libya and establish republics in those countries, and for this purpose had bribed General Nuwar to assassinate King Hussein and carry out a military *coup d'état*.

"Egypt's policy," the article said, "was based on the annihilation of the two Hashemite thrones and the Saudi and Libyan thrones. On Jan. 30, 1956, Egyptian diplomatic representatives in the Arab countries met in Cairo and decided to adopt a policy aimed at overthrowing King Hussein of Jordan, King Faisal of Iraq, and King Saud of Saudi Arabia, and at establishing republics in the countries concerned under the leadership of the Egyptian Republic. This decision had the blessing of the Soviet Union and international Communism, which undertook to train spies and to send experts in espionage with the object of setting up a wide-scale spy ring in the Arab world.

"In October, 1956, a political military committee was set up to implement this policy. This committee included Colonel Abdul Hamid Sarraj, of Syria [head of the Syrian intelligence department and leader of the left-wing elements in the Syrian Army]; Hassan Ali Khalil, assistant military attaché in Beirut; Dimitri Yoshkov, Russian Vice-Consul in Beirut; Colonel Iskandar Matsakov, assistant Soviet military attaché in Beirut; and certain senior Jordanian officers. The duties of this committee were: (1) to strengthen relations between the Baath and Communist parties in Jordan and Syria, and to incite them to overthrow the monarchies in Jordan, Iraq, and Saudi Arabia; (2) to strengthen the influence of Colonel Sarraj in Syria; (3) to establish a Baathist-Communist régime and a Revolutionary Command Council in Jordan . . .

"When the time for carrying out the plot drew near, General Nuwar and Shafik Rusheida [another Jordanian officer] held a meeting in Damascus with the Soviet Ambassador to Syria. This was a few days before the dismissal of the Nabulsi Government. During this meeting they secured the support of the Soviet Union for the *coup d'etat* which they intended to carry out in Jordan. A few days before the Zerqa events an Egyptian officer arrived in Amman and handed to General Nuwar a large sum of money through the Egyptian military attaché in return for assassinating King Hussein.

"During the first week of April Soviet agents prepared plans for an armed intervention in Jordan by Syrian military units, supported by MIG aircraft bearing the Syrian emblem and piloted by Russian officers. But for the mercy of Allah and the courage of King Hussein, this country would have been the battlefield of a bloody war and Zionism would have taken the opportunity to achieve its objectives at the expense of Jordan.

"When the conspiracy was frustrated, the cowardly conspirators escaped and sought asylum in the countries which incited them. In these countries the conspirators began a campaign of lies and resorted to the weapon of cowards, that is to say, preparing for individual assassinations . . . This is only a part of many facts to be disclosed about the conspiracy."

Withdrawal of Syrian Troops from Jordan. - Jordanian Accusations against Syria.

It was officially announced in Damascus on May 25 that Syrian troops had begun to withdraw from Jordan at the request of the Jordanian Government and with the agreement of the Egyptian C.-in-C. (General Amer), the supreme commander of all forces in Egypt, Jordan, and Syria. It was stated that the request had been made because the ending of the immediate threat to Jordan from Israel rendered unnecessary the further presence of the Syrian troops which had been invited to Jordan in November 1956 after the Israeli attack in Sinai.

The Jordanian request was received in Syria with open hostility, the Prime Minister (M. Assaly) declaring on May 26—when the withdrawal of Syrian troops was completed—that Jordan's request constituted a violation of the Arab military co-operation agreement. A statement issued in Damascus on May 27 accused Jordan of "provocations" against the Syrian troops stationed in that country since last November.

The Jordanian Army Command, in a statement issued on May 28, strongly refuted the allegation of "provocations" against Syrian troops; described the Syrian statement

"full of lies"; and accused the Syrian Intelligence Chief, Colonel Sarraj, of organizing the recent plot against the Jordanian regime. Colonel Sarraj, it was alleged, was the real head of the Syrian Army, which was being "turned into a political police force."

The statement alleged that Syrian troops then in Jordan had taken part in the plot against King Hussein; that Syrian officers had helped subversive elements to escape to Syria, that the Syrian Army had surrounded villages in northern Jordan with the aim of separating the area from Amman; and that Syrian forces had surrounded the Jordanian Intelligence Office (the chief liaison centre for Arab forces in Jordan) and tried to arrest the officer in charge, who, however, had escaped and warned the Jordanian Command.

The statement also alleged that Syrian forces had smuggled armed groups and weapons into Jordan, that the Syrians had cordoned off the town of Irbid (15 miles from the Syrian frontier) during the disturbances to help the plotters; that they had cut all telephone communications between Jordan, Syria, and Iraq and had given arms to criminals and told them to carry out political assassinations in Jordan; and that Syrian officers had held meetings with Communists and other subversive elements and had distributed pamphlets calling for the overthrow of the Government. It was also stated that about 160 people paid by the Syrian Intelligence Office had been arrested in Jordan, that Czechoslovak weapons had been found on them, and that they had made written confessions.

Finally, the statement rejected Syrian allegations that Saudi Arabian forces had been withdrawn from the Akaba area and that Iraq had massed three brigades on the Jordanian border to interfere in Jordan's affairs if Syrian troops remained in Jordan. [It had been reported on April 16, after the outbreak of the crisis in Jordan, that King Saud had ordered the Saudi Arabian forces stationed in that country since the Suez crisis to place themselves at King Hussein's disposal if the need should arise.]

Jordanian Request for Continued British Economic Aid.

It was reported from Amman on May 29 that Jordan had asked the British Government to continue its financial aid for the country's economic development, and that the request was being studied in London. Under the agreement ending the Anglo-Jordanian Treaty the U.K. had discontinued its subsidies for the Arab Legion, but it was stated at the time that economic assistance was regarded as a separate question.
(Times - Daily Telegraph - Manchester Guardian - Le Monde, - New York Times - New York Herald Tribune - Soviet Embassy Press Department, London) **(Prev. rep. Jordan, 15200 A; 15468 C; Eisenhower Doctrine, 15305 A; 15417 A; Anglo-Jordanian Treaty, 15434 D.)**

A. RHODESIA AND NYASALAND FEDERATION. — Immigration Figures in 1956.

The number of immigrants into the Federation of Rhodesia and Nyasaland in 1956 totalled 26,201, against 20,018 in 1955.

Of the 1956 total, 22,310 were British subjects of European stock, including 11,270 from the United Kingdom, 9,838 from South Africa, 800 from other parts of the Commonwealth, and 201 from elsewhere. The remaining 201 were naturalized British subjects. European alien immigrants totalled 3,326 and Asian immigrants 547, all but seven from Commonwealth countries. There were also 18 Coloured immigrants.

In view of the high rate of immigration in the early months of 1956, it was announced in Salisbury on June 29, 1956, that the total of immigrants in the second half of the year would be restricted to 2,100 a month—1,800 British subjects and 300 aliens. On Sept. 10, however, the monthly quota was increased by 100 to allow the Selection Board more latitude in dealing with cases of aged relatives and with those who wished to settle in the smaller towns of the Federation.

The Minister for Home Affairs (Mr. Frank Owen) had announced on July 19, 1956, that, in view of the Cyprus situation, the entry of Greek and Cypriot immigrants would be temporarily restricted and only two categories admitted: (*a*) families of those already resident in the Federation; (*b*) persons who had already received residence permits and were considered necessary for essential work.

The Federal Prime Minister, Sir Roy Welensky, announced on March 7, 1957, that a Federal Immigration Department directly responsible to the Federal Ministry for Home Affairs would be set up by July 1, 1958. The new department will take over the detailed work on immigration at present carried out by the territorial Immigration Departments.
(Federal Information Department) **(Prev. rep. 14872 D.)**

B. NETHERLANDS. — Population reaches 11,000,000.

The Director of the Central Statistical Bureau (Professor Idenburg) announced on May 21 that the population of the Netherlands had passed the 11,000,000-mark. Professor Idenburg pointed out that the country's population had doubled in just over 50 years, the figure being 5,500,000 in 1905.

C. UNITED STATES. — Senatorial Election. - Mr. Yarborough returned as Democratic Senator for Texas.

Mr. Ralph Yarborough, a Democrat, was elected to the U.S. Senate on April 2 as a Senator for Texas at an election contested by 19 candidates. The Senate vacancy was caused by the resignation of Senator Price Daniel, who had been elected Governor of Texas in November last, and who took office as State Governor on Jan. 15 in succession to Governor Allan Shivers. Senator Yarborough will serve for the unexpired two-year term of his predecessor.

The election was contested by 16 Democrats, two Republicans (one nominated by the State Republican convention and the other running independently), and a non-party candidate. No nomination was made by the State Democratic convention, the principal Democratic candidates being Mr Yarborough (53), an Austin lawyer and a well-known member of the Texas Bar; Representative Martin Dies, chairman of the "Dies committee" which investigated anti-American activities; Mr. Searcy Bracewell, a member of the Texas Senate; Mr. James Hart, a former Justice of the Texas Supreme Court and onetime Chancellor of the University of Texas; and Mr. John White, the State Agricultural Commissioner.

Virtually complete figures showed that Mr. Yarborough had polled 353,923 votes against 284,881 for Mr. Martin Dies and 128,475 for Mr. Thad Hutcheson, the official Republican candidate. The other 16 candidates polled only 77,807 votes between them, of which 32,166 went to Mr. Bracewell, 19,093 to Mr. Hart and 10,825 to Mr. White.

Mr. Yarborough, a well-known Liberal Democrat, gave strong support to Mr. Adlai Stevenson in the presidential election, whereas the majority of Texas Democrats, following the lead given by Governor Shivers, had supported President Eisenhower both in 1956 and 1952. His victory was therefore regarded as a triumph for the liberal wing of the Democratic Party as against the conservative wing, with which Mr. Martin Dies is prominently associated.

The Senate seat vacated by Governor Daniel had been held temporarily by Mr. William A. Blakley, of Dallas, who had been nominated by Governor Shivers on Jan. 15 in the closing hours of his term of office. Mr. Blakley, a millionaire with large interests in oil, real estate, and insurance, declined to enter for the election. [Texan constitutional law provides that an election must be held within 60-90 days in the event of a U.S. Senate vacancy, and that, if Congress is in session, the State Governor shall appoint an interim senator to serve until replaced by an elected official.]

Wide interest was aroused in the Texas election, since the control of the Senate was at stake—i.e., a Republican victory would have meant that the Democrats and the Republicans would each have had 48 seats in the Senate. Mr. Yarborough's victory, however, left the composition of the Senate unchanged at 49 Democrats and 47 Republicans.—(New York Times)
(Prev. rep. Senatorial Elections, 15237 A.)

D. FRENCH CAMEROONS. — First Prime Minister under Statute of Self-Government.

M. André-Marie M'Bida, president of the Cameroonian Democratic Party, was elected by the Territorial Assembly on May 16 as the first Prime Minister of the French Cameroons under the new statute of self-government. The voting was 56 in favour of his appointment and 10 against.

In accepting office M. M'Bida stated that his programme aimed at achieving independence in stages, close and friendly co-operation with France, the combating of illiteracy, increases in family allowances and salaries when the economic situation permitted, and measures to attract French and foreign investment. He appealed to France to maintain her financial and technical aid to the territory.

M. M'Bida formed his Government on May 18, M. Ahidjo (a former President of the Territorial Assembly and a member of the Assembly of the French Union) becoming Deputy Premier. There were eight other Ministers and five State Secretaries.—(Le Monde, Paris) **(Prev. rep. 15511 A.)**

E. UNITED KINGDOM. — Clean Air Council.

The Minister of Housing and Local Government (Mr. Brooke) announced on May 6 the membership of the Clean Air Council which was set up under the Clean Air Act, 1956, to assist the Minister and local authorities in the prevention of air pollution. The 29 members are drawn from local government, industry, the trade unions, engineering, research, and the nationalized industries, and include Sir Hugh Beaver, chairman of the committee whose report led to the passing of the Clean Air Act. They will hold office for not more than three years and will be eligible for reappointment. The Minister will be chairman of the Council, the two vice-chairmen being the Parliamentary Secretaries to the Ministry of Housing and the Ministry of Power, respectively Mr. Bevins and Mr. Renton.
(Daily Telegraph) **(Prev. rep. Clean Air Act, 15374 A.)**

A. UNITED KINGDOM. — Parliamentary Debate on Government's Decision to use Suez Canal. - Rejection of Opposition Censure Motion. - Mr. Macmillan on Plans for Additional Pipelines and Super-Tankers to reduce Dependence on Canal. - Admiral Slattery appointed Special Adviser on Transport from Middle East.

The Government's decision to allow British shipping to use the Suez Canal, announced by the Prime Minister on May 13 (see page 15547), was debated by the House of Commons on May 15-16. The debate took place on the Opposition censure motion expressing "concern at the outcome of the Government's Suez Canal policy" and deploring "the damage to British prestige and economic interests resulting therefrom" (see page 15548, first column). At the end of the two-day debate the censure motion was defeated by 308 votes to 259—a Government majority of 49.

Speech by Mr. Hugh Gaitskell.

Mr. Gaitskell, Leader of the Opposition, opened the debate on May 15 with the following speech:

"In our opinion, given the circumstances in which we find ourselves, there was no real alternative to the decision that British shipping could go through the Canal. To have gone on boycotting the Canal by ourselves, or with the French, would have done us serious economic harm; it would have penalized our exporters and involved continuing dollar expenditure which we can ill afford—and without any or very little chance that we would have achieved any better terms for a Canal settlement as a result. Only with unity among the users of the Canal could such a boycott have succeeded, and it is perfectly plain that no such unity existed. So, in all the circumstances, we have to be realistic and recognize that all ideas of 'going-it-alone' are nonsense; that we must cut our losses and swallow our pride . . .

"We should certainly have no illusions about what our losses are. First, there is the financial account *vis-à-vis* Egypt. While we have blocked their sterling balances they have seized all our stores at Tel-el-Kebir, and private investments on a substantial scale. They have announced their intention of claiming damages against us. What worries me is that while I believe Egyptian assets here [in the U.K.] amount to just over £100 millions, my impression is that British assets seized in Egypt are worth substantially more. If that is the case, our bargaining position is weak. What is the Government's attitude to the Egyptian claim for damages as a result of bombardment by our armed forces? Are they rejecting this claim out of hand or are they prepared to go to arbitration on it?

"Can we also have an assurance that the Government accepts full responsibility to indemnify those British subjects who have suffered severe losses in Egypt, personally and in relation to their property? The Government is entitled to claim what they can from Egypt, but we cannot be sure such claims will be substantiated. If they are not, the Government must accept full responsibility.

Referring to the terms on which the Canal was being used, Mr. Gaitskell said: "It is of course a unilateral declaration by Egypt, and most of the points made are the same as the promises given last summer by Nasser. The British Government of the day emphasized that the Suez Canal was our life-line; that if it were cut there would be grave unemployment; that the Canal could not be left under the control of a single Power; and that we must demand acceptance of the proposals of the 18-Power conference in London last August. To a British Government that does all this, the latest terms from Egypt can fairly be described as involving capitulation . . . In the new proposals there is nothing except a vague sentence about co-operation between the users of the Canal and the Egyptian Canal Authority. In the Hammarskjöld-Fawzi correspondence [in October 1956] there was an elaborate structure of co-operation . . . We are now forced to accept terms far worse than those we demanded earlier and somewhat worse than those we could have had; and the reason is that our bargaining position has been gravely weakened as the result of the events of October 30.

"I ask the House to contrast the situation which obtained in October with that which obtains today. At that time our ships were going freely through the Canal. The users of the Canal were united, they had got together at the London conference, agreed on proposals, and were prepared later, though the British Government was reluctant to do so, to negotiate on these proposals. At that time our influence in the United Nations was still considerable; time was on our side; the dues were being paid only partially to the Egyptian Government. So far as we were concerned they were still being paid to the account in London of the old company. To-day the ships are diverted, the Canal users are not united but divided, our influence in the U.N. is gravely undermined, we are obliged to act in a hurry because we cannot afford to lag behind other users in using the Canal."

"It is ironical to contrast what has happened with those frequent statements by the Foreign Secretary last August that the great weakness of the U.N. was that it could not do things in a hurry and that, therefore, we must use other action to get it done more quickly. How much better it would have been if we had exercised a little patience when time was on our side and we were in sight of a reasonable settlement.

"I turn to the question of what next can be done, for I am far from wishing this debate, or my own speech, to be purely critical. We have obviously to try to negotiate an improvement on the Egyptian declaration. That was implied by the Prime Minister when he said 'This is not the end of the story.' [A reference to the Prime Minister's reply to Mr. Emrys Hughes - see page 15548, first column]. What was the exact significance of that phrase? If he meant that he had some new cards up his sleeve which he was going to play, the House is entitled to know a little more about it. It is dangerous if you have not the cards up your sleeve to pretend that you have.

"I do not believe it will be difficult to negotiate with the Egyptians some elaboration of their declaration about co-operation between the users of the Canal and the Egyptian Authority. It may not be particularly difficult, at least from a technical angle, to get going negotiations on compensation for the shareholders of the Canal Company, with provision for arbitration as well.

"The much more difficult issue is that of Israeli shipping. Our view on this matter has never wavered. It is that freedom for users of the Canal, including the Israelis, is implicit in the six points of the Security Council's resolution. We believe that this question of Israeli shipping could have been dealt with by the Assembly at the time when they were debating the withdrawal of Israeli forces. I am not saying that it was possible or reasonable for the Israelis to insist on laying down conditions before they withdrew, but there was an obligation upon the Assembly to recognize that Israel had some wrongs which it had to put right. The Assembly should have combined in a single resolution as was proposed by Mr. Lester Pearson that Israel should withdraw, Egypt should give up the state of belligerency under which she had always claimed to stop Israeli ships, and the U.N. Emergency Force should be accepted by both countries and should stay there until a permanent settlement had been reached.

"I regret very much that the Assembly did not reach that conclusion. One reason why it was not possible to get them to accept it was the appalling loss of British influence in the United Nations. The obligation of the Assembly remains, and, indeed, is increased by the fact that the Secretary-General repeatedly assured Israel -and so did the United States -that if they were to withdraw, this other matter of the state of belligerency would be dealt with. Therefore it is up to the U.N. to deal with it. The Security Council, as long ago as 1951, called upon Egypt to allow Israeli ships to go through . . . We believe that is the starting point on which any new negotiations should take place. The onus lies upon Egypt either to accept the Security Council's resolution of 1951 or to take the matter to the International Court. Israeli shipping must also be free to use the Gulf of Akaba and to go through to Eilat. We may say that the situation is a little better because the UNEF is there, and that it is not possible for Egypt to stop ships [in the Gulf] except by an act of war . . ."

Turning to the situation in the Middle East generally, Mr. Gaitskell continued: "Our interest in the Middle East is that we wish peacefully to buy oil from that part of the world, and are prepared to help develop it. Our second interest . . . is to see that Israel and the neighbouring Arab States survive . . . These two aims can only be achieved if there is stability in the Middle East, but stability is governed by three forces—Arab nationalism, poverty and social revolution, and the influence of the Soviet Union.

"The United States have largely supplanted us in the Middle East. I am not one of those who grumble about that. We gave it to them on a plate and invited them virtually to go in. I do not believe they were particularly anxious to get themselves so heavily involved militarily and politically. It is clear that they are conducting what one might describe as a holding operation. They are continuing one of the policies which the British Government used to follow trying to separate the other Arab States from Egypt. For a short period at any rate this policy may have some success. This is true as regards both Saudi Arabia and Jordan . . . But, whatever the short-term gains may be, the basic problems of the Middle East cannot be tackled unless we are prepared eventually to talk with the Russians about them.

"The dispute between us and the Government has never been on the merits of Colonel Nasser's action in nationalizing the Suez Canal. Our dispute has throughout been simply on the question of how this problem should be dealt with. From the start, we have urged two things—that we should not act alone in this matter, and that we should not use force contrary to the U.N. Charter. The Opposition accepted the 18-Power proposals, not thinking them unreasonable, although they had urged that the Government should not regard them as the ultimate. The Opposition also believed that by the end of October a settlement was in sight which, though not ideal, was reasonable. It was at that point that, using the Israeli attack as an excuse, the Government chose to invade Egypt.

"One of the worst features of this whole episode is that it was a serious blow to that better relationship between the peoples of the East and West which we had so carefully fostered over the previous 10 years. There were those who said—many on the Conservative benches—'If only we had been allowed to go through with it; if only America had behaved differently; if only the Russians had behaved differently; if only the Opposition had behaved differently.'

"Those who talked about the Labour Party searching its conscience and standing in a white sheet utterly failed to understand its point of view. We could not support a policy which was in our view utterly wrong and utterly damaging to our national interest; which violated all the principles on which our foreign policy had been based for the past 10 years. We wished to see, and still wish to see, our country not putting itself above international morality but giving moral leadership to the world. In refusing to support the Government's action in going to war, and in opposing it, we did

something at least to preserve a bit of our reputation in the Middle East. But whatever attitude the Opposition had adopted, it would not have made the slightest difference to the reaction of America, the United Nations, or Russia.

"There may be a certain inner logic among those who have recently left the party opposite [i.e. the eight Conservative M.P.s who relinquished the party Whip—see page 15548, first column] by which they say—'Yes, we will go-it-alone, never mind what happens.' While there is an inner logic, it is completely out of relation with the realities of the external situation. This notion that we can go-it-alone, that we have the power to do so regardless of our allies and the Commonwealth, is nothing short of lunacy, and the mystery is how the Government for a time followed that attitude. Leaving morality out of it altogether, an appalling error of judgment was made.

"It is not right that responsibility for this should be laid at the door of one man. It is not the late Prime Minister [Sir Anthony Eden] but the whole Government who are responsible, those who backed it throughout, those who opposed it but had not the courage to resign, those who backed it at first and then withdrew their support. The present Prime Minister's role in this remains somewhat obscure, yet he was a man who could, perhaps more than any other member of the Government, have given sound advice. He had been Foreign Secretary, he had been Minister of Defence, he was Chancellor of the Exchequer . . .

"As for the future, the lesson is clear enough. We must reaffirm our belief in the three essentials of our foreign policy—unity with the Commonwealth, support for the U.N. Charter, and support for the Anglo-American alliance. We must not only reaffirm them, we must base our policy upon them. Only in that way, and by abandoning the paths down which the Government strode last time, can we hope to regain some of our lost influence and prestige in the world. Only in that way can we regain confidence in ourselves, and unity with the Commonwealth and our Allies. All these things are essential if we are to achieve a lasting world settlement for which the sorely distracted people of the world are longing."

Speech by Mr. Macmillan. - Plans for Additional Oil Pipelines and Super-Tankers. - Rear-Admiral Sir Matthew Slattery appointed Special Adviser on Transport from the Middle East.

The Prime Minister, who followed Mr. Gaitskell, defended the Government's decision to use the Suez Canal and the Government's policy in the Middle East generally. In the course of his speech Mr. Macmillan spoke of the additional oil pipelines projected in the Middle East and the increasing number of super-tankers which would come into service in the next few years, thereby reducing dependence on the Suez Canal as a means of transportation. He announced in this connexion the appointment of Rear-Admiral Sir Matthew Slattery as special adviser on transport from the Middle East, with the task of assisting the Prime Minister to "concert and direct" the activities of the various Government agencies concerned in the building of fast modern tankers which could operate economically round the Cape, new facilities at ports such as Milford Haven for discharging them, and additional Middle East pipelines.

Sir Matthew Slattery (55) has been chairman and managing director of Short Bros. and Harland since leaving the Royal Navy. During the war he was Director-General of Naval Aircraft and Development at the Ministry of Aircraft Production, and later Chief of Naval Air Equipment at the Admiralty.

The Prime Minister spoke as follows:

"We cannot complain of the Opposition's decision to put down a motion of censure or even at their attempt to exploit the political situation, from which they may hope to draw some dividends. But I am slightly surprised at the terms of the motion. With the best will in the world I cannot agree that over the past seven or eight months the Leader of the Opposition has chosen as his single directing purpose the maintenance of British prestige.

"The broad opinion of the greater majority of our fellow-countrymen can be stated quite simply. They have a full understanding of the crucial problem and the crucial challenge which confronted the Prime Minister and Government of the day; they do not think that the Opposition did much to help. They know that Sir Anthony Eden was actuated by the highest patriotic motives, based upon a longer experience and fuller understanding of world affairs than almost any man in this country. They believe that if the decisions he took—with the full, complete, and unanimous support of his Government—were misrepresented at home and misunderstood abroad, there is a growing body of opinion in every part of the world which is beginning to appreciate and understand. We therefore believe that his actions and those of his colleagues will be fully justified by history."

Referring to the Egyptian declaration on the Canal, the Prime Minister continued: "This is not a satisfactory agreement for the reason that it is not an agreement at all. It is a unilaterally drawn prospectus of the terms on which the Egyptian Government are prepared to offer the use of the Canal to potential customers. It is a statement of conditions made by one party only, with no such guarantees as would adhere to an internationally negotiated settlement. It is true that the Egyptians have offered to register the document at the U.N., but I doubt very much whether international law prevents them from withdrawing it or amending it at their will.

"It could be argued that we could have obtained by negotiation a multilateral international agreement of the kind we sought, but I do not think there are any grounds for saying this. At no point during the long negotiations between the seizure of the Canal and the other events in that area which precipitated military action was there any real willingness on the part of the Egyptian Government to be tied down to any definite proposals . . . There remain two vital points First, it is a unilateral declaration which the Egyptian Government can amend or withdraw at will and it is, therefore, unacceptable as it stands. Secondly, since such a decision would be a political decision—a decision to amend it or withdraw it unilaterally—it does not insulate the Canal from the politics of one country.

"I believe the House as a whole will agree that we have made the right decision. It would not be a tolerable position for our country if the great bulk of international traffic were to pass through the Canal and we were to be excluded from it by our own will. We have therefore thought it right to advise British shipowners accordingly . . . In reaching this decision we have been throughout in close touch with the Commonwealth Governments concerned. We have had the advice of some of them throughout all the deliberations of the Suez Canal Users' Association."

On the new financial arrangements with Egypt, Mr. Macmillan said: "I think the House will agree that it is essential that if we are to pass through the Canal, any payments and outgoings which are necessary should be paid in sterling. Discussions were held between the Bank of England and the Bank of Egypt, and the consequential banking arrangements have been made with the approval of the Governments concerned. This particular Account must be free and it is, therefore, worth while considering making a Special Account open to British residents for current trade transactions. That matter we are prepared to consider and decide according to what is our own interest.

"There are large sums in the blocked account and we have large claims. Up to now we have thought it prudent to deal with the difficulties of individual British citizens by the machinery of the Resettlement Board, but that deals only with immediate hardship. It will be one of the advantages of these discussions we are about to begin that we can put forward claims we are entitled to make and are determined to press. We fully realize our responsibilities and the urgency of the matter for all those concerned, but it would not help our negotiations or increase our bargaining position if I were to say more."

Turning to the Canal question generally, the Prime Minister continued: "What shall we do to work for a multilateral agreement which can be the only basis for a satisfactory permanent settlement? Quite apart from the Convention of 1888, we believe that no country has the right to regard an international waterway like the Canal from a purely national point of view. We have always declared that there can be no real settlement which leaves uncontrolled authority in the hands of a single Power or does not at least conform to the 'six principles'. We shall continue to do everything we can in the coming months to secure a final settlement on these lines. That is also the view of the great user-countries. Since it is these user-countries that can alone contribute the capital resources needed for strengthening and modernizing the Canal, this is an aspect to which the Egyptian Government must give some attention. The maintenance of the Canal as an Egyptian asset must have the goodwill and confidence of the users. Meanwhile, we shall continue to use every method we can to secure our purpose . . .

"Israel's rights under the 1888 Convention must be assured. We shall do all we can, through the U.N. and with our friends, to see that this happens. Egypt has stated her willingness that disputes or disagreements arising in respect of the Convention should be settled in accordance with the U.N. Charter. We shall join with others to try to see that effective action is taken under the terms of the Charter. I hope the matter can be settled by the U.N. quickly and thus avoid the long delay of the International Court procedure. I agree that this is a great responsibility on the United Nations . . . Similarly, with regard to the Gulf of Akaba we have made our position clear. I am glad to say that the American Government have done the same . . . The important thing is to get the U.N., one way or another, to support what Israel believes to be her right . . ."

After stressing that there would be an increasing world-wide demand for oil, despite the encouragement given to the expansion of nuclear energy, Mr. Macmillan went on: "This means that whatever settlement may be reached over the Suez Canal, the facilities for bringing oil from the Middle East must be enlarged. The international oil companies have set up committees to go into the possibilities of constructing additional pipelines. As soon as the plans have been worked out they will be put before the Governments concerned, including those of the countries of the Middle East.

"As far as tankers are concerned, there is no doubt that the existing fleets will be insufficient to cater for world requirements. Since November there has been a tremendous flow of orders for tankers, and 30,000,000 deadweight tons are now being built or on order About 10,000,000 tons should go into service in the next two years and another 28,000,000 tons by 1965. Whereas there are now about 12 tankers of more than 40,000 tons, the number will have increased by 1965 to probably 300. These will be designed for economic operation not only through the Mediterranean, but round the Cape. Almost 5,000,000 deadweight tons of tankers are under construction or on order in U.K. shipyards and I hope to see those figures still further increased over the next few years.

"We now come to the problem of where these large tankers can discharge their oil. We must plan facilities for ships of up to 80,000 or even 100,000 tons. British oil companies are preparing to handle the increasing number of super-tankers likely to come within the next few years. Milford Haven, at which the Government are setting up a Conservancy Authority, looks like becoming a major European oil port [see 15124 B]. All these plans for pipelines and bigger tankers require large supplies of steel plate, and the steel industry also has to be expanded. These plans are well under way, and by 1962 the present output should be increased by no less than 60 per cent.

"If all these measures for facilitating and increasing the flow of oil are to be pressed forward with a real sense of urgency, they require the close co-operation not only of a large number of Government departments but of privately owned companies. I have therefore decided to appoint a Special Adviser on Transport Facilities who will assist me to concert and direct the activities of the various Government agencies and to ensure that there is no avoidable delay in carrying these duties to fruition. I have selected for this duty Sir Matthew Slattery, who has had such splendid success as chairman and managing director of Short Brothers and Harland Ltd. Sir Matthew will take up his duties at once and will be free to find the necessary assistance to help him.

"I would like to turn to a wider field before I finish. I am conscious of the sense of frustration and disappointment which many Members feel, but I do not think that it is in the interests of this country to represent the present situation as an unequivocal success for Colonel Nasser. I would never try to represent a situation as good which I did not believe to be good. I have already said I think this is an unsatisfactory arrangement, and it certainly does not satisfy us. But I would not support the view that it is the end of the story—or quite so completely one-sided an outcome as some people appear to believe.

"Before the Canal situation arose, the situation in the Middle East in the last two or three years had been growing steadily more dangerous. The immense efforts of Communist subversion, propaganda, and infiltration had produced a great effect. The Soviets, foiled in Europe by the organization of NATO, sought out the weak spot where extreme nationalism and xenophobia were easy to exploit. I am not sorry this situation was revealed by the events of the last year. If this had gone on growing without any lancing, it might have reached a stage where the poison could not have been got out.

"In the last six months the Opposition, like Ansaldo, have been crying 'Woe! Woe!' They told us that what we did would lead to the break-up of the Baghdad Pact—'total disruption' was the phrase they used. The Baghdad Pact is stronger to-day than before. The accession of the U.S. Government to both the Military and Economic Committees is a source of additional strength to the pact. The Opposition told us that the Government would unite all the forces of Arab nationalism against this country. Of course, there is a great struggle going on, but I think that in recent weeks there have been substantial gains, and in many ways the position of the Egyptian Government is weakened. Egypt has become isolated from many of those whom she claimed to be her friends, and who are now taking every opportunity to free themselves from Egyptian domination and the dangers of Egyptian expansion. The Arab world has not been united against us. On the contrary, the groupings are changing in their character and there is good hope for thinking that these tendencies will continue.

"The Opposition also claimed in December that the Anglo-American alliance had been broken beyond repair. I did not take that view. I said then: 'It is now possible that the United States have begun to realize what the Middle East problem really means, and the dangers involved not only to our country but to the whole world.' Since then there has been a revolution in American thinking on this matter which has led to great developments of policy, the closer association of the United States with the Baghdad Pact, and what I hope will be fruitful and sensible co-operation between the great oil companies of the Western world. What has happened has led to greater and not less Anglo-American co-operation in the Middle East . . .

"We have a great and powerful interest in the Middle East and we do not intend to abandon it. We are a great world Power and intend to remain so. We are not foolish enough to think we can live in a modern world without partners. That is why we stand by the alliances of NATO, SEATO, and the Baghdad Pact. That is why I have laboured to get our American friends to understand the hard facts and co-operate with us in facing them. I believe that if the Americans had understood the situation sooner and better, we would have been spared many of these troubles. I am not one of those who interpret co-operation on either side as subservience. We must be partners with respect for one another. We in Britain must not be afraid to make our position clear and defend our own interests. That is why, in spite of the pressure and agitation against me, I am determined that this country should be and should remain a nuclear Power.

"Let me make this appeal to Members on both sides. Do not let us minimize the difficulties, but do not let us exaggerate them. We must not be defeated by an episode or cast down by a difficult stage in a long journey. The history of a nation, like the life of man, is not a series of stills. It is a moving picture, and we must see it as a whole. We must be quick to exploit every phase or turn of events that can be turned to our advantage; therefore we need patience as well as courage, resilience as well as resolution. We have often in our long history had tactical setbacks or partial failures, and it has been our pride that we have been able to move on from them to ultimate success."

The Debate.

The debate was continued on May 15 by Captain Charles Waterhouse (C.), leader of the former Conservative "Suez group"; Mr. Wedgwood Benn (Lab.); Mr. Angus Maude and Sir Victor Raikes (Independent Conservatives), both of whom had relinquished the party Whip in protest at the Government's decision (see page 15548, first column); and other Members.

Captain Waterhouse described the Opposition's amendment as "an instance of Satan rebuking a sinner," as the Labour Party had been "responsible for our present difficulties at every point—responsible for the first crashing error, Abadan, and responsible for the other crashing error of not acting firmly about Israeli ships instead of weakly handing over the decision to the U.N., which shelved it after passing a pious resolution." Although in "complete sympathy" with those Conservatives who had relinquished the party Whip, he had not done so himself because he did not feel that the present Government or any of its leading members had major responsibility for "the errors of policy and failures in action from which the present lamentable situation has arisen."

Captain Waterhouse added: "We have an inveterate foe in Nasser. We ought to chase him like a pest officer chases a rat—chivvy him, harry him wherever he goes and whatever he does . . . We should show him up to the Arabs as a dethroner of kings, as a man who betrayed and ousted his own leader, and as a Communist adventurer, and to his own people as a man who has led their country into distress and poverty . . ."

Mr. Wedgwood Benn said that the Suez argument was not one between parties but between generations. Whereas a number of younger members on both sides of the House took the view that the idea of force was out of date in the modern world, the opposite view—that of the "dissident" Conservatives—prevailed among many older members, a number of whom, he admitted, were in the Labour Party. Mr. Benn also admitted that the Government's Suez policy had had the support of many Labour voters.

Mr. Angus Maude said that he had listened with sympathy to the Prime Minister's statement but had not found it wholly reassuring, as it was not accompanied by any practical suggestions for improving the situation in the future. History showed that every dictator had to keep up the momentum of his action and to have an enemy to attack; Nasser would thus continue to fulminate against Britain and Israel, and there was nothing to prevent him from discriminating against British shipping whenever he pleased. It was deplorable that the Government, by deciding to use the Canal, had bolstered Nasser's prestige at the very moment when it had suffered from his failure to bring about the downfall of King Hussein of Jordan (see 15561 A), and when Saudi Arabia was beginning to turn away from her alliance with Egypt. In these circumstances he could neither support the Government nor remain a member of the Conservative Party.

Sir Victor Raikes similarly criticized the Government for what he considered to be the weakness of its Suez policy. His main criticism was that since December, "far from trying to rally the Canal-users and to find means—diplomatic or otherwise—by which we could still have shown ourselves as a great Power in dealing with Egypt, we handed over everything to the United States and the United Nations." To hand over negotiations to those who had "stabbed us in the back" was to invite the failure of negotiations.

The debate on May 16 was opened by Mr. Selwyn Lloyd, the Foreign Secretary, a large part of whose speech was devoted to a defence of the Government's policy at the time of the Suez crisis.

Mr. Selwyn Lloyd claimed that the decisions taken during the crisis had furthered the interests both of Britain and of the Middle East as a whole, and expressed the view that there were now considerably more grounds for hope than nine months earlier. Like the Prime Minister, he said that the fundamental defect of the Egyptian declaration was that it was capable of being withdrawn without notice, in whole or part; he did not believe, therefore, that Egypt could command the confidence of the Canal-users on such a basis. The Foreign Secretary emphasized that H.M. Government wished to secure an agreement for the Canal which would conform to the Security Council's 'six principles'; that the Gaza Strip should not be allowed to become once more a base for *fedayeen* raids against Israel; that freedom of navigation in the Gulf of Akaba should be guaranteed to Israel and all other nations; and that UNEF should not be withdrawn from the Middle East, as it had a useful part to play in maintaining peace.

Speakers in the continued debate included Mr. Kenneth Younger (Lab.), Lord Hinchingbrooke (Independent Conservative), Mr. Shinwell (Lab.), Major Legge-Bourke (C.) and Mr. Aneurin Bevan (Lab.), the debate itself being wound up by the Prime Minister.

Mr. Younger criticized the whole trend of Government policy in the Middle East in recent years, declaring that 20 years' work in that area had been "put in jeopardy by the Government's single week of madness." After calling on the Government to persuade America to canalize her efforts [in the Middle East] into "collective and U.N. channels," he added: "It is no substitute for policies of this kind to talk, as the Prime Minister did, about keeping Britain great by having nuclear bombs. It is not by nuclear bombs that you are going to restore the prestige of Britain or exercise an influence again in the Middle East. So far from the Suez action being something

which history will justify, it was a piece of mulish obstinacy, without pride of parentage or hope of posterity. The country cannot afford either this sort of blunder or the sort of Ministers who were responsible"

Lord Hinchingbrooke (one of the eight Conservatives to resign the party Whip) said that the Prime Minister was fundamentally right in talking about "lancing the ulcer" in Suez. He added, however: "The Prime Minister believes that the poison was eradicated . . . [but] . . . it seems that he will have the greatest difficulty in sustaining that point of view . . . The military operations were catastrophic. The diplomacy since . . . has been entirely unsuccessful. That is why, not only on account of the immediate past but on account of our fears for the future, I and my hon. friends have thought it right—temporarily, as we hope—to depart from our allegiance to H.M. Government . . . It appears to be the Government's policy to encourage America in the Middle East. The Prime Minister welcomed the 'revolution in American thinking which has led to the great developments of policy and a closer association of the U.S.A. with the Baghdad Pact.' One must take that to mean that the Government watches with enthusiasm the American Sixth Fleet sweeping past us in the Mediterranean as we withdraw from Jordan, as we prepare to submit Cyprus to a NATO solution, and shortly after we have withdrawn from Port Said. I cannot subscribe to that policy. If we were at the height of the cold war, there might be something to be said for it. But there are indications that the cold war has passed its peak of danger. There is strong evidence that Communist military and ideological aggression is matched by American military and dollar expansion, and there are signs that the latter is gaining. Therefore I ask myself, 'Is America to be encouraged to divide the Middle East between herself and Russia? . . . "

Mr. Shinwell criticized certain Labour members who had spoken in "derogatory terms" of their own country; defended the military action taken by Israel in October; and strongly attacked American policy in the Middle East. "I listened yesterday," he said, "to some of my hon. friends speaking in derogatory terms of this country. They talked about this country being no longer a great military Power. Of course it is not. There is no great military Power in the world with the advent of the nuclear weapon. When it comes to our economic potentialities, associated with the Commonwealth, we are still a first-class country with remarkable possibilities. I dislike intensely this denigration of our country. The less we hear about this defeatism, the better it will be. It is a sign of weakness, of decadence. We ought to put a stop to it . . .

"I reject contemptuously the vile suggestion that Israel was an aggressor. That condemnation has come from this side as well as other quarters of the House. If a country takes action in its own defence, anticipating a possible attack by a potential enemy which regards itself in a state of belligerency, is that to be advanced as aggression? It might have been regarded as unfortunate in the circumstances, but it was inevitable . . .

"President Eisenhower says and does some foolish things. One of the most foolish, surely, is the statement that Israel is entitled to put one of her ships through the Suez Canal, but on no account is she to use force. Is anything so absurd? That is not a policy which gets you anywhere. It may well be that Israel will try to force her way through the Canal. Will the U.N. take action against her? If Egypt declines, where are we? . . . You cannot inject a U.N. Force into the Middle East when circumstances may create a situation where force has got to be used, and then say 'But of course, force must not be used.' The implication of UNEF . . . is that force may require to be used to make effective a decision of the United Nations . . . "

After saying that America's motive in the Middle East was to obtain control of the area's oil resources—a motive which was "not engendered in their minds in October but several years ago"—Mr. Shinwell continued: "We had a good deal of evidence in the Labour Government of manoeuvres executed by certain people, if not in the pay of the U.S. Government, in the pay of some of the oil companies; manoeuvres intended to weaken our position in respect of oil control in the Middle East. Now we have the Eisenhower doctrine. What is it intended to achieve? That the United States should be strong in the Middle East where we are weak. It means that dollars will be injected into the Middle East . . . It is the power of the purse—the American purse—that is going to control the situation. We have to make up our minds that that kind of philosophy must be resisted, and that it can only be dealt with through the United Nations. One of these days there will be a U.N. agency which will exercise effective control over the oil resources of the Middle East . . . "

Major Legge-Bourke said that he had a particular reason for understanding the position of Lord Hinchingbrooke because he himself had relinquished the party Whip in 1954 [see 13685 B] in order to show that Government that there were some Members who felt that the decisions about to be taken were likely to prove disastrous. He believed, however, that the action of the eight Conservative "dissidents" in relinquishing the party Whip would have had greater value had it been taken when the "Suez group" was formed, instead of being taken at the present time. "I honestly believe," said Major Legge-Bourke, "that if they had been prepared to do it then, there was just a chance that the one fatal step would not have been taken. The fatal step, in my view, was the decision to evacuate the Canal Zone . . . I say with the deepest sincerity to my friends who feel they must break away: 'I wish you had done it in 1954 if you were going to do it at all. I regret you have found it necessary to do it, but for Heaven's sake come back as soon as you can."

Mr. Aneurin Bevan, winding up for the Opposition, said that the resignation of Sir Anthony Eden had not "purged the guilt of the Government" After saying that he (Mr. Bevan) was not going to attack the Foreign Secretary because "there is no reason to attack the monkey when the organ-grinder is present," he reiterated that the Opposition had been unable to understand the motives which inspired the Government's Suez policy last autumn. In August there had been a considerable degree of unanimity in the House and no-one had supported Egypt's action in summarily seizing the Canal. Britain had allies all over the world, and all the Government needed to have done was to rally those allies to her side and, by exercising "the arts of diplomacy and education," make it plain to Egypt that Nasser had made a great mistake. Sir Anthony Eden, however, had "misdirected the whole of British energies on this problem" and had "used such belligerent language as to make it clear that he and his colleagues were seeking a cause for attacking Egypt."

In trying to understand the events of October last, he (Mr. Bevan) had been reading some of the documents, and one which had impressed him more than any other was the exchange of correspondence between Sir Anthony Eden and Marshal Bulganin. The Soviet Prime Minister, in a letter to Sir Anthony on Sept. 11, had written . . . "Presumably the British and French Governments intend to seize the Canal. But, Mr. Prime Minister, I ask you to give a thought to how it might end. It can scarcely be doubted but that such action would result in tremendous destruction on the Canal itself. No less would be the destruction to the oilfields in the countries of the Arab East and to the pipelines through those countries . . . It must be clear to you that the Soviet Union, as a great Power interested in the maintenance of peace, cannot stand aside from this question . . . "

On Oct. 23 (Mr. Bevan continued) Marshal Bulganin had sent a further letter expressing his satisfaction that the Security Council had reached "an agreed decision concerning the principles which provide a basis for a final settlement of the Suez Canal question," and welcoming the fact that "the method of negotiation in the Security Council has already brought its first results." Thus, only a few days before the Anglo-French military intervention, the position had been reached, firstly, that the "six principles" had been unanimously adopted by the Security Council, and secondly, that the Soviet Government, in private correspondence, had considered the Security Council's decision as marking a significant advance and providing a basis for further negotiation.

Mr. Bevan continued: "We have been told all along that one of the reasons why the Government took the action it did was to avert what might become a third world war. Here the Government is told by a great Power that the action we took might result in a third world war. Yet we took it. In face of the warnings and premonitions of the Soviet Union, the action of the Government in declaring war on Egypt can only be described as an act of criminal, frivolous lunacy . . There was no reason why we should have taken this precipitate action. Time was on our side. We were in a strong position. Our industries were not being undermined. Our lives were not in jeopardy. There was no reason why we should not have met the Egyptians and found how far they were prepared to go . . . The Government now have to face the fact that for no just cause they brought the country to the verge of war. They were restrained from the full consequences of their action by people outside and inside [the House], and if Members opposite had any sense of honour left they would now resign . . . "

Mr. Macmillan, replying to the debate, said that Mr. Bevan had played a "Jekyll and Hyde" role throughout the Suez crisis—sometimes that of "the serious patriotic statesman, looking to the future with the deep sense of responsibility which he hoped would soon be entrusted to him," and sometimes "reverting to his older nature, with the demagogue taking charge again." He (Mr Bevan) had been particularly unwise to rely upon Marshal Bulganin's assurance that the Security Council could reach a solution of the Suez problem, since the only operative part of the resolution had been vetoed by the Soviet Union itself.

The Prime Minister ended by expressing his support for the "Eisenhower doctrine," which, in the Government's view, represented "a most important contribution to the peace of the Middle East and one whose value can perhaps best be measured by the reaction it has elicited from the Russians." In this connexion he recalled that whereas the "Eisenhower doctrine" had been praised by Mr. Gaitskell as "a courageous contribution to peace," it had been criticized by Mr. Bevan—which "does not add up to any coherent policy at all."

Fourteen Conservatives (including an Ulster Unionist) abstained from voting—the eight Independent Conservatives who had resigned the party Whip and six others, who were understood to be Viscount Lambton (Berwick-on-Tweed), Mr. Neil McLean (Inverness-shire), Mr. John Eden (Bournemouth West), Mr. Norman Pannell (Liverpool, Kirkdale), Mr. Greville Howard (St. Ives) and Mr. Montgomery Hyde (Ulster Unionist, Belfast North). Fifteen Conservative members were "paired," while the four Liberals present voted against the Government.

House of Lords Debate.

The Canal question was also debated on May 23 in the House of Lords, on a motion by Lord Salisbury "drawing attention to the Government's statement in this House on May 14 with regard to the Suez Canal." No censure motion was introduced by the Labour peers.

Lord Salisbury said that "the decision to accept Nasser's terms for the use of the Canal . . . seems to me a decision of the most important kind which may have far-reaching consequences." As regards the events of last autumn, it was necessary to draw a distinction between the crises arising out of Nasser's seizure of the Canal and out of the outbreak of hostilities between Egypt and Israel. On the Israeli crisis, he agreed with the Prime Minister that the Anglo-French action had prevented war between Israel and the Arab States; moreover, it had been the main cause of bringing the United States into the Middle East. The main regret in many minds was that the "Eisenhower doctrine" had not been promulgated two years earlier; it might then have made a real difference to the situation and the Suez Canal might never have been "de-internationalized" at all.

Lord Salisbury continued: "I am not trying to make the Government a scapegoat for the present situation. I am not using this motion . . . as an excuse for having a whack at my old colleagues. Whatever one may feel about their decision to advise British shipping to use the Canal on Nasser's terms, I do not mean to suggest that they, any more than the late Government, have been responsible for Nasser's success. The responsibility for that, and it is a heavy one, must be shouldered firstly by the United Nations, secondly by the American Government, and thirdly, and by no means least, by Her Majesty's Opposition in this country."

"I can well understand why the Opposition preferred not to table a motion in this House. I have wondered at the hardihood of their colleagues in tabling one in another place [the House of Commons]. For if ever in our long history any body of men did their best to ensure that the policy of the Government failed, it was the Opposition in another place. I am not referring to the attitude towards our landing in Egypt. But long before that, practically from the beginning of this crucial period, the Leader of the Opposition and his supporters embarked on a course of action which they must have known could only bolster up the morale of Nasser at the expense of their own country. Practically every speech they made during that period could only have had that effect. That, no doubt, is why the speeches of Mr. Gaitskell, with the exception of his first speech, were consistently relayed by Cairo Radio. That being the case, to suggest that the Government are the main villains in this piece is manifestly absurd . . ."

The Government's Suez policy was defended by the Earl of Home (Leader of the House) and criticized by Lord Attlee and other Labour peers. Lord Rea, leader of the Liberal peers, appealed for the ending of recriminations and *post mortems* on Suez and urged that attention be concentrated on the future. (Times - Daily Telegraph - Manchester Guardian) **(15545 A.)**

Note. The last major House of Commons debate on Suez took place on Dec. 5-6, 1956, following Mr. Selwyn Lloyd's announcement of Dec. 3 that the British and French Governments had decided to withdraw their forces from Port Said (see page 15320). The debate was held on a Government motion which asked the House to approve "the policy of H.M. Government as outlined by the Foreign Secretary on Dec. 3, which has prevented hostilities in the Middle East from spreading, has resulted in a U.N. Force being introduced into the area, and has created conditions under which progress can be made toward a peaceful settlement of outstanding issues." The Opposition tabled an amendment condemning the "disastrous consequences" of the Government's Middle East policy and calling on the Government "to take all possible steps to restore Commonwealth unity, re-create confidence between our allies and ourselves, and strengthen the authority of the U.N. as the only way to achieve a lasting settlement in the Middle East."

The Labour amendment was defeated by 327 votes to 260 (a Government majority of 67) and the Government's motion adopted by 312 votes to 260 (a majority of 52). The following 15 Conservative Members voted against the Labour amendment but abstained from voting on the Government's motion asking the House to support its Middle East policy: Mr. Julian Amery, Mr. Biggs-Davison, Brigadier Terence Clarke, Mr. Anthony Fell, Lord Hinchingbrooke, Sir Ian Horobin, Mr. Montgomery Hyde (Ulster Unionist), Mr. Patrick Maitland, Mr. Angus Maude, Mr. Neil McLean, Mr. Gerald Nabarro, Mr. William Teeling, Mr. Lawrence Turner, Captain Charles Waterhouse and Mr. Paul Williams.

[The debate of Dec. 5-6 had been preceded by the series of Suez debates in the House of Commons on Dec. 3, Nov. 22, Nov. 5-6, Nov. 3, Nov. 1, Oct. 31, and Oct. 30. All these debates are summarized in 15316 A, 15201 and 15173 A, *passim*.]

A motion signed by 110 Conservative M.P.s (nearly one-third of the party's strength in the House) was tabled on Nov. 27, 1956, deploring "both the resolution of the General Assembly calling for immediate and unconditional withdrawal of British and French troops from Egypt and the attitude of the United States, which is gravely endangering the Atlantic alliance." The sponsors of the motion were Sir Robert Grimston, Mrs. Evelyn Emmet, Sir Ian Horabin, Mr. Martin Lindsay, and Mr. Angus Maude, the other signatories including both right-wing members of the Conservative "Suez group" and a large body of members representing moderate opinion in the party. The "anti-American" motion remained on the Order Paper until April 1, 1957, when Sir Robert Grimston, after consultation with the other signatories, announced that it had been withdrawn following the Prime Minister's speech in which he explained in detail the new accord reached with President Eisenhower at Bermuda (see 15457 A). At the time of its withdrawal the motion had been signed by 126 Conservative M.P.s, although 14 had subsequently withdrawn their signatures.

A. DENMARK. — Three-Party Coalition Government formed by Hr. Hansen. - Faroe Members elected to New Folketing.

Hr. H. C. Hansen (the outgoing Prime Minister), who had been asked by King Frederick to investigate the possibility of forming a new coalition government, informed the King on May 27 that he was ready to form a Ministry based on a coalition between the Social Democrats, the Radicals, and the *Retsforbund* (Single-Tax Party), who had agreed to co-operate. The membership of Hr. Hansen's new Cabinet was announced later the same day as follows:

*Hr. H. C. Hansen (Social Democrat)	Prime Minister and Foreign Affairs.
*Hr. Viggo Kampmann (Social Democrat)	Finance.
Hr. Jorgen Jorgensen (Radical)	Education.
Dr. Viggo Starcke (*Retsforbund*)	Minister without portfolio.
Hr. Bertel Dahlgaard (Radical)	National Economy and Scandinavian Affairs.
Hr. Jens Otto Krag (Social Democrat)	Foreign Economic Affairs.
Hr. Julius Bomholt (Social Democrat)	Social Welfare.
*Fru Bodil Koch (Social Democrat)	Ecclesiastical Affairs.
*Hr. Hans Haekkerup (Social Democrat)	Justice.
Hr. Kai Lindberg (Social Democrat)	Public Works and Greenland.
*Hr. Poul Hansen (Social Democrat)	Defence.
*Hr. Oluf Pedersen (*Retsforbund*)	Fisheries.
Hr. Kaj Bundvad (Social Democrat)	Labour and Housing.
Hr. Karl Skytte (Radical)	Agriculture.
Hr. Soren Olesen (*Retsforbund*)	Interior.
Professor Kjeld Philip (Radical)	Commerce, Industry, and Shipping.

* No change.

The new Ministry, which commands 93 votes in the *Folketing*, was the first majority Government to be formed in Denmark since the war. It consists of nine Social Democrats, four Radicals, and three members of the *Retsforbund*.

Hr. Krag was previously Minister of Economic Affairs and Labour, and had also been in charge of foreign economic affairs (i.e. foreign trade and European economic co-ordination); Hr. Kai Lindberg assumed the Greenland portfolio in addition to his previous portfolio of Public Works; and Hr. Bomholt had been Minister of Education. Hr. Bertel Dahlgaard is leader of the Radical Parliamentary group, and Dr. Viggo Starcke leader of the *Retsforbund*. Seven Ministers in Hr. H. C. Hansen's previous Cabinet—all Social Democrats—were dropped from the new Ministry: Hr. Smorum (Agriculture), Hr. Kjaerbol (Housing and Greenland), Fru Lis Gores (Commerce), Hr. Ernst Christiansen (Minister without portfolio), Hr. Christian Christiansen (Fisheries), Hr. Carl Petersen (Interior), and Hr. Strom (Social Welfare).

The elections in the Faroe Islands on May 22 for two members to represent the islands in the *Folketing* resulted in the return of Hr. Thorstein Petersen (the leader of the secessionist *Folkeflokken*) and an Agrarian (*Venstre*) candidate; the former Social Democratic member was defeated, losing the seat he had held since 1948.

Hr. Petersen, who represented the Faroes in the *Folketing* from 1947-50, had withdrawn from political life after his defeat in the *Lagting* (Diet) elections in the Faroe Islands in November 1954. He had been director of a bank which had gone bankrupt, the proceedings arising out of this case being still pending before the Danish Supreme Court.

The election of an Agrarian member in the Faroes increased the total strength of that party to 46 and that of the Conservative-Agrarian opposition to 76, whilst there is also a left-wing opposition of six Communists. The German minority member (Schleswig Party), the two members for Greenland still to be elected, and Hr. Thorstein Petersen are expected to remain independent of the other parties.—(Berlingske Tidende, Copenhagen - Politiken, Copenhagen) **(Prev. rep. Elections, 15556 B; Cabinet, 14918 B; Faroes, 13948 B.)**

B. AUSTRIA. — U.S. Loan for Steel Industry.

It was announced in Washington on May 5 that the Export-Import Bank had approved a $20,000,000 loan to the Austrian *Alpine Montangesellschaft* for the purchase of rolling-mill equipment in the U.S.A., the credit being repayable between 1962 and 1976. The *Montangesellschaft* is the largest Austrian steel producer, with plants in Styria and Carinthia. **(New York Times)**

A. IRISH REPUBLIC. — Report of Committee on Inland Transport. - Drastic Cuts recommended in Rail System. - Proposed Reorganization of Irish Railways. - C.I.E. Deficit of £1,600,000 in 1955-56.

The report was published on May 12 of the Committee on Inland Transport, appointed in July 1956 by the then Minister for Commerce and Industry (Mr. Norton), to examine the Irish Republic's internal transport system and recommend measures "to ensure the provision of the country's transport requirements on a basis which will best serve the public interest." The committee, whose chairman was Dr. L. P. Beddy (chairman of the Industrial Development Authority), recommended (1) that rail mileage should be cut by nearly 60 per cent and the number of stations by 75 per cent; (2) that virtually half the capital of *Coras Iompair Eireann* (the Irish Transport Board) should be written off; (3) that the railways should be set a time-limit in which to show that economic working was possible and that their operation ought to be continued in the public interest.

The report pointed out that the total net operating losses incurred by C.I.E. between 1946 and 1956 amounted to £11,300,000, and that since 1947 the organization had received £12,000,000 in direct State aid. It attributed this "unsatisfactory position" to (*a*) an excess of transport facilities to deal with the low volume of available traffic; (*b*) heavy operating losses on the railways, partly owing to low utilization of rolling-stock and too many railwaymen; (*c*) the "customer resistance" toward the railways, and the existence of alternative means of transport; (*d*) over-capitalization. As regards (*a*) and (*b*) the report pointed out that the C.I.E. system had for many years been "too large for the community's requirements," comparative figures of traffic density in 13 European countries showing that Eire came last both for passengers and goods. As to (*c*) it put the blame for the attitude of passengers and traders toward the railways on obsolete rolling-stock, too rigid classifications of charges, and the development of road motor transport. With regard to (*d*) it pointed out that the C.I.E.'s assets (valued at £20,860,000) already fell short of the issued capital by £2,543,000, and that it was estimated that fresh losses, with interest, would increase the deficiency to £6,330,000 by 1960.

Dealing with the current position regarding traffic and costs, the report stated that both passenger traffic and merchandise receipts on the railways (accounting for 50 per cent of all rail receipts) had recently improved considerably, but livestock traffic had fallen. On the roads, both passenger receipts (slightly higher than rail passenger receipts) and freight traffic were increasing and showed profits, while bus services in Dublin and other cities were in general "very profitable." In regard to costs, however, those of private firms were only between 35 and 85 per cent of the C.I.E.'s costs, 56 per cent of which represented wages and salaries. In this connexion the report referred to the "regrettable lack of co-operation between railway managements and the trade unions."

Comparing the relative positions of public and private transport in Eire, the report stated that in 1956 the seating capacity of private cars was 680,000, whereas that of road and rail vehicles combined was 126,000. About 2,302,000 persons did not possess cars and depended on public transport unless they used motor-cycles, scooters, or bicycles. The number of private commercial vehicles had grown from 8,868 in 1944 to 41,597 in 1956, about 35,000 men being employed in connexion with them as compared with about 23,000 employed on the C.I.E. and the Great Northern Railway.

The Committee's main recommendations were as follows:

(1) The rail mileage operated by the C.I.E. should be reduced from 1,918 to 850, and the number of railway stations should be reduced from 194 to 49.

The following principal lines should be retained: (*a*) Dublin-Wexford-Rosslare Harbour; (*b*) Dublin-Carlow-Waterford; (*c*) Dublin-Limerick Junction-Mallow-Cork, with connexions at Limerick Junction for Limerick and at Mallow for Tralee; (*d*) Dublin-Mullingar-Athlone-Galway, with branches from Mullingar to Sligo and from Athlone to Westport and Ballina. The future of the line connecting Limerick with Sligo *via* Tuam and Claremorris should be specially considered.

Only stations at larger towns should be kept open, e.g. between Dublin and Cork the only stations would be Kildare, Maryborough, Thurles, Limerick Junction, and Mallow. All stations between Dublin and Wicklow should be closed, including stations on the Dublin suburban services, which had been losing money.

(2) Areas at present served by railways or stations whose closure was recommended should be covered by short-distance bus services, and road and rail services should be closely co-ordinated. Where it would be uneconomic for the C.I.E. itself to provide connecting bus services, private operators should be encouraged to do so. In other suitable cases the C.I.E. should employ smaller buses with one-man crews.

(3) The C.I.E. should continue for the present to provide road freight transport, but in future should preserve strict impartiality between rail and road services. It should, however, make use of licensed hauliers where this would be more economic than the purchase of new vehicles.

[The report explained that because of the priority given by the C.I.E. in the past to its rail freight services, there had in recent years been "no striking progress" in its road freight department, probably leading to a more rapid growth of traders' own transport than would otherwise have been the case. The Committee had considered whether the C.I.E. should hand over road haulage to a new State-sponsored organization, or whether road freight transport should be wholly or partly decontrolled.]

(4) The Transport Act should be amended to facilitate the closing of branch lines and the removal of unreasonable commercial restrictions, in order that the C.I.E. might no longer have to meet uneconomic transport requirements.

(5) The C.I.E. should retain responsibility for the maintenance of the canal system, but should withdraw its barges, which were operating uneconomically. [One member of the Committee, Dr. Juan Greene, urged in an addendum to the report that the C.I.E. should be relieved of its responsibility for maintaining the canals].

(6) The C.I.E.'s issued capital of £23,403,543 (in Transport Stocks with interest guaranteed by the Minister of Finance) should be written down by £11,602,761. The interest on this latter amount should no longer be a charge on the undertaking but should be borne directly by the Minister.

(7) Compensation should be paid to staff displaced by the proposed reorganization, and the cost be borne by a special annual levy on all motor vehicles. In this connexion the Committee said: "We regret the serious consequences of disemployment of staff . . . but see no acceptable alternative. Indeed if steps are not taken on the lines we recommend, we consider . . . that the collapse of the undertaking must be regarded as imminent."

(8) A Transport Consultative Committee, composed of seven prominent persons drawn from outside the industry, should be set up to maintain a continuous review of transport conditions.

The Committee explained that it had made no recommendations respecting the reorganization of the Great Northern Railway because the future of this undertaking was determined by agreement between the Governments of the Irish Republic and of Northern Ireland. It stressed, however, that where there was lack of agreement between the two Governments, resort should be had to arbitration.

C.I.E. Results for 1955-56. - Loss of £1,600,000.

The report and accounts of *Coras Iompair Eireann* for the year ended March 31, 1956, published on Jan. 28, 1957, showed a loss of £1,625,542, after charging £1,888,000 for depreciation, compared with a loss of £866,535 in 1954-55.

The loss on railways amounted to £1,223,222, but profits were earned by road passenger services (£680,364) and road haulage services (£82,625). The introduction of more powerful diesel-electric locomotives resulted in an increase in passenger traffic on short-distance services, while merchandise traffic had also increased, but there was a substantial decrease in livestock traffic. The number of passengers carried by road services rose by 8,353,581 (6,137,402 in Dublin, 2,216,179 in the provinces), but road freight traffic decreased by 200,368 tons to 3,251,588 tons.

The report said that although good progress had been made in changing over to diesel traction, rising costs had more than offset the resulting economies and fares and freight rates had had to be raised, resulting in the diversion of traffic from C.I.E. services to private road transport. It added: "Because of the continued withdrawal of traffic from the Board's services, it is now apparent that the economies which can be achieved by the change-over to diesel traction will not be sufficient to eliminate losses. If the undertaking is to pay its way, steps must be taken to divert to it all the traffic—particularly the heavy long-distance traffic—which these rail services can carry. The alternative is State subsidies on an ever-growing scale."—(Irish Times, Dublin) **(Prev. rep. 14584 E; 11193 A.)**

B. SWITZERLAND.—First Increase in Bank Rate since 1936. - Anti-Inflationary Precautions by Government.

The Swiss National Bank announced on May 15 that its official discount rate would be increased from 1½ to 2½ per cent—the first increase in the Swiss Bank Rate since 1936.

The Bank explained that the increase was necessary in order to maintain the purchasing power of the Swiss franc and to restore equilibrium in the Swiss economy, which was at present exposed to great tension. Although exports, building activity, retail trade turnover, bank credits, and employment were all at record levels, this development had been accompanied by price and wage increases and by a disproportionate increase in investment and mass consumption. Moreover, the note circulation had risen to a level never before reached in peacetime, and over 400,000,000 francs had been lost in gold and foreign exchange since the beginning of 1957 because of the exceptionally big rise in imports, whilst savings had dropped in the same period.

The National Bank also pointed out that "decisive efforts" were necessary, both on the part of public authorities and private undertakings, to restrict investment, excessive demand, and capital requirements. On May 14 the Government had announced measures (*a*) to restrict the building plans of Federal, cantonal and municipal authorities, and (*b*) to bring about a reduction in the limits for Government export risk guarantees. (Neue Zürcher Zeitung) **(Prev. rep. 2356 C.)**

A. UNITED KINGDOM. — Edinburgh, Hornsey, and East Ham By-elections.

Polling took place on May 29 at Edinburgh South and on May 30 at Hornsey and East Ham North, the first two seats being held by the Conservatives and the East Ham seat by Labour.

Edinburgh South.

The by-election was caused by the resignation through ill-health of Sir William Darling (Conservative), who had represented the constituency since 1945. Result:

Clark Hutchison, A. M. (Conservative) .. .	14,421
Forsyth, J. A. (Labour)	9,781
Home, W. Douglas (Liberal)	7,439
No change. Conservative majority	4,640

Figures at the general election were: Sir William Darling (C.) 24,836, J.A. Forsyth (Lab.) 11,949—Conservative majority, 12,887.

The Conservative candidate received 45.6 per cent of the votes, the Labour candidate 30.9 per cent and the Liberal candidate 23.5 per cent, whereas at the general election the Conservative candidate received 67.5 per cent and the Labour candidate 32.5 per cent in a straight fight. The Conservative proportion of the poll thus dropped by 21.9 per cent and the Labour proportion by 1.6 per cent, while the Liberals polled over twice as many votes as in 1950, the last occasion on which they contested the seat. Of the total electorate of 48,071 (an increase of 445 since the general election), 65.8 per cent went to the poll, against 77.2 per cent at the general election.

Hornsey.

The by-election was caused by the death of Sir David Gammans (Conservative), the former Assistant Postmaster-General. Result:

Gammans, Lady Muriel (Conservative)	24,161
Mostyn, F. E. (Labour)	21,038
No change. Conservative majority	3,131

Figures at the general election were: Sir David Gammans (C.) 33,294, F. E. Mostyn (Lab.) 20,568, G. J. Jones (Communist) 1,442 Conservative majority, 12,726.

The Conservative candidate received 53 5 per cent of the votes and the Labour candidate 46.5 per cent, whereas at the general election the Conservative candidate received 60.2 per cent, the Labour candidate 37.2 per cent, and the Communist candidate 2.6 per cent in a three-cornered contest. The Conservative proportion of the poll thus fell by 6.7 per cent and the Labour proportion rose by 9.3 per cent. Of the total electorate of 71,771 (a decrease of 713 since the general election), 62.9 per cent went to the poll, against 76.3 per cent at the general election.

Sir David Gammans (61), who died on Feb. 8, had represented Hornsey since 1941. Born in Hampshire and educated at Portsmouth Grammar School and London University, he served throughout the First World War and subsequently entered the Colonial Service, spending 14 years in Malaya. He was known in the House of Commons as an authority on Far Eastern affairs, particularly in the economic field, and was a member of parliamentary delegations to Ceylon, Sarawak and the West Indies. In 1951 he became Assistant Postmaster-General, in which capacity he piloted through the House the Television Bill (1954) establishing commercial television. He was created a baronet in 1955.

East Ham North.

The by-election was caused by the death of Mr. Percy Daines (Labour and Co-operative) and resulted as follows:

Prentice, R. E. (Labour)	12,546
Bangay, J. H. (Conservative)	6,567
*Martell, Edward (People's League)	2,730
*Christopher, W. H. (I.L.P.)	458
No change. Labour majority	5,979

*Forfeited deposits.

Figures at the general election were: P. Daines (Lab. and Co-op.) 17,961, A. Silverstone (C.) 12,416—Labour majority, 5,545.

The Labour candidate received 56.3 per cent of the votes, the Conservative candidate 29.4 per cent, the candidate of the People's League 12.2 per cent, and the Independent Labour Party candidate 2.1 per cent. At the general election the Labour and Co-operative candidate received 59.1 per cent and the Conservative candidate 40.9 per cent in a straight fight. The Labour proportion of the poll thus dropped by 2.8 per cent and the Conservative proportion by 11.5 per cent. Of the total electorate of 38,920 (a decrease of 1,628 since the general election) 57.3 per cent went to the poll, against 74.9 per cent at the general election.

The by-election was the first to be contested by the People's League for the Defence of Freedom since the formation of that organization in 1956 (see footnote below). The I.L.P. candidate campaigned on the sole issue of abolishing nuclear weapon tests and the renunciation by Britain of all nuclear weapons.

Mr. Daines (53), who died on March 3, had represented East Ham North since 1945 and was a member of the National Committee of the Co-operative Party. He worked at one time as a locomotive fireman and later was for many years an insurance official. During the war he served in the Royal Engineers.

Mr. Clark Hutchison (43), an advocate, is a brother of Sir Ian Clark Hutchison, Conservative M.P. for Edinburgh West. Lady Gammans, the widow of the late Member for Hornsey, became the 27th woman M.P. in the House of Commons. Mr. Prentice (33) is assistant to the legal secretary of the Transport and General Workers' Union.
(Times - Daily Telegraph - Daily Herald) **(Prev. rep. 15437 D.)**

The People's League. The People's League for the Defence of Freedom was founded in 1956 to combat what it described as "trade union tyranny" and "arrogant bureaucracy." Its objectives were set forth as follows in a manifesto published on Sept. 29, 1956:

"(1) To organize public support for a policy which will afford protection and help for all citizens whose standard of life or freedom is threatened by the growing abuse of power by trades unions, or by administrative tribunals against whose decision there is no right of appeal to an independent judicial authority.

(2) To uphold the liberty of the Press by sponsoring a printing undertaking free from trade union dictatorship.

(3) To seek by all constitutional means to reform the law as it affects trades unions in order that they cannot become a State within a State or put themselves above the law.

(4) To curb the power of all kinds of monopolies, cartels and price rings whose activities hold the public to ransom.

(5) To subject all expenditure of public money to rigorous and continuous scrutiny and to campaign for the progressive reduction of rates and taxes and the elimination of bureaucratic waste.

(6) To combine in protecting its members from any infringement of their traditional liberties from whatever source it may come."

The chairman of the People's League is Mr. Edward Martell (its candidate at the East Ham by-election), formerly a prominent member of the Liberal Party. Other leading members are Lord Moynihan and Mr. W. J. Brown, the well-known journalist and political commentator. Mr. Brown was formerly Independent M.P. for Rugby and general secretary of the Civil Service Clerical Association.

The People's League emphasized that it "believes in democracy and is anti-communist and anti-fascist." It also stressed that it was "not connected with any political party or other existing organization." (Times - Daily Telegraph - Manchester Guardian)

B. LIBYA. — New Government.

Mustapha Ben Halim, Prime Minister of Libya since 1954, tendered his resignation to King Idris on May 25 for reasons of ill-health and "internal and external obstacles" to his Government's policy. At the King's request, a new Cabinet was formed on the following day by Abdul Majid Kobar, Deputy Premier and Foreign Minister in the previous Government. The Foreign Affairs portfolio was taken over by Dr. Wahbi Bourv, hitherto Permanent Under-Secretary in the Foreign Ministry, and the Defence portfolio by Siddiq Muntasir, recently Ambassador in Cairo. Six Ministers of the former Cabinet remained in office.

Abdul Majid Kobar, a member of a well-known Tripolitanian family, had been appointed Deputy Premier and Foreign Minister in a Cabinet reshuffle on March 17. He had been Speaker of the Lower House since the formation of the Kingdom of Libya.—(Times - Le Monde, Paris) **(Prev. rep. 13528 B.)**

C. AUSTRALIA. — Partial Autonomy conferred on Norfolk Island.

Legislation giving a degree of autonomy to Norfolk Island—about 1,000 miles north-east of Sydney—was introduced in the House of Representatives on May 21 by the Minister for Territories, Mr. Hasluck, and adopted on the same day. The measure (the Norfolk Island Bill) provides for the setting-up of a Council which will have powers to make by-laws, levy rates, and control expenditure, and which will replace the advisory council of the island's Administrator.

Norfolk Island, 15 square miles in area, has a population of just over 1,000, many of them the descendants of the *Bounty* mutineers who migrated in 1856 from Pitcairn Island. It is at present administered by the Department of External Affairs.—(Australian News and Information Bureau)

D. ALBANIA. — Minister seeks Asylum in Yugoslavia.

It was announced in Belgrade on May 20 that M. Panajot Plyaku, a Minister in the Albanian Government and a member of the central committee of the Albanian Communist Party, had crossed the Yugoslav frontier on May 16-17 and asked for asylum. It was not stated whether asylum had been granted, nor were the reasons for M. Plyaku's flight given.
(Tanjug Agency, Belgrade)

JUNE 1—8, 1957

A. FINLAND. — Resignation of Fagerholm Cabinet. - New Coalition Government formed by Dr. Sukselainen. - Split in Social Democratic Party.

The coalition Government headed by M. Karl-August Fagerholm, the Social Democratic leader, resigned on May 22 and was succeeded on May 27 by a new coalition headed by Dr. V. J. Sukselainen, leader of the Agrarian Party. The resignation of M. Fagerholm was brought about, firstly, by differences between the Social Democrats and the Agrarians (the two principal parties in the coalition) on economic policy; and secondly, by a split in the Social Democratic Party resulting in the election of M. Vaino Tanner as party chairman in preference to M. Fagerholm.

The Fagerholm Government had earlier tendered its resignation on Feb 28 after the Agrarian Ministers had withdrawn from the Cabinet following a dispute with the Social Democratic Ministers over butter and margarine prices. Whereas the Agrarians had urged a considerable reduction in the retail price of butter and an increase in the price of margarine, the Social Democrats had agreed only to a slight reduction in butter prices, leaving the price of margarine unchanged. The dispute had arisen over a "butter boycott" by Finnish housewives which had led to the accumulation of surplus stocks which had to be exported with the aid of a State subsidy; to overcome this boycott the Agrarians had urged a reduction in butter prices and an increase in margarine prices so as to persuade housewives to buy the former rather than the latter. The Agrarian Ministers, however, were subsequently persuaded to withdraw their resignation by President Kekkonen, himself a former leader of the Agrarian Party.

The next Cabinet crisis arose after the election of M. Tanner as chairman of the Social Democratic Party (see below) instead of M. Fagerholm, who again tendered his resignation to President Kekkonen on April 25, though remaining provisionally in office pending discussions between the two wings of the Social Democratic Party. M. Fagerholm withdrew his resignation on May 16, but a week later (May 22) finally resigned as a result of disagreement between Agrarian and Social Democratic Ministers on a projected economic stabilization programme.

A long-standing dispute within the Social Democratic Party between its left wing, headed by M. Emil Skog (the Defence Minister), and its right wing, led by M. Leskinen (the party secretary), culminated on April 25 in the election of M. Tanner —the nominee of the "Leskinen group"—as party chairman in preference to M. Fagerholm, who belongs to the party's left wing. M. Tanner was elected by a majority of only one vote over M. Fagerholm—95 to 94. After M. Tanner's election all the members of the "Skog group" left the meeting, with the result that subsequent elections to the party's executive led to all the other seats being filled by members of the "Leskinen group." As M. Fagerholm felt that he and his Social Democratic colleagues in the Cabinet no longer enjoyed the party's support, he tendered his resignation to President Kekkonen on the same day (April 25) as stated above. All the Social Democratic Ministers in the Cabinet belonged to the "Skog group," like M. Fagerholm.

M. Tanner (76), a founder-member of the Finnish Social Democratic Party, played an important part in the Moscow negotiations which preceded the Soviet-Finnish "winter war" of 1939-40. He strongly resisted the Soviet territorial claims made on Finland at the time, and in 1941 supported the Finnish Government's action in declaring war on the U.S.S.R. at the side of Germany. A member of the Government from 1941-44, he was brought to trial by a Finnish court in 1946, under the provisions of the Finnish Peace Treaty (see 9341 A), for helping to bring Finland into the Second World War as an ally of Germany. He was sentenced to 5½ years' imprisonment but was pardoned in 1949 by the late President Paasikivi. Since then M. Tanner had played no important part in political life, though remaining an influential member of the Social Democratic Party and leader of the Finnish co-operative movement.

The new Cabinet formed by Dr. Sukselainen on May 27 was recruited from the Agrarian Party, the Finnish People's Party (Liberals), and the Swedish People's Party, with one non-party expert. Its membership was as follows:

Dr. Veino Johannes Sukselainen (Agrarian)	Prime Minister.
M. Johannes Virolainen (Agrarian)	Foreign Affairs.
M. Arvo Helminen (non-party)	Justice.
M. Harras Kytta (Finnish People's Party)	Interior.
M. Atte Pakkanen (Agrarian)	Defence.
M. Nils Meinander (Swedish People's Party)	Finance.
M. William Sariola (Agrarian)	Deputy Minister of Finance.
M. Kerttu Saalasti (Agrarian)	Education.
M. Martti Miettunen (Agrarian)	Agriculture.
M. Bertel Lindh (Swedish People's Party)	Deputy Minister of Agriculture.
M. Kustaa Eskola (Agrarian)	Communications.
M. Torsten Nordstrom (Swedish People's Party)	Deputy Minister of Communications.
M. Esa Kaitila (Finnish People's Party)	Commerce.
Mme. Irma Karvikka (Finnish People's Party)	Welfare and Social Affairs.

Only three Ministers of the Fagerholm Cabinet retained office in the new Government—M. Virolainen (formerly Minister of Education), who became Foreign Minister in succession to M. Ralf Torngren, of the Swedish People's Party; M. Miettunen, who retained the portfolio of Agriculture; and M. Helminen, the non-party expert, who remained Minister of Justice. As the Social Democrats are no longer represented, Dr. Sukselainen's Government cannot command a majority in the Diet and is dependent on the support of other parties. (Berlingske Tidende, Copenhagen - Svenska Dagbladet, Stockholm - Neue Zürcher Zeitung - New York Times)

(Prev. rep. Fagerholm Cabinet, 14860 C; 14742 B.)

B. AUSTRALIA. — Opening of Television Services.

The first regular television service in Australia, transmitted by a commercial station in Sydney, came into operation on Sept. 16, 1956. It was followed between November 1956 and January 1957 by the inauguration of five other services, two in Sydney and three in Melbourne. Of the six stations, two (one in Sydney and another in Melbourne) were national stations sponsored by the Federal Government and operated by the Australian Broadcasting Commission, while the remaining four (two in Sydney and two in Melbourne) were commercial stations. While television services were initially installed in the areas of greatest population density, it is planned that all State capitals should eventually have their own stations.

The two commercial stations in Sydney are controlled respectively by Amalgamated Television Services Pty. Ltd. (in which the *Daily Mirror* and *Sunday Pictorial* Group in London hold an interest) and Television Corporations Ltd. (a part interest in which is held by Associated Newspapers Ltd. in London, i.e. the *Daily Mail* Group).

The two commercial stations in Melbourne are controlled respectively by *Herald-Sun* T.V. Pty. Ltd. (representing Victorian and United Kingdom newspaper publishers) and General Television Corporation Pty. Ltd. (representing other Victorian newspapers and theatre, film, and broadcasting interests).

The legal basis for the establishment and conduct of Australian television services was provided by the Broadcasting and Television Act, 1956, which, apart from consolidating existing broadcasting legislation, largely gave effect to the recommendations of the Royal Commission on Television appointed in February, 1953 [see 13582 B]. The measure which had been introduced in the House of Representatives on April 19, 1956, received its second reading on May 9, was finally approved by the Senate on May 31, and received the Royal Assent on June 20, 1956. The main provisions of the Act were as follows:

(1) The two national services would be controlled by the Australian Broadcasting Commission (as in the case of sound broadcasting).

(2) Control of commercial television would be as diversified as possible. Accordingly, no person would be allowed to own or control more than one station in any State capital and two in the whole country. As regards investment by overseas interests in commercial television, at least 80 per cent of the issued capital of a company licensed to transmit a television service would have to be owned by Australians, whilst no single overseas shareholder would be allowed to hold more than 15 per cent.

(3) The programmes provided by commercial licensees would have to comply with standards determined by the Australian Broadcasting Control Board.

(4) Existing safeguards against the broadcasting of objectionable matter would be extended to television.

(5) Commercial stations would be expected to provide facilities for religious broadcasts free of charge for a reasonable period each week. The broadcasting time would be distributed among the different denominations in proportion to their numerical strength.

(6) Commercial stations would be under no obligation to broadcast political matter, but if they decided to do so they would have to provide facilities for all parties.

(7) In areas where there were no national stations, the commercial stations would be obliged to televise specified programmes made available by the Australian Broadcasting Commission.

By mid-April 1957 (the latest date for which figures were available) 23,650 television licences had been issued in Victoria and 13,440 in New South Wales.—(Australian News and Information Bureau) **(Prev. rep. 13582 B; 12773 B.)**

A. CEYLON - INDIA.—Mr. Nehru's Visit to Ceylon. - Indo-Ceylonese Appeal for Ending of Nuclear Tests.

Mr. Nehru, the Prime Minister of India, visited Ceylon from May 17-20 at the invitation of the Prime Minister of Ceylon, Mr. Bandaranaike, to participate in the celebrations of the 2,500th anniversary of the birth of the Buddha (*Buddha Jayanti*). During his stay he visited the ancient and sacred city of Anuradhapura, on which the celebrations were centred; attended a civic reception given in his honour by the municipality of Colombo; laid the foundation-stone for an International Buddhist Centre at Wellawatte; addressed students at Colombo University; and attended a luncheon given by members of both Houses of the Ceylon Parliament, as well as a State banquet given by the Governor-General of Ceylon.

Mr. Nehru and Mr. Bandaranaike also had talks on the political situation, the following joint statement being issued on May 20:

"The Prime Ministers availed themselves of the opportunity of their meeting to exchange views on international issues and on Indo-Ceylonese relations. They feel satisfied that their talks have resulted in a further appreciation of each other's views on the problems of their countries and have helped them in their appraisal of international issues generally, and as they concern their two countries. Their talks have once again borne evidence of the great measure of agreement in their approach to problems of peace and world co-operation and their relations within the Commonwealth. They have served further to clarify and strengthen their understanding of these problems and the determination of their two countries to continue to adhere to the principles on which their approach is based.

"They reaffirm their faith in the Five Principles of international relations known as *Panch Sila*, which were embodied in and extended by the principles adopted by the Bandung Conference. It is their conviction that the spirit of these principles, if acted upon, affords an opportunity for the establishment of co-operation, understanding and friendship amongst countries many of which have ideological and other differences. This approach will also lessen tensions and help to avoid the grave conflicts which threaten the world today.

"The Prime Ministers congratulated the people of Ghana on the attainment of independence and look forward to the people of Malaya also achieving independence. They appreciate the action of the United Kingdom in acceding to the wishes of the peoples of these countries. They trust that the area of freedom will be enlarged and that the nations still under colonial domination will soon achieve their freedom. They disapprove strongly of every kind of aggression or attempt to reimpose colonialism or imperialism in any form.

"The Prime Ministers express their relief and satisfaction at the opening of the Suez Canal for normal functioning. They view, however, with deep concern the developments in some parts of West Asia. The problems of this region can only be solved by the peoples of the countries within that region being left free to work out their own destiny in accordance with their own wishes. Any imposition of outside authority can only lead to continuing tension and intensification of these problems.

"The Prime Ministers recognize the importance of the United Nations as an instrument for securing world peace and trust that the basic aims laid down in the U.N. Charter for securing political freedom, social equality, and racial harmony should be guiding principles of that great organization as well as of the member-nations. In order to function effectively the U.N. must become fully representative of the world community. The failure of the U.N. to recognize the People's Republic of China is not only opposed to basic principles of the Charter but also impairs the utility of the United Nations.

"The Prime Ministers gave particular consideration to the present state of the development of nuclear and thermo-nuclear power for forging weapons of mass destruction, and to the ominous catastrophe that threatens humanity if their development and production continues and their use is not prohibited. While in the event of their use in war humanity would in all probability face well-nigh total extinction, the Prime Ministers were immediately concerned about the present and immediate consequences of harmful and unpredictable effects of radiation on mankind caused by continuing explosions of nuclear and thermo-nuclear weapons for test purposes carried out by the U.S.S.R. the U.S.A. and the United Kingdom.

"The Prime Ministers regret that despite the declared intentions of all nations not to embark upon war, and mounting opinion and anxiety in the world in regard to the grave and harrowing menace of these tests to the present and future of mankind, the great Powers concerned have not yet decided to refrain from their hazardous ventures in this field, which have already proved injurious to populations in lands near to the location of such tests, dangerously polluted the world's air and water, and threatened the present and future generations with both known and unknown risks and consequences. The Prime Ministers therefore make an earnest and urgent appeal for the immediate suspension of these nuclear and thermo-nuclear test explosions, pending their abandonment. Such suspension would not only limit the dangers that have already arisen and help in easing international tension, but would also lead to an effective consideration of the problem of disarmament.

"There are certain outstanding problems between India and Ceylon that still await a satisfactory solution. The Prime Ministers feel confident, particularly in view of the cordial relations that exist between the two countries, and their co-operation in so many spheres, that these problems can and should be solved satisfactorily to both countries. The Prime Ministers are conscious of the great interest aroused in both their countries by their present meeting, which is a token of their existing friendship and of the earnest and widespread desire to promote and strengthen the ties that bind them. To this end the Prime Ministers reaffirm their desire to devote their energies."

Mr. Nehru arrived back in New Delhi on May 20.—(Indian High Commissioner's Office, London - Ceylon Government Information Department, Colombo - The Statesman, Calcutta)

B. HONDURAS - NICARAGUA. — Frontier Clashes. - Hondurans recapture Border Town. - Peace Mission by Organization of American States.

The Council of the Organization of American States (O.A.S.) met in Washington on May 1-2 following an outbreak of hostilities between Honduras and Nicaragua resulting from a 50-year-old border dispute between the two countries.

The dispute concerns the question of sovereignty over a large area of jungle country extending inland from the "Mosquito Coast" of the Caribbean, covering over 4,500,000 acres or about one-third of the total area of the Republic of Honduras. The disputed area, roughly triangular in shape, has its base along a 150-mile stretch of the Caribbean coastline and its apex about half-way along the Honduran-Nicaraguan frontier, the southern boundary of the "triangle" being formed by the Coco River. In 1906 the two countries had agreed to submit their dispute over this area to the arbitration of King Alfonso XIII of Spain, who ruled in favour of Honduras and awarded all territory north of the Coco River to that country. Nicaragua, however, refused to accept the award and continued to claim sovereignty over the disputed area.

In February last the Honduran Government, basing itself on the 1906 arbitral award, constituted the area into a new province under the name of Gracias a Dios. This action was strongly resented in Nicaragua, and on April 18 some 50 Nicaraguan troops crossed the Coco River and occupied the small township of Morocon, on the north (Honduran) bank of the river. On May 1 Morocon was attacked and recaptured by a Honduran battalion with air support, 35 Nicaraguan troops being killed in bombing and strafing attacks by Honduran aircraft. Subsequent claims by President Somoza of Nicaragua that Morocon had been recaptured by Nicaraguan forces were officially denied in Tegucigalpa, the Honduran capital.

Both Honduras and Nicaragua brought the dispute to the Council of the O.A.S., each side accusing the other of aggression and frontier violations. After debate, the Council unanimously adopted a resolution for a five-man investigating commission to visit the disputed area and make recommendations, meanwhile calling upon Honduras and Nicaragua to refrain from further hostilities and to co-operate with the commission. Both sides gave the necessary undertakings, and the five-man peace mission (consisting of U.S., Argentine, Bolivian, Mexican and Panamanian representatives) visited Managua and Tegucigalpa during the following week. Though no official statement was issued, it was reported in Washington that Honduras and Nicaragua had agreed in principle to withdraw their troops from the disputed area and to establish a "buffer zone" patrolled by neutral observers. (New York Times)

(Prev. rep. Nicaraguan-Costa Rican Dispute, 14142 A.)

C. UNITED KINGDOM. — Gold and Dollar Reserves. - $25,000,000 Increase in May.

The Treasury announced on June 4 that the sterling area's gold and dollar reserves had risen during May by $25,000,000, after taking into account (*a*) the receipt of $34,000,000 from the E.P.U. in respect of the U.K.'s surplus for April; (*b*) the receipt of $1,000,000 in U.S. defence aid; and (*c*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral agreements. As a result, the reserves stood at $2,345,000,000 on May 31—the highest level since July 31, 1956.

It was stated in the Press that, in spite of relatively large dollar oil payments, no drawings had been made during the month either on the Export-Import Bank credit or from the International Monetary Fund. It was also pointed out that the slowing-down in the increase of the sterling area's reserves was partly due to continued drawings by India in order to pay for her imports of capital goods bought from either the dollar area or the E.P.U. area.

Provisional figures for the E.P.U. May settlement showed that Britain had a deficit of £7,000,000 (compared with a surplus of £16,000,000 in April), three-quarters of which would be settled in gold or dollars and the remaining quarter by an increase in the United Kingdom's debt to the Union. (Treasury Press Office - Financial Times) **(15522 A.)**

Corrigendum. The first line in the third paragraph of 15522 A, dealing with the provisional E.P.U. figures, should refer to the E.P.U. April settlement, and not to the March settlement as erroneously stated. (Ed. K.C.A.)

A. SOVIET UNION. — M. Khrushchev's Proposals for Decentralization of Industry. - Approval by Supreme Soviet. - Abolition of 25 Industrial Ministries. - Creation of Regional Economic Councils. - M. Pervukhin appointed Minister for Medium Machine-building. - M. Kuzmin becomes Chairman of State Planning Commission. - Economic Plan and State Budget for 1957. - Ending of State Loans. - Loan Redemptions postponed for 20 Years.

Proposals for the complete reorganization of Soviet industry were put forward by M. Khrushchev in a 20,000-word document which was published by the Tass Agency on March 29. In his "theses" (as the document was officially described) M. Khrushchev proposed that the Central Ministries for particular branches of industry, and the similar Ministries in the Union Republics, should be abolished and replaced by "Economic Councils," each of which would be responsible for a particular region and be under the direct control of the State Planning Commission (Gosplan). The need for greater decentralization of industry had been stressed in M. Khrushchev's report to the Communist Party congress in February 1956 (see page 14747, second column), and was subsequently discussed at meetings of the party's central committee in December 1956 (see 15299 A) and February 1957, as a result of which the "theses" were published. A summary of M. Khrushchev's proposals is given below.

"The Soviet Union now has over 200,000 State industrial establishments and more than 100,000 construction sites scattered throughout the vast expanses of the country," M. Khrushchev stated. "In these circumstances it is difficult to give concrete and efficient guidance from a single Ministry or Department . . . A major shortcoming in guiding industry and construction today is the existence of departmental barriers which frequently hamper the solution of important questions . . . The narrow departmental approach of some economic executives causes considerable damage to the State and delays for a long time the solution of urgent economic problems. Funds earmarked for the construction of industrial establishments and housing are scattered, the building time is prolonged, the cost of construction rises considerably, building machinery and transport facilities are used inefficiently, and the cost of maintaining administrative and economic personnel increases . . .

"Under the present system of management in industry and construction, each Ministry often seeks to manufacture for itself everything it needs . . . In the engineering industry, for instance, owing to the poor development of specialization and co-operation of enterprises, the production of cast-metal forgings and stampings is dispersed between a large number of small enterprises under various Ministries and Departments . . . The co-operation in production is mostly inter-departmental in nature, and very little headway is made in the sphere of co-operation between enterprises of different industries." As an example, M. Khrushchev pointed out that a foundry in Kiev owned by the Ministry of Constructional and Road-making Machine-Building supplied castings to the Ministry's engineering factories in Leningrad, the Urals, Central Asia, Siberia, and elsewhere, and that the cost of transporting castings from Kiev to Siberia amounted to over 20 per cent of the original production cost. "Given a more businesslike approach," he commented, "the requirements of plants manufacturing constructional and road-building machinery could be satisfied by cast-metal manufactured on the spot by the enterprises of other Ministries, and uneconomical transportation of goods would thus be avoided."

M. Khrushchev went on to suggest that it was necessary to "transfer the centre of gravity of the operative guidance of industry and construction to localities nearer to the enterprises and construction sites," and to "change over from the former organizational forms of management through specialized Ministries and Departments to new forms of management on the territorial principle," such as "Economic Councils." If this proposal were adopted, there would be "no further need to have Union and Republican Ministers directing industry and construction." The Economic Councils would for the most part be organized in accordance with the existing administrative divisions, and in questions of planning would be subordinated both to the Government of the Union Republic concerned and to the Central Government. Their functions would include "the elaboration and implementation of long-range and current production plans, elaboration of plans for the specialization of enterprises, and plans for co-operation of production and reciprocal deliveries of raw materials and semi-finished products both within the economic administrative area and to other regions and Republics." Such Councils, M. Khrushchev suggested, would "make it possible to settle on the spot highly important economic questions, many of which were formerly settled only at the centre by Ministries and Departments."

Turning to the role of the State Planning Commission, M. Khrushchev proposed that it should "introduce corrections into the plans of the Economic Councils" and should be responsible for "the planning of inter-area deliveries of raw materials, supplies, fuel, electric power, equipment, and consumer goods." A committee including the chairman of the State Planning Commission, his deputies, the heads of the main divisions, and leading experts would consider major problems of development of the national economy, and questions requiring Government decisions would be submitted by this committee to the Council of Ministers.

M. Khrushchev admitted that there was a danger that the Economic Councils might develop "tendencies to autarky and a desire to build up a self-sufficient economy within the area"; for example, attempts might be made to develop locally the production of raw materials which could be produced more profitably in other areas. To avoid this danger, the State Planning Commission must "thoroughly study the economic expediency of the capital investments contemplated by the areas, and nip in the bud every attempt to use funds for the building up of a self-sufficient economy in some areas to the detriment of the interests of the State as a whole."

The statement also demanded a radical reorganization of the methods of work of the Central Ministry of State Control [which is headed by M. Molotov] and the similar Ministries in the Union Republics, declaring that they tried "to use their staff in order to collect voluminous data on diverse questions, concentrating them in the apparatus of the Ministry instead of seeking to remove on the spot, with the help of the public at large, the shortcomings brought to light." In conclusion, M. Khrushchev called for the inclusion in the Central Council of Ministers of the chairmen of the Councils of Ministers of the Union Republics, in view of the increasingly important part to be played by these bodies in the development of the national economy, and of the chairman of the engineering-technical committee, the head of the Central Statistical Board, and the vice-chairmen and heads of the more important departments of the State Planning Commission.

M. Khrushchev's proposals were subsequently discussed at over 500,000 public meetings throughout the U.S.S.R. and were widely debated in the Soviet press. Strong criticisms of the scheme were expressed in *Pravda* and other papers—notably by a number of factory managers, who contended that a unified supply system should be retained to ensure the supply to factories of highly specialized products made in other parts of the country. Demands were also made for the retention of certain of the Central Ministries, such as the Ministry of Power Stations [which is headed by M. Malenkov], and of certain industrial ministries in the Republics. Although M. Khrushchev's "theses" were put forward on behalf of the Presidium of the Communist Party's central committee and the Council of Ministers, it was noted that none of the other leading members of the Presidium or the Government had publicly expressed support for the plan.

When the Supreme Soviet met in Moscow on May 7 to consider the scheme, M. Khrushchev submitted a report which in some respects represented a major revision of his original proposals. In response, apparently, to the criticisms raised, it provided in particular for the retention of eight of the 30 Central Ministries concerned with industrial production, notably those dealing with defence industries, and of a number of Ministries in the Republics dealing with the iron and steel, coal, and oil industries.

M. Khrushchev said in this report that the proposed reorganization, which had been rendered indispensable by "the rapid growth of industry and the unprecedented scale of construction," would "bring management closer to the point of production and make it possible to combat bureaucracy more effectively." Observing that "there are too many Russians supervising other Russians at work," he said that there were some 850,000 "bureaucrats" and administrators and that "we have so many supervisors checking on the production of neckties that the quality of our neckties is still very inferior."

"Out of the Ministries in charge of industry and construction," he continued, "it is suggested that the All-Union Ministries of the Aircraft Industry, Shipbuilding, the Radio Industry, the Chemical Industry, Medium Machine-Building, and Transport Machinery be retained. It is suggested that the Ministry of the Defence Industry be merged with the Ministry of General Machine-Building, and the Ministry of Power Stations with the Ministry for Construction of Power Stations. But these Ministries must be radically reorganized. They must be relieved of the direct management of the corresponding establishments, while retaining the function of planning and general technical control.

"There is no need to have All-Union Ministries in such branches as the coal and oil industries and the iron and steel and non-ferrous metals industries, whose enterprises are chiefly situated in the Russian Federal Republic (R.S.F.S.R.) and the Ukrainian, Kazakh, and Azerbaijan Republics. It is desirable to set up Republican Ministries—in the R.S.F.S.R. for the iron and steel, non-ferrous metals, and coal industries; in the Ukranian Republic for the iron and steel and coal industries; and in the R.S F.S.R. and the Azerbaijan Republic for the oil industry. It seems desirable to bring the Republican Ministries closer to the point of production. Thus, it would be convenient for the Ministry of the Coal Industry of the R.S.F.S.R. to be in Kemerovo; the Ministry of the Oil Industry of the R.S.F.S.R. in Ufa or Kazan; and the Ministry of the Iron and Steel Industry of the R S.F.S.R. in a town in the Urals.

"The industrial enterprises and construction projects of the remaining Ministries and those of the Ministries that are to be abolished will be placed under the auspices of Economic Councils, which will exercise direct control over these enterprises through appropriate territorial administrations."

After proposing that the task of reorganization should be completed during May and June, M. Khrushchev suggested (*a*) that 92 Economic Councils should be set up, each in charge of one region or

several regions—viz., 68 in the R.S.F.S.R., 11 in the Ukrainian Republic, and one in each of the other Union Republics; (*b*) that the existing division of industry into Union, Union-Republican, Republican, and local should be replaced by a division into Union-Republican industry, which would be controlled by the Economic Councils, and local industry, which would be directly subordinate to the local Soviets.

Under the new conditions, he explained, economic plans would be drafted in the Union Republics and economic administrative districts and would be checked by the State Planning Commission, which, in addition to annual and five-year plans, would be called upon to draft plans for longer periods for the country as a whole and for individual branches of industry. In preparing economic plans the fullest use should be made of local experience, and they should therefore first be drafted by individual enterprises and collated by the Economic Councils before being finally approved by the State Planning Commission.

During the ensuing debate a number of speakers, including M. Zasyadko (Minister for the Coal Industry in the Ukrainian Republic), opposed the retention of industrial ministries in both the Central Government and certain of the Union Republics, whilst others demanded the abolition of the Ministries of State Control in the Republics. As in the previous public discussions on the proposals, no members of the Communist Party Presidium except M. Khrushchev took part in the debate. A commission of 50, including M. Khrushchev, Marshal Bulganin, and the other members of the Presidium, was elected on May 9 to draft a law enabling the scheme to be put into operation.

Replying to the debate on May 10, M. Khrushchev announced that the commission considered the objections which had been raised to the retention of certain Central Ministries, and especially those concerned with defence industries, to be "inopportune." He also rejected the proposal for the abolition of the Republican Ministries of State Control. He added, however, that in view of the wide difference of opinion on the retention of industrial ministries in the Union Republics, the commission had omitted all reference to this question from the draft law in order that the Supreme Soviets of the Republics might make their own decisions on it.

Two laws—one on "the management of industry and construction," and the other providing for the necessary changes in the Constitution of the U.S.S.R. arising out of the economic reforms—were unanimously approved by both Houses of the Supreme Soviet on May 10.

Out of the 52 Central (All-Union) Ministries, 25 were abolished under the legislation, four were merged into two, and 23 were retained without changes. The Central Ministries retained were divided into two categories: (1) "All-Union" Ministries directing specified activities throughout the U.S.S.R., and (2) "Union-Republic" Ministries which will act as agents for the various Republics in carrying out tasks entrusted to them by the Republics concerned.

All-Union Ministries. The following were retained as "All-Union" Ministries. Aircraft Industry, Foreign Trade, Merchant Marine, Defence Industry, Railways, the Radio Engineering Industry, the Medium Machine-building Industry [which is believed to be concerned with atomic energy], Shipbuilding, Transport Construction, Chemical Industry, and Power Stations.

Union-Republic Ministries. The following were retained as "Union-Republic" Ministries: Internal Affairs, Higher Education, Geology and Conservation of Mineral Resources, State Control, Health, Foreign Affairs, Culture, Defence, Communications, Agriculture, State Farms, Trade, Finance, and Grain Products.

The former Ministry of Power Station Construction was merged with the Ministry of Power Stations, and the Ministry of General Machine-building Industry was absorbed by the Ministry of Defence Industry.

Ministries abolished. The following Ministries were abolished: Automobile Industry, Machine-building Industry, Instrument-making and Means of Automation, Machine-tool Industry, Building and Road-making Machinery Industry, Oil Industry Construction, Tractor and Agricultural Machine-building Industry, Transport Machine-building Industry, Heavy Machine-building Industry, and Electrical Engineering Industry.

Also abolished were the Ministries of Paper and Wood Processing Industry, Town and Village Construction, Light Industry, Timber Industry, Oil Industry, Meat and Dairy Products Industry, Foodstuffs Industry, Building Materials Industry, Fish Industry, Construction of Metallurgical and Chemical Works, Coal Industry Construction, Coal Industry, Non-ferrous Metal Industry, and Iron and Steel Industry.

The only major Soviet leader affected by the changes was M. Kaganovich, a First Deputy Premier and head of the Ministry of the Building Materials Industry, which was among those abolished.

The constitutional changes involved an extension of the membership of the Soviet Government by adding as members of the Council of Ministers the chairmen of the State Committees of Planning, Labour and Wages, Construction, and Security; the chairman of the State Scientific and Technical Committee; the chairman of the Administrative Board of the State Bank; the chief of the Central Statistical Board; and, by virtue of their offices, the chairmen of the Councils of Ministers of the Union Republics.

The Article of the constitutional amendment law dealing with the Economic Councils defined their activities as follows:

"The Economic Councils of the economic administrative areas direct the branches of economic activity entrusted to them and are directly subordinate to the Council of Ministers of the Union Republic. The Economic Councils, within the limits of their jurisdiction, issue orders and instructions on the basis and in pursuance of the laws of the U.S.S.R. and of the Union Republic, and of the decisions and orders of the Council of Ministers of the U.S.S.R. and the Council of Ministers of the Union Republic."

Ministerial Appointments.

Immediately prior to the meeting of the Supreme Soviet, three important ministerial appointments had been announced on May 3-4: (*a*) M. Mikhail Pervukhin as Minister of Medium Machine-building; (*b*) M. Josef Kuzmin as a First Deputy Premier and chairman of the State Planning Commission (Gosplan); (*c*) M. Nikolai Baibakov, the former chairman of Gosplan, as First Deputy Premier of the R.S.F.S.R. and chairman of its State Planning Commission.

In December last M. Pervukhin had been appointed chairman of the State Economic Commission, whose powers had been increased at the same time; the "Khrushchev plan," however, apparently envisaged the abolition of this body and the transfer of its responsibilities to the State Planning Commission. The Ministry of Medium Machine-building is believed to be responsible *inter alia* for atomic development.

M. Kuzmin (47), a former factory-worker who trained as an engineer, had headed the machine-building department of the Communist Party's Central Committee for several years, although not himself a member of the central committee. He had been appointed deputy chairman of Gosplan only a few months before his new appointment. In view of the increased importance of the State Planning Commission under M. Khrushchev's plan, much speculation was aroused in the Western Press by the promotion of M. Kuzmin, a little-known figure who had never played a prominent part in public life, and who was not among the 1,400 delegates to the 1956 Communist Party congress.

In accordance with the reorganization law, the rank of Minister in the Soviet Government was conferred upon the following members of the State Planning Commission on May 25:

M. Kosygin (First Vice-Chairman), MM. Khrunichev, Zotov, and Strokin (Vice-Chairmen), and MM. Zasyadko, Novosyolov, and Khlamov (departmental heads). MM. Kosygin (a former Deputy Premier) and Khrunichev had previously been First Vice-Chairman and Vice-Chairman respectively of the State Economic Commission, now dissolved. MM. Zotov, Strokin, Novosyolov, and Khlamov had previously been heads of Ministries abolished under the reorganization, while M. Zasyadko had been Minister of the Coal Industry until March 1955, when he was "demoted" and became Minister of the Oil Industry in the Ukraine.

Economic Plan and State Budget for 1957.

The draft economic plan and State Budget for 1957 had been presented to a previous session of the Supreme Soviet on Feb. 5. The economic plan, introduced by M. Pervukhin, provided for a considerable reduction in the rate of industrial expansion as compared with 1956, and for greater emphasis on the production of consumer goods.

Under the 1957 plan, total industrial output was scheduled to be increased by 7.1 per cent, that of heavy industry by 7.8 per cent, and that of light industry by 5.9 per cent. The scheduled increases for consumer goods were larger than those for heavy industry—e.g., whereas output of iron and steel would increase by 6 per cent, compared with 7 per cent in 1956, that of footwear would increase by 6 per cent, compared with 5 per cent in 1956, and that of cotton cloth (which had shown no increase during 1956) by 10 per cent. There would also be a "substantial improvement" in the housing programme, which had fallen short of the plans for 1956, and 28 per cent more dwelling-space would be provided by the State or with the help of Government credits than in the previous year. The fulfilment of the plan, M. Pervukhin emphasized, would call for further improvement in the use of existing capacities and for a vigorous campaign against any waste of power, fuel, or raw materials.

The following table shows the rate of expansion planned for 1957, compared with the 1956 output and with the 1960 targets for the most important items produced by heavy industry:

	(million tons)		
	1956 plan	1957 plan	1960
Iron	35.8	38.1	53.0
Steel	48.6	51.5	68.3
Rolled metal	37.8	39.5	52.7
Coal	429.0	446.0	593.0
Oil	83.8	97.0	135.0
Electric power (1,000 million kilowatt hours)	192.0	211.2	320.0

The State Budget, presented by M. Zverev (the Finance Minister), provided for estimated revenue of 614,800,000,000 roubles and estimated expenditure of 603,800,000,000 roubles —an increase of 32,000,000,000 roubles in revenue and 43,000,000,000 roubles in expenditure over 1956.

Of the proposed revenue, 522,900,000,000 roubles (85 per cent) would be derived from the profits of Government enterprises and 91,900,000,000 roubles from taxation or State loans. Taxation would contribute only 8·4 per cent compared with 8.7 per cent in 1956, the reduction being due to an increase in the minimum income liable to direct taxation, which had come into effect on Jan. 1. The State loan would be smaller than that for 1956, but the sum allocated for prizes would be increased.

Of the total expenditure, 201,400,000,000 roubles would be for industrial development, of which 118,400,000,000 roubles would come from the Budget; 65,000,000,000 roubles would be used for machinery and equipment; 61,600,000,000 roubles would be spent on agriculture (including 52,900,000,000 roubles from the Budget); and 175,000,000,000 roubles would be for new capital investments. Expenditure on education, health, and social services would total 188,200,000,000 roubles, a 15 per cent increase on the previous year. Defence expenditure would be 96,700,000,000 roubles (16 per cent of the total budget) compared with an appropriation of 102,500,000,000 roubles (18 per cent of the Budget) in 1956, of which, however, only 97,800,000,000 roubles had been spent.

After consideration of the Budget by the Soviet of the Union and the Soviet of Nationalities, and acceptance by the Government of certain minor amendments proposed, the amended Budget and the draft plan were approved by both Houses of the Supreme Soviet on Feb. 9.

New State Loan. - Postponement of Redemption of Previous Loans.

Addressing a conference at Gorky (formerly Nizhni-Novgorod) on April 8, M. Khrushchev announced that as from 1958 no further State loans would be launched, but that the redemption of earlier loans would be postponed for 20 to 25 years.

M. Khrushchev stated that loans to the amount of 260,000,000,000 roubles were outstanding. In 1953 and 1954 loans amounting to half the usual sum had been launched, but in 1955 the Government had again had to float a loan of 32,000,000,000 roubles, and in 1956 over 34,000,000,000 roubles had been subscribed. The Budget for 1957 provided for a revenue of over 26,000,000,000 roubles from the annual loan; on the other hand, the Government would have to pay for winnings and redemption of loans about 16,000,000,000 roubles in 1957, 18,000,000,000 roubles in 1958, and 25,000,000,000 roubles in 1967, or almost as much as the subscriptions envisaged to the loan for the current year.

To escape from this "vicious circle" M. Khrushchev announced that it proposed (*a*) to stop launching loans as from 1958, with the exception of the freely negotiable 3 per cent premium loan [which can be presented at any time for redemption, less 3 per cent of the purchase price]; (*b*) to issue the loan for 1957 only to a total of 12,000,000,000 roubles, instead of 26,000,000,000 roubles as earlier planned, persons earning less than 500 roubles a month not being expected to subscribe, whilst others would not be expected to subscribe more than two weeks' wages [as against a month's wages hitherto]; (*c*) to postpone the payment of prizes on and the redemption of all earlier loans for 20-25 years, after which these loans would be redeemed without interest in instalments of approximately 13,000,000,000 roubles a year [i.e. repayment would be spread over 20 years.] M. Khrushchev admitted that in this way "the State will get a loan for 20 years without floating a loan," and promised that the proceeds would be used to provide housing, schools, hospitals, and other facilities.

After the Soviet Government had formally approved this plan on April 20, the State loan for 1957 was launched on May 14. As with previous loans, it was compulsory on the conditions indicated by M. Khrushchev and took the form of a "premium bonds" scheme; six per cent of all bonds issued will be redeemed by an annual draw, in which the winners will receive tax-free prizes ranging from 200 to 5,000 roubles for a 100-rouble bond, plus the face value of the bond. The remaining bonds will be redeemed at face value without interest in 1962, there being thus no moratorium as with the earlier loans. It was announced on May 22 that subscriptions had totalled 14,500,000,000 roubles.—(Soviet Embassy Press Department, London - Times - Manchester Guardian - New York Times) **(Prev. rep. Economic Policy, 15299 A; 1956 Production, 15560 B; Council of Ministers, 15385 B.)**

Corrigendum. In report 15560 B on the Soviet Union's industrial output in 1956, the figures shown in parentheses do not represent the percentage increase over 1955 but the output index taking the 1955 figures as 100 per cent. (Ed. K.C.A.)

A. FRANCE. — Population Figures.

Figures recently published by the *Institut national de la statistique* showed that the population of France on Jan. 1, 1957, had risen to 43,787,000, an increase of over 300,000 for the second successive year. Births exceeded deaths during 1956 by 260,000, while the number of immigrants exceeded emigrants by 86,000.—(Le Monde, Paris) **(Prev. rep. 14675 D.)**

B. UNITED KINGDOM. — Foreign Travel Allowance. - Extension to Dollar Area.

The Chancellor of the Exchequer announced on June 4 that the ordinary travel allowance of £100 a year would in future be available for visits to the dollar area (i.e. the United States and Canada) in the same manner as for travel in the transferable account area. Accordingly, for the present travel year (November 1956 to October 1957) the whole £100—or such balance as might not have been spent already—could be used in the dollar area up to Oct. 31, 1957. Mr. Thorneycroft observed that the fact that dollars had not been made available for travel to North America for the past ten years had "erected an unnatural barrier between the English-speaking peoples which should not be allowed to continue any longer than is necessary."

The Chancellor also announced that the allowances made to people travelling in the dollar area on business would be raised by the Treasury with immediate effect.

It was explained by the Treasury that the present rates for business travel to the dollar area were £14. 10s. a day for people travelling on business of national importance, e.g. the promotion of export trade, and £10 a day for people on less important business, e.g. visitors attending conferences, journalists, etc. There was also a lower rate for secretaries. In future the maximum rate would be increased to £18 a day and the lower rates to £12 a day.

In addition to the £100 basic travel allowance, the £70 allowance for a child and the car allowance of £35 will be available for people travelling in the dollar area in the same way as for those travelling on the Continent.

When Mr. Gordon-Walker (Lab.) asked for an estimate of the dollar cost of the change in a full year, Mr. Thorneycroft replied that it was impossible to make any estimate but that he had been assured that it would be "very small." The Treasury subsequently announced that in the year ended June 30, 1956, the cost of the maximum business allowance had been £4,000,000, whilst the addition of other dollar allowances at lower rates, allowances for visits to relatives, and a few extras had brought the total for that period to just under £5,000,000.

The present ordinary travel allowance of £100 is equivalent to about $280 in the United States and Canada.—(Times) **(Prev. rep. Travel Allowances, 15200 C.)**

C. LITERATURE. — Book Selections, May 1957.

Selected books published in Great Britain and the United States are given below:

Great Britain. Bowen, Catherine D.—"The Lion and the Throne: The Life and Times of Sir Edward Coke, 1552-1634." (Hamish Hamilton, 42s.)

Brogan, D. W.—"The French Nation from Napoleon to Pétain, 1814-1940." (Hamish Hamilton, 25s.)

Connell, Brian—"Watcher on the Rhine: A Report on the New Germany." (Weidenfeld and Nicolson, 21s.)

Duckett, Eleanor—"Alfred the Great and his England." (Collins, 12s. 6d.)

Halifax, Earl of—"Fulness of Days." Memoirs. (Collins, 25s.)

Masters, John—"Far, Far the Mountain Peak." (Michael Joseph, 15s.)

Paul, Leslie—"The Boy down Kitchener Street." (Faber and Faber, 15s.)

Starkie, Walter—"The Road to Santiago: Pilgrims of St. James." (John Murray, 25s.)

Steinbeck, John—"The Short Reign of Pippin IV." (Heinemann, 12s. 6d.)

Thompson, R. W.—"The Eighty-five Days: The Story of the Battle of the Scheldt." (Hutchinson, 18s.)

White, R. J.—"Waterloo to Peterloo." (Heinemann, 18s.)

United States. Faulkner, William—"The Town." (Random House, New York, $3.95)

Wilbur, Richard—"Things of This World." Collected Poems. (Harcourt, Brace and Co., New York, $3.00). Pulitzer Prize award.

(Ed. K.C.A.) **(Prev. rep. Book Selections, 15515 B.)**

D. TURKEY. — New Oil Refinery.

An agreement for the construction of a new oil refinery in the Marmara area was signed on March 29 between the Turkish Government and four leading oil companies—British Petroleum Ltd., the California-Texas Corporation, Mobile Oil Inc., and the Royal Dutch-Shell group. The refinery, the site of which has still to be determined, will have an annual capacity of 3,250,000 tons, will cost $48,000,000, and will be the largest in the Mediterranean area. After its completion in 1960 it will meet Turkey's entire petroleum requirements, in conjunction with a new refinery at Batman which was opened in 1956 and has an annual capacity of 330,000 tons.

(Turkish Embassy Press Department, London)

A. UNITED KINGDOM. — Trade and Payments Agreements with Commonwealth and Foreign Countries.

Trade and payments agreements concluded by Britain with other countries during recent months are summarized below:

Australia. The new trade agreement between Australia and the U.K., implementing the accord in principle reached last November (see 15229 A) and replacing the Ottawa agreement of 1932, was signed in Canberra on Feb. 26, 1957.

Benelux. Following discussions in London with a delegation representing the Benelux countries (Belgium, the Netherlands, and Luxemburg), arrangements for 1957 in respect of that part of Anglo-Benelux trade still subject to quota restriction were announced on Dec. 6, 1956. It was stated that these arrangements would replace those previously concluded with the Netherlands and the Belgo-Luxemburg Economic Union separately.

Ten quotas covering certain U.K. exports to Benelux were agreed upon, permitting trade in these goods (which were not defined) to be at least at their 1956 level; for most items (e.g. oil paints, glass bottles, twist drills, and hard-tipped tools) there would be room for increased U.K. exports; and some British exports (including motor cars and television sets) previously subject to bilateral quotas would now be subject to global quotas covering Benelux imports from all sources. The chief quota agreed upon for U.K. imports from Benelux was for flower bulbs, apart from smaller items such as processed milk and other foodstuffs.

Bulgaria. The Board of Trade announced on Sept. 28, 1956, that the lists of commodities in which Bulgaria and the U.K. would conduct their mutual trade in the year commencing Oct. 1, 1956, had been confirmed. Bulgaria would supply fresh and processed fruit and vegetables, oil-bearing seeds, fats, timber, and other goods, while receiving from Britain wool, rubber, asbestos, drugs, medical apparatus and instruments, machinery and equipment, chemicals, and other goods.

Cuba. An agreement was signed in London on Jan. 8, 1957, amending the Anglo-Cuban Trade Agreement of 1953 and extending it to Dec. 31, 1957. The Cuban Government agreed to continue the preferential rates of duty on imports of those U.K. goods listed in the 1953 agreement, while the U.K. Government agreed to continue the existing annual quota for Cuban cigars and to grant small token quotas for other Cuban imports amounting in all to £75,000.

Czechoslovakia. Financial and trade agreements between the U.K. and Czechoslovakia were signed in Prague on Oct. 22, 1956.

Financial Agreement. This provided (*a*) that the Czechoslovak Government would resume payment as from March 31, 1957, of the outstanding compensations due under the Nationalization Compensation Agreement of 1949 (see 10264 A); this balance, amounting to £2,570,000, would be paid in half-yearly instalments equal to 7 per cent of the sterling proceeds earned by Czechoslovak exports to the U.K., subject to a minimum of £400,000 per annum; (*b*) that discussions on the repayment of the inter-governmental debts should be resumed not later than Sept. 30, 1958, and the existing method of repayment suspended with retrospective effect from Jan. 14, 1954.

Trade Agreement It was agreed that in the period ending Dec. 31, 1957 (*a*) Czechoslovakia would purchase £5,500,000 worth of British goods, including industrial and agricultural machinery, mining equipment, motor cars, textile yarns and piece-goods, and plastics.; (*b*) the U.K. would issue in the same period import licences for Czechoslovak goods—machine tools, imitation jewellery, glass and glassware, chocolate and sugar confectionery, textiles, and carpets—valued at £8,000,000; (*c*) imports into the U.K. of Czechoslovak timber, wood-pulp, and paper would be unrestricted; (*d*) Czechoslovakia would not discriminate against British shipping.

Denmark. Anglo-Danish talks on trade arrangements for 1957 were held in Copenhagen from Feb. 26 to March 7, 1957. They dealt mainly with the comparatively small section of trade still subject to bilateral import quotas, agreement being reached on increasing a number of quotas on each side.

German Federal Republic. Under an Anglo-West German agreement signed in Bonn on March 9, 1957, quotas were fixed for 1957 to cover trade in each direction in those goods not yet liberalized. Quotas for which increases were arranged included U.K. exports of certain textiles and certain agricultural goods, and German exports of certain scientific and optical goods, textiles, chemicals, and other industrial goods and foodstuffs. Imports of British cars into Western Germany were completely liberalized, whilst the quota on the import of German cars into Britain was continued at £2,600,000 a year.

The arrangements increased the amount of liberalized trade to 95.6 per cent of British exports to Western Germany and to 94.5 per cent of West German exports to Britain, the negotiations therefore covering only a small proportion of each country's imports.

Indonesia. It was announced on July 7, 1956, that the British Government had undertaken to supply Indonesia with cotton yarn and textiles valued at $3,000,000. Payment would be made in raw cotton supplied by the U.S.A. to Indonesia as part of the U.S. aid programme (see 14874 A).

Japan. New Anglo-Japanese trade and payment arrangements covering the period Oct. 1, 1956 to Sept. 30, 1957, were signed in London on Feb. 26. As regards British exports, all the trade quotas previously available were maintained with minor exceptions; the quota of wool textiles remained at £2,800,000, but some new quotas provided for additional exports to Japan of over £1,000,000. [Substantial trade, however, is carried on outside the quota provisions, mostly in raw materials and other essential goods, including machinery.]

As regards British imports, previous trade quotas were likewise maintained, with increases in a few cases, including artificial pearls, canned salmon, canned peaches, and wearing apparel. The quota for cotton and rayon cloth for re-export remained unchanged.

It was agreed that Japan could henceforth use sterling earned by trade with the sterling area without restriction, whereas hitherto she had undertaken to use such earnings only within the sterling area. Japan agreed on the other hand to permit the remittance of the profits of U.K. film companies, at present blocked in non-resident accounts.

Japanese exports to Britain in 1956 amounted only to £27,000,000, out of total exports to the sterling area of £300,000,000.

Morocco. A joint statement issued on March 2, 1957, announced that the British and Moroccan Governments had agreed to negotiate a new treaty of commerce and navigation as soon as possible; that both Governments recognized that the tariff limitation in respect of Moroccan imports under Article 7 of the Anglo-Moroccan Commercial Convention of 1856 was "inappropriate to the political and economic conditions of today"; that H.M. Government had therefore renounced their rights under that Article; and that, pending the conclusion of the new treaty, the Moroccan Government had given an assurance that they would continue to give most-favoured-nation treatment to goods originating in the U.K. and its dependent territories.

The *Board of Trade Journal* published the following table showing the total value of U.K. trade with Morocco (Northern and Southern Zones combined) in the last three years:

	£'000		
	1954	1955	1956
Imports from Morocco	11,360	10,241	12,417
Exports to Morocco	5,958	6,361	6,577
Re-exports	152	151	115
Balance in favour of Morocco ..	5,250	3,729	5,725

Norway. A barter agreement was announced on March 24 under which 50,000 cases of Norwegian sild (a small herring resembling a sardine) worth about £150,000 will be imported into Britain by the Rootes Group of motor car manufacturers, while Norway agreed to import 500 motor cars in addition to those which the Group were able to sell in Norway under the present Norwegian import quota arrangements for automobiles. [This quota, which applies to motor-manufacturing countries in the O.E.E.C. as a whole, had recently been increased from 4,000 to 8,000 cars a year, and Britain has to compete within this quota with Western Germany, Italy, and France for a share of the Norwegian market.] It was stated by the Rootes Group that the only way the U.K. could sell Norway more than that share was through barter arrangements: that the present agreement had been thrown open to the British motor industry as a whole; but that most of the initial shipment would be Hillman cars made by the Rootes Group.

Pakistan. An agreement similar to that with Indonesia [see above] was concluded on the same date between the British and Pakistani Governments for textiles and yarn valued at $1,320,000; payment would also be made in U.S. raw cotton. [This agreement was supplementary to the one concluded on April 29, 1955.]

Poland. A three-year Anglo-Polish trade agreement for 1957-59 was signed in Warsaw on Dec. 31, 1956. It provided that: (*a*) import quotas would be negotiated annually; (*b*) Poland would purchase £15,750,000 worth of U.K. goods during 1957, including machinery, textile manufactures, motor-cars, radio and television equipment, chemicals, dyestuffs, fish, substantial amounts of mining equipment, and semi-manufactured goods, thereby providing new opportunities for a number of U.K. exports; (*c*) Britain would issue in the same period import licences totalling £6,500,000 for Polish goods, including canned ham and meat, bacon, furniture, textile manufactures, machine-tools, and various foodstuffs; (*d*) the British market would remain open without restriction to imports of a number of Polish products, including timber, eggs, and starch; (*e*) neither Government would discriminate against the other's shipping.

It was announced in Warsaw on the same date (*a*) that Polish imports from Britain would also include wool, rubber, jute, building and textile machinery, tugboats, engines and motor equipment, non-ferrous metals, sheet metal, cables, hides, synthetic fibres, fish, seeds, oil, and cocoa-beans; (*b*) that the trading lists for 1957 envisaged an increase in Anglo-Polish trade to an overall value of £64,000,000, as against £47,500,000 during 11 months of 1956 and £43,200,000 in 1954.

Portugal. The Board of Trade announced on March 14 that talks on Anglo-Portuguese trade (including trade with Portuguese overseas territories) in 1957 had taken place from Feb. 25 to March 12, and that agreement had been reached on bilateral quotas for imports which were neither free from quantitative restrictions nor subject to global quotas.

Spain. A review of Anglo-Spanish trade and payments arrangements for 1957, which took place in Madrid from Nov. 29-Dec. 21, 1956, resulted in the fixing of bilateral quotas for the few imports of Spanish goods still subject to restriction in Britain. Arrangements similar to those operating in 1956 were also made for Spanish imports from the United Kingdom.

Sweden. It was agreed during Anglo-Swedish trade discussions for 1957, concluded in London on Dec. 18, 1956, (*a*) that the existing arrangements for Swedish imports of British motor vehicles (practically the only U.K. export to Sweden still subject to restriction) would continue unchanged, and (*b*) that no change would be made in U.K. coal and steel exports, except that coke exports would be increased from 140,000 to 300,000 tons. Similarly, the present arrangements for U.K. imports from Sweden would continue.

Switzerland. Anglo-Swiss trade talks, held in Berne from Jan. 29-Feb. 4 and dealing with those trade exchanges still subject to bilateral quotas, resulted (apart from a few small improvements) in the extension of the existing agreements during 1957.

Turkey. A new protocol to the Anglo-Turkish agreement of Jan. 17, 1955 for the settlement of Turkish commercial debts to U.K. exporters (see 14180 A) was signed in Ankara on Feb. 28, 1957. Since the 1955 agreement had come into operation in October of that year the Turkish Government had paid off nearly £4,000,000 of arrears, but on the other hand further payments arrears estimated at £4,500,000 had accumulated, in addition to debts of about £500,000 owing by Turkey to exporters in British Colonies.

Under the new protocol the scope of the 1955 agreement was extended to include all the newly-accumulated arrears to Feb. 28, 1957. The Turkish payments of £130,000 a month to the special account which is used for the settlement of debts in chronological order were continued, but the previous arrangement under which 50 per cent of the sterling proceeds of special sales of Turkish supplementary products were set aside to settle debts out of chronological order was discontinued because of Turkey's present balance-of-payments difficulties. Instead, it was laid down that only 30 per cent of the proceeds of such special sales would be paid to creditors out of chronological order, while 20 per cent would form part of the monthly payments for the repayment of debts in chronological order.

The Turkish Government undertook, however, to increase their guaranteed minimum payments for the settlement of these debts in 1957 and subsequent years to £2,500,000 annually—i.e. £1,560,000 by regular monthly payments and £940,000 by special sales (for which there had previously been a fixed minimum, so that only relatively few such sales had been transacted). If the total annual payment exceeds £2,500,000, the balance may be carried forward to the following year.

Yugoslavia. An Anglo-Yugoslav agreement on trade for the period April 1, 1957 to March 31, 1958 was signed in Belgrade on April 2, 1957, covering commercial exchanges which, it was hoped, would be slightly more than the £15,750,000 realized in 1956-57.

Though Yugoslavia has no import licensing system, an agreed estimate was drawn up of the probable pattern of imports from the U.K., including industrial products, machinery, chemical raw materials, cars, spare parts, etc. For British imports from Yugoslavia, most of which are unrestricted, the agreement laid down quotas for such Yugoslav products as are still subject to import permits. Outside these quotas it was expected that Yugoslavia would export "traditional" goods such as timber and timber products; it was also expected that Yugoslavia would resume the export of uncooked meats and bacon, as well as ham and salami.

Of total Yugoslav exports in 1956, six per cent went to Britain, while 9.8 per cent of Yugoslav imports came from Britain. The agreement also contained a statement about Export Credits Guarantee Department cover for U.K. exports to Yugoslavia, as well as provisions regarding non-discrimination in shipping.

Similar trade arrangements had been agreed in 1955 and 1956 for the years ending March 31, 1956, and March 31, 1957 respectively.

British Import Arrangements for Bacon and Pork. - Danish Reactions.

The Board of Trade announced on Aug. 3, 1956, that, following the resumption of private trading in bacon and pork on Oct. 1, the following imports would be admitted: (*a*) unlimited imports of bacon, whole hams, and fresh chilled and frozen pork under open individual licences from the sterling area; (*b*) imports of bacon and similar types of pork from certain O.E.E.C. countries and their dependencies; (*c*) imports of bacon from Poland and Hungary under bilateral trade arrangements. No imports would be allowed from the dollar area.

On Oct. 3, 1956, the Danish Ministry of Agriculture banned the export to Britain of pig-meat other than bacon and certain processed pork products, owing to a dispute between Danish bacon factories and private exporters. The factories opposed the exporters' plan for the re-opening of trade with Britain in other pork products, lest the British market should be swamped by poor quality exports of such products and the good name of Danish bacon be affected thereby. The ban was lifted on Oct. 22, however, following agreement between the two sides.

Danish Protests against British Egg Exports to Europe.

Considerable concern was aroused in Denmark by the fact that, in view of a surplus production of British eggs in the home market, Britain had started exporting eggs to continental countries which were traditional markets for Danish egg exports, notably Germany and France, at specially low prices made possible through the egg subsidies paid to British farmers.

The Danish Foreign Ministry announced on Feb. 19 that the Danish Ambassador in London had lodged a formal protest with the British Government against these egg exports, and declared that "such a subsidized export offers a serious danger to Danish agricultural exports and is, in the opinion of Denmark, contrary to the rules of the General Agreement on Tariffs and Trade (GATT)." Replying to the Danish protest, the British Government pointed out that it had reduced the egg subsidies by 3½ per cent and that the exports were only temporary.

After a second Danish protest and indecisive talks with a British trade delegation which visited Copenhagen on April 17-19, the Danish Government made a formal complaint to the inter-sessional committee of GATT, which opened its meeting in Geneva on April 24. The complaint was also directed against British exports of State-subsidized cattle, though it was stated that cattle exports were smaller than the egg exports and had been included in the complaint mainly on grounds of principle.

It was pointed out by a spokesman of the Danish egg producers on April 15 that Britain was delivering eggs to Western Germany from her surplus production in almost the same quantities as Denmark, and that British eggs had also been exported in considerable quantities to Italy, Switzerland, France, and Sweden.

New talks between the British and Danish Governments were held in London on May 20-21. It was officially announced afterwards that the British Government had agreed to take steps to prevent serious damage being done to normal Danish export markets as a result of the export of eggs which had benefited from the U.K. subsidy on home production. The machinery for implementing this decision was now being worked out and would be announced after further consultation between the two Governments within the next few weeks. (Treasury Press Office - Board of Trade Journal - Financial Times - Australian News and Information Bureau - Polish and Turkish Embassy Press Offices, London - Berlingske Tidende, Copenhagen) **(14956 A; 13471 A; 14180 A.)**

A. UNITED STATES. — Pulitzer Prize Awards.

The recipients of the annual Pulitzer Prizes were announced on May 6 by the trustees of Columbia University, N.Y., the awards being for the year 1956:

Drama. Awarded posthumously to the late Eugene O'Neill for his play *Long Day's Journey into Night*, which was completed in 1940 and had its première in New York in November 1956. Mr. O'Neill had been awarded three Pulitzer Prizes for drama in his lifetime—in 1920 for *Beyond the Horizon*, in 1922 for *Anna Christie*, and in 1928 for *Strange Interlude*. In the 44-year history of the prizes no other playwright had been honoured four times, and only one other person had won four "Pulitzers"—Robert Frost, the poet. The award was the first to be conferred posthumously. [Eugene O'Neill died on Nov. 27, 1953—see page 13386, second column.]

Literature. No award was made in the field of fiction, but a special citation was given to Kenneth Roberts for "his historical novels which have long contributed to the creation of greater interest in early American history." Among well-known historical novels by Mr. Roberts are *Northwest Passage*, *Oliver Wiswell* and *Lydia Bailey*.

Biography. Awarded to Senator John F. Kennedy (Democrat, Massachusetts) for his book *Profiles of Courage*, a study of political integrity as personified by selected American politicians. Senator Kennedy (39) is one of the leading personalities in the Democratic Party and the son of Mr. Joseph P. Kennedy, onetime Ambassador to Great Britain.

History. Awarded to Mr. George F. Kennan, formerly U.S. Ambassador in Moscow, for his book *Russia leaves the War*, the first of a projected three-volume study of American relations with Russia in the period of the Bolshevik seizure of power and immediately thereafter.

Poetry. Awarded to Richard Wilbur for his volume of poems entitled *Things of This World*. Mr. Wilbur, author of two earlier volumes of verse, is Professor of English at Wesleyan University, Middletown, Connecticut.

Music. Awarded to Dr. Norman Della Joio for his *Mediations on Ecclesiastes*, originally designed as music for a ballet. Dr. Della Joio teaches musical composition at Sarah Lawrence College (Bronxville, N.Y.) and has written orchestral, choral and chamber music works, in addition to ballet scores and two operas.

National Reporting. Awarded to Mr. James Reston, chief correspondent of the *New York Times* in Washington, for "distinguished national correspondence, including both news dispatches and interpretative reporting." A series of five dispatches written by Mr. Reston in June 1956, analyzing the effects of President Eisenhower's illness on the functioning of the Executive Branch, was cited as an outstanding example of his work. [Mr. Reston had also won the Pulitzer Prize for national reporting in 1945 for his dispatches on the Dumbarton Oaks conference.]

International Reporting. Awarded to Mr. Russell Jones, of the United Press, for his "excellent and sustained" coverage of the Hungarian uprising in the autumn of 1956. Mr. Jones, working at considerable personal risk, wrote eyewitness reports of the Hungarian revolt and its suppression by the Soviet forces; he remained in Hungary until expelled from Budapest in December.

The prize for "disinterested and meritorious service" by a newspaper was awarded to the *Chicago Daily News* for its "determined and courageous" action in exposing a financial scandal in the State Government of Illinois.

A. WESTERN GERMANY - UNITED KINGDOM - UNITED STATES. — Dr. Adenauer's Talks with Mr. Macmillan and President Eisenhower. - Declaration by President Eisenhower and Dr. Adenauer.

At the invitation of the German Federal Government, Mr. Harold Macmillan paid a three-day visit to Bonn on May 7-9 for discussions with Dr. Adenauer and other West German Ministers. The visit was the first paid by a British Prime Minister to the Federal Republic since its formation.

The British participants in the discussions, in addition to Mr. Macmillan, included Mr. Selwyn Lloyd (Foreign Secretary), Sir Christopher Steel (Ambassador in Bonn), and senior officials of the Foreign Office and the Ministry of Defence. On the German side the participants, in addition to Dr. Adenauer, included Dr. von Brentano (Foreign Minister), Professor Erhard (Minister of Economics), Herr Strauss (Minister of Defence), Professor Hallstein (State Secretary in the Foreign Ministry), and Lieut.-General Heusinger.

The following communiqué (cross-headings inserted) was issued after the end of the talks between Dr. Adenauer and Mr. Macmillan:

"... The visit afforded an opportunity for very thorough discussions of international problems of common concern. The conversations were conducted in an atmosphere of great frankness and cordiality. The two Heads of Government were in full agreement on the main aims of their policies.

Anglo-German Co-operation. "The British Prime Minister's visit has further strengthened the friendly relations existing between the German Federal Republic and the United Kingdom. It has confirmed the conviction held by both Governments that the close co-operation, based on mutual trust, between these two allied nations serves to maintain world peace and contributes to the well-being of the free world.

"The two Governments agree that the most important goal of their foreign policy is to maintain and consolidate peace. They consider that the efforts of the United Nations to bring about disarmament under an effective system of control covering all types of weapons must continue to be promoted energetically. As long as the Soviet bloc is not willing to enter into the necessary comprehensive agreements, the existing defence organizations which have hitherto so effectively safeguarded peace and freedom, and which threaten no-one, must continue to be strengthened.

European Security. "The two Heads of Government discussed in detail the question of European security and defence. They agreed ... on the need for NATO to retain an effective deterrent against aggression, including an adequate shield of land, sea and air forces for the protection of the territory of the member-States. The Federal Minister of Defence will shortly visit London to discuss defence questions of mutual interest.

Euratom and the Common Market Project. "The British Government welcomes the treaties signed in Rome on March 24 as a further step toward a united Europe and a contribution to strengthening the European economy. Both Heads of Government agreed that the interests of Europe would best be served by the early ratification of the Rome treaties. They further agreed that it was necessary to establish as soon as possible a Free Trade Area as a complement to the Common Market. They therefore resolved to do all in their power to ensure that the negotiations to this end are carried forward with a view to their successful conclusion at the appropriate time.

"It was also agreed that the multiplicity of existing and projected European organizations and of European parliamentary bodies makes it desirable to pursue joint efforts to simplify and clarify so far as possible the structure of European institutions. They consider that while study of this problem should continue with other interested Governments, the most appropriate moment to make some forward steps would be after the ratification of the Rome treaties.

German Reunification. "The British Government reaffirmed that the reunification of Germany remains one of their main political aims. They stated their determination to contribute to the utmost of their power to the achievement of this goal. Both Governments are convinced that there can be no genuine security in Europe so long as Germany remains divided."

Prior to Mr. Macmillan's visit, considerable disquiet had been expressed in Western Germany at the implications of Britain's new defence policy, involving projected reductions in British troops on the Continent. In this connexion many German newspapers had expressed fears lest British—and possibly American—troop reductions in Europe might weaken the security of the Federal Republic. At a press conference before leaving Bonn, however, Mr. Macmillan said that he had explained British defence policy to the Federal Chancellor and had stressed Britain's continued determination to fulfil her European obligations. Asked whether he had discussed with Dr. Adenauer the projected cuts in the Army of the Rhine, Mr. Macmillan said that "we have not asked, nor would it have been fair to ask the Chancellor, for a promise of support for this or any other particular plan."

Dr. Adenauer's Visit to Washington.

The German Federal Chancellor, accompanied by Dr. von Brentano, visited the United States during the last week of May for talks with President Eisenhower and Mr. Dulles on May 27-28 at the President's farm at Gettysburg. The following joint declaration (cross-headings inserted) was issued by President Eisenhower and Dr. Adenauer on May 29, after the talks had ended:

Basic Aims of U.S. and West German Policy. "The President and the Chancellor agreed that the basic aim of the policies of their two countries is the maintenance of peace in freedom. To that end it is the common policy of their Governments to work for the achievement of conditions in which all nations can live in peace and freedom and devote their energies and resources to promoting the welfare of their peoples.

"They agreed that the realization of these conditions depends upon the removal of the causes of tension between the Soviet Union and the free world. This tension is mainly attributable to the acts and policies of the Soviet Union, among them the deprivation of other peoples of their freedom.

Denunciation of Soviet Action in Hungary. "The President and the Chancellor noted with great concern the consequences of the brutal Soviet intervention in Hungary. The continued suppression of the rights of the Hungarian people makes it difficult for other nations to accept as genuine the professed Soviet desires for peaceful co-existence.

German Reunification. "The President and the Chancellor reaffirmed that the ending of the unnatural and unjust division of Germany is a major objective of the foreign policies of the two Governments. Germany must be reunited on a free and democratic basis by peaceful means. If the Soviet rulers really desire peace and the relaxation of international tension, they can give no better proof than to permit the reunification of Germany through free elections.

"The President and the Chancellor emphasized that the restoration of German national unity need give rise to no apprehension on the part of the Soviet Union as to its own security. It is not the purpose of their Governments to gain any one-sided military advantage from the reunification of Germany. In conjunction with such reunification, they stand ready, as stated at the two Geneva Conferences of 1955, to enter into European security arrangements which would provide far-reaching assurances to the Soviet Union.

Strengthening of NATO. "The President and the Chancellor agreed that NATO is essential for the security of the entire free world. They agreed that the defensive strength of NATO must be further improved in the face of the continuing Soviet threat and the absence of a dependable agreement for major reductions of armaments. The German Federal Government will proceed as rapidly as possible with building up its agreed contribution to the Western collective defence system.

U.S. Forces in Europe. "For the purpose of contributing its fair share to the defence of the North Atlantic area, the United States intends to maintain forces in Europe, including Germany, as long as the threat to the area exists ... The Atlantic alliance must be in a position to use all available means to meet any attack which might be launched against it. The availability of the most modern weapons of defence will serve to discourage any attempt to launch such an attack.

U.S. Support for Euratom and European Common Market. "The President and the Chancellor expressed gratification over the significant progress made toward closer economic integration in Europe. The Chancellor expressed his belief that the treaties establishing Euratom and the European Common Market constitute a further step of historic significance toward European unity. The President expressed the great interest of the U.S. Government and the American people in these treaties, and his belief that their entry into force will benefit the people not only of Europe but of the entire world.

Disarmament. "The two Governments are in agreement that efforts must be pressed in the United Nations to reach agreement on measures for disarmament, with respect both to conventional and nuclear weapons, under an effective system of international control. The President and the Chancellor agreed that if a beginning could be made toward effective measures of disarmament, this would create a degree of confidence which would facilitate further progress in the field of disarmament and in the settlement of outstanding major political problems, such as the reunification of Germany. They agreed that if such initial steps succeed, they should be followed within a reasonable time by a comprehensive disarmament agreement which must necessarily presuppose a prior solution of the problem of German reunification.

"Accordingly, the Chancellor advised the President, as he has the French and British Governments, that the Federal Republic would consider that the conclusion of an initial disarmament agreement might be an appropriate time for a conference on the reunification of Germany among the Foreign Ministers of the four Powers responsible therefor. The United States will consult with the French and British Governments regarding this matter.

European Security. "The President stressed that any measures for disarmament applicable to Europe would be accepted by the United States only with the approval of the NATO allies, and taking into account the link between European security and German reunification. He assured the Chancellor that the U.S.A. does not

intend to take any action in the field of disarmament which would prejudice the reunification of Germany. He stated that the United States would consult with the German Federal Government closely on all matters affecting Germany arising in the disarmament negotiations."

In a speech to the U.S. Senate on May 28, Dr. Adenauer emphasized that the entire German people, in both Western and Eastern Germany, desired only to live in "unity, peace, and freedom"—the three principles on which the Federal Republic was based.

In the course of his speech the Chancellor said that as a result of the "two grievous experiences" encountered by the German people—"the totalitarian dictatorship imposed on us during the National Socialist regime, and the Communist dictatorship in the Soviet zone of Eastern Germany"—the entire German people rejected all forms of totalitarianism and wished to ally themselves as closely as possible with the other free peoples of the world. Whereas the three Western Powers, faithful to their principles, had rebuilt a German State on a democratic basis after the war, the Soviet Union had "misused its trusteeship and subjected the Soviet zone to a subservient, satellite Communist regime"—a regime detested by all but an infinitesimal number of people in Eastern Germany, as the 1953 uprising had shown. After saying that "the German Republic will be incomplete as long as it is confined to the territory of the Federal Republic," Dr. Adenauer declared: "We demand reunion with 17,000,000 fellow-Germans [in the Soviet zone] . . . We demand from the fourth of the victorious Powers that which the other three, in loyal fulfilment of the responsibility assumed by them when the German State collapsed, have long since conceded of their own free will . . ."

The concern in Western Germany at the implications of the new British defence policy had been paralleled by fears lest the United States, in seeking a solution of the disarmament problem, might reach an agreement with the U.S.S.R. on this matter at the expense of German reunification. President Eisenhower's assurances to Dr. Adenauer, as embodied in the joint declaration, were therefore warmly welcomed in the Federal Republic.—(Frankfurter Allgemeine Zeitung - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. 14980 A; 14425 A; 14271 A.)**

A. IRAQ - SAUDI ARABIA. — Baghdad Meeting between King Faisal and King Saud. - Joint Declaration.

A six-day visit to Iraq by the King of Saudi Arabia ended on May 17 with the publication of a joint communiqué on the talks held at Baghdad between King Saud and King Faisal. After speaking of "the beginning of a new era of friendship and solidarity" between the two countries, the communiqué said that Iraq and Saudi Arabia were agreed that "no Arab country should interfere in the internal affairs of another Arab State." It was also announced that Iraq and Saudi Arabia were in agreement on the following points:

(1) Both nations affirmed "their determination to protect the rights of the Arabs in the Gulf of Akaba, which is a closed Arab gulf leading to the Moslem holy places, and to do their utmost to prevent Israeli violation of this Arab gulf by all means at their disposal." Every effort would be made to prevent oil reaching Israel from any Moslem source.

(2) Both countries would resist "Imperialism, Communism, and Zionism" as dangers "threatening Arab stability, independence and power."

(3) Iraq and Saudi Arabia uphold the principles of the Arab Security Pact, the Bandung Conference, and the United Nations, and would do all in their power to unify the Arab and Moslem world.

(4) The return of the Palestine refugees to their homes was an essential condition for the restoration of peace and security in the Middle East.

(5) The two countries disapproved French "methods of force" in Algeria and would support the Algerian people in its struggle for independence.

(6) Iraq and Saudi Arabia would strengthen their economic and cultural relations and conclude agreements for that purpose.

No direct reference was made to the situation in Jordan or to the Baghdad Pact. The declaration that "no Arab country should interfere in the internal affairs of another," however, was widely regarded as a joint rebuke to President Nasser and to the Egyptian propaganda directed against Iraq, Jordan and the Lebanon. The reference to a "new era of friendship" in Iraqi-Saudi relations was also regarded as marking the end of the long-standing feud between the Hashemite dynasty (to which the Royal Houses of Iraq and Jordan both belong) and the House of Saud. [This feud originated when King Faisal's grandfather, a member of the Hashemite dynasty, was driven out of Saudi Arabia by King Saud's father, the late Ibn Saud.]

King Hussein had been invited to take part in the talks but had declined "with apologies" in view of the situation in Jordan.—(Times - Manchester Guardian - New York Times) **(Prev. rep. 15504 B; 15340 A.)**

B. MONGOLIA. — Economic Agreement with Soviet Union. - Increased Soviet Economic Aid. - Joint Soviet-Mongolian Enterprises transferred to Mongolia.

An agreement on Soviet economic aid to Mongolia was initialled in Moscow on May 15 after six days' discussions between Soviet leaders and a delegation from the Mongolian People's Republic headed by the Prime Minister, M. Tsedenbal.

Soviet leaders taking part in the talks included Marshal Bulganin, M. Khrushchev, M. Mikoyan, M. Gromyko (Foreign Minister), M. Zverev (Minister of Finance), M. Kabanov (Minister of Foreign Trade) and M. Kuzmin (chairman of the State Planning Commission). The Mongolian delegation included the Foreign Minister (M Adilbash) and other officials.

In addition to increasing the amount of Soviet economic aid to Mongolia, the agreement also provided for the transfer to Mongolian control of the Mongolian Oil Trust (Mongolneft) and the joint Soviet-Mongolian company for developing the country's mineral resources (Sovmongolmetal). The agreement is summarized below:

Soviet Economic Aid since 1946. After "noting with satisfaction" that the Mongolian People's Republic had been transformed during the past ten years "from a backward feudal land into a new and growing independent people's democratic State," the agreement recalled that coal, oil, ore-mining, and food and light industries had been established in Mongolia during that period with Soviet assistance; that railway and motor transport had been widely developed; and that a number of factories and industrial installations had been built. In the same period the U.S.S.R. had granted long-term credits to Mongolia "on easy terms" totalling over 900 million roubles, and had also handed over to Mongolia free of charge more than 100 million roubles' worth of Soviet property.

Transfer of Joint Enterprises. During the past ten years the U.S.S.R. had carried out geological prospecting and built oil-extracting and refining enterprises in Mongolia at a cost of over 300 million roubles. As a result of these measures Mongolia could now cover her petroleum needs to a large extent from her own resources, and the Soviet Government would therefore hand over to the Mongolian People's Republic, free of charge, the enterprises of Mongolneft (the Mongolian Oil Trust)

Similarly, the Soviet-Mongolian joint-stock company for developing mineral resources (Sovmongolmetal) had laid the foundations for a Mongolian mining industry and had trained the necessary personnel. The Soviet Government had accordingly decided to transfer its share in Sovmongolmetal to the Mongolian Republic, which would make interest-free repayments over a 30-year period beginning in 1962.

In addition, the U.S.S.R. would hand over to Mongolia, free of charge, the installations at the airports of Ulan Bator (the Mongolian capital) and Sain Shand, as well as "a certain number of aeroplanes."

Future Economic Assistance. After recalling that a 1,000-kilometre (600-mile) trunk line of the Ulan Bator Railway had been built with Soviet assistance, it was stated that at the present time 18 industrial, agricultural, and municipal service establishments were being built in Mongolia with Soviet material, technical and financial aid, including a coal-mine with an annual output of 600,000 tons, four flour mills, a confectionery factory, a dairy plant, a water-supply line, a sewage system, and a steam-heating project in Ulan Bator.

To promote the further economic development of Mongolia, the U.S.S.R. had agreed to deliver the following equipment during the period 1958-60: 2,500 tractors, 550 grain combine harvesters, 200 diesel and mobile electric power stations, 80 saw-mills, 3,000 motor lorries, building materials, and over 10,000 head of pedigree livestock. In addition, the U.S.S.R. would help to build two factories for the production of pre-fabricated houses, a silicate brick factory and a radio station in Ulan Bator, and other installations. The U.S.S.R. would also assist the Mongolian authorities in carrying out geological prospecting for oil and non-metallic minerals during the same period, and would help to develop Mongolia's agriculture. A credit of up to 200 million roubles on easy terms would be made available to Mongolia to enable her to pay for the equipment, materials, and technical assistance supplied by the U.S.S.R. It was further stated that the Soviet Government had agreed to cover 50 per cent of the expenses incurred in developing Mongolian public health services during 1958-60.

The statement also announced full agreement between the Soviet and Mongolian Governments on all international questions, and referred to the continued development of Soviet-Mongolian political, economic and cultural co-operation. It called on the Western Powers to "abandon the policy of ignoring the Mongolian People's Republic" and to "change their attitude" toward the admission of Mongolia and the People's Republic of China to the United Nations.
(Soviet Embassy Press Department, London) **(15449 B.)**

C. UNITED KINGDOM.—Royal Radar Establishment.

During a visit by the Queen to the Radar Research Establishment at Malvern on April 24, it was announced that it would in future be known as the Royal Radar Establishment by command of her Majesty.—(Times) **(Prev. rep. 13055 A.)**

A. SYRIA. — Virtual Army Dictatorship under Colonel Sarraj. - Increasing Influence of Left-wing and Nationalist Elements. - U.S. Démarche on Soviet Arms Supplies to Syria. - The Damascus "Conspiracy Trial." - New Government formed by M. Assali.

During the latter months of 1956 and the early months of 1957 increasing concern was caused in the Western countries, and also in Turkey, at reports of continued Soviet arms shipments to Syria and at the reported presence of numbers of Soviet technicians and experts in that country. At the same time Western press correspondents in the Middle East reported that Syria was falling increasingly under the control of a nationalistic and strongly left-wing element in the Syrian Army headed by Colonel Abdul Hamid Sarraj, head of the Army's *Deuxiéme Bureau* (Intelligence Section). The Baghdad Correspondent of *The Times*, in a dispatch on Nov. 27, 1956, described Syria as being "in the grip of a military dictatorship" headed by General Sarraj, while the *New York Times* (Dec. 11) similarly described Colonel Sarraj as "a potent power behind the present Syrian Government." These and other reports said that Colonel Sarraj was strongly pro-Egyptian and pro-Soviet in sympathy, and that he enjoyed the support both of the extreme right-wing nationalists and of the Syrian Communists.

Colonel Sarraj (31) emerged into prominence as leader of the left-wing faction in the Syrian Army after the assassination of Colonel Malki in 1955 by a member of a rightist political group (see 14315 B). He became head of the Syrian Army's *Deuxiéme Bureau* in 1955, having previously served as assistant military attaché in Paris. A personal friend of the Egyptian President, Colonel Nasser, he is known to be strongly opposed to the Baghdad Pact and to favour a close political and military alignment between Egypt, Syria, and Jordan.

[As stated on page 15564, second column, it was alleged on May 11 by the Jordanian newspaper *Al Urdon*, and by Jordan Radio, that Colonel Sarraj was a member of the committee which had been established with Egyptian and Soviet support to overthrow the monarchies in Arab countries and replace them by republics. The Jordanian Army Command, moreover, accused Colonel Sarraj of complicity in the plot to overthrow King Hussein—see page 15565, first column.]

U.S. Démarche to Syria on Soviet Arms Shipments.

It was disclosed in Washington on Nov. 28, 1956, that the U.S. Government had expressed its "concern" to the Syrian Government at the "substantial shipments" of Soviet arms to Syria in recent months, despite the U.N. resolution of Nov. 2 (see page 15186) urging all U.N. member-countries to refrain from sending arms to the Middle East. The State Department spokesman (Mr. Lincoln White) said that it had been established that Soviet arms of "various types and weights" had been shipped to Syria, some of them after the outbreak of hostilities in Egypt.

No detailed information was available as to the extent of these arms shipments, nor were any statements issued either in Damascus or Moscow beyond Syrian denials of the presence of Soviet technicians and experts. A question on this matter, however, was asked in the British House of Lords on May 1, 1957, by the Earl of Dundee, who drew attention to a *New York Herald Tribune* report of April 20 stating that aviation training teams from the U.S.S.R. were arriving in Syria regularly on a six-week rotation system from the Caucasus, and that the aircraft carrying them were photographing strategic areas in Persia and Iraq.

Lord Home (Lord President of the Council) said that the British Government believed that military advisers and technicians had been arriving in Syria during the past few months from Soviet-bloc countries to train the Syrian forces in the use of equipment acquired from those countries. The Government had no evidence, however, to confirm that Soviet aviation training teams were arriving in Syria every six weeks, or that strategic areas in Persia or Iraq were being photographed.

As was generally known, Lord Home added, Egypt had received from the Soviet bloc by the end of October, 1956, military equipment to an estimated value of between £120,000,000 and £150,000,000. Similarly, Syria had received military equipment to the value of about £20,000,000 by the same date. Since the Suez crisis, in which Egypt lost a considerable quantity of the arms supplied to her by the Soviet bloc, Soviet ships were widely reported to have resumed deliveries of military equipment to both Egypt and Syria. Shipments to Syria had been certainly resumed in December, and those to Egypt were reported to have begun by February, if not earlier.

Syrian Allegations against Britain, France, Israel, and Iraq.

During the General Assembly's debate on Hungary, the Syrian delegate interrupted the proceedings on Nov. 21, 1956, to say that he had received a cable from his Government concerning "imminent aggression" against Syria by British, French, and Israeli forces. At a subsequent press conference a Syrian spokesman alleged *inter alia* that British, French and Israeli aircraft had flown over Syria on numerous occasions, that British and French troops had taken part in the Israeli attack on Egypt after landing at Haifa, and that "massive concentrations" of Israeli, British, and French forces were gathering on the Syrian and Jordanian borders. These allegations were denied *in toto* by Britain, France, and Israel, a British Foreign Office spokesman describing them as "a tissue of lies from beginning to end." On Nov. 24 the Iraqi Government similarly declared that there was no truth whatever in Syrian allegations that quantities of arms had been sent from Iraq to Syria to enable dissident elements in that country to overthrow the Syrian regime.

The Syrian Government sent Notes to the U.S. and Soviet Embassies in Damascus on Nov. 28, 1956, explaining Syria's "independent policy" and referring to a "campaign of deceit and agitation" waged by "Israel and imperialism." No details were given, but a Syrian official spokesman said that Syria was pursuing "an Arab nationalist policy based on positive neutrality and abstention from a policy of blocs and cold war." In a Damascus broadcast on Dec. 6 President Kuwatly made a bitter attack on the Baghdad and NATO pacts, alleging that they were aimed at undermining Syria's independence and sovereignty "on the pattern already used against Egypt." He described the "rumours" of Communist penetration of Syria as designed to disrupt the Egyptian-Syrian-Jordanian alliance.

The Damascus "Conspiracy Trial."

The trial began in Damascus on Jan. 8, before a military court-martial, of 47 Syrians—including many leading political figures—on charges of conspiring to overthrow the regime by armed revolt with financial backing from Iraq, and at the instigation of the Iraqi, British, French and Turkish Governments. Only 29 of the accused appeared in court, the other 18 being abroad—in Europe or the Lebanon—and being tried *in absentia*.

Among those put on trial were Brigadier-General Adib Shishakly, President of Syria until his deposition in 1954 (see 13425 A); Colonel Salah Shishakly, brother of the ex-President; the Emir Hassan el-Atrash, head of the Jebel Druse tribe and a former Minister; Adnan Atassi, formerly Ambassador in Paris and son of ex-President Hashem Atassi; Faydi Atassi, a former Foreign Minister; Colonel Safa, formerly Military Attaché in Washington; Dr. Sami Kabbara, a former Minister of the Interior; and Mikhail Ilian, member for Aleppo in the Syrian Parliament and an ex-Minister of State. The other defendants included a number of Army officers, members of the Syrian Parliament, and other persons, among them a Lebanese national.

The indictment alleged that the "conspirators" had planned to start an uprising, while the Syrian Army was immobilized by a border clash with Israel, with the aim of overthrowing the present regime and transforming Syria into a "servant of imperialism." Specifically, it was alleged that simultaneous risings had been planned in the Jebel Druse, the Alaouite mountains, and Damascus; that the conspirators would have set up a new Government under the Premiership of Dr. Kabbara or Munir Ajlani, both described as pro-Iraq politicians; that President Kuwatly, Colonel Sarraj, and other leading personalities in the present Government would have been assassinated; and that the new Government would have dissolved Parliament, eliminated the *Baath* (Socialist) and Communist parties, and dissolved the Army's *Deuxiéme Bureau*. The "instigating Powers"—Britain, France, Turkey, and Iraq—would then have recognized and backed the new regime. Had the "conspiracy" failed, the rebels would have retreated to the Alaouite mountains and have called upon the British and French to land in Syria and impose "a Government of traitors."

It was further alleged that the Iraqi Foreign Minister (M. Bashayan) and the Iraqi Chief of Staff (General Daghistani) had gone to Geneva to persuade ex-President Shishakly to lead the plot; that General Shishakly had accepted the task for a consideration of 35,000 Iraqi dinars; that he had been conveyed to Beirut in June 1956 aboard a British transport and had received 15,000 dinars from the Iraqi military attaché in the Lebanon, who it was alleged, had been allocated 5,000,000 dinars by the Iraqi Government to promote the "conspiracy"; and that the "conspirators" had received a quantity of arms from Iraq—described as "800 rifles, six automatic guns, and several cases of munitions." Three principal Syrian "elements," it was alleged, were implicated in the plot—"Shishakly supporters; Mohammed Safa, a dismissed officer of the Syrian Army; and the [outlawed] Social National Party."

The trial ended on Feb. 26, 1957, with the passing of the death sentence on 12 of the defendants (seven *in absentia*), while five others were sentenced to life imprisonment—including ex-President Shishakly *in absentia*. Three defendants were acquitted, the remainder being given prison terms ranging from three months to 20 years. The death sentences imposed on the five defendants present in court were subsequently commuted on March 6 to life imprisonment with hard labour.

Of those present in court, death sentences (later commuted to life imprisonment) were passed on Dr. Kabbara, Adnan Atassi, and three former members of Parliament—Hayel Surur, Subhi al-Omari and Ali Hassan al-Hakim. The seven defendants on whom death sentences were passed *in absentia* were Emir Hassan al-Atrash, Colonel Salah Shishakly, Mikhail Ilian, Said Takieddine (the

Lebanese defendant), Colonel Safa, and two other Army officers. One of the defendants tried *in absentia*—Colonel Jedid, leader of the Social National Party—had been shot dead by a Syrian gunman in the Lebanon.

It was commented outside Syria that the so-called "conspirators" were in nearly all cases persons of right-wing or moderate views opposed to the extremist policies of Colonel Sarraj and the regime. Moreover, it was commented that the indictment had been drawn up by the Army authorities and that the trial had been held before a military court-martial from whose verdicts there was no right of appeal. The inference was therefore drawn that the trial had, in effect, constituted a "purge" of Opposition elements in the political parties and the armed forces—particularly in view of the "confessions" which, it was alleged, had been made by many of the defendants. The Middle East Correspondent of the *Daily Telegraph*, in a dispatch from Baghdad, said that the Damascus trials were regarded by Iraqi opinion as "being conducted with typical Iron Curtain purge technique."

New Government formed by M. Assali.

During the first fortnight of December most of the parties represented in the Syrian Parliament formed themselves into a "National Parliamentary Front" pledged to carry out the principles of a "National Charter" adopted by those parties. The Prime Minister, M. Assali, resigned on Dec. 22 in order to form a "national government" representative of the parties adhering to the "National Charter." The membership of the new Cabinet was announced on Dec. 31, M. Assali taking the portfolio of the Interior in addition to the Premiership, and retaining only two Ministers of the former Government—the Foreign Minister, M. Salah Bitar, and the Minister of National Economy, M. Kallas. All the principal parties were represented except the right-wing People's Party (*Shaab*) and the Constitutional Bloc, the new Government including Nationalists, *Baath* Socialists, and a "liberationist."

In a policy statement on Jan. 3, M. Assali said that the new Government would base its policy on the principles of the "National Charter," viz: the safeguarding of the independence and sovereignty of Syria; the foiling of "imperialist conspiracies" against Syria and other Arab countries; resistance to the Baghdad Pact and to "imperialism," "colonialism" and "Zionism"; aid for those Arab peoples still subjected to "imperialism"; and support for the Iraqi people in its "struggle against colonialism." M. Assali reiterated his Government's support for a policy of "Arab nationalism," "positive neutralism," and abstention from "power blocs"; declared that Syria would not conclude a peace treaty with Israel; and added that "practical steps" would be taken to bring about a Federal Union between Syria and Egypt.

Reports from Syria during April and May spoke of increasing popular discontent with the Government and the "Army dictatorship," and also of growing strain between the Army and the political parties supporting it. Violent scenes occurred in the Syrian Parliament on April 10, when deputies came to blows after M. Assali had refused demands by the People's Party to end martial law, which had been imposed at the outbreak of the Suez crisis and still remained in force. The Middle East Correspondent of the *Daily Telegraph*, in a dispatch from Damascus on May 21, spoke of "a battle between Parliament and the ruling Army dictatorship over control of this semi-Communist country," and of the likelihood of an overt split "between the Army and its political supporters in the Government who are now demanding full control." (Le Monde, Paris - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Army Crises, 14988 G; 14315 B; Cabinet, 14940 A; Turkish Warning of Communism in Syria, 15230 A.)**

A. KASHMIR. — New President of "Azad Kashmir."

Sardar Mohammed Ibrahim Khan, president of the All-Jammu and Kashmir Moslem Conference, took office on April 18 as President of the "Azad Kashmir" Government (i.e. the government in the Pakistani-controlled area of Kashmir) in succession to Sardar Abdul Qaiyum Khan, who had resigned on the same day. On taking office the new President pledged himself to reinforce the "liberation movement" and to work for the eventual inclusion of Kashmir in Pakistan. Sardar Mohammed Ibrahim Khan, head of the first Azad Kashmir government formed in 1947, is a graduate of London University and a barrister of Lincoln's Inn.—(Dawn, Karachi) **(Prev. rep. 15265 A.)**

B. GHANA. — First High Commissioner in London.

The appointment of Mr. E. O. Asafu-Adjaye as Ghana's first High Commissioner to the United Kingdom was announced in Accra on June 8. Mr. Asafu-Adjaye, a lawyer, was formerly Minister of Local Government in Dr. Nkrumah's Cabinet. (Times)

C. BRITISH COLONIAL EMPIRE. — Colonial Development Corporation. - Report for 1956. - Revenue Surplus of £572,000. - Review of Corporation's Activities.

The report of the Colonial Development Corporation for 1956, published on May 1, 1957, showed a revenue surplus of £572,809, after payment of interest amounting to £416,178. This compared with a surplus of £409,233 in 1955, and included a net operating profit on direct projects and subsidiary undertakings of £371,718, compared with one of £113,165 in 1955. Capital approved during 1956 for new projects and for further stages of existing ones amounted to £20,000,000, increasing the total approved for various projects since the C.D.C. began operations in 1948 to £85,000,000. The Corporation's activities in 1956 are summarized below.

Projects in Operation. During the year eight new projects were started, two others completed, and three discontinued. At Dec. 31, 1956, there were 66 projects and investigations in progress, compared with 63 on Dec. 31, 1955. The total capital approved for these projects amounted to £74,201,000.

Location of Projects. The projects in operation at Dec. 31, 1956 were located as follows (capital approved for each area shown in parentheses): *Caribbean Region*, 16 (£7,742,000); *Far East*, eight (£16,043,000); *East Africa*, 15 (£15,484,000); *Central Africa*, seven (£22,002,000); *High Commission Territories*, 12 (£9,881,000); *West Africa*, eight (£3,149,000).

Functional Distribution of Projects. Of the total of £74,201,000 approved for the various projects and investigations now in progress, the largest amount (£27,079,000, or 36.3 per cent) was for power schemes, followed by agriculture (£12,039,000, or 16.3 per cent), property and housing (£9,935,000, or 13.1 per cent), minerals (£7,716,000, or 10.4 per cent), forestry (£6,701,000, or 9.2 per cent), factories (£4,333,000, or 5.9 per cent), animal products schemes (£3,257,000, or 4.4 per cent), transport and communications (£2,600,000, or 3.6 per cent), hotels (£111,000, or 0.6 per cent), and fisheries (£130,000, or 0.2 per cent). The report pointed out that the share allocated to power projects (including the investment of £15,000,000 in the Kariba hydro-electric scheme, see 14751 A) was 14.6 per cent higher at Dec. 31, 1956 than at Dec. 31, 1955, and the share of "basic developments" as a whole (power, housing, transport and communications) 10.5 per cent higher.

Revenue-earning Projects. The report stated that 36 projects were now earning revenue, but 19 others were still in the investigation and development stages. It added that certain large plantation projects (e.g. in British Guiana) would require further capital when their products were ready for processing, whilst other schemes awaited necessary basic services—e.g. a railway in connexion with Tanganyika Coalfields Ltd.

Capital Expenditure, 1948-1956. The amounts approved in each year of the Corporation's existence, and the actual expenditure in that year (shown in parentheses) were as follows: 1948-49—£13,000,000 (£2,500,000); 1950—£17,000,000 (£7,500,000); 1951—£7,000,000 (£10,000,000); 1952—£7,000,000 (£8,000,000); 1953—£6,000,000 (£7,000,000); 1954—£6,000,000 (£4,500,000); 1955—£9,000,000 (£8,000,000); 1956—£20,000,000 (£9,000,000).

The Corporation's Future. The report pointed out that the limit of borrowing by the Corporation fixed under the Colonial Development and Welfare Acts was £100,000,000. Of this sum, £85,000,000 had already been approved for expenditure on schemes by Dec. 31, 1956, whilst the balance might be required to bring existing schemes to fruition. New schemes now under examination would require about £38,000,000 additional capital, the report stressing that "unless the C.D.C. is to refuse new and pressing business, more capital is urgent."

C.D.C. Position with regard to "Emergent Territories." Dealing with the Corporation's position in territories which had attained self-government, the report quoted a clause from the Ghana Independence Act removing Ghana from the schedule of territories in which the C.D.C. might operate [see 15365 A]. It explained that when the inclusion of this clause was challenged in the House of Commons on the ground that it seemed to deprive Ghana of U.K. funds for development, the Government had insisted on its retention and had pointed out that other agencies were available and that it was questionable whether financial arrangements should be made with independent countries except on a Government-to-Government basis. The report referred to "the disappointment felt in Ghana and Malaya at the prospect of losing C.D.C. help," and said: "it is surely commonsense that the now established, efficient, and profitable C.D.C. should be permitted to invest in emergent territories. The C.D.C. has been assured on behalf of both the Ghana and Malaya Governments that it would be a great pity if emerging members of the Commonwealth were . . . to be deprived of the help of the experienced C.D.C. personnel." The report pointed out, however, that if the Corporation were to operate in self-governing territories, the word "colonial" would have to be dropped from its title.

The Overseas Resources Development Bill, intended to validate, retrospectively and prospectively, certain of the Corporation's activities previously held to be *ultra vires* (see 14848 A), was enacted on Aug. 2, 1956.—(Times - Daily Telegraph - Commonwealth Survey) **(Prev. rep. 14848 A.)**

A. IRISH REPUBLIC. — Senate Elections.

The new Senate of the Irish Republic was elected during the second week of May, following the recent general elections to the new Dail. Counting of votes for the various panels took place between May 8-11, the Senate being completed on May 15 by the nomination of 11 members by the *Taoiseach*, Mr. de Valera.

The 60 members of *Seanad Eireann* are chosen as follows: 43 for the five vocational panels (Cultural and Educational, Agricultural, Labour, Industrial and Commercial, and Administrative), six elected by the Universities (three for the National University of Ireland and three for Trinity College, Dublin); and 11 nominated by the *Taoiseach*. The "vocational" and University members are returned by an electoral college system as explained in 11673 B.

Among the 43 members elected for the vocational panels, 30 were members of the outgoing Senate; the new Senators included a number who were formerly members of the Dail, most of whom had been defeated in the recent general election. Mr. P. F. Baxter, chairman of the former Senate, was among the successful candidates on the Agricultural panel, while those elected on the Labour panel included five members nominated by the Irish T.U.C. The only change in University representation was that Professor P. M. Quinlan (Professor of Physics at University College, Cork), replaced Dr. Roger McHugh (lecturer in English at University College, Dublin) as one of the three Senators for the National University of Ireland.

The 11 Senators nominated by Mr. de Valera included Mr. Sean Moylan, the Minister of Agriculture. Other nominated Senators included Mr. Sean Brady, chairman of Clare County Council; Mrs. Nora Connolly-O'Brien, daughter of James Connolly, who was a signatory of the proclamation of the Irish Republic in "Easter week" of 1916; Mr. Sean O'Donovan, Chief Veterinary Inspector of Dublin Corporation; Mr. Thomas Mullins, general secretary of Fianna Fail; Mr. Laurence Walsh, the Mayor of Drogheda; and *An Seabhac* (Mr. Padraig Sugrue), a Gaelic scholar and folklorist, and president of the Folklore of Ireland Society.

As explained in 15429 A, Mr. Moylan had lost his seat at Cork in the recent general election but was appointed Minister of Agriculture in the Fianna Fail Cabinet formed after the elections.—(Irish Times, Dublin) **(Prev. rep. Dail Elections, 15429 A; Senate Elections, 13892 B.)**

B. ISRAEL. — Acceptance of Eisenhower Doctrine.

The Israeli Government's decision to support the "Eisenhower doctrine" for the Middle East was approved by the *Knesset* on June 3, after a six-hour debate, by 59 votes to five with 39 abstentions.

Explaining the Eisenhower doctrine to the House, Mr. Ben-Gurion referred particularly to the powers granted to the U.S. President to use armed force to assist any nation in the Middle East requesting assistance against aggression from any country controlled by international Communism. As Israel faced a greater danger of aggression than any other country in the Middle East, she "must accept any assistance against any aggressor if she wishes to live." Referring to a possible attack on Israel which might be supported by the Soviet Union, Mr. Ben-Gurion said: "Israel is not entitled to adopt the arrogant assumption that she can stand alone even if she is attacked by a neighbouring country controlled by a great Power. Therefore the American undertaking of assistance must be considered a step which strengthens both peace in the Middle East and the security of Israel."

The five opposing votes were cast by the Communist deputies, while the 39 abstentions included the deputies of the left-wing *Mapam* and *Ahdut Avoda* parties, the right-wing *Heruth* (nationalists), and the General Zionists. The *Mapam* and *Ahdut Avoda*—both of which are represented in Mr. Ben-Gurion's Cabinet—had originally announced their intention of opposing the Government, in view of their opposition to Israel's adherence to "power blocs," but subsequently decided to refrain from voting in order to preserve the coalition. (Times - Manchester Guardian) **(Prev. rep. 15417 A.)**

C. UNITED STATES. — Mr. Anderson succeeds Mr. Humphrey as Secretary of the Treasury.

It was announced in Washington on May 29 that President Eisenhower had accepted with "profound regret" the resignation of Mr. George Humphrey as Secretary of the Treasury, and had nominated Mr. Robert B. Anderson as his successor.

Mr. Anderson (46), a Texas-born lawyer, was originally an "Eisenhower Democrat" but is now a Republican. He had previously been Navy Secretary and later Deputy Secretary of Defence in the Eisenhower Administration, but left the Government in 1955 to become President of Ventures Ltd., a large mining corporation in Canada.

Mr. Humphrey resigned to take up the chairmanship of the National Steel Corporation in Pittsburgh, a company with which he had been closely associated before joining the Cabinet in 1953. (New York Times - New York Herald Tribune) **(Prev. rep. Cabinet, 14896 B; Mr. Humphrey, 12701 A.)**

D. CZECHOSLOVAKIA - POLAND - EASTERN GERMANY. — Meeting of Parliamentary Representatives. - Grotewohl-Siroky Discussions.

Representatives of the Czechoslovak National Assembly, the Polish *Seym*, and the East German *Volkskammer* met in East Berlin from May 9-11 to discuss questions arising out of "the remilitarization of the German Federal Republic, the stationing of atomic detachments on West German territory, the plans to equip the West German armed forces with atomic weapons, and the rebirth of the *revanchist* plans of the German militarists."

At the end of their discussions the representatives of the three Parliaments issued a joint statement expressing concern that "certain imperialist forces" were preventing the conclusion of an agreement to ban atomic and thermo-nuclear weapons and to end nuclear tests, and giving a warning against the danger of stationing "atomic detachments" in Western Germany.

The declaration said that the representatives regarded the existing frontiers of Poland and Czechoslovakia with Germany as inviolable; that they also regarded the security and integrity of the German Democratic Republic (Eastern Germany) as "an indispensable prerequisite for the preservation of peace in Europe"; and that they opposed agreements such as Euratom and the "so-called Common Market."

In conclusion, the statement said that in the present international situation the Warsaw Treaty constituted "a necessary guarantee for the peaceful life of the European nations," and expressed support for the Soviet disarmament proposals made in the U.N. Disarmament Sub-committee.

The Prime Ministers of Eastern Germany (Herr Grotewohl) and Czechoslovakia (M. Siroky) issued a statement on May 25, after a five-day meeting in East Berlin, approving the Soviet suggestion for a "neutral zone" in Central Europe and declaring that such a zone would not hinder German reunification. They repeated the call for the strengthening of the Warsaw Treaty and for the halting of atomic tests, and accused the U.S.A. of being the "chief supporter" of a "revived West German militarism."—(Polish Embassy Press Department, London - Neues Deutschland, East Berlin)

E. VENEZUELA. — Offshore Oil Concession to U.S. Companies. - Prospecting in Gulf of Paria.

The Venezuelan Ministry of Mines and Hydrocarbons announced on May 7 that a group of five U.S. oil companies had received an offshore concession in the Gulf of Paria, lying between the Venezuelan mainland and Trinidad. The concession extends over some 150,000 acres of sea and is covered by water averaging eighty feet in depth, the five companies having paid about $100,000,000 to prospect for offshore oil in this area. Of the five companies concerned—the Ohio Oil Company, the Texas Oil Company (Texaco), the Continental Oil Company, the Cities Service Oil Company, and the Richfield Oil Corporation—the Ohio, Texas and Continental companies each have a 25 per cent interest in the venture, Cities Service has a 16⅔ participation, and Richfield has the remaining 8⅓ per cent. The concession will be operated as a unit, drilling operations being scheduled to begin late in 1957 or early in 1958. No rentals will be paid to the Venezuelan Government, the profits being divided equally between the U.S. companies and the Government in accordance with Venezuelan oil legislation. (New York Times) **(Prev. rep. 14720 A.)**

F. FRANCE. — Restoration of University of Caen.

The rebuilding of the University of Caen, which had been largely destroyed during the fighting of 1944, was celebrated on June 1, when academic representatives from 112 universities in 24 different countries attended the inauguration ceremonies of the restored university. The university, founded in 1432 by King Henry VI of England, has been completely reconstructed and rebuilt since the war with the help of many contributors from France and abroad—among them Queen Elisabeth of the Belgians, who presided at the ceremony. Among many recipients of honorary degrees was Sir Anthony Eden, on whose behalf the degree was accepted by the British Ambassador in Paris, Sir Gladwyn Jebb.—(Le Monde - Le Figaro)

G. UNITED KINGDOM. — Sir Anthony Eden's Return to Britain. - Retirement from Political Life.

Sir Anthony Eden, accompanied by Lady Eden, arrived back in Britain on June 3, following his convalescence in Canada after his recent operation. At a press conference at Liverpool on board the Canadian Pacific liner *Empress of Britain*, Sir Anthony said that he was making a good recovery from his operation but knew that there was "a probability that the condition may occur again"; he added that he had "nothing to complain about" and was "very lucky to be alive." Sir Anthony made it clear that he would not be fit enough to return to political life. (Times) **(Prev. rep. 15510 D.)**

JUNE 8—15, 1957

A. FRENCH OVERSEAS TERRITORIES. — The "Loi-Cadre" for Constitutional Advancement. - Introduction of Greater Internal Autonomy, Universal Suffrage, Common Electoral Roll, and Elected Government Organs. - Increased "Africanization" of Territorial Administrations. - French Parliamentary Approval for Decrees on Political and Economic Development of Overseas Territories. - Creation of Self-governing Municipalities. - Municipal and Territorial Assembly Elections in French West Africa, French Equatorial Africa, and Madagascar.

A major advance in the constitutional evolution of the French overseas territories was inaugurated on June 19, 1956, when the French National Assembly, by 470 votes to 105, gave a second and final reading to the *loi-cadre*—i.e. legislation setting out the broad framework for the introduction of a greater degree of internal self-government in the overseas territories concerned, and empowering the French Government to initiate by decree the detailed reforms based on the principles laid down in the *loi-cadre*.

The promulgation of the *loi-cadre* was followed by a number of important developments arising from it, viz.: (*a*) municipal elections held on Nov. 18, 1956, in French West Africa, French Equatorial Africa, Madagascar, and the French Cameroons; (*b*) the publication by the French Government on Nov. 13, 1956, and their subsequent approval by Parliament, of 15 decrees concerning the economic development of the overseas territories; (*c*) the final adoption by the French Parliament during March 1957 of 13 decrees concerning the new political organization of French West Africa, French Equatorial Africa, and Madagascar; (*d*) general elections to the Territorial Assemblies in the constituent territories of French West Africa and French Equatorial Africa, and in Madagascar.

The Loi-Cadre.

The Government made use of this form of legislation in order to obtain powers to act swiftly in what it considered to be a matter of urgency. In view of the complexity of the reforms to be introduced, and the diversity of the territories concerned, it was believed that the delays of normal parliamentary procedure might have proved interminable. It was expressly laid down, however, that the *loi-cadre* would in no way prejudice the long-outstanding revision of Chapter VIII of the French Constitution of 1946, which lays down the status of French overseas territories within the French Union.

The Bill, which was piloted by M. Gaston Defferre (Minister for *France d'outre-mer* in the Mollet Government), had first been passed by the National Assembly on March 23, 1956, by 477 votes to 99. It was approved with certain amendments by the Council of the Republic on June 13, 1956 (by 211 votes to 77) and was adopted in this form by the Assembly (by 470 votes to 105), which accepted the Council's amendments at a second and final reading on June 19, 1956. An important change introduced during the debates, on the initiative of the Council of the Republic, was the elimination of a provision which would have delayed the introduction of the single electoral college until the first Territorial Assembly elections in each territory, instead of making them applicable without delay—i.e. to the forthcoming municipal elections. The *loi-cadre* was enacted with its publication in the *Journal Officiel* on June 26, 1956.

The overseas possessions to which the *loi-cadre* applies are the *Gouvernement-Général* of French West Africa, consisting of the territories of Dahomey, French Guinea, the French Sudan, the Ivory Coast, Mauritania, Niger, Senegal, and Upper Volta; the *Gouvernement-Général* of French Equatorial Africa, comprising the territories of Chad, Gaboon, Middle Congo, and Ubangi-Shari; Madagascar; French Somaliland; the Comoro Islands, New Caledonia, and the French Settlements in Oceania; St. Pierre and Miquelon; and the (then) trust territories of French Togoland and the French Cameroons.

The principal provisions of the *loi-cadre* were as follows:

Political Organization. Four major developments were envisaged in this sphere:

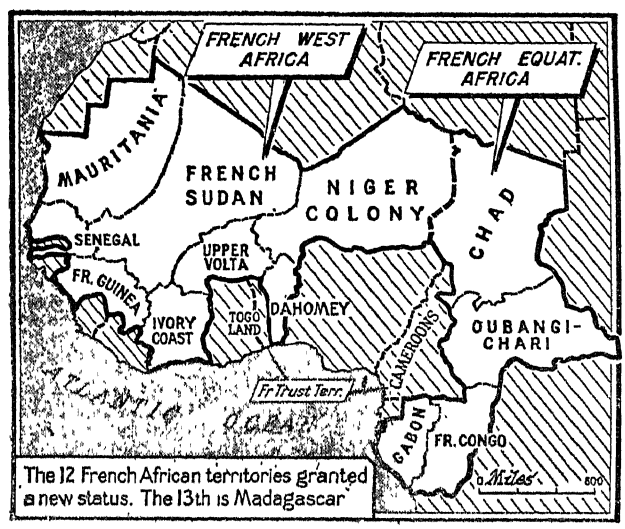
(1) The powers of the *Gouvernements-Généraux* in French West Africa and French Equatorial Africa would be modified. In future, these federal organs of government would co-ordinate, rather than control, the activities of the various constituent territories. In addition, a greater measure of direct contact between the Ministry for Overseas France (*France d'outre-mer*) and the individual territories would be brought about by the suppression of a certain number of Government departments in Dakar and Brazzaville (the respective capitals of French West Africa and French Equatorial Africa), which had previously acted as intermediaries.

(2) Executive Councils (*Conseils de Gouvernement*) would be set up in each territory to enable elected representatives to take part in the work of government. The composition and powers of these Councils would vary from territory to territory, but they would generally be presided over by the Governor of the territory and would consist partly of members elected by the Territorial Assemblies (see below) and partly of officials who would be *ex-officio* members, each member being in charge of a ministerial department.

During the debates M. Defferre said that it was the Government's intention that the Executive Councils should, as a rule, consist of nine members—five elected and four official.

(3) The powers of the existing Territorial Assemblies would be widened, enabling them to take decisions on matters in which they had previously exercised only advisory functions, as well as on certain other matters which had hitherto been the sole responsibility of the French Parliament.

(4) Regional Councils (*Conseils de Circonscription*) would be set up to enable the peoples of remote rural areas to take a larger part in the management of their own affairs.



(*Economist*)

Administration. The basic structure of the administration would be changed by the introduction of an important new distinction—viz., between "central government" departments (*services d'état*), which would deal with matters of general interest, and "territorial departments" (*services territoriaux*), which would be concerned with local matters. The French Government was empowered to define the respective competences of the two different types of department. The *services territoriaux* would be linked directly to the Executive Council of the territory concerned and would be under the direction of the Council's members.

It was also planned that an increasing number of native officials should enter the public service. In this connexion the *Ecole Nationale de la France d'outre-mer* (which trains overseas civil servants) would in future recruit about 50 per cent of its students from the overseas territories.

Economic Development. The *loi-cadre* laid down guiding principles of economic policy, notably as regards co-operation between Metropolitan France and the oversea territories, the fostering of local economic activities, and encouragement of private investment in the territories.

French Somaliland. A new Representative Council would be elected before May 1, 1957.

Togoland and Cameroons. A special section of the *loi-cadre* dealt with the future status of these two trusteeship territories. [For subsequent developments in the two territories see 15511 A, 15565 D.]

Electoral Reforms. These provided for the general introduction of two basic reforms: universal suffrage, and the single electoral college. The latter would replace the previous system of the double electoral college—one for European and the other for African native voters—under which the votes of the European minority were more heavily weighted than those of the native majority.

French Parliamentary Control. Decrees made by the Government under the *loi-cadre* would have to be submitted first to the Assembly of the French Union, which would have to give an advisory opinion within 15 days; then to the National Assembly, which would have another 1½ months (or two months, including the 15 days allowed to the Assembly of the French Union) for its decision, failing which the Government decree would be presumed to have been adopted without change; and finally to the Council of the Republic, which would have another 30 days to pronounce on the decree. If there was no agreement between the National Assembly and the Council of the Republic the procedure of the *navette* would be invoked (see 13147 A), but with an overall time-limit of four months. Economic decrees would be effective at once, subject to any changes made by Parliament, but political decrees would come into force only after parliamentary approval.

The Municipal Elections.

As stated above, the new electoral arrangements came into operation for the first time in the municipal elections held in 41 towns throughout French West Africa, French Equatorial Africa, Madagascar, and the Cameroons on Nov. 18, 1956.

These towns, as well as four in French Togoland, had been elevated to the rank of local government communes (*communes de plein exercice*) by legislation that had been given a second reading by the French National Assembly on July 5, 1955, and had finally been adopted by the Council of the Republic on third reading on Nov. 16, 1955, in the version previously passed by the Assembly. The chief point of contention between the two Houses was the National Assembly's insistence on the introduction of a single electoral college, to which the Council of the Republic eventually agreed. A decree promulgated on July 7, 1956, had authorized the compilation of new electoral lists on the basis of universal suffrage and a common electoral roll.

The elections, in which about 750,000 people were entitled to vote, showed a high poll among African electors in French West Africa (80 per cent) and French Equatorial Africa (65-70 per cent), though in Madagascar the percentage of abstentions was estimated at 50 per cent. Polling by European voters was relatively low, especially in Brazzaville, the capital of French Equatorial Africa.

The principal parties contesting the elections in French West Africa were: (*a*) the *Rassemblement Démocratique Africain* led by M. Houphouet-Boigny (an African), Mayor of Abidjan, deputy for the Ivory Coast in the French National Assembly (where he belongs to the U.D.S.R.), and Minister attached to the *Présidence du Conseil* in the Mollet Government (see 14681 A); (*b*) the *Bloc Populaire Sénégalais* (Senegal People's Bloc), led by M. Senghor, an African, deputy for Senegal in the French National Assembly (where he belongs to the Overseas Independents) and a State Secretary in the former Government of M. Edgar Faure; (*c*) the *Union Démocratique Dahoméenne* (Dahomey Democratic Union), which co-operates with the R.D.A.; (*d*) the *Parti Républicain du Dahomey* led by M. Apithy, deputy for Dahomey in the National Assembly, where he sits with the Independent Republicans; (*e*) the *Parti Démocratique Unifié de Haute-Volta* (United Democratic Party of Upper Volta), led by M. Joseph Conombo (a non-party deputy in the National Assembly), which sympathizes with the R.D.A.; (*f*) the *Bloc Africain de Guinée*, led by M. Barry Diawadou, a Radical deputy in the National Assembly; (*g*) the *Indépendants d'outre-mer* (Overseas Independents); and (*h*) the Socialist Party, campaigning under various names in the different territories.

In French Equatorial Africa, in addition to some of the above-mentioned parties (notably the R.D.A. and the Socialists), the elections were contested by the followers of the Abbé Fulbert Youlou, (Mayor of Brazzaville), a group having no ideological affiliations and representing local tribal interests.

The principal features of the elections were:

(*a*) The widespread success throughout the West African territories of the *Rassemblement Démocratique Africain*, which was particularly successful in the Ivory Coast (where it gained complete control at Abidjan and other towns), in the French Sudan (111 seats against 34 won by its opponents), and in French Guinea (94 seats against 15). In Dahomey the *Union Démocratique Dahoméenne* gained a number of seats, and in Upper Volta a decisive victory was won by M. Conombo's party. The R.D.A. and its affiliated parties also obtained an overall majority at Fort-Lamy, capital of Chad, and at Libreville (Gaboon).

(*b*) The success of the "Fulbertists" in the Middle Congo, where they defeated both the R.D.A. and the Socialists at Brazzaville and Pointe-Noire, the two most important towns.

(*c*) The success in Madagascar of nationalist candidates, who represented, however, various tendencies; e.g. at Tananarive (the capital) an absolute majority was won by the Union of Independents, representing moderate African nationalists and progressive Europeans, while at Diégo-Suarez a left-wing Workers' List, supported by the Communists, obtained a majority.

Decrees on Economic Development.

Fifteen decrees dealing with the economic development of the overseas territories were published in the *Journal Officiel* on Nov. 18, 1956. They aimed at attracting private capital from France and overseas countries and at developing the indigenous capital resources of the territories, and covered the following subjects *inter alia*:

Mutual assistance for rural development; regulations governing co-operative enterprise; agricultural credit; credit facilities for small and medium-size enterprises in trade and industry; the setting-up of a supervisory commission for savings banks; the investment of savings-bank funds; authorization of long-term agreements with certain business concerns developing the resources of overseas territories; the formation of companies to finance the development of overseas territories; special tax and financial privileges to be granted to such companies; provision of funds for price stabilization; and allocation of funds for the support of the textile industry.

In addition to the above-mentioned concessions to "overseas finance companies" (with a minimum paid-up capital of 250,000,000 francs), one of the decrees also authorized companies to earmark reserves created from trading profits for investment in overseas territories; parallel with this, the French Government would pay into a special State fund sums equal to the tax payments by these companies on such reserves, and the amounts thus provided by the Government would be available to the firms concerned either as medium- or long-term loans, or as grants against profit-sharing rights, or as a participation in the companies' share capital.

The decrees were approved by the National Assembly on Dec. 26, 1956 and, after the Council of the Republic had made certain amendments, were finally passed by the Assembly at a second reading on Feb. 20-22, 1957.

Decrees on Political Organization.

On Feb. 3, 1957, after a five-day debate in which the Government accepted important modifications to its original proposals, the National Assembly approved 13 decrees which had been issued by the Government in November and which introduced a wide measure of local autonomy on the basis of the *loi-cadre* in the constituent territories of French West Africa and French Equatorial Africa, as well as in Madagascar.

Further amendments were made in the subsequent parliamentary proceedings a first reading by the Council of the Republic on Feb. 22; second readings by the National Assembly on March 12 and subsequently by the Council of the Republic; and third readings by the Assembly on March 26 and by the Council of the Republic on March 28, when final agreement was reached between the two Chambers on five decrees which were still in dispute, notably those relating to Madagascar (see below).

The main provisions of the decrees were as follows:

(1) France would retain control of external relations, defence, internal security, justice, overall economic policy, French investment funds, Customs, telegraphs, air services, and universities. All other matters, including local finance, would be handled by territorial executive councils and elected assemblies.

(2) The Executive Council (*Conseil de Gouvernement*) to be set up in each territory would consist entirely of members elected by the Territorial Assemblies. [In conformity with the terms of the *loi-cadre*, the Government had originally stipulated that the Councils should consist partly of elected members and partly of officials. In the course of the debate, however, it accepted a counter-proposal to the above effect made by the National Assembly's Commission for Overseas Territories.]

All members of the Executive Council would be styled "Minister." The Council would be presided over by the Governor, but the Minister who had received most votes in the election of members of the Executive Council would be titled "Vice-President of the Council" and would preside in the Governor's absence. He would also advise the Governor on the distribution of portfolios, and would have authority to offer the collective resignation of the Council's members if they had lost the confidence of the Territorial Assembly.

[The Government accepted this as a compromise between its own proposals and more far-reaching demands for a complete Cabinet system, with a Prime Minister and Government responsible to the Territorial Assembly on the lines of the new constitutional arrangements in French Togoland and the French Cameroons. During the debate M. Defferre pointed out that while he was not against the substance of these demands, such an arrangement would be illegal under the present French Constitution because the Republic and its overseas territories were "one and indivisible" and the source of all power lay with the French Government and Parliament. Moreover, Article 76 of the Constitution expressly laid down that the representative of the French Government (i.e. the Governor) should be the head of the territorial administration, and until the Constitution was revised it would therefore be necessary for the territorial executive councils to be presided over by the Governor. M. Defferre emphasized that in this respect the case of French Togoland and the French Cameroons was quite different, as they were Trust Territories and thus outside the French Union—see 15511 A].

(3) The Territorial Assemblies would be elected on the basis of universal suffrage and a common electoral roll for Europeans and Africans. Their powers, however, would be deliberative rather than legislative for the above-mentioned reasons, although they would in effect exercise control over local affairs.

(4) Each of the two groups of territories in French West and Equatorial Africa would have a Grand Council under a French High Commissioner, to co-ordinate the work of the Territorial Assemblies. The members of the Grand Councils would be elected by the Territorial Assemblies of the constituent territories on the basis of proportional representation.

(5) In Madagascar there would be an Executive Council at the centre, a Representative Assembly for the island as a whole, and Provincial Assemblies for each of the six Provinces. [The Council of the Republic had first proposed that there should also be Provincial

Executive Councils and Ministers, but eventually accepted the National Assembly's view that such a "proliferation and devaluation of the title of Minister" should be avoided and that there should be only one Government—that at the Centre.] The Representative Assembly (which would have its seat at Tananarive) would consist of nine members from each of the six provinces, elected by the Provincial Assemblies by majority vote.

General Elections in French West Africa, French Equatorial Africa, and Madagascar.

Following the introduction of these reforms, elections were held on March 31 to the Territorial Assemblies in the constituent territories of French West and Equatorial Africa, and to the Representative and Provincial Assemblies in Madagascar—the first elections ever held in these territories on the basis of universal suffrage and a common electoral roll. Previously only about half the male indigenous population had been eligible to vote, but as a result of the new arrangements the electorate had increased from about 1,000,000 at the last (1952) elections to nearly 13,000,000, divided as follows: French West Africa—8,000,000; French Equatorial Africa—2,500,000; Madagascar—2,000,000. Of the total of nearly 13,000,000 voters, constituting about half the population of the three areas, only about 100,000 were of European stock. The seats to be filled numbered 940.

The parties contesting the elections in French West Africa were the same as, or related to, those in the municipal elections. The principal lists were: (1) the *Rassemblement Démocratique Africain* (R.D.A.) under M. Houphouet-Boigny, and its two affiliated parties, the *Parti Démocratique Unifié de Haute-Volta* and the *Parti Populaire Congolaise (Section R.D.A. du Moyen-Congo)*; (2) the *Convention Africaine*, under M. Léopold Senghor, consisting of the *Bloc Populaire Sénégalais* (B.P.S.), the *Mouvement Populaire Africain* (Upper Volta), and the *Mouvement Démocratique Dahoméen* (M.D.D.); (3) the *Mouvement Socialiste Africain* (M.S.A.), which had been formed to include the various local Socialist parties as the counterpart of the Socialist Party in Metropolitan France, and with which was affiliated the *Parti Sénégalais d'Action Socialiste*, the *Parti Soudanais Progressiste*, and the *Démocratique Socialiste de Guinée*. In addition, candidates were presented by the following independent local parties: the *Mouvement Démocratique Voltaique* (M.D.V.), under M. Ouadrogo (a Social Republican deputy in the National Assembly); the *Parti Républicain du Dahomey* (P.R.D.), under M. Apithy; the *Union Démocratique Dahoméenne*; and the *Bloc Africain de Guinée*, under M. Barry Diawadou.

The *Rassemblement Démocratique Africain*, the *Convention Africaine et Bloc Populaire Sénégalais*, and the *Mouvement Socialist Africain* all stand for federation with France on the basis of equality, and for continued close co-operation with France in all spheres. While the *Rassemblement* stands for the development of self-government in the African territories on the basis of the present Territorial Assemblies, the *Convention* advocates self-government on the basis of a Central Parliament at Dakar for all French West Africa, and accuses the French Government of "balkanizing" French West Africa. The African Socialist Movement, which recently separated from the French Socialist Party and whose best-known leader is M. Lamine Gueye (for many years Mayor of Dakar, and a deputy in the National Assembly), stresses the importance of social rather than political reforms, but also aims at self-government like the other two parties.

In French Equatorial Africa the principal lists were: (1) the "Fulbertists" (*Union de Défense des Intérêts Africains*); (2) the *Mouvement pour l'évolution sociale de l'Afrique Noire* led by M. Boganda, a non-party deputy in the National Assembly; (3) the *Liste d'Entente Constituée au Tchad*, which comprised the R.D.A., the M.S.A., and various local groups; (4) the M.S.A.; (5) the *Bloc Démocratique Gabonais* (associated with the R.D.A.); and (6) the *Union Démocratique et Sociale Gabonaise* (associated with the *Convention Africaine*).

The size of the poll varied considerably, being 90 per cent in Dahomey and 60 per cent in Madagascar, but as low as 20 per cent in parts of the Ivory Coast, Niger, and Ubangi-Shari.

French West Africa.

The R.D.A. emerged as the strongest party, gaining clear majorities in the Ivory Coast (58 of the 60 seats), French Guinea (56 seats out of 60), Upper Volta (37 seats out of 70), and the French Sudan (57 seats out of 70). The R.D.A. will have a majority in the Grand Council of French West Africa—i.e. the Federal assembly in Dakar—provided it obtains the support of one of the other parties.

In Senegal the B.P.S. won a clear majority (47 of the 60 seats), while in Dahomey the leading position was taken by the P.R.D. (35 seats out of 60). Elsewhere, the *Mouvement Socialiste Africain* emerged as the leading party in Niger (41 seats out of 60) and the *Union Progressiste Mauritanie* (U.P.M.) gained an overwhelming majority (33 out of the 34 seats) in Mauretania.

The strength of the parties in the territorial assemblies and the Grand Council in Dakar is shown in the following table:

	RDA	MSA	MDD	BPS	MDV	PRD	UPM	Indep. and others
Dahomey ..	7	—	6	—	—	35	—	12
Niger .	19	41	—	—	—	—	—	—
Mauretania	—	—	—	—	—	—	33	1
Ivory Coast	58	—	—	—	—	—	—	2
Sudan .	57	6	—	—	—	—	—	7
Guinea ..	56	3	—	—	—	—	—	1
Upper Volta	37	—	—	5	26	—	—	2
Senegal	—	12	—	47	—	—	—	1
Grand Council	**19**	**5**	**2**	**4**	**2**	**3**	**5**	—

French Equatorial Africa.

In Chad, all seats but one (64 out of 65) were gained by the *Entente pour l'application de la loi-cadre*, a party allied to the R.D.A. and headed by M. Lisette, an R.D.A. deputy in the National Assembly. In Middle Congo, the "Fulbertists" on the one hand and an alliance of the R.D.A. and the *Mouvement Socialiste Africain* on the other won 21 seats each out of a total of 45, the remaining three being held by Independents. In Ubangi-Shari, M. Boganda's party (the M.E.S.A.N.) won all the 50 seats, while in Gaboon 16 seats were won by the *Bloc Démocratique Gabonais* (R.D.A.), 14 by the *Union Démocratique et Sociale Gabonaise*, and six by Independents.

Madagascar.

In three of the six provinces—Tamatave, Tananarive, and Diégo-Suarez—the Nationalist parties obtained majorities over the Moderates, while in the other three provinces—Majunga, Fianarantsoa, and Tuléar—the Moderates gained a majority. The Nationalists themselves are divided into two groups: the left-wing Nationalists, including Communist elements, and the "Catholic" Nationalists under Jesuit leadership—both groups advocating the island's immediate independence under a strong central government. The Moderates (who mainly represent local interests) favour greater regional autonomy, continued co-operation with France, with the achievement of independence by stages.

As a result of the Provincial elections it was expected that the Madagascan Representative Assembly would be composed of 27 Moderates, 18 Left-wing Nationalists, and nine "Catholic" Nationalists.

M. Defferre, in a report to the French Cabinet on April 5, stated that the elections had taken place in complete calm and liberty; that polling had been at least up to the level of previous elections; and that all those elected were "true representatives of the populations of the overseas territories." He added that the elections represented a "striking approval" of the French Government's policy, and notably of the *loi-cadre* and its implementation.—(Le Monde, Paris - Le Figaro, Paris - Times - Manchester Guardian - New York Times)

A. UNITED KINGDOM. — "Picture Post" ceases Publication.

Picture Post, the weekly picture-news magazine published by the Hulton Press, ceased publication with its issue of June 1. Sir Edward Hulton (founder of the Hulton Press) had announced on May 15 that present conditions had made its publication "completely uneconomic" as costs of production had "increased enormously." Moreover, the demands of the public were changing and television was now doing "much of the work which we pioneered in *Picture Post*."

Picture Post first appeared in 1938 at the time of the Munich crisis, and had established itself before the war as one of the most popular weekly illustrated magazines. By 1949 it had achieved a circulation in excess of 1,400,000, its Coronation number selling 2,000,000 copies. In recent years, however, the circulation had declined, the average figure for the half-year ending Dec. 31, 1956, being 738,000—about half the circulation enjoyed in the best period.

Other magazines published by the Hulton Press are *Lilliput*, *Housewife*, *Farmers' Weekly*, and four children's comics selling about 2,000,000 copies a week.—(Times - Daily Telegraph)

B. HUNGARY - UNITED STATES. — U.S.A. rejects Hungarian Demand to reduce Staff of Budapest Legation.

It was announced in Washington on May 26 that the U.S. Government had been asked by Hungary to cut its Legation staff in Budapest by over one-third (from 34 officials to 21), no reason being given except that U.S. diplomats had "boycotted" official functions. A State Department spokesman said on June 11 that the Hungarian Government had been informed that only the U.S. Government could decide upon the number of persons employed at the Legation. (New York Times)

A. WORLD HEALTH ORGANIZATION. — Warning on Genetic Effects of Radiation.

The World Health Organization published on March 11 the report of a Study Group of 20 leading scientists from nine countries which had met in Copenhagen in August last, under W.H.O. auspices, to discuss problems connected with the effect of radiation on human heredity. The chairman of the group was an American scientist, Dr. Alexander Hollaender, of the Oak Ridge (Tenn.) National Laboratory's biological division.

The report said that the Study Group was "of the opinion that the well-being of the descendants of the present generation is threatened by developments in the use of nuclear energy and of sources of radiation." It also stated categorically that "additional mutation produced in man will be harmful to individuals and their descendants" and that "all man-made radiation must be regarded as harmful to man from the genetic point of view."

"Throughout man's existence on earth," said the report, "he has been continuously bombarded by radiations coming from outer space, from radioactive material in the earth's crust, and from natural radioactive elements within his own bone and flesh. The intensity of this bombardment is being notably increased in our days by man-made sources such as medical X-ray machines, radioactive material used in medicine, and also certain material and apparatus used in science, industry and commerce; by artificial radioactive elements distributed by man in nature; and, to a minor extent, by shoe-fitting machines, radioactive luminous compounds on watches, etc."

After giving the above-mentioned warning on the genetic danger to future generations, the Study Group agreed that present developments in the peaceful use of nuclear energy should contribute much to man's social and cultural development, and that therefore some risk must be accepted. They recognized, however, that if the dangers were to be minimized, "every possible step must be taken to reduce the exposure of man to radiations, and to understand the effects of exposure . . . Only in the light of more knowledge can decisions be taken to define more accurately the maximum amount of exposure which may be accepted by individuals and populations without risk of serious harm." The Group therefore examined some of the "larger gaps in knowledge" as they appeared at the present time, and listed some 13 fields of genetic research in which the need for further investigation was urgent.

The report added: "There are strong grounds for believing that inherited effects of radiation are additive. A small amount of radiation received by each of a large number of individuals can therefore do an appreciable amount of damage to the population as a whole, although the effects may not appear for a number of generations. It is therefore desirable to limit the accumulated radiation doses received by the sex-glands of individual men and women, particularly up to 30 years of age, in order to keep the average dose to the sex-glands of the population as a whole very low. The most important sources of radiation to the human sex-glands are at the present time from natural radiation (normal level between 2 and 5 roentgens per individual in 30 years) and from the radiation received by patients undergoing medical X-ray examination (probable average in certain countries between 1 and 3 roentgens per individual in 30 years) . . ."

In a section entitled "Some Conclusions," the report listed eight recommendations, including the establishment of more institutions and university departments concerned with human genetics; improved teaching in this branch; the systematic registration of serious hereditary diseases; and efforts by U.N. Agencies to collect and publish information on subjects such as fertility, consanguineous marriages, and parental ages, which were essential as background material in human biological studies. The Group was particularly impressed with the genetic hazards of man-made radiation from sources used in medicine, industry, commerce, and experimental science.

Although the Study Group was concerned solely with radioactive effects arising from the peaceful uses of atomic energy, an accompanying paper was issued by Professor R. M. Sievert (an eminent Swedish physicist, and one of the members of the group) referring to artificial radioactive products distributed in nature as a result of military tests. Professor Sievert said that recent measurements from large samples of foodstuffs in Sweden had shown that "most of our food today—milk, beef, corn, and vegetables—now contains artificial radioactive elements with a radiation level in many cases exceeding that due to the naturally-occurring radioactive constituents of animals and plants."

B. INDIA. — Metric System for Weather Reports.

As from Jan. 1, 1957, the use of metric units was introduced by the Indian Meteorological Department for its weather reports: i.e. millimetres for rainfall, degrees centigrade for temperatures, and metres for cloud heights and visibility. The change-over was advanced from August 1957 in order to align Indian weather reports with the metric system before the beginning of the International Geophysical Year.

C. OBITUARY. — Professor Gilbert Murray.

Professor Gilbert Murray, the famous classical scholar, philosopher, and liberal humanist, died at Oxford on May 20, aged 91.

George Gilbert Aimé Murray was born at Sydney on Jan. 2, 1866, the third son of Sir Terence Murray, president of the Legislative Council of New South Wales. Coming to England at the age of 11, he was educated at Merchant Taylors' School and entered St. John's College, Oxford, in 1884. In the course of a brilliant career at Oxford he not only graduated with first classes in Honours Moderations and *Lit. Hum.* but also won the Hertford, Ireland, and Craven scholarships, the Chancellor's Prize for Latin Verse, and the Gaisford Prizes for Greek Verse and Prose.

At the age of 23 Gilbert Murray became Professor of Greek in the University of Glasgow, but relinquished that post in 1899 and devoted himself for the next nine years to writing. In 1908 he was nominated by the Crown as Regius Professor of Greek at Oxford, holding the Greek Chair for 28 years until his retirement in 1936 on reaching the age of 70. One of the world's leading classical scholars, he was internationally famous for his translations of the Greek plays, most of them carried out between 1899 and 1914. His translations from Euripides appeared in three volumes between 1901 and 1910, while he also translated several of the plays of Sophocles and Aeschylus, as well as publishing versions of *The Frogs* and *The Birds*, by Aristophanes. At the time of his death some 396,000 copies of his translations had been sold—notably *Electra* (60,000), *The Trojan Women* (40,000), *Iphigenia* (37,000), and *Alcestis* (31,000). Professor Murray also wrote a *History of Greek Literature* (1897), *The Rise of the Greek Epic* (1907), *Four Stages of Greek Religion* (1913), *Stoic Philosophy* (1915), *Hellenism and the Modern World* (1953), and other works of classical scholarship.

A lifelong supporter of humanistic causes, and in particular of the cause of world peace, Professor Murray was chairman of the League of Nations Union from 1923-38, and became joint president of the United Nations Association in 1946. In the early years of the century he played an active part in the movement for women's suffrage, and was also active for many years in promoting intellectual co-operation between different countries. He stood several times as Liberal candidate for Oxford University, on each occasion unsuccessfully, but with the decline of the Liberal Party his political idealism expressed itself more and more in work and propaganda for the League of Nations. Despite his devotion to world peace, he supported the Government's decision in going to war in 1914, as brought out in his book *The Foreign Policy of Sir Edward Grey* (published in 1915). During the recent Suez crisis he was one of the senior members of Oxford University who signed the letter saying that the Government deserved "patient, but if necessary critical, support."

In the latter years of his life Gilbert Murray had become well known to the general public through his broadcasts on literary and political subjects. On his 90th birthday a fund (the sponsors of which included Sir Winston Churchill) was launched "to further the two objects which his life work has done so much to advance—Greek studies and international co-operation."

Professor Murray married in 1889 Lady Mary Howard, eldest daughter of the ninth Earl of Carlisle, who died in 1956. They had three sons—two of whom pre-deceased their parents—and two daughters, one of whom died in 1922.

Dr. Gilbert Murray was awarded the Order of Merit in 1941, and shortly before his death received the West German Order *Pour le Mérite*, the highest in the Federal Republic. A few weeks before his death he had been offered the Freedom of the City of London, but was not well enough to attend the ceremony.—(Times - Daily Telegraph - Manchester Guardian)

D. INDIA. — Rehabilitation of Refugees.

It was announced in New Delhi at the beginning of June that the rehabilitation of about 5,000,000 refugees from West Pakistan who had entered India following the partition of the sub-continent in 1947 had now been completed, and that practically all had been resettled at a cost of 1,704,000,000 rupees (£127,800,000). In addition, about 4,000,000 refugees had arrived from East Pakistan up to Dec. 31, 1956, of whom 2,900,000 had been given rehabilitation assistance at a cost of 1,110,000,000 rupees (£83,250,000). Of the refugees from East Pakistan, however, about 1,000,000 were not yet fully rehabilitated because their income was still below normal; of the 1,100,000 who had not so far received rehabilitation assistance, 350,000 were in refugee camps and 750,000 outside the camps. Total arrivals of refugees from East Pakistan since 1947 were given as follows: 1947—463,000; 1948—491,000; 1949—326,000; 1950—1,173,000; 1951 and 1952—740,000; 1953—76,123; 1954—117,881; 1955—238,940; 1956—319,726.

(Indian High Commissioner's Office, London)

E. PERSIA. — Currency Devaluation.

The International Monetary Fund announced on May 27 that it had concurred in a proposal by the Persian Government to change the par value of the Persian rial from 32.25 to 75.75 per U.S. dollar as from May 22. The other new parities would be one rial = 0.0117316 grams of fine gold or 1.32013 U.S. cents.

(International Monetary Fund, Washington) **(15495 A.)**

A. UNITED KINGDOM. — The Birthday Honours.

The Birthday Honours List was published on June 13, the principal awards being set out below:

Viscount. Lord Mackintosh of Halifax, chairman of the National Savings Committee.

Barons. Sir Horace Evans, physician to H.M. the Queen; Lieut.-General Sir Willoughby Norrie, Governor-General of New Zealand; Mr. Joseph Arthur Rank, for public services.

[Sir Horace Evans is also medical adviser to Sir Anthony Eden, and was present at the operation recently performed on Sir Anthony in Boston—see 15510 D. Mr. J. Arthur Rank, head of the Rank Organization, has extensive interests in the film industry and in flour-milling.]

Companions of Honour. Sir Thomas Beecham, the conductor, for services to music; the Most Rev. J. A. F. Gregg, Archbishop of Armagh and Primate of All Ireland.

Baronets. Captain J. A. L. Duncan, M.P. (Cons., South Angus), for political and public services; Mr. H. W. Kerr, M.P. (Cons., Cambridge), for political and public services; Brigadier Fitzroy Maclean, M.P. (Cons., Lancaster), for political and public services; Mr. H. U. Willink, Q.C., Master of Magdalene College, Cambridge, for public services.

[Brigadier Maclean, lately Parliamentary Under-Secretary and Financial Secretary at the War Office, was parachuted into Yugoslavia during the war to organize the resistance movement in that country. Mr. Henry Willink is a former Minister of Health.]

Knights Bachelor. Major Edward Beddington-Behrens, for services to the European Movement; Mr. Isaiah Berlin, Professor of Social and Political Theory, University of Oxford; Mr. R. P. Biddle, for public services in Southampton; Mr. W. Robson Brown, M.P. (Cons., Esher), for political and public services in Surrey; Dr. G. C. Cameron, Professor of Morbid Anatomy at University College Hospital, London; Mr. J. M. Campbell, chairman, Booker Bros., McConnell and Co. Ltd. (the sugar plantation concern in British Guiana); Mr. Harry Campion, Director of the Central Statistical Office, Cabinet Office; Mr. William Emsley Carr, chairman of the *News of the World*; Mr. C. T. Clay, lately Librarian, House of Lords; Judge B. M. Cloutman, V.C., Q.C., Senior Official Referee, Supreme Court of Judicature; Colonel J. G. Crabbe, Lord-Lieutenant of Dumfriesshire, for public services; Mr. Geoffrey Crowther, managing director and former editor of *The Economist*, for services to journalism; Mr. Leslie Doubleday, for political and public services in Kent; Mr. T. R. Ferens, for political and public services in Hull; Mr. C. J. Geddes, member of the General Council of the T.U.C.; Mr. G. C. Hayter-Hames, chairman of Devon County Council, for services to agriculture in Devon; Mr. R. J. R. Harcourt, Lord Mayor of Belfast, for public services; Dr. A. C. Hardy, Linacre Professor of Zoology and Comparative Anatomy, University of Oxford; Air-Commodore A. V. Harvey, M.P. (Cons., Macclesfield), for political and public services; Mr. S. T. Irwin, for political and public services in Belfast; Mr. W. C. Johnson, H.M. Inspector of Constabulary, Home Office; Mr. G. B. Todd-Jones, Presiding Special Commissioner of Income Tax, Board of Inland Revenue; Mr. H. G. McDavid, chairman and managing director, Glen Line; Mr. J. L. Martin, Professor of Architecture, University of Cambridge; Major-General Aymer Maxwell, chairman, British Legion, Scotland; Lieut.-Colonel D. C. Part, lately Lord-Lieutenant of Bedfordshire, for public services in that county; Dr. G. W. Pickering, Regius Professor of Medicine, University of Oxford; Mr. Frederick Pickworth, chairman, English Steel Corporation; Lieut.-Colonel G. K. F. Ruddle, for public services in Rutland; Colonel Malcolm Stoddart-Scott, M.P. (Cons., Ripon), for political and public services; Mr. William Scott, for political and public services in Jarrow; Mr. William Sinclair, for political services in Scotland; Mr. E. W. Thompson, chairman, John Thompson Ltd., Wolverhampton; Mr. W. G. Trower, for political and public services; Mr. Donald Wolfit, the actor-manager; Mr. A. T. S. Zealley, chairman of Remploy Ltd.

[Professor Isaiah Berlin, well known as political philosopher, writer, and broadcaster, is a Fellow of All Souls College. Mr. Biddle, formerly marine manager at Southampton docks and now retired, was one of the pioneers of the extended port. Mr. Geddes was formerly general secretary of the Union of Post Office Workers. Mr. McDavid, head of the Glen Line, played a prominent part in reorganizing shipping transport as a result of the Suez crisis.]

Other recipients of knighthoods (in addition to those enumerated above) and other awards included the following:

Prime Minister's List. Mr. James Bowman, chairman of the National Coal Board; Brigadier L. H. Harris, Engineer-in-Chief, General Post Office; Mr. N. K. Hutton, First Parliamentary Counsel; Mr. Austin Low, M.P. (Cons., Blackpool North), lately Minister of State, Board of Trade, for political and public services; Mr. L. H. Robinson, Second Secretary, Board of Trade.

Foreign Office List. Mr. J. E. Coulson, Minister at H.M. Embassy in Washington; Mr. P. H. Dean, Deputy Under-Secretary of State, Foreign Office; Mr. Leslie Fry, H.M. Minister in Budapest; Mr. G. V. Kitson, H.M. Consul-General at Milan; Mr. W. H. Montagu-Pollock, H.M. Ambassador in Lima.

Commonwealth Relations Office List. Professor A. B. P. Amies, Dean of the Faculty of Dental Science, University of Melbourne; Colonel the Hon. W. W. Leggatt, Agent-General in London for the State of Victoria; Mr. H. J. B. Lintott, Deputy Under-Secretary of State, Commonwealth Relations Office; Mr. Ian Maclennan, U.K. High Commissioner in Ghana; Mr. J. S. Murray, of Adelaide, South Australia, for public services; Mr. H. A. Winneke, Solicitor-General, State of Victoria.

Colonial Office List. Mr. Grantley Herbert Adams, Q.C., for public services in Barbados; Mr. E. S. Beoku-Betts, for public services in Sierra Leone; Mr. P. J. Bourke, Chief Justice of Cyprus; Mr. John Gutch, High Commissioner for the Western Pacific; Dr. R. B. Hawes, Consulting Physician to the Colonial Office; Mr. F. W. Holder, Q.C., Chief Justice of British Guiana; Colonel Lee Hau Shik, Minister of Finance, Federation of Malaya; Mr. J. H. Pierre, specialist surgeon, General Hospital, Port of Spain, Trinidad; Mr. Bernard Shaw, Senior Puisne Judge, Special Court, Cyprus; Mr. Colin Thornley, Governor of British Honduras; Mr. John Whyatt, Q.C., Chief Justice of Singapore.

Royal Navy List, Army List, and R.A.F. List. Recipients of knighthoods in the armed forces included Vice-Admirals Geoffrey Barnard, S. H. Carlill, G. V. Gladstone, and A. G. V. Hubback; Lieutenant-Generals E. M. Bastyan, C. F. C. Coleman, and C. D. Packard, Colonel Commandant, Royal Regiment of Artillery; Air Marshal R. G. Hart, Controller of Engineering and Equipment, Air Ministry; and Air Vice-Marshals J. H. Edwardes Jones, C.-in-C., Second Tactical Air Force, G. D. Harvey, Assistant Chief of Air Staff (Training), and L. F. Sinclair, A.O.C. British Forces, Arabian Peninsula.

Over 300 awards were made for the Suez operations, including the conferment of the G.B.E. on General Sir Charles Keightley, overall commander of the Anglo-French forces. Lieut.-General Sir Hugh Stockwell, who commanded the land forces, was given a bar to his D.S.O. for his successful planning, "ability and ingenuity," and personal example; Vice-Admiral L. F. Durnford-Slater, who was in charge of the Anglo-French naval task force, and Air Marshal Denis Barnett, commander of the air task force, both received the K.C.B.; and Brigadier M. A. H. Butler, who led the parachute assault on Gamel Airfield, Port Said, received a bar to his D.S.O. The D.S.O. was also conferred on Brigadier R. W. Madoc, Royal Marines, who led the Third Commando Brigade which captured Port Said.

Commonwealth of Australia List. Mr. H. A. Campbell, Editor-in-Chief of *The Age* (Melbourne), for services to journalism; Mr. K. F. Coles, for public and charitable services; Mr. W. E. Dunk, chairman of the Commonwealth Public Service Board; Senator A. M. McCullin, President of the Senate; Major-General F. K. Norris, for services to medicine.

New Zealand List. Mr. William Sullivan, lately Minister of Labour, Mines and Housing.

D.B.E. Awards. Mrs. Anne Margaret Bryans, deputy chairman, British Red Cross Society; Senator Annabelle Rankin, Government Whip in the Australian Senate, for political and public services. [The award to Miss Rankin was announced in the Australian List.]

C.B.E. Awards. Recipients of the C.B.E. included Mr. H. S. Altham, chairman of the M.C.C. Youth Cricket Association; Mr. Ivor Brown, the author, journalist and dramatic critic; Lady Burnham, Chief Commissioner for England of the Girl Guides' Association; Mr. George Devine, the actor and artistic director of the English Stage Company; Mr. Edward Le Bas, the painter; Miss Kathleen Long, the pianist; Miss Carola Oman (Lady Lenanton), the writer and historian; Mr. Peter Pears, the singer; Mr. Ralph Reader, the theatrical producer, for services to the Boy Scouts' Association [Mr. Reader founded the Boy Scout movement's "Gang Show"]; and Mr. B. S. Townroe, secretary-general of the Franco-British Society.

Prior to the Birthday Honours, the Order of the Garter had been conferred on Lord Ismay and Lord Middleton on April 22, and the Order of the Thistle on Lord Kinnaird and Lord Rowallan on May 29.

New Knights of the Garter and the Thistle.

Lord Ismay (69) was given the K.G. on his retirement from the post of Secretary-General of NATO, which he had held for five years. Throughout the Second World War he was Chief of Staff to the Ministry of Defence, Deputy Secretary to the War Cabinet, and Chief of Staff to Sir (then Mr.) Winston Churchill, and took part in all the inter-allied war conferences. In 1951-52 he was Secretary of State for Commonwealth Relations in Sir Winston Churchill's Cabinet.

Lord Middleton (69), Lord-Lieutenant of the East Riding since 1936, has been prominent in the public life of Yorkshire for many years. He is chairman of the Yorkshire Insurance Company, holds directorships in other companies, and became the first Chancellor of the new University of Hull in 1954, having previously been President of the University College of Hull since 1931.

Lord Kinnaird (76), Lord-Lieutenant of Perthshire since 1952, is a former Lord High Commissioner to the General Assembly of the Church of Scotland.

Lord Rowallan (61) has been Chief Scout of the Commonwealth and Empire since 1945. He retired from military service in 1944 as a lieutenant-colonel in the Royal Scots Fusiliers.

New Peerages.

The following titles were taken by the new peers created in the New Year Honours (see 15328 A) and by the former Ministers on whom peerages were conferred when Mr. Macmillan formed his Cabinet (see 15313 A):

Sir Edward Bridges, formerly Permanent Secretary to the Treasury and Head of the Civil Service—Baron Bridges, of Headley in the County of Surrey and of St. Nicholas-at-Wade in the County of Kent; Sir Robert Sinclair, chairman of the Imperial Tobacco

Company—Baron Sinclair of Cleeve, of Cleeve in the County of Somerset; Mr. Patrick Buchan-Hepburn, the former Minister of Works—Baron Hailes, of Prestonkirk in the County of East Lothian [Lord Hailes was subsequently appointed Governor-General of the West Indies—see 15523 B]; Major Gwilym Lloyd-George, the former Home Secretary—Viscount Tenby, of Bulford in the County of Pembroke; Sir Walter Monckton, the former Paymaster-General—Viscount Monckton of Brenchley, of Brenchley in the County of Kent.

Posthumous Award of George Cross.

The posthumous award of the George Cross to a locomotive driver, Mr. John Axon, of Stockport, was announced in the *London Gazette* on May 7.

Mr. Axon (56) was driving a train loaded with 500 tons of freight from Buxton to Chapel-en-le-Frith when a fracture occurred in a steam-pipe to the brake, the locomotive getting out of control just before descending a steep gradient. Though badly burned by scalding steam, Mr Axon remained on the footplate and tried without success to stop the train by means of the hand-brake. After ordering his fireman to jump clear he remained in the cabin, into which steam and boiling water was pouring, but was unable to bring the train to a halt. He was killed when the train overtook and crashed into another freight train travelling in the same direction.

The citation said that Mr. Axon could have abandoned his engine and saved his life, "but, realizing the danger of a runaway, he remained at his post."—(Times - Daily Telegraph)

(Prev. rep. New Year Honours, 15328 A.)

A. AUSTRALIA. — Administrative Control of Christmas Island. - Statement by U.K. Colonial Secretary.

The U.K. Colonial Secretary, Mr. Lennox-Boyd, announced on June 6 that arrangements were being made to transfer the administration of Christmas Island (in the Indian Ocean) from the British to the Australian Government. He pointed out that the island should not be confused with the island of the same name in the Pacific Ocean, which was the site for the U.K. atomic tests. A similar announcement was made in Canberra by Mr. Casey, the Australian Minister of External Affairs.

Mr. Lennox-Boyd explained that in the light of the new constitutional arrangements for Singapore, H.M. Government did not consider that they could ask the Singapore Government to continue to administer Christmas Island (which lies some 800 miles to the south of Singapore) on their behalf. Australia, he pointed out, drew about one-third of her phosphate requirements from the island and was the Government most closely concerned with its administration. Moreover, the Australian Government had given assurances that British subjects ordinarily resident on the island at the time of transfer, and those born thereafter, would enjoy the same rights of citizenship and immigration as had been extended to the inhabitants of the Cocos Islands when the latter island group was transferred to Australia in 1955.

The decision to transfer the administration of Christmas Island from Singapore to Australia was strongly criticized by the leaders of two Opposition parties in the Singapore Assembly—Mr. Lee Kuan Yew, leader of the People's Action Party, and Mr. Lim Choon Mong, of the moderate Liberal-Socialist group. In reply to these criticisms, the acting Chief Minister pointed out that Christmas Island had never belonged to Singapore, which had only been "asked to administer it and nothing more."—(Times - Manchester Guardian - Australian News and Information Bureau)

(Prev. rep. Cocos Islands, 14557 B.)

B. MOROCCO - TUNISIA. — Twenty-year Treaty of Friendship and Co-operation.

A 20-year treaty of friendship and co-operation between Morocco and Tunisia was signed in Rabat on March 30 by the respective Prime Ministers, Si Bekkai and M. Bourguiba.

The treaty, which was published on May 14, provided that both parties would "strengthen the bonds of co-operation and solidarity between the countries of North Africa"; consult each other in order to "harmonize their attitude towards international problems which concern them"; and use every means in their power to settle these problems peacefully. They would also "strengthen the bonds of brotherhood between them and abstain from any action likely to prejudice the other's interests"; exchange scientific and technical missions; and strenthen trade relations.

The treaty was signed at the conclusion of a six-day visit by M. Bourguiba, who was returning the visit paid by the Sultan of Morocco to Tunis in October last. While in Rabat M. Bourguiba discussed the Algerian question with members of the Moroccan Government, and also informally with Dr. Debaghine, the chief overseas representative of the Algerian National Liberation Front. A joint communiqué issued by the two Governments on March 30 emphasized "the necessity of finding a just solution to the Algerian problem in conformity with the principles of the U.N. Charter and of the right of nations to self-determination."—(Le Monde, Paris) **(15329 A.)**

C. UNITED KINGDOM. — Egg Production and Marketing. - Powers of Egg Marketing Board.

It was announced on May 21 that the newly established British Egg Marketing Board would assume its trading powers on July 1, when it would become responsible for the administration of the guaranteed egg price and for the purchase and sale of all eggs passing through packing stations. A levy of ½d. a dozen had been fixed by the Board for all eggs sold to it in 1957.

An Order providing for guaranteed egg prices to be paid through the new Egg Marketing Board was approved by the House of Commons on June 6.

The Minister of Agriculture (Mr. Heathcoat Amory) explained that "in future, as in the cases of milk and wool, the guarantee will be paid to the Board and not to the individual producers . . . The Board will buy all hen eggs which pass through the packing stations and itself fix the prices that are to be paid to the producers for the eggs. The Government will no longer fix those prices."

After recalling that the guaranteed price of hen eggs during the present year was 4s. 4½d., and the estimated average selling price 2s. 10d. a dozen, the Minister warned producers that a further reduction of the level of guarantees must be expected unless there was some major change before the next Annual Price Review in February 1958. In a previous statement to the House on May 20, Mr. Heathcoat Amory had pointed out that the subsidy to producers had been running at £1,000,000 a week during the peak period of egg production, which, however, had now passed. He added: "In the present circumstances, when we are self-supporting in eggs, the Government cannot encourage any further expansion in production; indeed, some reduction from the quantities in prospect is desirable."—(Times - Daily Telegraph)

(Prev. rep. Egg Marketing Board, 15465 A; Danish Protests at British Egg Exports, 15578 A.)

Note. The price of hen eggs for the farm year 1957-58 had been fixed at the last Annual Review in February at 4s. 1½d. a dozen. This represented a net reduction of ½d. against the price of 4s. 1½d., fixed in February 1956 but actually constituted a gross reduction of 1½d. because the new guaranteed price included an automatic adjustment of 1½d. a dozen on account of increases in feed prices since the 1956 Review.- (Times)

D. UNITED STATES. — Progress in controlling Hydrogen-Bomb Power for Peaceful Uses. - Statement by Rear-Admiral Strauss. - The Stellarator.

The chairman of the U.S. Atomic Energy Commission (Rear-Admiral Lewis Strauss) announced on April 1 that "encouraging progress" was being made in controlling the reaction of the hydrogen bomb for peaceful purposes. Though "formidable" problems still remained to be overcome, a controlled thermo-nuclear reaction was "no longer in the stage of wishful thinking."

In this connexion Admiral Strauss announced that a large experimental device—known as a stellarator—would be built at the Forrestal Research Centre, Princeton University, for the study of thermo-nuclear reactions, the programme being carried out under the code-name "Project Sherwood." He added that the stellarator would be "the biggest step to date in harnessing the source of the sun's energy (i.e. thermo-nuclear reaction) for power."

Admiral Strauss pointed out that if man were able to control the fusion reaction he would have at his disposal a virtually limitless source of power yielding more energy than it would consume. As fuel, it would be possible to use deuterium—a heavy isotope of hydrogen existing in abundance in the oceans. As an example of the "staggering possibilities" of the stellarator, he observed that the total fusion of only one kilogram (2.2 lb.) of deuterium would produce about 100,000,000 kilowatt-hours of electricity.

It was announced on May 9 that the Texas Atomic Energy Research Foundation (a group of 11 utilities) and the General Atomic division of the General Dynamics Corporation had signed a contract for carrying out jointly a four-year research programme aimed at producing electric power for private industry through controlling the thermo-nuclear reaction. The programme will be carried out at General Atomic's new laboratory at San Diego, California.—(New York Times)

(Prev. rep. 14765 A.)

E. GHANA. — Formation of Shipping Line.

The Ghanian Minister for Commerce and Industry (Mr. Botsio) announced on June 11 that Ghana would have its own shipping line—to be known as the Black Star Line—within a few months. A Ministry spokesman subsequently announced that negotiations were in progress with the Israeli Zim Navigation Company for the charter and purchase of ships. (Times - Lloyd's List and Shipping Gazette)

A. UNITED KINGDOM. — New National Parks, Nature Reserves, and Areas of Outstanding Natural Beauty. - Creation of Brecon Beacons National Park.

Developments during the past 18 months in connexion with the establishment of National Parks, Areas of Outstanding Natural Beauty, and Nature Reserves are summarized below.

National Parks and Areas of Outstanding Natural Beauty.

The designating Order for the Northumberland National Park (see 14608 A) was signed by Mr. Duncan Sandys (then Minister of Housing and Local Government) in December 1956, and that for the Brecon Beacons National Park by the new Minister (Mr. Henry Brooke) on April 19, 1957. The creation of the Brecon Beacons National Park—the tenth to be confirmed in Britain and the third in Wales—increased the area of national park land to 5,350 square miles, or about one-eleventh of the total area of England and Wales.

The seventh annual report of the National Parks Commission, covering the 12 months to Sept. 30, 1956, was published on Dec. 10, 1956.

The report stated that no new national parks had been designated during the year and no new negotiations begun with local authorities regarding further parks. As a result of the credit "squeeze" and the Government's decision that only plans of "special urgency" should receive loan sanction, various schemes had had to be postponed, including a survey of the Norfolk Broads area with a view to its possible designation as a National Park. The Commission's survey parties had, however, visited the South Downs area [originally recommended for designation by the Hobhouse Committee, see 8740 A], but had decided that the extensive cultivation of the downland had "so reduced the potential recreational value of the area . . . that it would not be appropriate to designate it." At the same time the ready accessibility of the region from London made it especially vulnerable to development, and the Commission was therefore considering its designation as an "area of outstanding natural beauty" under the National Parks and Access to the Countryside Act. The report added that during 1955-56 four such areas had been designated: the Gower Peninsula (near Swansea), the Quantock Hills (Somerset), part of the Lleyn Peninsula (North Wales), and the Surrey Hills.

The Order designating the Gower Peninsula as an "area of outstanding natural beauty" was confirmed by Mr. Sandys on Jan. 10, 1957, and those designating the Quantock Hills and the Lleyn Peninsula by Mr. Brooke on Feb. 18 and June 1 respectively.

The Gower Peninsula—the first such area to be designated—has a beautiful coastline with limestone cliffs and sandy bays and coves, its recreational importance being increased by its proximity to the South Wales industrial areas. The Quantock Hills region, stretching from Bridgwater Bay towards Taunton, consists of 38 square miles of sandstone hills rising to 1,261 ft., with smooth downs, wooded combes, and picturesque villages, and is rich in literary associations. The Lleyn Peninsula area, about 60 square miles in extent, has attractive coastal scenery and a rugged hinterland, and includes the headland of Braich-y-pwll and the well-known villages of Aberdaron and Abersoch.

Nature Reserves.

The most important reserves designated by the Nature Conservancy during 1956-57 are listed below.

(1) Rona and Sula Sgeir, Outer Hebrides, Ross-shire. Two uninhabited islands aggregating 320 acres, Rona (about 47 miles N.W. of Cape Wrath) being the home of the Atlantic grey seal and a breeding-place for petrels and other sea birds. Sula Sgeir, 10 miles west of Rona, is the most north-westerly of the islands off Britain.

(2) Silver Flowe (Kirkcudbrightshire). About 472 acres of bogland, undrained and virtually undisturbed.

(3) Isle of May, Fife. About 140 acres at the mouth of the Firth of Forth, where 218 species of birds have been recorded.

(4) Rassal ash wood, Ross-shire. The most northerly ash wood in Britain (202 acres), with a rich ground flora.

(5) Lullington Heath, near Seaford, Sussex. About 155 acres of chalk heath (cultivated in prehistoric times), where records are being kept of the effects on vegetation of the disappearance, through myxamatosis, of the previously very large rabbit population.

(6) The Ruskin reserve, Cothill, near Oxford. About 4½ acres (containing uncommon types of plant life) previously protected by the National Trust.

(7) About 86 additional acres at Rousdon and Charton cliffs, hitherto forming a gap in the Axmouth-Lyme Regis Undercliffe Reserve (see 14608 A). The reserve now covers 794 acres, and stretches unbroken for 6¼ miles along the Devon-Dorset coast.

(8)-(9) Additions of about 973 acres to the Newborough Warren-Ynys Llanddwyn Reserve in Anglesey (see 14608 A), bringing the total area of the reserve to 1,256 acres.

(10) Winterton Dunes, near Yarmouth. About 260 acres of special zoological interest because of the change from bog to heath and then to dune within a short distance.

(11) Coed Rheidol, a barely accessible ravine near Aberystwyth, forming part of the famous view from Devil's Bridge. The district has a very heavy rainfall, and the ravine is rich in rare flora and fauna.

(12) Morden Bog, near Wareham (Dorset). Described as "a unique variant of southern heathland with almost Mediterranean conditions," inhabited by rare ants and grasshoppers.

(13) Wren's Nest (Worcestershire). Internationally famous as a classic geological exposure of Upper Silurian rocks which has yielded 300 species of fossil fauna, including marine fossils 330,000,000 years old.

(14) High Standing Hill, Windsor Forest. About 45 acres to be managed as a forest nature reserve in the interests of ecological research.

The Conservancy announced on April 5, 1957, the establishment of three new Nature Reserves in Scotland—the St. Kilda group of islands, the island of Rum (Inner Hebrides), and the Caerlaverock estate (Dumfriesshire).

The St. Kilda group, about 100 miles west of the Scottish mainland and, except for Rockall, the most remote of the British Isles, has been uninhabited since 1930, when the former population migrated to the mainland. The group is the home of many rare sea- and other birds, and is especially important for the study of bird migration. Rum (26,400 acres) has been described as "without comparison in Europe as a nature reserve," and is exceptionally rich in animal and bird life, including red deer, native ponies, and golden eagles. The Caerlaverock estate (6,226 acres, principally saltmarsh) is a well-known winter haunt of wild geese, and will form one of a series of British estuarial wild fowl refuges.

The St. Kilda group was leased by the Conservancy from the Scottish National Trust, which acquired it under the will of the late Marquess of Bute. Rum was acquired, together with the mansion of Kinloch Castle, from the trustees of the late Sir George Bullough.

The Ministry of Housing and Local Government announced on May 29 that Mr. Brooke had appointed Lady Hopkin Morris (a member of the Welsh Central Advisory Committee for Education, and widow of the late Sir Rhys Hopkin Morris, M.P.) as a member of the National Parks Commission. (Times - Daily Telegraph - Manchester Guardian - The Scotsman, Edinburgh) **(Prev. rep. 14608 A.)**

B. CEYLON. — Arrangements for Transfer of British Bases at Trincomalee and Katunayake.

A joint statement by the Ceylonese and British Governments, issued in Colombo on June 7, announced that both Governments had reached agreement on "the timing and method of withdrawal" of the British bases in Ceylon. The announcement stated: (1) the Royal Naval base at Trincomalee and the R.A.F. station at Katunayake would be formally transferred to Ceylon on Oct. 15, 1957, and Nov. 1, 1957, respectively; (2) the withdrawal of U.K. establishments "will be in the main completed within a period of three years, though some facilities will remain for up to five years"; (3) Ceylon would pay 22,000,000 rupees (£1,650,000), spread over five years, for the fixed assets to be taken over and in final settlement of "certain claims arising out of the occupation or disposal of the bases."

The Ceylonese Government's wish to take over the bases had been expressed by the Prime Minister, Mr. Bandaranaike, after the Ceylon general elections of May 1956, and had formed the subject of a joint statement issued by the British and Ceylonese Governments during the London Conference of Commonwealth Prime Ministers in July 1956 (see 14961 A). Mr. Bandaranaike, after attending the U.N. General Assembly, had visited London in December for discussions with British Ministers at which agreement was reached in principle that the Trincomalee and Katunayake bases should be handed over to Ceylon during 1957 on a date to be agreed between the two Governments. The matter was subsequently discussed at a number of meetings between Mr. Bandaranaike and the U.K. High Commissioner in Colombo, Sir Cecil Syers.
(Ceylon Government Information Department) **(14961 A.)**

C. PERSIA. — Formation of People's Party. - Franchise conferred on Women.

The formation of a new Opposition party—the People's Party—was announced in Teheran on May 16, following the proclaimed intention of the new Prime Minister (Dr. Eghbal) to introduce a two-party system of parliamentary government. The new party is headed by M. Assadulla Alam, a former Minister of the Interior and Minister of Labour, who has close links with the Shah. Its aims include agrarian reform, limitation of land ownership, labour welfare, and the introduction of political rights for women.

Legislation giving the franchise to women for the first time in the country's history was approved by the Persian Senate on March 13.—(Times - Le Monde, Paris) **(Prev. rep. 15532 A.)**

A. RHODESIAN FEDERATION. — Opening of University College of Rhodesia and Nyasaland.

The multi-racial University College of Rhodesia and Nyasaland was opened to full-time students on March 4, 1957. The creation of such an institution of higher learning for Central Africa had been recommended by the Commission which was appointed in 1952 by the Governments of Southern Rhodesia, Northern Rhodesia and Nyasaland (see 12638 C), and which issued its report in 1953 (see 13001 B). The Commission was headed by Sir Alexander Carr-Saunders, Director of the London School of Economics and chairman of the Inter-University Council for Higher Education in the Colonies (see 7783 E).

The conditions governing the establishment of the University College had been announced on April 14, 1954, following discussions in London between H.M. Government and a delegation representing the three component territories of the Federation. The Inter-University Council for Higher Education and the University of London also took part in the discussions, which ended in full agreement between the parties concerned. It was announced that:

(1) H.M. Government would make a grant of £1,250,000 from Colonial Development and Welfare Funds toward the capital cost of building and equipment, which was expected to be not less than £2,000,000 within the next ten years.

(2) The University College would be built on a 458-acre site at Mount Pleasant (a northern suburb of Salisbury) on land given by the City of Salisbury.

(3) The College would also be granted facilities for teaching and research at a projected Botanical Gardens near Mount Pleasant, a Veterinary Research Station, a 1,000-acre experimental farm which would be made available for the purpose, and a new Native Hospital in process of erection at Salisbury, the latter institution including a medical school.

(4) The College would be open to men and women of all races, and it would be a basic principle that there should be no discrimination on racial grounds between categories of students. Moreover, the College would have complete freedom from Government control or interference.

(5) H.M. the Queen would be petitioned to grant a Royal Charter to the University College.

(6) The College would have a special relationship with the University of London, and its students would sit for London degrees. Syllabuses would be adapted to local opportunities and needs, in consultation between the University College and the University of London.

(7) Faculties of Arts and Science would be established in the first instance, to be followed as soon as possible by faculties of Agriculture and Medicine.

The University College, as stated above, is open to all races in the Federation of Rhodesia and Nyasaland, and also to African students from Basutoland, Swaziland, and the Bechuanaland Protectorate and other students from outside the Federation. It received a Royal Charter from H.M. the Queen by Order-in-Council dated Feb. 10, 1955, on which date it was announced that Queen Elizabeth the Queen Mother had consented to become President of the University College. [The Queen Mother, who is also Chancellor of the University of London, laid the foundation-stone of the University College during her visit to Central Africa in 1953—see 13200 B.] Under the terms of the Royal Charter, "no test of religious belief or profession or of race, nationality, or class shall be imposed upon or required of any person in order to entitle him to be admitted as a member, professor, teacher, or student."

In addition to the buildings and facilities mentioned above, the University College has science research laboratories, halls of residence, a Students' Union, teaching and administrative accommodation, sports fields, gardens, an open-air theatre, and a permanent library which stands on a high plateau in the centre of the Mount Pleasant site and dominates the college buildings. The library is the gift of the British South Africa Company and of two of the great Northern Rhodesian copper companies—the Anglo-American Corporation and the Rhodesian Selection Trust. As the largest learned library in the Federation it will serve informally as the national library of Rhodesia and Nyasaland.

The first three Halls of Residence—Swinton Hall, Manfred Hodson Hall, and Carr-Saunders Hall—are named respectively after Lord Swinton, who was Commonwealth Relations Secretary in 1953 when the U.K. Government decided to contribute £1,250,000 toward the cost of establishing the University College; Mr. Manfred Hodson, for many years leader of the movement in Rhodesia for the creation of a University College in the Federation; and Sir Alexander Carr-Saunders.

Entrance requirements are similar to those for British universities—the Higher School Certificate level, and for the Arts course two languages other than English.

Dr. Walter Adams, secretary of the Inter-University Council for Higher Education since 1945, and a member of the Carr-Saunders Commission, was appointed Principal of the University College on Jan. 25, 1955.

Born at Brighton (Sussex) in 1906 and educated at a local grammar school and University College, London, he became a lecturer in History at the latter college and subsequently studied at Harvard, Yale and other American universities as a Rockefeller Fellow. In 1933 he became secretary of the Academic Assistance Council, which assisted in the rescue and rehabilitation of more than 2,000 scientists and scholars displaced from Germany, Austria, Italy and other countries because of their race, religion, or political opinions. In 1937-38 he organized a survey of refugee problems for the Royal Institute of International Affairs, and from 1939-45 was secretary to the London School of Economics, though seconded to the Foreign Office from 1941 for war duties. He was deputy head of the British Political Warfare Mission in Washington in 1942-44, and Deputy Director-General of the Political Intelligence Department in 1945.

In a statement on April 30, 1956, and in a letter sent on the following day to Mr. Hugh Gaitskell (leader of the British Parliamentary Labour Party), Dr. Adams had strongly refuted allegations—made in the House of Commons by certain Labour M.P.s—that the policy of separate residences and dining-halls for African and White students at the University College constituted a form of *apartheid*.

In his statement of April 30 Dr. Adams described the University College as "one of the most momentous advances in the cause of liberalism yet made in the whole of Southern Africa," and characterized the allegations of *apartheid* as "well-meaning, but misguided and mischievous." He added: "The colour bar, as such, does not exist at this university. Students of all races will work together and play together . . . The fundamental feature of the College is that all students will be admitted on the same standards, taught in common, tested by the same examinations, and be given the same ideals. All this represents a tremendously enlightened step forward and has been hailed as such by thinking Africans and Europeans in this country. The fact that we shall have, in the initial stages, separate residential quarters, including dining-rooms, for Africans and Europeans is simply in deference to the situation as we know it to be. At this stage in the country's development we do not have a common, all-embracing culture . . . African and European students will in the main be coming from vastly different backgrounds and will need, for their own peace of mind, some degree of personal privacy. If this is segregation, then we are segregating!

"We are launching a tremendous experiment. One false step at the beginning, one serious misunderstanding, and this whole magnificent enterprise could be wrecked for years. If that happened it would be a tragedy for all races throughout Africa. Although there will be separate residential quarters the two blocks will be identical, with exactly the same facilities. This means that if and when it is considered desirable, there will be no difficulty whatsoever in mixing up the races in the two blocks. As the Carr-Saunders Commission reported, it is not contrary to university practice to reserve certain hostels or halls of residence for particular classes of students . . . Meanwhile our critics overseas might bear in mind that university hostels for non-European students exist in London on the same principle . . ."

A similar denial of the *apartheid* allegations was contained in the above-mentioned letter to Mr. Gaitskell, in which Dr. Adams accused the British Labour Party of "making our task doubly difficult by converting into a political and party issue a matter which we are proposing to solve by common sense and experience within our college community."

Dr Adams wrote: ". . . You and your colleagues in the Labour Party have chosen to attack us . . . for deciding to begin with separate halls of residence. This is entirely our own decision as an autonomous institution and has nothing to do with Governments — territorial, federal, or British . . . It appears that your colleagues assume that this is a recent decision. The facts are that it was foreseen and accepted as far back as 1952 by the Carr-Saunders Commission after careful consultation with African opinion. There could be no compromise on the essential issues of common teaching, common use of laboratories and libraries, and common membership of the Students' Union . . . The proposal to begin with separate halls was published at the time of the British grant in 1953 . . ."

After stressing that it was fundamental to the success of the College that it should attract European students, Dr. Adams added: "They, unlike Africans, have the option of going to universities in the Union of South Africa. If they or their parents boycott the College, then the opportunity of inter-racial co-operation within the common standards of university life will have been lost . . . We are not prepared to risk the essential things by pedantically pursuing the non-essential. This is our considered decision and judgment on the way we should tackle the difficult and delicate task on which we have embarked. Our strategic object is presumably one that has your full agreement—namely, to establish a first-class university freely available to the best students of all races and classes . . ."

It was announced in November last that the British Government had approved a further grant of £150,000 for the University College from Colonial Development and Welfare Funds, additional to the £1,250,000 allocated from the same source in 1953. The Federal Government has also undertaken to provide a subsidy of £150,000 a year to the University College for five years.—(Federal Information Department, Salisbury)

A. UNITED KINGDOM. — Record Steel Production in First Quarter of 1957. - South Durham Steel Expansion Scheme. - Public Issue of Shares in Steel Company of Wales. - Resale of W. Beardmore & Co. - Report of Iron and Steel Holding and Realization Agency.

Production of steel and pig-iron in Britain in the first quarter of 1957 again reached new records, as shown by the detailed figures given below, with 1956 figures for comparison:

	1957		1956	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings.				
January ..	415,900	21,627,000	405,200	21,069,000
February ..	342,100	22,470,000	417,800	21,724,000
March ..	431,000	22,411,000	425,800	22,141,000
First Quarter ..	425,500	22,128,000	416,400	21,651,000
Pig-Iron.				
January ..	256,900	13,361,000	260,700	13,558,000
February ..	267,600	13,916,000	263,300	13,692,000
March ..	277,200	14,415,000	262,000	13,624,000
First Quarter ..	266,500	13,856,000	262,100	13,630,000

Steel production in February was the highest ever recorded for any single month, the decline in output in March being attributed to a loss of about 20,000 tons caused by a strike of engineering workers in certain areas, particularly in the Lancashire and Sheffield districts. Production of pig-iron in March, however, was the highest ever, and was accompanied by a reduction in scrap imports, particularly from the U.S.A.

Developments in the iron and steel industry in recent months are summarized below:

Prices of Alloy Steels. The Iron and Steel Board increased maximum prices of nickel and vanadium steels from April 1 by amounts ranging from 16s. 6d. to £10 a ton, according to specification, so as to cover increased costs.

Import Duties. The Board of Trade announced on March 30 that the suspension of import duties on iron and steel plates would be continued for a further six months from Sept. 18 (i.e. until March 18, 1958).

Plant Expansion. The South Durham Steel and Iron Company announced on March 27 that it planned to spend £43,000,000 on the expansion of its West Hartlepool works. The scheme, which had been approved by the Iron and Steel Board, included the extension of ore-handling and stocking plant, the building of 78 new coke ovens, and the installation of a new blast furnace (with provision for a second one later) and of new melting-shops and slabbing and plate mills. It was expected to give employment to an additional 2,500-3,000 men.

Closing of South Wales Tinplate Mills. The Steel Company of Wales announced on Jan. 27 that, in view of the growing output of the new mass-production tinplate mills, it had been decided to close two old-type mills at Gorseinon and Pontardawe (West Glamorgan) as from March 31. About 690 workers would be affected, but as many as possible would be absorbed at the new tinplate mill at Velindre.

Public Offer of Steel Shares. A total of 40,000,000 £1 Ordinary shares in the Steel Company of Wales were offered by the Iron and Steel Holding and Realization Agency at par on March 14, with the proviso that the company's employees would be able to apply for a maximum of 500 shares each under a scheme whereby the shares would be purchased in the first place by trustees on their behalf and be paid for by deductions from salaries or wages over a two-year period. The proceeds of the issue would be used to repay advances made by the Agency to finance the completion of the company's second development plan, to carry through its third development plan, and to provide working capital.

It was announced on March 14 that about 23,000 applications had been received for a total of about 45,000,000 shares. This included some 1,800 applications from employees for 200,000 shares (allotted in full); applications for about 5,500,000 shares from the public; firm applications for 2,000,000 shares from Guest, Keen and Nettlefolds Ltd., and for 1,000,000 shares from the Metal Box Company (both allotted in full); and firm applications for 37,000,000 shares from a consortium of issuing houses. Of the applications from the public, about 20,000 for up to 2,000 shares were accepted in full, whilst larger applications were accepted up to about 85 per cent, subject to a minimum of 2,000 shares, the same applying to applications from the consortium. The latter comprised Baring Bros. and Co.; Robert Benson, Lonsdale and Co. Ltd.; Hambros Bank Ltd.; Helbert, Wagg and Co. Ltd.; Lazard Bros. and Co. Ltd.; Morgan Grenfell and Co. Ltd; N. M. Rothschild and Sons; and J. Henry Schroder and Co.

Resale of Steel Companies. It was announced on Jan. 18 that the Agency had sold the whole of the issued capital of William Beardmore and Co. Ltd., Parkhead, Glasgow (viz. 4,000,000 £1 Ordinary shares) for £3,650,000 to Thomas Firth and John Brown Ltd., who would make a cash issue to its own shareholders to finance the purchase. The Agency's investment in Beardmore's (nationalized in 1951) was given as £3,817,917, representing compensation paid under the Iron and Steel Act.

The Agency announced on June 1 that it had sold to John S. Tregoning & Co., in conjunction with Ductile Steels and Robert Benson, Lonsdale & Co., the capital of Bynea Steel Works for £680,000. In addition the Agency had received special distributions from Bynea out of its reserves, consisting of £1,000,000 in cash and 10,395 Ordinary £1 shares in Llanelly Steel Company (1907) in kind. The Agency's investment in Bynea Steel and its subsidiary and associated companies, following a regrouping and reorganization in September 1956, was given as £1,688,025. J. S. Tregoning had a substantial interest in Bynea Steels when it was nationalized.

The report of the Iron and Steel Realization Agency for the year ended Sept. 30, 1956, was published as a White Paper on Jan. 22, 1957.

It stated that in the three years of its existence the Agency had sold back to private enterprise 37 of the 71 companies transferred to it from the Iron and Steel Corporation of Great Britain, representing "in terms of employment, steel production, and sales of products nearly three-quarters of the Agency's inheritance." In addition, one company had been wound up, while in five other cases the Agency's direct holdings had been transferred to other subsidiaries, leaving 28 companies still subsidary to it at the date of the report. Gross proceeds from disposals totalled about £188,000,000; by these receipts and other reductions the net value of the Agency's investments and obligations had been reduced from £364,000,000 at its formation in 1953 (subsequently increased by further investments to nearly £430,000,000) to £226,000,000 as at Sept. 30, 1956.

The report stated that during the financial year 1955-56 the Agency had approved development schemes by its subsidiaries to an estimated value of about £60,000,000.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

(Prev. rep. 15325 A.)

B. INDIA - PAKISTAN. — New Trade Agreement.

A new trade agreement between India and Pakistan was signed in New Delhi on Jan. 22, 1957, following talks which had opened a week earlier.

Under the agreement the two Governments undertook (*a*) to explore all possibilities for an expansion of trade between their countries on the basis of mutual advantage; (*b*) to facilitate imports and exports of commodities specified under the agreement; and (*c*) to accord most-favoured-nation treatment to each other's commerce.

Four schedules were attached to the agreement. The first two listed commodities, the exchange of which would be facilitated in unspecified quantities or in quantities to be negotiated later; the third schedule contained those goods for which quantities were agreed upon in the Delhi negotiations; whilst the fourth specified articles entering into the border trade between East Pakistan on the one hand and West Bengal, Assam, and Tripura on the other.

Items available for export from India to Pakistan included coal, chemicals, drugs and medicines, mill-board and straw-board, machinery and mill-workshop equipment, electrical instruments, cinema films, sugar, tea, coffee, betel leaves, and tobacco. Items available for export from Pakistan to India included raw jute, hides and skins, fish, poultry and eggs, betel nuts, spices, honey, cinema films, machine tools, bicycles and spare parts, surgical instruments, and sports goods. Export or import of commodities not listed will also be permitted in accordance with the laws, regulations or procedures of either country.

Commodities for which quantities or values were specified included coal, hard and soft wood, stone boulders, and sea salt for export from India, and rock salt and forest produce for export from Pakistan to India. Of the Indian coal exports, 30,000 tons a month will be sent to West Pakistan, 55,000 tons to East Pakistan, and an additional 15,000 tons *via* the sea route either to East or West Pakistan.

India undertook to export 50,000 tons of cement to East Pakistan in exchange for the same quantity to be supplied by West Pakistan to India; the latter supplies would be additional to those sent by Pakistan under previous arrangements. A similar arrangement was made for salt, whereby West Pakistan would export rock salt to India in exchange for Indian supplies of sea salt to East Pakistan.

As regards jute—India's main import from Pakistan—no quantity was specified, but India undertook to indicate to Pakistan her probable requirements by September of each year, in order to facilitate the planning by Pakistan of her jute acreage.

Items for which border trade would be permitted included articles of daily consumption such as fish, poultry and eggs, soap, vegetables and fresh fruit, milk and milk products, as well as kerosene, betel leaves, fodder and firewood.

It was also laid down that the working of the agreement would be reviewed every six months and that schedules of commodities would be subject to revision before the beginning of each calendar year.

The agreement was subject to ratification by the two Governments and was expected to come into force as from Feb. 1, 1957, and to remain in force for three years.—(The Hindu, Madras - The Statesman, Calcutta - Dawn, Karachi)

(Prev. rep. 14467 B.)

A. NEW ZEALAND - UNITED KINGDOM. — New Trade Agreement. - Ten-Year Guarantee of Unrestricted Imports of New Zealand Dairy Products.

A new trade agreement between the United Kingdom and New Zealand was signed in London on May 28 by Sir David Eccles, President of the Board of Trade, and Mr. K. J. Holyoake, the N.Z. Deputy Prime Minister and Minister of Agriculture, following negotiations which had opened on April 9. Its provisions modified and in certain respects supplemented those contained in the Ottawa Agreement of 1932, of which it will form part. The provisions of the new agreement were as follows:

(1) The U.K. Government undertook not to restrict imports of N.Z. butter, cheese, skimmed and buttermilk powders, casein, and chilled and frozen pork for 10 years. In addition, New Zealand was given an assurance of duty-free entry for eggs, poultry, butter, cheese, and other milk products, the qualifications to which this assurance was subject under the Ottawa Agreement being removed. [Under the Ottawa Agreement the British Government had the right to impose quantitative restrictions on imports from New Zealand of eggs, poultry, butter, cheese, and other milk products, if British imports of these products from all sources were similarly restricted.]

(2) There would be joint annual consultation on agricultural production and marketing policies, and each Government would give full weight to the views of the other in formulating its production, marketing and import policies relating to agriculture. Meetings to give effect to these consultations would take place in November of each year.

(3) Both Governments acknowledged the value of the market reviews carried out by the Commonwealth Meat Study Group, and agreed to facilitate the work of that Group. If, in the opinion of the N.Z. Government, circumstances arose which threatened serious injury to the New Zealand meat trade, the U.K. Government would examine the situation in consultation with the N.Z. Government, and consider sympathetically any request for the application of such remedial measures as might be appropriate.

A joint communiqué was issued at the same time describing the course of the talks, in which representatives of the N.Z. Meat Producers' Board, the Dairy Board, the Apple and Pear Board, the Federated Farmers, and the N.Z. Manufacturers' Federation had taken part on the New Zealand side, and Mr. Heathcoat Amory (the Minister of Agriculture) on the British side. The communiqué was worded as follows (cross-headings inserted):

General Principles. "The representatives of both Governments reaffirmed the objective underlying the Ottawa Agreement to expand trade between the U.K. and New Zealand to their mutual advantage. Mr. Holyoake said that 25 years had elapsed since the Ottawa Agreement was signed and significant changes had occurred in the pattern of world food production and marketing. He emphasized the importance which New Zealand continued to attach to the U.K. market, and the need for New Zealand to retain an expanding share of that market at remunerative prices as a factor in the development of his country.

"The opportunity was taken to survey fully present and potential trade trends. Mr. Holyoake expressed deep concern at the immediate position of New Zealand's trade in dairy products and at the long-term prospects for N.Z.'s exports generally in the United Kingdom. He sought assurances from the U.K. regarding action to limit the import of meat and dairy products from foreign suppliers. Mr. Holyoake asked that continuing arrangements should be established to enable the N.Z. Government to have full discussion of problems arising from the U.K.'s agricultural policy and imports of foodstuffs. He was anxious to reach an understanding about the use of the U.K.'s powers to deal with dumping and to consider with U.K. Ministers further steps to secure better international co-operation in regard to the disposal of surplus commodities.

"Mr. Holyoake said that whereas New Zealand accorded high *ad valorem* preferences to U.K. exports, many of New Zealand's preferences in the U.K. were specific duties which had lost much of their value since 1932 through the rise in prices. Furthermore, he pointed out that the quota preferences on meat provided for in the Ottawa Agreement had lost their effectiveness. The balance of advantage under the Ottawa Agreement had accordingly moved against New Zealand, and the N.Z. Government wished, if possible, to find a way of restoring the value of New Zealand's preferences in the United Kingdom.

"The U.K. Ministers explained that U.K. policies and their international commitments precluded the use of import restrictions in existing circumstances as a means of protecting the New Zealand interest in the U.K. market. As regards the possibility of restoring the value of the N.Z. preferences in the U.K., it was pointed out that this could not be done without the consent of certain foreign countries whose rights under international agreements would be affected, and that this was unlikely to be forthcoming. The N.Z. delegation felt that the effective value of their preferences was limited by this factor.

Market Prospects in the U.K. "The market prospects in the U.K. for meat, milk products, and apples were fully discussed. The N.Z. representative thought that potential increases of supplies of meat both from abroad and in the U.K. were likely to out-run the capacity of the U.K. market to absorb increased quantities at remunerative prices. The U.K. representatives, however, pointed out that *per capita* consumption of meat in the U.K. had only recently recovered to the pre-war level, and considered that there was no reason to doubt that continued increases in consumption were possible.

"In regard to dairy products the N.Z. delegation noted the increase in world production of butter and the consequent increase in supplies to the U.K. market, and expressed serious concern at the resulting effects on prices. The delegation also expressed concern at the increasing production of milk in the U.K. brought about by the U.K.'s production policies, which had resulted in rapid increases in the production of cheese which competed with the N.Z. product. In addition, the manufacture of milk by-products, particularly milk powder, had increased considerably. This development detrimentally affected New Zealand's position in the market for dried milk products. The U.K. pointed out that several temporary causes had contributed to the market situation and that at the recent U.K. Agricultural Price Review the profitability of domestic milk production had been reduced. The N.Z. delegation felt that the factors mentioned by the U.K. Government had not dissipated their fears regarding the position of dairy products in the United Kingdom market.

"Market prospects for apples in the U.K. were also fully discussed. It was considered that the present market position was satisfactory but the N.Z. delegation expressed concern at possible future developments; particularly the possibility of increasing supplies from foreign countries, both Northern and Southern Hemisphere, being sold in substantial quantities during the N.Z. marketing season. It was agreed that the position with respect to supply and demand would be kept under constant review, and would also be included in the annual consultation for which provision had been made.

Supplementary Markets. "Mr. Holyoake emphasized that New Zealand would need to seek increased access to supplementary markets if the U.K. was not able to absorb the full increase of N.Z. production at remunerative prices. To this end, and also to assure New Zealand of a competitive cost structure, Mr. Holyoake indicated that the N.Z. Government may wish to seek a variation in the terms of some provisions of the original agreement, including modifications giving New Zealand freedom to adjust preferential margins of duty in certain cases. The U.K. Ministers took note of this. In this connection the Ministers stated that they would be concerned if New Zealand granted any quota concessions to other countries which resulted in the encouragement of imports from other countries to the detriment of the U.K. while imports of the same goods from the United Kingdom were restricted. Mr. Holyoake took note of these views.

Anti-Dumping Protection. - Policy on Agricultural Surplus Disposals. "A full account was given by the U.K. Ministers of the details of the new powers to deal with dumping. It was noted that both Governments had power to impose countervailing and anti-dumping duties to protect each other's interests against dumped or subsidized exports. The U.K. Government has also undertaken to give the fullest help and co-operation in effecting joint action with the other countries principally concerned, through the F.A.O. machinery, to ensure the application of the principles laid down by F.A.O. for the disposal of agricultural surpluses.

Common Market and Free Trade Area. "Problems arising from the European Common Market and the proposed Free Trade Area were discussed fully. New Zealand was particularly concerned in the extent to which the Common Market proposals could result in damage to N.Z.'s exports—both directly on the Continent itself and indirectly in the U.K. market by encouraging larger agricultural surpluses in Europe. It was recognised that if in the application of the Common Market Treaty there were to be injury to New Zealand and other Commonwealth countries, then it might be necessary to consider what steps should be taken to deal with the problem. U.K. Ministers explained that the proposed European Free Trade Area would strengthen the U.K. economy and that the U.K. Government would do everything possible to ensure that the policies followed in Europe would be liberal and outward-looking. Mr. Holyoake welcomed these statements. It was agreed that in view of the importance of these matters, the two Governments should continue their close consultations on these developments."

Mr. Holyoake, in a statement issued on May 29, said that the 10-year undertaking about the quota-free admission of N.Z. dairy products was "perhaps the most important assurance now given by the United Kingdom." These undertakings were valuable to New Zealand, "as they provide a measure of security for the future which is a prerequisite to our programme of farm development." The effect of these new provisions, he explained, was to place the N.Z. dairy industry on a similar footing to that already enjoyed by the N.Z. meat industry under the Ottawa Agreement and the 1952 Joint Declaration on Meat.

Dealing with New Zealand's productive capacity, Mr. Holyoake said: "New Zealand has demonstrated over the years her ability to supply increasing quantities of meat and dairy produce to the U.K. market. Our potential for greater production is higher today than it ever has been, and will continue to expand. We consider that the prospect of continuing increases in supplies from all sources justifies our apprehension that conditions of relative over-supply in the U.K. market could develop with serious repercussions on the economy of our country. Our study of the problem has convinced us that the only effective means of ensuring long-term stability in

the U.K. market for agricultural products would be to make provision for the limitation of foreign supplies. In the case of meat this might be done by revision of the quotas in the Ottawa Agreement to render them effective in the light of developments since 1952. The U.K. Government were unable to agree to take such action under existing circumstances. They have agreed, however, that they will be ready, if circumstances arise which threaten serious injury to New Zealand's meat export trade, to examine the situation in consultation with the N.Z. Government and to consider sympathetically any N.Z. request for the application of such remedial measures as may be appropriate."

Certain representatives of the New Zealand producers, on the other hand, expressed disappointment at the outcome of the London discussions.

Mr. F. C. Johnstone (deputy chairman of the N.Z. Meat Producers' Board, and a member of the N.Z. delegation in London) criticized the fact that Britain had not agreed to restrict the entry of foreign meat to its present level, whilst Mr. R. Woolerton (Dominion president of the dairy section of the N.Z. Federated Farmers) expressed disappointment because there was not much price protection for dairy products in the agreement, although he admitted that New Zealand could not expect this since Denmark was a supplier to the U.K. of very long standing. On the other hand, Mr. E. W. McCallum (the Federation's vice-president) expressed the view that the trade talks had "produced more value than the terms announced would lead one to believe," especially since a great deal of consideration had been given to the means of dealing with any future situation such as a sudden drop in prices, and because the elimination of any question of quotas in the next 10 years was "a major gain in view of world surpluses."

Statistics of New Zealand's overseas exchange transactions in 1956, published in the Bulletin of the N.Z. Reserve Bank, showed that Britain was again New Zealand's largest customer for butter, cheese, meat, and wool, as well as for most other classes of exports.—(Times - Financial Times - Directorate of Information, Wellington - New Zealand Reserve Bank) **(Prev. rep. 14961 A; 13704 A; 13499 B.)**

A. UNITED KINGDOM. — Government Changes. - Lord Mancroft appointed Minister without Portfolio.

It was announced from 10, Downing Street, on June 12 that Lord Munster had resigned the post of Minister without Portfolio and would be succeeded by Lord Mancroft, Parliamentary Secretary to the Ministry of Defence.

The Earl of Munster (51) explained in a letter to the Prime Minister that he wished to resign from the Government so that he could devote more of his time to work within the Conservative Party Organization. Lord Munster became Under-Secretary of State for the Colonies in 1951 and held that post until October 1954, when he was appointed Minister without Portfolio - in which capacity he had been Government spokesman on a number of topics in the House of Lords. He has been chairman of the Association of Conservative Clubs since 1948.

Lord Mancroft (42) was a Lord-in-Waiting from 1952 to 1954, and subsequently Under-Secretary of State, Home Office, until his appointment as Parliamentary Secretary, Ministry of Defence, in January last. Educated at Winchester and Christ Church, Oxford, he was called to the Bar in 1938.

The announcement stated that Lord Mancroft would continue to discharge his former duties as Parliamentary Secretary to the Ministry of Defence, no new appointment being made to that office. Lord Mancroft had for some time previously acted as Government spokesman in the House of Lords on several topics in addition to defence.

It was also announced that the Marquess of Lansdowne (44) had become a Lord-in-Waiting in succession to Lord Hawke (55), who had resigned to make way for a younger man. The three political Lords-in-Waiting (who are nominally members of H.M. Household) act as Government Whips and occasional spokesmen in the Lords, the others being Lord Fairfax and Lord Chesham.—(Times - Daily Telegraph) **(15492 B.)**

B. UNITED KINGDOM. — Education. - Three-Year Training Courses for Teachers from 1960.

The Minister of Education (Lord Hailsham) announced on June 6 that the Government had decided that the training course for teachers should be extended from two to three years, beginning in 1960. He explained that the latter year had been chosen because a sharp decrease in the school population was expected after 1961. Although the introduction of the longer course would reduce the annual output of teachers from the training colleges, the change would therefore not halt the process of reducing the size of classes.

A longer training course had been urged by educationists for several years, on the grounds that the two-year course did not allow sufficient time for studies that were not purely vocational, and that it launched students on their teaching careers at too early an age.—(Times - Daily Telegraph) **(Prev. rep. Teaching Profession, 15120 A.)**

C. FORMOSA. — Anti-American Riots in Taipeh. - Wrecking of U.S. Embassy. - Strong U.S. Protest to Chinese Nationalist Government. - Chinese Communist Radio and Press Attacks on United States.

Serious riots occurred in Taipeh, the capital of Formosa, on May 24 when Chinese crowds estimated at several thousand attacked the U.S. Embassy, tore down the American flag, and wrecked the Embassy offices. Later the same day further riots took place outside the municipal police headquarters, when a crowd estimated at 30,000 besieged and tried to storm the building, disarmed some military policemen, used their pistols against the police, and wrecked the U.S. Information Service's building opposite. Police opened fire on the crowds, which were finally dispersed after three Army divisions rushed to the city had taken over control of the U.S. Embassy as well as the offices of the U.S. Military Advisory Group, outside which the mob had destroyed 10 parked cars. An American press attaché was seriously injured during the riots, and several other U.S. officials manhandled. According to an official Chinese statement, one civilian was killed and eight civilians and 24 policemen wounded, two of them seriously, during the disturbances, while some 30 rioters who stormed the U.S. Information Service's building were arrested.

The riots occurred in protest against the acquittal on May 23 of Master-Sergeant Robert Reynolds, of the U.S. Army, on a charge of manslaughter of a 30-year-old Chinese. The Chinese was stated to have peeped through a window at the sergeant's wife when she was naked after a shower; when Mrs. Reynolds cried out to her husband he rushed out and killed the man with two shots. Reynolds denied the manslaughter charge, saying in his defence that he feared the intruder intended to attack him. After Reynolds' acquittal by an American court-martial he was secretly taken under a military police escort to the airport, from where he was flown to the Philippines together with his wife and child.

Incensed at the acquittal of Reynolds, large crowds had gathered outside the U.S. Embassy and jeered at and insulted Americans in the streets, while the widow of the victim carried out a hunger-strike outside the Embassy, carrying a placard protesting against the acquittal of Reynolds and demanding justice. The Chinese Nationalist police took no action when the mob tore down the U.S. flag and ripped it to pieces, hoisted the Nationalist flag, raided the building, smashed desks, hurled steel cabinets out of the windows, set fire to American cars and lorries, and tried to burn down the Embassy itself.

Indignation and concern were aroused in the U.S.A. by the anti-American disturbances, a strong protest being made by the U.S. Ambassador in Taipeh, Mr. Rankin. President Chiang Kai-shek, in a message to President Eisenhower and Mr. Dulles on May 27, expressed "profound regrets" over the destruction of the Embassy and the U.S. Information Offices, and assured Mr. Rankin that the incident "did not reflect in any way the expression of anti-Americanism" in the island but had only been an expression of popular anger at the acquittal of Reynolds. Three senior police and Army officers who were considered to be responsible for the failure of the police and troops to intervene were dismissed on the same day, whilst the Chinese authorities promised full compensation for the damage. It was subsequently announced that 111 persons had been arrested during the anti-American riots of May 24, of whom 41 had been indicted and handed over to the military authorities.

Violent attacks on the United States, described by monitoring services as the most vituperative ever recorded, were made by Peking Radio and the Chinese Communist press as a result of the Taipeh riots.

A Peking broadcast called upon "all patriotic forces" in Formosa to "drive the American aggressors out of the island and ensure its peaceful unification with the motherland." The broadcast said that the people of Formosa were regarded by the Americans as "slaves and cannon-fodder to be ordered about at will," and attacked U.S. Servicemen for "manhandling and slaughtering Formosans, raping women, getting drunk and staging brawls."

A spokesman of the U.S. State Department said on May 28 that the U.S. Government was "actively considering a reduction in the number of American civilian and military personnel in Formosa," in which connexion it was pointed out that 10,000 American citizens and their dependants were in the island. The U.S. Secretary of Defence (Mr. Charles Wilson) said on the same day that the demonstrations in Formosa had "highlighted" the need for "another look" at the American military aid programme to Nationalist China.

A. UNITED KINGDOM - UNITED STATES. — New Agreement on Exchange of Information on Peaceful Uses of Atomic Energy. - Information exchanged on Calder Hall Reactor and Nuclear Submarines.

The U.S. Atomic Energy Commission announced on June 5 that discussions between Sir Edwin Plowden (chairman of the U.K., Atomic Energy Authority) and Rear-Admiral Lewis Strauss (chairman of the A.E.C.) had resulted in agreement "on a wide range of subjects in connexion with the peaceful use of atomic energy." It was stated that the agreement covered "the exchange of information on Calder Hall as well as other areas of co-operation between the two countries," no further details being given.

The discussions between Sir Edwin Plowden and Rear-Admiral Strauss followed U.S. complaints that the U.K. Atomic Energy Authority was not supplying sufficient details of the Calder Hall reactor under the Anglo-American agreement of June 15, 1955. It was known that the A.E.A. had found itself unable to provide the A.E.C. with the detailed design and drawings of the Calder Hall reactor because it could obtain no assurance that such information, if supplied, would not be passed on to private American firms: in such an eventuality the firms concerned would have obtained, free of charge, information for which competing British firms had to pay royalties. [Unlike the British practice, the U.S. Atomic Energy Commission makes atomic information available to American firms on a non-royalty basis]. When announcing the 1955 agreement, Sir Anthony Eden (then Prime Minister), stated that exchanges of information under the agreement would take place "on a commercial basis and subject to certain safeguards."

In a press statement on June 7, after his return to London from Washington, Sir Edwin Plowden said that it had been agreed to provide information about the Calder Hall and similar reactors under the following conditions:

(1) No information would be supplied relating to developments since January 1, 1957.

(2) The information to be supplied would be made available to the U.S. Atomic Energy Commission and its direct contractors, a provision which would allow the A.E.C. to start work on the building of a prototype reactor.

(3) Sufficient information about the gas-cooled reactor at Calder Hall would be supplied to U.S. firms for them to be able to make an assessment about its economic value.

(4) Any more practical use which U.S. firms might wish to make of the information would be regulated by licence agreements between British and American firms.

In the course of his statement Sir Edwin Plowden laid special emphasis on two points: (i) the pace of development in Britain on gas-cooled reactors was now so rapid that information which had accrued since Jan. 1, 1957, and which would not be disclosed, was vital to their further development; (ii) the value to Britain of "the American information on submarine and other reactors which is now coming along." Sir Edwin said that commercial exploitation of atomic energy in Britain was "bounds away in front" of the United States, and believed that it was unlikely that Britain would lose her present world lead in designing nuclear power stations.

The British Admiralty announced on June 6 that representatives of the U.S. Navy and the U.S. Atomic Energy Commission had completed a visit to Britain for joint discussions with the Admiralty and the U.K. Atomic Energy Authority on nuclear-powered submarines. It was stated that British naval representatives and atomic experts would shortly visit the U.S.A. to continue the discussions, and that information had been exchanged on "classified and unclassified data." Rear-Admiral Rickover, who played a leading part in designing the U.S. atomic submarine *Nautilus*, took part in the conversations with British experts, who included Rear-Admiral Guy Wilson, Rear-Admiral Nuclear Propulsion (see 15412 B). The Naval Correspondent of the *Daily Telegraph* said that the construction of Britain's first atomic submarine, the *Dreadnought*, "will be speeded as the result of the discussions between British and U.S. nuclear experts."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. 15531 A; Anglo-American Agreements (1956), 15133 A; (1955), 14360 A.)**

B. BULGARIA - SOVIET UNION.—Construction of Soviet Ships in Bulgarian Shipyards.

An agreement on the building of ships and other craft by Bulgaria for the U.S.S.R. during the three-year period 1958-60 was signed in Moscow on May 18, in implementation of the Soviet-Bulgarian communiqué of Feb. 20 (see 15449 A). The Soviet Union will supply Bulgaria with the necessary equipment and materials for carrying out the programme, which aims at keeping the Bulgarian shipbuilding industry working at full capacity over a long-term period.—(Soviet Embassy Press Department, London) **(Prev. rep. 15449 A.)**

C. DENMARK. — State Visit of Queen Elizabeth II.

Queen Elizabeth II and the Duke of Edinburgh paid a State visit to Denmark from May 21-23, following their recent State visits to France and Portugal.

The Queen and the Duke sailed from Hull for Copenhagen on May 20 in the Royal yacht *Britannia*, which was escorted by the destroyers *Corunna*, *Duchess* and *Diamond* and which was met off the Skaw (the northernmost point of Jutland) by the Danish frigates *Rolf Krake* and *Valdemar Seir*. King Frederik of Denmark, accompanied by Queen Ingrid and their eldest daughter, Princess Margrethe (the 17-year-old heir presumptive to the Danish throne), went on board the *Britannia* off Copenhagen and disembarked with Queen Elizabeth and the Duke of Edinburgh. After reviewing the Danish Royal Life Guards on the waterfront, her Majesty and Prince Philip drove to the Amalienborg Palace along a three-mile route, escorted by the Danish Royal Hussars.

In the afternoon of May 21 Queen Elizabeth and the Duke, accompanied by King Frederik, Queen Ingrid and Princess Margrethe, drove to the cemetery at Mindelundon (in the suburb of Ryvangen), where 157 men of the Danish Resistance movement are buried and where there are memorial tablets to 242 others. [The 157 Danish Resistance fighters were shot by the Germans near the same spot during the wartime occupation.] After laying a wreath on the memorial Queen Elizabeth returned to Amalienborg with Queen Ingrid and Princess Margrethe, while the Duke of Edinburgh, accompanied by King Frederik, drove to Nyhavn (the sailors' quarter of Copenhagen) to lay a wreath on the memorial to the Danish sailors who lost their lives in the Second World War. Later in the day her Majesty and Prince Philip received the heads of diplomatic missions and visited the British Embassy. A State banquet was held in the evening at Christiansborg Palace (the seat of the Danish Parliament) at which speeches were made by King Frederik and Queen Elizabeth.

During the morning of May 22 her Majesty and the Duke visited the famous Carlsberg breweries, founded over 100 years ago by Jacob Christian Carlsberg, and the Carlsberg Foundation. [The Carlsberg Foundation was established in 1876 by J. C. Carlsberg and his son—both well-known philanthropists—to promote art, science, and Danish culture generally, and was the model for the Wellcome Foundation in Britain. The money made by the Carlsberg breweries supports the cultural purposes of the Foundation, which plays a unique role in Danish life.] The Queen and the Duke also visited the "grace and favour" residence provided by J. C. Carlsberg for a distinguished Dane, and which is at present occupied by Professor Niels Bohr, the eminent physicist. Later in the morning they visited a nursery school run by the City of Copenhagen.

Queen Elizabeth and Prince Philip lunched at the Amalienborg Palace with Mr. H. C. Hansen (the Danish Prime Minister), Mr. Selwyn Lloyd (British Foreign Secretary, and Minister-in-attendance on the Queen), and a number of other guests, among whom was Mr. Thomas Dinesen, a Dane who won the Victoria Cross while serving in the Canadian forces during the First World War. [Mr. Dinesen, the only holder of the V.C. outside the British Commonwealth, gained the decoration for storming a trench near Amiens.] In the afternoon her Majesty and the Duke of Edinburgh attended a reception given by the heads of Commonwealth missions in Denmark, while in the evening they attended a gala performance of the Danish Royal Ballet in the Royal Theatre on the Kongens Nytorv.

On the last day of their State visit (May 23) the Queen and the Duke visited the English church in Copenhagen (the Church of St. Alban), followed by visits to a modern school at Gentofte (a suburb of Copenhagen) and to the Royal Copenhagen porcelain factory. They drove nine miles out of Copenhagen to lunch with King Frederik and Queen Ingrid at the Ermitagen, the King's hunting lodge in a royal deer-park laid out 300 years ago by Christian V, and in the afternoon attended a reception by the civic authorities at Copenhagen Town Hall. The State visit ended with a great firework display—the largest ever given in Denmark—held in the evening on the Copenhagen waterfront.

During their three-day visit to Copenhagen Queen Elizabeth and the Duke of Edinburgh stayed at the Christian VII Palace and were enthusiastically welcomed by vast crowds throughout their tour. Her Majesty received a gift to enable British children injured in air raids to spend holidays in Denmark, which she reciprocated by a gift of money to be spent on providing holidays for Copenhagen children.

At the end of their official visit, the Queen and the Duke of Edinburgh spent two days resting at Fredensborg Castle as the private guests of King Frederik before sailing from Elsinore in the *Britannia* on May 26.—(Berlingske Tidende, Copenhagen - Politiken, Copenhagen - Times)

D. FIJI. — Population Census.

The results of a census taken in Fiji in 1956, recently published in Suva, showed that the Indian population of the island numbered 169,409, whereas the Fijian population numbered 148,134, Europeans 6,402, and part-Europeans 7,810. It was pointed out that the Indian population was increasing almost twice as fast as the Fijian owing to the high birth-rate among the former.—(Times) **(Prev. rep. 15235 D.)**

JUNE 15—22, 1957

A. FRANCE. — Resignation of M. Mollet. - New Government formed by M. Bourgès-Maunoury. - Vote of Confidence in National Assembly.

M. Guy Mollet tendered his resignation to President Coty on May 21 after his Government had been defeated in the National Assembly on a Bill seeking to impose additional taxation, which M. Mollet had made an issue of confidence. After a three-weeks' ministerial crisis, a new Cabinet was formed on June 11 by M. Maurice Bourgès-Maunoury (Radical), the outgoing Defence Minister, and was given a vote of confidence by the National Assembly on June 13. M. Mollet's Cabinet had been in office for nearly 16 months, and was thus the longest-lived Government of the Fourth Republic to date.

Resignation of M. Mollet.

The *projet de loi* for increased taxation was defeated in the National Assembly on May 21 by 250 votes to 213, with 70 "voluntary abstentions" and 46 deputies not participating in the vote. In a lengthy speech before the division, M. Mollet had stressed the seriousness of France's financial position and defended the proposed additional taxation on the grounds of the large budgetary deficit, the adverse balance of payments, and the low level of the gold and dollar reserves in the Bank of France. He pointed out, *inter alia*, that the budgetary deficit would still exceed 500 milliards of francs (£500,000,000) even if the Assembly approved the taxation for which the Government asked.

The 250 opposing votes comprised 140 Communists and *progressistes*, 52 Independents (conservatives), 36 Poujadists, 12 *Paysans*, 5 *non-inscrits*, 2 Social Republicans, 2 U.D.S.R. deputies, and 1 Radical.

The 213 supporting votes were made up as follows: 92 Socialists, 68 M.R.P. (Popular Republicans), 13 Dissident Radicals, 12 Radicals, 12 Social Republicans, 8 U.D.S.R.-R.D.A. deputies, 4 R.G.R., 3 *non-inscrits*, and 1 Independent.

The 70 deputies "voluntarily abstaining" from the vote comprised 31 Independents, 28 Radicals (including M. Mendès-France), 5 R.G.R., 4 Social Republicans, 1 *Paysan* and 1 *non-inscrit*.

The 46 deputies not taking part in the vote consisted of 9 Communists, 9 U.D.S.R.-R.D.A., 7 Socialists, 6 Overseas Independents, 3 M.R.P., 3 Social Republicans, 3 Independents, 2 Radicals, 2 *non-inscrits*, 1 *Paysan*, and 1 Poujadist.

As shown by the voting figures, M. Mollet's defeat was primarily due to the opposition of the right-wing Independents, who had hitherto given general support to his Government although not represented therein. While the Independents had supported the Government's policy in Algeria and the Suez crisis, and its handling of foreign affairs generally, their opposition to its economic and fiscal policies culminated in the adverse vote against M. Mollet on May 21, when 52 Independent deputies voted against the taxation measures and 34 others abstained or took no part in the vote.

Failure of M. Pflimlin's Attempt to form Government of National Union.

Following M. Mollet's resignation, President Coty asked M. René Pleven (leader of the U.D.S.R. and a former Prime Minister) to undertake an "information and conciliation mission" (*mission d'information et de conciliation*) to explore the possibilities of forming a government of the centre parties capable of commanding a parliamentary majority. M. Pleven accepted the task on May 24 but abandoned it five days later, when he informed the President that he had been unable to make any progress in his exploratory discussions with the party leaders. After M. Pinay (Independent) had declined a similar invitation, President Coty invited M. Pierre Pflimlin (M.R.P.) on May 29 to form a new government after consulting the various party leaders. M. Pflimlin—who had held ministerial office in many former Cabinets—accepted the President's invitation on May 30, after flying to Biarritz to address a congress of the M.R.P. then in session. Before leaving Paris he had seen M. Mollet and had made it clear that he would not form a Government unless the Socialists participated.

On June 3 M. Pflimlin submitted to President Coty and to the leaders of the non-extremist parties (i.e. excluding the Communists and the Poujadists) a programme for a "Government of National Union" which he had outlined at the Biarritz congress. In a covering letter he announced his intention of forming a Ministry in which representatives of all the "republican and national parties" would be represented. His proposed programme was divided into three main sections dealing with (1) economic questions; (2) Algeria; and (3) constitutional reform, as summarized below:

(1) In the field of economic policy M. Pflimlin proposed (*a*) to fight inflation and the balance-of-payments deficit without recourse to foreign aid; (*b*) to establish an 18-months' period (June 1957 to December 1958) within which France would bring her balance of payments into equilibrium and be in a position to enter the projected European Common Market; (*c*) to set a "ceiling" on public expenditure; (*d*) to raise revenue by new taxes and charges, including an increase in postal and telephone rates and in the price of petrol, an increase in the company tax, and the introduction of a special tax on banking profits; (*e*) to introduce a "more representative" cost-of-living index.

(2) In Algeria, the Government would "continue, and if need be intensify, the efforts to break the rebellion and to combat terrorism." In view of the rebels' continued refusal to accept the French cease-fire offer, he proposed to set up a committee, drawn from all the "national and republican" parties and including civil and military experts, to work out a provisional statute for Algeria which would be applied in stages, whilst awaiting the conditions under which a definitive settlement could be reached. M Pflimlin reaffirmed the principles for an Algerian settlement previously laid down by M. Mollet—i.e. first a cease-fire, secondly elections, thirdly political negotiations for a new statute.

(3) The new Government, if formed, would immediately call a round-table conference of all the "national and republican" parties to discuss the revision of the Constitution.

M. Pflimlin also said that he would ask for the immediate ratification of the Euratom and Common Market treaties if he were permitted to form a government.

The National Council of the Socialist Party, meeting on the same day (June 3), adopted a motion stating that it would not oppose M. Pflimlin's investiture as Prime Minister, as his programme was not in contradiction to the Socialist Party's own ideals. It added, however, that it was not prepared to enter a Government which would include the Independents, as it was felt that such a coalition would lead to "confusion, stagnation, and the rapid disintegration of the Government." Moreover, the Socialist Party could not join any coalition government unless its policy corresponded to the main principles laid down by M. Mollet when he became Prime Minister in February 1956, and unless it included the economic and fiscal measures which the Mollet Government would have carried out had it not been defeated in the Assembly. The Parliamentary Socialist Party, meeting on June 4, endorsed the National Council's resolution by 74 votes to 22.

In view of the two basic conditions laid down by the Socialist Party—i.e. that the Independents should not be included in a new coalition government, and that such a government should carry out the economic reforms demanded by the Socialist Party—M. Pflimlin abandoned his attempt to form a "Government of National Union" and informed President Coty accordingly in the morning of June 4.

Formation of Bourgès-Maunoury Government.- Socialists accept Office in New Ministry.

After M. Pflimlin had abandoned his attempts to form an administration, M. Mollet, M. Billères (Radical) and M. Bourgès-Maunoury were successively invited to the Elysée on June 4 and asked by President Coty to form a Government. M. Mollet and M. Billères declined, but M. Bourgès-Maunoury accepted the President's invitation and began negotiations with the Socialist, M.R.P., Social Republican and U.D.S.R. leaders, as well as with his own party, the Radicals. On June 7 the Parliamentary Socialist Party agreed (by 51 votes to 33) to take office under M. Bourgès-Maunoury, at the same time laying down a "minimum programme" of social and economic legislation as a condition of its participation. The M.R.P. and the Social Republicans (ex-Gaullists) declined to accept office—in the case of the Social Republicans, apparently, because of M. Bourgès-Maunoury's refusal to delay the ratification of the Common Market and Euratom treaties. The M.R.P. refused on the ground that the situation in Algeria, and the economic situation in France itself, called for a broadly based "government of national union" on the lines proposed by M. Pflimlin.

Having obtained the support of the Socialist and Radical parties, and also of the U.D.S.R. and R.G.R. groups, M. Bourgès-Maunoury became Prime Minister-designate on June 10, when President Coty formally accepted the resignation of M. Mollet. M. Bourgès-Maunoury completed his Cabinet list on June 11 and presented it to the President on the same day, its membership being published in the *Journal Officiel* on June 14 after M. Bourgès-Maunoury had obtained a vote of confidence from the National Assembly (see below). The new Ministry—the 23rd to be formed in France since the liberation—was as follows:

M. Maurice Bourgès-Maunoury (Radical)	Prime Minister.
M. Félix Houphouet-Boigny (R.D.A.)	Minister of State.
General Corniglion-Molinier (R.G.R.)	Justice.
M. Christian Pineau (Socialist) ..	Foreign Affairs.
Senator Gilbert Jules (Radical) ..	Interior.
M. André Morice (Dissident Radical)	National Defence.
M. Félix Gaillard (Radical) ..	Finance, Economic Affairs and Planning
M. René Billères (Radical)	Education.
M. Edouard Bonnefous (U.D.S.R.) ..	Public Works.
M. Gérard Jacquet (Socialist) ..	Overseas Territories.
M. Albert Gazier (Socialist)	Social Affairs.
Senator André Dulin (Radical) ..	War Veterans.
M. Robert Lacoste (Socialist) ..	Algeria.
M. Max Lejeune (Socialist)	Sahara.

M. Bourgès-Maunoury (42), the youngest Prime Minister of the Fourth Republic, was born in 1914 at Luisant (Eure-et-Loir). After studying law and political science he was mobilized in 1939 as an artillery lieutenant, taken prisoner, and spent a year in captivity in Germany before being released in 1941. On his return to France he joined the Resistance movement, in which he distinguished himself under a variety of *noms de guerre* —" Polygone," " Circonférence " and " Anchois." He was trained in Britain as a parachutist, carried out a number of dangerous missions between the occupied zone and London, and became military representative in occupied France for the French Provisional Government in Algiers. Parachuted again into France after D-Day (at which time he was stationed in London), he organized widespread sabotage and *maquis* activities behind the German lines in Southern France and was seriously wounded. He subsequently became *Commissaire de la République* for the Bordeaux region in June 1945, and for a few months thereafter was administrator of the Renault factories.

Entering politics after the war, M. Bourgès-Maunoury was elected to the French Assembly in 1946 as a Radical deputy for the Haute-Garonne department. At the age of 33 he became State Secretary for the Budget in the Schuman Cabinet (1947), and during the next ten years held portfolios in 11 Governments, including those of Defence, the Interior, Finance, Industry and Commerce, and Armaments. An advocate of European union, he resigned from the Mendès-France Cabinet in 1954 when the E.D.C. treaty was rejected, but subsequently returned as Minister of the Armed Forces.

M. Bourgès-Maunoury gave strong support to the " Mollet-Lacoste " policy in Algeria, and on many occasions reiterated the French Government's determination to crush the rebellion while carrying out necessary political and social reforms. He also strongly supported the Anglo-French military intervention during the Suez crisis, and frequently denounced the totalitarian nature of the Egyptian military dictatorship. He holds the Legion of Honour, the *Croix de Guerre*, and the *Rosette de la Résistance* as well as many Allied decorations, including the British D.S.O.

The new Cabinet, like its predecessor, was based on the " Republican Front " coalition between the Radicals, Socialists, and U.D.S.R.-R.D.A., but was slightly more " right-centre " than M. Mollet's administration. The number of Radical Ministers (including Dissident Radicals) rose from three to six while the number of Socialist Ministers fell from seven to five, the other three Ministers representing the U.D.S.R., R.G.R., and R.D.A. groups as shown. All the Radical Ministers were drawn from the right wing of the party (i.e. the group opposed to M. Mendès-France and his followers), including M. Morice, who took the lead in founding the " dissident " Radical Party (see 15247 A).

M. Pineau remained at the Quai d'Orsay, while four other Ministers —MM. Jules, Billères, Gazier and Lacoste—also retained the portfolios they held in the Mollet Government. M. Lacoste's title, however, was changed from Minister Resident in Algeria to Minister for Algeria; it was officially explained that M. Lacoste would " continue to reside in Algiers but would come to Paris whenever circumstances necessitate."

Apart from the change in the Premiership, the new Government involved the following changes: General Corniglion-Molinier (a former Gaullist) succeeded M. Mitterrand (U.D.S.R.) as Minister of Justice; M. André Morice took over the Defence portfolio from M. Bourgès-Maunoury; M. Gaillard succeeded M. Ramadier (Socialist) as Minister of Finance and Economic Affairs, and was also given responsibility for economic planning; M. Jacquet succeeded M. Gaston Defferre (Socialist) as Minister for the Overseas Territories; Senator Dulin became Minister for War Veterans *vice* M. Tanguy-Prigent (Socialist); and M. Houphouet-Boigny, Minister of State attached to the *Présidence du Conseil*, became Minister of State. [M. Houphouet-Boigny, an African, is head of the *Rassemblement Démocratique Africain* (R.D.A.), which emerged as the strongest party in the recent general elections in French West Africa (see page 15587, first column). He is mayor of Abidjan and deputy for the Ivory Coast in the French National Assembly, where he sits with the U.D.S.R. group.]

M. Chaban-Delmas (Social Republican), who had been Minister of State without portfolio under M. Mollet, left the Cabinet together with MM. Mitterand, Ramadier, Tanguy-Prigent, and Defferre, who had piloted the *loi-cadre* for the constitutional advancement of the French overseas territories through the National Assembly (see 15585 A). It was stated in the French press that M. Defferre had refused to take office in the new Cabinet because of his opposition to M. Lacoste's policies in Algeria. M. Mitterrand was understood to have refused office for the same reason.

M. Lejeune, formerly a Secretary of State for National Defence (with special responsibility for Land Forces in Algeria), was put in charge of a new Ministry of the Sahara, which was created to promote an extensive programme of economic development in the Saharan territories previously drawn up by the Mollet Government. Earlier in the year an organization had been created, under the name of the *Organisation commune des régions sahariennes* (O.C.R.S.), which is designed to make the Sahara administratively and economically independent of the Algerian administration or any other government department, and to promote economic development in the Saharan territories.

M. Gaillard (37), an economic and financial expert, became the youngest Finance Minister in any French Cabinet since 1899. [M. Joseph Caillaux, then 36 years of age, held the Finance portfolio in that year in the Waldeck-Rousseau Cabinet.] In 1953 he was State Secretary to the *Présidence du Conseil* in M. René Mayer's Government (see 12673 A), with special responsibility for the Modernization and Equipment Plan (the " Monnet plan "), atomic energy, and liaison with the O.E.E.C. Of the other new Ministers, M. Jacquet was a State Secretary at the *Présidence du Conseil* in the Mollet Government, with special responsibility for Information; Senator Dulin was State Secretary for Agriculture; M. Morice is leader of the " dissident " Radicals as stated above; and General Corniglion-Molinier was a Minister in the Cabinet formed by M. Edgar Faure in February 1955. M. Bonnefous had held office in many previous Governments but not in M. Mollet's administration.

The new Government was completed on June 17 by the appointment of 25 Secretaries of State (junior Ministers) and two Under-Secretaries, as follows:

Secretaries of State.

Présidence du Conseil:
Relations with Parliament—M. Georges Galy-Gasparrou (Radical).
Information—M. Michel Soulié (Radical).
Scientific Research—M. François Bénard (U.D.S.R.).
Civil Service—M. Jean Meunier (Socialist).

Foreign Ministry:
European Affairs—M. Maurice Faure (Radical).
Moroccan and Tunisian Affairs—Senator Emile Claparède (Radical).

Algeria—Senator Marcel Champeix (Socialist).

Interior—Senator Maurice Pic (Socialist).

Armed Forces:
Land—M. Pierre Métayer (Socialist).
Sea—M. Frank Arnal (Socialist).
Air—M. Henry Laforest (Radical).

Finance, Economic Affairs and Planning:
Budget—M. Jean-Raymond Guyon (Socialist).
Economic Affairs—M. Emile Hugues (Dissident Radical).
Energy—M. Edouard Ramonet (Dissident Radical).
Industry and Commerce—M. Arthur Conte (Socialist).
Reconstruction—Senator Bernard Chochoy (Socialist).
Posts and Telegraphs—M. Eugène Thomas (Socialist).

Agriculture:
General Affairs—M. Kléber-Loustau (Socialist).
Planning—M. Pierre de Félice (Radical).

Transport:
Civil Aviation—M. Achille Auban (Socialist).
Merchant Navy—M. Jacques Faggianelli (Dissident Radical).

Social Affairs:
Labour—M. Jean Minjoz (Socialist).
Health—M. André Maroselli (Radical).

Education:
Arts and Letters—Senator Jacques Bordenave (Radical).

France d'outre-mer—M. Modibo Keita (R.D.A.).

Many of the State Secretaries retained the same posts as in the Mollet Government, although a number of new appointments were made.

Under-Secretaries.

Présidence du Conseil—M. François Giacobbi (Radical).

Agriculture—Mme. Jacqueline Thôme-Patenôtre (Radical).

Among the new State Secretaries were M. Galy-Gasparrou, an eminent lawyer, who became *procureur-général* of the High Court of Justice in February 1957 in succession to the late Maître de Moro-Giafferi; M. Arthur Conte, a well-known writer and journalist; M. Faggianelli, a Corsican, by profession a teacher of English; and Madame Thôme-Patenôtre, mayor of Rambouillet and a senator for the Seine-et-Oise department.

Vote of Confidence for M. Bourgès-Maunoury.

M. Bourgès-Maunoury was given a vote of confidence by the National Assembly on June 12 after a policy statement devoted mainly to the Algerian problem and the financial situation. The voting was 240 in favour and 194 against, with 74 "voluntary abstentions," 60 deputies not taking part in the vote, and 26 absent.

The 240 deputies voting for M. Bourgès-Maunoury comprised 91 Socialists, 59 Independents, 27 Radicals, 13 Dissident Radicals, 12 U.S.D.R.-R.D.A. deputies, 12 Social Republicans, 10 R.G.R., 8 *Paysans*, 6 *non-inscrits*, and 2 M.R.P. deputies.

The 194 opposing votes comprised 138 Communists and *progressistes*, 35 Poujadists, 11 Radicals (including M. Mendès-France), 3 *non-inscrits*, 2 Independents, 2 *Paysans*, 2 Overseas Independents, and 1 Social Republican.

The 74 "voluntary abstentions" consisted of 46 M.R.P. deputies, 12 Independents, 6 Social Republicans, 4 Radicals, and 2 each from the U.D.S.R., Overseas Independents, and *Paysans*.

The 60 deputies not taking part in the vote comprised 14 M.R.P., 10 Communists, 9 Independents, 8 Socialists, 8 U.D.S.R.-R.D.A., 3 Radicals, 2 Overseas Independents, 2 Poujadists, 2 *Paysans*, 1 Social Republican, and 1 *non-inscrit*. Of the 26 deputies absent, 12 were from the M.R.P. and 7 were Independents.

The main points of M. Bourgès-Maunoury's policy statement are summarized below:

Algeria. After declaring that "the Algerian drama holds first place in my preoccupations" the Prime Minister continued: "We must continue the fight [against the rebels] as long as it is imposed on us, and at the same time help the millions of Algerians to build a new Algeria . . . The Army's sacrifices have not been in vain. The rebels now know that they can never win a military victory. Their last hope is to tire us out: in that also they will be mistaken. I say to the entire Algerian people: We shall continue our efforts for as long as necessary. We also undertake another solemn engagement—to go ahead with the building of a new Algeria without waiting any longer for the good will of our opponents. The population, tired of the rebellion, must help us to isolate it and finally to eliminate it, and must be given confidence in the assured future of their country. The French Government has one definite and final objective: to maintain and strengthen the indissoluble union between Metropolitan France and Algeria, while at the same time recognizing and respecting the *personalité algérienne* and securing political equality for all the inhabitants of Algeria."

While keeping steadfastly to all the objectives laid down by M. Mollet, the new Government would introduce as soon as possible a "framework law" (*loi-cadre*) as the basis for a "new and progressive political structure" in Algeria. "This structure," said M. Bourgès-Maunoury, "will begin at the local level, will then be developed at the departmental level, and will finally be applied at regional level. Each region in Algeria will become a provincial political entity (*une entité politique provinciale*), and on the basis of these provinces and their political machinery will be built the structure of the 'Algerian whole' (*l'ensemble Algérie*). As soon as elections are possible the elected representatives of the people will be asked to examine this *loi-cadre*, to adopt it, or to propose modifications they consider necessary. These political reforms will be accompanied by far-reaching administrative reforms . . . which will lead to the progressive abolition of the *Gouvernement-Général de l'Algérie* and the decentralization of powers to the regions."

Financial Position. Turning to finance, M. Bourgès-Maunoury said that it would be necessary to ask the Bank of France for a provisional advance of 80,000,000,000 francs (£80,000,000), as the previous Government had decided, and also to draw on the Bank's gold reserves to meet France's foreign obligations at the end of June. One of the principal reasons for the country's economic difficulties was that "the rapid rhythm of our economic expansion" was accompanied by excessive internal consumption which had contributed to insufficient exports. An "austerity effort" was therefore necessary on the part of consumers, accompanied by increasing production, a part of which should be earmarked for exports.

The Prime Minister said that he would ask for new taxes to bring in 150,000,000,000 francs (£150,000,000) during the present year and 300,000,000,000 francs (£300,000,000) in 1958. It would also maintain the proposed economies of 250,000,000,000 francs (£250,000,000) introduced by M. Ramadier, the former Finance Minister, and seek further economies for 1958. After 18 months, or if possible one year, France must be in a position to enter the European Common Market on a competitive basis and in a sound financial position.

M. Bourgès-Maunoury pointed out that the inflationary effects of the Algerian emergency were often over-estimated. Out of a total military budget of 1,300,000,000,000 francs (£1,300,000,000), 400,000 million francs were for Algeria, of which 200,000 millions represented the actual cost of operations. If the fighting ceased, it would be possible to save the latter amount and to devote it to civil investments in North Africa.

Other Matters. The Prime Minister said that he would ask the Assembly to consider urgent constitutional and electoral reform measures before the end of the present legislature, and would also ask the Assembly to ratify the Common Market and Euratom treaties before the summer recess. In foreign affairs France would do all in her power to strengthen the Atlantic Pact and would play her full part in the current disarmament discussions. In the Middle East, France's policy of "opposing imperialist designs" should not affect her "centuries-old friendship with the Arab peoples, whom we esteem and love"; she would also maintain and strengthen her alliance with Israel.

As regards relations with Morocco and Tunisia, M. Bourgès-Maunoury stressed France's respect for the independence of both countries and her desire to assist them in modernizing their economic and social systems. He added: "It cannot be accepted that our Army should be regarded [by Morocco and Tunisia] otherwise than as an ally and in a spirit of common defence . . . We must understand their reactions when they imagine that attempts are made on their sovereignty, but we cannot tolerate their intervention in Algerian affairs."

After speaking of the constitutional advances in *Afrique Noire*, M. Bourgès-Maunoury dwelt upon the great economic potentialities of the Saharan region and their importance for both France and North Africa as a whole. The creation of the new Ministry of the Sahara showed the "extreme importance" the Government attached to the development of this region, from which Algeria would be the first to benefit. It was hoped to associate Morocco, Tunisia, and other neighbouring and friendly countries with the Saharan development plan, for the benefit of all nations and areas concerned. The Prime Minister explained that the powers hitherto exercised over the Saharan regions by the Governor-General of Algeria and the High Commissioners in French West and Equatorial Africa would be delegated to the Minister for the Sahara.

M. Bourgès-Maunoury visited London on June 15 to attend a ceremony at which Queen Elizabeth the Queen Mother unveiled a plaque at the house in Dorset Square where the French Resistance movement was organized during the war, and from which men and equipment were sent to the Resistance forces. The plaque commemorates the hundreds of French patriots, both men and women, who received training and instruction at Dorset Square and subsequently met their deaths in occupied France. The house was that from which General de Gaulle issued his famous appeal to the French people on June 18, 1940—"France has lost a battle; she has not lost the war." The new French Premier was among 150 leaders of the wartime Resistance movement attending the ceremony as guests of the British Government.—(Le Monde - Le Figaro - Times) **(Prev. rep. Mollet Cabinet, 14968 B; 14719 A; 14681 A.)**

A. EGYPT. — Purchase and Delivery of Soviet Submarines. - British and Israeli Reactions.

The Government-sponsored Middle East News Agency in Cairo announced on June 18 that three Soviet submarines "recently" purchased by Egypt had joined the Egyptian Navy. The submarines—of which two are of the latest long-range class, and the third of an older type—had come from the Baltic, their passage through the English Channel early in June having been reported in the British press. The submarines were the first underwater craft to join the Egyptian Navy, and were reported to be stationed at Alexandria.

The Naval Correspondent of *The Times* said that the largest of the Russian ocean-going type of submarine, comparable to the two larger vessels seen in the English Channel, was the 2,000-ton "W" class, with a range of 20,000 miles and a speed of 20 knots on the surface and 16 knots submerged. The coastal submarines—the "M" class—are of 205 tons, with a radius of 3,400 miles and a speed of eight knots on the surface and three knots submerged.

A British Foreign Office spokesman said on June 19 that the Soviet sale of the submarines to Egypt was "much to be regretted because it cannot but increase tension in the area," and that the British Government was consulting the U.S.A. and other Western Powers over this development. He added that such an action by the Soviet Union would be contrary to the spirit of the General Assembly's resolution of Nov. 2, 1956, in which U.N. member-States were urged to refrain from "introducing military goods into the area of hostilities." Recalling the tension which had been created in the Middle East following the large-scale Soviet supplies of armaments to Egypt two years ago, the spokesman intimated that Britain, France, and the U.S.A. still regarded the Tripartite Declaration of 1950 as being valid, except that Britain and France no longer agreed that Egypt had any rights thereunder to call on their protection.

A spokesman of the Israeli Foreign Office said on June 19, after an emergency meeting of the Israeli Cabinet, that Israel intended to ask the Western Powers to redress the balance of arms in the Middle East following the latest Soviet move. Israel Radio issued a warning to Egypt on the same night not to use the new submarines to block Israeli shipping in the Gulf of Akaba, declaring that such a blockade would once again "light the fires" and would be suicidal for Egypt.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Soviet Arms for Syria, 15582 A.)**

A. UNITED KINGDOM. — Capital Punishment. - Death Penalty (Abolition Bill) rejected by House of Lords after Acceptance by House of Commons. - Government's Homicide Bill passed by both Houses. - Death Penalty limited to Capital Murder and Repeated Murder. - Homicide Act in Force.

Following the House of Commons' vote on Feb. 16, 1956, in favour of the abolition or suspension of capital punishment (see 14739 A), the Death Penalty Abolition Bill—the private member's Bill sponsored by Mr. Sydney Silverman (Labour)—was given a second reading by the Commons on March 12, 1956 and a third reading on June 28. The House of Lords, however, rejected the Bill on second reading on July 10, 1956, and the Government subsequently introduced its own legislation—the Homicide Bill—which confined the use of capital punishment to five categories of murder and to repeated murder. The Homicide Bill was enacted on March 21, 1957, after its acceptance by both Houses following protracted debates.

The various stages of the legislation on capital punishment—the acceptance of Mr. Silverman's Bill by the House of Commons, its rejection by the House of Lords, and the subsequent passage of the Homicide Bill through both Houses of Parliament—are summarized below under cross-headings.

The Death Penalty (Abolition) Bill. - Second and Third Readings in House of Commons.

The Death Penalty (Abolition) Bill was passed by the House of Commons on second reading on March 12, 1956, the voting being 286 in favour and 262 against on a free vote.

Mr. Silverman (Lab.), who moved the second reading, suggested that the House, in view of its vote of Feb. 16, could not reject the measure without "stultifying itself before the country and before history." Many members were disturbed by the fear that the House was going too far in advance of public opinion; but while most of them would agree that Parliament should not fall too far behind public opinion, they might also agree that it was a good thing for Parliament to be, if anything, a little ahead of public opinion in matters of this kind.

In the earlier debate (Mr. Silverman continued) the Home Secretary had insisted that it was possible to say, beyond any reasonable doubt, that no innocent man had been hanged in Britain in recent years. "I do ask the Home Secretary to believe," Mr. Silverman declared, "that he is probably the only man in this House who really believes that." Whereas until recent times the vast majority of people in Britain would have confidently accepted the proposition that the risk of a substantial miscarriage of justice was negligible, the great majority no longer believed that. He was not saying that these things were frequent, but the risk of error was always there.

Continuing, Mr. Silverman emphasized that his Bill dealt only with the penalty for murder and not with treason, which must remain outside the normal scope of the criminal law, and that it made no exceptions of any kind. To many persons the idea of limiting the death penalty to what could be loosely called the "worst murders" was an attractive one, but it had been common ground on both sides in the discussion of Feb. 16 that no such distinction was reasonably practicable. Nor did the Bill attempt to define an alternative. Certain criticisms had been made that life imprisonment meant, in fact, only a relatively short term of nine, 10, or 11 years, and it had been asked if this was sufficient. The rule under which life imprisonment became eight, nine, 10, or 11 years, however, had no statutory authority; it was an administrative practice only, and no doubt administrative practice would be adapted to the new circumstances if the Bill became law.

An amendment would be introduced to ensure that the Bill did not apply to Northern Ireland—not because the circumstances were any different, but because it had never been the practice of the House of Commons since the Northern Ireland Parliament was established to interfere with the transferred functions, of which the administration of justice was one.

In conclusion, Mr. Silverman expressed the opinion that there was hardly a member of the House who did not in his heart believe that this reform was now inevitable, and that if it did not come immediately it would come very soon. When and if the Bill became law, Mr. Silverman concluded, "it would at least place Britain proudly in the van of progress and take Britain and the world one step, and a modest one, nearer to a saner, happier, more cheerful, rational, and civilized human society."

Mr. Montgomery Hyde (Ulster Unionist), seconding the Bill, expressed regret that the Government had not carried out the terms of the motion of Feb. 16, and appealed to Conservative members who had previously voted in favour of abolition not to be swayed by any "momentary clamour." He believed that it was better to make a convicted murderer work in prison to support the relatives and dependants of his victim, as was the practice in Sweden, than to take his life. The most weighty evidence against the death penalty was to be found in the experience of the countries which had abolished it—countries which included every democratic State in Europe with one exception, and States in other parts of the world, among them Israel.

Sir Robert Grimston (C.), moving the rejection of the Bill, opposed it on three grounds: (1) while he favoured some amendment to the law of murder, he believed that capital punishment should be retained as a unique deterrent to professional criminals; (2) no attempt was made to deal with the problems arising from the abolition of capital punishment; (3) public opinion was against abolition. **Colonel Crosthwaite-Eyre** (C.), seconding, said that the first duty of the House was to look after public safety, and any amendment to the present code of public safety must be justified by those who opposed it and not by those who said that it should be retained.

Major Lloyd-George (then Home Secretary) reaffirmed the Government's view that capital punishment was a unique deterrent, particularly in the case of professional criminals. It was significant that the homicide rate per million of population in England and Wales, was four and in Scotland 2.7, the lowest of any of the countries mentioned in the Royal Commission's report. The only abolitionist country comparable with Britain was Belgium, where the convictions for murder per million of population between 1930-39 were 2.4, whereas the figures for England and Wales and for Scotland were 0.49 and 0.14 respectively. The House should think carefully before removing what he still believed was a deterrent to this crime, particularly at a time when crimes of violence were on the increase. The number of crimes of violence known to the police, which before the war had averaged about 2,700 a year, had risen to 4,600 in 1946 and to over 8,000 in 1954.

The Home Secretary said that he had yet to learn how, in the absence of the death penalty, those who advocated abolition would propose to deter a criminal from killing to avoid capture if the criminal knew that if he were caught he would be sent down for life or get 14 years' preventive detention. The House should also consider the position of prison officers, as a man who was already serving such a sentence would have little or nothing to lose by committing another murder in prison.

Many members were under the impression that because reprieved murderers were at present released after nine, eight, or seven years' imprisonment, this would also happen if imprisonment took the place of execution. That, however, was not so. Many of those who were now reprieved were reprieved because of extenuating circumstances, but if one looked at the record of those who had been executed one could see that there would have been no question of a release after nine years. Abolitionists should therefore consider the gradual deterioration of a man who knew that he was to be kept in strict confinement for the rest of his days, without any hope of eventual release.

In conclusion, Major Lloyd-George said that suspension of the death penalty was the wrong way to tackle the problem, as the normal fluctuations of murder-rates were such that it would be impossible to base any conclusions on the experience of 10 years. Nothing had altered the Government's opinion that, while the law of murder should be amended, the death penalty should be retained.

Members speaking in favour of the Bill included **Mr. Greenwood** (Lab.), **Mr. de Freitas** (Lab.), **Mr. Keegan** (C.), **Mr. Benson** (Lab.), and **Sir Beverley Baxter** (C.). Opponents of the Bill, several of whom supported the amendment of the existing law, included **Mr. Logan** (Lab.), **Mr. Rawlinson** (C.), **Sir Victor Raikes** (C.) and **Mr. Simon** (C.).

Sir Robert Grimston's amendment was rejected by 286 votes to 262, and the Bill was read a second time. In the division on the amendment 237 Labour members, 47 Conservatives, and four Liberals voted for the Bill (including tellers), while 256 Conservatives and eight Labour members (including tellers) voted against.

The Committee and Report Stages.

During the committee and report stages numerous amendments were put forward, all of which (except that excluding Northern Ireland from the scope of the Bill) were rejected except an amendment by Sir Hugh Lucas-Tooth to retain capital punishment for murders committed by persons already serving sentences of life imprisonment. This amendment, however, though adopted by a majority of four votes on May 16, was subsequently deleted on June 28. The various amendments proposed are summarized below:

(1) That the death penalty should be retained where the killing was a deliberate and calculated act. Moved by **Mr. Turner-Samuels** (Lab.). Rejected by 246 votes to to 226.

(2) That a convicted person should be sentenced "to be detained during Her Majesty's pleasure," instead of to imprisonment for life. Moved by **Viscount Hinchingbrooke** (C.). Amendment subsequently withdrawn.

(3) That the death penalty should be retained for offences for which it was prescribed by the Army and Air Force Acts and the Naval Discipline Act. Moved by **Mr. Rees-Davies** (C.). Rejected by 223 votes to 203.

(4) That the death penalty should be retained for a murder committed by a person previously convicted of murder. Moved by **Mr. Rees-Davies.** Amendment subsequently withdrawn.

(5) That sentence of life imprisonment should not be passed on a person who, though not insane, was suffering at the time of the offence from mental weakness, or abnormality bordering on insanity, to such an extent that his responsibility was substantially diminished. In such a case, in accordance with the existing practice in Scotland, the accused should be ordered to be kept in custody during Her Majesty's pleasure. Moved by **Mr. Simon** (C.). Amendment subsequently withdrawn.

(6) That the death penalty should be retained for murder committed by an armed person while engaged in robbery or burglary. Moved by **Sir Hugh Lucas-Tooth** (C). Rejected by 217 votes to 205.

(7) That the death penalty should be retained for murder committed by a person already serving a sentence of life imprisonment. Moved by **Sir Hugh Lucas-Tooth.** Adopted by 198 votes to 194 but subsequently withdrawn as stated above.

(8) That the death penalty should be retained for the murder of children. Moved by **Mr. John Eden** (C.). Rejected without a division.

(9) That the death penalty should be retained in cases where the offender was convicted of the murder of a police officer with intent to escape from custody or to avoid arrest. Rejected by 160 votes to 129.

(10) That Scotland should be excluded from the scope of the Bill. Moved by **Major Anstruther-Gray** (C.). Rejected by 213 votes to 151.

(11) That the Bill should not apply to Northern Ireland. Moved by **Mr. Montgomery Hyde** (U.U.). Amendment adopted.

(12) That the death penalty should be retained for murder in furtherance of rape. Moved by **Sir Victor Raikes** (C.). Rejected by 166 votes to 124.

(13) That any male convicted of murder should be liable to whipping in addition to any other punishment. Moved by **Mr. Arbuthnot** (C.). Rejected by 187 votes to 58.

(14) That the courts should have discretion to impose a lesser sentence than life imprisonment. Moved by **Mr. Simon** (C.). Rejected without a division.

(15) That the death penalty should be retained for offences on active service for which it was prescribed by the Army and Air Force Acts and the Naval Discipline Act. Moved by **Mr. Rees-Davies.** Rejected by 168 votes to 140.

During the Report stage (June 28) **Sir Hugh Lucas-Tooth** stated that he did not wish to move an amendment, of which he had previously given notice, substituting a revised wording for his proviso which had been adopted on May 16 [see (7) above]. The Speaker rejected a request by **Mr. Silverman** to be allowed to move a manuscript amendment for the deletion of the proviso, but pointed out that it was in order for any Member to move any amendment which appeared on the order paper. Mr. Silverman accordingly moved the amendment in the name of Sir Hugh Lucas-Tooth, stating that he did so because he wanted to delete the proviso and put nothing in its place. The first part of the amendment, deleting the proviso, was carried by 162 votes to 139, whilst the second, to insert the revised wording, was rejected by 158 votes to 133.

The Bill was given a third reading by the House of Commons on June 28, 1956, the vote being 152 in favour and 133 against.

House of Lords' Rejection of Death Penalty (Abolition) Bill. - The House of Lords' Debate.

After a two-day debate (July 9-10, 1956) the House of Lords rejected the Death Penalty (Abolition) Bill on second reading by 238 votes to 95 (a majority of 143) in one of the largest divisions seen in the House in recent years. All the 11 bishops present, with the exception of the Bishop of Rochester, supported the Bill. [The clause of the Criminal Justice Bill suspending the death penalty had been rejected by the Lords in 1948 by 181 votes to 28, a majority of 153.]

The Bill was moved in the House of Lords by Viscount Templewood (formerly Sir Samuel Hoare), a former Home Secretary and Foreign Secretary and a prominent opponent of capital punishment.

Viscount Templewood said that since 1948 there had been " very substantial changes in public opinion " which had shown itself in the House of Commons, in the Home Office, and in judicial circles. He summarized the case for Mr. Silverman's Bill under five heads :

(1) The existing law of murder was " most evasive and sophistical " because it included every kind and variety of culpability, and it would be manifestly unjust to apply the death penalty in every case. Many people had recommended changes in the present system, but all these recommendations had been found by the Royal Commission to be either unacceptable or not to touch the real centre of the problem. Means outside the Statute Book had to be found for mitigating the law, such as the frequent use of the Royal prerogative or frequent recourse to the M'Naghten Rules. As long as the death penalty remained there would have to be these various evasive methods for mitigating it ; and with every one of them the deterrent power of the death penalty, for what it was worth, would be diminished.

(2) It could not be shown that the death penalty was an essential deterrent against murder. The Royal Commission had examined the evidence from abolitionist and retentionist countries, and had reached the unanimous conclusion that the presence or absence of the death penalty had no effect on murder-rates.

(3) An execution was a horrible and repulsive act, and could only be justified if it was essential to the security of the State.

(4) If the death penalty were abolished, an effective deterrent existed in life imprisonment. The Home Office and the Prison Commission had categorically stated that there was no insuperable difficulty in dealing with the small number of very dangerous criminals who would be condemned to life imprisonment.

(5) The death penalty being irreversible, there was always the chance of an irrevocable mistake.

Lord Templewood admitted that feeling in the police was strong against abolition, but pointed out that there was no evidence to show that the police in abolitionist countries were any less safe than they were in retentionist countries. If the police forces could be brought up to full strength, the great deterrent against murder—certainty of detection—would be far stronger. Prison officers, he admitted, felt strongly that if the death penalty were abolished there would be no further penalty with which to deter a murderer serving a life sentence. He did not accept that view, however, believing that the hope of liberty was a deterrent even with the most hardened criminals.

" I am aware that there is very vocal opinion in the general public against abolition," Lord Templewood continued. " The case is that they have not been consulted. When they have been asked in a Gallup Poll whether they were in favour of capital punishment, they have said ' Yes.' This Bill therefore, so the argument goes, should not be pressed. I do not accept this conception of the duties of Parliament. If it were applied to every controversial question, parliamentary government would become impossible. If it had been applied in the past to every important penal question, there would have been none of the penal reforms of the last century that are now regarded as necessary and beneficial." He was much more impressed by the fact that in two Parliaments, the first with a Labour majority and the second with a Conservative majority, the House of Commons had voted definitely in favour of abolition.

The House of Lords (Viscount Templewood concluded) had its constitutional part to play. It provided an opportunity to discuss and decide difficult questions in an atmosphere less disturbed and emotional than in the Commons ; an opportunity in which the evidence could be weighed and a decision reached unaffected by the fear of an election or of popular resentment. It was in this spirit that he asked the House to give a second reading to " a Bill that abolishes a repulsive punishment, upholds the standards of a civilized society, and endangers the security neither of the State nor of the private citizen."

The Lord Chancellor (Viscount Kilmuir) said that the Government held " clearly and unequivocally " to the view that capital punishment must be retained. The final object of punishment must be to reduce crime ; in dealing with cases involving imprisonment or probation, reform came first, but retribution and deterrence were not to be ignored in certain cases of murder. The real crux of the question was whether capital punishment was a uniquely effective deterrent. The abolitionists were no doubt entitled to say that statistics did not prove that it was, but the number of murders which had not been committed could never be shown in statistics. The number of murders known to the police in England and Wales, and even more so in Scotland, had been consistently lower than in all other countries, and he would hesitate for a long time before assuming that capital punishment had nothing to do with it.

Emphasizing the danger that the criminal classes might arm themselves much more extensively than at present if capital punishment were abolished, Lord Kilmuir observed that he knew of no country comparable to Britain which had abolished the death penalty and had unarmed its police. Unarmed police were a part of the British tradition, and he would be loth to see it otherwise. The penalties for committing offences while armed were already as high as could be justified, and there was really no scope for increasing them.

After denying that there was a practical possibility of an innocent man being hanged, Lord Kilmuir said that it was the Government's duty to see that citizens were not subjected to armed assault or armed burglary, and that prison officers and the police did not go in peril of their lives. There were still far too many crimes of violence in Britain, and he did not believe that the time had come for relaxing the safeguard. A decision to abolish the death penalty for murder in Britain would also have disastrous consequences in Kenya, Malaya, and Cyprus. The Government considered the Bill to be " an unwise and dangerous measure, whose presence in the Statute Book would be a disaster for the country and a menace for its people."

Lord Pethick-Lawrence (a Labour peer) maintained that the Lord Chancellor's contentions did not rest on any evidence, but on opinion. In countries which had abolished the death penalty there was no evidence whatsoever that the number of burglars who committed murders had increased.

Viscount Malvern (then Prime Minister of the Central African Federation) expressed disquiet lest, if the Bill became law, it might be imposed on overseas territories which were certainly not yet ripe for total abolition. These territories were often used as " a kind of guinea-pig for trying out social experiments," and therefore he was most anxious to see that the Bill did not become an Act of Parliament.

The Archbishop of York (Dr. Ramsey) announced his intention of voting for the Bill, whilst dissociating himself from certain of the assumptions which had entered into some of the propaganda on its behalf. One was that it was progressive and Christian if they could gradually eliminate the element of retribution from punishment and let the idea of the reformation of the criminal hold the entire field. Murder had to be punished, the penalty must be severe, and it must have attached to it a certain moral dignity as the answer of a community repudiating a horrible crime.

These considerations (Dr. Ramsey continued) had long been balanced by considerations that the State, by taking life as a penalty for murder, was not contributing to the sense of the sanctity of human life among the public as much as it would be if it refrained from taking life. The abolitionist case was far the stronger because the death penalty no longer had the moral dignity of representing, in an absolutely sure and certain way, the will of the community to inflict an unspeakable penalty for an unspeakable crime. What was the use of saying that hanging was an unspeakable penalty for an unspeakable crime "when for periods on end a section of the Press prevented the public from thinking of aught else and discouraged them from speaking of aught else?" It was the concomitants and factors surrounding the death penalty which had brought him to the conclusion, after balancing views each of which had moral cogency, that it would be for the good of the country if the Bill became law.

Viscount Hailsham spoke against the Bill, but appealed for a more generous and imaginative use of the Royal prerogative. **Lord Brabazon** said that the statistics in the Royal Commission's report had "shot to pieces" the case for capital punishment as a deterrent; he was shocked at the way in which the Royal prerogative had not been used in the case of crimes which were really due to abnormalities and not to criminal acts.

The **Bishop of Exeter** (Dr. Mortimer) said that there was a public unease that some persons were hanged for murders for which they were not fully responsible, or for murders which were not in any ordinary sense of the word premeditated. To impose life sentences on murderers would be running the risk of exposing them to deep spiritual corruption, and therefore it was a corollary of the Bill that urgent reforms in the prison system should immediately be set in hand. Instead of inculcating into the community reverence for the sanctity of human life, the death penalty depreciated the sanctity of human life in the mind of the ordinary man.

Lord Keith of Avonholme (a Lord of Appeal), speaking in support of the Bill, denied that judges were more qualified to decide on the question, which was primarily a social rather than a legal one, than any other member of the House. **Lord Ailwyn** said that he would like to see the prerogative of mercy used more sparingly, and the common law altered to make rape, criminal assaults, revolting cruelty to children, and brutal and savage attacks on the aged and defenceless punishable by death.

Lord Russell of Liverpool, who recalled that during the war it had been his task to advise military commanders on murder trials, said that he was a comparatively recent convert to the abolitionist view. After pointing out that three or four former Home Secretaries had changed their views, as had also Sir Ernest Gowers, the chairman of the Royal Commission on Capital Punishment, Lord Russell said that he shared Sir Ernest Gowers' view that "so far from the sentimental approach leading into the abolitionist camp and the rational approach leading into the retentionist camp, it is the other way round." It was not possible to say with certainty, he added, that no innocent person had been executed. Within the last 10 years there had been two cases about which it was impossible to say that the courts would have convicted the two men had they been in possession of evidence which came to light only after they had been executed.

Lord Mancroft (then Under-Secretary, Home Office) drew attention to the fact that at present one policeman was murdered on the average every 2½ years. Was the House sure that if capital punishment were abolished, the number would not be higher? If the Bill were passed, the number of persons serving life sentences would include many more men with a tendency to violence. Were they sure that there would not then be a greater risk of prison officers being subjected to murderous assaults?

The Bishop of Chichester (Dr. Bell), referring to the change in public opinion, observed that whereas in 1930 the late Archbishop Temple was the only bishop known to favour abolition, and in the 1948 debate the speakers from the episcopal bench were three to one against abolition, today he thought it would be found that, for different reasons, all the speakers from this bench were in favour of abolition. He hoped that the House would agree to abolish the death penalty as "no longer tolerable in a civilized State."

Viscount Astor expressed the view that, of all the murderers executed, 50 per cent had had some trace of mental abnormality in their histories. It was said that every benefit of the doubt was given, yet in a five-year survey covering 85 cases, 14 murderers who had been recommended for mercy by the juries were none the less hanged. Before corporal punishment was abolished, a great weight of judicial opinion had said that there would be an increase in robbery with violence and in armed robbery if such action were taken; yet in April last the Home Secretary had said that there had been a steady decrease in the number of such offences known to the police.

The Bishop of Manchester (Dr. Greer) said that he believed that for those taking part in the actual hanging "it hardens all within and petrifies the feeling." So far from saying that they should retain the death penalty because of the prison officers, he believed that they should abolish it because of the prison officers. Hangings undoubtedly had an evil effect on the prison, on the prison officers, and on the prisoners. The "morbid thrill and horror" disseminated by a section of the Press concentrated the attention of pathological, morbid, and semi-criminal types on the whole question of murder, and actually increased rather than decreased the chances of murder.

Lord Goddard (the Lord Chief Justice) said that in all the leading English cities the police were from 15 to 25 per cent under strength, and he had it on the authority of the Chief Constable of a county that he had never known a time when so many of his officers were taking out life insurance policies. The Prison Service was also seriously undermanned. Was this, he asked, a time to remove from the police and the Prison Service what they believed to be their main protection against attack? If the Bill was enacted it would encourage resignations from the police and make recruitment more difficult.

Claiming that his prophecy that the abolition of corporal punishment would encourage violence had been fulfilled, Lord Goddard pointed out that although crime generally had fallen by 21 per cent since 1951, crimes of violence had increased from 2,504 in 1948 to 4,584 in 1954. Sexual crimes, which often led to violence, had also increased. He agreed that the presence or absence of capital punishment would not affect certain forms of murder, but he believed that "the fear of the rope" was a very great deterrent.

If the Bill was passed, Lord Goddard declared, judges would not be able to give any greater punishment for deliberate murder than they could at present give for burglary, for breaking into a church, for forgery of a will, or for feloniously wounding. In a recent case an armed robber had deliberately aimed low when firing at a policeman who tried to arrest him, because he knew what the consequences would be if he killed the policeman. "These instances," he added, "make me say with all the earnestness I can command: Do not gamble with the lives of the police."

"How is it possible for the law to be a deterrent, or for there to be deterrence in arrest," Lord Goddard asked, "unless there is an element of retribution also in the punishment that is to be given? Why is it wrong, I ask, to avenge criminal conduct? Why is it wrong for a civilized country to say they will avenge criminal conduct? I believe it is a sign of a healthy conscience in a country if they are determined to avenge murder. Once they begin to palter with that sentiment, then crime will increase."

The Lord Chief Justice concluded: "I believe the law of murder can be and ought to be amended in many respects. No judge likes passing sentence of death in a case in which he knows quite well that the penalty will not be carried out. I think there are many amendments which may be made to the law relating to provocation and to implied malice. These are matters which ought to be taken in hand; and I believe that if they were, any public uneasiness on any of these questions would be greatly assuaged."

The **Archbishop of Canterbury** (Dr. Fisher) said that he accepted the doctrine of the Church that the State was right in the name of God and society to impose the death penalty. He profoundly disagreed with those sincere but mistaken people who regarded the death penalty as something always unchristian and wrong, and if he voted for the Bill it would be in spite of them and for different reasons. He found it very difficult to give a vote which would appear to support the continuance of the present system unchanged, for he believed it to be too clumsy to continue as it was in an age when scientific accuracy was the primary requirement. Expressing the view that abolition of the death penalty would not increase the number of murders, Dr. Fisher said the rise in crimes of violence referred to by Lord Goddard was in itself an argument against the effectiveness of the death penalty as a deterrent.

The death penalty (the Archbishop continued) was no longer clearly and decisively "the voice of the community bearing its witness purposefully, deliberately, and prayerfully to the solemn laws of society and God." It had become instead a matter of controversy and had lost its power; and neither a change of majority in the House of Commons, nor the overruling of the Commons by the Lords, could restore to the penalty the moral value it should possess. Only general agreement on a reasonable adjustment of the system could do that. If what he had said was not enough, those organs of publicity which drowned murders and hanging in a flood of emotional and sensational exploitation had robbed the system as it stood of its proper dignity and sense of eternal worth.

There seemed to be afforded to the House a real opportunity of retaining the true place of the death penalty in the moral order of society which would remove some of its obvious and more clumsy or dangerous aspects which were specially open to criticism. It might be impossible to introduce degrees of murder, but he was sure it was possible to introduce categories of murder for which the death penalty should remain, with all the uncertainties removed and the need for reprieve almost totally abolished. "There are murders committed against society itself in the person of its appointed guardians—the murder of a policeman or a warder. There are murders which show deliberation and premeditation and some preparatory act—certainly when the murderer is carrying arms or lethal weapons, possibly where the murderer uses poison, perhaps where it can be shown that over a period of time the murder has been planned or plotted. Any category that is capable of this exact definition can be included as liable to the death sentence."

Dr. Fisher concluded: "I cannot simply vote to retain the present system. I cannot vote for its abolition. I shall vote for the Bill, hoping earnestly and believing that if it is given a second reading it will certainly be amended in this House."

Viscount Waverley (formerly Sir John Anderson, onetime Home Secretary) observed that by giving the Bill a second reading the House would be accepting the principle of total abolition, which he unhesitatingly rejected. He would be glad, at a suitable opportunity, to see the law amended but he believed that there were technical reasons why they could not use the present Bill as a vehicle for amending the present law.

Viscount Samuel said that he could not accept either the Lord Chancellor's advice to throw out the Bill with no alternative policy to suggest, or Lord Templewood's plea to pass it. Nor could he accept the view that the Bill should be passed and then amended. He was therefore in "the somewhat ignominious position of being compelled to abstain from voting."

There had undoubtedly been a swing of public opinion towards the abolitionists in recent months. He believed that this was due largely to three cases where a reprieve was refused, and in which the executions that took place were unwelcome to a large section of conscientious people. He therefore suggested that they should extend the application of the Royal prerogative. The Home Secretary could bear in mind factors in any individual case which, although not legal evidence, related to the personality of the criminal and to all the circumstances of the case which could not be defined in any statute. This would reduce the number of executions, while still keeping the deterrent power in reserve.

The **Marquess of Salisbury** (then Lord President of the Council) said that it was not the judges, the police, the warders, or any other limited section of the population who should finally decide great questions of this kind, but the British people. Such evidence as he had—and it came from the largest post-bag he had received for many years—was all against the Bill. Where issues had not been before the electorate, they had to regard it as their function to give a breathing-space to enable public opinion to crystallize. The question of the death penalty had not been before the electorate at the last or, as far as he knew, at any other general election.

There were very strong arguments in favour of amending the law of murder, as had already been clearly recognized by the Government. He agreed very much with what had been said on this point by the Archbishop of Canterbury, and the Government would give every attention to all the points made by the Archbishop and the Lord Chief Justice. He would also put before his colleagues Viscount Samuel's proposal that the Home Secretary's discretion in matters of this kind should be unfettered. He felt that such means were much more likely to bring a satisfactory solution than any attempt to pass the second reading of the present Bill and then "try to tinker about with it in the committee stage." If the House accepted the second reading they would be regarded as having accepted the principle of absolute abolition, which many of them rejected.

Lord Silkin, replying for the supporters of the Bill, said that if it were rejected it would undoubtedly come before them again, if the House of Commons remained of the same mind. The Lords would then be compelled to accept it. It would be ignominious if, for the first time, the provisions of the Parliament Act were invoked in connexion with a measure which should be carried with the general good will of Parliament.

Other speakers in support of the Bill included Lord Layton, Lord Rea, Lord Wise, the Earl of Huntingdon, Lord Milner of Leeds, Lord Sherwood, Lord Moynihan, Lord Dowding, Lord Merthyr, Lord Raglan, Lord Darwen, Lord Craigmyle, the Earl of Haddington, Lord Mathers, the Earl of Listowel, Viscount Stansgate, and Lord Pakenham. Speakers opposing the Bill included Lord Conesford, the Earl of Glasgow, Lord Webb-Johnson, Lord Oaksey, Lord Clitheroe, Lord Milverton, Lord Chatfield, Earl Ferrers, Lord Tweedsmuir, Lord Elton, Lord Lucas of Chilworth, Lord Teviot, Lord Haden-Guest, Lord Morris, Earl Winterton, Lord Teynham, the Earl of Mansfield, and Lord McCorquodale.

After the Bill's rejection by the House of Lords, Sir Anthony Eden (then Prime Minister) told Mr. Silverman that the Government were considering the whole question of capital punishment, and promised to make a statement before the session ended. On Oct. 23 Sir Anthony announced that the Government had legislative proposals in preparation which would be laid before the House early in the next session, and that any new abolition Bill which might be introduced would be "subject to the usual rights and opportunities of private members of this House." This announcement was challenged on constitutional grounds both by Mr. Gaitskell (leader of the Labour Party), who suggested that it was the Government's duty under the provisions of the Parliament Act to facilitate the introduction of a Bill on the same lines as Mr. Silverman's Bill, and by Mr. Clement Davies, then leader of the Liberal Party. Sir Anthony Eden replied, however, that in view of the appeals made in the Lords, the Government was trying to find a measure which would command general agreement.

The Homicide Bill.

The Government's legislation—the Homicide Bill—was published on Nov. 8, 1956. It restricted the death penalty to five forms of murder, known as "capital murder," and to "repeated murder," and introduced a number of other amendments to the law of murder, most of which were in accordance with the recommendations of the Royal Commission on Capital Punishment. The Bill, summarized below, was divided into four parts corresponding to the four sections introduced by cross-headings:

Amendments to the Law of Murder. (1) Where a person killed another in the course or furtherance of some other offence, he would be guilty of murder only if he were proved to have acted with express or implied malice aforethought. [This clause abolished the doctrine of "constructive malice," in accordance with a recommendation of the Royal Commission—see page 13329, second column.]

(2) A person suffering from an abnormality of mind—whether arising from a condition of arrested or retarded mental development, or any inherent causes, or induced by disease or injury—which substantially impaired his mental responsibility for his acts would be liable to be convicted of manslaughter instead of murder. [This clause introduced into English law the Scottish doctrine of "diminished responsibility."]

(3) Where there was evidence on which the jury could find that the accused was provoked to lose his self-control, they would take into account everything both done and said to decide what effect it would have had on a reasonable man, and on the basis of this would decide whether the provocation was sufficient to justify a verdict of manslaughter. [This clause was in accordance with the Royal Commission's recommendation that words alone might constitute sufficient provocation to justify such a verdict.]

(4) The survivor of a "suicide pact" would be guilty of manslaughter but not of murder. [This clause went beyond the Royal Commission's recommendation on the subject, which was that "if the survivor of a suicide pact himself killed the other party, he should remain liable to be convicted of murder."]

Liability to the Death Penalty. (5) The following categories of "capital murder" would remain liable to the death penalty: (*a*) murders committed in the course or furtherance of theft; (*b*) murders by shooting or causing an explosion; (*c*) murders in the course of resisting arrest or escaping from legal custody; (*d*) murders of police officers in the execution of their duty, and of persons assisting them; (*e*) murders by prisoners of prison officers and of persons assisting them. Where two or more persons were guilty of a murder under one of these categories, it would be capital murder only in the case of the person who actually killed or used force on the victim in the course of an attack.

(6) The death penalty was retained for persons convicted of two murders committed in Great Britain on different occasions.

(7) The sentence for all other types of murder would be imprisonment for life.

(8) Persons under 18 at the time of the offence would be liable only to detention during Her Majesty's pleasure, and not to the death penalty or life imprisonment.

(9) A person found guilty of murder by a court-martial, whether sitting at home or overseas, would not be liable to the death sentence unless he had committed the offence in circumstances which, had it been committed in England, would have made him guilty of capital murder.

Form and Execution of the Death Sentence. (10) The death sentence would state that the prisoner was to "suffer death in the manner authorized by the law," but would not refer to the manner of execution and the place of burial.

(11) Notices of execution would no longer be posted outside the prison where the execution took place. Instead, the Home Secretary would publish the time and place fixed for an execution, and the fact that it had taken place. [These two clauses were in accordance with the Royal Commission's recommendations.]

(12) Double executions would no longer take place, even when two persons were under sentence of death in the same prison at the same time.

Changes in Scottish Law. (13) An Act of 1829 under which the capital sentence could be imposed in Scotland for attempted murder in certain circumstances was repealed.

(14) The period between the death sentence and the date of execution, which had hitherto varied according to whether the murder was committed north or south of the Forth, was fixed at 15 to 21 days.

Part I of the Bill (relating to amendments of the law of murder) did not apply to Scotland, where the doctrine of "constructive malice" is unknown, the doctrine of "diminished responsibility" is already established, and the law relating to provocation and suicide pacts differs from that in England. Only the provisions relating to courts-martial applied to Northern Ireland.

Passage of Homicide Bill through House of Commons.

The Homicide Bill was given an unopposed second reading by the House of Commons on Nov. 15, 1956.

Major Lloyd-George, opening the debate, said that the Government had taken the view throughout that capital punishment was essential as a safeguard to law and order. People feared that if the deterrent which restrained criminals from carrying weapons was removed, they would be exposed to attacks by men who would have little to lose by adding murder to their crimes. With crime, and particularly violent crime, at its present level, how could they say these fears were groundless? In the Government's Bill the use of the death penalty was limited to the minimum, but its deterrent power could still be brought to bear where it could make its necessary contribution to maintaining law and order.

Most people, he believed, did not favour abolition, but nevertheless there was uneasiness about the scope of the death penalty, and a desire that it should be limited. There were two ways of making the law correspond more closely with public opinion. The first was to leave the law as it was and to make greater use of the Royal prerogative of mercy. This course was unacceptable to many people who thought that the Executive should not interfere with the decision of the courts save in the most exceptional circumstances, and that people should not be sentenced to death if the sentence was not to be carried out. The second course was to amend the law, and it was this course which the Government were adopting.

The Bill approached the problem in two ways. It amended the English law of murder so that some homicides which were at present murder would in future be manslaughter; and it limited capital punishment for murder to those crimes which most clearly struck at the maintenance of law and order, substituting life imprisonment as the punishment for the remainder. Homicides about which public opinion had been uneasy would be taken out of the category of murder. Capital punishment would thus be confined to murder by professional criminals; murder of the agents of law and order; murder by shooting or causing an explosion - methods particularly associated with gang warfare and political terrorism; and murder by a man who made a practice of murder.

The effect of these proposals was to reduce substantially the number of people who would be convicted of murder, the number of those convicted who would be sentenced to death, and, in consequence, the number executed. It had been estimated that the effect would be to reduce the number of capital sentences passed in England and Wales by about three-quarters. Over the last 55 years the average number of executions a year had been 13, and under the Bill it would be about four.

Major Lloyd-George emphasized that the Bill did not create two degrees of murder, nor did it attempt to reduce the gap between the number sentenced to death and the number executed by making the operation of the law coincide with the operation of the Royal prerogative. This was impossible, because the moral test applied by exercise of the Royal prerogative could not be applied by statute. If the law could not draw moral distinctions—and the prerogative, in the view of many, ought not to do so—the Government saw no alternative but to seek some other principle on which to base the desired reduction in the scope of the death penalty. They had rejected the idea that discretion should be exercised by a judge or jury. The principle they had selected was that of limiting capital punishment to the minimum essential for the maintenance of law and order.

The introduction into English law of the doctrine of "diminished responsibility" would provide a defence for those who, although not insane within the meaning of the M'Naghten Rules, were regarded in the light of modern knowledge as insane in the medical sense, and those who, though not insane in other senses, were seriously abnormal, whether from mental deficiency, inherent causes, disease, or injury. It was not intended to provide a defence for persons who were merely hot-tempered or those who, while otherwise normal, committed murder in a sudden access of rage or jealousy.

The retention of the death penalty for repeated murder was intended to deal with the professional or habitual murderer, such as George Smith, of the "Brides in the Bath" case, Haigh, and Christie. It also provided a safeguard against a second murder by a murderer whose first offence was not capital and who was ultimately released from prison.

"We have done our best to meet those who are dissatisfied with the present state of the law and to remove those blemishes in the law which disturb public opinion," Major Lloyd-George concluded. "The Bill will not commend itself to those who, on grounds of conscience, oppose capital punishment in any circumstances. But there are others who believe as I do. A very large number, I would say a majority, while opposed to abolition, feel that there should be some amendment of the law. This measure deserves their whole-hearted support."

Mr. Greenwood (Lab.) said that the Opposition believed that in many respects the Homicide Bill constituted a considerable step forward. While they would seek to improve it in committee, they would give most of it their support. The Labour Party as a whole would support the second reading, whether as individuals they were for or against capital punishment, but they proposed to allow Opposition members to have a completely free vote during the committee and report stages on Clauses (5), (6) and (7). He hoped that the Government would follow a similar course.

Mr. Silverman said that whereas the House had had a chance of ending the controversy, the new Bill "deliberately set out to reopen it," and, he alleged, was nothing but an elaborate device by the Government to circumvent the Parliament Act. The Home Secretary should make up his mind whether he accepted the deterrent effect of the death sentence or rejected it. If he rejected it, he must reject it for all forms of murder; if he accepted it, he must accept it for all forms of murder.

After declaring that every man and woman who was in future hanged would be "executed in defiance of the wishes of the House of Commons," Mr. Silverman addressed the Home Secretary as follows: "Your distinguished father [the late Earl Lloyd-George] could have told you that if Governments in this country needed to have a majority in the House of Lords, there could never be in this country any Government but a Conservative Government. That is why, under the initiative of your father, the Parliament Act was passed in 1911 to achieve that, where there is a conflict such as there is now between the two Houses, the House of Commons . . . is entitled to prevail." In the Bill, Mr. Silverman concluded, the Government was "preventing the will of the Commons from prevailing."

Sir Lionel Heald (C.), a former Attorney-General, believed that the omission of poisoning from the categories of capital murder was a mistake; **Mr. Willis** (Lab.) said that the categories of murder covered by the Bill were not necessarily those which caused the greatest public outcry, nor did they reflect the opinion of those who wished to retain the death penalty; and **Mr. Rees-Davies** contended that the law of murder should be reformed first, and after a period of five or seven years it might or might not be possible to consider ending the death penalty altogether. **Sir Alexander Spearman** (C.) also observed that as a substantial number of people did not want the death penalty abolished at present, "it was no bad thing to move towards abolition in instalments, particularly when they were offered so substantial an instalment" **Mr. Freeth** (C.) suggested that rape followed by murder should be added to the categories punishable by the death penalty.

Mr. Montgomery Hyde (U.U.) observed that the Bill embodied in legislative form the motion moved by the Home Secretary on Feb. 16, 1956, which had been decisively defeated on a free vote. He would not oppose the second reading of the Bill because three-quarters of it, particularly that part relating to the amendment of the law of murder, was desirable and had been recommended by the Royal Commission, but when it went to committee he would not support Part II. In particular, he would oppose "line by line" Clauses (5) and (6), which retained the death penalty for offences which had been "selected arbitrarily and haphazardly," and which seemed to be "a tissue of illogicalities and absurdities." He would, indeed, have preferred the old system whereby the full rigour of the law was mitigated by the Home Secretary, exercising the Royal prerogative of mercy.

Mr. Paget (Lab.) said that the Bill made "some useful, desirable, and much overdue alterations in the definition of murder, and some very bad and illogical alterations in the consequence of murder." The real purpose of Part II, he alleged, was not to reduce the incidence of the death penalty, but to retain it and to defeat the Silverman Bill. It was not a compromise designed to satisfy the House but "to satisfy the local Tory parties and defeat the Parliament Act."

Sir Reginald Manningham-Buller (Attorney-General), replying to the debate, denied that the Government had not honoured their undertakings, or that they had attempted to distinguish between different types of murder. They had sought to restrict the categories of murder for which the death penalty was to be imposed as narrowly as possible, having regard to present requirements. The suggestion of a "sinister plot involving the Parliament Act" was devoid of any foundation. The Government put forward this Bill as a serious and important measure, and they regarded the clauses stipulating the death penalty for certain murders as an important section.

Poisoning had presented much trouble, he continued. In most poison murder cases there would almost certainly be a reprieve, but at the other end of the scale there were poison murders which revolted the public conscience. It was difficult to draw a distinction between the deliberately brutal poison murder and others; if it could be made, the poison cases that would remain capital would, judging by past experience, be few in number. The Government would consider what had been said, but that did not mean that the Government would be prepared to accept an amendment to include poison murders in the category of capital murder.

Committee Stage and Third Reading in Commons.

During the committee stage all the amendments proposed details of which are given below—were rejected or withdrawn.

(1) That the reference to killing "in the course or furtherance of some other offence" should be omitted, and that Clause (1) should read: "Where a person kills another the killing shall not amount to murder if the killing be unintentional." Moved by **Mr. Paget.** Rejected by 255 votes to 194.

(2) That the phrase "express or implied" in relation to malice aforethought in killing should be omitted from Clause (1). Moved by **Sir Frank Soskice** (Lab.). Rejected by 232 votes to 176.

(3) That a person suffering from an abnormality of mind, however arising, which substantially impaired his mental responsibility for his acts, should not be liable to be convicted of murder. Moved by **Mr. Silverman.** Rejected by 209 votes to 157.

(4) That the onus of proving that an accused person was liable to conviction under Clause (2) should rest with the prosecution. Moved by **Mr. Paget.** Rejected by 239 votes to 187.

(5) That the term "a reasonable man" should be deleted from Clause (3). Moved by **Mr. Greenwood.** Rejected by 191 votes to 144.

(6) That the sub-paragraph making murder committed in the course or furtherance of theft a capital offence should be omitted. Moved by **Mr. Paget.** Rejected by 243 votes to 174.

(7) That murder committed in the course or furtherance of rape should remain a capital offence. Moved by **Sir Lancelot Joynson-Hicks** (C.). Amendment subsequently withdrawn.

(8) That "burglary and housebreaking" should be substituted for "theft" in Clause (5). Rejected by 207 votes to 145.

(9) That murders by shooting or by causing an explosion should be excluded from the category of capital murder. Moved by **Mr. Stewart** (Lab.). Rejected by 172 votes to 114.

(10) That murder by the administration of poison or other noxious matter should remain a capital offence. Moved by **Sir Lionel Heald** (C.). In reply, **Mr. Butler** (Major Lloyd-George's successor as Home Secretary) pointed out that in 42 cases since 1951 in which an indictment for murder by poisoning (including gas poisoning) had been preferred, 23 concerned parents who had killed children in pathetic circumstances and three more could be described as "mercy killings"; sentence of death had been passed in only 10 cases, and in only one was the sentence executed. Only five people, he added, had been executed for poisoning in the last 30 years. After leave to withdraw the amendment had been refused, it was rejected by 346 votes to two. The four members supporting the amendment (including the two tellers) were all Labour Members—Dr. King, Mr. Wells, Mr. Fletcher, and Mr. Boyd.

(11) That the murder of police officers and persons assisting them should be deleted from the list of capital murders. Moved by **Mr. Silverman.** Rejected by 212 votes to 163.

(12) That murders of prison officers by prisoners should not be capital. Moved by **Mr. Paget.** Rejected by 178 votes to 131

(13) That the age-limit for liability to the death penalty should be raised from 18 to 21. Rejected by 160 votes to 111.

(14) That a person convicted of murder or capital murder should be entitled to apply to the Court of Criminal Appeal for an order for a new trial, on proof that new evidence was available tending to establish his innocence or that there was reason to apprehend that a miscarriage of justice might have occurred. Moved by **Mr. Hale** (Lab.). Rejected by 228 votes to 189.

(15) That the court, when the accused had been found guilty of capital murder, should proceed to a second trial to determine whether he ought to suffer the capital penalty or not. Moved by **Mr. Silverman.** Amendment subsequently withdrawn.

(16) That the mental state of a person charged with murder should be examined by two doctors, one of whom should be a qualified psychiatrist who was not a member of the prison medical service, and that copies of their reports should be supplied to the defence 14 days before the trial. Moved by **Mr. Greenwood.** Rejected by 194 votes to 160.

The Bill passed its third reading in the House of Commons on Feb. 6, 1957, after an amendment by Mr. Silverman had been rejected by 217 votes to 131.

Mr. Silverman had moved: "That this House, while welcoming the removal of certain anomalities in the law of murder and the abolition of the death penalty in respect of certain offences, cannot assent to a Bill which is an affront to constitutional propriety, fails to satisfy the public sense of justice, and is in defiance of the principle which this House has already approved—namely, that the death penalty for murder no longer accords with the needs or the true interests of a civilized society."

Passage of Homicide Bill through House of Lords.

The Bill was given a second reading in the House of Lords on Feb. 21 without a division.

The **Lord Chancellor** recalled that the House had rejected the Silverman Bill only after many peers had made it clear that, while not abolitionist, they were dissatisfied with the present state of the law of murder. The present Bill was a compromise, but the Government believed that it was also "a just solution which will commend itself to those who cannot go all the way with the abolitionists, nor rest content with the law as it stands."

Lord Silkin asserted that there could be no reasonable doubt that the Homicide Bill came before the House "out of a desire to anticipate the operation of the Parliament Act." It was a compromise between two passionately held views—one, that capital punishment was wrong; the other, that it was a unique deterrent and as a result was half right and half wrong. If capital punishment was a unique deterrent, he commented, it failed to operate in the case of a great many murders, yet the principle of capital punishment was retained. He personally based his case against capital punishment almost entirely on the ground that it was morally wrong that the State should "maintain an organization for deliberately taking life which brutalizes and demoralizes all those who take part in it." He was convinced that the day was not far distant when capital punishment would be completely abolished.

The **Archbishop of Canterbury,** rejecting the view that capital punishment was immoral, declared that "it is not against the law of God or the doctrines of the Christian Church." The choice for or against abolition did not rest on any absolute principles, but was a matter of weighing the total moral effect on the country. He could not support either total abolition or the retention of the present system unchanged, and he therefore found himself entirely able to support the Bill, which seemed to satisfy public opinion better than any other course and to provide a workable solution. He hoped that if the Bill became law "this long and distressing controversy" might be allowed to pass for a time into oblivion; and he hoped also that the abolitionists would see that, "for a time at least, their wisest course is to say little, to observe, wait and watch."

Viscount Templewood said that he could not believe that a Bill containing "such complications and anomalies" could possibly be permanent. It was not a compromise, but an expedient to extricate the Government from a difficult position. Sooner or later total abolition must come. Meanwhile, he was not prepared to support a measure which, while abandoning the claim that the death penalty was an indispensable deterrent against murder, retained it in a way that complicated the law, would irritate the public, and would satisfy neither retentionists nor abolitionists.

Viscount Samuel said that the Bill, although disclaiming any attempt to distinguish between degrees of murder, did precisely that. The discrimination, based on the extent to which particular crimes affected peace and order, seemed unconvincing. Nevertheless he regarded the Bill as a great step forward because it would result in fewer executions.

Lord Goddard expressed the view that the judges would welcome the Bill because they hoped that it would end "a perfectly intolerable situation" which was causing them "considerable embarrassment." He recalled that in 1948, when the Commons had inserted in the Criminal Justice Bill a provision abolishing capital punishment, the Home Secretary of the day had announced his intention to recommend a reprieve in all cases, and had done so until the Lords had refused to accept this provision. When that Bill came before the House of Lords, he (Lord Goddard) had ventured to say that the Home Secretary's action amounted to a use of the "suspending power," which was declared under the Bill of Rights to be illegal. When the Silverman Bill had passed the Commons, the then Home Secretary had declared that he would consider every case with regard to its circumstances, including the circumstance that the Commons had voted in favour of the Bill. No-one had ever denied that the Crown had a "dispensing power," but if that power was exercised in every case it became the "suspending power."

After observing that every murderer had been respited since the Silverman Bill had passed the Commons, although the law stated that the penalty for murder was death, Lord Goddard declared. "Is this going to continue? I ask that question for this reason—since this Bill has been in the lower House there have been cases which, if this Bill were law, would be capital murder, and they have been reprieved . . . The judges are feeling a sense of the greatest embarrassment. They have to administer the law as it is. They will have to administer the law as it is altered. They have had to pass sentence of death in every case of murder where there has been a conviction. Now they will have to pass sentence of death in what is called capital murder. I hope that the judges may now feel that although these so-called capital murders are being reprieved in exactly the same way as what will be called non-capital murders, they may not be put into this position of having to pass sentence of death in these cases only to find that it is a reprieve. One virtue in this Bill is that I cannot believe that if it is passed, the law will not be allowed to take its course where there are murders which are declared by the Act to be capital murders. If the law is not allowed to take its course, then in Heaven's name let us abolish the whole thing altogether."

Lord Morton (a Law Lord) said that the provisions of Clause (5) would be a real protection to people who greatly needed it. The Bill was criticized, however, by **Lord Chorley** as an "unscrupulous evasion of the Parliament Act"; by **Earl Ferrers** on the ground that it did not give the public adequate protection, and by the **Earl of Haddington** because it did not lessen the chance that an innocent man might be sent to the gallows. **Lord Conesford** said that many people thought, as he did, that the proposal to divide murders into two classes was "unwise and morally shocking," and might bring the law into disrepute.

Lord Pakenham, winding up for the Opposition, said that the Bill was full of "anomalies and inconsistencies," as any such Bill was bound to be. Abolitionists were convinced that executions did not save any human life, and therefore the continuance of hanging was the continuance of unnecessary killing and was fundamentally evil. So long as this great evil remained on the Statute Book, so long must they labour by constitutional means to remove it. The Bill did, however, represent a small step forward, and therefore he had no intention of opposing the second reading.

The **Bishop of Chichester** said that he could not agree with the Archbishop of Canterbury, because he thought that a moral principle was involved—that of the sacredness of human life. He agreed with Lord Conesford that the Bill was in its essentials "morally shocking." The **Archbishop of York** also expressed his agreement with Lord Conesford.

Lord Salisbury, denying that the Government had been guilty of any constitutional impropriety, said that it would be inappropriate that the Parliament Act—the instrument for ensuring that the will of the elected Chamber prevailed over that of the Second Chamber—should be invoked whenever a private Member succeeded in passing a Bill through the Commons irrespective of the views of the country or the Government. It would be particularly inappropriate in a case such as the present, where a Bill had been passed against the advice of the Government and was believed to be contrary to the wishes of the electorate.

In reply to Lord Goddard, Lord Salisbury said: "Only the Home Secretary can say all the matters he took into consideration when he considered the question of a pardon in any particular case. If he took into account the possibility or probability of changes in the law, and the effect on public opinion and public confidence in the administration of justice and the exercise of the death penalty, he was, I understand, entitled to do so. As far as the future is concerned, there is no doubt at all that once this Bill has become an Act no difficulty of the sort envisaged by the Lord Chief Justice can arise, and that is the determination of the Government." The Bill, he concluded, represented a *via media* which he believed would be acceptable to the great majority of the British people.

Committee Stage in House of Lords.

The Bill passed through the committee stage in the Lords on March 7, the following amendments being rejected or withdrawn:

(1) That environmental as well as inherent causes should be taken into account in cases of abnormality of mind. Moved by **Lord Chorley.** Amendment withdrawn.

(2) That a person convicted of manslaughter under Clause (2) should be detained during Her Majesty's pleasure. Moved by **Lord Chorley.** Amendment withdrawn.

(3) That the sub-section providing that, where two persons were guilty of murder, it should be capital only in the case of the person who actually killed the victim, should be deleted. Moved by **Lord Conesford,** who contended that this sub-section would encourage criminals to work in gangs if they wished to avoid the risk of a capital charge. Amendment rejected.

(4) That murders committed in the course of any crime (e.g. sabotage or the causing of railway accidents), instead of those committed in the course of theft alone, should be capital. Moved by **Lord Conesford.** Amendment withdrawn.

(5) That the age below which a person could not be sentenced to death should be raised from 18 to 21. Moved by the **Earl of Haddington.** Amendment withdrawn.

(6) That a person convicted of murder should have the right to apply to the Court of Criminal Appeal for an order for a new trial if new evidence became available tending to establish his innocence, and that the court should be empowered to order a re-trial. Moved by the **Earl of Listowel.** Amendment withdrawn after the Lord Chancellor had given an assurance that the Government would reconsider the question, and decide whether they could give effect to the recommendations of the departmental committee on new trials.

(7) That the Home Secretary should be allowed at any time, by regulation approved by Parliament, to substitute a method of execution other than hanging. Moved by **Lord Amulree.** The Lord Chancellor stated that the Government fully accepted the Royal Commission's recommendation that the matter should be periodically examined, especially in the light of progress made in the science of anaesthetics; when any change in the method of execution could be confidently adopted, they would propose *ad hoc* legislation to that end. Amendment withdrawn.

(8) That the state of mind of any person charged with murder should be investigated. Moved by **Lord Pethick-Lawrence.** Amendment withdrawn after the Lord Chancellor had stated on the Government's behalf that "arrangements will be made, as and when possible, to call in an outside psychiatrist to examine every prisoner committed to trial for murder."

The Bill was given an unopposed third reading by the Lords on March 19 and received the Royal Assent on March 21, 1957, when it came officially into force.

The first death sentence for capital murder under the Homicide Act was passed at Newcastle-upon-Tyne Assizes on May 16 against a 24-year-old labourer who murdered an aged widow after breaking into her home to commit burglary. A second death sentence for capital murder was passed at Cumberland Assizes (Carlisle) on May 23 against a 22-year-old labourer who murdered an old woman into whose shop he had broken to commit burglary.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14739 A.)**

A. BELGIUM. — Reduction in Military Service.

The Defence Minister (M. Spinoy) informed the Belgian Parliament on June 18 that the Government had decided to reduce the period of military service from 18 months to 15 months from October. The decision had been taken in consultation with NATO, and the Government would take measures to maintain the strength of the forces so that Belgium should continue to meet her NATO commitments. The following measures would be taken to offset the cuts: (*a*) a certain number of Regulars, as well as conscripts, would be transferred from administrative and auxiliary duties to the active forces; (*b*) about 3,000 volunteers would be recruited for a maximum term of four years and given "attractive" pay; (*c*) reserve officers would continue to serve for eighteen months.
(La Nation Belge, Brussels) **(Prev. rep. 14617 A; 13574 A.)**

B. FRENCH CAMEROONS. — French Parliamentary Approval of New Statute.

The new Statute of the French Cameroons giving the territory self-government within the French Union, which had been decreed by the French Government under the powers conferred upon it by the *loi-cadre* (see 15585 A), was approved by the National Assembly on April 4 and by the Council of the Republic on April 12, the Communists abstaining in both Houses. A favourable view on the Statute had previously been given by the Assembly of the French Union on March 21.
(Le Monde, Paris) **(Prev. rep. French Cameroons, 15565 D; 15511 A; "Loi-cadre" 15585 A.)**

C. RHODESIAN FEDERATION. — Dominion Party Gain from Federal Party in Mrewa By-election.

The result was announced on June 7 of the by-election which took place for the Mrewa seat in the Federal Parliament left vacant by the death of Mr. N. G. Barrett (Federal Party). It resulted in the return of Mr. W. J. Field (Dominion Party), who received 1,375 votes against 1,223 for Mr. E. R. Campbell (Federal Party). In the 1953 general elections Mr. Barrett had had a majority of 690 over Mr. G. R. Musgrave (Confederate Party). Mr. Field's victory increased the Federal Party's representation in the Federal Parliament to three.
(Federal Information Department, Salisbury) **(Prev. rep. By-elections, 14832 A.)**

D. POLAND - UNITED STATES. — Agreement on U.S. Economic Aid to Poland.

Following negotiations with a Polish economic delegation which opened on Feb. 25, agreements between the Polish and U.S. Governments on the shipment to Poland of agricultural and industrial products from the U.S.A., and on further steps for the settlement of questions relating to American property in Poland and Polish property in the United States, were signed in Washington on June 7.

The agreements concerning Polish purchases of commodities and equipment from the U.S.A. were as follows:

(*a*) The U.S.A. would extend to Poland a "line of credit" of $30,000,000, to be administered by the U.S. Export-Import Bank, for the purchase of agricultural products and mining equipment and the payment of transportation costs. The credit would bear interest at 4½ per cent and would be repayable in dollars over a 20-year period beginning in 1962.

(*b*) The U.S. Government would also sell to Poland wheat, cotton, fats and oils, the amount involved (including transportation costs) being about $18,000,000. Payments would be made in Polish currency (at the rate of 24 zlotys to the dollar) and the zloty balances could be used for a variety of purposes in Poland, including the payment of the expenses of the U.S. Embassy in Warsaw and (with the agreement of both parties) to make purchases for third countries. After five years the U.S.A. might require Poland to repurchase any unspent zloty balances for dollars, but at a rate not exceeding $726,000 a year.

The $30,000,000 credit, together with the agricultural sales agreement, will enable Poland to buy in the U.S.A. approximately 100,000 metric tons of wheat ($6,400,000); 25,000 metric tons of cotton ($19,200,000); 60,000 metric tons of soya beans ($6,000,000); 17,500 metric tons of fats and oils ($3,600,000); and mining machinery worth $4,000,000. Adding $9,700,000 for transportation costs, the total was $48,900,000.

(*c*) It was also announced that a supplementary agreement to the agricultural commodities agreement was being prepared (subject to Congressional authorization) which would provide for the sale to Poland against local currency of an additional 400,000 metric tons of wheat ($25,600,000) and 24,400 metric tons of cotton ($17,100,000), making, with transportation costs, a total of $46,100,000.

Finally, both Governments agreed (1) to start negotiations early in 1958 for a lump-sum settlement of American property claims resulting from nationalization measures and other property requisitionings by Poland; (2) to begin discussions at an early date on the release of pre-war Polish assets in the U.S.A. which had been blocked under U.S. regulations, and whose value was estimated at less than $2,000,000.

A special State Department communiqué said that, in accordance with a Polish proposal, (i) the U.S. Government were studying the possibility of future credit sales to Poland of additional quantities of agricultural and other commodities on similar terms; (ii) in order to broaden commercial and financial relations with Poland, the U.S. Department of Commerce would shortly announce amendments of its export control regulations, designed to simplify licensing procedures for U.S. exports to Poland; (iii) the Commodity Credit Corporation would in future consider applications for credit arrangements in connexion with export sales of commodities to Poland; (iv) the U.S. Treasury would remove the prohibition of the transmission to Poland of Treasury cheques and remittances in payment of social security, veterans' and other benefits.

M. Gomulka, speaking in Poznan on June 5, stated that although the U.S. credit was "rather modest compared with our needs," it could "to a certain degree help to alleviate our present economic difficulties." He added: "In the present situation the political aspect of the credit is not without importance, for we are of the opinion that economic relations between countries with different social systems can best pave the road to relaxation in the international situation." [The amount of U.S. aid originally proposed by Poland in the negotiations was reported to have been $300,000,000.]

American aid to Poland had first been offered by President Eisenhower after the events which brought M. Gomulka back to power.—(New York Times - New York Herald Tribune - Polish Embassy Press Department, London)
(Prev. rep. 15161 A, p. 15163; U.S. Food Offer, 14967 A.)

E. INTERNATIONAL LABOUR ORGANIZATION. — Mr. Morse re-elected Director-General.

Mr. David A. Morse (U.S.A.) was unanimously re-elected on June 1 for another five-year term as Director-General of the International Labour Organization, a post he has held since 1948 and to which he had been re-elected for a second five-year term in 1953. Under the statutes of the I.L.O., the Director-General is elected by the organization's Governing Body, which consists of representatives of Governments, employers, and employees.—(U.N. Information Centre, London)
(Prev. rep. 9335 A.)

A. WESTERN POWERS. — British Relaxation of China Trade Controls. - Parity with Soviet Trade Controls. - British Action followed by France, Belgium, Netherlands, Western Germany, Denmark, Norway, and New Zealand. - U.S. Insistence on Stricter Embargoes on China Trade than on Trade with Soviet Bloc. - Deadlock in "Chincom" Discussions.

The State Department in Washington announced on April 20 that the U.S. Government, "repeatedly pressed by some of its allies" to relax controls on trade with Communist China, had agreed to consider changes in these controls. An official spokesman emphasized, however, that the U.S.A. would in no event consider any relaxation as far as her own trade was concerned. The spokesman's statement was as follows:

"The United States has been repeatedly pressed by some of its Allies to relax controls on trade with Communist China to the same level as those which apply to trade with the Soviet Union. We have been, and are, unwilling to agree to any relaxation which would result in an increased flow of strategic goods to Communist China. At the time of the Korean War, when the U.N. forces were attacked by the Chinese Communists, the U.N. established an embargo on shipments of strategic goods to Communist China. Communist China is still hostile, and controls have continued. Heretofore our Allies have agreed to multilateral controls on trade with Communist China considerably more severe than on trade with the rest of the Communist bloc.

"In an effort to meet the views of its Allies, and at the same time continue to maintain effective multilateral trade controls, the United States has informed the 14 nations which participate with it in multilateral controls that it is prepared to discuss certain modifications in the existing system. The U.S. proposal was made to the Embassies of the 14 countries in Washington during the past week. Under this proposal certain items for peaceful use which are now embargoed by the multilateral control system for shipment to Communist China would be removed from controls and placed on the same basis as in the case of trade with the European Soviet bloc. Certain other items now embargoed to Communist China would continue under embargo and would be transferred to the European Soviet-bloc list, but under a lesser degree of control. The proposal would also involve a tightening of the 'exceptions procedure' now in use.

"It was emphasized to our Allies that there is no change in U.S. policy with respect to trade with Communist China. The United States will continue its unilateral embargo on all trade with Communist China."

The spokesman's reference to "pressure" by some of America's allies referred particularly to Britain, which had been pressing for over a year for the embargo on trade with Communist China to be reduced to the same level as that applying to the U.S.S.R. and the Soviet-bloc countries. The matter had also been raised by Mr. Macmillan during the Bermuda conference with President Eisenhower. Strong representations for the relaxation of trade controls with China had also been made by Japan.

It was pointed out in the British Press that there were 207 items on the embargo list for China which were not controlled in the case of the Soviet bloc, where only certain "strategic" items came under the export prohibition or restrictions: these "strategic" items numbered some 200, in addition to atomic energy and munitions items. The Soviet-bloc list covers the following three classes of goods: (1) strategic goods barred from trade with the Soviet bloc (List No. 1); (2) non-strategic goods that might have military use and for that reason are limited as to the volume of trade (List No. 2); (3) other goods which by agreement are kept under constant supervision to make sure that they do not have some special value for the Soviet war potential (List No. 3).

Details of the U.S. proposals were published in Washington on May 6. It was proposed that a complete ban on exports to Communist China should be continued for certain goods in which trade with Soviet-bloc countries was permitted. Although the additional "China list" would be abolished and freedom of trade be permitted for 157 of the 207 items on that list, the remaining 50 items should be transferred to List No. 3 of the Soviet-bloc list and embargoed on the ground that they were sufficiently strategic to warrant their continued embargo. Furthermore, exports to Soviet-bloc countries, even of items in Lists Nos. 2 and 3, should be restricted where there was "likelihood of diversion" to Communist China. The "exceptions procedure" should not be used except after advance consultation with "Chincom" and on condition that the export to China would produce a benefit to the exporting country equal to the benefit accruing to China. The control system should be tightened up to minimize any violations.

The U.S. proposals were discussed during May by the China Committee of the Consultative Group in Paris ("Chincom"), which consists of the 15 member-countries of NATO (except Iceland) and Japan, with Australia and New Zealand represented by observers.

After several meetings of "Chincom" it became clear on May 24 that the negotiations had reached a deadlock as all attempts at a compromise between the U.S. view and those of the majority of the other members had failed. Britain, in particular, while willing to compromise on details, stood firm on her main demand that the differential between permitted trade with Communist China and permitted trade with the U.S.S.R. and other Soviet-bloc countries should be abolished, on the grounds (i) that it was anomalous and largely ineffective, and (ii) that the time had come to treat the question of restrictions on trade with China purely on a basis of commonsense. This view was reported to have been shared by the other European member-countries, as well as Japan, while Canada was understood to have taken a middle view between the U.S. and British positions. Further meetings on May 27, 28 and 29 proved equally unsuccessful.

In view of the situation, the British Foreign Secretary (Mr. Selwyn Lloyd) announced in the House of Commons on May 30 that Britain had decided to adopt for herself the same lists for control of trade with China as those operated for trade with the Soviet bloc. This decision, he emphasized, would mean no change for items that were embargoed for both areas, but certain items which were at present embargoed would be transferred to the quantitative control list (No. 2) or to the watch list (No. 3), or be completely freed. Detailed arrangements would be discussed in "Chincom," and the Export of Goods Control Order would be amended as soon as possible; but until such amendment, licences would be granted on request for all items now embargoed for China but not subject to export licensing to the Soviet bloc. For items subject to quantitative control for export to the Soviet bloc, it would not be possible to grant licences for China until discussions had been held in Paris about the size of the quotas for Communist China. Mr. Lloyd emphasized, in conclusion, that H.M. Government intended to continue their policy of co-operating with their allies in a system of controls on trade both with the Soviet bloc and China, in the interests of mutual security.

Replying to questions, Mr. Lloyd said that he hoped the question of quotas for goods on List No. 2 would be settled within a few weeks. The other countries in the China Trade Committee had not yet made their attitude clear, as they had been waiting to hear what the British Government would do, but he expected most of them would follow Britain's example.

A Board of Trade official said on May 30 that the easing of controls on trade with China might result in an annual rate of British exports to China of £20,000,000. He admitted this figure was "a guess," but added: "We are inclined to think we might achieve an annual rate of twice last year's export figure of about £10,000,000."

The 207 articles which were freed for export to China comprised principally certain machine-tools; some electric motors and generators; rubber-working machinery; most motor vehicles and tractors; most railway locomotives, rolling-stock and other railway equipment; most internal combustion engines; iron and steel; aluminium and copper products; lead and zinc; certain scientific instruments; raw rubber and most tyres; and various chemicals.

The *Board of Trade Journal* published on June 7 the lists of items completely embargoed for export to the Soviet Bloc, Communist China, North Vietnam, North Korea, and Tibet, and of items whose export to those countries was subject to quantitative restrictions. The easing of controls on trade with China came into operation on June 4.

The British Government's decision to revise the embargo on trade with China was warmly welcomed by U.K. industrial and trade organizations. The Sino-British Trade Committee (which includes representatives of the Association of British Chambers of Commerce, the China Association, the Federation of British Industries, the London Chamber of Commerce, and the National Union of Manufacturers) cabled to Peking on June 3 asking whether a British trade mission could be sent to China, and inviting the Chinese authorities to send a technical or commercial mission, or both, to Britain.

In Washington, the State Department declared on May 31 that the United States was "most disappointed" by the British action, the official statement reading as follows:

"The U.K. has decided that it can no longer agree to maintain a level of security controls over its exports to Communist China more severe than the multilateral controls applied to the U.S.S.R. and the Soviet-bloc countries in Europe. The United States is most disappointed by this action. It means that an agreement for the continuation of a differential trade control toward Communist China has not been reached, even though many of the nations which have been engaged in the recent talks on this subject expressed their support for such a programme.

"For its part the United States contemplates no change in its policy of total embargo on trade with Communist China.

"The recent discussions among the co-operating Governments have revealed that there was a wish on the part of all countries to retain a unified approach on the question of trade controls on exports to Communist China. A majority of the countries, including the U.S.A., sought a unanimous agreement on the maintenance of a differential. The U.S.A. believed that the security interests of the free world would be best promoted by the maintenance of a significant differential.

"After an initial difference of opinion on the precise extent of the differential, the U.S.A. agreed to a proposal by a number of the participating countries. This proposal obtained the support of a majority of the co-operating Governments. The U.K., however, supported by some countries, believed that there was no merit in applying a different level of controls to trade with Communist China as compared with the Soviet Union, and that this differential should consequently be abolished.

"No-one advocated any reduction in the existing security controls applying to exports to the Soviet-bloc countries in Europe, which controls would also continue to apply to Communist China. The British policy announcement on China controls, while at variance with the position which the U.S.A. sought in the recent talks, makes clear the intention of the British Government to continue the application of security controls on strategic exports to Communist China on the same basis as is presently being applied to the Soviet-bloc countries of Europe."

Senator Knowland, the Republican leader in the U.S. Senate, issued a formal statement on May 31 strongly condemning the British action as likely to lead to a strengthening of the common enemies of the Western allies.

"Many of the articles now to be shipped to Communist China must be considered strategic by any rule of reason," Senator Knowland declared. "Locomotives, machine-tools, trucks, perhaps entire rubber plants, may some day in the not-too-distant future strengthen Communist China to the point where it can feel it dares to take the risk of taking over Hong Kong. This is a calculated risk for which H.M. Ministers must alone bear the responsibility. When they weaken their own forces in Europe, as was recently done, we might question the wisdom of it; but as good and stout allies we understand some of the economic reasons behind that action. But it is far more difficult to understand an action which can only strengthen our common enemies both in Asia and Europe—for up to the present time Communist China has not agreed to a peace treaty with Korea; it has violated the armistice agreements in Korea; it still holds American citizens in prison."

No statement was issued by the Democratic Senators, but it was reported by the *New York Times* that many of them regarded the British decision as inevitable.

Senator Sparkman (Dem.), a member of the Senate Foreign Relations Committee, said on March 31 that the U.S.A. had to be "realistic." He added: "It is easy for us to resent trade with Red China, but our economy does not depend so much on it. The economies of other countries, notably Great Britain and Japan, do. I think we ought to be more realistic insofar as their trade needs are concerned." Senator Fulbright (Dem.) expressed the view that the British action was "further evidence of the rather sterile [U.S.] policy toward China, with no prospects of it leading anywhere."

President Eisenhower himself gave some qualified support to those who regarded Britain's decision as a logical measure. He said on June 5 that although he had never advocated the complete elimination of the differential between the embargo lists in trade with the Soviet bloc and China, "I do not see as much advantage in maintaining the differential as some people do." Referring to the arguments for and against liberalizing trade with China, the President said that "there is a very great division of opinion in America, as there is in the world."

Although discussions within the China Trade Committee in Paris continued in June, a number of other member-countries announced their decision to follow the British decision and relax restrictions on trade with China to the same level as that applying to trade with the Soviet bloc. Norway made an announcement to this effect on June 2, Denmark on June 4, Belgium, Luxemburg, and the Netherlands on June 14, Western Germany on June 19, and France on June 20. It was reported that the Japanese and Portuguese spokesmen in "Chincom" had also expressed their approval of the British attitude. Greece and Turkey were said to have been in favour of the U.S. view, with Canada taking a middle position between Britain and the United States.

The New Zealand Minister of Industries and Commerce (Mr. E. H. Halstead) stated on June 1 that whilst New Zealand had so far co-operated in maintaining the embargo on China trade, most of her goods were non-strategic and there was no reason why New Zealand should not trade with China in these goods.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - New York Times - New York Herald Tribune - Le Monde, Paris - Norwegian Embassy Press Department, London - Netherlands News Agency - Berlingske Tidénde, Copenhagen - N.Z Directorate of Information, Wellington)

(Prev. rep. 12859 A; 11589 B; 11490 A.)

A. UNITED KINGDOM - UNITED STATES. — U.K. Purchase of Surplus American Tobacco against Provision of Housing for U.S. Servicemen in Britain.

Mr. Birch, the Economic Secretary to the Treasury, announced on March 18 that new arrangements had been made with the U.S. Government under which Britain would import $6,000,000 worth of tobacco for sterling, and in exchange would build houses for U.S. Servicemen and their families in Britain at an equivalent cost.

Mr. Birch pointed out (i) that the new arrangements were an extension of the transaction announced on June 8, 1956, which involved $12,000,000 worth of U.S. tobacco; (ii) that the proceeds of the present transaction would be appropriated to the U.K. Defence Budget; and (iii) that the houses to be built would be let to the U.S. authorities at a nominal rent so long as they were required, but would remain the property of the British Government. The tobacco would go into the tobacco companies' stocks, and its acquisition would not cause any reduction of tobacco purchases from Commonwealth countries.

Under the previous transactions of this kind 2,500 houses are being provided for U.S. Servicemen and their families in Britain.—(Daily Telegraph) **(Prev. rep. 15034 D.)**

B. FRANCE. — Ending of Suez Canal Boycott.

It was officially announced in Paris on June 13 that the French Government had decided to authorize French ships to use the Suez Canal; that canal dues were to be paid in transferable sterling to the Egyptian Government; and that the necessary authorizations had been given to the French *Office des Changes*. The decision was taken by the new French Government of M. Bourgès-Maunoury and had been preceded by informal negotiations between French and Egyptian banks on the method of payment, conducted through the Swiss Embassy in Cairo.

The first French vessel to use the Canal since the Suez crisis—the 7,200-ton cargo ship *Picardie*—passed through on June 16 after paying tolls in transferable sterling. On the same day France officially notified the U.N. Secretary-General that she had ended her boycott of the Suez Canal, but reiterated that she regarded the Egyptian conditions for the use of the Canal as "provisional."—(Le Monde, Paris)

(Prev. rep. Suez Canal, 15545 A.)

C. TUNISIA. — Municipal Elections. - Introduction of Women's Suffrage.

The first municipal elections in Tunisia since the attainment of independence took place on May 5 and resulted in a victory for the N. o-Destour, which won 731 seats and obtained control of 89 of the 94 municipalities. The remaining five municipalities will be controlled by Independents, who won 39 seats. The Communist Party, which put forward candidates only in Tunis, failed to win any seats.

The elections were the first held in Tunisia in which women enjoyed the right to vote and to be elected. Only 80,000 women registered as voters as against 285,000 men, the failure of the majority of potential women voters to register being attributed to lack of interest or to their husbands' opposition; among those registered, however, 85 per cent voted, compared with 90 per cent of the electorate as a whole. Fourteen women candidates were put forward, of whom 11 were elected, including one Independent.—(Le Monde, Paris)

(Prev. rep. Tunisian Elections, 14812 A.)

D. NORWAY. — Formation of "Atom Company."

It was announced on June 26 that a Norwegian Atom Company had been formed by about 50 leading Norwegian organizations representing industry, shipping, banking, insurance, atomic science, and education. The Company will produce, buy and sell components, raw materials, and installations for producing atomic energy for peaceful purposes, and will also plan, build and run atomic undertakings, promote informative activities, and utilize experience and knowledge in connexion with the production of atomic energy.

(Norwegian Embassy Press Office, London)

E. EGYPT. — Further Egyptianization Measures.

It was announced in Cairo on June 5 that six British and French pharmaceutical companies sequestrated by the Egyptian Government in November last had been "Egyptianized" and merged into a new company known as the *Société Générale des produits pharmaceutiques et chimiques*. The new Egyptian company will have a share capital of £E.500,000 and will be managed by the Egyptian Economic Organization. Among the British companies affected was the Egyptian subsidiary of Imperial Chemical Industries.

(Le Monde, Paris) **(Prev. rep. 15555 A.)**

A. UNITED KINGDOM. — The Engineering and Shipbuilding Strikes. - Reports and Recommendations of Courts of Inquiry. - Wage Increases on "12-Months' Wage Standstill" Conditions.

The entire U.K. shipbuilding industry, as well as large sections of the engineering industry, were brought to a standstill in March by strikes called by the Confederation of Shipbuilding and Engineering Unions in support of a claim for a 10 per cent increase in wages. The strikes lasted into April and led to the appointment by Mr. Macleod, the Minister of Labour, of two courts of inquiry to deal respectively with the shipbuilding and engineering disputes. The course of events is described below under cross-headings :

The History of the Disputes.

The disputes dated back to April 1956, when four of the principal unions affiliated to the Confederation of Shipbuilding and Engineering Unions—the Amalgamated Engineering Union, the Electrical Trades Union, the Boilermakers' Society, and the National Union of Foundry Workers—resolved at their annual conferences to ask the Confederation to press for further wage increases for engineering and shipbuilding workers. Although the Engineering and Allied Employers' National Federation announced on May 31 that any further claims for increases would be resisted, in view of the increases already granted in March (see 15092 A) and of the national inflationary position, the Confederation's executive resolved on Sept. 14, 1956, to ask for a "substantial increase."

At talks between Confederation representatives and representatives of the two employers' federations, which took place on Oct. 25 and Oct. 30, the Confederation put forward claims for overall increases of 10 per cent for all engineering and shipyard workers. The two employers' federations, after holding ballots of their member-firms, rejected these claims outright—the engineering employers on Nov. 29 and the shipbuilding employers on Dec. 11.

A special delegate conference of the A.E.U., held on Jan. 9, 1957 to consider the position, thereupon resolved to recommend a two-day "token" strike at engineering works and shipyards throughout the country unless the increase had been agreed to by Feb. 28. This recommendation, however, was rejected on the following day by a special conference of the 40 unions affiliated to the Confederation, and it was decided that strike action should not be taken until the claims had been re-submitted. Meetings between Confederation representatives and representatives of the engineering and shipbuilding employers accordingly took place on Feb. 12 and 13 respectively, but on Feb. 28 the engineering employers decided for the third time to reject the claim. After taking a second ballot of its members, the Shipbuilding Employers' Federation also rejected the demand on March 5, whereupon the Confederation decided on March 7 to call a strike in all shipbuilding and ship-repairing establishments throughout the country, commencing on March 16.

The Shipyard Strike.

Mr. Macleod announced in the House of Commons on March 12 (before the date set for the strike to begin) that he intended to appoint Lord Evershed, the Master of the Rolls, to act as arbitrator in the disputes. He explained that in view of the "grave threat to the national economy" inherent in the proposed stoppage, he had decided that "something more than the normal conciliation action" by Ministry of Labour officers was required; that the issue was, however, "not appropriate for examination by a court of inquiry because the causes of the dispute are clear"; and that "a peaceful settlement can best be found by resort to arbitration by a completely impartial person."

Although the shipbuilding employers agreed to submit the dispute to arbitration and to abide by the arbitrator's decision, the leaders of the shipbuilding unions declined to do so and insisted that the stoppage could be averted only by an "offer of hard cash" from the employers' side. After last-minute talks presided over by Sir Wilfred Neden (the Ministry of Labour's Chief Industrial Commissioner) had broken down on March 15, the strike began at noon on March 16, as planned.

The stoppage—the first "national" strike in British shipyards since the General Strike of 1926—took place at a time when shipbuilders had over £900,000,000 worth of orders on their books, some firms having sufficient work to keep them occupied until 1963, whilst most yards had their berths fully booked until 1961. It was estimated on March 18 (when the stoppage became fully effective) that more than 300 ships, aggregating about 2,250,000 gross tons and including nine large passenger liners and 63 large tankers, were under construction at over 70 shipyards, for the most part in the Glasgow, Newcastle, Belfast, Sunderland, Middlesbrough, and Birkenhead areas. In addition, a large number of ships were under repair at these centres and at the major ports, including London, Liverpool, Hull, Southampton, Avonmouth, Cardiff, Newport, and Swansea The total number of shipyard workers on strike was put at about 200,000, including 42,000 on the Clyde, 30,000 on the Tyne, 22,000 on the Mersey, 20,000 at Belfast, 12,000 at Sunderland, 10,000 each on Thames-side and at Southampton, 8,000 on the Tees, 5,000 each at Hull and Barrow-in-Furness, 3,000 each at Grimsby-Immingham and Aberdeen, 2,000 at Bristol and Avonmouth, 1,300 at Dundee, and 1,000 at Blyth.

A large percentage of the tonnage under construction or repair was for account of shipowners overseas, and the dangers inherent in a prolonged strike were stressed on all sides in view of the importance to British shipyards of their "export" markets. the rapid resurgence of shipbuilding in Japan (see 15554 B), and the decline in the percentage of new orders now being secured by British shipbuilders Mr. Watkinson (Minister of Transport and Civil Aviation), speaking at Middlesbrough on March 15, gave a warning that the "real winners of the strike will be shipbuilders in Japan, Germany, and elsewhere, who will be very happy to take away yet more British shipbuilding orders." He added : "In the past three months all over the world new orders for tankers to the extent of no less than 8,000,000 tons have been placed Out of this vast total Britain has secured only 700,000 tons. In other words, we have not secured a tenth of recent orders that have been placed"

[It was stated in the Press on March 10 that the average earnings of British shipyard workers had risen between October 1955 and October 1956 by about nine per cent, compared with a rise in the cost of living of only four per cent. Shipyard wages were about 30 per cent higher in Britain than in Western Germany, and over 100 per cent higher than in Japan, but 30-40 per cent lower than in Sweden and 100-150 per cent lower than in the United States. The increase in British shipbuilding wages had not been accompanied by any corresponding rise in productivity, production indices showing that the output of the shipbuilding and engineering group of industries was lower in each quarter of 1956 than in the corresponding quarter of 1955.]

In view of the urgency of settling the dispute, Mr Macleod, accompanied by Sir Wilfred Neden and Mr. T. Claro (the Ministry's Chief Conciliation Officer), saw representatives of the employers and of the Confederation separately at the Ministry on March 19. On March 20 he announced in the House of Commons that the employers had welcomed a suggestion (previously put forward in the House by Mr. Aneurin Bevan, Lab.) that, in order to break the *impasse*, both sides should put their cases before a third party, who would than make recommendations which would be the subject of negotiations. Although the unions rejected this suggestion, negotiations with the employers continued, and on March 22 the latter offered an increase of 8s. 6d. a week (about five per cent) provided that the unions agreed to a 12 months' wages "standstill" and the removal of certain restrictive practices in the shipyards. This offer was rejected, the unions refusing to consider any increase under 11s. 6d. (equivalent to about 7.3 per cent). Negotiations thereupon broke down, and on March 25 Mr. Macleod announced that he had decided to appoint a Court of Inquiry into the dispute, and appealed to the unions to call off the strike pending the publication of the Court's findings.

Court of Inquiry into Shipyard Strike.

In a final effort to settle the dispute, a meeting took place on March 26 between Sir Wilfred Neden and Confederation leaders. The latter intimated that, as an interim settlement pending the publication of the Court's recommendations, they would consider either (*a*) a 5 per cent rise with no guaranteed wages standstill or lifting of restrictive conditions; or (*b*) a 7½ per cent increase with a guaranteed standstill for 12 months and joint examination of the conditions complained of. On the same day Mr. Macleod announced in the House of Commons that both sides had agreed to co-operate fully with the Court of Inquiry, and on March 28 he further announced that its chairman would be Professor D. T. Jack (Professor of Economics, University of Durham), and its other members Brigadier L. C. Mandelberg, a past chairman of the National Association of Rayon Yarn Producers, and Mr. (now Sir) C. J. Geddes, a member of the T.U.C. General Council and formerly general secretary of the Union of Post Office Workers.

The A.E U. executive, which met on April 2 to consider the situation, decided by a majority of one vote (the president's casting vote) to recommend the Confederation to call off the strike and re-examine the position when the Court's recommendations became known. Accordingly, when the Confederation's executive met later in the day, Mr. Carron (the A.E.U. president) moved a resolution recommending that the strike be called off meanwhile. This resolution was seconded by the National Union of General and Municipal Workers and carried by 15 votes to 10 ; an amendment moved by Mr. E. J. Hill (Boilermakers' Society) and seconded by the E.T.U., recommending that the strike should continue, had previously been defeated. The resolution of the Confederation's executive was immediately put to a delegate conference of the Confederation's affiliated unions and carried on a card vote by 710,177 votes to 449,162. The first meeting of the Court took place on April 3 and work was resumed throughout the shipyards on the following day.

The Stoppage in the Engineering Industry.

Notwithstanding a warning by the chairman of the Engineering and Allied Employers' National Federation (Mr. B. Macarthy) that Britain had already fallen behind other countries in engineering productivity, and that any increase in costs would gravely handicap her in maintaining even her present position, leaders of the Confederation of Shipbuilding

and Engineering Unions resolved on March 12 to reject any form of arbitration also in this dispute and to call a national engineering strike. At a further meeting on March 14 the Confederation decided that the stoppage should begin on March 23, the form it should take being for the moment left open. Talks at the Ministry of Labour on March 19 between representatives of employers and the unions concerned proved abortive, and Mr. Harry Brotherton, the Confederation's president, announced on that date that it had been decided that the strike should take place in three stages; that about one-third of the labour force would be called out on March 23; and that the stoppage should be gradually extended until the whole industry had been brought to a standstill by April 6.

It was explained in the Press that whereas the majority of unions affiliated to the Confederation—particularly the E.T.U. and others with Communist leadership—had wanted the whole of the industry's labour force to be called out by March 23, the three unions having most weight (the A.E.U., the Transport and General Workers, and the General and Municipal Workers) had wished it to be gradual, with the first strikes at selected works. When the Confederation's executive met to draft plans for submission to the executives of the affiliated unions, a motion calling for a national strike on March 23 had been submitted on behalf of the E.T.U., whereupon Mr. Carron (president of the A.E.U.) had moved an amendment calling for a progressive strike at selected works. This amendment was carried by 707,000 votes to 502,206, and subsequently a motion by Mr. Foulkes (president of the E T.U.) requiring the call-out to be completed throughout the industry by April 6 was carried without dissent.

The Confederation subsequently decided that the stoppage should first take effect in selected areas associated with marine or other heavy engineering or with aircraft construction, and work accordingly stopped on March 23 at engineering works in the Clydeside, Tyneside, Belfast, Sunderland, Liverpool, Sheffield, Middlesbrough, Bristol, Bournemouth, and Weymouth areas. On March 23 it was estimated that about 200,000 workers (mainly employed in marine and heavy engineering) were involved in Ayrshire, Lanarkshire, Dunbartonshire, and Renfrewshire, together with about 70,000 (mostly in heavy engineering) at Sheffield, 50,000 each at Bristol and Belfast (including 15,000 aircraft workers at Bristol), 45,000 (mostly marine engineers) on Tyneside, about 25,000 in the Liverpool area (including many employed by the de Havilland Aircraft Company), 15,000 (mostly in marine engineering) at Sunderland, 10,000 at Middlesbrough, and 6,000-8,000 in the Bournemouth-Weymouth area, mostly de Havilland and Vickers-Armstrong employees. The Confederation claimed on March 25 that members of affiliated unions had given full support to the stoppage in all areas, the only large works still carrying on being those of the Singer Company at Clydebank, where about 50 per cent of the workers did not belong to Confederation unions.

On March 26 the Confederation offered to end the engineering strike on the same terms as its offer to the shipbuilding employers (see above) i.e. provided the employers agreed to an immediate 5 per cent increase without conditions, or 7½ per cent with conditions. This offer was refused, and on March 27 Mr. Brotherton announced that the stoppage would enter its second phase on March 30, when about 500,000 workers employed by engineering firms in the Greater London area would cease work. [Among the firms involved were the de Havilland, Handley-Page, Hawker-Siddeley, Vickers-Armstrong, British Thomson-Houston, General Electric, Siemens, Electrical and Musical Industries, and Hoover companies.] The third stage would begin on April 6, when the stoppage would be extended to the whole of the United Kingdom.

Court of Inquiry into Engineering Strike.

Direct negotiations between employers' and Confederation representatives were resumed on March 29, but broke down after the employers had proposed increases of 6s. a week for skilled and 5s. for unskilled workers (equivalent to just over 3 per cent on existing rates), provided that the Confederation agreed to a 12-months' wages standstill and a joint review of alleged restrictive practices. In view of this further breakdown, Mr. Macleod announced on the same day that he also proposed to appoint a Court of Inquiry into this dispute, and that it would have the same members as the Court of Inquiry into the shipbuilding dispute.

The Court's Findings.

The Courts of Inquiry held public sessions respectively on April 4-8 (shipbuilding) and April 9-11 (engineering), the shipbuilding employers' position being explained by Mr. N. A. Sloan (director, Shipbuilding Employers' Federation) and the unions' case by Mr. Hill, Mr. Carron, and Mr. Brotherton. The engineering employers' case was put by Mr. Macarthy (director, Engineering and Allied Employers' National Federation) and the unions' case by Mr. Carron and Mr. Brotherton. Both Courts published their reports on May 2, their findings and recommendations being summarized below.

Report of Shipbuilding Court. The report dealt first with the position of the U.K. shipbuilding industry against the background of world shipbuilding, and stressed that although the industry was at present very prosperous and prospects appeared good, there was no doubt that any abatement in the growth of the demand for new ships would bring increasingly severe competition from abroad. Outlining the history of the dispute, the report recalled that the employers' offer of an increase of 8s. 6d. a week (equivalent to about 5 per cent of the existing rates) had been conditional on the unions signing a document designed to ensure (*a*) a "standstill period" of at least 12 months before any further application was made for increased wages; (*b*) the unions' co-operation in reducing restrictive practices and loss of working-time. Discussing the unions' refusal of this offer, the Court remarked that, assessed solely on the rise in retail prices since the last shipbuilding wages settlement, an increase of even 4 per cent would have been appropriate. As, however, a number of industries (including some which were barely profitable) had recently granted increases of 5 per cent, "it would be difficult to resist a claim for at least a similar amount in an industry enjoying considerable prosperity." The report added that the proposed measures to bring about a wages standstill and the reduction of restrictive practices "should offset, wholly or in part, the rise in labour costs which might otherwise follow from an increase in wage rates."

In view of all the circumstances, the Court suggested that the parties should consider the following alternatives:

(1) An increase of 8s. 6d. a week on the consolidated time rate for skilled workers (with adjustments for semi-skilled and unskilled workers), without provision for a wages standstill and the reduction of restrictive practices; or

(2) An increase of 11s. a week, with provisions regarding a wages "standstill period" and the reduction of restrictive practices and loss of working time. These provisions should be embodied in a negotiated agreement which might be regarded as an interim arrangement.

The report concluded by criticizing (*a*) the lack of formal negotiating machinery in the shipbuilding and ship-repairing industry; (*b*) the industry's record concerning disputes. With regard to (*a*), the Court urged employers and unions to consider setting up a National Joint Council to review wages problems and concern itself positively with the industry's productive efficiency. Regarding (*b*), it stressed that the existing procedure for settling disputes must be either unsatisfactory or not properly operated, and suggested that both sides should examine it to ascertain what improvement, including conciliation procedure, might be effected.

Report of Engineering Court. This report, after recounting the history of the engineering dispute since April 1956, discussed the employer's offer (made on March 29, 1957 —see above) of increases of 6s. for skilled and 5s. for unskilled workers, conditional on the signature by the unions of a document similar to that drawn up by the shipbuilding employers, and providing for a 12-months' wages "standstill" and union co-operation in the reduction of restrictive practices, such as embargoes on overtime and ceilings on output and earnings. This offer, the report pointed out, represented an increase of about 3½ per cent, compared with an advance of 4 per cent in the Retail Price Index since the last engineering wages settlement. The Court "appreciated the unions' unwillingness to accept this offer, knowing that in other industries—some of them less profitable than the engineering industry—there had been wage increases of 5 per cent." It gave a warning, however, that "a general rise in wages of 5 per cent over the greater part of the economy is out of proportion to the change in the general index of production and might well have inflationary tendencies."

With regard to the employers' contention that "acceptance of an agreed document [providing for a wages standstill and the reduction of restrictive practices] should be a condition of any wage increase," the Court recognized that it was "natural for them to be anxious to obtain some protection against the submission of a fresh application," and considered that the other terms of the proposed document were "not unreasonable in principle . . . and might make some contribution to the improvement of industrial relations." Taking into account all relevant considerations, the Court suggested that the parties to the dispute should consider the same alternatives as proposed by the Shipbuilding Court—viz., increases of 8s. 6d. a week for skilled workers without the suggested conditions, or of 11s. a week with the provisions set out in the draft document. Increases for semi-skilled and unskilled workers would be adjusted suitably.

In conclusion, the report stressed that the principles embodied in the draft document were "in no sense prejudicial to union interests," although it expressed doubt whether a "period standstill" for wage claims, being at best an *ad hoc* arrangement limited in time, would be adequate. In this connexion it referred to a suggestion made in 1954 that employers and unions should set up a joint body to keep wages and related matters under continual review, and urged that they should consider setting up a National Joint Council with the same aims as the Council proposed by the Shipbuilding Court for the shipbuilding industry.

Unions' Acceptance of Employers' Offer of 11s. Wage Increase "with Strings."

The executives of the unions affiliated to the Confederation of Shipbuilding and Engineering Unions met at York on May 8 to consider the reports of the Courts of Inquiry.

Two days earlier the annual conference of the A.E.U. (the largest and most influential union in the shipbuilding and engineering group as a whole) had decided to instruct its executive to authorize the Confederation's representatives to negotiate for an increase of not less than 11s. a week "with such modifications of the proposed conditions as can be obtained." A Communist amendment urging the "absolute rejection" of any offer "with strings attached,"

and calling for the renewal of the original 10 per cent claim and the resumption of the stoppage if necessary, was defeated by 33 votes to 19. A further Communist amendment recommending the acceptance of 11s., " but without strings," was also rejected.

The A.E.U. motion was duly put forward at the York conference of the Confederation, but was rejected on a card vote by 659,555 votes to 599,000 in favour of a motion by Mr. Brotherton (the Confederation's president) to the effect that the unions' negotiators should be authorized to go to the employers with completely free hands. This motion owed its acceptance largely to the support of the Boilermakers' Society, which was strongly opposed to any " wages standstill " provisions.

On May 16 Mr. F. C. Braby, president of the Engineering and Allied Employers' National Federation, put forward alternative offers (based on the Courts' recommendations) of (*a*) increases of 11s. for skilled workers, 10s. for semi-skilled, and 9s. for unskilled, subject to the unions' agreement to a wages " freeze " for one year and the reduction of restrictive practices ; (*b*) increases of 8s. 6d., 8s., and 7s. 6d., according to grade, without these conditions. Similar offers were made by the Shipbuilding Employers' Federation on May 20.

The engineering employers' offer of 11s. " with strings " was accepted by the Confederation on behalf of the engineering industry on May 23. After further negotiations with the shipbuilding employers it was announced on June 11 that the shipbuilding unions had also accepted the offer of 11s., with the agreed proviso that " special factors," such as a rise in the cost of living or in employers' profits, might require a reconsideration of the settlement before the 12 months' wage " freeze " had run its course. The difference in the terms of settlement as compared with those in the engineering industry was due to the fact that the Boilermakers' Society had at first refused acceptance because of its opposition to a wage " standstill."

The increases were estimated to affect 3,142,700 engineering and 200,000 shipbuilding employees.—(Times - Daily Telegraph - Manchester Guardian - Ministry of Labour Gazette)

A. EUROPEAN TRANSPORT. — Inauguration of " Trans-Europ-Express " Services.

A new high-speed network of diesel electric train services linking 63 cities in France, Belgium, Luxemburg, the Netherlands, Western Germany, Switzerland, and Italy came into operation on June 2. Known as Trans-Europ-Express, they form an inter-linked international service run in co-operation by the State railways in the seven countries.

Trans-Europ-Express will initially consist of the 12 services listed below. The first three are run by the French *Société Nationale des Chemins de Fer Français* ; services (4) to (7) are run by the West German *Bundesbahn* ; (8) and (9) are operated by the Italian *Ferrovie del Stato* ; and (10) to (12) are run jointly by a Dutch-Swiss " pool," the *Nederlandse Spoorwegen* and *Schweizer Bundesbahn*. The names of the 12 expresses are given in parentheses.

(1) Paris-Brussels-Amsterdam (*Ile-de-France*).
(2) Paris-Mulhouse-Basle-Zürich (*l'Arbalète*).
(3) Lyons-Turin-Milan (*Mont-Cénis*).
(4) Paris-Liège-Cologne-Dortmund (*Paris-Ruhr*).
(5) Ostend-Brussels-Cologne-Dortmund (*Saphir*).
(6) Amsterdam-Cologne-Frankfurt (*Rhein-Main*).
(7) Hamburg-Frankfurt-Basle-Zürich (*Helvetia*).
(8) Marseilles-Genoa-Milan (*Liguria*).
(9) Milan-Munich (*Mediolanum*).
(10) Amsterdam-Brussels-Paris (*Etoile du Nord*).
(11) Brussels-Paris (*l'Oiseau Bleu*).
(12) Amsterdam-Brussels-Luxemburg-Strasbourg-Basle-Zürich (*Edelweiss*).

Further " Trans-Europ " services are projected, including a Florence-Munich service *via* Bologna-Verona-Bolzano-Innsbruck.

The express trains—built in Germany, France, the Netherlands, Switzerland, and Italy—incorporate the most modern designs and improvements, and are painted in the same colours (red and grey). They will considerably reduce the time hitherto taken between the above-mentioned cities and will make it possible for businessmen to visit any of the seven countries and return the same day. Of the three French services, for example, the *Ile-de-France* will cover the Paris-Amsterdam run in 5 hours 34 minutes, compared with the previous fastest time of 7 hours 8 min. ; *l'Arbalète* will complete the Paris-Zürich run in six hours, instead of 7½ hours ; and the *Mont-Cénis* will cover the Lyons-Milan run in 5 hours 19 min., compared with over nine hours by the previous fastest service.

Trans-Europ-Express has its headquarters at Luxemburg and operates in conjunction with Eurofima—the European Company for the Financing of Railway Stock.—(Le Monde)

B. WESTERN GERMANY.—New Government in the Saar. - Hr. Reinert succeeds Dr. Ney as Saar Premier.

The Saar Government headed by Dr. Ney, which was based on a coalition of the Christian Democrats and the Social Democrats, resigned on March 25.

Since the withdrawal of the Democrats (led by Dr. Schneider) from the coalition in December 1956, Dr. Ney's Government had controlled only 22 of the 50 seats in the *Landtag*. The immediate reason for Dr. Ney's resignation was the fact that his Finance Minister, Professor Blind (non-party), had decided to leave the Government to take up an academic post at Frankfurt University ; as the two former Democratic Ministers had already resigned in December, this would have compelled Dr. Ney to reshape his Ministry completely in order to obtain the necessary parliamentary support.

After unsuccessful attempts by Dr. Ney to form a new Ministry comprising all parties except the Communists (now banned), the Christian Democratic executive in the Saar asked Dr. Roder (a *Bundestag* deputy) on April 4 to negotiate with the Christian People's Party. The aim of the proposed negotiations was (*a*) to obtain the latter party's support for a Christian Democratic minority government as a first step ; (*b*) an eventual merger between the Christian Democrats and the Christian People's Party. Although such an alliance and an eventual merger was strongly favoured by Dr. Adenauer, difficulties arose over the position of Dr. Ney.

On May 18 the Christian Democrats in the Saar elected Herr Egon Reinert (Minister of Education and Justice) as chairman of its executive in succession to Dr. Ney, and on the following day the Christian Democratic group in the *Landtag* proposed that a new *Land* Government should be formed either by the Christian Democrats and the Christian People's Party together, or by the Christian Democrats alone with the tacit support of the Christian People's Party. The resolution also proposed that both parties should merge by the end of the year at latest, that they should enter into an immediate working association in the *Landtag*, and that both parties should co-operate in the forthcoming Federal elections. These proposals were accepted by the *Landtag* group of the Christian People's Party on May 25, except for the proposed merger, for which the Christian People's Party declined to fix any date.

As a result of the Christian People's Party's refusal to commit itself to the merger proposal, Dr. Roder announced on May 25 that he was unable to form a Government. After further negotiations the three Saar parties grouped in the *Heimatbund*—the Christian Democrats, the Democrats, and the Social Democrats—reached agreement on the formation of a new coalition government. Herr Reinert was elected Prime Minister on June 4 in succession to Dr. Ney, the new Cabinet being approved on the same date as follows :

Herr Egon Reinert (C.D.)—Prime Minister ; Herr Julius von Lautz (C.D.)—Interior ; Dr. Manfred Schäfer (C.D.)—Finance ; Dr. Hubert Ney (C.D.)—Justice ; Dr. Franz Josef Röder (C.D.)—Education ; Dr. Heinrich Schneider (D.P.)—Deputy Premier and Economic Affairs ; Herr Erich Schwertner (D.P.)—Reconstruction ; Herr Kurt Conrad (S.D)—Second Deputy Premier and Labour.

Herr Conrad retained the portfolio he held in Dr. Ney's Ministry, while Herr Schwertner returned to the Reconstruction Department, which he had headed before his and Dr. Schneider's resignation in December last.

The vote for Herr Reinert's appointment as Prime Minister was 31 against one (a Christian Democrat), with 10 abstentions (Christian People's Party). The vote approving the Cabinet list was 31 to 10. The Christian People's Party subsequently announced that in view of the changed situation it saw no possibility of continuing the negotiations with the Christian Democrats for a merger in the *Landtag*, or for electoral co-operation in the Federal elections. (Frankfurter Allgemeine Zeitung - Saarbrücker Zeitung - Le Monde, Paris)

(Prev. rep. Saar, 15503 C ; 15303 A.)

C. INDIA. — Gubernatorial Appointments.

A communiqué from the President's Office on May 22 announced that Mr. V. V. Giri had been appointed Governor of Uttar Pradesh in succession to Mr. K. M. Munshi ; Dr. Zakir Hussain as Governor of Bihar in succession to Mr. R. R. Diwakar ; and Mr. H. V. Pataskar as Governor of Madhya Pradesh in succession to Dr. Sitaramayya.

On June 11 it was announced that Mr. Bhimsen Sachar (Governor of Orissa) had been appointed Governor of Andhra Pradesh in succession to Mr. C. M. Trivedi, and that Mr. Y. N. Sukthankar (Secretary to the Orissa Ministry) would become the new Governor of Orissa.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 12304 G ; 15037 A ; 15282 A ; 12304 G ; 12209 A ; 15037 A.)**

A. JORDAN. — Expulsion of Egyptian Military Attaché and Consul-General in Jerusalem. - Jordanian Ambassador expelled from Egypt. - Closing of Jordanian Embassy in Cairo. - King Saud's Visit to Amman.

The Egyptian military attaché in Amman (Major Fuad Hilal) and the Egyptian Consul-General in Jerusalem (Mohamed Abdul Aziz) were declared *personae non gratae* by the Jordanian Government on June 10 and ordered to leave the country on the same day. The official announcement said that Major Hilal had tried to persuade a Jordanian citizen to assassinate certain officials, had promised him arms for this purpose, and had also been involved in "other cases threatening the security of the kingdom." The Consul-General was accused of unspecified subversive activities. It was announced on June 13 that 19 Jordanians had been arrested in the Hebron area on charges of being implicated in Major Hilal's alleged plot.

The allegations were denied by the Egyptian Government, which demanded the recall of the Jordanian Ambassador in Cairo and withdrew its representative from the Arab Joint Command in Amman—i.e. the tripartite Egyptian-Syrian-Jordanian command set up in October last shortly before the Israeli attack in the Sinai peninsula. The Jordanian Ambassador in Cairo—Abdel Moneim Rifai, a brother of the Jordanian Foreign Minister, Samir Rifai—was recalled to Amman on the same day (June 10), and the Jordanian Embassy in Cairo was closed and all its officials withdrawn on June 16 in retaliation for the Ambassador's expulsion from Egypt.

The Egyptian statement alleged that a Jordanian national had contacted Major Hilal and had expressed his willingness to carry out a *coup d'état* in Jordan. Major Hilal, suspecting that the person concerned had been sent to implicate him (the attaché) in a conspiracy, had put the man under arrest and had reported the matter to the Jordanian Foreign Ministry. It was alleged that the person concerned had signed "confessions" to the effect that he had been instructed by the Jordanian Government to try and involve Major Hilal in a "plot" which could be used as an excuse for his expulsion. The Egyptian allegations were denied *in toto* by the Jordanian authorities, who announced that evidence of the behaviour of Egyptian military representatives in Jordan would be published at a later date.

King Saud of Saudi Arabia paid a week's State visit to Jordan from June 8-14 during which he had talks in Amman with King Hussein and Jordanian leaders. A joint communiqué was issued by the two sovereigns on June 13 expressing their determination (1) to "uphold the complete independence of all Arab countries" and to "defend the spiritual values of Islam"; (2) to oppose all foreign pacts "whatever their nature or source"; (3) to adhere to a policy of "positive neutrality"; (4) to "defend Arab sovereignty over the Gulf of Akaba," which was described as "Arab territorial waters"; (5) to reject "any interpretation tending to make the Gulf an international waterway"; (6) to promote economic co-operation between Jordan and Saudi Arabia, in which connexion the communiqué referred to Saudi Arabian investments for developing the Jordanian economy.

A Lebanese delegation visited Amman during King Saud's visit and had discussions with both sovereigns; no statement was issued, but it was understood that the delegation - which included two Opposition leaders, both former Lebanese Prime Ministers (M. Saeb Salam and M. Abdulla Yafi) - had offered to mediate in the dispute between Jordan and Egypt. The delegation was accompanied by the Saudi Arabian Ambassador in Beirut.

The communiqué's reference to Jordanian and Saudi Arabian support for a policy of "positive neutrality" was regarded in certain Western newspapers as a "feeler" for improved Jordanian relations with Egypt and Syria, since the two latter countries had frequently laid stress on the concept of "positive neutrality" as the basis of their external policy. Moreover, it was commented abroad that the communiqué made no reference to the dangers of Communism, and that it had denounced all foreign pacts "whatever their nature or source"—a phrase interpreted as expressing King Saud's inherent dislike of the Baghdad Pact.

The communiqué was nevertheless attacked on June 15 by the Foreign Minister of Syria, who described King Saud's visits to Baghdad (see 15581 A) and Amman as examples of his "active co-operation with American foreign policy, inspired by his desire to obtain American money and to assist the cause of imperialism." The Syrian Foreign Minister also attacked the Foreign Minister of Jordan (M. Samir Rifai) as an "enemy to the cause of Arab liberation," accused him of replacing nationalist officials in Jordan with "agents of General Glubb," and declared that Syria would not pay Jordan the first annual contribution of £E.2,500,000 under the subsidy agreement of January 1957 (see 15840 A). A senior official of the Egyptian Finance Ministry had previously announced that Egypt would not pay her first annual subsidy of £E.5,000,000 under that agreement until Jordan had returned to a policy of "positive neutrality."

At a press conference in Amman on June 18, M. Samir Rifai denounced the Syrian and Egyptian press and radio attacks on King Hussein and King Saud following the latter's visit to Jordan, and declared that the restoration of good relations with Egypt and Syria would only be possible if those countries ceased to interfere in Jordan's internal affairs and abandoned "pressure and force." He confirmed that neither Syria nor Egypt had paid their first annual subsidies to Jordan under the agreement of January last, and said that the payment of those contributions was "still vague." On the other hand, Saudi Arabia had paid her first annual contribution of £E.5,000,000.

The Jordanian Parliament was suspended on June 18 for three months, following a Cabinet meeting presided over by King Hussein. No reason was given for the decision. - (Times - Daily Telegraph - Le Monde, Paris) **(Prev. rep. 15561 A; Arab Subsidies to Jordan, 15340 A.)**

B. NEW ZEALAND. — Five-Year Defence Plan.

A new five-year defence plan was announced in Wellington on June 12 in the form of a White Paper. It proposed (*a*) drastic cuts in New Zealand's National Service scheme; (*b*) the despatch of an infantry battalion and a squadron of *Canberra* jet bombers to Malaya as part of the Commonwealth's Strategic Reserve; (*c*) the formation of a highly mobile brigade group, ready for immediate overseas service in the event of a major war. The total cost for the five-year period was given as £155,720,000 sterling—an increase on existing expenditure of £4,000,000.

Defence Policy. The White Paper stated that as a result of a study of the far-reaching changes in British and Australian defence policies, New Zealand's defence would be brought into close conformity with the new "Commonwealth line"—a shift in emphasis from manpower to modern mobile forces. At the same time emphasis would be placed on those forces to be immediately available in the event of a major war. It was pointed out, however, that New Zealand could not afford the excessive cost of nuclear weapons even if they should be available; nevertheless, forces equipped with conventional weapons were still required, not only in global war but in limited conflicts.

Reorganization of Forces and Overseas Commitments. After pointing out that New Zealand could not be defended by local measures to protect the home area, and must continue to rely for her security on the power of her allies while making in return a fair contribution to the collective defence effort, the White Paper declared that South-East Asia would be the sphere of New Zealand's operations. The threat in South-East Asia, which was "primarily a land threat," meant that New Zealand's most effective contribution to collective defence would be an infantry battalion as part of the Commonwealth Strategic Reserve in Malaya.

Accordingly, at the request of the British Government, an infantry battalion would be sent to Malaya immediately as part of the Commonwealth brigade stationed in that country, replacing a British battalion. Steps would also be taken to organize in New Zealand a fully-equipped brigade group capable of immediate mobilization for overseas service. The commitment to provide an infantry division for overseas service in the event of war would be retained, but this division (of which the brigade group would form part) would be streamlined for quick mobilization.

In the Royal New Zealand Air Force two interdictor squadrons of *Canberras* would replace the present fighter-ground attack squadrons of *Vampires* and *Venoms*. One of these new squadrons would be stationed in Malaya, where it would replace the N.Z. Special Air Service Squadron to be withdrawn in November, and the other in New Zealand. The existing composition of the Royal New Zealand Navy would be maintained.

National Service. The compulsory military training scheme would be modified by raising the age-limit of National Service trainees from 18 to 20; by lowering the annual Army intake to 5,000; by reducing the reserve liability from six years to three; and by withdrawing the Navy and Air Force from participation in the scheme, so that these two Services would become virtually Regular forces. The Territorial Air Force would be disbanded. It was stated that under the existing scheme, started in 1950, more than 70,000 youths had done 10½ weeks' camp on call-up, and an additional 17 days' training a year for the following three years.

The total expenditure over the five-year period was divided as follows: Navy, £36,750,000; Army, £56,520,000; Air Force, £62,450,000.

Expenditure estimates for the Armed Forces during the fiscal year 1956-57 were £26,700,000, or £2,000,000 more than in 1955-56. The total was divided as follows: Navy, £6,500,000; Army, £8,100,000; Air Force, £9,750,000; defence construction, £2,350,000.—(Directorate of Information, Wellington - Times) **(Prev. rep. Australian Defence Policy, 15504 A; British Defence Policy, 15493 A; New Zealand Defence Policy, 14211 A.)**

JUNE 22—29, 1957

A. CANADA. — General Election. - Defeat of Liberal Government. - Resignation of Mr. St. Laurent. - Conservative Ministry formed by Mr. Diefenbaker.

General elections held in Canada on June 10 resulted in the defeat of the Liberal Party, which had been in power for 22 years. The Progressive Conservative Party led by Mr. John G. Diefenbaker was returned as the largest party in the new Federal House of Commons (the 23rd of the Confederation), but without an overall majority. Mr. Louis St. Laurent, the outgoing Prime Minister, resigned on June 17 and a Progressive Conservative Ministry was formed by Mr. Diefenbaker on June 21.

The General Elections.

The former Parliament was dissolved by the Governor-General (Mr. Vincent Massey) on April 12, the state of the parties at the dissolution being as follows: Liberals 168, Progressive Conservatives 50, Co-operative Commonwealth Federation (C.C.F.) 22, Social Credit 15, Independents three, with seven vacancies.

Only one of the 265 seats was filled by an unopposed return—Burin-Burgeo (Newfoundland), where the sitting Liberal member was re-elected by acclamation. The Liberals contested all the 264 seats at stake; the Progressive Conservatives contested 257 seats; the C.C.F. presented 162 candidates; and the Social Credit Party entered 116 candidates, against 71 at the last (1953) elections. An additional 69 candidates ran as Independents or under a variety of party titles, but only 10 Labour-Progressive (Communist) candidates were put forward, compared with 100 in 1953.

Results of the general election were as follows, showing comparison with the 1953 elections:

	1957 Seats	1957 Votes (provisional)	1953 Seats	1953 Votes
Progressive Conservatives	110	2,378,632	51	1,749,009
Liberals	104	2,509,998	170	2,744,820
C.C.F. (Labour) ..	25	676,868	23	636,292
Social Credit	19	408,734	15	305,551
Others	6	191,845	6	204,584

Notes. (1) The voting figures for 1957 are the latest available, covering returns from 40,404 of the 43,074 polling stations.

(2) The election in one constituency (Wellington South, Ontario) was postponed to July 15 owing to the death of the Liberal candidate before polling day.

(3) "Others" comprise two Independents, two Independent Liberals, one Liberal-Labour and one Independent-Progressive Conservative.

The Progressive Conservatives more than doubled their representation, gaining 59 seats (56 from the Liberals and three from the C.C.F.) and polling 630,000 more votes than in 1953. Their biggest gains were in Ontario, where they won all but one of the seats in Toronto and 60 of the 85 seats in the province as a whole. In the maritime provinces the Progressive Conservatives won ten seats in Nova Scotia (against only one previously), five in New Brunswick, all four seats in Prince Edward Island, and two in Newfoundland, a strongly Liberal province. Elsewhere, they won eight seats in the traditionally Liberal province of Quebec (a gain of four) and polled well in Manitoba and British Columbia, the latter province showing a marked swing to the Conservatives despite the fact that it has a Social Credit provincial government. All leading members of the party were elected, Mr. Diefenbaker being returned for his home constituency of Prince Albert (Saskatchewan) with a 6,000 majority in a three-cornered contest.

The Liberals, who had been in power since 1935, returned 66 fewer members than in 1953 and dropped about 235,000 votes, though the aggregate Liberal vote still exceeded the Conservative vote, as shown in the table above. Of the 104 Liberal members in the new House of Commons, 62 were returned in Quebec, out of the 75 seats in that province. The only other province where the Liberals won a majority was Newfoundland (five seats out of seven), while in New Brunswick they won five of the ten seats and the Progressive Conservatives the other five. In all other provinces the Liberals lost heavily, particularly in Ontario and Nova Scotia. While gaining three seats from Independents and two from the Progressive Conservatives, they lost 56 seats to the latter party, five to the C.C.F., three to the Social Credit Party, two to Independent Liberals, and one to an Independent Progressive. Mr. St. Laurent, the party leader and outgoing Prime Minister, was re-elected in Quebec East with a 17,000 majority in a three-cornered contest, while Mr. Lester Pearson, the outgoing Minister of External Affairs, was returned for Algoma East (Ontario) with a 2,700 majority, also in a three-cornered contest. Nine former Liberal Ministers, however, lost their seats—Mr. C. D. Howe (Trade, Commerce and Defence Production), Mr. Walter Harris (Finance), Dr. J. J. McCann (National Revenue), Mr. Stuart Garson (Justice), Mr. Milton Gregg, V.C. (Labour), Mr. Robert Winters (Public Works), Mr. Hugues Lapointe (Veterans' Affairs), Mr. Ralph Campney (National Defence) and Mr. Paul Hellyer (Associate Minister of National Defence).

Mr. Howe lost his seat at Port Arthur (Ontario) to a C.C.F. candidate, while Mr. Harris, Dr. McCann, Mr. Garson (the former Premier of Manitoba), Mr. Milton Gregg, Mr. Winters, Mr. Lapointe, Mr. Campney and Mr. Hellyer were all defeated by Progressive Conservative candidates.

Mr. Campney, the former Minister of National Defence, was defeated at Vancouver-Centre (a constituency which includes Vancouver's "Chinatown") by Mr. Douglas Jung, the first Chinese-Canadian member of the Dominion House of Commons. Mr. Jung, a lawyer with a distinguished war record, was born at Victoria (B.C.) of Chinese immigrant parents from Canton. Mr. Hellyer, who lost his seat at Toronto-Davenport, had been appointed Associate Minister of Defence only a month before the general election. The Lotbinière constituency (Quebec), in which Mr. Lapointe was defeated, had never elected a Conservative since Confederation in 1867. Mr. Howe (71), who had been a member of the Cabinet for 22 years, announced after the general election that he intended to retire from political life.

The C.C.F. slightly improved its position, returning two more members than in 1953 and increasing its poll by 40,000. As shown in the tables below, nearly all its seats were won in the prairie provinces and British Columbia. The C.C.F. gained five seats from the Liberals and lost three to the Progressive Conservatives. Mr. Coldwell, the party leader, was re-elected for Rosetown-Biggar (Saskatchewan) with a majority of nearly 5,000 in a four-cornered contest.

The Social Credit Party gained appreciably in votes (103,000 more than in 1953) and seats (four more than at the last elections), 13 of its 19 members being returned in Alberta and the other six in British Columbia. Mr. Solon Low, the party leader, was re-elected for Peace River (Alberta) with a 4,000 majority in a five-cornered contest. Three Social Credit gains were at the expense of the Liberals.

Party representation in the new House of Commons by provinces is as follows, the number of seats in each province being shown in parentheses (abbreviations—L. Liberals; P.C., Progressive Conservatives; C.C.F., Co-operative Commonwealth Federation; S.C., Social Credit; Ind., Independents and others):

	P.C.	L	C.C.F.	S.C.	Ind.
Newfoundland (7)	2	5	—	—	—
Prince Edward Island (4) .	4	—	—	—	—
Nova Scotia (12)	10	2	—	—	—
New Brunswick (10)	5	5	—	—	—
Quebec (75)	8	62	—	—	5
*Ontario (85)	60	20	3	—	1
Manitoba (14)	8	1	5	—	—
Saskatchewan (17)	3	4	10	—	—
Alberta (17)	3	1	—	13	—
British Columbia (22) ..	7	2	7	6	—
Yukon (1)	—	1	—	—	—
North-West Territories (Mackenzie River) (1) ..	—	1	—	—	—

*One deferred election in Ontario as explained above.

Over 6,166,000 voters went to the polls (about 71 per cent of the electorate), compared with 5,640,256 in 1953 (67.1 per cent) and 5,848,256 in 1949. The Progressive Conservatives polled 39 per cent of the total vote, against 31 per cent in 1953 and 30 per cent in 1949; the Liberals obtained 41 per cent, against 49 per cent in 1953 and 50 per cent in 1949; the C.C.F. received 11 per cent, the same as in 1953 but comparing with 13 per cent in 1949; and the Social Credit Party obtained six per cent, against five per cent in 1953 and two per cent in 1949.

Party votes by provinces (returns from 40,404 out of 43,074 polling stations and thus subject to final adjustment) were as follows for the four major parties:

	P.C.	L.	C.C.F.	S.C.
Newfoundland . ..	33,286	53,806	321	—
Prince Edward Island ..	33,404	29,370	646	—
Nova Scotia	189,432	166,837	15,948	457
New Brunswick	102,355	99,574	1,665	2,407
Quebec	492,888	962,110	30,498	3,851
Ontario	1,028,447	778,791	266,250	31,223
Manitoba	118,191	83,465	80,237	43,016
Saskatchewan	81,862	108,613	127,809	38,256
Alberta	114,313	111,626	26,072	153,960
British Columbia ..	182,938	113,176	127,422	135,564
Yukon and North-West Territories	1,516	2,630	—	—

No Social Credit candidates stood in Newfoundland and Prince Edward Island, and only Liberal and Conservative candidates in Yukon and the North-West Territories.

Resignation of Mr. St. Laurent. - Progressive Conservative Cabinet formed by Mr. Diefenbaker.

As the Progressive Conservatives did not command an overall majority in the new House of Commons, and were thus dependent on the support of other parties, there was much comment in the Canadian Press as to the possibility of another general election in the fairly near future to resolve the *impasse* arising out of the June elections. Mr. Coldwell announced on June 11 that the C.C.F. would not participate in any coalition but would vote on each legislative measure on its merits. The Social Credit leader, Mr. Solon Low, stated on the same day that his party would co-operate with whatever government was formed "until it becomes desirable to have an election to break the stalemate."

After discussions between Mr. Diefenbaker and Mr. St. Laurent, the latter submitted his resignation to the Governor-General on June 17. In a post-resignation statement Mr. St. Laurent said that as the Progressive Conservatives had the largest number of members in the new Parliament he had "reached the conclusion that the proper course was to submit the resignation of the Liberal administration to the Governor-General."

Mr. Diefenbaker agreed on June 18 to form a government, the new Ministry—recruited entirely from the Progressive Conservative Party—being sworn in by the Governor-General on June 21. Its membership was as follows:

Mr. John G. Diefenbaker ..	Prime Minister and External Affairs.
Major-General G. R. Pearkes, V.C.	National Defence.
Mr. Gordon Churchill ..	Trade and Commerce.
Mr. George Nowlan	National Revenue.
Mr. Donald Fleming	Finance.
Mr. Davie Fulton	Justice.
Mr. Michael Starr	Labour.
Mr. Howard Green	Public Works.
Mr. George Hees	Transport.
Mr. Angus Maclean	Fisheries.
Mr. Douglas Harkness ..	Northern Affairs.
Mrs. Ellen Fairclough ..	Secretary of State.
Mr. Leon Balcer	Solicitor-General.
Mr. A. J. Brooks	Veterans' Affairs.
Mr. William Hamilton ..	Postmaster-General.
Mr. James Macdonnell ..	Ministers without portfolio.
Mr. Willam J. Browne ..	

Mr. John George Diefenbaker (61) was born in Ontario in 1895, the son of a school-teacher who settled in the West in 1903. He became a prominent lawyer in Saskatchewan, led the Progressive Conservatives in that province for many years, and was returned to the Federal Parliament in 1940 as M.P. for Lake Centre, later representing his present constituency of Prince Albert. He was elected leader of the Progressive Conservative Party in December last in succession to Mr. George Drew (see 15307 F). During the First World War Mr. Diefenbaker served as an infantry officer, being invalided home in 1917. A Baptist, he is of Dutch and Scottish descent, his family having been settled in Canada for more than a century. He has always advocated the maintenance of close links between Canada and the Commonwealth.

Major-General Pearkes (69) was born at Watford (England), educated at Berkhamsted School, and went to Canada in 1906. He served in the North-West Mounted Police (now the Royal Canadian Mounted Police) before 1914, won the V.C. in the First World War, and was a Regular Army officer between the two wars, becoming G.O.C. First Canadian Division in 1941 and G.O.C.-in-C. Canadian Pacific Command from 1942-45. He was elected to the Federal Parliament in 1945 for Esquimalt-Saanich (British Columbia) and became the Opposition's principal spokesman on defence matters.

Mr. Fleming (52), a barrister, was runner-up for the Conservative leadership when Mr. Diefenbaker was elected party leader in December; M.P. for Toronto-Eglinton, he was a vigorous critic of the Liberal Government's taxation and financial policies and also strongly opposed the Government's policy in the Suez crisis. **Mr. Nowlan,** a barrister, is a former president of the National Conservative Association and M.P. for a Nova Scotia constituency. **Mr. Hees** (47), a prominent member of the Progressive Conservative Party, studied at the Universities of Toronto and Cambridge, served overseas in the last war, and is M.P. for Toronto-Broadview.

Mrs. Ellen Fairclough (52), a public accountant, is the first woman in Canadian history to reach Cabinet rank; she is M.P. for Hamilton West and has specialized in labour and social questions. **Mr. Harkness** (54), a farmer, is a graduate of the University of Alberta and was formerly a school-teacher; M.P. for Calgary, he was an artillery officer in the last war and won the George Medal. **Mr. Brooks** (67), formerly Conservative organizer in New Brunswick and an inspector of schools, served in both World Wars and has been a member of the Federal Parliament since 1935.

Mr. Churchill (59), a barrister and former school principal, won the D.S.O. in World War II as Commander of the First Canadian Armoured Carrier Regiment in North-West Europe; he represents a Winnipeg constituency. **Mr. Starr** (46), who is of Ukrainian descent, was Works Commissioner for Oshawa (a motor industry centre) during the depression years and mayor of that town from 1949-52; he has been an M.P. since 1952. **Mr. Fulton** (41), M.P. for Kamloops (B.C.) since 1945, is a Rhodes Scholar and served overseas in the last war; he was a leading Opposition speaker in the pipeline controversy (see 15067 A).

Mr. Balcer, president of the National Conservative Association, served in the Royal Canadian Navy throughout the war and has been M.P. for Three Rivers (Quebec) since 1949. **Mr. Maclean** (42), a farmer from Prince Edward Island, served with the Royal Canadian Air Force from 1939-47, won the D.F.C., and became an M.P. in 1952. **Mr. Hamilton** (38), the youngest member of the Cabinet, represents the Montreal constituency of Notre-Dame-de-Grâce and is an advertising executive by profession. Though crippled by poliomyelitis, he is one of the leading Conservative organizers in Quebec and has been an M.P. since 1953.

Mr. Green (62), a barrister, was an infantry officer in the First World War and has represented a Vancouver constituency since 1935; he was a leading critic of the Liberal Government's policy in the Suez crisis. **Mr. Macdonnell** (72), a barrister, studied at Oxford and distinguished himself in the Canadian artillery during the First World War; he has represented Toronto-Greenwood since 1945. **Mr. Browne** (60), a Rhodes Scholar, has been prominent for many years in Newfoundland political life.

Ontario has five representatives in Mr. Diefenbaker's administration, British Columbia three, Quebec two, and the other provinces one each. The average age of the new Cabinet (54) is well below that of the outgoing Liberal Ministry. (Montreal Star - Canadian Department of External Affairs - Times) **(Prev. rep. General Elections (1953), 13105 A; Mr. Diefenbaker, 15307 F.)**

A. UNITED KINGDOM. — £2,000,000 Expansion Plan for University of Durham.

Details of a £2,000,000 expansion plan for the University of Durham were given on June 17 by Sir James Duff, the Vice-Chancellor of the University, at a press conference in London at which he launched an appeal for £250,000.

Sir James Duff explained that the appeal was being launched for the Durham division of the University and not for King's College, Newcastle, which was separately financed. The expansion plan would provide for a new college for 200 men students, a new laboratory block to house the departments of chemistry and geology, a new and greatly enlarged department of applied physics (including an expansion of the present work in electronics), new lecture halls, and increased residential accommodation for men and women students. It was hoped within a few years to increase the number of science students from 400 to 1,000 and to bring the total number of students at Durham from 1,300 to 2,000.

It was stressed by Sir James Duff that funds were not being sought for the upkeep of the University's ancient buildings, which were fully provided for. He pointed out in this connexion that some of the buildings of the University of Durham were older than those at Oxford and Cambridge and that Durham, like the two older universities, was both residential and collegiate.

The University of Durham, the third oldest in England after Oxford and Cambridge, was originally established by Oliver Cromwell but was closed at the Restoration. It was founded by Act of Parliament in 1832, when Durham Castle (built in 1080) was turned over to the university authorities by the Bishop of Durham. The Castle now houses part of the University of Durham, of which the constituent colleges are University, Hatfield, St. Chad's, St. John's, St. Mary's, and Bede. The Newcastle division consists of King's College, which is devoted primarily to science.—(Times - Manchester Guardian)

B. NORWAY - SOVIET UNION. — Sharing of Hydro-electric Resources on Norwegian-Soviet Frontier.

A commission of Norwegian and Soviet experts met in Moscow from May 22 to June 6 to discuss the sharing of hydro-electric power resources on the Norwegian-Soviet frontier, a matter which had previously been discussed with Hr. Gerhardsen (the Norwegian Prime Minister) during his visit to Moscow in November 1955.

The commission agreed that hydro-electric power stations would be built by the Soviet Union in the lower and upper sectors of the Pasvik (Patsjoki) River, which forms the frontier between the two countries, and by Norway in the central sector. Agreement was also reached on such questions as creating favourable conditions for both countries in constructing and operating the stations, and on mutual compensation for damage to either party caused by constructional work or by the flooding of the Pasvik River.

The draft agreement will be submitted to both Governments for ratification.—(Norwegian and Soviet Embassies, London) **(Prev. rep. 14586 C.)**

A. SIAM. — Legalization of Political Parties. - General Elections. - New Cabinet formed by Field-Marshal Pibul Songgram.

Following general elections held on Feb. 26, 1957, the Siamese Prime Minister (Field-Marshal Pibul Songgram) formed a new Cabinet on March 29. The elections were the first to be held since the legalization in September 1955 of political parties, which had been banned since Marshal Pibul seized power in 1947. Details of these and other recent political developments in Siam are given below.

Legalization of Political Parties.

The House of Assembly passed a Bill on Sept. 20, 1955, authorizing the establishment of political parties provided they registered with the Ministry of the Interior and gave details of their leadership and policy principles. Registration was limited to parties whose principles were not in conflict with the Constitution, and which were supported by either 12 members of the Assembly or 1,000 private individuals. An official spokesman explained that a Socialist party "on the British model" would be permitted, but not a Communist party.

Marshal Pibul was reported to have decided to permit a greater measure of political freedom as a result of his experiences during a world tour in May and June 1955, in the course of which he had visited Washington and London. As part of the same policy, he dissolved the Legislative Study Commission (the committee of pro-Government deputies which had largely usurped the functions of the Assembly), granted increased freedom to the Press, and authorized the use of a large open space in Bangkok as an "Orators' Corner," modelled on that in Hyde Park, London.

Three main political parties were formed under the new law: (1) The *Seri Manangasila* party, consisting of Government supporters and deriving its name from the villa in which the Legislative Study Commission had met; Marshal Pibul was elected its leader, General Sarit Thanarat and Air-Marshal Fuen Ronabhakas Riddhagni (the respective commanders of the Army and Air Force) its deputy leaders, and General Phao Sriyanond (director-general of police) as secretary-general. (2) The Democratic (*Prachatipat*) party, led by two former Premiers (Nai Khuang Aphaiwongse and Mom Rajawongse Seni Pramoj), right-wing liberal in outlook and pro-Western in foreign policy. (3) The Economists' (*Sethakorn*) party, a left-wing and "neutralist" organization led by a member of the Assembly, Nai Thep Jotinuchit, and including former supporters of Nai Pridi Panomyong, a former Prime Minister and wartime Free Thai leader, who is living in exile in China. In addition, some 20 other parties were formed before the general elections.

The introduction of freedom of speech and the Press was followed by a violent propaganda campaign against certain members of the Government and the police. Great prominence was given to a scandal caused by the payment of £500,000 to the police as a reward for the seizure of 20 tons of smuggled opium, for which General Phao was alleged to be responsible, and which gave rise to allegations of connivance between the police and opium smugglers. The police were also accused of being responsible for the illegal detention, disappearance, or violent deaths of opponents of the régime. Moreover, a section of the Press criticized the acceptance of U.S. aid on the grounds that it had been granted mainly for military purposes and was making Siam economically dependent on the United States, and demanded the development of trade with China.

General Elections.

In the general elections held on Feb. 26, 1957, the *Manangasila* party secured 85 of the 160 elected seats and other pro-Government parties eight. The Democratic Party won 28 seats, left-wing groups 19, and smaller parties and Independents 20. In Bangkok, where over 50 candidates contested the nine seats, Marshal Pibul headed the list of successful candidates and the Democratic leader (Nai Khuang) came second, six of the remaining seats being won by Government supporters and one by a Democrat.

Allegations were made immediately after the elections that they had been "rigged," the Democratic Party announcing that it would appeal to the courts to declare them null and void. Specifically, Nai Khuang alleged that in Bangkok (where the Democrats had been expected to win a majority of the seats) some electors had discovered that votes had already been cast in their names, and that in at least one polling-booth only the numbers of Government candidates were available. [Electors voted by affixing the number allotted to a particular candidate to their ballot papers and then inserting them in the ballot-box.] The Government announced on Feb. 7 that an inquiry would be held into these charges.

The Government declared a state of emergency on March 2, alleging that an "organized group conspiring with foreign nationals" had planned to overthrow the Government; at the same time it banned all gatherings of more than five persons, and appointed Field-Marshal Sarit as supreme commander of the armed forces and the police. Although Bangkok was patrolled by troops equipped with tanks and machine-guns, several thousand students demonstrated during the day in defiance of the emergency regulations, demanding the holding of new elections and the revocation of the state of emergency. Marshal Pibul, who addressed the students personally, said that the question of new elections must be settled by the courts; the demonstrators declared themselves dissatisfied with this reply, but dispersed peacefully after being addressed by Marshal Sarit, who expressed the opinion that the elections had been "completely dirty." The state of emergency was ended on March 13, the day before the meeting of the new Assembly.

A new Cabinet was formed by Marshal Pibul on March 29, the Foreign Affairs portfolio being retained by Prince Wan Waithayakon, permanent Siamese representative at the United Nations and President of the U.N. General Assembly. Its membership was as follows:

Field-Marshal Pibul Songgram—Prime Minister; Field-Marshal Sarit Thanarat—Defence; Colonel Vorakarn Bancha—Finance; Prince Wan Waithayakon—Foreign Affairs; Field-Marshal Phin Chunhawan—Agriculture; General Banyat Thephasdin Na Ayuthia—Communications; General Phao Sriyanond—Interior; Phya Ladpli Thamprakan—Justice; Admiral Luang Yuttasart Kosol—Culture, Phra Vejyant Rangsarit—Education; Phra Boriphand Yudhakit—Economic Affairs; General Siri Siryothin—Co-operatives; Air-Marshal Fuen Ronabhakas Riddhagni—Public Health; General Pramarn Andirekasarn—Industry. There were also 14 Deputy Ministers.

The Cabinet changes were regarded as strengthening the position of Marshal Sarit, whose influence and popularity had greatly increased as a result of his tactful handling of the student demonstrations. Marshal Pibul relinquished the Ministries of Defence and the Interior, which he had previously held, and General Phao tendered his resignation as chief of police on becoming Minister of the Interior. Colonel Vorakarn (the new Finance Minister) and General Prapart Charusathien (appointed Deputy Minister of the Interior) were both regarded as personal supporters of Marshal Sarit.—(Times - Daily Telegraph - Manchester Guardian - New York Times)

B. UNITED NATIONS. — Postponement of U.N. Conference for Review of Charter.

A General Assembly committee, consisting of representatives of all 81 member-countries of the United Nations, met at U.N. headquarters in New York on June 3 to consider the question of fixing the time for a general conference to review the U.N. Charter. In the face of strong opposition to any review from the U.S.S.R. and the Soviet-bloc countries, the majority of the delegates felt that, while a review was desirable, the present time was not appropriate for it.

Sir Pierson Dixon (U.K.) recalled that Britain was one of the seven countries which were responsible in 1955 for the motion setting up the committee, in the belief that it was desirable to review the Charter in the light of experience gained during the first 10 years of the United Nations. It had been recognized, however, that such a review should be conducted "under auspicious circumstances," and at the present moment it was not possible to say that the requisite conditions existed. If there was no hope of unanimity, including agreement between the "Big Five," any attempt to bring about a Charter review might prove "fruitless and even frustrating."

The British view was supported, *inter alios*, by M. Georges-Picot (France), Mr. Wadsworth (U.S.A.), and Mr. Mackay (Canada), and also by a number of speakers from "uncommitted countries," including Mr. Krishna Menon (India), M. Ninchich (Yugoslavia), and the Indonesian representative

M. Arkadiev had emphasized the Soviet Union's opposition to any review of the Charter "as it stands now," asserting that shortcomings in the U.N. were not caused by "alleged defects in the Charter but by the policy followed by certain States in contravention of the Charter." He added that any revision of its basic principles would only "undermine" the Charter as well as international co-operation.

By 67 votes to nil, with nine abstentions, the committee adopted a resolution sponsored jointly by Brazil, Canada, Egypt, El Salvador, India, Indonesia, the Irish Republic, Liberia, Panama, and Persia. The resolution recommended to the 12th session of the Assembly (i) that it should decide to keep the committee in being, and (ii) that it should request the committee to report not later than the 14th Assembly session (1959) on the time and place for a general conference to review the Charter.

The abstaining countries were the Soviet Union, Albania, Bulgaria, Byelorussia, Czechoslovakia, Hungary, Poland, Rumania, and the Ukraine. Five members were absent from the vote.—(United Nations Information Centre, London)

A. FINLAND. — Bulganin-Khrushchev Visit.

Marshal Bulganin and M. Khrushchev visited Finland from June 6-13 at the invitation of President Kekkonen and the Finnish Government. They were accompanied by M. Gromyko (the Soviet Minister of Foreign Affairs), M. Mikhailov (Minister of Culture), M. Kumykin (Deputy Minister of Foreign Trade), and other senior officials, including General Serov, head of the Soviet security police.

During their visit to Helsinki the Soviet leaders had a number of discussions with M. Sukselainen (the Finnish Prime Minister), M. Virolainen (Foreign Minister), M. Memander (Finance Minister), and M. Kaitila (Minister of Commerce), and also with President Kekkonen and M. Fagerholm, the former Prime Minister and now president of the Finnish Diet. In addition they attended a State banquet; were officially received at the Finnish Parliament; and attended the celebrations of the 50th anniversary of the Finnish trade union movement. They also visited the new town of Tapiola (now being built near the capital), Tampere, and the industrial centres of Kaipola and Jamsankoski.

A joint communiqué was issued on June 12 on the discussions between the Soviet and Finnish leaders, its principal sections being as follows (cross-headings inserted):

Soviet-Finnish Relations. "In the course of the discussions, which were held in an atmosphere of friendship, the statesmen of both countries noted, to their general satisfaction, that in spite of differences in their social systems, the relations between the two countries have developed most favourably in recent years, and that frank and good-neighbourly relations, founded on mutual respect, confidence and understanding, have now been established between the Soviet Union and Finland. The Soviet and Finnish Governments are sincerely resolved to maintain good and friendly relations based on mutual confidence. All the necessary preconditions for this exist, provided both sides observe the principles of respect for the sovereign and national independence of the two States and non-interference in each other's domestic affairs, in conformity with the [Finno-Soviet] Treaty of Friendship, Co-operation and Mutual Assistance signed in 1948 and extended for 20 years in 1955."

Finnish Neutrality Policy. "It was noted that this treaty is a major factor for the security of Finland and for peace in Northern Europe, which also corresponds to the interests of the security of the Soviet Union. At the same time the treaty is the first international document stating that the aim of Finland's foreign policy is to keep aloof from contradictions between the interests of the great Powers. The Finnish side stated that Finland, as a neutral country, would continue to avoid anything that makes for tension in international affairs and would work for everything that promotes agreement between peoples, brings them closer together, and eliminates tension. She is striving to do this primarily in that part of Europe in which she is situated . . . Finland, which does not belong to any of the present great-Power groupings, hopes that agreement will be reached between these groupings, in particular as regards a firm and lasting peace in Europe. This would be of decisive importance for the re-establishment of international confidence throughout the world."

International Security and Disarmament. "The discussions showed that the Soviet Union and Finland are unanimous in believing that they are unswervingly seeking to maintain international peace and security in conformity with the U.N. Charter and the aims and principles set forth therein. Both Governments are of the opinion that implementation of the principle of the Organization's universality is a natural prerequisite for its successful work. Bearing in mind the importance of consolidating world peace, both Governments attach great importance to achieving practical results in the sphere of disarmament. They declare their belief in the need for international agreements for the unconditional prohibition of atomic and hydrogen weapons under appropriate international control, and for the early and unconditional ending of tests of these weapons.

Soviet-Finnish Trade. "The two sides noted with satisfaction that trade relations between them are developing successfully on the basis of the five-year trade agreement for 1956-1960, concluded in 1954. As a result of the talks, a protocol was signed on additional supplies by the U.S.S.R. and Finland in 1957. Under this protocol the Soviet Union will deliver to Finland diesel oil, petrol, paraffin, coal, steel billets, rolled wire, sheet steel and non-ferrous metals, and also quantities of sugar and wheat. Finland will deliver to the Soviet Union power and other cables, cellulose, wood-pulp, various types of cardboard and paper, and woodworking machinery. The cost of these additional deliveries will amount to approximately 100,000,000 roubles. Agreement was also reached on certain practical measures concerning trade between Finland and the Leningrad area."

Soviet-Finnish Cultural Relations. "Views were also exchanged on the cultural ties between the two countries. It was noted that these ties have been extended considerably in recent years, particularly in the fields of science, technology, education, and the arts. Personal contacts between individuals and between public and cultural organizations have developed steadily. Considering these developments to be beneficial to both countries, the two sides agreed that the development of cultural links between them should be expanded in the future . . ."

Finally, the communiqué announced that Marshal Bulganin and M. Khrushchev had invited President Kekkonen to visit the Soviet Union, and that the invitation had been accepted.

At a press conference in Helsinki on June 13 Marshal Bulganin held out Soviet-Finnish relations as an example for the relations between the Soviet Union and the other Scandinavian countries.

"We are firmly convinced after this visit," he said, "that the people of Finland do not want war and are sincerely striving for peace. Finland pursues a peaceful foreign policy. We note with satisfaction that the Finnish Government . . . will continue to work for everything that helps to bring peoples closer together and to eliminate differences in international relations. We are convinced that if the other Northern countries followed a similar foreign policy, it would be a big contribution to the maintenance of peace in Europe, and not only in Europe.

"Good-neighbourly relations among the countries of Northern Europe are of great importance for international peace. The Soviet Government has always regarded the task of ensuring a lasting peace in that part of Europe, through the strengthening of its friendly relations with all Northern countries, as one of its foremost aims. We make no secret of the fact that we attach great importance to reaching agreement with the Scandinavian countries. The Soviet Government believes that it would be useful to proceed with the joint quest for mutually acceptable forms of peaceful co-operation between the U.S.S.R. and these countries in the interests of ensuring security in Northern Europe. The U.S.S.R. is striving to develop practical co-operation with the Northern countries in such questions as, for instance, fishing and scientific research in the Baltic area, the joint exploitation of hydro-resources in Northern Europe, sea-rescue services, etc.

"The Soviet Union is ready to develop all-round friendly connexions with the Northern countries, based on respect for each other's national sovereignty, independence, equality, non-interference in domestic affairs, and mutual advantage. This would conform not only to the interests of peace in this part of Europe but also to the interests of world peace. It is our hope that a sober policy, dictated not by narrow, transitory considerations but by the vital interests of the peoples desirous of living in peace and friendship with one another, will prevail in all the Scandinavian countries as well. It is our opinion that the Scandinavian countries should be just as interested in the maintenance of friendly relations with the Soviet Union."

Marshal Voroshilov, the President of the Soviet Union, had previously visited Helsinki from Aug. 21-26, 1956, as the guest of President Kekkonen. The visit was the first to be paid by the head of the U.S.S.R. to a non-Communist country. (Times - Daily Telegraph - Manchester Guardian - Soviet Embassy Press Department, London) **(Prev. rep. 15385 A.)**

B. UNITED KINGDOM. — Completion of British Hydrogen-Bomb Tests in the Pacific.

The British hydrogen-bomb tests in the Pacific, the first of which took place at Christmas Island on May 15 (15540 A), were completed by two further tests on May 31 and June 19. As in the first test, the bombs were dropped from a *Valiant* bomber and exploded at high altitude to minimize radioactive fall-out, which was stated to be almost negligible.

The second test was carried out in the vicinity of Malden Island (400 miles south of Christmas Island), which was evacuated for the test but contained a mass of instruments to measure the effect of the blast. The official announcement stated that the explosion was bigger than in the first test. As regards the third and final test, the announcement merely said that a nuclear device had been "exploded at a high altitude in the Central Pacific" and that the test series had been successfully completed.

The tests were carried out on an inter-Service basis, with Air Vice-Marshal W. E. Oulton as commander of the task force. Over 2,000 men and 16 vessels of the Royal Navy were engaged in duties ranging from the supplying of fuel, food and water to meteorological observation and aircraft tracking. The 18,000-ton aircraft carrier H.M.S. *Warrior* acted as operational control ship in the target area, the other vessels engaged including five tankers, three vessels of the "Fort" class, and two frigates of the Royal New Zealand Navy. About 1,300 R.A.F. personnel co-operated with the Royal Engineers in building an airfield on Christmas Island capable of operating jet bombers.

The Science Correspondent of the *Daily Telegraph* (Mr. Leonard Bertin), who was one of the press representatives with the task force, described the building of this airfield as "the largest undertaking so far made by a British service group in the use of coral mixed with cement and bitumen for the preparation of an airstrip." He added that the men, "working in temperatures of 85 to 90 degrees, completed runways of 6,500 ft. and 5,000 ft."—(Times - Daily Telegraph) **(15540 A.)**

A. BAGHDAD PACT. — Meetings of Ministerial Council and Committees. - Increased British and U.S. Contributions for Economic Development. - U.K. Contribution to Military Infrastructure. - Baghdad Powers' Support for Eisenhower Doctrine. - U.S. Membership of Military Committee. - Road, Rail and Telecommunications Plans for Baghdad Pact Area.

The Council of Ministers of the Baghdad Pact held its third session in Karachi from June 3-6 under the chairmanship of Mr. Suhrawardy, the Prime Minister of Pakistan. The session was attended by the Prime Ministers and Foreign Ministers of Iraq (General Nuri es-Said and M. Bashayan), Pakistan (Mr. Suhrawardy and Mr. Firoz Khan Noon), Persia (Dr. Eghbal and M. Ardalan), and Turkey (Mr. Adnan Menderes and M. Ethem Menderes), and by the British Foreign Secretary (Mr. Selwyn Lloyd). The U.S.A. was represented by a delegation of observers headed by Mr. Loy W. Henderson, Deputy Under-Secretary of State.

Prior to the meeting of the Ministerial Council, the Economic Committee and the Counter-Subversion Committee of the Baghdad Pact had met in Karachi from May 16-21 and May 22-29 respectively, while the Military Committee met concurrently with the Council from June 3-5. The U.S.A. was for the first time represented on both the Economic and Military Committees, having announced its intention to join the latter at the Bermuda Conference between President Eisenhower and Mr. Macmillan (see page 15450, first column), and having accepted a formal invitation to that effect by the Ministerial Council at its opening meeting.

During the meetings of the Economic Committee, which were presided over by Abdul Qadir al-Gailani (Iraqi Ambassador to Pakistan), the U.K. Economic Secretary to the Treasury, Mr. Nigel Birch, announced that the British Government intended (i) to make a four-fold increase in their contribution for technical assistance, bringing it up to £1,000,000 spread over five years; (ii) to make another contribution of £1,000,000 for the improvement of communications in the region.

The leader of the U.S. delegation, Mr. Arthur Gardiner, announced his country's decision to allocate $12,570,000 for the survey and capital development phases of several projects, in implementation of the talks held by the Richards Mission. Agreements involving $7,500,000 were signed by the U.S.A. with Pakistan, Persia, and Turkey during the Committee's meetings, covering (i) telecommunications equipment linking the capitals of the four Middle East member-countries of the Baghdad Pact (Karachi, Teheran, Baghdad, and Ankara); (ii) an additional $800,000 to be used for a telecommunications survey; and (iii) $1,000,000 for surveys of (*a*) a road along the Arabian Sea linking Karachi with Bandar Abbas (Persia) and thence with Basra (Iraq), and (*b*) a railway line connecting Zahidan (Eastern Persia), where the Pakistani rail system now terminates, with a suitable point on the Persian railway system.

Mr. Suhrawardy announced at the Ministerial Council meeting that Pakistan had placed 500,000 rupees at the disposal of the Economic Committee for technical aid to member-countries.

A communiqué issued on May 21 announced the principal decisions of the Economic Committee as follows:

Atomic Energy. The Committee would recommend extensive research work by the Joint Nuclear Training Centre at Baghdad (see 15488 C) and the application of radioactive isotopes to medical, agricultural, veterinary, and technological work in the region. The Committee had also agreed on financial arrangements for the next two years to ensure the continued effective functioning of the Baghdad Nuclear Centre. Britain had undertaken to meet non-recurring expenditures, while the four Middle East member-countries would pay the remainder.

Communications. "Top priority" would be given to roads and railways linking Turkey, Iraq, Persia, and Pakistan. Reference was made to the above-mentioned surveys of rail and road projects.

Intra-regional Trade. The Committee urged that intra-regional trade be increased, and for this purpose recommended a draft convention on simplification of Customs formalities, examination of the problems of transit trade, facilities for visits by businessmen, co-operation in the marketing of common products, and standardization of agricultural products. It was decided to make a detailed study of the possibility of establishing a Customs union, a free trade area, and a common market in the Pact region, "with due regard to existing obligations and commitments of member-countries."

Health. The Committee decided to request X-ray equipment for tuberculosis centres throughout the Pact area out of technical assistance funds. It also initiated surveys for joint health projects.

Emergency Service. Finally, the Committee examined the possibility of establishing an "emergency service" which would stockpile medicines, blood plasma, and food for use in the event of floods, earthquakes, and other natural disasters in the area.

The session of the Military Committee was attended, *inter alios*, by General Sir Gerald Templer (Chief of the British Imperial General Staff), General Nathan F. Twining (chairman designate of the U.S. Joint Chiefs of Staff), and General Mohammed Ayub Khan (C.-in-C. of the Pakistani Army).

At the opening session of the Ministerial Council—its first meeting with British participation since the Anglo-French military action in Egypt—statements were made by all the leading delegates, as summarized below:

Mr. Suhrawardy welcomed the Eisenhower Doctrine for the Middle East, declaring that the presence of British and U.S. representatives at the Council meeting "gives the lie to those false prophets who not long ago were forecasting the coming demise of the Baghdad Pact." He expressed the hope that the U.S.A. would in time become a full member; said that the "tendency to relapse into international anarchy" had been checked through the regional defence pacts permissible under the U.N. Charter; and declared that the Baghdad Pact represented "the collective will of like-minded nations to strengthen and enhance their mutual defensive capacity in an area of the world which was lacking in defensive strength and was a source of temptation to those who dreamed of enlarging their bounds by coercing weaker nations, or creating spheres of influence, or with dreams of world domination." After stressing that the Pact was not only a military alliance but that "one of its chief aims" was to foster and develop the economic strength of member-countries, Mr Suhrawardy said that the situation in the Middle East showed a "considerable improvement," that the efforts made by member-countries "individually and in concert" had done much to make a peaceful solution of disputes possible, and that their "counsels of moderation" had been heeded by their friends.

Nuri es-Said drew attention to the dangers inherent in the problems concerning Israel, Algeria, Kashmir, and Cyprus. He said that in the Iraqi Government's view Israel was still the most serious source of danger to the Middle East area because of her "ambitious and sinister plans of expansion and aggression." Speaking of the plight of the Arab refugees, he asserted that a great number of these had already "fallen victims to international Communism." As regards Kashmir, Iraq upheld the right of the Kashmiri people to self-determination and no effort should be spared to bring about a solution consonant with the resolutions of the Security Council. In Algeria the present "full-scale colonial war" threatened to develop into a real threat to peace unless France made a positive effort to meet the Algerian people's legitimate aspirations. With regard to "the present most difficult situation in Cyprus," Iraq would support any settlement which safeguarded the rights of the Turkish population "constitutionally and internationally."

Mr. Selwyn Lloyd, recalling the contributions promised by the British Government during the meetings of the Economic Committee, announced that Britain was ready to make a further contribution of £500,000 a year in cash and in kind for building up the minimum military infra-structure in the member-countries.

M. Adnan Menderes said that until recently the Pact had been faced with a struggle for existence against destructive attacks levelled against it, and as a result had not made as much progress as it could have done. There were indications, however, that this struggle was now over and that they were "on the threshold of a new and constructive era based on even closer unity, improved military organization, and positive and constructive steps towards greater economic co-operation." He added that speedy action was necessary to meet the dangers from countries "which have already become bridgeheads for invasion or subversion in the area."

Dr. Eghbal stressed the importance of more effective steps to inform public opinion in the member-countries and in various foreign countries about the peaceful and defensive nature and objectives of the Pact. He urged that steps be taken at the present session to establish a suitable and powerful propaganda system for this purpose.

At the end of its meetings the Ministerial Council issued the following communiqué:

"The Council noted with gratification the constant strengthening and continuing progress of the Baghdad Pact alliance. The Pact has emerged as a constructive force for regional co-operation and as an important element promoting world peace and security. Events have proved the soundness and solidarity of its moral basis. With its roots deep in the region, the Pact symbolizes the spirit of association in equal partnership.

"The Council noted with regret that some Governments have adopted an attitude of active opposition to collective security arrangements like the Baghdad Pact, which is in full accord with the U.N. Charter. It expressed the conviction that some of those who criticized the Pact in the past were coming to recognize that it was not designed to harm the interests of any country. It is a purely defensive association of friends of equal standing, pledged to co-operate for their defence and security and therefore to the advantage of the area as a whole.

"The Council, whose unanimous aim is to strengthen the Middle East against aggression and subversion, has no wish to see divisions or differences between Arab or Moslem countries. At the same time they have no intention to press any country to join the Pact. The Council was appreciative of the new spirit which has been generated by the Baghdad Pact among member-countries. It is characterized by frank discussion, understanding of one another's point of view, and co-operation in the common objective of peace and progress.

Political. "The Council reviewed the international political situation from the point of view of its repercussions on the Pact area. It was of the opinion that although the situation in the region has shown improvement, the basic objectives of international Communism remain unchanged and the threat of direct and indirect aggression, backed by massive and growing military potential against the security of member-nations, still exists. The Council agreed on the need for constant vigilance and for strengthening the

ability of member-nations to meet and repel this threat. It expressed deep gratification at the purposes and principles of the American doctrine on the Middle East [i.e. the Eisenhower Doctrine] and for the assistance extended thereunder.

"The Council devoted considerable time to discussion of international situations in various parts of the world, with special emphasis on Eastern Europe, North Africa, South Asia, and Arab and Moslem countries of the Middle East. In particular they examined those situations which have potentials for developing in such manner as to affect the security of the Pact area. The Council appreciated the importance of supporting efforts made by the U.N. in promoting peaceful conditions in the area of the Baghdad Pact.

"The Council recognized the great value to members of having readily available machinery for consultation on appropriate aspects of the international situation, in the form both of general appreciation and of advance consultation on current issues. To supplement the opportunities of such consultation provided by Ministerial meetings of the Council and by normal diplomatic channels, the Council decided that discussions should also be held in future at deputies' level at appropriate intervals.

Economic. "In considering the report of the Economic Committee, the Council noted with satisfaction the wide range of the Committee's planning and achievements. Approval has already been given for a number of projects designed to improve communications and accelerate the development of the region. These include the linking of the Baghdad Pact capitals by telecommunications, and the construction of roads and railways. For these projects the U.S. Government, through the Richards mission, has made available the sum of $12,570,000.

"Students from regional member-countries are already studying at the Nuclear Centre at Baghdad, and the Council have delegated to their deputies consideration of the possibilities of offering vacancies to nationals of other States.

"A far-reaching programme of other joint economic projects sponsored by regional members of the Pact is now under consideration by experts, and the U.K. Government have announced that they will provide £1,000,000 to enable a start to be made on some of them. The list of projects includes, in addition to those for improved communications: (*a*) the establishment and co-ordinated use of national food reserves in the region; (*b*) the establishment of one or more centres for training in the use of agricultural machinery and methods of soil and water conservation; and (*c*) the establishment of an artificial insemination centre for cattle in Pakistan.

"The Council noted with deep appreciation that funds for technical assistance under the aegis of the Baghdad Pact have been made available by the U.K. (£1,000,000) and Pakistan (500,000 rupees) and that a request by the Turkish Government for allocation of funds has been made to the Turkish Grand National Assembly. The programme of technical assistance already approved envisages provision of scholarships and the services of experts, and also equipment, e.g. X-ray apparatus for tuberculosis centres.

"On the suggestion of the Economic Committee, the Council decided that a working party should meet in Baghdad at the end of September to consider means whereby national emergency services like the Red Crescent societies could be developed and co-ordinated through the Baghdad Pact to give more effective assistance to any country within the region which might require urgent relief in floods, epidemics and other calamities.

Counter-Subversion. "The Council considered the report of the Counter-Subversion Committee and recognized that the threat of subversion in the area inspired from outside continues to be serious. Efforts are being made to interfere in the internal affairs of member-countries and to undermine established law and order. The Council directed the Counter-Subversion Committee to continue with full vigour measures to safeguard the sovereignty and integrity of member-States against subversion.

Military. "The Council welcomed the accession of the U.S.A. to full membership of the Military Committee and recorded their deep appreciation of the U.S. decision, which they were confident would further contribute toward defence and security in the region.

"The Military Committee met from June 3-5 in Karachi and considered progress to date. The Council noted with satisfaction that considerable progress had been achieved in the military field. It noted that the Committee agreed on the nature of the threats against the Baghdad Pact area. Measures required in peacetime to improve the defence potential have been agreed upon. In particular, the Council express their appreciation of the U.K. offer of a substantial contribution toward infrastructure and training measures. The Council approved the setting-up of a more comprehensive military planning structure.

Next Council Meeting. "The Council decided to hold its next meeting at Ministerial level at Ankara on Jan. 20, 1958. Meanwhile the Council will continue to meet regularly at deputies' level."

Most of the Council's sessions were held *in camera*, but rumours that this had been due to unresolved differences over the scope of the Counter-Subversion Committee's work were strongly denied by Mr. Suhrawardy and Mr. Selwyn Lloyd. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Pakistan High Commissioner's Office, London - Turkish Embassy Press Office, London) **(Prev. rep. Baghdad Pact Meetings, 15230 A; 14873 A; U.S.A. joins Military Committee, 15457 A; Baghdad Atomic Centre, 15488 C; Ending of Iraqi Boycott, 15451 D; Anti-Subversion Decisions, 15346 A.)**

A. RELIGIOUS LIFE. — Church of England. - Revised System of Jurisdiction for Anglican Communion in Middle East. - Archbishopric of Jerusalem.

It was announced on June 25 that a revised system of jurisdiction for the Anglican bishoprics and congregations in the Middle East had been approved by the Archbishop of Canterbury, involving (1) the elevation of the See of Jerusalem to the status of an Archbishopric; and (2) the creation of a new Bishopric of Jordan, Syria and Lebanon. The announcement added that the Rt. Rev. Campbell MacInnes, Bishop of Bedford, would take office on July 8 in succession to Dr. Weston Stewart (recently Bishop in Jerusalem) and would be invested with the title of Archbishop in Jerusalem and Metropolitan.

It was explained that Archbishop MacInnes would summon and establish an episcopal synod consisting of all the bishops coming under his metropolitan jurisdiction the Bishop in Egypt and Libya, the Bishop and Assistant Bishop in the Sudan, and the Bishop in Persia. Before summoning the episcopal synod he would create a new Bishopric of Jordan, Syria and Lebanon, and would consecrate a bishop thereto who would become a member of the episcopal synod.

The announcement added: "In view of the historical associations of Jerusalem itself, and owing to the fact that its political boundaries have not been finally decided, it has been thought right that, for the time being, the Archbishop in Jerusalem shall exercise diocesan jurisdiction over Anglican congregations and establishments in Jerusalem. With that exception, jurisdiction in Jordan, Syria and Lebanon, which has hitherto belonged to the Bishop in Jerusalem, will be transferred to the new bishopric as soon as it has been created. The Archbishop will have his seat in the collegiate church of St. George the Martyr in Jerusalem, and it is hoped that the new Bishop of Jordan will have his pro-cathedral in Jerusalem also."

The changes were approved by the Archbishop of Canterbury after consultation with his fellow-metropolitans and with the Anglican bishops and others in the areas concerned.

(Church Times)

B. UNITED KINGDOM. — North Dorset By-election.

Polling took place in North Dorset on June 27 in the by-election caused by the death of Mr. Robert Crouch (Conservative), the result being as follows:

Glyn, Lieut.-Colonel R. H. (Conservative)	15,513
Emlyn-Jones, J. A. (Liberal)	12,411
Dutfield, H. J. (Labour)	6,278
*Wright, H. C. (Independent)	170
No change. Conservative majority	3,102

* Forfeited deposit.

Figures at the general election were: R. F. Crouch (C.) 18,906, M. Portman (L.) 11,747, H. J. Dutfield (Lab.) 5,633 Conservative majority, 7,159.

The Conservative candidate received 45.1 per cent of the votes, the Liberal candidate 36.1 per cent, the Labour candidate 18.3 per cent, and the Independent 0.5 per cent, compared with general election percentages of 52.1 for the Conservatives, 32.4 for the Liberals and 15.5 for Labour. Of the total electorate of 15,390 (an increase of 1,248 since the general election), 75.7 per cent went to the polls, against 82.2 per cent at the general election.

Mr. Crouch (53), who died on May 6, had represented North Dorset since 1950, when he won the seat from Mr. Frank Byers (Liberal) by 97 votes. A farmer in Dorset and Wiltshire since 1920, he was a recognized authority on the growing of cereals, introduced mechanized corn harvesting in Wiltshire, and was well known as a writer and broadcaster on agriculture. He was responsible for bringing the Crichel Down case to the notice of the Government and the general public.

Colonel Glyn, the elder son of Sir Richard Glyn, is a Dorset farmer and landowner and was formerly a practising barrister. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. By-elections, 15572 A.)

C. URUGUAY. — Cabinet Reorganization.

A reshuffle of the Uruguayan Government was announced on June 7, involving the following changes: (*a*) Professor Oscar Secco Ellauri became Foreign Minister in succession to Señor Francisco Gamarra; (*b*) Dr. Hector Grauert (Minister of Public Works since June 1956) was appointed Minister of the Interior *vice* Señor Alberto Abdala; (*c*) Señor Florentino Guimaraens (the Defence Minister) succeeded Dr. Grauert as Minister of Public Works; and (*d*) Señor Juan Rodriguez Correa (president of the Chamber of Deputies) took over the Defence portfolio. The resignations of Señores Gamarra and Abdala had been caused by differences within the governing Battlista Party. (New York Times - New York Herald Tribune)

(Prev. rep. 15440 C.)

A. UNITED KINGDOM. — Royal Navy. - Estimates for 1957-58. - The First Lord's Review. - Naval Developments in 1956-57. - Construction Programme.

The Navy Estimates for 1957-58 were published as a White Paper on April 26 and are summarized below.

An accompanying memorandum by Lord Selkirk (First Lord of the Admiralty) announced (1) that the aircraft carrier groups which would form the chief striking force of the remodelled Navy (see 15493 A) would be equipped with a new "strike" aircraft now being developed, the Blackburn *N.A. 39*, with considerable range and able to carry an atomic bomb; (2) that four new fleet escorts were being built and equipped with a new anti-aircraft guided missile, the *Seaslug* (see below). These escorts, to be known as "guided missile destroyers," would be larger than any existing type of fleet escort and would have a very powerful armament and sufficient endurance to give them a considerable capacity for operating on their own. The memorandum added that H.M.S. *Girdle Ness* had fired her first test missile, "from which the sea-to-air guided missile is being developed," in September 1956. Other satisfactory firings had followed, but progress with the new guided-missile ships would be dependent on the success of the *Girdle Ness* trials

A summary of the White Paper is given below under cross-headings:

Aircraft Carriers. The modernization of H.M.S. *Victorious* was scheduled to be completed during 1957-58; she would then be the first carrier in service with a fully-angled flight deck, and would also have steam catapults, new radar and landing control systems, the latest arrester gear, and equipment to enable her to arm her aircraft with air-to-air guided weapons. Similar modernization work on H.M.S. *Eagle* would be begun after the *Victorious* had joined the active fleet. Meanwhile the construction of H.M.S. *Hermes* was proceeding satisfactorily.

Battleships. The four battleships of the *King George V* class (*King George V, Duke of York, Anson,* and *Howe*), now in the Reserve Fleet, would be scrapped during 1957-58. [The scrapping of these four vessels will leave only one battleship in service with the Fleet—H.M.S. *Vanguard.*]

Cruisers. Construction of the three *Tiger* class cruisers, which would have fully automatic 6 in. and 3 in. guns and would ultimately replace the eight cruisers now in the active Fleet, was gathering pace The first ship—H.M.S. *Tiger* herself—would start trials early in 1959 and join the Fleet later in that year.

Frigates. 11 new frigates were completed during 1956-57; 12 more should be completed in 1957-58 and a further 21 were on order.

Submarines. The experimental submarine *Explorer* (see 11944 A) was completed during 1956, and her sister-ship *Excalibur* should be completed by the end of 1957. Meanwhile progress was being made with the design of the nuclear submarine *Dreadnought* (see 15412 B) and experimental work under the Atomic Energy Authority had begun, including work on the problem of shielding personnel against radiation.

Minesweepers. The entire programme of coastal and inshore minesweepers had now been laid down, and 79 coastal and 68 inshore minesweepers (about 75 per cent of the programme) had been completed. Minesweepers had also been completed for Commonwealth and NATO countries.

Fleet Auxiliaries. To increase the Fleet's ability to operate independently of shore bases, three maintenance ships would be modernized during the year. The conversion of the light fleet-carrier *Triumph* into a heavy repair ship would be begun towards the end of the year, but the plan to convert the aircraft repair ship *Perseus* into a submarine depot ship (see 14869 A) had been abandoned.

Shore Organization. Cuts in shore establishments had continued during 1956-57, and nine large, 30 medium, and over 60 small establishments had been or would be closed over the next few years, involving a saving of over 5,000 officers and ratings and a considerable number of civilians.

Fleet Air Arm. In addition to the new Blackburn *N.A. 39* (see above), the *Supermarine No. 113* day fighter, which could also carry an atomic bomb, was expected in Fleet service by mid-1958 and would be known as the *Scimitar.* The de Havilland *Sea Vixen* (DH 110), whose armament included air-to-air guided weapons, was coming along well, while considerable numbers of *Whirlwind* helicopters would be delivered in 1957-58 for use against submarines.

Research and Development. Although expenditure would be cut back, care would be taken to safeguard "the most vital projects and the programme of pure research." During 1956-57 advances had been made in submarine detection; a new asdic set had been produced with "several times greater" range than existing sets; and valuable information on the protection of ships and personnel subject to nuclear attack had been gained during the Montebello tests in June 1956.

Naval Reserves. The strength of the Royal Fleet Reserve was being reduced from about 33,000 to about 5,000. The strength of the Royal Naval Reserve was expected to reach 4,650 officers and men in 1957-58, and that of the Royal Naval Volunteer Reserve about 3,100 officers and some 8,500 ratings.

The present strength of the Royal Navy (excluding Fleet auxiliaries, salvage vessels, tugs, trawlers, etc.), was given as 813 vessels, as follows:

Vessels in Commission (i.e. in the Operational Fleet, preparing for service, or engaged in trials and training). Total 268, comprising 6 aircraft carriers, 8 cruisers, 1 trials cruiser, 1 guided-weapons test ship, 1 fast minelayer, 1 netlayer, 8 *Daring* class ships, 21 destroyers, 49 frigates, 41 submarines, 51 minesweepers, 26 coastal craft, 9 landing vessels, 6 surveying ships, and 39 fleet support vessels.

Ships in Reserve. Total 545, comprising 5 battleships, 6 aircraft carriers, 11 cruisers, 2 fast minelayers, 1 netlayer, 36 destroyers, 109 frigates, 19 submarines, 189 minesweepers, 39 coastal craft, 51 landing vessels, 1 surveying ship, and 76 fleet support vessels. [Fleet support vessels include ferry carriers, depot ships, boom defence vessels, and degaussing ships.] Four of the five battleships (those of the *King George V* class) are to be scapped as stated above, leaving H.M.S. *Vanguard* as the Royal Navy's only battleship.

In addition, 77 ships were under construction, including 1 aircraft carrier, 3 cruisers, 13 frigates, 3 submarines, 49 minesweepers, and 8 coastal craft. Ships on order but not yet under construction numbered 25, comprising 4 guided-weapons ships and 21 frigates.

The Navy Estimates were passed by the House of Commons on May 13 without a division.

Mr. Soames (Parliamentary Secretary, Admiralty), moving their adoption, first spoke of the results of the decision to reduce the Navy's uniformed strength from the present figure of 121,500 (including 14,000 officers) to under 100,000 by Dec 31, 1962. As far as could be estimated, he said, a surplus of up to 1,000 officers would be unavoidable, but it would be possible to regulate the intake of ratings, who joined for comparatively short engagements, to ensure that the only surpluses should occur amongst chief petty officers, petty officers, and senior ratings, who would in any case be shortly leaving the Service. The Admiralty had accordingly decided (i) that the non-continuous one-year and two-year engagements of men who had already completed 22 years' service should not be renewed; (ii) that in future a higher standard should be required for men who signed on at the end of 22 years for a further five years; (iii) that even where the standard for the 22 years' engagement was met, it might be necessary temporarily to limit the numbers selected in certain branches. The changes were bound to cause some disruption within the Service, particularly for senior officers and ratings, and it was most important that those whose careers were ended should have proper notice and compensation, and that potential recruits should not get the idea that the Navy no longer offered a worthwhile career.

After pointing out that the new strategic concept outlined in the White Paper on Defence (see 15493 A) meant a reduction in the number and size of the Navy's overseas bases, and that everything possible would be done to raise the proportion of men afloat to those ashore, Mr Soames claimed that expenditure on new construction had been reduced without sacrificing any projects of major importance. In this connexion he explained that although the Admiralty were proceeding with designs for both cruiser and destroyer types of guided-missile ships, it had been decided for the present to concentrate on the smaller (destroyer) type, which on the whole would give better value for money. The disadvantages were that the destroyer type would stow fewer missiles, have considerably less endurance, and be less self-contained and self-reliant. "Nevertheless," he added, "she will be very effective, and the cost will be appreciably less. On the whole we think that five guided missile ships of this type would be better value for a modern fleet than two of the cruiser type, which we can get for roughly the same amount of money."

Regarding the Fleet Air Arm, Mr. Soames explained that the de Havilland *Sea Vixen* (which would eventually replace the *Sea Venom* fighter) would be fitted with the *Firestreak* air-to-air guided missile (see below), which would radically improve its killing power by day and night. The *N.A. 39*, which would replace the *Wyvern*, was going ahead satisfactorily and would be able to carry either conventional weapons or the nuclear bomb.

Turning to the operational side, Mr. Soames stressed that the modern aircraft carrier provided a unique instrument for carrying out the Government's aim of being able to deploy aircraft power to meet emergencies anywhere in the Commonwealth. The Government visualized the Navy as "a number of carrier task forces, each consisting of one carrier armed with the most modern aircraft weapons that can be procured, a cruiser, and a number of destroyers and frigates for protection both from the air and from the sea." No other organization could be so self-sufficient, mobile, and versatile, and its mobility had the added merit that the Navy did not need to remain permanently poised in any potential trouble centre—an ever-present irritation to local sensibilities.

Mr. Soames concluded by referring to the "formidable" Russian submarine fleet, much of which was in Northern and Baltic waters, with access to the Atlantic. He said that there were more than 500 Russian submarines now in commission, considerably more than half being of the long-range type and over two-thirds of the total having been built since 1945. This was already "the biggest submarine fleet the world has ever known," and construction was still in full swing It was believed that by 1960 the U.S.S.R. would be able to deploy 150 submarines in the Atlantic alone.

Important developments in connexion with the Royal Navy in recent months are summarized below.

New Types of Ships. Ships commissioned during 1956 included (*a*) the *Girdle Ness*, the first British naval vessel designed to try out guided missiles, and converted from a landing craft maintenance

vessel (July 24); (*b*) the "aircraft direction frigate" *Salisbury*, the first of four frigates to be fitted with elaborate radar and electronic control equipment (previously confined to aircraft carriers, battleships, and cruisers), and intermediate in size between the *Whitby* and *Blackwood* classes.

New Guided Missiles. Details were released on June 4, 1957, of the guided missile *Seaslug*, designed to engage any enemy bomber which might evade naval fighter aircraft at any height at which aircraft could operate. The *Seaslug*, propelled by a sustainer motor and four boosts (which are jettisoned as soon as the missile reaches supersonic speed), is fired from a triple ramp launcher fed automatically from a magazine below decks Successful firings have already been made at sea from the guided-weapons ship *Girdle Ness* (see above) and the *Seaslug* will be fitted in the four guided-weapons destroyers now on order.

Details had been given on May 20 of the *Firestreak* air-to-air guided missile, which would be fitted in all de Havilland *Sea Vixen* fighters for the Royal Navy (see above) and had also been adopted as standard equipment for the R.A.F. *Javelin* and *P.1* fighters. The *Firestreak*, an infra-red "homing" missile, has been developed by de Havilland Propellers Ltd. The infra-red system employs a detector "eye" which is sensitive to the infra-red rays emitted from an aircraft, and once it has "locked on" to the target the "eye" feeds information into the control system to ensure that the weapon continues to travel in the correct direction, no matter what manoeuvre the target may perform. It was claimed that this system was immune from the jamming which could be employed against conventional radar weapons.

World's Fastest Submarine. Mr. Soames announced on April 10, 1957 that the experimental submarine *Explorer* (see above), using high-test peroxide as fuel, had exceeded 25 knots under water. Although there were no reliable data of underwater speeds of foreign submarines, the Admiralty believed that this speed made the *Explorer* "a strong contender for the title of the fastest submarine in the world."

Submarine Escape Apparatus. Mr. George Ward (then Parliamentary and Financial Secretary, Admiralty) stated on July 15, 1956 that further trials had shown the one-man escape chamber, previously intended to be fitted in all new submarines (see 14944 A), to be "inherently unreliable." The Admiralty had therefore adopted, a method whereby men could escape in rapid succession in immersion suits by floating to the surface through canvas trunks extending down into the submarine. He added that trials had shown that this method gave the best chance of escape from depths not exceeding 200 ft. In addition, all future submarines would be fitted with a hatch at each end to which a rescue bell (or chamber) could be attached from outside the vessel -i.e. from a salvage vessel. This method could be used at depths greater than 200 ft.

Closing of Naval Depots. Lord Cilcennin (then First Lord of the Admiralty) announced on Aug. 1, 1956 that in addition to the closing of the naval base at Scapa Flow (see 14924 E), the Admiralty had resolved to place the naval base at Invergordon on a care and maintenance basis and to dispose of the nearby naval air station at Fearn. It had also decided on the closing of a number of bases, depots, and training establishments, including the Woolwich armament depot, the Holton Heath (Dorset) cordite factory, the naval ordnance proofing range at Kingsclere, near Newbury (Berks.), gunnery and signalling schools at Chatham and Devonport, and H.M.S. *Defiance*, the torpedo, submarine and electrical school at Devonport.

A further list of establishments to be closed was announced by Mr. Soames on March 5, 1957. It included H.M.S. *Harrier*, the Navigation and Direction Training Establishment at Kete (Pembrokeshire); the R.N. Medical School at Alverstoke (Hants.); the R.N. Small Arms School at Browndown; the Admiralty Material Laboratory at Holton Heath (Dorset); the Admiralty Experimental Establishment at Perranporth (Cornwall); and the Underwater Launching Establishment at West Howe, Bournemouth. A number of store and armament depots would also be closed, including two in Northern Ireland.

Carrier Task Force for Indian Ocean. Admiral of the Fleet Lord Mountbatten (First Sea Lord) announced on April 30, 1957, that the East Indies and Far East stations of the Royal Navy would be amalgamated under the new plan to station a carrier task force in the Indian Ocean. The force would have the small bases at Mombasa and Singapore for supply, but would use a system of rotation such as that used by the U.S. Sixth Fleet in the Mediterranean. The Royal Navy would also give more attention to "afloat support" and three new 17-knot replenishment tankers were now in service.

Report of Select Committee on Naval Discipline Act.

The report was published on Dec. 7, 1956 of a Select Committee of the House of Commons appointed to consider the working of the Naval Discipline Act.

The report stated that the Act, dating from 1866, was based on Articles of War passed in 1661 and was in many parts obsolete. Under the Act many offences, ranging from treason to sleeping on watch, were punishable by death, though in fact only one execution under naval law had taken place in the last 100 years.

The Committee recomended (1) that the death penalty should be abolished for all naval offences except treason and the worst kinds of mutiny; (2) that in such cases the court should be required to be unanimous (instead of a four-fifths or two-thirds majority being necessary, as at present); (3) that all death sentences should be subject to Admiralty confirmation, and that the authority of the Governor should be necessary before an execution was carried out in a Colony; (4) that the mandatory death penalty for acts committed traitorously and the maximum penalty of death for cowardice should be replaced by the maximum penalty of death solely for offences intended to assist the enemy; (5) that imprisonment for any term (for offences committed in action) or up to two years (for offences committed when not in action) should replace death as the maximum penalty for sleeping on watch or abandoning post; (6) that the death penalty should be retained for cases of mutiny, incitement to mutiny with violence, or mutiny with intent to assist the enemy; (7) that fines, as penalties for officers only and limited to 30 days' pay, should be introduced.

The report also recommended considerable changes in the constitution and procedure of naval courts-martial, the most important being a proposal that the president of the court and at least half its members should be certificated as navigating officers.

Naval Appointments.

Mr. Soames announced on March 5, 1957 that the posts of Fifth Sea Lord and Deputy Chief of Naval Staff would be amalgamated in order to ensure complete co-ordination in the development of naval weapons, both offensive and defensive. The first holder of the new position would be Rear-Admiral A. N. C. Bingley, the present Fifth Sea Lord. [Rear-Admiral Bingley, an aviation specialist, was formerly commanding officer of the aircraft carrier H.M.S. *Eagle*].

The following naval appointments had also been announced in recent months:

Admiral Sir Guy Grantham, C.-in-C. Mediterranean Fleet and concurrently C.-in-C. Allied Forces, Mediterranean (NATO), as C.-in-C. Portsmouth in succession to Admiral of the Fleet Sir George Creasy (announced Feb. 14, 1957). Sir Guy Grantham was also appointed by NATO as Allied C.-in-C., Channel and Southern North Sea, a post which he will combine with his Home Fleet command.

Admiral Sir Ralph Edwards, Third Sea Lord and Controller of the Navy, as C.-in-C., Mediterranean Station *vice* Admiral Sir Guy Grantham (announced Dec. 4, 1956).

Vice-Admiral G. V. Gladstone as C.-in-C., Far East Station, *vice* Admiral Sir Alan Scott-Moncrieff (announced Dec. 28, 1956). Vice-Admiral Gladstone, who received a knighthood in the recent Birthday Honours (see 15589 A), was previously Commander of Allied Naval Forces, Northern Europe a NATO command.

Vice-Admiral R. D. Watson, formerly Director of Plans at the Admiralty, as Fourth Sea Lord and Chief of Supplies and Transport.

Rear-Admiral Sir Charles Madden, Deputy Chief of Naval Personnel (Manpower Planning), as Flag Officer, Malta *vice* Rear-Admiral W. G. Brittain (announced March 27, 1957). Rear-Admiral Sir St. John Tyrwhitt had originally been appointed to this post but was unable to take it up owing to ill-health.

Rear-Admiral N. E. Dalton as Engineer-in-Chief of the Fleet in succession to Vice-Admiral Sir Frank Mason (announced May 22, 1957). Rear-Admiral Dalton will be promoted to Vice-Admiral on taking up his appointment in September.

The promotion of Admiral Sir Caspar John (son of Augustus John, the artist) to the rank of Admiral of the Fleet had been announced by the Admiralty on Jan. 10, 1957. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15550 A; 15493 A; 15403 A; 15412 B; 15164 D; 14944 A.)**

Corrigendum. The headings of the table on page 15495, second column, showing the estimated defence expenditure in 1957-58 compared with 1956-57, have unfortunately been reversed owing to a typographical error. The four columns of the table should correctly be read as showing first the gross Estimates in 1957-58 and 1956-57, and then the net Estimates in the two years. Thus the word *gross* which now appears over the third column should appear over the second column, and the word *net* now over the second column should appear over the third column. (Ed. K.C.A.)

A. SOVIET UNION. — Television Services.

The following information on the development of television services in the U.S.S.R. was given in a recent issue of the Soviet newspaper *Promyshlenno-Ekonomicheskaya-Gazeta* (Industrial and Economic Gazette): (1) the Soviet Union had 24 television stations in operation, and new stations would be opened during 1957 at Vilnius (Vilna), Alma-Ata, Gorky, Kuibyshev, Novosibirsk, Murmansk, Krasnoyarsk, Lvov, and other centres; (2) television stations now under construction at Saratov, Stalingrad, Ufa, Kemerovo and Karaganda would give their first trial transmissions before the end of 1957; (3) stations going into operation at Vladimir, Kostroma, Yaroslavl, Ivanovo and Kaluga during 1957 would relay central television programmes, and a new station at Novgorod would relay programmes from Leningrad.

It was stated that there were about 1,500,000 TV sets in the Soviet Union, against 60,000 in 1951, and that a system of colour television which could be combined with the transmission of a black-and-white picture had been adopted after successful tests in Moscow and Leningrad. On the other hand the paper admitted that radio relay lines were being introduced "at a snail's pace" and that the development of V.H.F. (very high frequency) broadcasting was still in an "unsatisfactory state."—(Soviet Embassy Press Office, London)

A. HUNGARY. — U.N. Report on the Hungarian Uprising. - Denunciation of Soviet Intervention.

The report was published on June 20 of the U.N. Fact-Finding Committee on Hungary set up by the General Assembly on Jan. 10 after the Soviet Government had refused to withdraw its troops from Hungary, despite the U.N. resolutions condemning the Soviet military intervention and calling for the withdrawal of the Soviet armed forces.

The report, which was unanimous, was signed without reservation by the five members of the U.N. Committee—Mr. Alsing Andersen (Denmark), its chairman, Mr. R. S. Gunewardene (Ceylon), M. Mongi Slim (Tunisia), Professor Enrique Fabregat (Uruguay) and Mr. Keith Shann (Australia). Mr. Andersen said that the Committee had taken evidence from 111 witnesses of all ages, both men and women, and had tried to present a "calm and sober account" of the revolt from the eye-witness accounts and testimonies of those who had taken part in it. The Committee had held its hearings in New York, Geneva, Rome, Vienna and London and had accepted testimony only concerning what each witness had personally experienced, many of the witnesses having been subjected to searching cross-examination.

The U.N. report constituted a formidable indictment of the Soviet military intervention in Hungary and of the brutalities of the Hungarian Communist political police (A.V.H.). It rejected *in toto* the allegations—frequently made by the Soviet Government and the Kadar regime—that the uprising was the work of "reactionaries," "capitalist elements," "Western imperialists," etc., emphasizing that it was supported by the overwhelming majority of the Hungarian people, particularly the working-class. *Inter alia*, it said that the Hungarian regime was dominated by a secret police (the A.V.H.), "all-powerful, pitiless, and unabashed by any shameful act," which permeated the whole of Hungarian society with its spies and agents; that the Communist regime had completely collapsed during the uprising, when the real power was exercised by the Revolutionary and Workers' Councils prior to the Soviet intervention; that deportations of Hungarians to the U.S.S.R. had been established; and that the present Kadar regime had no popular support whatever and had progressively destroyed the short-lived liberties of the Hungarian people since the uprising was crushed by the Soviet Army. The report concluded by saying that the "massive" Soviet armed intervention in Hungary, carried out with the "avowed intention of interfering in the internal affairs of another country," must continue to be "a matter of international concern."

The two-volume report ran to some 400 pages and is summarized below under cross-headings:

Discussing the unplanned nature of the uprising, the report noted the unanimous testimony of witnesses that the events took the participants by surprise. No single explanation could determine exactly why the outbreak occurred just when it did. Communist spokesmen, including M. Kadar and the members of his present Government, had recognized the bitter grievances of the Hungarian people before Oct. 23 and had spoken of a "broad popular movement" caused by the "bitterness and indignation" of the masses.

Two factors were held to have brought this resentment to a head. The first was the news, on Oct. 19, of a successful move by Poland for greater independence from the U.S.S.R. This news was largely instrumental in bringing the Hungarian students together in the meetings of Oct. 22. The second factor was the acute disappointment felt by the people when Ernö Gerö, First Secretary of the Hungarian Workers' (Communist) Party, in his speech on the evening of Oct. 23, failed to meet any of the popular demands and adopted what was considered a truculent tone.

The Student Demands.

An example of the demands made at the time was to be found in the 16 points adopted on Oct. 22 by a meeting of thousands of Budapest students. The "16 points" were quoted in the report, and read as follows.

"(1) We demand the immediate withdrawal of all Soviet troops in accordance with the provisions of the peace treaty.

"(2) We demand the election of new leaders in the Hungarian Workers' Party by secret ballot from the ranks upwards. These leaders should convene the Party Congress within the shortest possible time and should elect a new central body of leaders.

"(3) The Government should be reconstituted under the leadership of Imre Nagy; all criminal leaders of the Stalinist-Rakosi era should be relieved of their posts at once.

"(4) We demand a public trial in the Criminal Court of Mihaly Farkas and his accomplices. Matyas Rakosi, who is primarily responsible for all the crimes of the recent past and for the ruin of this country, should be brought before a People's Court of Justice.

"(5) We demand general elections with universal suffrage, secret ballot, and the participation of several parties for the purpose of electing a new National Assembly. We demand that the workers should have the right to strike.

"(6) We demand a re-examination and re-adjustment of Hungarian-Soviet and Hungarian-Yugoslav political, economic, and intellectual relations on the basis of complete political and economic equality and of non-intervention in each other's internal affairs.

"(7) We demand the reorganization of the entire economic life of Hungary, with the assistance of specialists. Our whole economic system, based on planned economy, should be re-examined with an eye to Hungarian conditions and to the vital interests of the Hungarian people.

"(8) Our foreign trade agreements, and the real figures in respect of reparations that can never be paid, should be made public. We demand frank and sincere information concerning the country's uranium deposits, their exploitation, and the concessions granted to Russia. We demand that Hungary should have the right to sell uranium ore freely at world market prices in exchange for hard currency.

"(9) We demand the complete revision of norms in industry and a radical adjustment of wages to meet the demands of workers and intellectuals. We demand that minimum living wages for workers should be fixed.

"(10) We demand that the delivery system [for farm produce] should be placed on a new basis and that produce should be used rationally. We demand equal treatment of peasants farming individually.

"(11) We demand the re-examination of all political and economic trials by independent courts, and the release and rehabilitation of innocent persons. We demand the immediate repatriation of prisoners-of-war and of civilians deported to the Soviet Union, including prisoners who have been condemned beyond the frontiers of Hungary.

"(12) We demand complete freedom of opinion and expression, freedom of the Press, and a free radio, as well as a new daily newspaper for the M.E.F.E.S.Z. organization (League of Hungarian University and College Student Associations). We demand that the existing 'screening' material should be made public and destroyed.

"(13) We demand that the Stalin statue—the symbol of Stalinist tyranny and political oppression—should be removed as quickly as possible and that a memorial worthy of the freedom fighters and martyrs of 1848-49 should be erected on its site.

"(14) In place of the existing coat-of-arms, which is foreign to the Hungarian people, we desire the re-introduction of the old Hungarian Kossuth arms [in the national flag]. We demand for the Hungarian Army new uniforms worthy of our national traditions. We demand that March 15 should be a national holiday and a non-working day, and that Oct 6 should be a day of national mourning [see below].

"(15) The youth of the Technological University of Budapest unanimously express their complete solidarity with the Polish workers and youth in connexion with the Polish independence movement.

"(16) The students of the Building Industry Technological University will organize local units of the M.E.F.E.S.Z. as quickly as possible, and have resolved to convene a youth parliament in Budapest for the 27th of this month [October 1956] at which the entire youth of this country will be represented by their delegates..."

Analysis of the Political Demands.

The report analysed the political demands which it considered the most fundamental of those put forward in the students' resolutions and similar manifestos. It was pointed out that most political programmes called for friendly relations with Russia, but always on a new basis of equality. Hungary was first to become free to adopt an independent policy of her own; then, as part of that policy, she would enter into a new and friendly relationship with the Soviet Union. Some manifestos called for independent relations with the Peoples' Democracies and Yugoslavia.

During the earliest meetings [of students and workers] the call for the complete withdrawal of Soviet troops from Hungary was not expressed; but, once uttered, it became one of the most insistently proclaimed objectives of the uprising. When the uprising met with Soviet armed resistance, the departure of Russian troops was felt to be a pre-condition to the achievement of freedom.

Closely connected with the demand for a genuinely independent Hungarian policy was that for the restoration of certain Hungarian symbols and celebrations which had been suppressed by the Communist régime. Chief among these demands was the restoration of the national holiday of March 15, the day when the leaders of Hungary's war of independence in 1848 issued their 12 points. [After the crushing of the 1848 uprising by Russian troops, 13 generals who fought on the Hungarian side were executed by the Austrians. The anniversary of this event, Oct. 6, had formerly been observed as a day of national mourning.]

Most of the demands put forward by students and other bodies concerned reforms urgently called for in Hungary's internal life. Essentially, these internal political demands aimed at the establishment of a democratic régime, without the secret police. The return of Mr. Nagy to the Government, or to some leading position in the State, was a central demand in most of the manifestos.

The Soviet Military Intervention.

Although no evidence existed of advance planning, it would appear that the Soviet authorities had taken steps as early as Oct. 20 to make armed intervention in Hungary possible. The report found that evidence existed of troop movements, or projected troop move-

ments, from that date onwards, and it set forth this evidence at some length. It went on to analyse the manner in which the second armed intervention by Soviet troops took place on Nov. 3 in treacherous circumstances, while Hungarian military leaders were still negotiating a settlement with the Russian commanders

At 5.25 p.m. on Oct. 28, the Prime Minister, M. Nagy, announced that the Soviet Government had agreed to begin the withdrawal of its troops from Budapest. The following morning M. Nagy and the Minister of Defence, General Janza, met the representatives of the more prominent insurgent groups at the Ministry of Defence.

During the last days of October, Soviet armoured and other vehicles began to evacuate Budapest, with the exception of certain key positions such as the Soviet Embassy and the main approaches to the Danube bridges. This withdrawal, however, took place simultaneously with the surrounding of the principal airports of Budapest —an action which provoked a resolution by the staff of the Hungarian National Air Command on Oct. 30 threatening that, unless the withdrawal of Soviet troops from Budapest was effected within 12 hours, the Hungarian Air Force "would make an armed stand in support of the demands of the entire Hungarian working people."

At 11.30 p.m. on Nov. 1, however, Budapest radio reported that, according to an announcement issued by the Soviet Embassy, airfields of the Hungarian Air Force had been surrounded by Soviet armoured forces. The radio statement added that "the Hungarian Air Force . . . was ready to defend itself against overwhelming strength. The Government, however, fully realizing its responsibilities, prohibited the opening of fire."

The report said that the problem arose of reconciling the known facts regarding the political negotiations for complete withdrawal [of Soviet troops] with the clear evidence of the continued reintroduction of Soviet forces and their concentration within the country. It might well have been that, immediately before the second intervention, the Russian political and military authorities differed with regard to the best way of meeting the unusual circumstances which had arisen, and that the military authorities at no point abandoned the belief that the only way to resolve the difficulties was by force.

A survey of the movement of Soviet forces during the period from Oct. 29 to Nov. 4 showed that, irrespective of the assurances given to M. Nagy by Soviet political personalities, there existed a definite plan for the reconquest and military subjugation of Hungary. This plan was carried through fully. Contrary to the contentions of the Soviet Government that the Hungarian revolution was inspired by "capitalist elements" outside Hungary, the Committee concluded that the Hungarian resistance to the second Soviet intervention was a heroic demonstration of the will of the Hungarian people to fight for national independence.

The Fighting in Budapest.

Speaking of the "hard-fought five-day battle in which the people of Budapest found themselves in combat with Soviet armour and with the A.V.H.," the report said: "The ordinary police sympathized with the insurgents, giving them weapons or fighting at their side. Certain units of the Hungarian Army fought on the side of the insurgents, but the Army as a whole disintegrated from the start of the uprising . . . There was no single instance recorded of Hungarian troops fighting on the Soviet side against their fellow-countrymen. Some of the Hungarian 'Freedom Fighters' were children. There was evidence that some of the Russian soldiers disliked the task assigned to them . . . There were a number of cases of fraternization with the Hungarians . . ."

The Committee noted that during the first intervention the Soviet Army had shown hesitation and uneasiness, and some units had not concealed their sympathy for the insurgents. In the second intervention, however, the Russian units were better disciplined and composed of less-educated troops who were unaware of the aspirations and sometimes even the identity of their enemies. Many of them were under the impression that they were being sent to Egypt to throw back the "Anglo-French imperialists," and it was "apparent that many of these Soviet troops . . . mistook the Danube for the Suez Canal."

In both cases, however, evidence collected by the Committee pointed to many instances of brutality and cruelty. Evidence showed that for crushing the revolution Russian tanks had moved along the streets of Hungarian towns shooting indiscriminately at armed groups and at every building from which they believed they were being attacked. For example, 20 to 30 tanks went up and down one Budapest street for an hour, firing at the buildings until they were destroyed. In another incident reported to the Committee, 10 armoured cars had aimed their guns at each side of a street in turn. They fired at each house and killed many people, including women and children. Russian orders, especially after Nov. 4, were to crush resistance by every means.

Many witnesses had reported that Russian soldiers shot at queues of Hungarians waiting outside bakeries or other food shops. These incidents, in which most of the victims were women and children, aroused violent public indignation, as did many cases of shooting at ambulances. Among the witnesses were doctors and nurses who complained of being prevented by Russian gunfire from assisting the wounded in the streets.

The Committee admitted that it had failed to establish "reliable figures" for the number of casualties in the uprising. One estimate based on figures supplied by the Hungarian Statistical Office gave "1,800-2,000 in Budapest and 2,500-3,000 in the whole country." The Committee "received the impression" that the estimate given by Mr. Nehru on Dec. 13, 1956, that about 25,000 Hungarians and 7,000 Russians had died in the fighting, "may well be too high."

The Deportations.

The Committee stated that, faced by conflicting reports about the deportation of Hungarians to Russia, it had set out to make an objective and dispassionate study of the facts, all witnesses being subjected to searching cross-examination. As a result of its study of their testimony and other evidence confirming it, the Committee reached the conclusion that, beyond doubt, deportations to Russia had taken place in considerable numbers. The number could not be accurately assessed but it ran into thousands, and there was no proof that more than a part of the refugees had been returned to Hungary. Official denials were therefore not in accordance with the facts. The deportations could be regarded as an effort to undermine potential opposition within Hungary.

The deportations began following the second Soviet intervention, the number being particularly large in the three weeks after Nov. 4. In Budapest most of the early arrests were made in haphazard manner. People were rounded up in the streets in groups running into hundreds, including elderly people and children, the general practice being to close part of a street by stationing a tank at each end. Anyone found in the area was taken away.

The deportation trains consisted of sealed freight cars or cattle trucks, usually of 20-35 wagons carrying 30-70 people in each wagon. On the journey the captives received scant food supplies and there were no adequate sanitary facilities; men and women all travelled together, each wagon being guarded by Russian troops.

Brutalities of the Communist Secret Police.

The Committee said that it was "deeply shocked" by what it had learned of the sufferings and brutalities inflicted on Hungarians by the Communist political police (A.V.H.). "It was struck by the extent of the abuses that could be perpetrated by a police force without control and thus all-powerful, pitiless, and unabashed by any shameful act. It realized that the existence of such a body, whose secret power affected every phase of public and private life, prevented the enjoyment of all human rights and perverted the functioning of every independent institution."

Numerous cases were cited of disgusting physical and psychological brutalities perpetrated by the A.V.H. on Hungarian freedom fighters—workers and students, men and women from evidence given to the U.N. Committee. Stress was also laid on the detestation which every decent Hungarian felt for the A.V.H. and its methods. Verbatim records of evidence, the report said, "contained appalling descriptions which the Committee would have hesitated to publish in their entirety, even if the necessity for protecting the families of witnesses had not been an obstacle."

Conclusions of the U.N. Committee.

The following conclusions were drawn by the Committee:

"(1) What took place in Hungary in October and November, 1956, was a spontaneous national uprising, due to long-standing grievances which had caused resentment among the people. One of these grievances was the inferior status of Hungary with regard to the Soviet Union. The system of Government was in part maintained by the weapon of terror wielded by the A.V.H. (political police), whose influence was exercised . . . through a complex network of agents and informers permeating the whole of Hungarian society. In other respects, also, Soviet pressure was resented. From the stifling of free speech to the adoption of a Soviet-style uniform for the Hungarian Army, an alien influence existed in all walks of life. Hungarians felt no personal animosity towards the individual Soviet soldiers on Hungarian soil, but these armed forces were symbols of something which annoyed a proud people and fed the desire to be free.

"(2) The thesis that the uprising was fomented by reactionary circles in Hungary and that it drew its strength from such circles and from Western 'imperialists' failed to survive the Committee's examination. From start to finish the uprising was led by students, workers, soldiers, and intellectuals, many of whom were Communists or former Communists. The majority of political demands put forward during the revolution included a stipulation that Democratic Socialism should be the basis of the Hungarian political structure and that such social achievements as the land reform should be safeguarded.

"At no time was any proposal made for the return to power, or to the Government, of any figure associated with pre-war days. 'Fascists' and 'saboteurs' could not have succeeded in landing on Hungarian airfields, which were under Soviet supervision, or in crossing the Austrian frontier, where a closed zone was shown by the Austrian authorities to the military attachés of France, the U.K., the U.S.A., and the Soviet Union.

"(3) The uprising was not planned in advance. It was the universal testimony of witnesses examined by the Committee that the events took participants by surprise. No single explanation can determine exactly why the outbreak occurred just when it did. Communist spokesmen, including M. Kadar and the members of his present Government, have recognized the bitter grievances of the Hungarian people before Oct. 23. They have spoken of a 'broad popular movement' caused by the 'bitterness and indignation' of the masses. Two factors would seem to have brought this resentment to a head. The first of these was the news on Oct. 19 of a successful move by Poland for greater independence from the Soviet Union. This news was largely instrumental in bringing the Hungarian students together in the meetings of Oct. 22 [see above]. The second factor was the acute disappointment felt by the people when Ernö Gerö, First Secretary of the Hungarian Workers' (Communist)

Party, in his speech on the evening of Oct. 23, failed to meet any of the popular demands and adopted what was considered a truculent tone towards his hearers.

"(4) Although no evidence exists of advance planning, and although the whole course of the uprising bears the hallmark of continuous improvisation, it would appear that the Soviet authorities had taken steps as early as Oct. 20 to make armed intervention in Hungary possible. Evidence exists of troop movements, or projected troop movements, from that date on. It would appear that plans for action had therefore been laid some time before the students met to discuss their demands.

"The Committee is not in a position to say whether the Soviet authorities anticipated that the grievances of the Hungarian people, stimulated by events in Poland, could no longer be contained. Signs of opposition were evident before Oct. 23; the Hungarian Government had reason to foresee that trouble was brewing. While the evidence shows that Soviet troops from outside Hungary were used even in the first intervention, no clause of the Warsaw Treaty provides for intervention by armed forces of the Soviet Union to dictate political developments within any signatory's frontiers.

"(5) The demonstrations on Oct. 23 were at first entirely peaceable. None of the demonstrators appears to have carried arms, and no evidence has been discovered that any of those who voiced the political demands or joined the demonstrators had any intention to resort to force. While disappointment at M. Gerö's speech may have angered the crowds, it would hardly of itself have sufficed to turn the demonstration into an armed uprising. That this happened was due to the action of the A.V.H. in opening fire on the people outside the radio building. Within a few hours Soviet tanks were in action against the Hungarians. This appearance of Russian soldiers in their midst, not as friendly allies but as enemies in combat, had the effect of still further uniting the people.

"(6) Obscurity surrounds the invitation alleged to have been issued by the Hungarian Government to the Soviet authorities to assist in quelling the uprising by force. M. Nagy has denied, with every appearance of truth, that he issued this invitation or was even aware of it. As Soviet tanks appeared on the streets of Budapest at about 2 a.m. on Oct. 24, it would have been impossible for him to have addressed any official message to the Soviet authorities, since he held no Government post at the time when the tanks must have received their orders. An invitation may have been made privately by M. Gerö or M. Hegedüs, the Prime Minister. The Committee, however, has had no opportunity of seeing a text of such an invitation, or of considering the exact circumstances in which it may have been issued. Until further information comes to light, it would be wise to suspend judgment as to whether such an invitation was issued at all.

"Similar considerations apply to the invitation which is alleged to have been addressed to the Soviet authorites before the second intervention on Nov. 4. M. Kadar had remained a member of M. Nagy's Government when the latter was reconstituted on Nov. 3, and the Committee is unaware of his having given any recorded indication of his disapproval of M. Nagy's policies. M. Kadar's movements at this time are not fully known, and he cannot be considered to have substantiated his own claim to have called, in the name of the Government, for Soviet help. In any event, there is abundant evidence that Soviet preparations for a further intervention, including the movement of troops and armour from abroad, had been under way since the last days of October. M. Kadar and his Ministers were absent from Budapest during the first few days after he formed his Government, and administrative instructions to the people of Hungary were issued by the commanders of the Soviet troops.

"(7) When M. Nagy became Prime Minister, he was not at first able to exercise the full powers of that office. Only when the grip of the A.V.H. was loosened by the victory of the insurgents was he able to take an independent stand. By this time the real power in Hungary lay with the Revolutionary and Workers' Councils, which had sprung up spontaneously in different parts of the country and had replaced the collapsing structure of the Communist Party.

"M. Nagy, though himself a Communist of long standing who had lived for many years in the U.S.S.R., invited non-Communists into his Government and listened to the demands of the various Revolutionary and Workers' Councils. It would appear that M. Nagy himself, like the country at large, was somewhat taken aback by the pace of developments. However, seeing that his countrymen were united in their desire for other forms of Government and the departure of Soviet troops, he threw in his lot with the insurgents. By this action he obliterated the impression which he had created while still under the domination of the A.V.H., and he became a symbolic figure in the uprising, although he had not instigated it and was never its actual leader.

"(8) The few days of freedom enjoyed by the Hungarian people provided abundant evidence of the popular nature of the uprising. A free Press and radio came to life all over Hungary, and the disbanding of the A.V.H. was the signal for general rejoicing, which revealed the degree of unity achieved by the people once the burden of fear had been lifted from them.

"(9) There were a number of lynchings and beating by the crowds. These were in almost all cases confined to members of the A.V.H., or those who were believed to have co-operated with them.

"(10) Steps were taken by the Workers' Councils during this period to give the workers real control of nationalized industrial undertakings and to abolish unpopular institutions, such as the production norms. These were widely resented as being unfair to workers and also as being a reflection of popularly suspected secret trade agreements with the U.S.S.R., which were said to make heavy demands on the Hungarian economy for the benefit of the Soviet Union.

"(11) In contrast to the demands for the re-establishment of political rights put forward during the uprising is the fact that basic human rights of the Hungarian people were violated by the Hungarian Government prior to Oct 23, and that such violations have been resumed since Nov. 4. The Committee is convinced that the numerous accounts of inhuman treatment and torture by the A.V.H. are to be accepted as true. On the evidence, it is also convinced that numbers of Hungarians, including some women, were deported to the Soviet Union and that some may not have been returned to their homes.

"These deportations were designed to break the back of the revolution. Action taken by the Hungarian people in their spontaneous uprising succeeded in ridding them for a few days of the apparatus of police terror. This democratic achievement of a united people was, indeed, threatened by a form of 'counter-revolution,' and it was to this that it succumbed. However, the 'counter-revolution' consisted in the setting-up by the Soviet armed forces of M. Kadar and his colleagues in opposition to a Government which enjoyed the overwhelming support of the people of Hungary.

"(12) Following the second Soviet intervention on Nov. 4, there has been no evidence of popular support for M. Kadar's Government. M. Kadar has successively abandoned most of the points from the revolutionary programme which he had at first promised to the Hungarian people. On the central question of the withdrawal of Soviet troops, he has moved from complete acceptance of the nation's wishes to a refusal to discuss the subject in present circumstances. He has proceeded step by step to destroy the power of the workers and of the Workers' Councils.

"Capital punishment is applicable to strike activities The processes of justice have been distorted by the institution of special police and special courts, and by the ignoring of the rights of the accused. The Social Democratic Party has again been forcibly liquidated. General elections have been postponed for two years. Writers and intellectuals are subjected to repressive measures. The Hungarian workers have shown no sign of support for M. Kadar's Government or for the prospect of continuous Soviet occupation. Only a small fraction of the 190,000 Hungarians, mostly young people, who fled the country have accepted his invitation to return. The peasants have reason to be grateful to M. Nagy for his attitude towards collectivization of agriculture and forced deliveries of farm produce.

"(13) In the light of the extent of foreign intervention, consideration of the Hungarian question by the United Nations was legally proper. Moreover, it was requested by a legal Government of Hungary [i.e. M. Nagy's Government]. In the matter of human rights, Hungary has accepted specific international obligations in the [Hungarian] Peace Treaty. Accordingly, the Committee does not regard objections based on Paragraph 7, Article 2, of the Charter as having validity in the present case. [This paragraph of the Charter precludes the U.N. from intervening in "matters which are essentially within the domestic jurisdiction of any State."] A massive armed intervention by one Power on the territory of another, with the avowed intention of interfering in the internal affairs of the country, must, by the Soviet Union's own definition of aggression, be a matter of international concern."

The U.S. State Department said on June 20 that the facts and conclusions placed before the world by the U.N. Committee were "both shocking and uncontrovertible" and could not be challenged by the Soviet Government or the Kadar regime, which had witheld all co-operation from the Committee. Mr. Cabot Lodge (U.S. representative at the U.N.) said that the report, with "its account of Soviet brutality and lying and cheating," was so detailed that it "must be carefully studied by all Governments, large and small, both as a matter of justice to Hungary and for their own self-protection against future Soviet attempts to overwhelm them."

A spokesman of the British Foreign Office similarly declared on June 20 that the U.N. Committee had performed "an invaluable service in producing this record of a small nation's courageous and tragic attempt to regain its freedom." He stressed that the members of the Committee had been specially selected for their impartiality and integrity, that they included two representatives of "uncommitted" Afro-Asian countries (Ceylon and Tunisia), and that the thoroughness of their investigations and the truth of the conclusions reached "will be challenged only by those who have a direct interest in effacing the record of crimes committed in the name of Communism against the Hungarian people."

The U.S. Government announced on June 21 that the 24 nations which co-sponsored the General Assembly's resolution setting up the Fact-Finding Committee would meet during the following week to "consider practical steps for following up the report."—(Times - Daily Telegraph - Manchester Guardian - New York Times - U.N. Information Centre, London) **(Prev. rep. U.N. Committee on Hungary, General Assembly Resolution, 15405 A.)**

A. FRANCE. — Naval Construction and Expansion.

The following information on the expansion of the French Navy in recent years was given in the *Bulletin d'information de la marine nationale*, published early in June: (*a*) the Navy's tonnage had increased from 262,000 tons at the end of the war to 383,000 tons at April 1, 1957; (*b*) since 1951 the French Navy had been reinforced by the 9,000-ton cruiser *De Grasse*, ten 2,750-ton destroyers (*escorteurs d'escadre*), and nine 1,250-ton destroyers (*escorteurs rapides*); (*c*) further destroyers of both types would go into commission during 1957; (*d*) major naval units under construction included the 22,000-ton aircraft carriers *Clémenceau* and *Foch* and the cruiser *Colbert*, a sister-ship of the *De Grasse*.

The principal units of the French Navy in service or under construction are as follows:

Battleship. The 40,000-ton *Richelieu*, completed at Brest in 1940. She escaped from occupied France, was refitted in America, and served during the latter part of the war with the British Royal Navy.

[A sister-ship, the *Jean Bart*, is to be laid up at Toulon—see below.]

Aircraft Carriers. The 13,000-ton carrier *Arromanches* and the 10,000-ton carriers *Bois-Belleau* and *Lafayette*. The *Arromanches* (ex-H.M.S. *Colossus*) was loaned to France by the Royal Navy in 1946 and purchased outright in 1951. The *Bois-Belleau* and *Lafayette* were loaned by the U.S. Navy in 1953 and 1951 respectively. All three vessels were built during the war in British and American naval yards.

The 22,000-ton carriers *Clémenceau* and *Foch*, mentioned above, are the first such warships to be built in France and will incorporate the latest features of carrier design—the steam catapult, angled deck, stabilized deck-landing mirror aids, electronic devices, etc. It is understood that they will replace the *Bois-Belleau* and *Lafayette* when completed.

Cruisers. In addition to the *De Grasse*, now in commission, and the *Colbert*, now being fitted out, the French Navy has the 10,000-ton cruisers *Gloire*, *Montcalm*, and *Georges Leygues*, all completed in 1937, and the 4,000-ton light cruisers *Chateaurenault* and *Guichen*. The three cruisers of the *Gloire* class served with the Free French Navy during the war. The two light cruisers - ex-Italian *Attilio Regolo* and *Scipione Africano* respectively were ceded to France in 1948 under the Italian Peace Treaty.

The *Colbert*, launched at Brest on March 24, 1957, is designed as an anti-aircraft cruiser able to fire guided missiles the first vessel of its kind to be built for the French Navy. She has a range of 4,000 miles at 25 knots and carries special protective armament against the effects of atomic attacks.

Destroyers. Seventeen large 2,750-ton destroyers of the *Surcouf* class—the first post-war French destroyers—have been laid down in the past few years, of which ten are in service and two more—the *Guépratte* and *Du Chayla*—will come into commission in 1957. Of 15 lighter vessels of the 1,750-ton type (classified as destroyer escorts or frigates), nine have been completed and two others will shortly be commissioned, the remainder being in various stages of construction.

Submarines. Five submarines, all of pre-war design and completed between 1946 and 1953, are in commission: *L'Africaine*, *L'Andromède*, *L'Artémis*, *L'Astrée*, and *La Créole*. They have a surface displacement of 910 tons, and 1,170 tons submerged. Six larger submarines are under construction (*Dauphin*, *Espadon*, *Marsouin*, *Morse*, *Narval* and *Requin*), displacing 1,200 tons on the surface and 1,900 tons submerged; the *Narval* was launched in December 1954 (see 13963 B). Five ex-German submarines are also in service in the French Navy.

Helicopter Carriers. It was disclosed in October last by Admiral Nomy, Chief of French Naval Staff, that helicopter carriers (*porte-hélicoptères*) were being built for the French Navy. They were described as the first vessels of their kind in the world.

The State Secretary for the Navy (M. Anxionnaz) announced on June 11 that the battleship *Jean Bart* would be laid up at Toulon and used as a gunnery training school. He explained that the modernization of the *Jean Bart* was impossible for financial and technical reasons, and that her present armament was considered obsolete for modern warfare. The *Jean Bart* escaped from the Germans in 1940 before she had been completed and took refuge at Casablanca; her rebuilding was begun after the war, and she was commissioned in the French Navy in 1950.—(Le Monde, Paris) **(13963 B; 13213 C.)**

B. TURKEY. — The Atatürk University.

A Bill providing for the creation of a new university in eastern Anatolia, to be called the Atatürk University, was recently passed by the Grand National Assembly. Patterned on the American collegiate system, it will house a number of faculties and will give particular attention to practical and vocational courses in agriculture, forestry, veterinary sciences, etc. The blueprints for the new university were drawn up in collaboration between visiting specialists from the University of Nebraska and Turkish educationists.—(Turkish Embassy Press Office, London) **(Prev. rep. 14801 A.)**

C. NEW ZEALAND. — Power Development Plan.

A power development programme costing £235,000,000 over the next 13 years (until 1970) was announced in a Government report issued on June 23 by the Minister in charge of the State Hydro-Electric Department, Mr. W. S. Goosman. The plan provides for geothermal, gas turbine, and hydro-electric power stations, and recommends the linking of the North Island and South Island power-systems by a submarine cable under Cook Straits at a cost of some £16,000,000.

The report stated that present installed power capacity was just over 1,000,000 kilowatts, but that another million would be required by 1970. In her rivers and geothermal steam New Zealand had better sources of power available to her for some time to come than coal-fired steam or atomic power stations; but while the South Island had more water resources than it required, the North Island had insufficient resources for its power requirements.

The report estimated that the cost of the Benmore hydro-electric power station on the Waikaki River (South Island) would be £36,000,000; this station, on which preliminary work had started and which should be finished in 1966, would produce 480,000 kilowatts and would be the largest in the Southern Hemisphere. In order to increase the North Island's power output, it was stated that work would go ahead with the development of the Wairakei geothermal power station to generate an additional 82,000 kilowatts, while a gas-turbine station of 107,000 kilowatts to be built near Wellington would be used for peak-loads and as a standby. The Roxburgh hydro-electric station on the Clutha River, which had recently been completed, would ensure that there would be no shortage of generating capacity in the South Island up to 1965.

Mr. Goosman said that the electric supply account would be exempted from taxation to assist in financing the programme. Legislation would be introduced authorizing higher charges by power authorities so that some capital costs could be paid from revenue.

The Government's decisions on the Wairakei project were based on recommendations made by Merz & McLellan of London, the consulting engineers. Their report, issued in Wellington on March 1, recommended the production of a total of 250,000 kilowatts from steam and hot water in the Wairakei area, where work had already started on a plant to produce 69,000 kilowatts from Wairakei steam, which seeps naturally through the earth's crust but gushes out at tremendous pressure from deep bores. The consultants recommended that production of a further 82,400 kilowatts should be the next stage, followed as a third stage by the building of a plant to produce an additional 101,200 kilowatts.

Another report prepared for the N.Z. Government by British Insulated Callender's Cables Ltd., and issued on March 4, described the plan for a submarine power cable under Cook Straits as "thoroughly practicable." It was estimated that the direct current installation to handle a power transfer of 1,200,000 kilowatts would cost £5,163,000. The cables would be laid along two routes each about 25½ miles long, and the project would be among the biggest of its kind.

D. UNITED KINGDOM - SOVIET UNION. — Large Soviet Order for Tyre Factory Equipment.

It was announced on April 6 that a British trade mission which had visited the U.S.S.R. had secured a Soviet order for rubber-manufacturing machinery and electrical equipment, worth "many millions of pounds," to be used for the setting-up of a tyre factory.

The leader of the delegation, Dr. J. G. Mackay (technical director of Francis Shaw & Co. Ltd. of Manchester, one of the firms which formed a consortium to negotiate the contract), said that the precise value of the order would not be known until an engineering survey had been completed. He added that it was the first time the Russians had agreed to a "package deal" of this kind for more than 20 years; that the tyre factory, when completed, would be the largest in the world outside the United States; and that the order had been "one of the items on the shopping list of Mr. Bulganin and Mr. Khrushchev when they visited Britain last year." Other firms represented on the mission were David Bridge & Co. Ltd.; Crompton Parkinson & Co. Ltd.; and Dunlop Advisory Service Ltd. (carrying out the engineering survey as consultants to the consortium).

The order was obtained in the face of competitive tenders from the United States, France, and Western Germany.

(Times - Manchester Guardian)

E. FRANCE - JAPAN. — Agreement on Japanese War Debt in Indo-China.

A Franco-Japanese agreement was signed in Tokio on March 26 under which Japan promised to pay to France immediately the equivalent in sterling of 1,500,000,000 yen (about £1,500,000), as well as $480,000, in settlement of debts which the Japanese military forces incurred in French Indo-China during the Second World War.—(Le Monde, Paris)

JUNE 29—JULY 6, 1957

A. WESTERN POWERS - SOVIET UNION. — Note Exchanges on Middle East. - Western Rejection of Soviet Proposal for Four-Power Declaration. - Marshal Bulganin's Correspondence with Mr. Macmillan, M. Mollet, Dr. Adenauer, and Norwegian and Danish Premiers. - Denunciation of NATO Bases in Norway, Denmark and Western Germany. - Threats of "Atomic Retaliation" in Event of War. - Norwegian, Danish and West German Rejection of Soviet Threats. - Dr. Adenauer's Insistence on Repatriation of Germans from U.S.S.R. as Pre-condition for Negotiations.

A summary is given below of a number of Notes sent by Marshal Bulganin during recent months to the Prime Ministers of the United Kingdom, France, the German Federal Republic, Norway, and Denmark, and also of Notes exchanged between the Western Powers and the Soviet Union during that period. They comprised the following documents:

(1) The replies of the British, French, and U.S. Governments to the Soviet proposals for a four-Power declaration on the Middle East, as had been proposed by M. Shepilov on Feb. 12 (see 15370 A); further Soviet Notes to the Western Powers on the same subject; and the replies of the Western Powers thereto.

(2) Correspondence exchanged between Marshal Bulganin and the British Prime Minister, Mr. Harold Macmillan.

(3) Proposals made by Marshal Bulganin to M. Guy Mollet, then Prime Minister of France.

(4) Notes sent by Marshal Bulganin to the Prime Ministers of Norway (Hr. Gerhardsen) and Denmark (Hr. Hansen) containing warnings of "atomic retaliation" against those countries if they were used as NATO bases for attacks on the U.S.S.R.

(5) The replies of the Norwegian and Danish Prime Ministers to the above-mentioned threats.

(6) Similar Soviet warnings to the German Federal Republic with regard to NATO bases in Western Germany.

(7) Correspondence between Marshal Bulganin and Dr. Adenauer on Soviet-West German relations generally, in continuation of the correspondence initiated by the Soviet Prime Minister on Feb. 10 (see 15370 A).

Note Exchanges on the Middle East.

The text was released on March 11 of the British, French and U.S. replies to the Soviet Notes on the Middle East. The three Western Powers—whose replies were in similar but not identical terms—rejected the Soviet proposal for a joint four-Power declaration on the Middle East, a summary of the British Note being given below:

". . . The proposals of the Soviet Government contain features with which H.M. Government would certainly agree. But they are presented in the context of unwarranted attacks on H.M. Government and their allies. This background must inevitably create doubt whether they are intended as a serious contribution toward the fulfilment of their professed aims.

"H.M. Government agree that the maintenance of peace and security in the Middle East, and the strengthening of the independence and prosperity of the sovereign States of the region . . . are of vital interest to the peoples of the Middle East and indeed to all countries with an interest in world peace. Yet the Soviet Government's actions in Middle East affairs do not appear to be consistent with these aims. For example, the massive shipments of Soviet arms into the area last year, at a time when regional disputes were already acute, only served to accentuate instead of reduce tension . . . The pronouncements on Middle East affairs by the Soviet Government and its organs of information and propaganda have, moreover, for long sought not only to sharpen and perpetuate differences between countries but also to subvert the loyalty of local populations towards their established Governments.

"It is, in contrast, the policy of H.M. Government to work for stability in the Middle East, to strengthen the United Nations in its efforts to solve the problems of the area, and to foster respect for the purposes and principles of the U.N. Charter . . . They hope that such respect will be shown by the Soviet Government, particularly in regard to resolutions of the United Nations which affect the Soviet Government's conduct.

"As regards the Soviet Government's proposal for a mutual agreement not to supply arms to the countries of the Near and Middle East, H.M. Government believe that where local tensions exist it is clearly the responsibility of the major arms-supplying Powers to do nothing which is likely to aggravate such tensions. For this reason the policy of H.M. Government has consistently been to avoid an arms race between the Arab States and Israel, while recognizing that these States all need to maintain a certain level of armed forces for the purposes of assuring their internal security and their legitimate self-defence . . .

"The Soviet Note . . . describes existing associations freely entered into between sovereign States of the area as 'closed military blocs.' H.M. Government hold that all sovereign States have an absolute right to decide freely the nature of their relations with any other State or group of States and to co-operate, consistently with the U.N. Charter, with other States for the purposes of security and defence . . H.M. Government could not, therefore, be party to any attempt by outside Powers to deny the exercise of this right to the States of the Middle East

"The Soviet Government's proposals with regard to the liquidation of foreign bases and withdrawal of foreign troops from the Near and Middle East equally fail to take account of the sovereign right of the countries in the area to take decisions which they judge to be in their own best interests. In this respect, as in regard to the right of the countries concerned to enter into special relations with any other State or group of States, H.M. Government could not be party to proposals . . . which tend to impose on the countries of the Near and Middle East restrictions on their sovereignty and foreign policy of a kind not accepted by countries in Europe and elsewhere.

"These beliefs of H.M. Government are also held by a number of sovereign States in the Middle East region. They are embodied in the terms of the free and equal partnership of the Baghdad Pact. This instrument provides for co-operation for security and defence consistent with Article 51 of the U.N. Charter and, moreover, contains a specific undertaking by the parties to refrain from interference in each other's internal affairs. Furthermore, the partnership between the Baghdad Pact Powers is not only directed to the strengthening of the ability of the Powers concerned to resist aggression but is designed to contribute to the all-round development of the economic, commercial, and cultural relations of the countries concerned on a basis of equality and mutual benefit. H.M Government therefore regard the Baghdad Pact as a potent contribution to peace, stability, and prosperity in the area.

"These considerations all lead H.M. Government to the conclusion that the Soviet proposals do not take sufficient account of the wishes and rights of the States concerned and would not, therefore, prove to be the best method of promoting the peace, prosperity, and independence of the States in the area. This objective would not be furthered by the issuance of the declaration proposed by the Soviet Government, about which the Middle East States concerned would not have been consulted and in which they are not being invited to participate. If, however, the Soviet Union would conduct itself in a manner conforming to the general aims set out in its Note of Feb. 11, without attempting to derogate from the sovereign rights of the States concerned, it would make an important contribution to the fulfilment of this objective not only in the Middle East but in other areas as well."

The U.S. Note said that the Soviet Government "could demonstrate its own willingness to carry out the high principles it sets forth by itself respecting the U.N. resolutions calling for compliance by the U.S.S.R., such as those relating to its actions in Hungary." Like the British Note, it expressed regret that the Soviet Government had sent "massive shipments of arms into the area at a time when regional disputes there had become sharply exacerbated." Both the U.S. and French Governments rejected the Soviet proposal for a four-Power declaration on the Middle East for the same reasons as set forth in the British Note.

Further Soviet Notes on the subject of the Middle East were sent to the Western Powers on April 12; they were, in effect, a recapitulation of the earlier Soviet Notes of Feb. 11, and complained that the Western Powers had put forward "no specific proposals" for ensuring peace and security in the Middle East.

In its Note to Britain, the Soviet Government attacked the Baghdad Pact and, in particular, America's participation in the Pact's Military Committee. It described the Pact as "colonialist" and "aggressive"; alleged that one of its members [unnamed] had "offered its territory for use by bombers of the attacking side" during the Anglo-French action against Egypt; and said that the Soviet Union, for reasons of its own security, could "not remain indifferent to steps which exacerbate the situation in the Middle East, which is situated in immediate proximity to the frontiers of the U.S.S.R." After complaining that the British Note had "distorted" the question of arms shipments to the Middle East countries, the Soviet Note accused the Western Powers of having supplied "a great quantity of arms" to the Baghdad Pact countries and to Israel, and alleged that these arms had been "used for unleashing armed aggression against Egypt in gross violation of the principles of the U.N. Organization."

The Soviet Note to the United States was in similar terms, and contained an attack on the "Eisenhower doctrine." The Note to France alleged, *inter alia*, that Israel was "openly threatening to resume aggression against Egypt if her claims are not satisfied" and referred to "press reports that official French spokesmen have promised Israel economic and military aid if she should take renewed action." The Note added that the "concentration of air forces in Cyprus evidently bears some relation to these plans."

In their replies, made public on June 12, the British, U.S. and French Governments reiterated the points of view expressed in their Notes of March 11 and refuted the various allegations contained in the second series of Soviet Notes of April 12.

After referring to the "unwarranted attacks on the U.K. and its allies" and to the "mis-statements" contained in the Soviet Notes of Feb. 11 and April 12, the British Note rejected *in toto* the Soviet allegation that any member of the Baghdad Pact had offered its territory for the use of British or French aircraft during the Suez emergency. It also denied emphatically that the Baghdad Pact was a threat to the security of any country, emphasizing that all member-Governments had repeatedly affirmed the peaceful nature of the organization. The Note stressed that the main focus of tension in the Middle East was the Arab-Israel dispute, and that it was the continuation of this dispute which made it impossible to achieve lasting peace and stability in the area; the other factors mentioned in the Soviet Note were either "subsidiary or irrelevant." The Soviet Government, however, had made "no constructive and realistic proposals" for solving the Arab-Israel dispute, and had apparently preferred "to make vague generalizations and accusations regarding the alleged intentions of Governments outside the area."

The U.S. Note (which was in similar terms) pointed out that the use of force to settle disputes was already condemned under the U.N. Charter, and that there was thus no need for a four-Power declaration condemning force in the Middle East, as proposed by the Soviet Government. With regard to the concern expressed by the Soviet Government for its security, in view of the "close proximity" of the Middle East to the U.S.S.R., the U.S. Note commented: "It may be generally observed that it is just those countries lying closest to the Soviet Union which have been most vigorously attacked in the recent Soviet campaign of threat and intimidation aimed at the legitimate efforts for self-defence undertaken by the nations in question. Public attacks upon Governments of these States, together with subversive intervention in their domestic affairs, give them good cause to seek the strengthening of their security, as certain States in the Middle East are now doing in concert with each other."

The French Note declared that the Soviet allegations of projected French military aid to Israel and of a build-up of air forces in Cyprus were completely untrue and devoid of any foundation. It stressed that the Soviet Government had done nothing whatever to contribute to the easing of tension in the Middle East, but, on the contrary, had exacerbated the situation by its unconditional support for the extremist demands of Colonel Nasser, by its "exclusively anti-Israel" attitude in the Security Council, and by its "massive" arms supplies to Egypt which "constituted a decisive element in the origin of the crisis of last autumn."

The Bulganin-Macmillan Correspondence.

The Soviet Prime Minister sent a personal letter to Mr. Macmillan on April 20, worded in conciliatory terms, expressing the view that Great Britain and the Soviet Union could reach agreement on all important international questions, and stressing the importance of removing tensions in Anglo-Soviet relations. Marshal Bulganin's letter, extracts from which are given below, called specifically for (1) an agreement between the Great Powers to oppose the use of force in settling unresolved problems in the Middle East, in which connexion he expressed regret that Britain had not agreed to a joint four-Power declaration as proposed by the U.S.S.R.; (2) an immediate ban on atomic and hydrogen bomb tests, without waiting for a general disarmament agreement; (3) a resumption of discussions on the "Eden plan" for establishing a demilitarized zone in Europe; and (4) measures for the relaxation of existing Anglo-Soviet tensions.

Marshal Bulganin to Mr. Macmillan.

After recalling his visit to London with M. Khrushchev in April 1956, Marshal Bulganin wrote as follows (cross-headings inserted):

. "Though the exchange of opinions which began a year ago between both Governments produced positive results, this cannot be regarded as sufficient in the present situation—the more so because, during the year since the talks, events have taken place in the international arena which have led to an undesirable aggravation of international tension and a certain deterioration in the relations between the Soviet Union and Great Britain . . .

Middle East. "We believe that the present tension in the Middle East results in the first place from the unwillingness of certain circles in Britain and several other countries to recognize the justified interests and rights of the States of the Arab East who have taken the path of national independence and renaissance. It is our deep conviction that the task of guaranteeing a lasting peace demands that the Great Powers should strictly uphold the principles of a peaceful settlement of all conflicting questions connected with this region, and that they should respect the sovereignty and independence of the Middle East countries and should not permit any interference in their internal affairs. It can only be regretted that the British Government has not found it possible to support the proposals made by the Soviet Government for a joint four-Power statement on these principles. The situation in the Middle East, an area immediately bordering upon the Soviet Union, cannot fail to bear on the security interests of the U.S.S.R.—a circumstance to which we have already drawn the attention of the British Government."

After stating that the Soviet Government recognized the importance of British economic interests in the Middle East, Marshal Bulganin continued: "The safeguarding of Britain's economic interests in the Middle East should be pursued not along the road of using force but along the roads of negotiation and sober consideration of the just interests of the parties concerned, and of developing normal economic relations between States without infringing in any way the sovereignty of the countries of that area.

"Believing that the possibilities of such a settlement have by no means been exhausted, I do not lose hope that, given good will on the part of the Governments of the States concerned, agreement can be reached on all disputes. Taking into consideration the complexity of the existing problems, one should . . . immediately take such steps on which it is already possible to reach an agreement. We believe that the Great Powers could make a big contribution to the normalization of the situation in the Middle East if they denounce the use of force as a means of settling the unsolved problems of that area. One may differ on certain questions, for instance those connected with the use of the Suez Canal, but it is impermissible that disputed issues should be settled by armed force . . .

Disarmament. "The Soviet Government believes that Great Britain and the Soviet Union, which together with other Great Powers bear special responsibility for the maintenance of world peace, can and must make a very important, if not decisive, contribution to the easing of tension in the relations between the countries of the East and West, and to the settlement of international disputes. The present situation calls above all for an approximation of views on the vital international problem of disarmament. An end must be put to the absolutely abnormal situation in which futile talks on the necessity and desirability of disarmament are being held in authoritative international agencies while disarmament does not make any progress but, on the contrary, the arms race is being stepped up and certain Powers are doing everything to condition mankind to the monstrous thought of the inevitability of atomic warfare.

"At the present time, there are objective pre-requisites for reaching agreement by the Powers—if not on the disarmament problem as a whole, at least on some major aspects of this problem. The Soviet Government is convinced that the Great Powers could show their goodwill for a solution of the problem by agreeing, first and foremost, to the immediate banning of atomic and hydrogen weapons tests . . . The Soviet Government holds the view that this question should be separated from the general problem of disarmament and settled independently, and should not be made contingent on agreement on other aspects of the disarmament problem. It seems possible that agreement could be reached at the outset to discontinue atomic and hydrogen weapon tests for a definite period.

"Must not our two countries concentrate their efforts on averting any threat of atomic war? The Soviet Government regards this as its absolute duty. Can our countries not live in peace? Can joint efforts not bring about a situation in which atomic bombers and rockets of one State will never sow death in the territory of another?

European Security. "Since it is evidently difficult to abolish immediately the military alignments of Powers and to replace them by a system of collective security in Europe, one should, in the interests of British, Russian, and European security as a whole, try to reach agreement on temporary transitional measures which would gradually lead to this goal.

"To this end the Soviet Government would be willing to resume discussion of the proposals, made some time ago in a general form by Sir Anthony Eden, on the creation of demilitarized zones in Europe and of areas of restricted armaments. The Soviet Government assumes in this connexion that its corresponding proposals would also be discussed, such as the proposal for an aerial inspection zone in Europe.

Anglo-Soviet Relations. "For the maintenance of peace in Europe and throughout the world, it is exceptionally important that the present tension in the relations between the Soviet Union and Great Britain should be replaced by good friendly relations. The Soviet Government proposes that joint measures be concerted in the near future to bring about a considerable expansion of cultural and scientific-technical exchanges between the U.S.S.R. and Britain. It is willing to authorize plenipotentiary representatives to examine appropriate questions with British representatives."

Mr. Macmillan to Marshal Bulganin.

In his reply to Marshal Bulganin, dated June 14, Mr. Macmillan dwelt at length on Britain's attitude to the various questions raised by the Soviet Prime Minister, with special reference to the disarmament problem and the question of European security. In the latter connexion he stressed that there was "little prospect of a satisfactory settlement of major issues outstanding between East and West" unless the Soviet Government allowed the German people to exercise "the elementary right of self-determination" and permitted free all-German elections. The Prime Minister's letter is summarized below under cross-headings:

After acknowledging the receipt of Marshal Bulganin's letter, Mr. Macmillan wrote: "While I welcome its conciliatory tone, I would not be frank if I did not express a certain disappointment at the lack of any new and constructive proposals. Nevertheless, I am encouraged to deal in detail with the various questions raised in the hope that as a result of careful examination and discussion of these matters some advance may become possible.

Disarmament. "The first and most important question that faces us all is how to dispel the threat of war. You and I have lived through two World Wars. We have seen their terrors. We must wish to preserve our children and grandchildren from a third and perhaps final tragedy. Thus common interests must urge us on to find answers to the problems which confront us all.

" We share your concern about the burden of military expenditure which weighs on all States. We have taken practical steps, as all the world knows, to reduce this so far as the U.K. is concerned. Yet the crux of the problem is not unilateral reductions but the achievement of international agreements on both conventional and nuclear disarmament. The Soviet Government themselves have warned against agreements which would create ' a false sense of security.' I am sure this is right. That is why we place our hopes on disarmament undertakings, the fulfilment of which can be tested and verified by a system of control commanding general confidence.

" This question of control arises, for example, on your suggestions about stopping the testing of nuclear weapons, either permanently or for a limited period, which I have carefully studied. If—as it seems—you consider that the control problems are simple, I cannot see why, as a first step, you should not agree immediately to the advance registration of tests and to the presence of international observers at all such occasions. I am sure that world opinion, which was deeply disturbed by the fact—now widely known—that the Soviet authorities carried out, unannounced, five nuclear tests in the first half of April, would regard your Government's co-operation in carrying out such a measure as a step forward.

" Registration, however, is not enough. On May 6 the U.K. Government tabled in the U.N. Disarmament Sub-committee proposals not only for the registration but also for the limitation and eventual cessation of tests under effective international control. I would ask you to look again at these proposals. They outline a method for dealing with the tests problem in stages. You have already accepted the principle that disarmament must be achieved by stages, and I am convinced that to apply this principle to the problem of nuclear test explosions offers the best chance of reaching agreement.

" But an agreement on the registration, limitation, and ultimate cessation of tests, still less one for their temporary cessation, is not of itself an agreement for disarmament. It would not be a substitute for a wider agreement covering both the conventional and the nuclear fields with proper systems of control. As you know, we are ready to negotiate either a comprehensive disarmament agreement, of the type set out in the Anglo-French plan, or a partial agreement which might get disarmament started more quickly. I recognize all the difficulties in the way of the immediate conclusion of a comprehensive agreement of the Anglo-French type, and it was with that in mind that I put forward proposals for partial disarmament at the meeting of Foreign Ministers at Geneva in 1955. I was glad to note that, following several enquiries by the Western delegations, your representative on the Disarmament Sub-committee was able on April 30 last to reveal the Soviet ideas on partial disarmament.

" Unfortunately, your views on partial disarmament appear to differ in certain important respects from my own. For example, you propose immediate full-scale reductions in the armed forces of the major Powers down to levels that were originally suggested for the final stage of a comprehensive plan. But you must be aware that the U.K. could not support these very extensive reductions in Western defences without also being assured of parallel settlements in the political field. Reductions of this size obviously require a diminution in the world tensions that obliged us to set up our defence system. I hope therefore that common ground can be found between us about the extent of the reductions to be included in a partial plan.

" I notice that your proposals contain no really effective plan for control of nuclear disarmament. History shows that paper agreements prohibiting the use of specific weapons are not enough.

" I was also sorry to see that your proposals omitted the provisions for permanent ground inspection of all legitimate objects for control which were contained in your comparable proposals of March 7, 1956. I hope you can assure me that these proposed provisions have not been withdrawn. In any case, I welcome sincerely the more favourable attitude you now adopt to the question of aerial inspection, and your proposals on this subject are now being studied . . .

European Security. " I now come to European questions . . . I note your readiness to discuss Sir Anthony Eden's proposals for a demilitarized zone and for the limitation of forces and armaments in Europe. As you know, the ideas animating these proposals are incorporated in the draft treaty of assurance which the Western Powers offered the Soviet Union at the Geneva Conference of Foreign Ministers. I would recall that these proposals were put forward as part of a comprehensive settlement which, in accordance with the directive approved by the Heads of Government at the summit conference, was intended to provide concurrently for a reunification of Germany in freedom and for the establishment of a security system to meet the legitimate defence requirements of the Soviet Union and other European States.

German Reunification. " In the hope of making it easier for the Soviet Union to accept the reunification of Germany, the Western Powers put forward in the treaty of assurance proposals which would provide a system of control in which the Soviet Union would directly participate, and reciprocal assurances from which the Soviet Union would directly benefit. In particular, you will remember that in order to remove any doubts which might remain about the implications of these proposals, H.M. Government stated that they would be prepared, as part of a mutually acceptable European security arrangement, to give an assurance that in the event of a reunified Germany choosing to join NATO they would not take military advantage as a result of the withdrawal of Soviet forces.

" You will no doubt have observed that a similar assurance was given by Chancellor Adenauer and President Eisenhower in their declaration in Washington on May 28 [see 15580 A]. I must repeat, however, that all Western proposals for European security are contingent on a reunified Germany with a freely elected all-German Government, free to choose its own foreign policy.

" I am therefore disappointed that your message does not take up any of these proposals and makes no other constructive suggestions for the achievement of German unity For this reason the Soviet proposal for a collective security treaty based on the continued division of Germany is and will remain unacceptable to the British Government.

" Nor would a non-aggression agreement between members of NATO and the Warsaw Pact be, in itself, any real contribution towards European security. Such an agreement would add nothing to the obligations which all members of the U.N. have already undertaken. Moreover, it would confirm rather than eliminate the present division of Europe and of Germany, which is the main cause of tension in Europe.

" If, as I hope, the Soviet Government want to give practical evidence of their expressed desire to settle the principal international problems which beset us, the best way of doing so would be to allow the German people freely to elect their own Government and to decide their own future. Unless the Soviet Government are prepared to grant the elementary right of self-determination to the Germans, there is, I fear, little prospect of a satisfactory settlement of the other major issues outstanding between East and West.

" Since H.M. Government regard the reunification of Germany as so vital an objective, I should like to put to you, Mr. Prime Minister, the following questions :

(1) Does the Soviet Government continue to recognize their responsibility for the reunification of Germany as stated in the directive issued by the four Heads of Government to their Foreign Ministers at Geneva in July, 1955 ?

(2) Does the Soviet Government agree that it is desirable to reunify Germany at the earliest possible opportunity ?

(3) Does the Soviet Government agree that the German people should be allowed freely to choose their own Government by means of free all-German elections ?

(7) Does the Soviet Government recognize the right of a freely elected all-German Government freely to choose its own domestic and foreign policies ?

Middle East. " I now turn to the Middle East. I noted with pleasure the passage in your message which confirmed that, as a result of the talks which you and Mr. Khrushchev had in London last year, you understood the importance to this country of our economic interests in the Middle East. Unfortunately since your visit here the tone of Soviet broadcasts and the Soviet Press, coupled with Soviet support for elements in the Middle East hostile to these vital interests of ours, have left the impression that the Soviet Government are pursuing a policy in this area which is harmful to the well-being of this country and is not in accordance with the professions of friendship underlying your message. H.M. Government would welcome any concrete action by the Soviet Government which would dispel this impression.

" Quite apart from this, I would hope that they would be prepared to pursue a policy with regard to Middle Eastern problems which would serve the interests of world peace as a whole. In the view of H.M. Government the most effective contribution which the Soviet Government could make towards a relaxation of tension in this area would be to direct their efforts towards a solution of this central problem along the lines suggested by H.M. Government [in the Note exchanges on the Middle East—see above].

Hungary. " I must, however, point out that the situation in the Middle East is not the only, or indeed the main, factor which has led to the deterioration of Anglo-Soviet relations to which you refer. British public opinion was deeply shocked by the use of Soviet troops to suppress the spontaneous uprising of the Hungarian people. In this country we regard the Hungarian uprising as a movement supported by the overwhelming mass of the population to rid themselves of an alien system imposed on them by force. We do not accept the interpretation that it was a ' counter-revolution ' inspired from outside. The policy of repression now being pursued in Hungary by a regime maintained in power by the presence of Soviet troops, and the continued refusal of the Soviet and Hungarian Governments to comply with the resolutions of the U N. General Assembly, are bound to remain serious obstacles to any real improvement in Anglo-Soviet relations.

Anglo-Soviet Relations. " Against this background I am nevertheless ready to consider with you means of improving Anglo-Soviet relations. The visit which you and Mr. Khrushchev paid to the U.K. last year provided a useful opportunity for full and frank discussion. It paved the way for an improvement in Anglo-Soviet relations. I regret that subsequent events should have led to an increase in international tension which has necessarily had its effect on relations between our two countries. But we must do our best to improve these where we can, in particular in the fields of trade and culture to which your message refers . . "

After drawing attention to certain restrictions on trade and cultural relations between the two countries which were still imposed by the Soviet Government, Mr. Macmillan concluded : " I should have greater confidence in the prospects of improved Anglo-Soviet relations if the Russian Service of the B.B.C. was not jammed in the Soviet Union, if British books and newspapers were unrestrictedly on sale in the Soviet Union, and if Soviet people were free to visit Western countries whenever they wished to do so. No similar

restrictions are placed on the British people. They are free to listen to Soviet broadcasts, to buy Soviet publications, and to visit the Soviet Union if they are granted Soviet visas. I would therefore ask you to consider whether the time has not come to remove these barriers and to enable the peoples of our two countries to get to know one another better . .

" There is thus much which we can and should do to improve relations. But it would be disingenuous of me not to repeat that great problems still divide us. There is the question of Europe, where our views are very dissimilar both about Germany and about Hungary. There is the Middle East, in which we have yet to find common ground. We have different points of view on many great issues . . . But these differences ought not to prevent us from making some kind of advance towards a more sensible relationship between our two countries. I believe myself, after a full review of all the questions which your letter and my reply have traversed, that among the major international questions the one where there is most need for progress is the field of both conventional and nuclear disarmament. If we and our allies could reach with you some measure of agreement on this issue, it would be a real contribution to the reduction of world tensions and to the settlement of the many problems which now confront us."

Marshal Bulganin's Letter to M. Mollet.

The Soviet Prime Minister also sent a letter to M. Guy Mollet on May 17 saying that the U.S.S.R. and France, as great Powers, had a " vast responsibility " in the present international situation and suggesting " possible ways of improving French-Soviet relations."

Referring to " the historical experience of the joint fight waged by our two countries against aggressive German militarism," Marshal Bulganin stressed that France and the U.S.S.R. should seek in the first place " to ensure such conditions as would make a repetition of aggressive wars impossible on our continent." In this connexion he quoted the words of Jean Jaurès, who had foretold that the triumph of a Russian Revolution would create the conditions for " a real Franco-Russian alliance which will become a powerful factor for peace in Europe."

Marshal Bulganin went on to attack NATO, the Euratom and Common Market projects, the remilitarization of Western Germany, the rapid growth of a West German Army " intended to be armed with atomic weapons," and the appointment of " the former Hitlerite General Spiedel " as Commander of NATO Land Forces in Central Europe. He emphasized, nevertheless, that the U.S.S.R. did not regard Germany as " a kind of eternal enemy of the Soviet Union and France," and that the Soviet Government " sincerely desires to establish relations of peaceful co-operation and trust with Germany " in the interests of ensuring " lasting peace in Europe." Good relations with Germany, however, would " correspond to the strengthening of peace in Europe only if they are not accompanied by encouragement of the rebirth of aggressive German militarism, which has more than once brought misfortune upon the peoples of Europe, the French people included."

After expressing " profound concern " that France had " decided to permit her territory to be used for setting up American atomic bases," Marshal Bulganin said that it was " vitally necessary to begin settling the problem of creating an effective system of collective security." To this end he suggested a non-aggression pact between the NATO and the Warsaw Pact Powers; simultaneous reductions in the French, British, and U.S. forces stationed in NATO countries and in the Soviet forces stationed in Warsaw Pact countries; and a " zone of restriction and armaments inspection " in Europe, including both parts of Germany and the countries bordering upon them. France and the Soviet Union should take the initiative, by bilateral consultations, in " elaborating the basic principles of a system of European security."

Referring to the devastating nature of modern nuclear and thermo-nuclear weapons, Marshal Bulganin wrote: " It is well known that there exists at present a rocket weapon of such colossal destructive power that it could sow death and devastation in a few hours over the territories of entire countries. The present development of this weapon is such that there is no spot on the globe which could serve as a shelter for the aggressor. There is no need to speak of the fate which would overtake those countries which became accomplices in aggression. I beg you not to regard these words as a threat addressed to any country. Profound concern for the well-being of the peoples of the Soviet Union, as well as for the fate of world peace, make it necessary to draw attention to this . . ."

After recapitulating the Soviet point of view towards the Middle East and the disarmament problem, Marshal Bulganin appealed for closer economic, scientific, and cultural relations between France and the U.S.S.R., suggesting *inter alia* that the two countries should co-operate in the industrial uses of atomic energy. " No matter what temporary differences may darken relations between our countries," he declared, " we must not forget that the friendship between our peoples was not born today or yesterday. It was formed on the basis of the community of national interests of our peoples, and it has firm and glorious traditions."

Marshal Bulganin's letter was sent to M. Mollet only four days before his resignation from the French Premiership (see 15597 A).

Marshal Bulganin's Notes to Norwegian and Danish Premiers. - Warnings against NATO Bases in Scandinavia. - Dano-Norwegian Rejection of Soviet Threats.

In a letter sent on March 22 to Hr. Einar Gerhardsen, the Prime Minister of Norway, Marshal Bulganin expressed the Soviet Government's desire for friendly Norwegian-Soviet relations, but gave a warning that the Norwegian people might " have to pay dearly for the bases which are built in Norway if the NATO strategists' plans are carried out." In the event of NATO " aggressive actions " against the U.S.S.R., the Soviet Government would be " forced to inflict a destructive blow against the aggressors and also against the bases which are located near our borders."

Marshal Bulganin to Hr. Gerhardsen.

After recalling the visit paid by Hr. Gerhardsen to Moscow in 1955, Marshal Bulganin referred to the intensification of trade, cultural, and scientific-technical relations between the two countries, including the joint agreement for exploiting the hydro-electric resources of the Pasvik River, on the Norwegian-Soviet frontier (see 15614 B).

Marshal Bulganin went on to welcome the Norwegian Government's previous assurances that it would " not contribute to any policy with aggressive aims " and would " not place bases at the disposal of foreign armed forces on Norwegian territory as long as Norway is not exposed to an attack or threat of attack." While welcoming these assurances, and noting with satisfaction that Norway had kept her promises not to permit foreign bases on her territory, Marshal Bulganin added, however: " In the present situation this is not sufficient to solve the question entirely. For the first time in her history Norway is in a military alliance directed against a great Power which is her neighbour . . . The fact is that Norway's territory is ready to be used at any moment by the Atlantic Pact forces against the Soviet Union. While there are today no foreign bombers on the airfields which have been built in Norway in recent years on NATO orders . . . the situation can change tomorrow . . . and one cannot avoid taking into consideration the lessons of the not-so-distant past. We are not calling upon your Government, either today or tomorrow, to renounce the North Atlantic Treaty, although our attitude towards this treaty is well known. But the interests of both our countries demand that there should be nothing unclear or unspoken in important questions concerning Soviet-Norwegian relations."

Continuing, Marshal Bulganin asserted that Norway was of value to the " Atlantic bloc " primarily because she had a common frontier with the U.S.S.R., and that the leaders of NATO were not interested in " the fate that would befall Norway in the event of war." " But the Norwegian people," he added, " might have to pay dearly for the bases which are being built in Norway with foreign money, if the NATO strategists' plans are carried out. The Soviet Union has no intention of attacking anyone, but obviously, in response to aggressive actions against the Soviet Union, we would be forced to undertake the most energetic measures in order to inflict a destructive blow against the aggressor and also against the bases which are located near our borders . . . The destructive power of modern weapons is so great that the blow which would be directed against the aggressor's bases would inevitably hit much greater areas, which would mean a catastrophe even for countries with a larger territory than Norway. Tests show that one hydrogen bomb can produce destruction within a radius up to several hundred kilometres. One might ask what would happen if several such bombs were used . . . "

After a statement on the Soviet Union's desire for disarmament, Marshal Bulganin said that his Government regarded the strengthening of relations with the Scandinavian countries and the maintenance of lasting peace in Northern Europe as " one of its most important tasks." He continued: " With Norway we have a centuries-old tradition of friendship and good-neighbourly relations. In the not very distant past this friendship was strengthened in a common struggle against the Hitlerite invaders . . . Between Norway and the Soviet Union there exist no issues whatsoever in which the interests of our two countries can collide. If there should be factors making for difficulties in our relations, they are introduced from outside. I assure you that the Soviet Government sincerely desires to establish relations with Norway based on friendship and full confidence . . . An improvement in relations with Norway would in no way affect the existing friendly relations between our two countries and other States—for example, Norway's relations with Great Britain and the United States . . . "

" As you know, we have very good relations with Finland. We value very highly our friendship with that country and its industrious people, the more so because there was formerly so much that divided us. The question arises: Cannot relations between the U.S.S.R. and Norway be just as good and friendly as between the U.S.S.R. and Finland? . . . The Soviet Union and Norway have never fought against each other, and the peoples of our countries have sympathy and respect for each other. The Soviet people know well that Norway has made incalculable contributions to world culture. The heroic and liberty-loving Norwegian nation has given to the world great writers, musicians, and explorers. For centuries our two countries have maintained stable and friendly relations. It is sufficient to mention, for example, the honourable traditions of co-operation between Norwegian and Russian explorers in the sphere of polar research . . . These great traditions should in our opinion be developed and strengthened in all ways . . . "

Hr. Gerhardsen to Marshal Bulganin.

In his reply to Marshal Bulganin (April 11), Hr. Gerhardsen said *inter alia* that the assertion that Norwegian territory could be used against Norway's own will for the stationing of foreign aircraft, warships, and atomic weapons was based on a "misconception," since it was "Norway's constitutional bodies which, in the light of the existing international situation, will at any time decide whether our country is exposed to a threat of attack." He reiterated that Norway, no less than the U.S.S.R., desired good relations between the two countries and comprehensive disarmament.

"After the Second World War," wrote Hr. Gerhardsen, "it was hoped in Norway that the United Nations would develop into an organization which could offer security and peace to our country and to all countries in the world. When, however, it became clear that the world organization could not provide its member-States with the necessary security, the Norwegian Government felt obliged to seek protection through co-operation with other countries on a regional basis, and accordingly in 1949 Norway joined the North Atlantic Treaty Organization.

"In the course of my conversations with you and your colleagues in Moscow, I . . . again emphasized, as had previously been done in Notes from the Norwegian Government to the Soviet Government, that the Norwegian Government will never contribute to a policy which has aggressive aims and will not permit Norwegian territory to be used for the purpose of such a policy.

"The provisions of the North Atlantic Treaty regarding the obligation to come to the assistance of each other enter into effect only in the event of a member of the treaty being subject to attack. These provisions demonstrate clearly that the sole aim of this organization is to safeguard its members against attack from outside and . . . to prevent war.

"The Norwegian people are as vitally interested in the maintenance and strengthening of peace as are the peoples of your country, and it is this consideration which, together with concern for the country's security, determines Norwegian foreign policy.

"The Norwegian Government has at all times acted in accordance with its proclaimed intention not to permit the stationing of armed forces of foreign powers on Norwegian territory as long as Norway is not attacked or exposed to threats of attack. I am pleased to see that the Soviet Government expresses its satisfaction with this.

"You say, however, that in the present situation this is not sufficient because, as you assert, Norway might, as a consequence of her membership in NATO, be forced to have foreign bombers, warships, and atomic weapons stationed on Norwegian territory against her own will and contrary to her national interests. The Norwegian Government must emphatically declare that this conception can only be due to a misunderstanding.

"It is indeed the basic principle of the co-operation within the NATO that each individual member-country fully retains its right of self-determination, and this naturally applies to such vital questions as are here involved. It is therefore Norway's constitutional bodies which, in the light of the existing international situation, will at any time decide whether our country is exposed to a threat of attack.

"The existence of large military formations in general, and the introduction of new weapons in particular, is naturally a source of anxiety and uncertainty in all countries. The Norwegian Government will welcome an arrangement which can reduce, and if possible eliminate, the need for such weapons, but it is of the opinion that this can be achieved only on the basis of reciprocity and through international negotiations. As long as no international agreement on disarmament under adequate control is concluded, it must be the concern of each individual government to ensure the defence of its country in the way it deems best . . .

"The Norwegian Government considers it as particularly important that agreement be reached as soon as possible for a solution of the problems connected with nuclear weapons. Your Government will be familiar with the proposal for advance registration of tests of such weapons which Norway, jointly with Canada and Japan, has submitted to the United Nations [see page 15522, second column], and which at the present moment is being discussed in the U.N. Disarmament Sub-committee. It is the Norwegian Government's hope that the Soviet Union will participate in the discussion of this proposal, on the understanding that in the next phase it might be possible to arrive at agreement which can safeguard humanity against the dangers of radioactive radiation.

"It is clear that the possibilities for extending the relations between peoples are directly dependent upon what happens in international politics. The Soviet attitude toward the people's rising in Hungary caused a spontaneous and strong reaction among the Norwegian people and impeded the further development of co-operation between organizations and institutions in our two countries.

"On our side we were well satisfied with the development of friendly relations between our two countries during the period which followed my visit to the Soviet Union over a year ago. A strengthening and expansion of friendly relations between two neighbouring States such as Norway and the Soviet Union is in itself natural. However, it does not suffice merely to build on centuries-old traditions and sympathy between peoples. Friendship must constantly be renewed on the basis of mutual respect and confidence. It is the sincere hope of the Norwegian Government that the international situation will develop in such a way that organizations, institutions, and private persons in our two countries will be encouraged reciprocally to expand and strengthen their connexions . . "

Marshal Bulganin to Hr. Hansen.

Marshal Bulganin's letter to the Danish Prime Minister (delivered on March 29) was on the same general lines as that to Hr. Gerhardsen. *Inter alia* it alleged that Denmark was "covered by a network of NATO bases" and that "a vast part of Danish territory—Greenland—has been transformed into a U.S. military base." As in the letter to Hr. Gerhardsen, reference was made to the destructive power of modern weapons, in which connexion Marshal Bulganin observed that a single hydrogen bomb would be sufficient to destroy a territory larger than Denmark's.

After saying that "the position of Denmark in the light of the military preparations of the North Atlantic bloc must inevitably attract the attention of the Soviet Union," Marshal Bulganin referred to the Danish Government's declaration of 1952 that it would never permit its territory to be used as a base for an attack on any other State. He alleged, however, that Denmark was "covered by a network of military, naval and air bases" which, if used for "aggressive" purposes by the NATO, would constitute a "legitimate target" for the Soviet Union "in pursuit of the natural and inalienable right of self-defence." In present circumstances, said Marshal Bulganin, there was no guarantee that "foreign forces" might not appear at the Danish bases within a few hours "on a signal from NATO's military command," and the situation would "obviously become more critical if plans for stationing American units equipped with atomic weapons are realized as far as Denmark is concerned."

"The Soviet Government," the letter continued, "would be neglecting its duty to the peoples of the Soviet Union if it did not, in reply to aggression, take immediate action to direct a destructive blow against the attacker and his entire network of bases established in preparation for an attack against the U.S.S.R. . . . The destructive power of modern weapons is so great that, for countries with a territory the size of Denmark's, it would in the event of an atomic war be tantamount to suicide if foreign Powers were given possibilities of establishing bases there."

Marshal Bulganin also asserted that Greenland had been "long ago transformed into a U.S. military base and is actually outside Denmark's control." In addition he said that Denmark played a special role in international strategy "as guardian of important international straits on which the sea connexions of all the Baltic States with the outer world are dependent." Unlike his letter to Hr. Gerhardsen, in which he did not insist on Norway's withdrawal from NATO, Marshal Bulganin's letter to Hr. Hansen urged that Denmark should withdraw from the North Atlantic Treaty and rely for her security on "international guarantees"

Hr. Hansen to Marshal Bulganin.

In his reply to Marshal Bulganin (delivered on April 29), Hr. Hansen, like Hr. Gerhardsen, described the Soviet concept of NATO as based on a "fundamental misunderstanding" and on "untenable premises." The Danish Prime Minister reiterated that NATO was solely a defensive alliance, declared that Denmark would remain in the North Atlantic Treaty, and rejected Marshal Bulganin's suggestion that she should withdraw from that organization, describing that suggestion as "impractical and unrealistic."

Hr. Hansen wrote: ". . . No people could be more peace-minded than the Danes, who have been several times in the last hundred years the victims of aggression . . . . We agree with your statement that the present situation demands of all countries the most determined efforts to strengthen peace. . . . This responsibility is certainly understood in a small country like Denmark, whose influence on world political developments is limited, but how much heavier must it weigh upon the leading statesmen in a big country like the Soviet Union, whose attitude can influence the fate of millions of people. . . "

Rejecting Marshal Bulganin's contention that NATO was an "aggressive" organization, and emphasizing that Denmark had "the indisputable right to take such defensive measures as she considers expedient," Hr. Hansen wrote: "Let me, too, be quite frank and state plainly that the Soviet concept of NATO rests upon a fundamental misunderstanding. Your warning is, therefore, based on untenable premises. NATO is and remains a defensive alliance. It was established and is maintained because the Western countries have thought it necessary, against the background of a series of factual events, to guard themselves against the possibility of aggression. What we are preparing for is to be able to defend ourselves should it become necessary. We dismiss the idea of Denmark as an advanced springboard and base for attack against the Soviet Union as being without foundation in actual fact."

Hr. Hansen went on to refer to a Danish Note to the Soviet Union of May 4, 1949, which had emphasized that Denmark would never support a policy with aggressive aims, and certainly not one directed against the Soviet Union, with which Denmark had a long tradition of peaceful and friendly relations. He continued: "I have noted with satisfaction that you refer in your letter to a statement made in October, 1952, by the Government then in power to the effect that

it would never allow Danish territory to be used for aggression against any State whatever. It is superfluous to confirm to you that the present Government is in complete agreement with the view expressed in that statement, and that this view is shared by the whole Danish people. . . . No Danish Government could remain in office which was not determined to adhere to the above statement. None of the military installations which have been built on Danish territory has anything to do with aggressive preparations.

"In your letter you refer to the position of Greenland. . . . I can definitely refute your assertion that this island is virtually outside Denmark's control. The defence measures taken in Greenland have been in accordance with a published agreement between Denmark and the United States.

"Every country, as you rightly say in your letter, has the natural and undeniable right of self-defence. As long as there are misunderstandings between nations and countries live under the fear of aggression, every country has the right to improve its defences. The maintenance of world peace by the United Nations alone would be the ideal solution, but so far the U.N. has not yet the power to carry out this task. For this reason Denmark has chosen the NATO way to ensure for herself peace and freedom.

"You recommend that Denmark should find a more reliable way to ensure her security than through membership of NATO. In this connexion you have asked me whether I and the Government headed by me would not regard it as much more useful if Denmark, as well as the other countries interested in the strengthening of peace in Europe, sought an agreement on the question of Denmark's security, such as international guarantees for her independence and territorial integrity, until such time as an effective system of collective security can be established in Europe. . . . The answer to this question is that Denmark would not have chosen to solve the problem of safeguarding her security by joining NATO unless, after careful consideration, she had arrived at the decision that this solution would be the best for Denmark in the prevailing circumstances.

"There is certainly something attractive in the idea of international guarantees for the independence of a small country. But on closer consideration, and taking into account historic experience, there are serious doubts about its practical realization in Denmark's case. Denmark's geographical situation between the Baltic and the North Sea alone, which makes it the 'guardian of the straits,' leads to the conclusion that an arrangement such as that suggested by you can hardly be called realistic. As you also raise the question of the straits in your letter, I wish to say in this connexion that we are alive to the responsibilities devolving upon us as a result of our geographical situation. I do not think that anyone would have any reason to reproach us with mistakes or neglect as regards our discharge of the responsibilities falling upon Denmark in this respect."

In conclusion, Hr. Hansen said that none regretted more than the Danish people and Government the deterioration of international relations during 1956, but added that the events in the Middle East and Hungary had come "as a shock to the world." The Soviet Union's attitude in Hungary had destroyed the illusions of the Danish people, especially as regards the development of relations between East and West. "It was inevitable," Hr. Hansen added, "that the events in Hungary weakened the determination of the Danish people to increase East-West co-operation." After expressing agreement with Marshal Bulganin's hope for the development and improvement of Danish-Soviet relations, Hr. Hansen declared: "Results in this respect will depend to a large extent on major political developments in the relations between East and West as a whole."

Hr. Gerhardsen and Hr. Hansen had discussed the communications sent to them by Marshal Bulganin before sending their replies to the Soviet Prime Minister.

Soviet Notes to German Federal Republic. - Denunciation of NATO Bases in Western Germany and Provision of Atomic Arms for West German Forces. - Dr. von Brentano's Attack on Soviet Policy.

In addition to the Notes to Norway and Denmark, the Soviet Government sent a strongly-worded Note to the German Federal Republic on April 27 alleging that Western Germany was being converted into "the main European springboard and chief NATO shock-force for atomic war in Europe."

After referring to the "concentration by the Western Powers of various types of nuclear weapons on the territory of the Federal Republic," and to the "preparations for equipping the West German Army with atomic weapons," the Soviet Note spoke of the "justified anxiety" among the population of Western Germany at the consequences which an atomic war would entail "for the German people, for the neighbours of Germany, and for Europe as a whole." It went on:

"The equipping with atomic weapons of the Army of the German Federal Republic—the only European State whose government demands a revision of the present frontiers in Europe—would sharply aggravate international tension and increase the danger of war. The security of the States bordering on Germany would be imperilled. It can be imagined what the attitude of States which have been repeatedly attacked by Germany in the past would be to the atomic arming of the Federal Republic. These States would naturally be forced to reply by taking appropriate measures to strengthen their defence. Thus the Government of the Federal Republic . . . would trigger off an atomic arms race in Europe . . .

"The atomic arming of the German Federal Republic is sometimes claimed to be necessary for ensuring the security of the country. Such assertions have nothing in common with the real state of affairs. Instead of exerting efforts to ease international tension, and to facilitate agreement on disarmament and the prohibition of weapons of mass destruction, attempts are being made to ensure the security of the Federal Republic on the basis of the 'policy of strength.' But the equipping of the West German Army with atomic weapons and the conversion of the Federal Republic's territory into a launching site for American nuclear missiles, far from strengthening the security of the Federal Republic, would on the contrary expose it and its population to a terrible danger such as cannot be compared with any calamities ever experienced by the German people.

"Twelve years after the end of the Second World War, Germany has still not yet healed the wounds inflicted by that war. The numerous ruins in many German cities bear eloquent witness to this. Yet only conventional armaments were used in the last war. It is quite obvious that the conversion of the Federal Republic into a NATO atomic base is bound in the event of war to make Western Germany the immediate object of retaliation by all types of modern weapons, including rocket weapons. There is no need to dwell in detail on the consequences this would entail for the Federal Republic, which has such a density of population and concentration of industry that the vital centres of the country could be paralysed by a single hydrogen bomb . . . Germany would become one vast graveyard . . .

"It would be a serious mistake to assess this statement as an attempt to threaten the Federal Republic. Nothing could be more alien to the policy of the Soviet Government than the use of threats and intimidation. This Note . . . is not prompted by the desire to intimidate anyone but to call attention to the real state of affairs now taking shape in Europe . . .

"One cannot evade the question of the consequences which the equipping of the West German Army with atomic weapons would have for the restoration for Germany's national unity. If the policy pursued by the Federal Republic a policy of remilitarization, accession to aggressive military blocs, and suppression of democratic freedom - has created great obstacles to the unification of Germany, the equipping of the *Bundeswehr* with atomic weapons and the conversion of Western Germany into a centre of atomic war in Europe would strike an irreparable blow at the national reunification of the German people . . ."

The tone of the Soviet Note, and in particular the threats and menaces contained therein, aroused intense anger and indignation in the Federal Republic, which was expressed by Dr. von Brentano (the Foreign Minister) in a press statement on April 29.

Dr. von Brentano described the Soviet Note as "grotesque," "incomprehensible," and "an unparalleled interference in West German affairs," saying that the references to the catastrophic effects of atomic weapons could only be regarded as "a massive threat and an attempt at intimidation with a view to separating the Federal Republic from its allies." He declared that the Soviet Union's objective was to "obtain a monopoly of nuclear weapons so that it can hold this continent in everlasting servitude," referring in this connexion to the savagery with which the Soviet Army had crushed the people's uprising in Hungary.

After stressing that the Federal Republic was the only country in the world which had voluntarily renounced the right to manufacture atomic weapons, Dr. von Brentano called upon the Soviet Union to make constructive proposals for disarmament instead of threatening the Federal Republic. In this connexion he declared that the U.S.S.R. "has not made one single serious effort in all these years to solve this problem on a basis acceptable to freedom-loving people." He reiterated that the Federal Republic would provide for its own security with atomic weapons if Russia continued to block an international agreement for all-round disarmament, and dismissed the Soviet allegations against the Federal Republic as "grotesque." Refuting, in particular, the allegation that Western Germany had become the "main weapons depot of Europe," Dr. von Brentano contrasted the 20 NATO divisions (including the five half-formed West German divisions) with the 22 Soviet divisions in Eastern Germany, the 75 "satellite" divisions, and the 153 divisions in the Soviet Union itself. He added: "It simply defies comprehension that anyone possessing such superiority can talk about the Federal Republic having become 'Europe's main weapons depot.'"

In reply to the Soviet Note of April 27, the German Federal Government sent a sharp Note to Moscow on May 22 declaring that it would not accede to "a one-sided, completely unjustified demand by a foreign Government to render accounts." It rejected all the allegations contained in the Soviet Note, and reiterated that the Federal Republic had the "legitimate right" to ensure its national security with atomic weapons if the U.S.S.R. continued to block an international agreement for controlled disarmament.

After drawing the Soviet Government's attention to the unanimous *Bundestag* resolution of May 10 calling on all nations possessing nuclear weapons to discontinue tests and to agree to a controlled disarmament system [see page 15544, first column], the West German Note observed that the U.S.S.R.'s attitude at the London disarmament talks was "hardly encouraging" and that it was the only Government which had "up to this day refused any really effective control." Emphasizing that the NATO forces in Western Germany

had a purely defensive mission, it declared that "only those who would irresponsibly risk attacking that [Atlantic] community have any reason to fear it or the weapons in its possession." In addition, the Note "emphatically repudiated" the allegation that West German policy would unleash an arms race, stressed that the Federal Government rejected any idea of changing Germany's present frontiers by force; and rejected the Soviet assertion that the provision of atomic weapons for the *Bundeswehr* would make German reunification impossible.

The West German Note again emphasized that the Federal Republic had voluntarily renounced the manufacture of atomic weapons, and stressed the Federal Government's desire for a ban on all nuclear and thermo-nuclear weapons as part of an all-round disarmament plan, and its willingness to do all in its power to promote that objective.

A further Soviet Note was presented in Bonn on June 27, being to a large extent a recapitulation of the earlier Note of April 27. It was described by an official German spokesman as "impossibly sharp and polemical" in tone and as approaching "the limit of what is customary in diplomatic exchanges."

The latest Soviet Note accused the Federal Government of "striving to obtain atomic arms from abroad" for the *Bundeswehr*, and of "evasive statements intended merely to calm the West German electors so that the country may later find itself confronted with the *fait accompli* of atomic armaments." It also accused the Federal Government of taking 'a negative view of the proposals on disarmament which have a direct bearing on Germany, such as the creation in Europe of a zone of inspection to include both parts of Germany . . . and the reduction and subsequent withdrawal of foreign troops from German territory." After reiterating at great length the allegations contained in the earlier Soviet Note, the latest Note stated that those who pursued the policy of arming the *Bundeswehr* with atomic weapons "run the risk of going down in history as the grave-diggers of German unity."

Bulganin-Adenauer Correspondence on Relations between Western Germany and Soviet Union.

Apart from the above-mentioned Note exchanges between the Soviet and Federal German Governments, several letters were exchanged between Dr. Adenauer and Marshal Bulganin in continuation of the correspondence initiated by the Soviet Prime Minister on Feb. 10 (see 15371 A).

In a letter to Marshal Bulganin on Feb. 28, the Federal Chancellor agreed that talks should be held between the two countries at an early date for an expansion of trade relations, increased scientific and cultural co-operation, and a consular convention. At the same time Dr. Adenauer made a strong appeal for the repatriation of German citizens held in the U.S.S.R. against their will, and emphasized that the Soviet Government had the obligation—which the Western Powers had already accepted—to promote German reunification by agreeing to free all-German elections.

The Federal Chancellor defended Western Germany's membership of NATO against Marshal Bulganin's allegations of the allegedly "aggressive" character of that organization, and emphasized that its role was entirely defensive. As regards German citizens in the U.S.S.R., he pointed out that the Soviet Government had agreed in 1955, during his (the Chancellor's) talks in Moscow, to repatriate all German nationals still in the Soviet Union. While this had been done in the case of prisoners-of-war, it had not been carried out in the case of civilians—in which connexion Dr. Adenauer referred particularly to German scientists who were working at the nuclear experimental station at Sochum, on the Black Sea. On the question of German reunification, he reiterated that free all-German elections must be held in preparation for an all-German Parliament and Government, and appealed to Marshal Bulganin to "liberate 17,000,000 Germans" in the Eastern Zone. By doing so the Soviet Government would render "an inestimable service to the cause of friendly co-operation between our two countries" and would best serve the cause of peace and European security.

In reply to this letter, Marshal Bulganin informed Dr. Adenauer on March 18 that the U.S.S.R. was ready to enter into negotiations with the German Federal Government on the subjects of trade relations, cultural and scientific co-operation, and a consular convention, and proposed that talks should open at an early date in Moscow or Bonn. As regards Western Germany's membership of NATO, Marshal Bulganin observed that "we continue to adhere to different viewpoints." On the question of reunification, he reiterated the Soviet view that the unity of Germany could be achieved only by direct negotiations between Western and Eastern Germany and a *rapprochement* between the two German States. In the course of his letter Marshal Bulganin criticized Dr. von Brentano (the Federal Foreign Minister) for having recently made "remarks which are not in the interest of improving relations between our countries."

A West German Note to the Soviet Government, presented on April 17, agreed that negotiations on trade, cultural, scientific, and consular matters should be held in Moscow "forthwith," and proposed that any agreements reached should be signed in Bonn. It was accompanied by a further letter from Dr. Adenauer to Marshal Bulganin in which the Federal Chancellor pointed out that the Soviet Premier had made no reference in his latest letter to the repatriation of Germans in the U.S.S.R., despite the fact that he (Dr. Adenauer) had raised this matter in his letter of Feb. 28.

With regard to Marshal Bulganin's criticisms of Dr. von Brentano, the Federal Chancellor said that he "objected emphatically to this criticism of the German Foreign Minister, who enjoys the full confidence of the Federal Government and of myself." He added: "Herr von Brentano, in his statements on the foreign policy of the Soviet Union, has merely expressed the feelings of the entire German people, which is disappointed at the Soviet Union's attitude on the question of German unity."

After saying that he would "not go into the unfounded, severe accusations that have repeatedly been made against the Federal Republic in official declarations of the Soviet Government and are continually being repeated," Dr. Adenauer added: "The aspirations of the entire German people for the re-establishment of its national unity cannot be nullified by a reference to the alleged existence of two German States. It is unrealistic to describe the so-called [East] German Democratic Republic, whose governmental power was not established by legitimate means and which is rejected by the overwhelming majority of the population, as a reality in the life of the German people."

A Soviet Note of May 23 proposed that negotiations on the above-mentioned subjects should open in Moscow on June 15. As regards repatriation, the Note said: "The U.S.S.R. has fully completed the repatriation of German subjects who had been convicted in the Soviet Union and of whom mention was made in the [Moscow] talks with the Federal German delegation in 1955. This does not preclude the possibility of discussing certain practical questions affecting undertakings to repatriate individual German subjects from the Soviet Union, and also the connected question of the repatriation of Soviet displaced persons who are still in the Federal Republic."

The West German reply, published on June 10, did not reject the Soviet proposal for the opening of talks on June 15 but made the Federal Government's acceptance conditional on the simultaneous holding of discussions on the repatriation of German civilians still held in the U.S.S.R. The Note maintained that Dr. Adenauer had been given a firm assurance by Marshal Bulganin, during the Moscow talks in 1955, that all German nationals in the Soviet Union who could be traced on the basis of German lists would be repatriated. It pointed out, however, that only 9,600 prisoners-of-war had been returned to Germany, and expressed the Federal Government's conviction—based on its researches and the repatriation applications received—that "many thousands" of German civilians were still held in the U.S.S.R. against their will.

As a result of the *impasse* between the West German and Soviet points of view on the repatriation question, no further proposals were made by either side—up to the beginning of July—for talks on trade, cultural, scientific, and consular matters.

Publication of Suez Correspondence.

The texts were published in London on April 22 of five letters exchanged between Marshal Bulganin and Sir Anthony Eden during September and October, 1956, before the Anglo-French intervention in Egypt. The correspondence was also published in Moscow, together with the text of letters exchanged between Marshal Bulganin and M. Mollet on the same subject. It covered (*a*) letters sent by Marshal Bulganin to Sir Anthony Eden on Sept. 11, Sept. 28, and Oct. 23; (*b*) letters sent by Sir Anthony Eden to the Soviet Prime Minister on Sept. 16 and Oct. 6; (*c*) a letter from Marshal Bulganin to M. Mollet dated Sept. 11; and (*d*) M. Mollet's reply, dated Oct. 10. The correspondence was to a large extent a recapitulation of the respective Anglo-French and Soviet viewpoints on the situation in the Middle East existing at that time.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Aftenposten, Oslo - Berlingske Tidende, Copenhagen - Soviet Embassy Press Office, London) **(Prev. rep. 15517 A; 15371 A.)**

A. BRAZIL.—U.S. Loan for Development of Brasilia.

A loan of $10,000,000 was granted to Brazil by the U.S. Export-Import Bank in May for the development of Brasilia, the new capital of Brazil. The loan will be used for the purchase in the U.S.A. of road-building and house construction machinery, tools, appliances and materials. It will bear interest at 5½ per cent per annum and will be repaid over 15 years.—(Brazilian Government Bulletin) **(Prev. rep. Brasilia, 15437 A; U.S. Loans to Brazil, 15134 A.)**

A. KENYA. — Political, Constitutional and Economic Developments. - Progressive Elimination of Mau Mau Terrorism. - Capture and Execution of Dedan Kimathi.

Recent developments in Kenya are described below under cross-headings :

Legislative Council Elections.

Elections to the Kenya Legislative Council were held from Sept. 25 to Oct. 2, 1956, and in March 1957, the first stage being for the European and Asian seats and the single Arab seat, and the second stage for the African seats.

European Seats. The principal political groups taking part in the European elections were :

(1) The party led by Mr. Michael Blundell, which accepted the "Lyttelton Constitution" and advocated multi-racial government, though not a multi-racial form of society.

(2) The "Independent Group" (composed chiefly of candidates formerly associated with Mr. Blundell in the United Country Party), whose spokesman in the previous Legislative Council had been Group-Captain L. R. Briggs. This group, the formation of which had been announced on June 7, 1956, and which fought the election as a "team" rather than as an organized party, sought a change in the basis of the Lyttelton plan, whereby Ministers would be appointed on account of "merit and ability" rather than on racial grounds.

(3) The Federal Independence Party, led by Major B. P. Roberts, which opposed the Lyttelton plan and advocated a system of separate racial administrations in "white" and "black" areas.

(4) Independent candidates supporting the "Capricorn Africa" programme (see 14971 A).

The elections resulted in the "Independent Group" winning eight of the 14 European seats and Mr. Blundell's party the remaining six. Among the successful candidates were Group-Captain Briggs, who decisively defeated an independent (pro-Lyttelton and Capricorn Society) candidate in the Mount Kenya constituency ; Mr. Blundell, who won a clear victory in the Rift Valley over Major Roberts, the F.I.P. leader ; and Mr. W. Havelock, the pro-Lyttelton Minister of Local Government, who narrowly defeated an anti-Lyttelton candidate at Kiambu. Mr. R. L. Maconochie-Welwood, Minister without portfolio and a member of the War Council, was defeated by a member of the Independent Group, Mrs. E. Hughes, a Nairobi architect.

Asian Seats. The elections for the six Asian seats showed an improvement in the position of the Kenya Indian Congress, two of whose leading members—its current president (Mr. N. S. Mandal) and a past president (Mr. J. M. Nazareth)—were re-elected. Mr. Ibrahim Nathoo, the Minister of Works, retained one of the two seats reserved for Asian Moslems.

The Arab Seat. The sitting Arab member, Sheikh Mafud Mackwai, was re-elected.

African Seats. The African elections in eight constituencies (held in March 1957) were the first ever to be held in the Colony, and resulted in the success of candidates with strong nationalist leanings. Six of the eight former nominated African members of the Council (who had formed a "United Front" to contest the elections) were defeated, the most important being Mr. Ohanga, the first African Minister (see below), Mr. Eliud Mathu, the Kikuyu leader, and Mr. J. Jeremiah, Parliamentary Secretary to the Minister for Health, Housing, and Local Government. In the Nairobi constituency, Mr. Tom Mboya, general secretary of the Kenya Federation of Labour and unofficial leader of the new African members, defeated Mr. C. Argwings-Kodhek, former president of the banned Kenya African National Congress (see 14621 A) and leader of the newly-formed Nairobi District African Congress. There were 37 candidates for the eight seats, the poll averaging 78.5 per cent.

As a result of the elections and the appointment of two "corporate" members under the further constitutional changes (see below), the composition of the Legislative Council was as follows :

	Elected	Corporate	Nominated*	Ex-officio†	Total
European	14	2‡	15‡	7	38
Hindu	3	..	1	..	4
Moslem	3	..	1	..	4
Arab	1	..	1	1	3
African	8	..	2	..	10
Total	29	2	20	8	59

* By the Governor. † Officials, including the Speaker.
‡ Open to all races, but at present European held.

Ministerial Appointments.

Following the election of the European and Asian members of the Legislative Council, six "unofficial" Ministers were sworn in on Oct. 19, 1956, as follows :

Europeans. Mr. Michael Blundell, Agriculture ; Mr. Wilfrid Havelock, Local Government ; Group-Captain L. R. Briggs, Minister without portfolio.

Asians. Mr. Ibrahim Nathoo, Works ; Mr. Chunilal Madan, Minister without portfolio.

Africans. Mr. Benaiah Apolo Ohanga, Community Development and Rehabilitation.

There were only two changes—Group-Captain Briggs succeeding Mr. L. R. Maconochie-Welwood (see above), and Mr. Madan replacing Mr. A. B. Patel, the well-known Indian leader, who was leaving Kenya for India for private studies.

As a result of the elections for the African seats, and in view of the refusal of the newly-elected African members to participate in the Government (see below), it was announced on June 4, 1957, that Mr. C. M. Johnston, a European official, had been appointed "for the time being" as Minister for Community Development and Rehabilitation - the portfolio held by Mr. Ohanga before his defeat in the African elections. Mr. Johnston had been Special Commissioner for the Kikuyu, Embu, and Meru tribes since 1949, and it was announced that he would retain this post in addition to his ministerial duties.

Constitutional Changes.

It was announced in Nairobi on Oct. 19, 1956, that the Colonial Secretary had accepted proposals for constitutional changes which had been agreed upon between the European, African, and Asian unofficial members of the Legislative Council and presented unanimously through the Governor. The changes were as follows :

(1) The number of Ministers drawn from the unofficial members would be increased from six to eight by the addition of one European and one African, the Council thus comprising four Europeans, two Asians (no change), and two Africans.

(2) In the Legislative Council two new African representative members would be added to the Opposition side.

(3) There would be two new unofficial members to be known as "corporate" members who, as representatives of the agricultural and commercial communities, would be selected from lists of names submitted by the Board of Agriculture and the Board of Commerce and Industry respectively.

(4) More seats would be created in the Legislative Council after the African elections of March 1957 in order to correct the numerical disproportion between Government and non-Government members. The number of seats and the method of selection would be decided later, but in any event there would be one additional Arab seat.

(5) To afford immediate representation of Arab interests in the Council of Ministers, the Governor would appoint for this purpose one of the Arab members of the Legislative Council. This Arab representative would be at liberty to attend any meeting of the Council of Ministers "with a status equivalent to that of a Minister."

The first two "corporate" members were appointed on March 11, 1957 : they were the Earl of Portsmouth, a farmer, and Sir Alfred Vincent, chairman of East African Airways.

Dissolution of the United Country Party.

Following agreement between all the European elected members in the Legislative Council that party and group affiliations should be discarded in the interests of unity, the six members belonging to the United Country Party resigned from that party on Nov. 26, 1956. The step was taken with the approval of the party's executive committee, and the party—which had been formed in July 1954 to support the principle of multi-racial government—was subsequently dissolved on Jan. 3, 1957.

Elected African Members' Demands for Increased Representation. - Stricter Control of African Political Meetings. - Statement by European Elected Members.

The eight elected African members issued a statement on March 18 declaring that they regarded the Lyttelton Constitution as null and void, and that none of them would accept a ministerial post. Their main task, they stated, would be to secure constitutional reforms "to give everyone effective and real representation," and they would therefore fight for increased African representation in the Legislative Assembly.

On March 28 a request was accordingly submitted by the African elected members to the Governor, Sir Evelyn Baring, for the immediate creation of 15 additional African seats.

In a statement to the Press, Mr. Tom Mboya said that the request had been made "not primarily to break European domination" but "mainly in consideration of the heavy responsibilities that elected members must shoulder." Since the constituencies were extremely large and the voters mainly illiterate, contact with the electorate had to be on a personal basis, and a greater number of Council members was therefore required.

Although the Chief Secretary of the Kenya Government subsequently rejected the Africans' request, it was nevertheless renewed in a letter to the Governor on April 26, following the announcement that the Asian members supported the African members' position. The letter reiterated that the African members did not recognize the "Lyttelton plan," under which there could be no constitutional changes before 1960 without the agreement of all racial groups.

The British Colonial Secretary, Mr. Lennox-Boyd, stated on May 8 in the House of Commons that while the Kenya Government was ready to do everything possible to facilitate discussions on the African proposal between the different racial groups [as required under the Lyttelton plan], progress depended on the readiness of all groups to enter into such discussions without insisting on prior conditions.

When Mrs Barbara Castle (Lab.) asked whether, owing to the small number of seats allocated to them, the African elected representatives had not an impossible task in trying adequately to represent their constituents, and whether it was true that only Europeans were refusing to take part in such discussions, Mr. Lennox-Boyd replied: "No, most certainly not. I am prepared at any time, as is the Government of Kenya, to consider any proposals put forward if they have the consent of all races. I have noticed with regret the attitude hitherto taken by the African elected members I very much hope that they will see fit to change their minds. I do not share that meagre view of their talents which Mrs. Castle apparently has."

Mr. Lennox-Boyd added: "If the various races got together no one would be more pleased than I, but some of these supplementary questions seem to suggest that it is the Europeans or Asians who are making things difficult. The truth is that the African representative members have said that they were prepared to meet the Governor and his official advisers, but . . . only if the Government first decide that they are under-represented in the Council. What I must insist on is that if there are to be any changes before 1960, they must be agreed between all the races. There would be no stability in Kenya or anywhere else if agreements arrived at were broken; and the agreement arrived at was that there would be no change until 1960 except by agreement."

Following a statement in the Kenya Legislative Council on May 21 by Mr. E. Windley (Minister for African Affairs), who said that the Government would oppose "efforts to lead the African people towards chaos and disorder," the Kenya Government announced on May 22 that there would henceforward be stricter control of African political meetings, including the compulsory tape-recording of speeches. It was explained that this step had been decided upon because of inflammatory speeches which might have led to violence and to tactics reminiscent of the methods of Mau Mau leaders before the emergency. The new arrangements came into operation for the first time at a meeting in Nairobi on May 24 addressed by Mr. Tom Mboya.

The European elected members of the Legislative Council issued the following statement on July 4, 1957, through their chairman, Sir Alfred Vincent:

"Subject to acceptance of certain conditions, and in conjunction with other constitutional changes, the European elected members are prepared to recommend some increase in African representation without a corresponding increase in the number of seats for other racial groups. Any such increase inevitably involves far-reaching modifications in the existing Constitution. It is a basic fact that Kenya is a country in which different races have made their homes, and that Kenya's future lies in close co-operation between such races. We therefore regard it as axiomatic that any new Constitution must include certain fundamental provisions which will ensure:

(i) that no racial group or combination of racial groups can dominate the other groups or group;

(ii) that as any degree of self-government is introduced the Government of Kenya will depend in the Legislature upon a measure of support from all races.

"The constitutional provisions required to effect these principles must be agreed upon and accepted as binding before any further constitutional changes, including any increase in representation, can be effected. It is an essential element of any agreement that there is African participation in the Government and the Council of Ministers. Any constitutional agreement must be regarded as binding for an agreed period long enough to ensure stability, and therefore such agreement must be recorded by each racial group as having been freely entered into. It is imperative, and in the interests of all races, that conditions must exist at all times which will encourage the confidence of investors in industry and agriculture in Kenya. Should any doubt arise oversea as to the stability or responsibility of the Government, it would imperil the whole economic future of the Territory.

"It is noted that the African elected members have decided to send representatives to the U.K. this month to 'explain and interpret to the British public and M.P.s the African case and attitude in the current constitutional crisis, and to explain the political objectives and aspirations of the African'—and also, presumably, to seek advice on constitutional matters. Although we are prepared to negotiate regarding constitutional changes with the other racial groups at any time, we feel that, due to their absence and the absence of a number of leading representatives of other groups, little purpose could be served by any further discussions until their return to Kenya, when we hope discussions will be resumed. This will enable all groups in the interim to give constitutional matters unhurried consideration, which will undoubtedly lead to a better understanding of the problems involved and of the need for practical suggestions for their solution. These, as the Secretary of State and the Government have reaffirmed on numerous occasions, must be agreed in Kenya by all racial groups."

The Anti-Mau Mau Campaign. - Execution of Dedan Kimathi and Other Mau Mau Leaders.

Considerable progress towards the complete elimination of Mau Mau terrorism was made during the period under review, the most important single success being the capture of the movement's leader, "Field-Marshal" Dedan Kimathi, in the Nyeri district on Oct. 21, 1956. Kimathi, who was brought to trial at Nyeri on Nov. 19, pleaded "not guilty" to charges of illegally possessing a revolver and ammunition, and claimed that he had been on his way to surrender when he was captured. After hearing extensive evidence, however, the court found him guilty on both charges on Nov. 27 and sentenced him to death for the illegal possession of a firearm and to seven years' hard labour for the illegal possession of ammunition. Kimathi's appeal was rejected by the East African Court of Appeal on Dec. 27, 1956, and his petition for leave to appeal to the Judicial Committee of the Privy Council was rejected on Feb. 14, 1957. He was hanged at Nairobi on Feb. 18.

Other leading terrorists eliminated during 1956 were Serape Ole Ngare (*alias* "Marshal" Kahoniki), Maraya Macheru (a witch-doctor who took a prominent part in Mau Mau terrorism), and "Generals" Makenji and Kapinda, all of whom were killed as a result of police action during May 1956; "Major-General" Kamwana, who was sentenced to death for illegal possession of firearms and was one of a group of six terrorists executed on June 29; and Muriuki Kimotho (*alias* "General" Tanganyika), who was executed on July 6 after having been sentenced to death a month earlier for the murder of a Kikuyu tribesman.

The continuing success of the security forces in reducing the number of active Mau Mau terrorists was reflected in the growing number of surrenders in 1956, as well as the rapid fall in the number of incidents. While 43 terrorists were killed, 43 captured, and 59 surrendered in May, the total of those killed in July, August, and September fell to 12, 10, and 6 respectively and of those captured to 31, 14, and 14 respectively. Surrenders in these three months totalled 57, 31, and 52 respectively.

Many of the Mau Mau fell to the "pseudo" gangs who operated with ever-increasing success with the security forces and who were responsible *inter alia* for the capture of Dedan Kimathi. [Kimathi, when captured, was wearing a leopard-skin—apparently as a disguise—and was trying to crawl away through the undergrowth when called upon to halt; he ignored the warning and was shot at and wounded.] These "pseudo" gangs, numbering between 300 and 400 and composed mainly of former terrorists, were led by some 30 young Europeans in disguise who were either born in Kenya as sons of British settlers or civil servants, or belonged to the Kenya Regiment and the Kenya Police Reserve, some of them being also former intelligence officers. It was stated in *The Times* on July 6, 1956, that there had been not a single casualty amongst the "pseudo" gangs, nor had any of its Kikuyu members betrayed the trust placed in them.

In a review of the situation at the opening session of the new Legislative Council on Nov. 13, 1956, Sir Evelyn Baring stated that only 200 - 300 terrorists were still active. Whereas 18 months previously 51 major gang-leaders had been at liberty, only two were still at large, the better-known being Stanley Mathenge, formerly second-in-command to Kimathi. As a result of this reduction of the terrorist threat, it had been decided, following a recommendation by Lt.-General Sir Gerald Lathbury (C.-in-C., East Africa) that the police should take over control of anti-terrorist operations from the Army. The War Council, however, would continue to function and the Army would stand by in support of the police.

Sir Evelyn Baring gave a warning that if the remaining terrorists were not pursued as actively as in the past, they were perfectly capable of reviving the Mau Mau activities He continued: "Our troubles with the active Mau Mau will be at an end only when we have shown we can keep the peace, not only in conditions as they now are, but in the future when all but the worst of the detainees and Mau Mau convicts now in custody have been released." Much progress had been made in the problem of absorbing detainees back into the normal life of the country, and many thousands who had gone back to their districts had given very little trouble. The return of Kikuyu labour to farms had proceeded smoothly, and the Government hoped to absorb an increasing number of Kikuyu in forest villages.

Whereas 18 months earlier there were 50,000 Mau Mau detainees and 16,000 convicts, the figures had been reduced to 24,000 and 8,400 respectively. The Government's policy stood on two affirmations · first, each detainee must have his chance to work his way back to normal life; secondly, irreconcilables would not return. No Mau Mau detainee or convict could be allowed back unless his behaviour and the condition of the area to which he was returning gave sound reasons for believing that he would not again become a menace to peace and order. "The Kenya Government," he added, "regard no man as lost, and the most assiduous efforts are being and will be made to reclaim him for society."

After outlining a plan for an agricultural settlement on the Tana River for those who could only be made good citizens again over a period of years, the Governor announced that the Mau Mau experience had prompted the Government "to review the powers on which in normal times of peace it has to rely to preserve peace." It intended to introduce at the right time legislation designed to reinforce its authority in any period of increasing tension and disturbance not amounting to a full-scale emergency.

Further figures concerning the rehabilitation and release of Mau Mau detainees were issued in Nairobi on Feb. 20, 1957. It was stated that to date 40,000 detainees in all had been released, that only 30 of these had had to be rearrested for resumption of Mau Mau activities, and that the 30,000 who remained in detention were being released at the rate of 1,700 a month.

The Minister for Internal Security, Mr. John Cusack, announced on March 6, 1957, that Mageta Island, the detention camp in Lake Victoria for "hard core" terrorists, was being cleared of its 2,400 prisoners as part of "the Government's general policy of getting prisoners into the 'pipeline' that leads to rehabilitation."

Relaxation of Emergency Measures.

With the gradual elimination of the Mau Mau movement, the Government continued to relinquish during the period under review some of the powers it had assumed as a result of the emergency.

It was announced on Dec. 21, 1956, that "in view of the continued improvement in the emergency situation" some of the restrictions on public meetings would be relaxed, as follows: (i) licences would ordinarily be granted for public meetings to be held in halls or other suitable buildings for a legitimate purpose; (ii) owing to the difficulty of exercising control over large assemblies, however, open-air meetings would not be permitted except in remote areas where there were no suitable buildings and where attendance out-of-doors was not likely to reach unmanageable proportions; (iii) the relaying of proceedings or speeches from buildings to overflow audiences outside would also not be permitted; (iv) except in the Central Province, members of the Kikuyu, Embu and Meru tribes would be permitted to attend public meetings, political or otherwise, but only those who had obtained loyalty certificates would be allowed to make speeches: (v) in the Central Province (where stricter control than elsewhere was still essential owing to the return of large numbers of released Mau Mau detainees), attendance at Kikuyu, Embu and Meru political meetings would no longer be restricted to registered voters but would be open to all who had been granted loyalty certificates; (vi) at all other meetings the attendance of persons who had not obtained loyalty certificates would be permitted "where necessary to the legitimate purposes of such meetings."

[It was commented in the Press that the Government's decision was obviously connected with the forthcoming African elections and the impossibility of denying candidates the opportunity of addressing registered voters.]

In a further announcement on Jan. 7, 1957, it was stated that a comprehensive review of the emergency legislation had been carried out with a view to deciding what relaxations could be introduced in the light of the continuing improvement in the security situation. It had accordingly been decided, as a first stage in the process, (i) to revoke the penal provisions for sabotage and the regulations prohibiting the possession of more than one firearm and the possession of incendiary material; (ii) to lift the restrictions on travel affecting Nairobi and certain parts of the Central Province; (iii) to cancel some of the controls imposed on Kikuyu, Embu, and Meru domestic servants; and (iv) to reduce considerably the number of special areas and emergency zones.

As a result of a further "marked improvement" in the situation, the Government announced on April 1, 1957, that the three remaining capital offences under the emergency regulations would in future be punishable by life imprisonment. The offences in question were: (i) the unlawful possession of firearms; (ii) consorting with an unlawfully armed person; and (iii) administering, or being present at and consenting to the administration of, a Mau Mau oath.

Development of African Tribal Lands.

It was announced on Jan. 13, 1957, that the Kenya Government had created a new body—the African Industrial Estates Development Committee—to carry out a plan to develop African tribal lands for industrial, commercial, and ancillary purposes. The Committee would be under the chairmanship of the Minister of Commerce and Industry (Mr. Arthur Hope-Jones), and its 10 members would include three Africans, of whom two would be members of the Native Lands Trust Board (a body of trustees responsible for the integrity of African lands).

It was stated that the new Committee would approve details of selected development schemes, would supervise them, and would also determine priorities for development and approve estimates and expenditure. At the same time the Government created a fund of £25,000 to aid the development of industries in African areas, it being announced that the first development site would be at Karatina, in the Kikuyu Reserve. Expenditure from the fund in preparing sites for development would be recovered from those holding grants for such land.

The measure represented the third major change in the traditional background of African tribal life—the first two being the grouping of villages and the consolidation of fragmentary land holdings into economical agricultural units; and the introduction of the primogeniture system of inheritance, instead of the customary division of holdings among all sons on the death of the father.

Three-year Development Plan.

Following his return from financial talks in London, the Minister for Finance, Mr. Vasey, announced in the Legislative Council on March 26, 1957, that the Kenya Government proposed to put into operation a social and economic development plan covering the period 1957-60 and involving capital expenditure of £23,000,000. Details of the plan were published on the same date.

The statement said that as the full development of Kenya would have required an investment of about £180,000,000 a figure unattainable in view of the world monetary position the Government had been obliged to undertake "a careful sifting of schemes in the light of their relative importance and the Government's assessment of priorities." Accordingly, they had reduced their investment programme until 1960 to one of about £23,000,000.

The main allocations under the plan would be as follows:- agriculture £9,065,000 (including £5,736,000 for the development of African farming under the Swynnerton plan [see 13722 A]); education £2,000,000 (including £100,000 on African education and £64,000 on a new technical institute for Nairobi); roads £2,000,000; security and defence £1,500,000; African housing £1,600,000; Government housing £600,000; additional contribution to the plan for a new Nairobi airport at Embakasi £588,000; broadcasting £300,000; community development £126,000. The programme would be financed as follows: loans raised either in London or East Africa £18,000,000; Colonial Development funds £2,000,000; Colony revenue £1,000,000; other local sources £1,000,000. It was anticipated that the gap of £1,000,000 would be closed by savings arising from the falling costs of the anti-terrorist campaign.

Extension of Governor's Term.

It was announced in Nairobi on March 24 that Sir Evelyn Baring, who had been Governor of Kenya throughout the Mau Mau emergency, would remain in office until March 1959. Although due to retire in September 1957, he had agreed to serve for a further 18 months and the Queen had approved the extension.- (Times - Daily Telegraph - Manchester Guardian)

A. AUSTRALIA. — Civil Aviation. - Round-the-World Service by Qantas Empire Airways.

It was announced in Canberra on June 26 that the Australian Federal Government had approved an agreement with the U.S.A. granting Qantas Empire Airways the right to fly across North America, thereby enabling it to operate a regular service round the world.

Hitherto the South Pacific service of Qantas had carried passengers and freight only as far as San Francisco and Vancouver, while its service to London (run in conjunction with British Overseas Airways) had passed through South-East Asia and the Middle East. Under the new agreement Qantas will be able to carry passengers from the U.S. Pacific coast to New York and thence to London or any other European city where Australia has, or may obtain, landing rights.

In return for the right to fly across America, Australia allowed U.S. airlines to fly to Australia by way of Antarctica, and thence across Australia to South Africa and South-East Asia.

Senator Paltridge (the Federal Minister of Civil Aviation) said that the new route would ensure the maximum commercial exploitation of the fleet of *Boeing* jet airliners which would come into service with Qantas in 1959. An order for seven *Boeing 707s* worth nearly £A19,000,000 had been placed by Qantas Empire Airways in 1956.

A plan to form a holding company to control all Australian airlines, which had been submitted by Australian National Airways, was rejected by the Federal Cabinet on June 25. It was proposed that the shares of all airline companies should be bought by the holding company and that each company should preserve its identity and receive an allotment of shares in the holding company, proportionate to its investment. Senator Paltridge explained that the Government had considered the proposal to be impracticable because at least one major airline had refused to be a party to it. Moreover, the Government believed that the proposal would inevitably result in a monopoly and would not achieve the "virile competition" which had been responsible for the present high standards of efficiency and safety in Australian air transport.

B. PHILIPPINES. — Communist Party outlawed.

The Philippine Senate passed a Bill on May 22 outlawing the Communist Party, and prescribing the death penalty for party organizers and leaders and imprisonment for party members who carried on the party's activities. The Bill had previously been passed by the House of Representatives.

(New York Herald Tribune) **(Prev. rep. 13886 A; 13675 B.)**

A. PETROLEUM. — Ending of Petrol and Oil Rationing in Western Europe.

The ending of petrol rationing in Britain was announced on May 14 by Lord Mills (Minister of Power) in the House of Lords, and by Mr. Maudling (the Paymaster-General) in the House of Commons.

Lord Mills said that petrol stocks in the country were at a satisfactory level, and that the Government had decided that petrol rationing could be ended immediately now that interim arrangements had been made for a resumption of traffic through the Suez Canal He had therefore made an Order giving effect to this decision as from midnight on May 14.

The ending of the 10 per cent restriction on fuel oil supplies for industrial use and non-industrial heating, which continued beyond May 15, was announced by the Ministry of Power on May 31. A 10 per cent cut had first been imposed on Nov. 7; supplies for heating oil were further reduced to 75 per cent of normal consumption in December, but were increased again to 90 per cent on April 1.

In addition to the ending of the additional emergency petrol duty of 1s. a gallon which the Chancellor of the Exchequer announced in his Budget speech (see 15481 A), the price of petrol was reduced by the oil companies by 1d. a gallon as from April 12 and by another 1d. as from May 2, the reductions being due to the improvement in the supply position and the corresponding reduction in distribution costs. A further reduction of ½d. a gallon was made from July 3.

The reopening of the Suez Canal, and the improvement in oil supplies to Europe as a result of the emergency measures authorized in the U.S.A., made possible the lifting of all petrol and oil consumption restrictions in the other European countries affected by the closing of the Canal.

In the Irish Republic petrol rationing was abolished as from April 12, while Switzerland ended all restrictions on fuel consumption from the same date. In Austria petrol rationing ended on April 13; in Norway fuel oil and petrol rationing ended on April 16; and in Portugal restrictions such as the closing of petrol pumps on Sundays and the ban on motor-racing were lifted on April 21. In Denmark the rationing of fuel oil was abolished on March 18, and that of gas and diesel oil subsequently.

In France, petrol rationing continued longer than in the other countries because of the maintenance of the French boycott of the Suez Canal, as well as the strained foreign exchange position. Rationing was ended only on June 28, following the decision of the new Government of M. Bourgès-Maunoury to end the boycott of the Canal (see 15608 B) and the parliamentary adoption on June 27 of a number of financial measures to meet the stringent economic situation; these measures included an increase in the petrol tax by 13.40 francs per litre, raising the retail price in Paris from 76.60 francs to 90 francs, with corresponding tax and retail price increases for premium petrol. The increase, equivalent to 1s. 3d. a gallon, made the price of petrol in France 8s. 6d. a gallon, the highest in Europe.

The O.E.E.C. had announced on May 2 that the special machinery which had co-ordinated the efforts of member-Governments and oil companies to meet the petrol crisis would be discontinued. A statement issued after the final meeting of the Organization's Petroleum Emergency Group (O.P.E.G.) on that date stated that the requirements of member-countries could be satisfactorily met by a return to the normal commercial operations of the international oil companies; that European oil stocks were at the levels of last November; and that the forseeable supplies for the April-June period would be sufficient to meet the estimated demand and to provide a reasonable margin.

The special "schedules" under which the U.S. oil companies had co-ordinated the movements of their tankers to ensure the most efficient handling of oil supplies for Europe were suspended by the U.S. Government on April 19 in view of the great improvement in the supply position. It was announced, however, that the Middle East Emergency Committee, which had been responsible for the direction of the oil "lift," would continue to review the supply position in Western Europe and would report any substantial change in the situation so that the schedules could be reintroduced if necessary. U.S. oil shipments to Europe had reached their peak in the week ended March 13, when the daily total averaged 582,000 barrels, or 200,000 barrels more than in the previous week.

Figures published on April 25 by the Petroleum Information Bureau in London showed that, despite rationing and restrictions due to the Suez emergency, Britain had used nearly 2,000,000 tons more petroleum products in 1956 than in 1955—an increase of 8.5 per cent. Total consumption in 1956 was 25,223,049 tons, against 23,287,144 tons in 1955, the largest percentage increase being in fuel oil.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Le Monde, Paris - Irish Times, Dublin - Berlingske Tidende, Copenhagen - Norwegian Embassy Press Office, London - New York Times)

(Prev. rep. 15386 A; 15545 A.)

B. UNITED KINGDOM. — Group Mergers in Electrical, Engineering, and Rayon Industries.

Particulars are given below of a number of mergers between important groups of firms in the electrical manufacturing, aircraft and engineering, and rayon industries, announced in recent months.

Siemens-Edison Swan. It was announced on June 14 that two of the oldest electrical manufacturing companies in Britain—Siemens Brothers and Company and the Edison Swan Electric Company, both members of the Associated Electrical Industries Group—had amalgamated to form a new company within the Group, to be known as Siemens Edison Swan Ltd. The new company will have 21,000 employees and undertake virtually the whole of the light electrical engineering side of the Group's work, manufacturing products ranging from telephone exchanges to cathode-ray tubes.

Hawker Siddeley-Brush. Details were announced on May 18 of an offer made by the Hawker Siddeley Group of companies (aircraft manufacturers, with extensive Canadian interests) to shareholders in the Brush Electrical Engineering Co. Ltd. and its subsidiaries (makers of turbo-generators, transformers, electric motors, vehicles and trucks, and bus and coach bodies). The offer, which was subject to acceptance by at least 90 per cent of Brush shareholders, provided for the acquisition by Hawker Siddeley of the whole of the issued capital of the Brush Group, in exchange for shares in the Hawker Siddeley Group. On June 7 it was announced that the offer had been accepted by 94 per cent of Brush shareholders.

Courtaulds-British Celanese. On April 12 it had been announced that the directors of Courtaulds Ltd. and British Celanese Ltd. had reached agreement in principle on the merging of the two companies on the basis of the acquisition by Courtaulds of the entire issued capital (£15,328,000) of British Celanese in exchange for shares in Courtaulds and £1,000,000 in cash. It was explained that the directors of the two companies believed that the proposed merger should enable them to improve their position in the export markets, "having regard particularly to the problems and opportunities which are certain to arise if the proposals for the European Common Market and Free Trade area are implemented." It was announced on June 4 that holders of over 90 per cent of British Celanese capital had accepted Courtaulds' offer for their stock—1 e more than the percentage of acceptances on which the offer had been made conditional.

The issued capital of Courtaulds Ltd.—described as "the undisputed giant of the British textile industry"—was given in the Press as about £56,000,000 and the estimated value of the company's assets as £128,600,000. The assets of British Celanese Ltd., which has important plastics and chemical interests, were valued at £32,000,000.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

C. AFGHANISTAN - PAKISTAN. — Mr. Suhrawardy's Visit to Kabul. - Discussions with Afghan Prime Minister. - Resumption of Full Diplomatic Relations.

Mr. Suhrawardy, the Prime Minister of Pakistan, visited Kabul from June 8-11 as the guest of the Afghan Government. During his stay he had conversations with the Afghan Prime Minister, Prince Sardar Mohammed Daud Khan, as a result of which it was agreed to restore full diplomatic relations between the two countries as a step towards the settlement of their differences.

A joint communiqué issued on June 10 stated that the talks had been held "in an atmosphere of warmth and cordiality and in accordance with the spirit of Islamic solidarity and brotherhood which animates the Governments and peoples of both countries." It continued:

"The two Prime Ministers surveyed the international situation and appreciated each other's point of view with regard to the respective policies of their Governments. They agreed that both Governments should co-operate in the United Nations and other international organizations, in accordance with the Charter, and in particular should strive to secure independence and freedom for those areas which are still under the domination and control of foreign Powers.

"The two Prime Ministers confirmed the contents of the joint communiqué agreed upon in Karachi in December 1956 [see 15279 A] and agreed that efforts should be continued to bring the peoples of the two countries together in the economic and cultural fields. They agreed to take steps to resolve their differences through friendly negotiations and to consolidate the basis which already exists for permanent friendship. To fulfil this objective they have agreed to accredit Ambassadors to each other with immediate effect."

In conclusion it was announced that the King of Afghanistan had accepted an invitation to visit Pakistan in December 1957.

The Afghan Minister in Karachi and the Pakistani Ambassador in Kabul had been recalled in October 1955 as a result of the tension between the two countries following the inclusion of the Pathan areas of the former North-West Frontier Province in the new Province of West Pakistan.

(Pakistan High Commissioner's Office, London)

(Prev. rep. 15279 A; 14481 B.)

A. INDONESIA. — Appointment of National Advisory Council. - Abolition of East Indonesian Military Command. - Army Measures against Corruption.

The Indonesian Cabinet unanimously approved on June 15, after lengthy discussions, a draft list of members of the proposed National Advisory Council submitted by President Sukarno. In addition to the President himself, who will act as chairman, and Mr. Abdulgani (the former Foreign Minister), who was nominated as vice-chairman and general secretary, the Advisory Council consisted of 43 members.

The first group of these included a Deputy Premier, the Chiefs of Staff of the Army, Navy, and Air Force, the Attorney-General, the Chief of Police, three representatives of Sumatra, and two each for Java, Borneo, the Celebes, the Lesser Sunda Islands, the Moluccas, and "West Irian" (Dutch New Guinea). The remaining 22 members represented various sections of society—the Moslem, Christian, and Hindu communities, women, youth, labour, farmers, intellectuals, artists, the Press, "former independence fighters," national enterprises, and citizens of foreign extraction. Three of the members subsequently nominated declined to serve on the Council: Professor Johan (president of the University of Indonesia), because he had not been consulted about his appointment; Mrs. Diah (a Press representative) for personal reasons; and Mr. Abadiah (one of the Sumatran representatives), on the ground that he did not wish to serve until relations between the Government and Central Sumatra were restored to normal.

The political parties most strongly represented on the Council were the Nationalists, with six members, and the Communists, with four. The Moslem *Masjumi* party, which had denounced the Council as unconstitutional, was not represented. Replying to *Masjumi* criticisms in Parliament, the Prime Minister (Dr. Djuanda) said on June 3 that the Council had only been created pending the drafting of a new Constitution by the Constituent Assembly, and that its advice would not be binding on the Cabinet, which would continue to be responsible to Parliament.

In a speech on June 9 President Sukarno denied allegations that he wished Indonesia to copy the governmental systems of the Soviet Union and China, and said that Indonesia should copy from other countries only those things which would be beneficial to her people. Whereas the governmental systems of the U.S.A., the Soviet Union, and China were suitable for those countries, the Indonesian system must be in accordance with the national character of the Indonesian people.

Abolition of East Indonesian Military Command.

Dr. Djuanda visited East Indonesia from May 14-16 for discussions with Lieut.-Colonel Sumual, Commander of the Seventh Military District, who had issued a proclamation on March 2 demanding autonomy for East Indonesia and setting up a military council to take over the administration of the area (see 15421 A). The Prime Minister stated on May 16 that mutual understanding had been reached between the local military leadership and the Central Government, and claimed that the recent events in East Indonesia had not been a manifestation of separatist tendencies.

Army headquarters announced on May 28 that Colonel Sumual and Colonel Sudirman (head of the South Celebes Operational Command) would be transferred to other posts; that the two Commands would be reunited and placed under the direct control of the Chief of Staff, General Nasution; and that East Indonesia would be divided into four military districts—South Celebes, North Celebes, the Moluccas, and the Lesser Sunda Islands. On relinquishing his command on June 8, Colonel Sumual emphasized in an Order of the Day that these changes did not imply rejection of the demands put forward in his proclamation of March 2. He was transferred to Jakarta and appointed chairman of the committee responsible for administrative arrangements in connexion with the formation of the new military districts.

Army Measures against Corruption.

General Nasution announced on March 27 that he would make use of his powers under martial law regulations to take strong measures against persons suspected of corruption. A decree of May 27 authorized the military authorities to investigate and confiscate any private property suspected of having been obtained "suddenly and in a questionable manner," and provided for a maximum penalty of five years' imprisonment for refusal to answer truthfully questions about such property.—(Indonesian Embassy Press Office, London - Times) **(Prev. rep. 15421 A; 15514 A.)**

B. UNITED STATES. — Civil Defence Administrator.

It was announced in Washington on June 14 that President Eisenhower had appointed Mr. Leo A. Hoegh as head of the Federal Civil Defence Administration in succession to Mr. Val Peterson, who had been nominated Ambassador to Denmark. Mr. Hoegh, a Republican, was Governor of Iowa from 1954-56, losing the governorship to Mr. Loveless (Democrat) in the elections of November last. He had been Attorney-General of Iowa in 1953-54.—(New York Times) **(Prev. rep. 13025 F.)**

C. CAMBODIA. — Partial Restoration of Irrigation System of Khmer Empire. - U.S. Technical Aid.

Details were released during May of a scheme for the partial rebuilding of the irrigation system of the ancient Khmer Empire with the aim of restoring productivity to some 37,000 acres of barren land. The project is being carried out by the Cambodian Government in co-operation with U.S. engineers and technicians.

The reservoirs and irrigation system of the ancient Khmer Empire were built about 900 A.D. and were lost and forgotten for many centuries until their rediscovery in 1860, when a French explorer found the temples and palaces of Angkor, overgrown by vines and trees, deep in the Cambodian jungle. The intricate network of reservoirs, canals, artificial lakes and waterways showed evidence of a high degree of civilization in ancient Cambodia and of great engineering skill in the forgotten Khmer Empire. American engineers who examined the remains of the ancient irrigation system in 1954 were so impressed that they decided that modern techniques could provide few improvements.

The main sections of the irrigation system at the time of its construction in 900 A.D. were two huge reservoirs surrounded by 25-ft. clay embankments, each reservoir being five miles long and three miles wide and capable of impounding 1,766 million cubic feet of water. The system also included a diversionary canal so that water could flow round the great palaces and temples of Angkor, together with tributary canals, dykes, and minor dams. All were furnished with water diverted by a major dam on the Siemreap River - the same source as will be used in the restoration.

The project provides for the rehabilitation of one of the two large reservoirs, the dimensions and capacity of which will remain the same as in ancient times. The Khmer canal system will be excavated and strengthened with cement at stress points, but the overall project, when completed, will very largely duplicate the original. The cost of the project will be shared between Cambodia and the United States, which will provide equipment and technical advice.—(New York Times)

D. GHANA. — Lord Listowel appointed Governor-General. - Retirement of Sir Charles Arden-Clarke.

The appointment of the Earl of Listowel as Governor-General of Ghana in succession to Sir Charles Arden-Clarke, retiring, was announced from Buckingham Palace on June 23. Lord Listowel (50) has been a prominent member of the Labour Party for many years and held a number of offices in the post-war Labour Government. He is the elder brother of Mr. John Hare, Secretary of State for War.

Lord Listowel, who succeeded to the earldom in 1931, was a Labour whip in the House of Lords from 1941-44 (becoming Chief Whip in 1942) and first held office in the wartime Coalition Government as Parliamentary Under-Secretary of State at the India Office (1944). When the Labour Party came to power in 1945 he became Postmaster-General, and was subsequently the last Secretary of State for India (April to August 1947) and Burma (until January 1948), relinquishing these posts when India and Pakistan became Dominions in 1947 and when Burma became independent in 1948. He was subsequently Minister of State for Colonial Affairs (1948-50) and Joint Parliamentary Secretary to the Ministry of Agriculture and Fisheries (1950-51), and had been deputy leader of the House of Lords since January 1948. Educated at Eton and Cambridge, he served for a time as a private in the R.A.M.C. during the Second World War and was later commissioned in the Intelligence Corps, returning to politics in 1942 after being rejected for overseas service. He has been a Labour member of the London County Council for twenty years.

Lord Listowel's appointment was made on the recommendation of Her Majesty's Ministers in Ghana.
(Times - Manchester Guardian) **(Prev. rep. 15427 A.)**

E. UNITED KINGDOM - UNITED STATES. — Modification of U.S. Loan Agreement.

A White Paper was published in London on June 6 announcing a minor modification in the agreement on the repayment of the 1947 U.S. loan to Britain—viz., the provision whereby the U.S. Government could take up to $50,000,000 (£17,840,000) of U.K. repayments in sterling was extended indefinitely, instead of being subject to a time-limit as hitherto. It was explained that this would be a convenience to the U.S. Government in meeting payments for which sterling was required, and would also slightly ease the strain on the U.K.'s gold and dollar reserves.—(Daily Telegraph) **(Prev. rep. 15440 A.)**

F. POLAND. — Resumption of F.A.O. Membership.

It was announced in Warsaw and Rome during June that Poland had informed the U.N. Food and Agriculture Organization that she wished to cancel her withdrawal (which had been notified in 1948) and to resume active co-operation with F.A.O., of which she was one of the founder-members.
(Polish Embassy Press Department, London)

JULY 6—13, 1957

A. BRITISH COMMONWEALTH. — London Conference of Commonwealth Prime Ministers.

The conference of Commonwealth Prime Ministers was held in London from June 26 to July 5 under the chairmanship of Mr. Harold Macmillan, the meetings taking place at 10, Downing Street. Canada was represented by Mr. John G. Diefenbaker, the new Prime Minister; Australia by Mr. Robert G. Menzies, Prime Minister; New Zealand by Mr. T. L. Macdonald, Minister for External Affairs, representing the Prime Minister (Mr. Holland), who was unable to travel to London for health reasons; South Africa by Mr. Eric Louw, Minister for External Affairs, representing the Prime Minister, Mr. Strydom; India by Mr. Jawaharlal Nehru, Prime Minister; Pakistan by Mr. Suhrawardy, Prime Minister; Ceylon by Senator M. W. H. de Silva, Minister of Justice, representing the Prime Minister, Mr. Bandaranaike; Ghana by Dr. Kwame Nkrumah, Prime Minister; and the Federation of Rhodesia and Nyasaland by Sir Roy Welensky, Prime Minister.

In addition to Mr. Macmillan, British Ministers taking part in the conference included Mr. Selwyn Lloyd (Foreign Secretary), Mr. Thorneycroft (Chancellor of the Exchequer), Sir David Eccles (President of the Board of Trade), Mr. Duncan Sandys (Defence Minister), Lord Home (Secretary of State for Commonwealth Relations) and Mr. Lennox-Boyd (Colonial Secretary). The Australian delegation included Mr. Holt (Minister of Labour and National Service) and Sir Philip McBride (Defence Minister). Mr. Nehru was accompanied by Mr. Krishna Menon, the Indian Defence Minister; Mr. Suhrawardy by Mr. Firoz Khan Noon, the Pakistani Foreign Minister; and Dr. Nkrumah by Mr. Botsio, the Ghanian Minister of Trade.

The subjects discussed by the Commonwealth Prime Ministers were listed in the following communiqué (cross-headings inserted) issued at the conclusion of the conference:

Ghana's Entry into Commonwealth. "This was the first Commonwealth meeting at which Ghana was represented, following her attainment of independence in March 1957. Other Commonwealth Ministers welcomed Ghana's participation in the meeting as a full member of the Commonwealth, and took note of this occasion as further practical evidence of the progress made by the U.K. Government in the pursuit of their policy of fostering constitutional development in their dependent territories.

The Commonwealth Association. "The Commonwealth Ministers reviewed all the major international questions of the day which are of common concern to their countries. In this association of free and independent nations it is inevitable that there should be some differences of viewpoint and opinion. But these meetings reveal a broad similarity of approach and purpose. It is not their function, nor is it the object of this communiqué, to record agreed decisions or formal resolutions. Their value lies in the opportunity which they afford for a full and candid exchange of views, in the light of which each Commonwealth Government can formulate and pursue its separate policies with deeper knowledge and understanding of the views and interests of its fellow members.

"The primary objective of all Commonwealth Governments is world peace and security. They believe that this objective can only be assured by increased co-operation between nations. They themselves accept the principle and practice of co-operation: it is the foundation of their own association: they will continue to work for its wider adoption.

The United Nations. "The U.N was designed to provide one of the main opportunities for the practical exercise of the principle of co-operation between nations. Experience has, however, revealed certain deficiencies and weaknesses in the functioning of the organization. The Commonwealth Ministers agreed that constructive action is needed to strengthen and improve the U.N. as an instrument for preserving peace, justice, and co-operation throughout the world in accordance with the principles of the Charter.

Hungary. "In the discussion of developments since their last meeting, the Commonwealth Ministers expressed their grave concern at the tragic events in Hungary. They took note that the forthcoming consideration by the General Assembly of the report presented by its special committee [see 15621 A] will provide the occasion for the U.N. to record its views.

Disarmament. "The Commonwealth Ministers reviewed the course of developments in the current discussions on disarmament. They noted that proposals relating to a first stage of disarmament were put forward on July 2 in the Disarmament Sub-committee on behalf of the U.S.A., the U.K., Canada, and France. They recognized that even a limited agreement, by reducing the suspicions and tensions throughout the world, would help to create conditions in which a more comprehensive scheme of disarmament could be developed.

The Middle East. "The Commonwealth Ministers discussed the international problems of the Middle East. They agreed that, in the long term, economic and social progress must be the foundation for stability in the Middle East. They agreed, however, that in the short term the need is to work towards a relaxation of the tension arising from the dispute between the Arab States and Israel, the plight of the Arab refugees, and the unresolved problems in connexion with the Suez Canal. They considered that solutions of all these urgent questions should continue to be pursued by all practicable means.

Far East and South-East Asia. "Consideration was also given to the contribution which might be made by the Commonwealth Governments concerned towards the easing of tension and the maintenance of peace, stability, and political freedom in the Far East and South-East Asia. Commonwealth Ministers welcomed the important contribution already made by mutual assistance under the Colombo Plan towards raising standards of living and promoting economic development in the under-developed countries of this area.

Economic Development of the Commonwealth. "In their general review of economic questions the Commonwealth Ministers gave special attention to the impact of the major programmes of development on which many of their countries are engaged. These programmes call for high levels of domestic saving which can only be secured by sound internal policies. But they also call for conditions favourable to investment from other countries. The United Kingdom will continue to play its leading role in furthering economic development in the countries of the Commonwealth, and important contributions are also being made by other Commonwealth members. But, in view of the continued need for capital investment, it is also important to encourage investment from other sources on suitable conditions.

Commonwealth Discussions on European Free Trade Area. "The Commonwealth Ministers noted the progress made since their last meeting towards the freeing of trade and payments. In this context they discussed the proposals for the creation of an industrial Free Trade area in Europe as a complement to the European Economic Community to be set up under the Treaty of Rome. They agreed that, as part of the continuous exchange of views between Commonwealth Governments on these matters, particular aspects of the proposals which might specially affect certain countries of the Commonwealth should be examined in London next week by officials of all Commonwealth countries in the light of the Ministers' discussions.

Meeting of Commonwealth Finance Ministers. "The Commonwealth Ministers noted that the annual meeting of the International Monetary Fund and the International Bank will be held in Washington in September. The normal practice is for this meeting to be followed by a meeting of Commonwealth Finance Ministers. The Prime Minister of Canada extended an invitation that this meeting of Finance Ministers should be held this year in Ottawa.

The Commonwealth Economic Committee. "The Commonwealth Ministers recognized the value of the work carried out over the past 30 years by the Commonwealth Economic Committee. They agreed that the committee should be invited to examine and suggest to Governments what expansion of its scope and functions might usefully be undertaken for the particular purpose of drawing attention to the economic resources of Commonwealth countries.

Peaceful Uses of Nuclear Energy. "The Commonwealth Ministers reviewed the progress of co-operation within the Commonwealth in the use of nuclear energy for civil purposes. They recognized the growing importance of the contribution which nuclear energy can make to the peaceful development of their countries and of the rest of the world, and the value of close collaboration between members of the Commonwealth in this field. For this purpose nuclear scientists from Commonwealth countries will be invited to an informal meeting in the United Kingdom in 1958.

Malayan Independence within Commonwealth. "The Commonwealth Ministers noted that the Federation of Malaya was on the eve of attaining independence. They extended to the Federation their warm good wishes for its future, and looked forward to being able to welcome an independent Malaya as a member of the Commonwealth on the completion of the necessary constitutional processes."

During the Commonwealth conference Mr. Selwyn Lloyd reviewed the current negotiations in the U.N. Disarmament Sub-committee, as mentioned in the communiqué; Mr. Thorneycroft and Sir David Eccles dealt with economic problems of the sterling area, investment in Commonwealth development, and the implications for the Commonwealth of the projected European Common Market and Free Trade Area; and Mr. Lennox-Boyd gave a survey of constitutional developments in Malaya, Singapore, Nigeria, and the West Indies, and also spoke of the British Government's policy in Cyprus. Mr. Duncan Sandys and the U.K. Chiefs of Staff were present at a closed session on defence, which was not attended by India and Ceylon but at which all other Commonwealth countries were represented, including Ghana.

Economic questions figured largely in the discussions—in particular the question of capital investment in Commonwealth development, in which connexion Mr. Thorneycroft gave a review of the United Kingdom's economic and financial position. Mr. Diefenbaker laid special emphasis on this matter in statements issued in London and after his return to Ottawa (see below), while it was understood that Mr. Nehru, Mr. Suhrawardy and Dr. Nkrumah had stressed the importance of capital investment for the successful fulfilment of the Second Indian Five-Year Plan, the Pakistani irrigation projects, and the Volta River scheme respectively.

In a speech on July 1 (Dominion Day) to the Canada Club in London, Mr. Diefenbaker spoke of the desirability of an early Commonwealth trade and economic conference to explore the field of trade and capital investment within the Commonwealth. He suggested also that the Commonwealth Prime

Ministers might from time to time meet in other Commonwealth capitals besides London, though London would always remain the most suitable place and would continue to be the venue of most of these conferences.

At a press conference in Ottawa on July 7, after his return from London, Mr. Diefenbaker said that the Commonwealth Finance Ministers would consider plans for a Commonwealth trade and economic conference at their Ottawa meeting in September [see communiqué] He added that the Canadian Government would submit to the other Commonwealth Governments an outline plan for the expansion of trade and the stimulation of investment within the Commonwealth Canada herself had as a "planned objective" the diversion of 15 per cent of her present imports from the U S.A to imports from the United Kingdom—a diversion which would make "a substantial difference to trade with the Mother Country without actually hurting trade with the United States." Mr Diefenbaker said that Canada would regard British participation in a European Common Market "with a benevolent eye" provided that agricultural products were excluded from the project; if they were not, it would be difficult for Canada and other Commonwealth countries with agricultural surpluses to give full approval to U.K participation in a European Free Trade Area.

[The Ottawa Correspondent of *The Times* commented: "Mr. Diefenbaker is obviously concerned with the increasing imbalance of [Canada's] trade with the Americans and the falling-off of exports to other countries, particularly the United Kingdom. In the first quarter of this year purchases from the U S.A. rose to $1,031 million. Shipments to the U.K. were down to some $214 million. Fifteen per cent of Canadian imports from the U.S.A. last year would mean $625 million for the British market."]

Both before and during the conference, Mr. Macmillan had private meetings at Downing Street with the leaders of all the delegations. It was announced by the Pakistani delegation on June 28 that a special meeting between U.K. and Pakistani Ministers, "convened at the instance of Mr. Macmillan," had been held to discuss the questions of "Kashmir and the canal waters" [i.e. the Indo-Pakistani dispute on the Indus waters], at which Pakistan had been represented by Mr. Suhrawardy, Mr. Firoz Khan Noon and Mr. Ikramullah (High Commissioner in London) and the United Kingdom by Mr. Macmillan, Mr. Selwyn Lloyd and Lord Home.

The Commonwealth Prime Ministers and the other leaders of Commonwealth delegations were given a dinner party by the Queen and the Duke of Edinburgh at Windsor Castle, and were also entertained at Chequers by the Prime Minister and Lady Dorothy Macmillan. A sound and television broadcast on the Commonwealth conference was given by Mr. Macmillan on July 7.

After pointing out that the ten Commonwealth countries represented had a total population of 655,000,000 people of many races, religions, cultures, languages, and traditions, Mr. Macmillan said that the Prime Ministers had not come to London "to make set speeches and pass a long list of resolutions" but to exchange ideas and "talk together as a family." He continued: "As you and I know well, family meetings can be lively, frank, friendly, vigorous, and not always unanimous. This was just such a meeting. We agreed on some things, disagreed on others—as you would expect. What warmed my heart was that there was such a large measure of agreement, good will, and friendly understanding. This is because, with such a variety of tradition, race, religion, and history, we all respect the same ideals —individual rights, freedom, democratic government, and international justice. In this spirit we exchanged ideas on all the great questions of our day. . . .

"We each expressed our own point of view; we each heard the point of view of others. As a result each of our countries can develop its own policies on these matters—as is its right—with a full knowledge of what all its Commonwealth partners are thinking. We know each other's minds. Make no mistake, this very fact enables the Commonwealth to do two things: to be a great force for good within its own membership, and to make its influence felt in the world. . . .

"One by one, countries under our guardianship take up the responsibility of full nationhood and join us as equal partners. This year, Ghana. Soon, Malaya. Surely we are entitled to take a little credit for all this. Such a thing has never happened before in history, and it is not happening everywhere in the world to-day. I said 'partners,' not satellites. . . .

"We in Britain have friendly and co-operative relations with many countries. We have a special relationship with the countries of Europe, which we hope to strengthen and extend. But on one thing we are all agreed—if there should at any time be a conflict between the calls upon us, there is no doubt where we stand. The Commonwealth comes first in our hearts and minds."

It was announced during the conference that Mr. Macmillan had accepted an invitation from Mr. Holland, conveyed by Mr. Macdonald, to visit New Zealand at a date to be fixed. It was understood that the Prime Minister would also visit Australia.
(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Commonwealth Conference (1956), 14961 A.)

A. UNITED KINGDOM. — Civic Trust for Encouragement of Good Architecture and Civic Planning.

The formation of a body for the encouragement of good architecture and civic planning, under the name of the Civic Trust, was announced on July 5 by Mr. Duncan Sandys (Minister of Defence), its initiator in a private capacity. The Civic Trust had its origin in a speech made two years earlier by Mr. Sandys (then Minister of Housing and Local Government) to the Royal Institute of British Architects, in which he called for a combined effort "to uphold and create beauty and declare war on ugliness." Mr. Sandys had appealed to all who had a part in shaping public opinion to give a positive lead by using their influence "to awaken the civic sense in every sphere"; in particular, he had urged industry to assume its full obligations in this matter.

To stimulate a keener interest in all aspects of town and country planning, including the avoidance of unsightly development, the Civic Trust will (*a*) commission expert reports on architectural and town planning questions, and convene meetings to discuss them; (*b*) arrange conferences in selected towns to discuss local planning problems; (*c*) provide films suitable for showing at meetings of interested bodies and in schools; (*d*) co-operate in preparing material for television programmes; (*e*) organize travelling exhibitions; and (*f*) contribute toward the costs of appropriate activities of existing societies.

Mr. Sandys, acting in a private capacity, will be president of the Civic Trust, the other trustees being the Archbishop of Canterbury; Sir Herbert Manzoni, vice-president, Institution of Civil Engineers; Mr. Herbert Morrison, M.P.; Sir George Nelson, chairman, English Electric Co. Ltd.; Lord Justice Pearce; Sir Howard Robertson, past president, R.I.B.A.; Sir Edward Spears, chairman, Institute of Directors; and Mr. C. M. Vignoles, managing director, Shell-Mex and B.P. Ltd.

In addition, the Civic Trust have secured the co-operation as patrons of the Lord Mayors of London, Belfast, and Cardiff, the Lord Provost of Edinburgh, the President of the Royal Academy, and the leaders of the five voluntary associations chiefly interested in the field of visual amenities—the Central Council of Civic Societies, the Society for the Protection of Ancient Buildings, the Council for the Preservation of Rural England, the Town and Country Planning Association, and the Georgian Group.

The Trust will not seek to arbitrate on questions of architectural taste or technical matters, but will look for expert advice to an advisory committee consisting of the president (Mr. Sandys) and three members of each of the following professional bodies: the Royal Institute of British Architects, the Royal Institution of Chartered Surveyors, the Institution of Civil Engineers, the Institution of Municipal Engineers, the Society of Town Clerks, and the Town Planning Institute.

The Civic Trust has already been assured of an income of about £40,000 a year on seven-year covenants by industry. Only a small number of leading industrial companies have been approached so far, and further substantial contributions are expected.—(Times - Daily Telegraph - Manchester Guardian)

B. PAKISTAN. — Navy. - Acquisition of Cruiser and Destroyers from Britain.

The former British cruiser *Diadem*, which had been purchased by Pakistan in 1956 and had been undergoing refit and modernization at Portsmouth, was handed over to the Pakistani Navy on July 5 by the First Lord of the Admiralty, the Earl of Selkirk. The cruiser was renamed *Babur* after the founder and first emperor of the Mogul dynasty in the early 16th century. H.M.S. *Diadem*, launched in 1942, has a displacement of 5,770 tons and a speed of 32 knots. Her main armament consists of eight 5.25-inch guns.

The former "Battle" class destroyers H.M.S. *Gabbard* and H.M.S. *Cadiz*, which had also been bought by Pakistan, were formally handed over to the Pakistani Government on Jan. 24 and Feb. 1 and renamed P.N.S. *Badr* and P.N.S. *Khaibar* respectively. Both vessels were completed in 1946 and have a displacement of 2,315 tons and a speed of 35.75 knots.
(Pakistan High Commissioner's Office, London) **(11425 C.)**

C. UNITED STATES. — Ford Foundation Grant to Poland for Cultural Exchanges with the West.

A grant of $500,000 to finance an exchange of scholars, writers and other academic workers between Poland and the United States and Western Europe was announced by the Ford Foundation on April 26—the first direct grant by the Foundation for an "Iron Curtain" country. The president of the Foundation (Mr. Henry T. Heald) said that the money would be given to "Polish universities and academies and to American and European institutions."—(New York Herald Tribune)
(Prev. rep. 15606 D.)

A. SOVIET UNION. — MM. Molotov, Malenkov and Kaganovich expelled from Presidium, Central Committee and Soviet Government. - M. Shepilov relieved of Party Posts. - Central Committee's Accusations against "Anti-Party Group." - Enlargement of Communist Party Presidium. - MM. Pervukhin and Saburov relieved of Deputy Premierships. - M. Khrushchev's Attack on the "Anti-Party Group."

It was officially announced in Moscow on July 3 that the Central Committee of the Soviet Communist Party, after a number of plenary meetings from June 22-29, had decided (1) to expel M. Molotov, M. Malenkov and M. Kaganovich from the party's Presidium and Central Committee; and (2) to expel M. Shepilov from the post of secretary of the Central Committee and from candidate membership of the Presidium.

The charges against Molotov, Malenkov, Kaganovich and Shepilov were set out in a lengthy statement issued by the party's Central Committee. Specifically, Molotov, Malenkov and Kaganovich were accused of setting up an "anti-party group" within the Presidium and Central Committee; of "persistent opposition" to the resolutions of the 20th Party Congress and to the party's new industrial and agricultural policies; and of "stubborn opposition" to the party's measures aimed at "liquidating the consequences of the cult of personality and eliminating the violations of revolutionary legality which occurred in the past." M. Molotov was also accused of "persistent opposition" to the Soviet Government's foreign policy and of hampering and obstructing the policy of "peaceful co-existence," while M. Shepilov was accused of joining the "anti-party group."

The statement issued by the Central Committee "on the anti-party group of G. M. Malenkov, L. M. Kaganovich and V. M. Molotov" is summarized below:

The statement said that MM. Molotov, Malenkov and Kaganovich had adopted an "anti-party line" and "attempted to change the composition of the party's leading bodies" at a time when "the Central Committee, supported by the people as a whole, is doing enormous work to put into effect the historic decisions of the 20th Party Congress designed to develop the national economy and raise the standard of living of the Soviet people, to re-establish Leninist norms in party life, to do away with violations of revolutionary legality, to promote Soviet Socialist democracy, to consolidate friendship among the Soviet peoples, to pursue a correct national policy, and in the sphere of foreign policy to relax international tensions in order to secure a lasting peace. . . ."

Continuing, the statement said that "during the last three or four years, during which the party has been steering a resolute course toward rectifying the errors and shortcomings born of the personality cult . . . the members of the anti-party group now exposed have been offering constant opposition, direct and indirect, to the course approved by the 20th Party Congress." Specifically, the group had opposed "the Leninist policy of peaceful co-existence between States with different social systems," the extension of the rights of the Union Republics in the fields of economic and cultural development, and the implementation of the "Leninist principle of democratic centralism" within the party. Moreover, it had "persistently opposed and sought to frustrate" the new measures for the reorganization of industry and the setting-up of regional economic councils [see 15575 A], even after the legislation implementing these measures had been approved by the Supreme Soviet.

The anti-party group was also accused of objecting to "the abolition of the former bureaucratic system of planning on the collective farms" and of opposing the projected measures for abolishing compulsory deliveries of farm produce by collective farmers from their individual holdings (see below). Furthermore, it had "carried on an unwarranted struggle against the party's appeal, vigorously supported by the collective farms, regions, and Republics, to overtake the United States in the next few years in output of milk, butter and meat," and had "thereby demonstrated an overbearing attitude to the vital interests of the people and a lack of faith in the enormous potentialities of the Socialist economy in the nation-wide movement for a speedy increase in milk and meat production which is now in progress." M. Molotov, in particular, had exhibited "a conservative and narrow-minded attitude" to these matters.

After accusing M. Molotov, M. Malenkov and M. Kaganovich of "putting up a stubborn resistance to the measures which the Central Committee and the whole party are carrying out to abolish the consequences of the personality cult, eliminate the violations of revolutionary legality that had been committed, and provide such conditions as would preclude their recurrence," the statement attacked M Molotov for "narrow-mindedness" in the field of foreign policy and for "hampering in every way the implementation of measures intended to ease international tension and promote universal peace." M. Molotov was specifically accused of having opposed an improvement of relations between the U.S.S.R. and Yugoslavia; of taking "an erroneous stand on the Yugoslav issue"; of raising obstacles to the conclusion of the State Treaty with Austria; of having opposed the normalization of relations with Japan; and of opposing "the fundamental proposition, worked out by the party, on the possibility of preventing wars, of different roads to Socialism in different countries, and of the necessity for strengthening contacts between the Communist Party of the U.S.S.R. and progressive parties abroad" Moreover, he had "repeatedly opposed the indispensable new steps taken by the Soviet Government in defence of peace and the security of nations," and, in particular, had "denied the advisability of establishing personal contacts between Soviet leaders and the statesmen of other countries, which is essential for achieving mutual understanding and better international relations." On many of these matters "Comrade Molotov's opinion was supported by Comrade Kaganovich and in a number of cases by Comrade Malenkov"

The statement continued: "The Presidium and the Central Committee as a whole patiently corrected them [the "anti-party group"], hoping that they would draw the proper lessons from their errors, would not persist in them, and would fall into step with the party's leading bodies. Nevertheless, they maintained their erroneous, anti-Leninist attitude . . . Comrades Malenkov, Kaganovich and Molotov were, and still are, shackled by old ideas and methods. They have drifted away from the life of the party and the country, failed to recognize the new conditions, maintain a conservative attitude, and stubbornly cling to obsolete forms and methods. . . . Both in internal problems and in matters of foreign policy they are sectarian and dogmatic and exhibit a pedantic, inert approach to Marxism-Leninism. . . . Seeing that their erroneous statements and actions were constantly rebuffed in the Presidium, which has consistently been putting into practice the line set by the 20th Party Congress, Comrades Molotov, Malenkov and Kaganovich embarked on a group struggle against the party leadership. Entering into collusion, and resorting to methods of intrigue against the Central Committee, they set out to change the party's policy and drag the party back to the erroneous methods of leadership condemned by the 20th Party Congress."

In conclusion, the statement said that "the facts revealed at the plenary meetings of the Central Committee show that Comrades Malenkov, Kaganovich and Molotov, as well as Comrade Shepilov, who joined them, have embarked on the path of fractional struggle, violating the party statutes and the decisions of the 10th Party Congress on party unity drafted by Lenin. . . . This [Lenin's] resolution makes it obligatory for the Central Committee and all party organizations to consolidate party unity, rebuff with determination every symptom of fractional or group activity, and ensure that the party's work is carried out by joint effort . . ."

After noting with "great satisfaction" the "monolithic unity and solidarity of all the members and alternate members of the Central Committee," the statement said that the "anti-party group," faced with the "unanimous condemnation" of its activities by the plenary meetings of the Central Committee, had "admitted the existence of collusion and the harmful nature of their anti-party activities and committed themselves to complying with the party position." The Central Committee, "guided by the interests of all-round consolidation of the Leninist unity of the party," had accordingly resolved:

(1) "To condemn as incompatible with the Leninist principles of our party the fractional activities of the anti-party group of Malenkov, Kaganovich, and Molotov, and of Shepilov who joined them.

(2) "To exclude Comrades Malenkov, Kaganovich, and Molotov from membership of the Presidium of the Central Committee and from the Central Committee; and to remove Comrade Shepilov from the post of secretary to the Central Committee and exclude him from alternate membership of the Presidium and from membership of the Central Committee."

The statement added that the above-mentioned decisions had been adopted by the unanimous vote of all the members and alternate members of the Central Committee, "with one abstention in the person of Comrade Molotov."

M. Molotov (67) had been Foreign Minister of the U.S.S.R. for many years before his appointment in November last as Minister of State Control (see 15220 C). M. Malenkov (55) became Prime Minister of the U.S.S.R. on Stalin's death, and was appointed Minister of Electric Power Stations when Marshal Bulganin took over the Premiership in February 1956. M. Kaganovich (64), a brother-in-law of Stalin, held ministerial positions for many years and played an important part in organizing manpower and developing Soviet transport M. Shepilov (52), formerly Editor-in-Chief of *Pravda*, succeeded M. Molotov as Foreign Minister in June 1956 but held the post for only eight months before it was taken over by M. Gromyko (see 15385 B).

New Presidium.

It was announced on the same day (July 3) that the Presidium of the Central Committee had been increased from 11 members to 15, the new membership being as follows (in alphabetical order): A. B. Aristov, N. I. Byelayev, L. I. Brezhnev, Marshal Bulganin, Mme. Ekaterina Furtseva, N. G. Ignatov, Nikita Khrushchev, A. I. Kirichenko, A. L. Kozlov, Otto Kuusinen, Anastas Mikoyan, N. M. Shvernik, M. A. Suslov, Marshal Voroshilov, and Marshal Zhukov.

Only six members of the former Presidium remained in the new Presidium—Marshal Voroshilov, Marshal Bulganin, M. Khrushchev, M. Mikoyan, M. Kirichenko, and M. Suslov. The nine new members were M. Aristov, M. Byelayev, M. Brezhnev, Mme. Furtseva, M. Ignatov, M. Kozlov, M. Kuusinen, M. Shvernik, and Marshal Zhukov, the Minister of Defence. Five members of the old Presidium were

dropped—M. Molotov, M. Malenkov, M. Kaganovich, M. Pervukhin, and M. Saburov. Of the two latter, M. Pervukhin was reduced to candidate membership (see below) and M. Saburov was dropped entirely.

Of the new members of the Presidium, six were promoted from candidate membership to full membership (Marshal Zhukov, Mme. Furtseva, and MM. Aristov, Brezhnev, Byelayev and Shvernik) and three were completely new to the Presidium – M. Ignatov, M. Kozlov and M. Kuusinen. Madame Furtseva (52), secretary of the Moscow Communist Party, became the first woman to hold full membership of the Presidium. M Shvernik was removed from the office of Soviet President after Stalin's death and had since resumed his former post of chairman of the Council of Trade Unions; MM Ignatov and Kozlov are party secretaries for the Gorki and Leningrad districts respectively; and M. Kuusinen is the former Finnish Communist leader.

The number of alternate (candidate) members of the Presidium was increased from seven to nine, as follows: N. A. Mukhitdinov, P. N. Pospelov, D. S. Korotchenko, J. E. Kalnberzin, A. P. Kirilenko, A. N. Kosygin, K. T. Mazurov, V. P. Mzhavanadze and M. G. Pervukhin. They included representatives of several of the Union Republics (the R.S.F.S.R., Ukraine, Georgia, Uzbekistan, etc.).

The Presidium of the Central Committee is, in effect, the executive and policy-making body of the Communist Party of the U.S.S.R.; it is assisted by a secretariat in which M. Khrushchev holds the key post of First Secretary. The candidate members attend meetings of the Presidium but do not vote, a right which is possessed only by the full members.

MM. Molotov, Malenkov, Kaganovich, Pervukhin and Saburov deprived of Deputy Premierships. - MM. Molotov and Malenkov relieved of Ministerial Functions.

It was further announced by Moscow Radio on July 4 and 5 that:

(1) M. Molotov, M. Malenkov, M. Kaganovich, M. Pervukhin and M. Saburov had ceased to be Deputy Premiers in the Soviet Government;

(2) M. Molotov had been relieved of his post as Minister of State Control, and M. Malenkov of the post of Minister of Electric Power Stations;

(3) M. Kosygin (a candidate member of the Presidium) had been appointed a Deputy Premier;

(4) M. Alexei Pavlenko would succeed M. Malenkov as Minister of Electric Power Stations;

(5) A decree would come into force on Jan. 1, 1958, abolishing compulsory deliveries of farm produce to the State from individual holdings of members of collective farms. [The Central Committee's statement on the "anti-party group" had accused M. Molotov, M. Malenkov and M. Kaganovich of opposing this decree—see above.]

As stated above, M. Pervukhin had previously been "demoted" from full to candidate membership of the Presidium, and M. Saburov dropped from that body entirely. Though deprived of his Deputy Premiership, M. Pervukhin remained Minister of Medium Machine-building (see 15575 A).

As a result of the above-mentioned dismissals, only two of the six First Deputy Premiers retained that status—M. Mikoyan and M. Kuzmin, chairman of the State Planning Commission (*Gosplan*). M. Kosygin, promoted to a Deputy Premiership, is First Vice-Chairman of *Gosplan*, while M. Pavlenko returned to the post he held while M. Malenkov was Prime Minister.

M. Khrushchev's Attack on "Anti-Party Group."

M. Khrushchev reiterated the charges against the "anti-party group" in a speech in Leningrad on July 6, on the occasion of the 250th anniversary of the city's foundation by Peter the Great. He accused M. Molotov, M. Malenkov and M. Kaganovich—"and Molotov in particular"—of "obstructing the measures for easing international tension and promoting world peace" and of preferring "the policy of 'tightening the screw,' which runs counter to the wise Leninist policy of peaceful co-existence between the socialist and capitalist systems." M. Khrushchev also denounced M. Shepilov, "who joined the group and proved to be the most shameless double-dealing individual." In the course of his speech he accused M. Malenkov of being "one of the chief organizers of the so-called Leningrad case" and said that he (Malenkov) was "simply afraid of coming here to you in Leningrad."

[The "Leningrad case" involved the execution of a number of leading members of the Soviet Communist Party in 1949—Voznessensky, Kuznetzov, Popkov and others, all of whom were rehabilitated after Stalin's death. The case was subsequently said to have been fabricated by Beria and Abakumov (onetime head of the Ministry of State Security), both of whom were executed after the death of Stalin. Details of the "Leningrad case" were given by M. Khrushchev in his speech to the 20th Party Congress—see page 14995.]

The Soviet press and radio stated that the resolutions of the Central Committee had been approved at mass meetings in factories, collective farms, and municipalities throughout the Soviet Union, and also among the armed forces.

Many references were made to the "monolithic unity" of the party, combined with bitter attacks on the "anti-party group" in which connexion *Pravda* said that a "wave of popular wrath" was sweeping the country at the actions of Molotov, Malenkov, Kaganovich and Shepilov. Moscow Radio stated that Marshal Zhukov had given a detailed account of the activities of the "anti-party group" to marshals and generals of the Soviet Army, and declared that the Central Committee's decisions had the Army's full support. It was also stated that factories, institutions, towns and collective farms named after members of the "anti-party group" had petitioned to have their names changed e.g. the town of Molotov, in the Urals, had asked that its former name of Perm should be restored. It was officially denied, however, that any members of the "anti-party group" were under house arrest.

Messages of support for the decisions of the Central Committee were received from the Chinese Communist Party and from the Communist parties of Eastern Europe, including those of Albania, Bulgaria, Czechoslovakia, Hungary, Rumania, and Eastern Germany.

The Moscow correspondent of the Warsaw newspaper *Trybuna Ludu* (organ of the Polish Communist Party) gave details on July 9 of a "plot" to oust M. Khrushchev alleged to have been organized by M. Molotov, M. Malenkov and M. Kaganovich. It was stated that the object of the alleged plot was to make M. Molotov First Secretary of the party and to replace Marshal Bulganin in the Premiership by M. Malenkov; this would have been followed by other party and governmental changes.

It was stated that MM. Molotov, Malenkov and Kaganovich all of whom were said to have opposed M. Khrushchev's plans for Soviet industrial and administrative reorganization - had made a sudden demand for M. Khrushchev's resignation at a meeting of the Presidium in the Kremlin on June 19 to discuss the celebrations of the 250th anniversary of Leningrad. M. Molotov had called upon the Presidium to make an immediate decision and announce the changes on the radio and in the Press before the Leningrad anniversary celebrations, while M. Malenkov, who was said to have convened the meeting, was reported to have given whole-hearted support to M. Molotov's demand. M. Khrushchev, with Marshal Bulganin in the chair, had apparently succeeded in avoiding immediate action being taken, and the Presidium had decided to refer the issue to the Central Committee. At the plenary sessions of the Central Committee the "anti-party group" had found itself isolated and had been exposed.

Moscow Radio, in an English-language broadcast, announced on July 10 that M. Malenkov had been appointed manager of the Ust-Kamenogorsk hydro-electric power station in Kazakhstan, one of the largest in the Soviet Union. [The power station is situated in eastern Kazakhstan, about 2,000 miles from Moscow.] The broadcast said that the Soviet Communist Party was "not in the habit of taking petty revenge" and that there was no question of any "repressive measures" being taken against any member of the "anti-party group."
(Soviet Embassy Press Department, London - Times - Manchester Guardian - Observer - Le Monde, Paris) **(Prev. rep. M. Khrushchev, 15575 A; Presidium and Central Committee Membership, 14745 A.)**

A. UNITED KINGDOM. — Merger of Chartered and Incorporated Accountants.

It was announced on June 19 that a resolution approving the integration of the Society of Incorporated Accountants with the Institutes of Chartered Accountants in England and Wales, Scotland, and Ireland had been adopted, at an extraordinary general meeting of the Society in London, by 872 votes to 111.

The integration schemes proposed (1) that members of the Incorporated Society who had had experience with accountants practising in the British Isles (i.e. about 80 per cent of S.I.A. members) should become members of the appropriate Institute of Chartered Accountants, with full membership rights; (2) that those members of the Society (numbering 2,065, or about 20 per cent) who had qualified after experience with a local authority or similar body, or after training overseas, should become members of the Institute of Chartered Accountants in England and Wales, but be required to retain the title "Incorporated Accountant."

On March 27 the Institute of Chartered Accountants in England and Wales had announced that a postal referendum of its members had shown 10,242 votes in favour of a merger with the S.I.A. and 4,340 against, the required majority of over two-thirds of those voting having thus been obtained. The merger was also subsequently approved by the Scottish and Irish Institutes. (Times - Manchester Guardian)

B. GHANA. — Membership of I.C.A.O.

It was announced on June 7 that Ghana had become the 71st member of the International Civil Aviation Organization. (I.C.A.O., Montreal) **(Prev. rep. 15289 B.)**

A. AUSTRALIA. — Large Trade Surplus in 1956-57. - Relaxation of Import Restrictions.

It was announced in Canberra on July 4 that Australian exports in the year ended June 30 had totalled £A994,900,000 and imports £A768,900,000, giving a surplus of £A276,000,000. This result, achieved through record exports coupled with import restrictions, made 1956-57 the second best trade year on record. It compared with deficits of £A39,200,000 in 1955-56 and £A46,800,000 in 1954-55.

Sir Arthur Fadden (Treasurer and Acting Prime Minister) stated on the same day that, thanks to the measures taken in 1956 to check imports and the fall in foreign exchange reserves, imports had been about £A100,000,000 below the level for the two preceding years, which was roughly what the Government had hoped for.

In view of the improved balance-of-payments situation, the Australian Government had earlier (April 1) announced relaxations of import restrictions, with a view to raising the ceiling for imports for the financial year 1957-58 to £A775,000,000 f.o.b. and permitting £A75,000,000 of additional imports.

Announcing this decision, Mr. Menzies (the Prime Minister) stated that export income in the financial year 1956-57 was likely to be considerably in excess of £A900,000,000; that the trade surplus was expected to exceed £A200,000,000; and that the international reserves were expected to increase by £A150,000,000, bringing the total of these reserves to over £A500,000,000 by June 30. The increased export earnings, he explained, were not due solely to increased prices but had been materially aided by an increase in the volume of wool and other exports, including the products of secondary industry.

Mr. Menzies continued: "The Government still aims to get rid of import restrictions altogether. This result will, however, depend on the achievement of a number of conditions, including a still further increase in the volume of exports, favourable terms of trade, strong overseas reserves, and sound internal policies, with the restraints on total demand for goods and services which such policies require. These conditions are by no means impossible; in fact, we have made good progress towards achieving them."

Emphasizing the importance of international reserves as a means of tiding over periods of low external receipts, Mr. Menzies said: "Australia is a country whose external income can fluctuate very widely since it depends primarily upon a few commodities, the prices of which are determined by conditions outside Australia. Reserves of £A500,000,000 may, in the light of our more recent exports, seem very substantial, but that amount cannot be regarded as adequate. Under any or all circumstances, we want to see substantial further additions to our reserves for succeeding years if that can be managed. Our aim is to keep imports at a reasonably high level in order to meet the working requirements of the Australian economy and the domestic needs of the public. In this connexion, it is perhaps not widely known that the bulk of imports into Australia represent raw materials or equipment for Australian industry; but, while imports should be high, we must also guard against the risk of having to cut imports back again at some later stage. The results of such an action would be damaging to industry and trade and would do us great harm in the eyes of countries abroad who export to us.

"These considerations lead to the conclusion that while import relaxations should, in our present circumstances, be substantial, they should be calculated with prudence and with an eye to the future. This is what we have tried to do. Imports of £A775,000,000 a year will actually cost us more like £A890,000,000 a year when inward freight has been added. On top of this, there is a bill to meet for net outgoings on account of remittances, travel expenditure, interest on overseas debt, and the like. Our total payments overseas will, when the new relaxations begin to show their effect, be close enough to £A1,000,000,000 a year."

Discussing the import relaxations, Mr. Menzies declared: "Our object has been to maintain a fair balance between the main sources of trade and industry, between finished import goods on the one hand and producers' materials and capital equipment on the other. We have been very conscious of the interest of many good customer-countries in these relaxations, and particularly in consumer goods. We have also aimed to remove from the import licensing system features which were introduced in the period when licensing had to be particularly severe but which trade and industry have found to be onerous. Full interchangeability will be restored within the 'B' category of consumer goods, and provision is being made for the adjustment of some anomalies within the field covered by quota items. It is anticipated that there will be fewer hardships under the new ceiling than there were under the old."

The Trade Minister (Mr. McEwen), amplifying the Prime Minister's statement, said that the relaxations would come into force immediately and would be spread over a wide range of commodities. Details were given as follows:

Category A. Quotas for consumer-type goods would be substantially increased. As, however, they were already generally higher than those for Category B, the increased quota in practically all cases would be 20 per cent, resulting in an anticipated annual increase of £A10,000,000 in imports. About £A30,000,000—spread over Category A and the Administrative Category—would be allocated to increased imports of equipment and raw materials for Australian industry, to enable it to achieve more economic production.

Among the more important imports in Category A which would be increased by 20 per cent were fully assembled motor-vehicles, motor-cycles, coffee, cigarettes, whisky, canned and preserved fish, carpets, linoleum, typewriters, cash registers, crockery, medical preparations, parts for motor-vehicles, hand-tools, sewing machines, canvas, washing machines, refrigerators, electric fans, electric razors, safety razor-blades, alarm clocks, vacuum flasks, stoves, rubber and latex, maps, fountain-pens, cameras, sporting rifles and cartridges, cotton waste, undressed furs, and antiques.

Imports in Category A increased by 10 per cent included replacement parts for various types of machinery, sheeting, aluminium alloy, petrol, kerosene, optical glass, precision optical instruments, ophthalmic instruments and appliances, scientific instruments and appliances, leather, and natural fibres except jute or flax. Bicycle components and accessories were increased by 12½ per cent. There was a 50 per cent increase for cotton yarn and single fine ply yarns, and a 40 per cent increase for floor and wall tiles.

Category B. All quotas in this category would be increased by 66⅔ per cent, the present value of the goods affected (chiefly consumer goods) accounting for £A20,000,000 of the total relaxations. Significant imports in this category would include cotton, woollen, and artificial silk textiles, apparel, gloves, cutlery, electrical appliances, glassware, aluminium ware, furniture, plastic articles, sporting goods, toys, pens and pencils, and jewellery.

Administrative Category. The £A30,000,000 increase in imports of equipment and raw materials would also affect allocations for some goods in the administrative category. Imports from non-dollar areas which would be licensed on an administrative basis (i.e. on the merits of each application) would include capital equipment such as textile, printing, and mining machinery, electrical equipment, plastics, synthetic fibres, yarns, and rock phosphate. Imports from dollar areas to be similarly treated would include capital equipment, special types of iron and steel, and industrial chemicals.

Other Changes. Mr. McEwen stated that provision had also been made to deal with licensing problems which could not be satisfactorily solved by a general increase in quotas, and that discussions would be held with representatives of trade bodies to examine the possibility of removing anomalies.

It was pointed out in the Press that one of the principal factors affecting Australia's export income had been the increase in exchange earnings from wool, which by March 1, 1957, had already reached £A280,000,000, or some 50 per cent more than in the corresponding period of 1955-56.—(Australian News and Information Bureau - Times - Financial Times) **(14952 A.)**

B. TURKEY. — Krupp Organization to assist in Turkish Industrial Development.

Herr Alfred Krupp von Bohlen, owner of the Krupp industrial organization in Western Germany, visited Turkey from May 14-29, having discussions in Ankara with the Turkish Prime Minister (Mr. Adnan Menderes) and the Minister of Public Works and acting Foreign Minister (Mr. Ethem Menderes) and inspecting a large number of industrial centres.

Two agreements were signed by the Krupp Organization during Herr Krupp's visit: (*a*) for the construction of a third steel furnace at the Karabuk iron and steel works, which would raise the capacity of the plant to 750,000 tons; and (*b*) an agreement with the Turkish State Railways for the supply of shunting equipment, rolling-mill products, passenger and freight cars, cranes and derricks, and harbour equipment. Deliveries under the latter agreement will be completed in four years and will be paid for by Turkish exports to Western Germany, thus involving no foreign exchange payments by Turkey.

Details of further plans worked out as a result of Herr Krupp's visit concerning future co-operation between Krupp's and Turkish firms were given in June by the head of Krupp's trade department, Baron von Maltzahn. He stated that Krupp's intended to make large-scale investments in Turkey; that a group of experts had been sent to that country to study problems involved in the working of Turkish lignite deposits, for which excavators, machinery, and other installations would be supplied on a long-term credit basis; that a group of geological experts had been sent to study the rich wolfram deposits at Uludag, where it was planned to open wolfram mines jointly with the Turkish *Etibank*; and that Krupp's were also studying a project for building a bridge across the Bosphorus at Istanbul.

(Turkish Embassy Press Department, London)

C. JORDAN. — Departure of British Forces.

The last British troops in Jordan—about 250 men of the Middlesex Regt., the 10th Hussars, and No. 187 Light Anti-Aircraft Battery—sailed from Akaba for Aden on July 6 in the troopship *Devonshire*, thereby completing the evacuation of British forces ten weeks before the time-limit set in the agreement of March 13 which terminated the Anglo-Jordanian treaty. The R.A.F. base at Mafrak, near the Syrian border, had been handed over to the Jordanian authorities on May 31.

A. KOREA.—Supply of Modern Arms to U.N. Forces. - U.N. Command accuses Communists of Breaches of Armistice Terms. - Chinese and North Korean Protests.

It was announced in Washington on June 21 that the U.N. Command in Korea had informed the Military Armistice Commission that it had decided to replace outmoded weapons of the U.N. forces in Korea by modern equipment, in view of "flagrant, repeated and wilful" violations of the 1953 armistice agreement by the Communists. While thus, in effect, denouncing the clause in the agreement which forbade arming the forces in Korea with weapons other than those being used at the time of the armistice, the U.N. Command emphasized that it intended to continue to observe the cease-fire and the other provisions of the armistice agreement.

The following statement was issued by the U.S. Defence Department on July 21:

"The U.N. Command advised the Military Armistice Commission in Korea today that the U.N. Command considers that it is entitled to be relieved of obligations under Sub-paragraph 13D of the Korean Armistice Agreement, which limits the replacement on a piece-for-piece basis of worn-out or destroyed military equipment to items of the same effectiveness and type, after the date of the armistice (July 27, 1953).

"The action which the U.N. Command is taking is necessitated by the flagrant and long-continued disregard by the Communist side of its obligations under [the above-mentioned paragraph of] the Armistice Agreement. At the time the Agreement was signed, all Communist operational aircraft were based north of the Yalu and, indeed, all North Korean airfields had been bombed-out and rendered non-operational. Since the signing of the armistice, the Communist side has not reported the introduction of a single combat aircraft into Korea, yet it is clear beyond dispute that they now have hundreds of the most modern jet types of combat aircraft based in North Korea. This conclusion is supported by all types of intelligence information, including the evidence of radar trackings and the testimony of defectors, as well as long-range photographs.

"In addition, the Communists have built up and modernized, in violation of their undertakings under the Armistice Agreement, their strength in armoured vehicles, weapons and artillery, and ammunition, with the result that they have enormously increased the potential of the military forces on the North side of the armistice line."

The following statement was made to the North Korean representatives on the Military Armistice Commission at Panmunjom by General Homer L. Litzenberg, the senior U.N. member of the Commission:

"Almost four years have elapsed since the signing of the Armistice Agreement. . . . The signatories agreed to be bound by a mutual application of the terms of the agreement. With complete disregard for your obligations under sub-paragraph 13D of the Armistice Agreement, your side has continued to violate the provisions of that paragraph in the following particulars:

(1) You have introduced combat equipment of the types referred to in sub-paragraph 13D in contravention of the provisions allowing only piece-for-piece replacement of equipment worn out and destroyed after the date of the Armistice.

(2) You have also introduced combat equipment and weapons of entirely different types and capabilities from any you had in Korea at the time of the Armistice.

(3) You have failed to report introductions of such equipment.

(4) You have introduced such equipment at ports of entry other than those specified in the Armistice Agreement.

"The U.N. Command has again and again protested at these violations by your side and has attempted in vain to secure compliance with the provisions of the Armistice Agreement. All procedures established by the Agreement for the settlement of disputes have been exhausted by the U.N. Command.

"The U.N. Command intends to maintain the Armistice Agreement. However, the flagrant, repeated and wilful violations of that Agreement by your side undermine the very provisions which were specifically designed to assure the stability of the armistice. A cardinal purpose of these provisions was to ensure the freezing of the military *status quo* by maintaining the relative military balance existing on July 27, 1953.

"Your side, by its repeated violations of the Armistice Agreement, has seriously upset the relative military balance by modernizing and building-up military capability in the area vastly superior to that which you had at the time the Agreement was signed. On the other hand, the U.N. Command has not increased its combat equipment and is still equipped with the same type of weapons it had when the armistice was signed.

"As a result of the long period of time since the armistice went into effect, the equipment and weapons of the U.N. Command have become obsolete and outmoded, and those needing replacement cannot be replaced from stocks on hand or currently in production. This situation aggravates the imbalance created by your breach of Sub-paragraph 13D. The possibility that this situation would arise was not foreseen at the time the Armistice Agreement was negotiated, and, indeed, it would not have arisen had your side proceeded to negotiate, within three months and in good faith, a 'peaceful settlement' as was contemplated by the Armistice Agreement.

"In view of these facts and your gross violations of the provisions of Sub-paragraph 13D, the U.N. Command considers that it is entitled to be relieved of corresponding obligations under the provisions of this paragraph until such time as the relative military balance has been restored and your side, by its actions, has demonstrated its willingness to comply. The stability of the armistice and the maintenance of the relative military balance, which it was the primary purpose of these provisions of the Armistice Agreement to ensure, can now only be restored and maintained by the replacement by the U.N. Command of its old weapons with new items currently available. The U.N. Command is taking appropriate steps to this end.

"It should be clearly understood that:

(1) The only purpose of the U.N. Command's action is to restore the relative balance of military strength that the armistice was intended to preserve.

(2) The U.N. Command emphasizes the fact that the replacement weapons are being deployed for defensive purposes only.

(3) The U.N. intends, as it has in the past, fully to observe the cease-fire provisions of the Armistice Agreement. It intends also to observe all of the other provisions of the Armistice Agreement, save to the extent to which it is entitled to be relieved from compliance because of your violations of Sub-paragraph 13D. . ."

The North Korean and Chinese members of the Commission officially protested against the U.N. decision, a statement being issued later the same day by Major-General Jung Kuk Rok, the senior North Korean representative.

Major-General Jung accused the U.N. Command of "attempting to wreck the Armistice Agreement, thus obstructing the peaceful settlement of the Korean question"; of "attempting to introduce new-type weapons so as to perpetuate the occupation of South Korea by American troops . . ."; and of attempting "to turn South Korea into an American base of atomic warfare. . ."

After saying that "the peaceful solution of the Korean question does not require the introduction of new-type weapons into South Korea to arm the troops on your side, but requires the withdrawal of all foreign troops from Korea," the statement protested against the U.N. decision and demanded the withdrawal of all foreign troops. It described the U.N. decision as a "pretext to cover up U.N. violations of the Armistice Agreement or attempts to wreck it"; claimed that the Communist side had strictly observed the provisions of the agreement; and concluded: "Any unilateral acts on your side to wreck the Armistice Agreement are entirely illegal and null and void. . . . I warn your side that if it commits disruptive acts . . . it will bear the entire responsibility for the consequences."

A formal demand by the North Korean representative on the Armistice Commission for the convening of an international conference to discuss the withdrawal of all foreign troops from North and South Korea, presented on June 26, was immediately rejected by General Litzenberg, who said that the proposal was not a proper subject for discussion by the Commission. He added, however, that the Governments of the U.N. Command "remain ready to discuss the withdrawal of foreign troops and unification on the basis of U.N. objectives."

Mr. Murray Snyder, U.S. Assistant Secretary of Defence, stated on June 21 that the U.S.A. would immediately send modern jet aircraft from Japan, Okinawa and elsewhere to South Korea, but that the modernization of the U.S. ground forces in that country, including the supply of up-to-date tanks, would take longer. The aircraft would be capable of releasing nuclear weapons, but no ground weapons capable of firing atomic warheads would be introduced "at this time." Mr. Snyder said that the decision to modernize the equipment of the U.S. forces in Korea had been taken after consultation with, and the approval of, all those countries which still maintained troops in Korea Britain, Australia, Canada, New Zealand, France, Turkey, Greece, and Siam.

The U.N. Forces in Korea consist of two U.S. divisions, 21 South Korean divisions, and a force of a little less than one division composed of British, Australian, Canadian, New Zealand, Greek, Turkish, French and Siamese troops. No official figures of the strength of the forces on either side were given in Washington, but the U.S. Press reported that, on the Communist side, there were 400,000 North Korean and 300,000 Chinese troops in North Korea and another 1,000,000 Chinese troops north of the Yalu River in Manchuria. The U.S. forces were said to total 80,000, the South Korean forces 700,000, and the other U.N. troops less than 5,000.

The U.N. Command's decision to supply its forces in Korea with modern arms was supported on June 21 in official British, Australian, and South Korean statements.

A British Foreign Office spokesman expressed "full appreciation" of the reasons for the decision; emphasized that there was no intention of breaking the Armistice Agreement as a whole; and stressed that the U.N. Command intended to continue to observe all its other provisions. The Australian Minister for External Affairs (Mr. Casey) stated that Australia had been consulted and fully agreed with the action proposed. A South Korean spokesman expressed the hope "that today's first step to adjust the iniquitous situation in Korea will be followed by the logical conclusion that the 1953 Armistice Agreement in its entirety will be denounced by the United Nations."

The Tass Agency in Moscow denounced the decision of the U.N. Command as a "flagrant violation of the Korean Armistice Agreement."—(New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian) **(14982 A.)**

A. CEYLON. — The Language Controversy. - Federal Party's Demand for Equality of Status for Tamil. - Threat of Civil Disobedience Campaign. - Mr. Bandaranaike's Four-point Programme for Use of Tamil. - Discussions with Federalist Leaders.

The tension between the Sinhalese and Tamil communities in Ceylon arising from the Official Language Act of 1956, which made Sinhalese the only official language, became increasingly acute during the first six months of 1957. The Federal Party—the leading Tamil political organization—announced in December last that it would launch a *satyagraha* (civil disobedience campaign) on Aug. 20, 1957, in support of its four main demands: (1) the introduction of a federal Constitution, with full autonomy for the Tamil-speaking areas; (2) full rights of citizenship for all Tamil-speaking residents of Indian descent; (3) the repeal of the Official Language Act and the granting of equality of status for the Tamil language equally with Sinhalese; (4) the ending of the "colonization" of Tamil areas by Sinhalese-speaking people. Although the Federal Party emphasized that this movement would be strictly non-violent, the plan aroused widespread fears that it would result in communal rioting similar to that of June 1956 (see 15012 A), when, according to official figures, 23 people were killed and 237 injured in the Gal Oya valley alone. [Unofficial estimates had placed the number of fatal casualties in this area at over a hundred.]

Strong feeling was aroused in January by a Government order that all number-plates on new motor vehicles must bear a Sinhalese letter—an order which was openly defied in the Tamil-speaking Northern and Eastern provinces, with the connivance of the police. February 4 (Independence Day) was observed as a day of mourning by the Tamils, who organized demonstrations at which copies of the Official Language Act were publicly burned. In Trincomalee, where the majority of the population are Tamils, the hoisting of the Sinhalese flag in the market-place led to disorders in which one person was killed, troops having to be sent to the town to maintain order.

After a period of comparative calm, tension revived with the approach of the date fixed for the *satyagraha* campaign. The working committee of the ruling Sri Lanka Freedom Party decided on May 27 to recruit a volunteer force of 100,000 to help maintain order; this decision was strongly criticized by the Press and even by some members of the Government, and the Prime Minister (Mr. Bandaranaike) was obliged to give an assurance on June 5 that the proposed organization would be merely a youth movement and not a para-military force. Five Cabinet Ministers led by Mr. de Zoysa, the Finance Minister, were stoned on June 1 when they visited the town of Mannar, in response to Federalist assertions that members of the Government dared not enter the Tamil areas.

In a statement published in the *Times of Ceylon* on May 31, the Federal Party president (Mr. Vanniasingham) said that the party would abandon its civil disobedience campaign if the Government took satisfactory action to restore the Tamil language to its rightful place and "stopped colonizing the Tamil areas with Sinhalese." On the following day, however, he declared that nothing short of the establishment of an autonomous Tamil State in a federal set-up would induce his party to call off the campaign, although they would consider postponing it if the Government made Tamil an official language and abandoned its colonization programme.

At a press conference on June 5 Mr. Bandaranaike commented on the Federal Party's demands and summarized his own proposals for meeting the minorities' grievances.

The Federal Party, he pointed out, had put forward no details of its scheme for a federal Constitution, to which all other parties in Ceylon were opposed. The problem of citizenship rights for residents of Indian descent would form the subject of discussions between himself and Mr. Nehru, at which he hoped to find a satisfactory solution. The demand for the repeal of the Official Language Act and for parity of status for Tamil was "neither practicable nor conducive to the strengthening of friendly relations between Sinhalese and Tamils." Finally, the Government had no intention of turning the Tamil areas into areas with Sinhalese majorities by means of planned colonization, as the Tamils feared, and in carrying out colonization schemes would give priority to residents of the area involved. The *satyagraha* campaign, which was "professedly designed to break laws, to bring government to a standstill, and perhaps to establish a parallel Government," would "result almost immediately in the launching of widespread violence," as the Mannar incident had shown.

Mr. Bandaranaike continued: "I have already announced in Parliament three measures which should meet any reasonable demands of the minorities. These are the establishment of regional councils to decentralize the administration; the amendment of the Constitution to guarantee, among other matters, fundamental rights to all citizens; and steps to enable reasonable use of the Tamil language at official levels." In these circumstances, he appealed to the Federal Party to abandon the "criminal folly" of its *satyagraha* campaign, which was likely to result in "untold misery and suffering for many thousands of people."

Mr. Bandaranaike enlarged on his proposals for the "reasonable use" of Tamil, and defended them against criticism from Sinhalese extremists, in a broadcast on June 12 in which he put forward the following four-point programme: (1) Tamils would enjoy the right to education in their mother-tongue up to and including university level. (2) Tamils would be allowed to take the entrance examinations for the Public Service in their own language, but would not be given permanent employment unless they acquired a sufficient knowledge of Sinhalese within two or three years. (3) Tamils would be free to correspond with Government officials in their own language. (4) Some local authorities in the Northern and Eastern provinces would be permitted to transact their business in Tamil.

When the new session of Parliament opened on June 13 Federalist members withdrew in protest from the opening ceremony because the Governor-General (Sir Oliver Goonetilleke) read the Speech from the Throne in Sinhalese and English, but not in Tamil.

Mr. Suntharalingam (a Tamil Resistance Front M.P., who had boycotted Parliament since the passing of the Official Language Act) was suspended for a fortnight on June 19 when he protested against the Speaker's refusal to allow him to speak in the debate on the Speech from the Throne. On refusing to leave the Chamber he was forcibly removed by the police, and as he refused to move from the pavement where he had been deposited he was taken to a police station, where he remained until June 24, refusing either to go home or to pay for his food. The police then took him to his house, which he refused to enter until his relatives forcibly carried him indoors to save him from a Sinhalese crowd which was stoning him.

The Federal Party unanimously rejected Mr. Bandaranaike's four-point programme on June 23, but announced their desire to seek a peaceful settlement by means of discussion, calling upon the Prime Minister to take the initiative. In consequence, talks which were described as "friendly and satisfactory" took place between Mr. Bandaranaike, Mr. de Zoysa, and the Federal Party leaders, Mr. Vanniasingham and Mr. Chelyanayakam, on June 26. After Mr. Bandaranaike had given details of his proposals for the use of Tamil and for regional councils, and the Federalist leaders had explained their plan for a federation, it was agreed that the latter should submit proposals for a compromise settlement at their next meeting.—(Ceylon Government Information Department - Times - Manchester Guardian) **(Prev. rep. 15012 A.)**

B. UNITED KINGDOM. — Discovery of Body of Commander Crabb. - Open Verdict returned at Inquest.

The headless body of a man in a frogman's suit, found by a yachtsman near Chichester harbour on June 8, was subsequently identified as that of Commander Lionel Crabb, whose disappearance in the Portsmouth area had been announced by the Admiralty on April 29, 1956 (see 14892 A). An open verdict was returned on June 26 by the Chichester Coroner, who said that it was "quite impossible" to determine the cause of Commander Crabb's death. The pathologist who examined the remains said that the body could well have been in the water for 14 months.

Commander Crabb had been reported missing since the day after the arrival at Portsmouth of the Soviet cruiser *Ordjonikidze*, and two accompanying Soviet destroyers, which brought Marshal Bulganin and M Khrushchev to Britain for their official visit. The above-mentioned Admiralty statement said that Commander Crabb had not returned from a test dive in connexion with trials of underwater apparatus held at Stokes Bay, in the Portsmouth area. The Soviet Government alleged at the time that a frogman had been seen near the Soviet warships, Notes being exchanged between the U.K. and Soviet Governments as mentioned in 14892 A.

The following statement was issued on June 26 by Mr. A. W. Geddes, solicitor for Commander Crabb's mother (Mrs. Beatrice Crabb):

"There have been many irresponsible conjectures regarding the last operation upon which Commander Crabb was engaged prior to his disappearance, including even suggestions that he was in the employ of a foreign power. It is desired therefore to emphasize that every particle of evidence in our possession points conclusively to the fact that this very gallant gentleman died, as he had lived, in the service of our own country and of no other"

Mr. Rankin (Lab.) asked the Prime Minister on July 4 if he could make a statement on "the circumstances in which Commander Crabb disappeared in Portsmouth harbour," and drew attention to the statement issued by the Crabb family's solicitor. Mr. Macmillan said that he had no statement to make on the matter and that he "must stand by the statement made by Sir Anthony Eden in the debate on May 14 last year." (Times - Daily Telegraph) **(Prev. rep. Cdr. Crabb, 14892 A.)**

A. IRAQ. — Resignation of General Nuri es-Said. - New Government formed by Senator Ali Jawdat. - Ending of Martial Law.

General Nuri es-Said (69) resigned the Premiership of Iraq on June 8 for reasons of health and was succeeded as Prime Minister by Senator Ali Jawdat (64), who was nominated to that post by King Faisal on June 17. The new Cabinet, which included a number of Ministers who held office under General Nuri, was sworn in on June 19, its membership being as follows:

Prime Minister and Foreign Affairs—Senator Ali Jawdat; Economics and Development—Dr. Nadim el-Pachachi; Interior—General Sami Fattah; Defence—Ahmad Mukhtar Baban; Justice—Abdul Rasoul Khalisi; Finance—Ali Mumtaz; Health—Dr. Abdul Amir Alawi; Education—Najib Alrawi; Social Affairs—Arkan Abbadi; Works and Communications—Abdul Wahab Mirjan; Agriculture—Jamal Umar Nadhmi; Minister of State—Sheikh Ali Alsharqi.

The principal new appointments were those of General Fattah, formerly Director-General of the Port of Basra, as Minister of the Interior, and of Jamal Umar Nadhmi, a former provincial governor, as Minister of Agriculture. Ahmad Mukhtar Baban, the former Vice-Premier, took over the Defence portfolio, while Mr. Khalisi (formerly Minister of Justice) took the portfolio of Social Affairs. Dr. Pachachi assumed responsibility for the important portfolio of Development, while retaining his former post of Minister of Economics.

Senator Ali Jawdat, like his predecessor, is known as a supporter of the Baghdad Pact and of Iraqi co-operation with the West. Formerly an officer in the Ottoman Army, he took part in the Arab revolt of 1916 and has played a prominent part in the public life of Iraq since the foundation of the State after the First World War. After serving as Chief of the Royal Cabinet he became Prime Minister in August 1934, but resigned six months later. He subsequently served as Iraqi Ambassador in London, Paris and Washington, and has represented Iraq at the United Nations.

General Nuri had served six separate terms as Prime Minister since 1930, his last Cabinet having been formed in 1954. One of the architects of the Baghdad Pact, he had consistently opposed Communist infiltration in the Middle East, and in recent months had strongly denounced the Egyptian and Syrian press and radio campaigns directed against Iraq.

In his last important policy statement, made on May 19 at the end of King Saud's visit to Baghdad (see 15581 A), General Nuri said that Communist activities and propaganda were responsible for the present tension in the Middle East, and declared that Iraq would not permit "any interference by Khrushchev, Shepilov or others" in her affairs. While the Western Powers had made "certain mistakes," the Arab world could always settle its differences with the West, "if not today, then to-morrow." There was no possibility of a settlement, however, with Communist Russia—in which connexion General Nuri contrasted Russia's actions with those of Britain, which had given independence to India, Pakistan, Burma, Ceylon, and Ghana.

The state of martial law, imposed on Nov. 1, 1956 after the outbreak of the Suez crisis, was ended by General Nuri's Government on May 28.—(Times - Manchester Guardian)

B. UNITED KINGDOM.—Road Transport - Increases in Road Haulage Rates.

British Road Services charges were raised from May 21 by an average of 7½ per cent to cover recent wage awards and increased costs of fuel, tyres, insurance, etc. At the same time a provisional increase of 2½ per cent in force since April 15 (pending the settlement of wage negotiations) was removed.

Rates charged by members of the Road Haulage Association (representing about 17,000 private hauliers) and by members of the National Conference of Road Transport Clearing Houses (representing the operators of over 8,000 long-distance vehicles) were raised, also from May 21, by 6 and 5 per cent respectively, but the remaining balance of the Suez surcharge was removed. Because of the Suez crisis a 10 per cent surcharge had been announced by both associations on Dec. 8, 1956, but two-thirds of this had been taken off on April 18, after the extra shilling tax on petrol and fuel oils was removed.

C. HUNGARY - SOVIET UNION. — Agreement on Status of Soviet Troops in Hungary.

An agreement on the "temporary stationing" of Soviet forces in Hungary was signed in Budapest on May 27, on similar lines to the agreements previously concluded between the U.S.S.R. and Poland, Rumania and Eastern Germany. The signatories were the Ministers of Defence and Foreign Affairs on both sides—Marshal Zhukov and M. Gromyko for the U.S.S.R., and General Revesz and M. Imre Horvath for Hungary.—(Times - Le Monde, Paris)

E. BOLIVIA. — Resumption of Service on Dollar Loans in Default since 1931.

An agreement was signed in New York on June 10 between the Bolivian Government and the Foreign Bondholders' Protective Council under which Bolivia agreed to resume limited payments of interest on, and the redemption of, a total of $50,278,000 of dollar loans which had been in default since 1931.

The agreement covered four Bond issues: the 6 per cent loan of 1917 (due 1940); the 7 per cent issue of 1927 (due 1958); the 7 per cent issue of 1928 (due 1969); and the 8 per cent issue of 1922 (due 1947). Under the agreement each $1,000 Bond will be stamped to indicate a new par value of $1,100; all interest arrears to date will be cancelled; and interest payments will be resumed at the rate of ½ per cent on July 1, 1957; 1 per cent for 1958-59; 1½ per cent for 1960-61; 2 per cent for 1962-63; and 3 per cent from Jan. 1, 1964 to Jan. 1, 1993—the date of the complete repayment. A cumulative sinking fund of ½ per cent annually will be used for the redemption of Bonds between 1962 and 1966, and of 1 per cent from 1967, while Bolivia may apply an agreed percentage of her export proceeds to the redemption of additional Bonds.

The settlement—undertaken on the basis of Bolivia's comprehensive monetary and economic stabilization programme—ended the last of the defaults of funded external dollar debts of Latin American countries which began in 1914, and which at one time during the 'thirties affected more than $1,000,000,000 of bonds issued by fifteen countries.
(New York Times) **(Prev. rep. 15402 D.)**

F. SEATO. — Secretary-General appointed.

The South-East Asia Treaty Organization announced on July 1 that Mr. Pote Sarasin, Siamese Ambassador in Washington, had been appointed to the new post of Secretary-General of the Organization, which was created at the last SEATO Council meeting held at Canberra in March. Mr. William Worth (Australia) was appointed Deputy Secretary-General on July 12.

Mr. Sarasin (51), a lawyer, was Foreign Minister of Siam in 1949-50 but resigned in protest against the recognition of Bao Dai as Chief of State in Indo-China. He was a member of the drafting group which prepared the South-East Asia Defence Treaty.

The Secretary-General will co-ordinate the political, economic and cultural activities of SEATO but will not have direct authority over the military organization, which will be the concern of the Military Advisers.—(New York Times)
(Prev. rep. 15452 A.)

A. ALGERIA. — Political Developments, June 1956-June 1957. - M. Mollet's "Declaration of Intentions" on Government Policy. - Increase in Number of Departments. - Abolition of "Communes Mixtes." - Dissolution of Departmental and Municipal Councils. - Agrarian and Social Reforms. - The Nationalist Movement.

During the later months of 1956 and the early months of 1957 the French Government issued a series of statements defining more clearly its policy for a settlement in Algeria. This policy, as laid down by M. Mollet in February 1956 after the formation of his Government, envisaged the conclusion of a cease-fire agreement with the rebels, the holding of free elections three months later, and the negotiation with the elected representatives of the Algerian people of a new statute which would recognize "the personality of Algeria" (see 14913 A). On Oct. 29, 1956, a week after the arrest of five leaders of the National Liberation Front (see 15329 A), M. Mollet issued an appeal to the rebels giving fuller details of the Government's policy, which was broadcast on the same day by M. Lacoste, the Resident Minister in Algeria.

After declaring that the rebellion was doomed and that the arrested nationalist leaders had recognized this, M. Mollet appealed to the rebels to accept a cease-fire, and guaranteed that a complete amnesty would be granted to all who did so. Immediately after the cease-fire, "the widest and freest possible consultations" would be held "to determine the basis for the fundamental law of the new Algeria." Algerian representatives to the National Assembly would then be chosen by free elections, held under democratic supervision and on the basis of a single electoral register for both Moslems and Europeans, and in consultation with them "the representative institutions of the Algerian personality" would be drawn up. M. Mollet also guaranteed that the complete equality of all Algerians would be recognized, irrespective of origin, and that a sum comparable to that being spent on the re-establishment of order would be devoted annually to raising the living standards of the Algerian people.

The French Government's appeal was almost completely ignored by all sections of Algerian opinion, partly because it coincided with the Israeli military operations against Egypt.

French Government's "Declaration of Intentions."

Prior to the U.N. debate on Algeria (see 15505 A) M. Mollet issued a 5,000-word "declaration of intentions" on Jan. 9, 1957. This declaration contained a number of new proposals, notably that the terms of a cease-fire agreement should include guarantees for freedom of elections; that the elections should take place under foreign supervision; and that the administration of Algeria should be largely decentralized.

The population of Algeria, M. Mollet pointed out, consisted of Europeans from France and other Mediterranean countries, mostly "small men" whose ancestors had lived there for several generations, and a Moslem community including both Berbers and Arabs, as well as a considerable Jewish community. "The problem of Algeria," he went on, "is to ensure the co-existence of these two communities, without one being able to oppress the other. The Moslem community have numbers on their side. The community of European origin, through their knowledge and technical skill, have ensured the economic development of Algeria, have made it a modern country, and today still control a great part of its economy. As we see it, there can be no question of either community dictating to the other, whether by weight of numbers or through its economic power. Algeria can prosper only through active collaboration between the two communities. . . . France will never allow the Algerians of European origin to abuse their present economic advantages to exploit the Moslems, or the Moslems to take advantage of their numbers in order to reduce the Europeans to a position of inferiority or drive them out. France will never abandon Algeria."

After expressing the opinion that a settlement would already have been reached but for "the interference of foreign nations," M. Mollet went on: "France has always kept open her unconditional offer of a cease-fire, free from any political conditions whatsoever. The Government is prepared to enter into direct relations with the combatants at any time in order to reach agreement with them on the conditions for a cease-fire. Within three months of the re-establishment of order, elections with a single roll of voters will be organized, the freedom of which will be strictly ensured. France will not hesitate to invite free nations with a well-established democratic system to send observers to Algeria during the elections to confirm the complete freedom of voting. . . . Essential guarantees with a view to the organization of elections may be included in the cease-fire agreement. The Government will open discussions immediately with the representatives elected in this way . . . on Algeria's future organization."

The contacts which had been established with representatives of the rebels, M. Mollet observed, had shown that profound differences existed between various groups and tendencies, and that no single movement could claim to control the rebellion as a whole. No agreement had been reached on a cease-fire because the rebel leaders had insisted that France must first recognize Algeria's right to independence and agree to the formation of a provisional Algerian Government. "It is not a cease-fire but a surrender which our opponents want," M. Mollet declared. "In contrast with this extremism, we offer the only solution consistent with the rules of democracy—an unconditional cease-fire, free elections, and free discussions with the elected representatives of the population of Algeria."

France's policy in Algeria, he emphasized, would be guided by three principles: (1) to ensure full enjoyment of their legal rights by all inhabitants of Algeria, irrespective of their origin or religion; (2) to ensure the co-existence of different communities and respect for their legal rights; (3) "to give expression to the personality of Algeria, while maintaining the necessary links between Algeria and metropolitan France." In addition to the political rights guaranteed by the French Constitution, all inhabitants of Algeria must enjoy a fair share of the country's resources, work and responsibilities. Their full participation in political responsibilities would be ensured by a single electoral register, but they must also be assured the right to work, a decent living standard, and health. It was necessary to share out the country's wealth more fairly, but it was still more necessary to increase it. An independence which resulted in economic and social regression, and in political regression toward dictatorship or a semi-feudal régime, would not be progress.

"The territories and communes which make up Algeria must be so delimited as to take ethnic realities fully into account," M. Mollet continued. "In many communes and several territories, the inhabitants of European origin will form an important part, if not a majority, of the population. The other communes and territories will have an Arab or Berber population. The territories will be run by elected assemblies and local authorities. A large measure of decentralization will give the territorial authorities extensive powers in many fields, notably over administration, finance, and the police. . . Within the territory the communes will also be run by legislative and executive organs which will receive considerable powers. . Similar institutions for the whole of Algeria will be set up, wielding the necessary legislative and executive powers for the exercise of their authority, especially for co-ordinating the activities of the territories. The existence of these institutions will guarantee the personality of Algeria. The powers of the central French authorities, in which Algeria will share through her elected representatives, will be confined to matters involving the national sovereignty and the vital interests of the French Republic as a whole. What France intends to keep as regards Algeria and its local and territorial authorities is essentially a permanent power of arbitration, in order to ensure that the rights guaranteed to all Algerians are respected and that no community is oppressed by another. . . "

M. Mollet concluded: "Algeria, as the keystone of a vast Franco-African *ensemble* of a new type which is being formed on a community of cultural, economic, strategic and political interests, cannot be isolated from this great movement any more than the Sahara, the development of whose wealth will condition the expansion of all the coastal areas. This Franco-African complex will not be a closed one. France desires that countries such as Tunisia and Morocco should associate themselves freely with it in order to benefit by the advantages of the common task, and notably by the wealth of the Sahara. We should speak of a Eurafrican rather than a Franco-African complex. France is now negotiating with her European partners the formation of a vast Common Market, with which the overseas territories will be associated. The whole of Europe will be invited to assist in the development of Africa, and Eurafrica can become one of the main factors in world politics. Isolated countries are too small for the modern world. What could Algeria do on her own? What might not her future be, on the other hand, as one of the foundations of the Eurafrican community which is now taking shape?"

Algerian Reactions to M. Mollet's Declaration.

M. Mollet's declaration was rejected as a basis for a cease-fire by the nationalists, and met with a hostile reception from both the European and the Moslem communities in Algeria.

The National Liberation Front's delegation in Tunis, in a statement on Jan. 11, categorically rejected all proposals which, it said, had been put forward "with the intention of masking the policy of 'pacification' and deceiving international opinion as represented at the U.N." It reaffirmed its determination to continue the struggle until Algerian independence was recognized as a condition for a cease-fire. M. Moulay Merbah, secretary-general of the "Messalist" Algerian National Movement, laid down on the same day the following conditions —less far-reaching than those of the Liberation Front— for a settlement: (1) recognition of Algeria's right to self-determination; (2) a cease-fire under U.N. control on a basis acceptable to both parties; (3) the re-establishment of democratic liberties, the lifting of the state of siege, and complete freedom of movement for all Algerians; (4) elections under U.N. auspices; (5) negotiations between France and the elected representatives of the Algerian people.

A statement issued on Jan. 15 by a group of prominent Algerian Moslems of moderate views, including M. Abderrahman Farès (an ex-president of the Algerian Assembly), strongly criticized the French Government's declaration. The statement asserted that M. Mollet, while refusing to agree to any political conditions for a cease-fire, had himself laid down such conditions and had insisted that the rebels should agree to an "unconditional surrender." The elections were to be controlled by "countries which supported France's policy," and it had not been made clear whether representatives were to be elected to an Algerian Constituent Assembly, the French National

Assembly, or a new Algerian Assembly. Although the declaration proposed that the future organization of Algeria should be decided by negotiation, it laid down the details of this organization, showing that "the French Government wishes to impose a statute on Algeria instead of negotiating." The statement concluded by demanding the immediate opening of negotiations with the National Liberation Front, "the only authentic and valid representative of the Algerian people."

Prominent representatives of the European community criticized the proposal to hold elections on the grounds (i) that the Moslem electorate would be intimidated by the terrorists, and (ii) that the single-college system would lead to a split between the big cities with European majorities and the rural areas with Moslem majorities.

Reactions of French Political Leaders.

M. Mollet addressed a letter on Jan. 24 to seven ex-Premiers and to leaders of all political parties in the National Assembly and the Council of the Republic except the Communists and Poujadists. Pointing out that the rebels would refuse to accept a cease-fire so long as they hoped for a change in French policy, he proposed that "all the men who assume leading responsibilities in French political life, such as the head of a parliamentary group, a party, or a national movement, or by virtue of the functions which they have discharged as head of a Government, should give their formal assent to the basic principles of the Government's declaration" issued on Jan. 9.

All the replies to this letter agreed in affirming that the union between France and Algeria was indissoluble and that the U.N. was not competent to pronounce on the Algerian question; a number, however, expressed serious reservations on the Government's policy.

The **Radical Party** stressed the need for "an agreement on positive measures between all the parties consulted," since "an agreement which was confined to negations would only be a disservice to France's cause." **M. Mendès-France** described M. Mollet's declaration as "completely inadequate," and attributed the deterioration of the Algerian situation to the Government's failure to carry out the policy summarized in his letter of resignation (see 14933 A). He added: "To discuss future plans, however well-intentioned, seems quite unrealistic to me. What counts today is the Government's measures to re-establish contact with the Moslem population and to recover their confidence." **M. Edgar Faure** (leader of the R.G.R. group) suggested that a contradiction existed between the inclusion of Moslems and Europeans in a single electoral register and the principle that one community should not be allowed to dictate to the other through weight of numbers. Elections should be preceded by "a previous approach to political problems," as otherwise there would be a danger of conflict between "the result of the procedure adopted and the maintenance of the principles laid down"; moreover, the Government's proposals for the framework of a future statute for Algeria could not be regarded as basic principles, since they would have to be submitted to negotiation. The **M.R.P.**, the **Dissident Radicals**, and the **U.D.S.R.**, as well as **M. Bidault** and **M. Pleven**, expressed their general agreement with the Government's policy.

The attitude of the right-wing parties was more critical. The **Independents**, in a statement submitted to M. Mollet on Jan. 25, rejected the proposals for a single electoral register and the holding of elections three months after the cease-fire. Their subsequent reply to M. Mollet's letter, however, which was signed *inter alia* by MM. Pinay and Laniel, stated only that "no elections can be envisaged until all forms of terrorism and foreign interference have ceased," and made no reference to the single electoral register, on which opinion inside the party was known to be divided. The **Paysan Party** declined to undertake "any engagements which would associate us with a policy already decided on, as we possess neither the necessary information nor means of controlling policy." The **Social Republicans** (ex-Gaullists) defined their policy as "regionalization of Algeria, a political executive and legislature in Paris and not in Algiers, and a policy of firmness towards the U.N., Morocco, and Tunisia."

Administrative Reforms in Algeria.

Sweeping administrative changes were carried out under a series of Government decrees published on July 3 and Dec. 13, 1956. These provided (1) that the number of departments should be increased from four to 12; (2) that the *communes mixtes* (rural areas governed by appointed administrators) should be transformed into *communes de plein exercice*, administered by elected municipal councils; and (3) that the existing departmental and municipal councils should be temporarily replaced by administrative commissions and special delegations respectively, pending the holding of elections.

Departmental Reorganization.

Under a decree of July 3, 1956, the Algiers department was divided into the departments of Algiers, Tizi-Ouzou, Médéa, and Orléansville; the Oran department into the departments of Oran, Tlemcen, Tiaret, and Mostaganem; and the Constantine department into the departments of Constantine, Sétif, and Batna. The Bône department, which was separated from the Constantine department in 1955, remained unchanged. The 12 departments were sub-divided into 37 *arrondissements*, the number being subsequently increased on May 21, 1957, to 71 in order that the large number of new *communes de plein exercice* might be "placed under the supervision of an administrative organ close enough to control, guide and advise them."

A decree of Dec. 13 empowered the Governor General to appoint provisional Administrative Commissions, containing equal numbers of Europeans and Moslems, in each department, pending the election of general councils. The former European members of the general councils for the departments of Algiers, Oran, and Constantine would automatically become members of the new Commissions. These Commissions were subsequently established under Orders issued by M. Lacoste on April 30, 1957, and held their first meetings during May. Their composition was not uniform, as originally proposed; e.g. that for Algiers consisted of 15 Europeans and 15 Moslems, that for Médéa of six Europeans and eight Moslems, and that for Tizi-Ouzou of five Europeans and 22 Moslems. The departments were grouped together into three regions (Algiers, Oran, and Constantine) and a commission was set up for each region, the members of which were elected by the departmental commissions from among their own membership.

Municipal Reorganization.

A decree of July 3, 1956, provided for the division of the existing *communes mixtes* into a much larger number of *communes de plein exercice*, and for the election of councils by proportional representation and on the basis of a single electoral register within four months of the formation of the new communes. The abolition of *communes mixtes* had been provided for in the Statute of Algeria adopted in 1947; it had never been put into effect, however, owing to the opposition of the European section of the Algerian Assembly, to which the decision on the implementation of the measure had been entrusted. A decree published on Dec. 13 laid down that the prefects of the departments should appoint an administrative commission for each new commune to prepare electoral registers, whilst another decree of Jan. 5, 1957, provided for the appointment of special delegations to administer the communes until elections could be held.

The abolition of the 80 *communes mixtes*, which were divided into over 1,100 *communes de plein exercice*, was completed by Jan. 15, 1957. M. Lacoste announced on April 12 that 442 special delegations had so far been set up, consisting of 1,703 Moslems and 271 Europeans; in 303 communes the president of the delegation was a Moslem.

A decree published on Dec. 13, 1956, dissolved the municipal councils of the 333 existing *communes de plein exercice* and provided for their replacement by special delegations containing equal numbers of Europeans and Moslems, which would hold office until elections could take place. (In the former municipal councils three-fifths of the members had been elected by the European population and two-fifths by the Moslems, although in most communes the latter formed the great majority of the population). In opposition to this decree, 81 of the 124 mayors of the Algiers department adopted on Dec. 11 a motion announcing their intention to resign if the Government's plan were adopted, and their refusal to serve on the special delegations. The mayors of the Constantine department, however, unanimously decided to accept the Government's decision.

Up to April 12, 1957, seventy municipal councils had been replaced by special delegations or Government representatives (special delegates). The first municipal council dissolved was that of Philippeville (in the Constantine department), where all the Moslem and many of the European councillors had already resigned, and the mayor had taken a leading part in anti-government demonstrations following the rebel raid of Aug. 20, 1955 (see 14431 A).

M. Lacoste stated on April 13, 1957, that over 2,000 Moslem officials had been appointed under the Government's decree of March 17, 1956, which permitted the recruitment of Moslems for the public services on specially favourable terms (see 14913 A). A central "Commission for the Admission of Moslem Frenchmen to the Public Services" was appointed and held its first meeting on May 16, 1956, similar commissions being set up in each department. Several Moslem members of the central commission, however, subsequently resigned on the ground that the implementation of its decisions had been entrusted to officials whose "reactionary" sentiments and activities were well known.

Agrarian and Social Reforms.

A series of decrees issued on July 3, Oct. 3 and Oct. 14, 1956, further developed the policy of agrarian reforms initiated by the French Government in its decrees of March 27 and April 26, 1956 (see page 14916).

Under the earlier decrees, a "land bank," the *Caisse d'accession à la propriété et à l'exploitation rurales* (C.A.P.E.R.) had been established, with powers to take over land acquired by purchase or expropriation and to distribute it among landless peasants or small-holders. The decree of April 26 had limited the amount of irrigable land which might be owned by one person to 50 hectares (plus 20 hectares for each child, up to a maximum of 150 hectares), and provided that land held in excess of this area might be expropriated on payment of compensation; the total area affected by this decree was estimated at 20,000 hectares. It had also been laid down that irrigable land which was inadequately irrigated owing to neglect by the owner might be expropriated. (The term "irrigable land" is applied to land the irrigation of which has been rendered possible by public works, the total area of such land in Algeria being about 160,000 hectares).

The decree of July 13 empowered the Government to transfer to C.A.P.E.R. large estates of agricultural or forest land which had been granted to a single individual or company by the State. (Large grants of State land were made to private companies on generous terms in the 19th century, and particularly under Napoleon III). The chief

landowners affected were the *Compagnie Algérienne* and the *Compagnie Générose*, about 100 other estates of over 1,000 hectares were also involved, representing a total of nearly 300,000 hectares. The decree also provided that large estates of forest land unsuitable for distribution were to be nationalized, and the income derived from these estates (estimated at 100,000 000 francs a year) transferred to C A P.E R Payments made by private companies for the right to cultivate esparto grass on State land would also be accredited to the C A P E.R Compensation for land taken over would be not less than 50 times the estimated value of the land for taxation purposes, and would be paid in the form of negotiable bonds bearing 6 per cent interest, redeemable within 20 years.

In implementation of the decree of July 13, 1956, a further decree of Oct 3 provided for the transfer to C.A P E R of the property of the *Compagnie Algérienne* and *Compagnie Génévoise*; the former owned about 65,000 hectares to the east of Constantine and the latter about 15,000 hectares around Sétif, the greater part of the land concerned being used for cereal cultivation. The basis of the compensation payable was laid down by a decree of Oct 14 as the average annual profit derived from the property during the last seven years, leaving out of account the two worst years, and taking as a minimum the profit for the year preceding the transfer The *Compagnie Algérienne* estimated the value of its property at about 5,000,000,000 francs. The *Compagnie Génévoise* had offered in April 1955 to sell its property to the Government for 750,000,000 francs.

A joint statement issued on May 11, 1957, by M Pélissier (Director of Agriculture for Algeria) and M. Herbault (Director of the C A.P.E R) estimated that property expropriated under the decrees relating to large estates and irrigable land, or acquired by agreement, totalled about 150,000 hectares and could be used to settle nearly 10,000 families. Replying to criticisms of the fact that very little distribution of land had so far taken place, they pointed out that considerable preliminary work was necessary (e.g. irrigation, soil improvement, and provision of housing and farm buildings), and that this had been slowed down by the lack of personnel and the activities of the rebels.

A decree of July 17, 1956, had transferred the responsibility for free medical assistance from the communes to the central Algerian Government, and made the communes' contributions for this purpose proportional to their resources—not, as in the past, to the number of persons assisted. Orders were issued by M. Lacoste on Oct. 3 providing that family allowance funds should be administered by committees consisting of equal numbers of workers' and employers' representatives, instead of by the employers as in the past, that disputes over social insurance benefits should be referred to an *ad hoc* committee; that persons injured while at work should become eligible for sickness benefits, which would cover the whole cost of treatment; and that all categories of workers, including those working at home, should be eligible for such benefits.

The Nationalist Movement.

The nationalist movement remained divided throughout the period under review into two main groups—the National Liberation Front (F.L.N.), which has its headquarters in Cairo, and the Algerian National Movement (M.N.A.), consisting of the followers of M. Messali Hadj, the veteran nationalist leader who has been held in detention in France since 1952. During the early months of 1956 relations between the two organizations were extremely strained, and fighting between their armed forces in the Kabylie was reported on several occasions. In May 1956 M. Fehrat Abbas, who had joined the F.L.N. in the previous month (see 14913 A), met leaders of the M.N.A. in Berne in an attempt to achieve unity within the nationalist movement. The negotiations broke down because the F.L.N. demanded the dissolution of the M.N.A., whereas the latter was prepared to accept a political alliance but not complete fusion with the F.L.N.; in Algeria, however, co-operation took place between the M.N.A. guerrilla bands and the F.L.N.'s military organization, the "National Liberation Army." In France, on the other hand, where the M.N.A. exercises considerable influence among Algerian workers, the rivalry between the two organizations led to frequent acts of violence, 39 Algerians being murdered and 86 wounded in the Paris area alone during the first five months of 1957.

The Algerian Communist Party formed its own military organization in April 1956, which was later incorporated into the "National Liberation Army" by agreement with the F.L.N. In its dealings with the Communists, the F.L.N. pursued a policy of accepting their support as individuals whilst excluding them from its political and military leadership.

During the spring and summer of 1956 both the F.L.N. and the M.N.A made repeated attempts to secure a negotiated settlement on terms which, however, differed basically from those offered by the French Government. As already reported, F.L.N. spokesmen met leading members of the French Socialist Party on four occasions between April and September 1956 (see 15329 A), while in July a delegation led by M. Fehrat Abbas visited Yugoslavia to submit a memorandum to President Tito, President Nasser, and Mr. Nehru during their meeting at Brioni (see 15008 A). M. Bouhafa, the M.N.A.'s representative in the U.S.A., had previously visited Belgrade and Rome in May 1956 to submit to the Yugoslav and Italian Governments proposals for the formation of an international commission to supervise a cease-fire and elections in Algeria. It was suggested that this commission should consist of representatives of Yugoslavia, as a neutral State, Italy, as an ally of France and a member of NATO, and Egypt, as an Arab country

President Coty on France's Algerian Policy.

In a speech at Mulhouse on July 8, President Coty said that while France was not prepared to grant Algeria full independence, she was ready to go a long way to meet the legitimate aspirations of the Algerian people for a large measure of autonomy. Defending the Government's policy in Algeria, he emphasized France's desire for a solution which would be "fair and liberal" to all sections of the population.

"To those countries which dare to accuse France of colonialism," the President said, "any Frenchman will be proud to reply · 'Where among you is there a country with less imperialism, less racial feeling, less slavery, or a more humane spirit than in ours?' France has recently granted internal autonomy to 30,000,000 Africans. Is it possible that she would want a less generous and liberal solution for Algeria? . . We intend to prepare a liberal and equitable solution which will lead in a democratic manner to Franco-Moslem solidarity and fraternity."

After saying that the Algerian problem was unique because there were two ethnic groups, one more numerous but the other playing a major part in the development and progress of the country, President Coty continued · "The real problem in Algeria is to ensure the co-existence and necessary co-operation of these two communities without one suppressing the other How could independence solve it? We do not allow ourselves to be deceived by the magic of a word. If the rebels make this word the indispensable condition for a cease-fire, it means in reality that this so-called 'independence' would result immediately in their domination over the Moslem population, of whom they fear that free elections would show that a majority are faithfully attached to France; whom they are now terrorizing; and of whom more than 5,000 have been treacherously assassinated under orders issued by the leaders of the rebellion How can one expect that France should hand over these people to the cut-throats (*égorgeurs*) of so many men and women, old people, and children? Is a sovereignty of the most backward and hideous nationalism a democracy worthy of the name, and can it be confused with that liberty of the individual which is our common and highest ideal?

"And what about the 1,200,000 Algerians of European descent, the majority of whose parents and ancestors rest in Algerian soil? . . . They would be offered by the rebels the choice either of leaving the country which they have founded and developed, or remaining as foreigners at the mercy of fanaticism To the public opinion of all civilized peoples I address a simple question: 'If a similar number of your compatriots had been settled for so long a period there or elsewhere and trusted in you, would you be so cowardly as to abandon them? You must not expect us to do so. You must not expect us to sacrifice a new Alsace-Lorraine on the other side of the Mediterranean . . If France abdicated in Algeria chaos and misery would follow, and it is clear who would profit from it. We know well that the Algerian drama rests heavily on the international situation, but does it not rest still more heavily on our country, which more than any other ardently desires to settle it by means of a liberal and fair solution?"

In his speech to the French National Assembly on June 12, after succeeding M. Mollet as Prime Minister (see 15597 A), M. Bourgès-Maunoury announced his Government's intention of introducing a new *loi-cadre* for Algeria as the basis of a "new and progressive political structure" involving widespread decentralization of powers to the regions.

A. UNITED KINGDOM. — Capital Issues.

New capital issues during the first half of 1957 totalled £211,527,000, compared with £151,314,000 (revised figure) for the first six months of 1956 and £295,952,000 for the whole of that year. Of the six-monthly total, £187,630,000 were issues for the U.K., £23,072,000 for British overseas countries, and £825,000 for foreign countries.—(Midland Bank Ltd.)
(Prev. rep. 15375 E; 15007 D; 14968 C.)

B. JAPAN - SPAIN.—War Compensation Agreement.

An agreement was signed on Jan. 9, 1957, between Spain and Japan under which the Japanese Government undertook to pay the equivalent of $5,500,000 to Spain before the end of March as compensation for damage suffered by Spanish nationals and property in the Philippines during the Japanese occupation of that country in the Second World War.
(Bank of London and South America, Fortnightly Review)

C. AUSTRALIA. — Increased Allowances for Federal Members of Parliament.

The Australian Federal Government announced on May 21 that the daily allowance payable to Federal M.P.s when Parliament was in session would be increased from £A2. 10s. 0d. to £A3. 13s. 6d. Government back-benchers had sought this increase in November last because of increased costs and expenses.—(Australian News and Information Bureau)

A. IRAQ - JORDAN. — Baghdad Discussions between King Faisal and King Hussein. - Joint Declaration.

King Hussein of Jordan paid a three-day visit to Baghdad from June 22-24 for discussions with King Faisal. The Prime Ministers of Iraq and Jordan (Mr. Ibrahim Hashem and Senator Ali Jawdat respectively) also took part in the talks, together with the Jordanian Foreign Minister (Mr. Samir Rifai), the Jordanian Finance Minister (Mr. Anastas Hananiah), the Iraqi Minister of Economics and Development (Dr. Pachachi), and the Iraqi Defence Minister (Ahmad Mukhtar Baban).

A joint communiqué was issued by the two sovereigns on June 24 stressing the " brotherly atmosphere " of the talks and containing the following points :

(1) The two countries were agreed that the defence of the Arab world should emanate from the Arab States themselves ; they therefore supported the principles of the Arab League and the Arab defence pact, and had decided to re-implement the Iraqi-Jordanian treaty of alliance signed in 1947 (see 8617 F) as the " best means of ensuring brotherly co-operation—defensive, military, political, economic and cultural."

(2) The two countries were determined to maintain their complete independence and to resist subversive activities. The communiqué stated that " no Arab country should interfere in the internal affairs of any other Arab country " - an obvious reference to Jordanian allegations of Egyptian and Syrian interference in Jordan's affairs (see 15561 A).

(3) Iraq and Jordan would uphold Arab rights in Palestine and would " continue to try to achieve Arab aspirations concerning Palestine."

(4) The Gulf of Akaba was described as " Arab territorial waters," the communiqué stressing its importance as a pilgrim route leading to the Moslem shrines.

(5) Both countries were determined to " resist imperialism " and would support the Algerian people and Arab countries " still struggling against imperialist forces."

The joint statement made no reference to the financial aspect of the conversations, but it was reported that Jordan had sought Iraqi financial aid for the development of industrial, agricultural and irrigation projects. It was also understood that Jordan desired a loan to cover her Budget deficit created by the failure of Egypt and Syria to fulfil their promises to replace the former British subsidy.—(Times - Daily Telegraph)

B. UNITED STATES. — Rejection of Arab Requests for Suspension of Military Aid to France.

A request by 11 Arab countries that the U.S. Government should suspend military aid to France, on the ground that France was using such aid to suppress Algerian nationalism, was rejected by the U.S. Government on June 28 in parallel Notes handed to the diplomatic representatives of the countries concerned.

The representatives of the 11 Arab States had called at the State Department on May 24 and presented a 5,000-word statement accusing France of " terror and atrocities " in Algeria, and asserting that the continuation of U.S. military aid to France would be contrary to America's traditional policy of support for the self-determination of all peoples. The Arab statement also supported Egypt's contention that she had the right to bar Israeli shipping from the Suez Canal and the Gulf of Akaba while a state of " belligerency " continued to exist between the two countries.

The U.S. Government, in reply, said that the suspension of military aid to France would not accord with the interests of the free world. It pointed out that both parties in Algeria had made allegations of atrocities against the other ; recalled that the U.S. Government had condemned all such actions, from whatever source they emanated ; and stressed that all nations had a responsibility to " avoid any exacerbation of the situation " in Algeria. As regards the Suez Canal, the U.S. Government upheld its " free and non-discriminatory use " by ships of all nations, but would oppose any attempt by Israel to resolve the dispute by force. With regard to the Gulf of Akaba, the U.S. Government reiterated its previously-expressed view that the Gulf " comprehends international waters " and should be open to the shipping of all countries.
(New York Times - New York Herald Tribune)

C. EASTERN GERMANY - SOVIET UNION. — Consular Agreement.

A consular agreement between the Soviet and East German Governments was signed in Moscow on May 10 in implementation of the Bulganin-Grotewohl agreement of Jan. 7, 1957.
(Soviet Embassy Press Department, London) **(15352 A.)**

D. MOROCCO. — Arrest of El Glaoui's Sons. - Court of Justice created to try Political Offences.

Four sons of El Glaoui (the late Pasha of Marrakesh, who died in 1956 - see 14677 A) and seven of his relatives or former political associates were arrested in Marrakesh on May 1 and subsequently transferred to Casablanca, where they were placed under the surveillance of the governor of the province.

A communique issued by the Ministry of the Interior on May 2, in reply to allegations in the French Press that the persons concerned had been kidnapped by the " Liberation Army," stated that " certain Moroccan subjects, who despite their past behaviour have hitherto been treated with clemency, have for some time carried on anti national activities." It added that an inquiry had revealed that " considerable financial resources have been accumulated and used, mainly abroad, for purposes directed against the security of the State," and that administrative measures had in consequence been taken against the persons concerned." In a broadcast by the Moroccan radio on May 3 the arrested men were alleged to have " established contact with elements which caused Morocco's past ordeal," and to have received " large sums of money to be used in a plot against the security of the State."

Before the Ministry of the Interior's communiqué, a statement had already been issued in Paris on May 2 expressing " the French Government's emotion at the news of the kidnapping of members of El Glaoui's family," and its hope that measures would be taken in Rabat to obtain their immediate release. The Moroccan Foreign Minister, M. Balafrej, described the French statement as an " interference in the country's internal affairs of a type which endangers our national sovereignty," and emphasized that there had been no question of " kidnapping."

An abortive attempt at revolt had previously been made by Si Addi Ou Bihi, governor of the province of Tafilalet (southern Morocco), who had occupied the town of Midelt on Jan. 18 with a force of armed tribesmen as a protest against the " dictatorship " of the Istiqlal Party and the substitution of written for traditional law. Royal forces sent from Fez entered Midelt on Jan. 22 without resistance, and Si Addi Ou Bihi surrendered three days later to Prince Moulay Hassan, the Sultan's eldest son and C.-in-C. of the Moroccan Army. He was subsequently held under house arrest in Rabat.

A new court of justice, consisting of three judges and of four members of the Consultative Assembly who would act as a jury, was set up by decree of the Sultan on June 6 to try offences against public order and the internal and external security of the State. - (Le Monde, Paris - Le Figaro Paris)
(Prev. rep. 15329 A.)

E. FRANCE. — International Cable Services to be taken over by French Government.

It was announced in Paris on July 9 that the French Government had informed the international cable companies operating in France that their concessions would not be renewed upon expiry, and that the Government would take over the operation on French territory of all international cables with terminals in France. The decision would enter into force on Jan. 1, 1958, for the British-owned Eastern Telegraph Company (which is part of Cable and Wireless) ; on Sept. 1, 1958, for the American companies, Western Union and Commercial Cables ; and on April 1, 1959, for the Danish-owned Northern Telegraph Company. These companies had been running an extensive service of press, commercial and private cables from France to all parts of the world.

A spokesman of the State Secretariat for Posts, Telegraphs, and Telephones emphasized that the move was " not an act of nationalization but a simple reorganization of international cable services." (Le Monde, Paris)

F. INDIA - NEPAL. — New Indian-built Highway handed over to Nepal.

The *Tribhuvan Rajpath*, the 79-mile road link between India and Nepal which was built and financed by India, was formally handed over to Nepal on June 30 as a grant under the Colombo Plan. - (The Statesman, Calcutta) **(Prev. rep. 13638 E.)**

G. EGYPT. — French Cotton Purchase.

It was announced in Cairo on July 8 that Egypt had accepted a French offer to buy Egyptian cotton worth £E.12,000,000, constituting the first commercial transaction between the two countries since the breaking-off of diplomatic relations at the time of the Suez crisis. (Le Monde, Paris)

H. ISRAEL. — Additional French Credits.

The Israeli Finance Minister, Mr. Eshkol, announced on July 7 that France had agreed to grant Israel a further credit of $15,000,000 in addition to the $80,000,000 credit negotiated in April last.—(Le Monde, Paris) **(Prev. rep. 15556 C.)**

JULY 13—20, 1957

A. CYPRUS. — Archbishop Makarios's Arrival in Greece. - British Rejection of Archbishop's Proposal for Bilateral Negotiations. - Insistence on Tripartite Negotiations. - Repudiation of Archbishop's Allegations of "Brutality" by British Security Forces. - Turkish Demand for Partition of Cyprus. - British Protest to U.N. at Greek Attitude on Cyprus Question. - Parliamentary Debates on Cyprus.

The principal development in the Cyprus dispute during the period from the beginning of April was the British Government's rejection of a proposal by Archbishop Makarios for his return to Cyprus and for bilateral negotiations on the island's future between himself and H.M. Government. The Archbishop—who, following his release from detention in the Seychelles, had arrived in Athens on April 17—made his proposal in a letter to Mr. Macmillan, which was handed to the British Ambassador in Athens on May 28. The substantive part of the letter read as follows:

"(1) As the spiritual and elected national leader of the Greek people of Cyprus, I wish to invite attention to the General Assembly's resolution of February 26 [see 15469 A, page 15473].

(2) Following that resolution, the people of Cyprus reacted by a signal contribution towards the establishment of a peaceful atmosphere in the island; the resistance movement, of its own accord, ceased all operations . . . and declared a truce to which they have since faithfully adhered.

(3) The British Administration of Cyprus has failed to take any corresponding action to create the atmosphere of peace and freedom of expression required by the resolution. It has, on the contrary, kept the emergency measures in full force; military operations are being conducted on a major scale; arrests and imprisonments without trial or charge continue undiminished; and methods of unspeakable torture are being employed in increased measure.

(4) The U.N. resolution clearly intends commensurate moves from both sides. It therefore becomes incumbent on the Cyprus Administration to terminate all emergency measures, which, in addition to their oppressive character and the grave suffering involved, impede freedom of expression, and, by prohibiting my presence in Cyprus, prevent a necessary personal contact with the Cypriot people I represent.

(5) It is my desire to do my best in order that effect may be given to the U.N. resolution. I therefore wish to make it clear that . . . I am ready and willing to take part on behalf of the people of Cyprus in bilateral talks, on a basis of the application of self-determination in accordance with the U.N. Charter."

The British reply to the Archbishop's letter was delivered in Athens on May 30, as follows:

"(1) The attitude of H.M. Government to the resolution adopted by the U.N. General Assembly on the Cyprus question was described at the time by the Minister of State, Commander Noble.

(2) H.M. Government have given irrefutable proof of their desire to achieve a satisfactory solution of the Cyprus question. They have accepted the constructive proposals for self-government contained in Lord Radcliffe's report. They have ordered the release of Archbishop Makarios from detention. In Cyprus emergency regulations have been relaxed or withdrawn in all cases where this could safely be done. H.M. Government have also stated that they are willing to accept the good offices of an impartial conciliator between the three member-Governments concerned, in the person of the Secretary-General of NATO.

(3) H.M Government regret that there has been no corresponding contribution by the Archbishop towards an improvement in the atmosphere Since his release from detention he has made a number of statements in which he is reported to have rejected the proposals for self-government in Cyprus put forward by H M. Government on Dec. 19; to have refused the right of participation by the Turkish Cypriots in effective discussion of the future of Cyprus; and to have made his own participation in discussions conditional on the grant of permission for his return to Cyprus, without being willing unequivocally to dissociate himself from terrorism in the island.

(4) As long as the threat of renewed terrorism remains, the Government of Cyprus would be failing in its duty if it discontinued efforts to apprehend known malefactors who are still at large and have not chosen to avail themselves of the offer of safe-conduct. Should terrorism in Cyprus be renewed the Archbishop would, by his refusal to denounce the use of violence for political ends, bear heavy responsibility before world opinion for any subsequent loss of life. In the exisiting situation, it would be incompatible with the responsibilities of the Government of Cyprus, as also with the requirement of an atmosphere of peace and freedom of expression specified in the U.N. resolution, to permit the Archbishop's return to Cyprus.

(5) H.M. Government cannot accept the Archbishop's proposal that the future of Cyprus should be decided by bilateral talks between him and ourselves. Other and wider interests have a right to be consulted. As they have said before, they will be glad to consider the views of any individuals or communities in Cyprus, including the Archbishop, on the proposals for self-government which were put forward in Lord Radcliffe's Report. As to self-determination, their position was explained by the Colonial Secretary on Dec. 19, 1956."

In a speech in Athens on May 30, Archbishop Makarios said that the British reply showed British policy in Cyprus to be "absolutely unrealistic," since it failed to take into account the Greek Cypriots' "unanimous rejection" of the Radcliffe proposals.

Declaring that any future negotiations "should be concerned primarily with securing the right of self-determination," the Archbishop said that the Cypriots would be prepared to accept a transitional period prior to the exercise of self-determination, involving, for instance, U.N trusteeship or the provisional rule of any country nominated by the U.N. except Britain or Turkey. He added, however, that NATO mediation would be unacceptable "so long as it was linked with Western defence interests," and that he himself would not be willing to negotiate unless he was allowed to return to Cyprus.

Turkish reactions to the exchange of letters between Archbishop Makarios and Mr. Macmillan were outlined in a statement by the Turkish Prime Minister, Mr. Adnan Menderes, issued on June 3.

Describing the Archbishop's letter as "a political manoeuvre, or, to be more precise, a trick," Mr. Menderes claimed that the Archbishop had known perfectly well that his proposal would be rejected, and had merely submitted it "in order to show some people—whom he thinks he can deceive—that he is justified in making certain decisions and initiating certain contemplated actions because his so-called just demands have been turned down." Archbishop Makarios, he added, "is an ordinary priest engaging in incitement, such as were seen during the last days of the Ottoman Empire, creating discord between different communities—priests who concealed their guilt under the guise of religion and thus found a way of escaping punishment." After expressing his regret "that Makarios acts in one respect as the spokesman and vanguard of the Greek Government," Mr. Menderes called upon the latter Government to recognize that the only way to end the dispute was by tripartite discussions between the three interested parties. In conclusion, Mr. Menderes said that the British reply provided a welcome reaffirmation, in clear and definite terms, of the British position in the dispute.

Mr. Profumo (Under-Secretary, Colonial Office) stated in the House of Commons on June 25 that Archbishop Makarios had laid down unacceptable conditions in his proposal for bilateral negotiations, but that, if he were to withdraw them, a new situation would arise.

Archbishop Makarios's Arrival in Athens. - Turkish Protest at Official Welcome to Archbishop.

Archbishop Makarios, who had sailed from the Seychelles for Madagascar on April 6 [see 15469 A, page 15475], left the latter island on April 11 for Nairobi, where he broke his journey for a week before going on to Athens.

In a statement on his arrival in Nairobi, the Archbishop said that if there were any further executions in Cyprus, the way to pacification would be barred and terrorism might revive. He also emphasized that he was completely opposed to partition (which would be "something disastrous") and that, as previously indicated, he was not prepared to comment on the Radcliffe proposals until he was allowed to return to Cyprus.

The Archbishop was given an enthusiastic welcome on his arrival in Athens on April 17, being met at the airport by Archbishop Dorotheos (the Greek Orthodox Primate), Mr. Averoff (the Foreign Minister) and other Cabinet Ministers; as "head of a Church" he was accorded the military honours normally given to visiting Prime Ministers. It was commented abroad, however, that the official welcome had been somewhat "toned down" in response to the Turkish warning [see below] that a welcome of a markedly official nature would be construed as an unfriendly act. It was noted in this connexion that the Prime Minister, Mr. Karamanlis, had not gone to the airport but had called upon the Archbishop later in the day.

Two days before Archbishop Makarios's arrival in Athens, the Turkish Government had advised the Greek Government that if the welcome given to the Archbishop was markedly official in form, it would be regarded by Turkey as an unfriendly act and an unnecessary provocation. On the day following the Archbishop's arrival, Mr. Menderes said that there could be "no clearer proof of Greek partnership with Archbishop Makarios than these demonstrations which have been organized by the Greek Government itself" in connexion with the Archbishop's arrival in Athens. "The most noteworthy aspect of the matter from the point of view of international norms and rules," he added, "lies in the fact that the Greek Government participated officially and in full force in the ceremonies." Mr. Menderes described the Archbishop's reception in Athens as "a deliberately inflated expression of the long-standing Greek aspirations for the annexation of Cyprus."

In reply to M. Menderes' statement the Greek Foreign Ministry issued the following declaration on April 19:

"The Royal Hellenic Foreign Ministry has no intention of making a hasty judgment on, or drawing premature conclusions from, the statement of the Turkish Prime Minister. It is to be hoped that these utterances were made in a moment of nervous irritation. In point of fact, Mr. Menderes made three important errors:

(1) In insolent terms appropriate to a Sultan, he arrogated to himself the right to criticize the Greek Government's action in purely domestic matters.

(2) He drew arbitrary conclusions from facts concerning foreign policy, expressing himself publicly in a manner lacking objectivity and thus damaging good neighbourly relations between Greece and Turkey.

(3) He insulted the revered head of an independent Orthodox Church who is held in particular honour in Greece.

"We shall not follow the example of the Turkish Prime Minister... We confine ourselves to pointing out that no people, and in particular the Greek people, can be provoked and insulted without making an appropriate retort..."

It was also learnt on the same day that the Greek Government had rejected the Turkish Note of April 15 as an "unacceptable intervention in Greek domestic affairs."

Greek Allegations of "Brutality" by British Forces.—Refutation by British and Cyprus Governments.

In a White Paper issued on June 11, the Cyprus Government refuted allegations, which had been made in increasing numbers by Greek and Greek Cypriot sources, that British forces in Cyprus had resorted to "brutality" and "torture" in the anti-terrorist campaign.

The Governor of Cyprus (Field-Marshal Sir John Harding), in a foreword, said that the White Paper gathered together "incontrovertible evidence that the allegations are part of a deliberate and organized conspiracy," and that Colonel Grivas (the terrorist leader) had in fact acknowledged this. In putting his campaign into effect, Sir John continued, Grivas "has had at his disposal the whole power of propaganda of a Church given over to political subversion. He has also been able to rely on the support of the Greek and Greek-Cypriot press and the official publicity organs of the Greek Government."

The White Paper noted that, according to captured documents, Colonel Grivas had been fully aware that he could not hope to achieve his aims by force of arms alone and that he regarded propaganda as of equal importance as a weapon in his campaign. The systematic repetition of allegations of torture had been introduced as part of this campaign at the beginning of 1956, and propaganda on this theme had been built up by Athens Radio, the Greek and Greek Cypriot press, Eoka and Peka leaflets, and individual complaints in and out of court and to the Cyprus Government. The specific allegations of brutality which had begun to appear in January 1956 (the White Paper continued) had been based on an isolated case of ill-treatment which was already under investigation at the time and which was, in fact, "the only case of deliberate ill-treatment which had ever been established during the emergency." As a result of the investigations, the two army officers concerned had been tried and convicted by a court-martial in April, 1956.

As each allegation appeared (the White Paper went on), the Government and military authorities had carried out thorough and scrupulous inquiries and, as a result, a total of seven prosecutions [of which the White Paper gave details] had been instituted between September 1955 and June 1956. Many of the allegations, however, had been in such vague terms that the only possible reply was a plain denial.

In seven other cases mentioned, allegations had been disproved on the basis of evidence supplied by Greek Cypriots, whose names, however, could not be given. The White Paper added in this connexion: "The fact is that they have spoken the truth, but this is no defence in the eyes of Eoka. In 1955 and 1956, 109 Greek Cypriots were barbarously murdered as 'traitors' by Eoka... They were presumably murdered simply to shut their mouths."

After quoting cases in which people (including a priest) had later withdrawn allegations which they had made, the White Paper went on: "There are plenty of other examples which cannot be given. The reasons are obvious. To make public the evidence would endanger the lives of those who have given it. Furthermore, to publish evidence given in confidence would discourage others who, under conditions of secrecy, might be prepared to tell the truth. This is one of Eoka's objects. Lastly, the givers of such information, for their own safety, would deny having given it. In order not to expose truthful people, no further examples can be published."

If brutality was as widespread as was alleged, the White Paper continued, it might have been expected that there would have been a large number of private prosecutions against individual police or military officers for assault or similar actions. But in fact, since the beginning of the emergency, there had been only nine such cases, and only two of them had reached the stage of a preliminary inquiry. In one of these two cases the Court had ruled that a *prima facie* case had not been made out, and in the other a police officer charged with a purely technical assault had been given an absolute discharge. Furthermore, the judge presiding at the trial of Nicos Sampson [see below] had stated categorically that he disbelieved the allegations of torture brought by the defence.

Dealing next with the respective roles of the police and the judiciary in the anti-terrorist campaign, the White Paper said (of the first): "A large number of the police officers who are accused of such monstrous conduct are members of U.K. police forces, whose traditions of restraint and humanity have long been the admiration of the civilized world. It must appear unlikely that such men, with their years of training, should on arrival in Cyprus apparently turn into typical members of Hitler's Gestapo, and on their return to the U.K. as quickly resume their well-known and respected role."

Of the judiciary, it remarked: "[The Cyprus] courts have invariably been properly sensitive to any substantiated allegation of misconduct on the part of police or security forces. But nonetheless, no case of this kind, apart from those listed, has ever been established before any court in Cyprus. As with the police, the public is now asked to believe that these courts are deliberately participating with the police in a campaign to suppress evidence of untold brutalities which any thinking person must see is utterly repugnant to both."

Commenting, finally, on the Governor's refusal to authorize a public inquiry into the conduct of the security forces, the White Paper said: "If the price of immediately clearing the security forces of these allegations is to impair their ability to deal effectively with fresh outbreaks of terrorism and to gain information which will assist them in protecting the public from murder, violence, and brutality, then the security forces will continue to place their duty first. They will be content that one day they will be vindicated."

A "committee of human rights" consisting of Nicosian lawyers issued a statement on June 16 describing the Government's White Paper as "an inaccurate picture of the situation."

The statement said that it was inaccurate to suggest that members of the Cyprus Bar had used trials before special courts as opportunities to make propaganda out of allegations of ill-treatment. In support of its allegation that brutal methods of interrogation had been used, the statement remarked: "It is a uniquely strange coincidence that a large number of arrested persons are said to have been overcome with an unnatural, superhuman desire to be penitent and remorseful and proceed to admit in no uncertain terms to capital offences, when it is clear there is no other evidence to connect them with such crimes." The statement also rejected the suggestion that the allegations were part of an organized conspiracy, and declared that an independent inquiry was needed.

The allegations of "brutality" and "torture" by security forces were reiterated by Archbishop Makarios on June 19 at a press conference in Athens.

The Archbishop claimed that he had in his possession 317 testimonies signed by persons "subjected to various degrees of torture," and appealed to British and world public opinion to insist on an independent inquiry into his charges.

After referring to what he described as "abominable methods of investigation and unspeakable tortures inflicted upon Cypriots by British military and police forces by way of vengeance or for the purpose of extracting information," the Archbishop cited alleged individual cases of brutality and maltreatment by the security forces which had resulted in the death of, or serious injury to, the persons concerned. He went on to allege, *inter alia*, that the Cyprus Government had "condoned this state of affairs" by prohibiting the prosecution of members of the security forces without the prior consent of the Attorney-General; and that "more than a hundred complaints of ill-treatment and torture, accompanied by the necessary evidence," had been submitted to the Governor, who had either dismissed them as groundless or had ignored them.

Archbishop Makarios refused to say how this "evidence" had reached him, declaring that he would do so only to an independent fact-finding commission.

The Archbishop's allegations were described by a Cyprus Government spokesman as "merely a rehash of old, threadbare allegations already disposed of." The spokesman added: "At first sight they consist of grotesque and tendentious inaccuracies designed to have a propaganda effect and having very little regard for the truth."

The British Colonial Secretary, Mr. Lennox-Boyd, replied to questions on the subject in the House of Commons on June 27.

Mr. Lennox-Boyd said that he was sure Members would not be misled by the "campaign of vilification" against the security forces. Nevertheless, the Governor was investigating all allegations which were sufficiently specific to make investigation possible, and he (the Colonial Secretary) would place the results of these investigations in the Library of the House in due course, so that Members could form their own judgment. Resisting the demand for an independent inquiry, Mr. Lennox-Boyd stressed that the lives of those testifying against allegations "made under Eoka pressure" would be placed in jeopardy, and for this reason such an inquiry could not be held. He added: "I am absolutely satisfied that one of the main reasons for this campaign of denigration is to enable Eoka to discover and eliminate all weaknesses in its own organization and methods of operation which have enabled the security forces to make such inroads upon it."

Turkish Demand for Partition of Cyprus.

In a speech at Bursa at the beginning of May, Mr. Menderes declared that partition of the island was "the maximum and final sacrifice that Turkey can make on the Cyprus issue."

Denying Opposition claims that the Turkish Government's Cyprus policy had changed, Mr. Menderes said that "in making this sacrifice, there is no change in our basic aim, although there exists a difference in form between our thesis at the time we went to the London conference and our thesis today." The present policy, he maintained, still safeguarded completely the two fundamental aims of Turkish policy (i) that the Turkish Cypriots should not be forced to live under a regime which they did not want; and (ii) that there should be no danger to the security of Anatolia.

The leaders of the Turkish Cypriot community (Dr. Kutchuk and Mr. Kaymak) visited Ankara from April 2-May 10 for consultations with the Turkish Government on the situation arising from Archbishop Makarios's release.

In a press statement on April 3, Dr Kutchük said that enmity between the two communities in Cyprus had reached such a pitch that they could not possibly live together under the same regime, and the only acceptable solution, therefore, was partition. He also stressed that neither he nor any other Turkish Cypriot representative would be prepared to participate in any meeting at which Archbishop Makarios was present.

Visit of British Defence Minister to Cyprus.

The U.K. Minister of Defence, Mr. Duncan Sandys, visited Cyprus from April 23-25, being accompanied by the Chairman of the Chiefs of Staff Committee, Marshal of the R.A.F. Sir William Dickson.

In a statement on April 25, Mr Sandys said that the primary purpose of his visit had been to discuss with the Governor and Service chiefs the role which British forces based on Cyprus, would play in support of NATO, the Baghdad Pact, and other British responsibilities in the Middle East Among other things, he had examined "special problems which will arise if continued political deadlock in the island should make it necessary to consider partitioning Cyprus." After saying that Cyprus, by becoming a base for nuclear weapons, could make a great contribution to the deterrence of war and Communism, Mr. Sandys added "I feel that when the Cypriots think it over, they will wish to play their part in helping us to prevent a global nuclear war." In conclusion he expressed the hope that it might be possible "before very long" to reduce the number of British troops in Cyprus because of the "outstanding success" achieved in the anti-terrorist campaign.

British Protest to United Nations.

In a letter to the U.N. Secretary-General on May 13, Sir Pierson Dixon (British permanent representative at the U.N.) expressed the British Government's regret at the "unconciliatory attitude" of the Greek Government on the Cyprus question.

The letter stated that, after the passing of the U.N. resolution of Feb 26, it might have been expected that the Greek Government would do everything in its power to further the prospects of a solution of the dispute. Unfortunately, however, it had refused to participate in direct negotiations between the three countries concerned and had also rejected the offer of mediation made by the Secretary-General of NATO. The letter added that the Greek Government had arbitrarily sought to establish its own interpretation of the Assembly's resolution—an interpretation which would apparently preclude the Greek Government from regarding itself as an interested party. Sir Pierson Dixon concluded: "It is impossible to reconcile that stand with the previous Greek attitude both inside and outside the United Nations."

House of Lords Debate.

The Cyprus question was debated by the House of Lords on April 11, during the course of a general two-day debate on the Middle East.

The debate was opened by **Earl Attlee,** who doubted whether Cyprus would be of much value as a base. He said in this connexion: "Cyprus is to be an advance site for launching weapons of mass destruction. It also makes it a sitting target for the receipt of weapons of mass destruction. I cannot think the Cypriots will welcome that privilege." A small island, he continued, was not a suitable site for launching such weapons; what was required was a wide area where they could be moved from place to place, and Turkey was the obvious choice for this. On the question of the resumption of negotiations, Earl Attlee declared: "It is no good haggling or niggling about details, such as saying that the Archbishop must not go to Cyprus. Make up your mind to do it in a big way if you are going to do it."

The **Earl of Perth,** Minister of State for the Colonies, maintained that the Government's recent moves, including the release of Archbishop Makarios, were "from strength, not weakness." He went on: "When the Government judges that the time is opportune, it intends to invite representatives of Greek and Turkish Cypriots to a meeting in London to discuss the internal problems of Cyprus. Our present thought is that the Radcliffe Constitution will be the agenda." The Minister concluded by deploring the recent statements of Archbishop Makarios, which, he thought, were neither the words of a statesman nor of one desirous of a settlement in Cyprus.

The **Archbishop of Canterbury** felt that the Government had shown "sheer generosity" in releasing Archbishop Makarios, and said that it was up to the Greeks, Cypriots and Turks to respond with concessions similar to this "generous, healing, reconciling act" He expressed the hope that Archbishop Makarios would exercise restraint in his public statements, since "some things have already been said . . . which can only be regarded as unhelpful." On the possibility of partition, the Archbishop remarked: "I believe it would be a counsel of despair, and I am sure that Archbishop Makarios detests the thought of it as much as I do. But I fear that if the Archbishop and his advisers, or any others, fail now to take a positive attitude of co-operation and compromise and instead go back to unyielding demands, then this deplorable result of partition, which solves nothing, may become inevitable.'

Lord Lloyd, the former Minister of State for the Colonies, criticized the release of Archbishop Makarios as a "reversal of policy," saying: "To the world it must seem that the Government has climbed down and the Archbishop has gained a notable victory. It means the achievement of political aims by violence." **Lord Milverton** also supported this view.

The **Earl of Listowel** (Colonial Secretary in the Labour Government) said that the Government should now declare their willingness to start immediate talks in London with Archbishop Makarios and other leaders of both communities in Cyprus, and should invite the Archbishop to London for informal preliminary discussions. The Radcliffe Constitution should be regarded "not as holy writ but as a document susceptible to alteration in the light of arguments and criticisms voiced at the talks."

Replying to the debate, **Lord Kilmuir** (the Lord Chancellor) said that "when the time comes for talks with representatives of all Cypriot communities on Lord Radcliffe's proposals, Archbishop Makarios will certainly be one of the Greek Cypriot representatives. But the Government is not prepared to accept him as the sole representative of Cypriot opinion." He added "The delicacy of this whole problem is the balance between the Turkish and the Greek interests. If we appeared to be taking the Archbishop as the representative of the whole range of the people of the island, we should do immense harm." As regards the Archbishop's release, Lord Kilmuir said that the Government had taken this risk as part of its efforts to secure the implementation of the Radcliffe proposals.

House of Commons Debate.

The Cyprus question was also debated in the House of Commons on July 15 at the request of the Opposition.

Mr. James Callaghan (Lab.), the principal Opposition spokesman, asserted that the Government was divided on the matter and that its only policy since the Eoka truce had been one of "indecision and drift." All it had done was "to give Eoka the opportunity of regrouping and Archbishop Makarios the opportunity of stating his case throughout the world." Lord Salisbury, he declared, had been right to resign from the Government, inasmuch as Archbishop Makarios had been released without meeting the condition previously imposed by the Government—viz., that he should call categorically for a cessation of violence.

After calling on the Government to dismiss the idea of partition as "ridiculous," Mr. Callaghan went on to discuss the use of Cyprus as a base. The Government, he contended, had performed a "strategic somersault" and had consequently been guilty of a great waste of public money in spending or committing £12,500,000 in the last three years on military installations in the island, whereas the Minister of Defence had recently made it clear that the whole island was not needed as a base but merely "a couple of airstrips" for atomic bombers.

Urging an independent inquiry into the allegations of brutality by the British security forces, Mr. Callaghan said that he was certain that Sir John Harding would not tolerate the use of brutality if he were aware of it. But as the allegations were so widespread, more was required than a simple denial on the Governor's part. Turning to the question of the Governorship generally, he said that Sir John Harding had succeeded in bringing the period of violence to an end but should now be replaced by a civilian (possibly an ex-member of the Government Front Bench) with some knowledge of political matters.

As to Turkey's position in the dispute, Mr. Callaghan said that the Government should "not allow the Turks to blackmail them." He added: "We cannot afford to put the Turks in a position where, by using 20 per cent of the population of Cyprus, they are able to stop any forward move for the remaining 80 per cent."

Mr. Profumo (Under-Secretary, Colonial Office), replying for the Government, dealt first with the allegations of brutality by British forces, which, he said, had emanated in the first instance from people—Eoka members or sympathizers—who had shown themselves indifferent to every civilized principle. The other source of the allegations had been Archbishop Makarios. "For any man who claims to be a responsible statesman deliberately to promote a smear campaign of this sort is serious enough," Mr. Profumo declared, "but for a leading figure of the Church to do so without assuring himself first of all the facts is, in my mind, to throw all responsibility to the winds."

Denying that the Government had been "dragging its feet," Mr. Profumo said that, on the contrary, all the initiative had come from them and nothing but intransigence from those who sought to represent the people of Cyprus. "So far," he went on, "the Archbishop has not taken a single constructive step on behalf of his weary people. Rather has he seemed to care more for his own personal position." The Government, in fact, were hoping to take a further initiative and would make a statement when the Minister of Defence had completed his examination of the strategic position. As regards partition, he believed that while it was not an ideal solution, it was a possibility which had to be taken into consideration.

In conclusion, Mr Profumo said that there were two possible actions which would contribute greatly towards a solution of the problem. First, if Colonel Grivas and his associates were to accept the Government's safe-conduct offer, the Cypriots would be able to "live and speak their true thoughts again" without fear. "With the lifting of one little finger," declared Mr. Profumo, "Archbishop Makarios could bring this about. I can only presume it suits his personal ends to have a smouldering Eoka organization gagging his countrymen." Secondly, much would be gained if the Opposition were to deny categorically the widely-held belief—especially in Greece—that they would grant immediate self-determination to Cyprus if returned to office.

Mr. Callaghan, intervening, said that the Labour Party believed that there should be a period of "considerable" length in which political parties should be allowed to grow up in Cyprus, whilst at the end of that period the Cypriots should have the right to determine their future.

Mr. Clement Davies (Lib.), urged an end to recriminations on all sides, and suggested that a round-table conference should be held without preliminary conditions and with the sole object of a fair and final settlement.

Mr. Patrick Maitland (Ind. Conservative) said that as both Malta and Mombasa were too far away, Britain must continue to hold Cyprus for the protection of the sea lanes in the Eastern Mediterranean. He believed that a solution was possible on the basis of dual nationality, whereby Cypriots could enjoy either Greek and British or Turkish and British nationality. If there was any kind of arrangement involving the abdication of British sovereignty over the island, it would be said up and down the country that Britain had become an American satellite and had submitted to American pressure.

Sir Frank Soskice (Lab.), the final Opposition speaker, said that although there had been no violence in Cyprus since March, the Government had simply "sat back in a state of absolute paralysis" and had done nothing to dispel the "uneasy calm" in the island. He criticized the Government's reply to the Archbishop's request for bilateral negotiations, saying that it was "wholly in keeping with the attitude which has characterized the Colonial Secretary throughout the tragic series of events." After urging Mr. Lennox-Boyd to reject the idea of partition *in toto*, Sir Frank reiterated Mr. Callaghan's plea for an independent inquiry into the allegations of brutality, while pointing out that the Labour Party disassociated itself entirely from these allegations.

Mr. Lennox-Boyd, replying to the debate, refuted the charge that the Government had failed to take any initiative in recent months. Dealing, as they were, with the destinies of great nations, they had to allow the matters under discussion to be pondered in three capitals, and hasty conclusions were out of the question. As regards the Turkish attitude to the problem, Mr. Lennox-Boyd said that while the Turkish people were naturally concerned about the Turkish Cypriot minority, their main concern was really with the geographical proximity of Cyprus to the Turkish mainland. He rejected the Opposition's plea for an inquiry into the allegations of brutality, on the ground that the lives of witnesses who testified against the allegations would be placed in jeopardy. In conclusion, Mr. Lennox-Boyd said that the chances of a solution would be greatly improved if "Greek and Greek-Cypriot intransigents" were given a clear indication that the Opposition, if returned to power, would not adopt a policy more favourable to them.

To indicate its dissatisfaction with the Government's Cyprus policy, the Opposition moved a token reduction in the Vote of the Colonial Office. The amendment to this effect was defeated by 326 votes to 260, a Government majority of 66.

Internal Developments in Cyprus.

No terrorist incidents took place in Cyprus during the period under review, Eoka having suspended its operations in accordance with its offer of March 14 that it would do so if Archbishop Makarios were released (see 15469 A, page 15474). In a letter to the Mayor of Famagusta on June 5, however, the Administrative Secretary (Mr. Reddaway) stated that there were indications that Eoka was "attempting to regroup the remnants of its scattered gangs" and that this could only mean that it "plans at a future date to resume its campaign of murder and intimidation." [For further details of this letter see page 15653, first column.]

The Anti-Terrorist Campaign.

Anti-terrorist operations continued during this period but proved less fruitful than previously, the reasons being (*a*) that earlier operations had greatly reduced the number of terrorists; and (*b*) that those who remained at large were inactive and thus more elusive.

The most outstanding success scored by the security forces was the capture on April 19 of the last of the mountain gangs in the Lefka district, in the west of the island. The gang consisted of seven men, two of whom (George Demetriou, the leader, and Mikis Firillas, his second-in-command) had prices of £5,000 on their heads. Among those captured was Neofytos Sofocleous, a former servant at Government House, who disappeared on the day in March, 1956, when a bomb was discovered under Sir John Harding's bed (see 14757 A). Weapons recovered included two machine-guns, a Sten gun, an Italian rifle and three shotguns.

Trials of Eoka Terrorists.

A summary is given below of the more important trials of terrorists since the beginning of April.

(1) Five Greek Cypriots were sentenced to death on April 5 after being found guilty of discharging firearms at members of the Security forces at Lyssi, near Famagusta, on Feb. 10. The Cyprus Supreme Court, however, quashed the sentences on May 2 and ordered a retrial on the grounds that the evidence submitted during the trial had not been translated for the benefit of the accused. At the retrial on May 15, the five men were each sentenced to 10 years' imprisonment on a reduced charge of possessing shotguns.

(2) Three Greek Cypriots were sentenced to life imprisonment on April 11 after pleading guilty to the possession of weapons and explosives found in a house at the village of Kannavia.

(3) Eight Greek Cypriots were sentenced to life imprisonment on April 24 on charges of possessing arms and ammunition. Those sentenced included Nicos Spanos and Polycarpos Georghadjis, both of whom had prices of £5,000 on their heads before capture.

(4) A Greek Cypriot student, Andreas Karacostas, was found not guilty on May 8 of discharging a firearm at a retired British officer at Kyrenia in November, 1956. Giving judgment, Mr. Justice John said that there was some doubt about alleged ill-treatment of the accused; in addition, the accused had been induced to make a confession by promises which were not fulfilled, viz., that no charge would be brought against him and that he would merely be sent to the Pyla detention camp.

(5) A Cypriot Greek policeman, Andreas Houvardas, was sentenced to life imprisonment on May 13 for possession of an arsenal of weapons and explosives in his Nicosia home [see page 15479].

(6) The first Greek national to be convicted under the emergency regulations, Argyrios Karadymas, was sentenced to 10 years' imprisonment on May 20 after pleading guilty to the possession of a large quantity of arms, ammunition and explosives discovered in the house of the village priest of Sarandi.

(7) Nicos Sampson, a Greek Cypriot journalist, was sentenced to death on June 2 on charges of (i) carrying a Sten gun, and (ii) aiming it at four British policemen who had arrested him in the village of Dhali on Jan. 30. Sampson had previously been acquitted on May 23 on a charge of murdering a British police sergeant in September 1956.

The latter trial was notable for the disallowal of two statements alleged to have been volunteered by the accused, and for the criticism made by the presiding Judge (Mr. Justice Bernard Shaw) of the treatment accorded to the accused after his arrest. Mr. Justice Shaw stated:

"The treatment which the accused received was not the treatment which should be given to any person, whether convicted or unconvicted. In 47 years, I can recall no case where the Crown set out to prove a confession and yet had to admit that the accused received the sort of treatment this man received. I find it difficult to understand how these brave police officers acted in the way they did. They cannot complain if the Court entertains doubts that the confession was free and voluntary. I notice that the accused only talked after making a journey from the place where he was arrested to Nicosia. It was a journey in disgraceful circumstances. The treatment of the accused in the open truck was quite unconscionable. I cannot accept that it was necessary to travel in these circumstances. Quite deliberately the accused was allowed to set off without boots and socks, lying face downwards in an open truck during pouring rain. That shows the police attitude towards the accused."

On the other hand, Mr. Justice Shaw praised the police for their courage in arresting Sampson in extremely dangerous circumstances; found that he had not been tortured in any way; and declared that Sampson, in giving his evidence, seemed to be "grossly exaggerating practically everything."

A Cyprus Government statement of May 27 referred to Mr. Justice Shaw's findings in the Sampson trial as proof that allegations that the Cyprus police employed brutal methods of interrogation were without foundation. The statement pointed out that Mr. Justice Shaw had found that "Sampson was certainly not tortured in any way" and had thus "cleared the Cyprus police of allegations made against them in open court." It added: "Such criticism of the police as Justice Shaw saw fit to make . . . was for acts of omission and was largely based on evidence by police officers themselves."

The death sentence passed on Sampson on June 2 was upheld by the Cyprus Supreme Court on June 21 in respect of the first charge on which he had been convicted (i.e. carrying a Sten gun), although the court rejected the second charge on which it had been based (i.e. aiming it at the policemen arresting him). It was announced on the same day that, if leave were given, an appeal would be made to the Privy Council.

(8) A Greek Cypriot, Michalis Thrassyvoulides, was acquitted on June 4 of a charge of murdering a fellow Greek Cypriot at Limassol on March 11, 1956. The Judge said that there had been no corroboration of the accused's allegation that he had been ill-treated by the police, but that he (the Judge) had found some truth in the defendant's claim that he was promised that he would not be prosecuted if he made a confession.

(9) Michalakis Rossides, a Greek Cypriot, was sentenced to death on June 6 for the murder of Private R. Shilton of the Royal Leicestershire Regiment in May, 1956, as a reprisal for the execution of two terrorists [see page 14901]. The sentence was upheld by the Cyprus Supreme Court on June 28. Rossides' lawyers announced that they would seek leave to appeal to the Privy Council.

During the period under review the Cyprus Supreme Court set aside three sentences (including two death sentences) passed in the period before Eoka suspended its terrorist operations.

The two death sentences in question were quashed on April 25, retrials being ordered in both cases. In the first case (that of Nicos Sofocleous, who had been found guilty of the the murder of a Cypriot lawyer), the court found that the evidence of English-speaking witnesses had not been translated for the accused's benefit at the trial on Feb. 8, while in the second case (that of Christos Lambrou, who had been sentenced for shooting at and wounding a British warrant-officer), the Court ruled that there had been certain irregularities at the trial on Feb. 21 which were "so serious as to prejudice the accused."

Subsequently (May 21), in the first case to come before it involving defence allegations of ill-treatment, the Supreme Court upheld an appeal by a Greek Cypriot found guilty of placing a bomb in Kyrenia in August, 1956, and set aside the 10-year prison sentence Explaining the decision, Chief Justice Bourke said that there was reasonable doubt as to whether a confession made by the accused was free and voluntary.

Four death sentences imposed in the period before the Eoka truce began were commuted by the Governor to life imprisonment or ten years' imprisonment.

Emergency Regulations relaxed for British Servicemen.

In view of the suspension of terrorist operations, certain restrictions on the activities of British Servicemen were abolished during April.

It was announced on April 11 that (for the first time for nearly two years) British troops could go about unarmed in the principal towns, only those on special guard or escort duty being required to carry arms. Further relaxations were introduced on April 15 (i) the walled city of Nicosia, which had been "out of bounds" to troops since Feb. 13, 1956, would be "in bounds" during the hours of daylight; (ii) the shutters on Servicemen's houses would no longer require to be kept closed; and (iii) Servicemen could go bathing on any beach and picnic anywhere in the island.

Correspondence between the Administrative Secretary and Greek Cypriot Mayors.

In a letter sent on June 5 (see above), the Administrative Secretary, Mr. Reddaway, rejected a request from the mayor of Famagusta that Cypriots held under the emergency regulations should be released.

After noting that Eoka, while offering to suspend operations "following a succession of severe defeats," had given no indication that it had decided to abandon the use of violence, Mr. Reddaway stated that in these circumstances "it would be an act of the utmost folly, and inconsistent with its duty to law-abiding citizens, for the Government to release persons who are known to have played a prominent part in the Eoka terrorist organization.

Mr. Reddaway went on to suggest that, until terrorist methods had been permanently renounced, the most positive contribution which the mayors and other leading figures could make would be to declare publicly that terrorism could not be countenanced and that, if it were resumed, they would do all in their power to assist the security forces in bringing its perpetrators to justice.

In a further letter of June 9 to Dr. Dervis, the mayor of Nicosia and spokesman for all the Greek Cypriot mayors, Mr. Reddaway deplored the mayors' failure to denounce violence and accused them of condoning and defending terrorism as a political weapon.

Mr. Reddaway's letter was in reply to a communication from the mayors in which they said that what the Government called terrorism was really "the exasperation of the people, who have lost patience after trying peacefully to achieve their rights."

In reply to a letter making certain suggestions for the improvement of the situation in the island, Mr. Reddaway asked the mayor of Morphou on June 17 if he would be willing to appeal to Archbishop Makarios to order Colonel Grivas to leave the island. The letter said:

"It was Archbishop Makarios who invited Grivas to Cyprus in 1951 in order to lay the foundation of the terrorist organization, and in 1954 to be the terrorist field commander. Grivas himself recorded that he was prepared to lay down arms at the bidding of Makarios. This kind of appeal by you to Makarios would be a constructive step to restoring lasting peace in Cyprus."

The mayor of Morphou rejected Mr. Reddaway's suggestion on June 23, saying that while the Government might consider Grivas a criminal, it should have realized long ago that in the eyes of most Greek Cypriots he was "a liberator."

Resignation of Turkish Municipal Councillors.

All the 18 Turkish municipal councillors in Cyprus resigned on June 3 in protest against the "complete disregard by Greek mayors and councillors of Turkish rights and interests in municipal affairs."

In telegrams advising the Governor, the Turkish Prime Minister, and the U.N. Secretary-General, of their decision, the Turkish councillors declared that "the rights of Turkish citizens are not effectively protected in Municipal Councils owing to the fact that their rights and interests are left at the will and mercy of the majority, and that the majority, who have absolute control of the municipalities, exploit their position by taking advantage of every incident, thereby turning the Municipal Councils into political organizations in order to achieve their own political aspirations."

Greek Memorandum to United Nations.

The Greek Government published on July 15 the text of a letter, delivered on that date to the U.N. Secretary-General, which requested the inclusion of the Cyprus question in the agenda of the next General Assembly session, in view of the British Government's alleged failure to comply with the resolution of Feb. 26, 1957 [see page 15473]. Specifically, the letter asked for the inclusion of the following two items:

(1) The application, under U.N. auspices, of "the principles of equal rights and self-determination of peoples in the case of the population of the island of Cyprus."

(2) The "violation of human rights and atrocities by the British Colonial administration against the Cypriots."

The Greek Government also stated that the above-mentioned charges would be supplemented by a "detailed report" to the U.N. Secretariat.—(Times - Daily Telegraph - Manchester Guardian - Turkish Embassy Press Department, London)

A. UNITED STATES. — Anti-Trust Legislation. - Supreme Court Decision on du Pont Holdings of General Motors' Stock.

The U.S. Supreme Court ruled on June 3, by four votes to two, that E. I. du Pont de Nemours & Co. (the leading chemical manufacturing concern in the U.S.A.) had violated the Clayton anti-trust Act of 1914 by holding 63,000,000 shares in the General Motors Corporation. These shares, with a market value of $2,677,000,000, constituted 23 per cent of General Motors' share capital and therefore provided a controlling interest. The Court's ruling was also based upon the finding that du Pont had used its stock-holding to obtain a preferential position in its trade with General Motors, and that it supplied the Corporation with two-thirds of its paint and one-half of its fabric requirements.

The majority decision was given by Chief Justice Warren and Justices Brennan, Black and Douglas, while Justices Burton and Frankfurter dissented.

The connexion between du Pont and General Motors began in 1918, when du Pont invested $25,000,000 in the Corporation and immediately gained a controlling interest. This investment was later enlarged and $75,000,000 worth of shares were added in 1951, following which the General Motors' stock was split three-for-one. The 63,000,000 shares currently owned by du Pont represent the largest investment held by any corporation in the United States in another; it had continued to grow during the last eight years, despite the fact that the Government had instituted litigation against du Pont in order to stop this trend.

The Government's case, which the Court upheld, was based upon two legal points in the Clayton Act. The original Act had been designed to strengthen legislation against restraints of competition and trade, and its clauses forbidding exclusive contracts and interlocking mergers had been used subsequently to break up the "horizontal" integration of Standard Oil and the concentrated ownerships of the moving-picture producers and distributors. A special amendment to the Act was passed in 1950 which laid down that these prohibitions, as stated in Clause Seven, applied as much to "vertical" as to "horizontal" integrations.

The Court accepted the Government's contention relating to Clause Seven that (i) stock acquisitions by one industry in another ("vertical" integrations) were as liable to prosecution under the Clause as monopolistic controls ("horizontal" concentrations) within an industry; (ii) that only a "probable" lessening of competition, or tendency to monopoly, need be proved at the time the Government brought the suit, and that it was not necessary that this condition had already existed when the acquisition was made.

On questions of fact, the Court found (i) that du Pont's acquisition of General Motors' stock had given it a controlling interest, and (ii) that "du Pont purposely employed its stock to pry open the General Motors market to entrench itself as the primary supplier of General Motors' requirements for automotive finishes and fabrics."

The Supreme Court charged the District Court in Chicago (whose earlier decision it had reversed) to determine the "equitable relief necessary and appropriate in the public interest to eliminate the effects of the acquisition." Justices Burton and Frankfurter, in their dissenting opinion, disagreed with the majority ruling both on points of law and of evidence, and held that there had been "no misuse of stock interest." A. UNITED KINGDOM. — Report of Royal Commission on the Law Relating to Mental Illness and Mental Deficiency. - Government Acceptance.

The report of the Royal Commission on the Law relating to Mental Illness and Mental Deficiency (Cmd. 169) was published on May 29, 1957.

The decision to set up a Royal Commission into this subject had been announced in the House of Commons on Oct. 22, 1953 by Sir Winston Churchill, then Prime Minister. Sir Winston said that the Government realized that it was necessary to bring the existing law into line with modern thought and development, but considered that there should first be a comprehensive review of the subject by an independent body.

The Commission's terms of reference were as follows :

" To inquire, as regards England and Wales, into the existing law and administrative machinery governing the certification, detention, care (other than hospital care or treatment under the National Health Service Acts), absence on trial or licence, discharge and supervision of persons who are or are alleged to be suffering from mental illness or mental defect, other than Broadmoor patients [Broadmoor is the State asylum for the criminally insane] ;

" To consider, as regards England and Wales, the extent to which it is now, or should be made, statutorily possible for such persons to be treated as voluntary patients without certification , and to make recommendations."

Asked why Scotland had not been included in the Commission's terms of reference, Sir Winston Churchill had pointed out that Scots law on the matter differed from that in England and Wales, although the possibility of a separate Scottish inquiry had not been ruled out. He added : " I think it would be a pity to mix them together. It seems certain that one will lead to the other, and at any rate we will take no decision to the contrary."

It was subsequently announced on Jan. 17, 1954, that the chairman of the Commission would be Lord Percy of Newcastle, a former President of the Board of Education (1924-29).

The other members were announced on Feb. 4, 1954, as follows : Mrs. E. D. (later Lady) Adrian ; Mr. Claude Bartlett ; Mrs. E. M Braddock, M.P. ; Sir Walter Russell Brain ; Mr. H. B. H. (later Sir Harry) Hylton-Foster, Q.C., M.P , Mr. R. M. Jackson ; Sir Cecil Oakes , Dr. T. P. Rees , Dr. D. H. H. Thomas ; and Dr. J. G. Wilson

On his appointment as Solicitor-General in October, 1954, Sir Harry Hylton-Foster resigned from the Commission and was replaced by Mr. J. E. S. Simon, Q C., M.P. Mr. Simon, in turn, also resigned following his appointment as Parliamentary Under-Secretary, Home Office, in January 1957.

In its report of May 29, 1957, which was unanimous, the Commission recommended fundamental changes in the present law and administrative arrangements relating to mental health. The main trend of its recommendations, the Commission observed, was to reduce the use of compulsory powers so that, as far as possible, suitable care could be provided for the mentally disordered, with no more legal formality or restriction of liberty than was the case with those requiring care because of physical illness, disability, or social difficulty. For the implementation of its proposals, the Commission proposed that the existing legislation (the Lunacy and Mental Treatment Acts, 1890-1930, and the Mental Deficiency Acts, 1913-38)—based as it was " on general assumptions and attitudes current in the late 19th and early 20th centuries, many of which are no longer generally accepted "—should be repealed *in toto* and replaced by a single new Act laying down the circumstances in which compulsory powers might be used in future, as well as the procedures to be followed.

The Commission's main recommendations are summarized below under cross-headings :

Abolition of the Board of Control. The Board of Control, which was set up in 1913 to deal with lunacy and mental deficiency, should cease to exist as a separate department because there was no longer any need for it now that the Ministry of Health had general responsibility for all hospitals.

Classification of Patients. For general administrative purposes and for regulating the use of compulsory powers, three main categories of patients should be recognized in future : (i) mentally ill ; (ii) psychopathic ; and (iii) severely subnormal, instead of two as formerly, viz., mentally ill and mentally defective. This step would abolish the use of the term " mental defectiveness," which, as currently applied, covered a very wide range of types of mental disorder and had given rise to medical controversy and public misunderstanding.

As regards the new classification, " mentally ill " would cover the same range of disorders as hitherto, including the mental infirmities of old age ; the " psychopathic " group would include those with aggressive or inadequate personalities recognized medically as pathological but not as " severely subnormal " ; whilst the designation " severely subnormal " would apply where the general personality (both intelligence and temperament) made the patient incapable of an independent life

In proposing the above classification, the Commission nevertheless believed that any statutory definition of the terms, as in the existing law on mental deficiency, would do more harm than good.

Compulsory Powers. The assumption " that compulsory powers must be used unless the patient can express a positive desire for treatment " should be abandoned In the case of those in the " mentally ill " and " severely subnormal " categories, the compulsory powers available should remain much the same as hitherto, but should be exercised less commonly and with a greater number of safeguards. In the case of psychopaths under 21, compulsion should continue to be used if considered necessary for the patient's own welfare or the protection of others, but the power of detention should lapse when the patient reached 25, unless his admission to a mental institution had followed court proceedings. Psychopaths over the age of 21 should be liable to compulsory powers only for a period of not more than 28 days' psychiatric observation. As regards psychopaths convicted of a criminal offence, prolonged compulsory powers should be available if ordinary penal measures were insufficient or inappropriate.

The term " certification," hitherto used to describe the procedure which must be followed when compulsory powers were used, should be dropped because of the connotations which it had acquired. It was widely believed, the Commission said, that certification implied that the patient was permanently deranged or dangerous. This, however, was not the case ; from the medical point of view, in fact, there was often no difference between the illnesses of certified and voluntary patients. The Commission hoped that the future procedure for the use of compulsory powers would be recognized by the public as simply the best method of ensuring proper treatment, with no implication as to the length or cause of the patient's illness.

Contrary to the present procedure, under which there were separate legal codes for the mentally ill and the mentally defective, the procedure to be followed in future should be the same for all types of patients. There should be two medical recommendations, one by a psychiatrist and one preferably by a doctor who was personally acquainted with the patient ; in emergencies, one medical recommendation would be sufficient, but a second would have to follow within three days. [At present, compulsory powers can be used on the basis of a single certificate signed by any doctor and, in emergencies, without any medical opinion at all.] In addition, the existing arrangement whereby a magistrate was required to sign an order for admission to a mental institution should be abolished. The Commission noted that this was normally a formality, and thought it inappropriate that a person not medically qualified should be required to state an opinion on the condition of a patient, even with professional advice.

Mental Health Review Tribunals. These bodies should be set up on a regional basis so that patients (or their relatives) could, if they wished, ask for an independent investigation into the need for their detention. The tribunals would have medical and non-medical members appointed by the Lord Chancellor in consultation with the Minister of Health, and would have power to discharge patients on specific occasions. Patients would have access to these tribunals : (*a*) at any time within six months after admission to a mental hospital, if the hospital authorities were unwilling to exercise the right of discharge ; and (*b*) whenever the period of validity of compulsory powers was extended. In addition, there should be a right of appeal to the High Court, but on points of law only.

Voluntary Admission. The existing legal formalities governing voluntary admission to mental hospitals should be abolished, so that in future admission to a mental hospital would be exactly the same as admission to any other hospital.

Patients Already in Hospital. The cases of those already in mental hospitals when the new arrangements came into force should be reviewed so that as many as possible of those subject to compulsory powers could be decertified and could remain to receive care and training on a voluntary basis. The Commission expected that a " considerable " number would fall into this category.

Community Care. Local authorities should be responsible for providing all types of community care (including residential care) for patients who either did not need hospital treatment or training, or, having received it, were ready to return to the community. Services of this type should be considerably expanded and, to help this process, Exchequer grants might be given towards the cost of building residential accommodation for patients without a satisfactory home.

In reply to a debate on a motion taking note of the Royal Commission's report, the Home Secretary (Mr. R. A. Butler) stated in the House of Commons on July 8 that the Government proposed in due course to introduce legislation embodying the Commission's recommendations. He could not give an undertaking, however, as to when such legislation would be introduced, since there would first have to be consultations with all the bodies concerned—Parliament, local authorities, and voluntary organizations. The report was welcomed on behalf of the Opposition by Dr. Edith Summerskill who said that its proposals, when implemented, would " make history in the field of mental health." The motion was agreed to after a general debate in which support for the Royal Commission's recommendations was expressed by Members on both sides of the House. (Times - Daily Telegraph - Manchester Guardian)

A. UNITED STATES. — The Richards Mission to the Middle East and North Africa. - "Eisenhower Doctrine" supported by Lebanon, Libya, Turkey, Persia, Pakistan, Iraq, Israel, Greece, Tunisia and Morocco.

Mr. James P. Richards, the former chairman of the Foreign Affairs Committee of the U.S. House of Representatives, and special assistant to President Eisenhower on Middle Eastern problems, left Washington on March 12 as the President's special envoy charged with the task of explaining the "Eisenhower doctrine" to the Governments of the Middle East countries. His itinerary was not arranged rigidly in advance, the intention being that the mission should be available for discussions with any country in the area which expressed a wish for them. The various stages of the mission's journey and the results of its talks are described below.

Lebanon. Mr. Richards arrived in Beirut on March 14, a joint statement being issued on March 16 following his talks with President Chamoun, M Sami Solh (the Lebanese Prime Minister) and Dr. Malik (Foreign Minister). It announced (1) that the Lebanese Government supported the "Eisenhower Doctrine"; and (2) that Mr Richards had agreed "in principle" that the U.S. Government should provide the Lebanese Government with "certain equipment needed to strengthen the Lebanese armed forces, in addition to a recent grant of military equipment for the same purpose."

The statement also announced agreement on a number of general principles, including the determination of both countries to defend their political independence and territorial integrity, to choose their own forms of government and of social and cultural life; and to oppose "any form of intervention or interference in the internal affairs of one State by another." It also expressed the conviction that "international Communism is incompatible with national independence and constitutes a cause of permanent trouble for world peace and security," and declared that "both countries would work through the U.N. and by all other peaceful means towards just solutions of the various problems which create tension within the area."

As a further result of the mission's negotiations, the State Department announced on April 4 that $10,000,000 in economic aid would be granted to the Lebanon.

The Lebanese Government's policy of support for the "Eisenhower Doctrine," and its acceptance of U.S. military and economic aid, was approved by the Lebanese Parliament on April 6 by 30 votes to one after a three-day debate.

Libya. A communiqué issued in Tripoli on March 21 after talks between Mr. Richards and the Libyan Prime Minister, Mustapha Ben Halim, stated that the discussions had revealed "an identity of interest" on President Eisenhower's plan. The communiqué described "the aggressive intentions of international Communism . . . as the greatest present threat to national independence and the peace and security of the world community"; declared that the two countries had agreed to co-operate in the successful application of the "Eisenhower Doctrine"; and also announced that additional U.S. economic aid would be provided to Libya.

Mr. Richards paid a further brief visit to Tripoli on May 5, when it was agreed with the Libyan Government that U.S. economic aid would be concentrated on the following subjects: a general survey of Libyan development needs; broadcasting; education, electric power development; communications; and water supplies.

Turkey. After his first visit to Libya, Mr. Richards arrived in Ankara on March 21. After discussions with M. Adnan Menderes (the Prime Minister) and other Turkish leaders, it was announced on March 22 (i) that both countries had agreed to continue their co-operation in counteracting the influence of international Communism in the Middle East and in enabling the independent countries of that area to resist any attack from Communist quarters; (ii) that the U.S.A. was "prepared to offer financial assistance towards several joint projects of a regional nature which have been considered by the Economic Committee of the Baghdad Pact."

Persia. Following talks in Teheran between Mr. Richards and the Persian Prime Minister, M. Hussein Ala, it was announced on March 27 that the U.S. Government would (i) provide increased finance for the large military construction programme now being undertaken in Persia, in addition to further equipment for the Persian armed forces; (ii) offer assistance for joint projects in the region which had been or might be approved by the Economic Committee of the Baghdad Pact.

The statement reaffirmed Persia's endorsement of the "Eisenhower Doctrine" and emphasized that the U.S.A had no territorial designs in the Middle East nor any desire to create a "so-called sphere of influence."

Pakistan. In Karachi, where Mr. Richards arrived on March 27, a joint communiqué was issued on March 31 on his discussions with President Mirza, Mr. Suhrawardy (the Prime Minister), Mr. Firoz Khan Noon (Foreign Minister), and Mr. Syed Amjad Ali (Finance Minister).

After declaring that "Communist imperialism, through overt aggression or internal subversion, constitutes a direct threat to the national aspirations of the peoples of the Middle East, which if allowed to develop would jeopardize the independence and freedom of people everywhere," the statement went on: "In reiterating their endorsement of the American doctrine, the Government of Pakistan have expressed their willingness to co-operate with the U.S. Government in securing the peace of the Middle East, to which Pakistan is already committed as a member of the Baghdad Pact. They were pleased to learn of the U.S. decision to join the Military Committee of the Pact. . . . They have also welcomed American efforts to assist in the objective of securing the peace of the area, not only by providing military and economic assistance to the countries of the Middle East region but also by the employment of U.S. forces, whenever deemed necessary, and if requested by any State or States of the Middle East region, in the event of armed attack by forces of international Communism. The determination of both Governments to oppose aggression from any quarter was reaffirmed."

The statement added that the Pakistani Government had suggested "certain economic and military projects as worthy of aid under the American doctrine"; that Mr. Richards had agreed to provide assistance in both fields; and that, in particular, the U.S A. would lend funds to assist in the construction of fertilizer factories. It was also noted that the U.S A. was prepared to finance several joint projects of a regional nature which were being considered by the Economic Committee of the Baghdad Pact

Afghanistan. Mr. Richards arrived in Kabul on March 31 for talks with Prince Sardar Mohammed Daud Khan, the Afghan Prime Minister. A joint statement, issued on April 4, said that Afghanistan had welcomed President Eisenhower's programme of economic aid to the Middle East to help the peoples of the area to raise their standards of living.

Iraq. Following discussions in Baghdad between Mr. Richards and General Nuri es-Said, then Prime Minister of Iraq, a communiqué was issued on April 8 stating (i) that Iraq and the U.S.A. were determined to defend their independence and integrity against the threat of international Communism, and had confirmed their determination to resist "aggression or subversion from any source"; (ii) that Mr. Richards had agreed that "certain additional military assistance should be provided to Iraq" by the U.S A. within the framework of the "Eisenhower Doctrine"; (iii) that the U.S A. would help in the development of Iraq's rail and telecommunications services within the framework of the Baghdad Pact

On the same day Mr. Richards announced that the U.S.A. would provide $12,500,000 to Iraq, Pakistan, Persia, and Turkey (the Middle Eastern members of the Baghdad Pact) for regional projects in the fields of road and rail development and telecommunications.

Saudi Arabia. Mr. Richards arrived in Riyadh on April 9 for talks with King Saud. A joint communiqué (April 12) said that both countries would "continue to oppose Communist activities, other forms of imperialism, and any other dangers threatening peace and stability in the area."

Yemen. During a visit to Sana'a (April 13-15) Mr. Richards saw the Imam of Yemen, the Crown Prince, and other Yemeni leaders. No communiqué was issued, but in a press statement on April 15 Mr. Richards referred to the "friendly spirit" of his talks, which had resulted in "increased understanding of President Eisenhower's policy" and which he hoped would "promote relations between the two countries."

Ethiopia. On April 15 Mr. Richards arrived in Addis Ababa for discussions with the Emperor Haile Selassie and the Ethiopian Foreign Minister, Mr. Habtewold.

A joint communiqué issued on April 18 said, *inter alia*: "The Ethiopian Government . . . gave its cordial support to the American Doctrine, stressing the importance of close collaboration between the countries of the general area of the Middle East. . . . Ambassador Richards welcomed the recognition of the continuing common interest in resisting the threat of international Communism and the establishment of [U.S.-Ethiopian] understanding of the broad identity of interests existing between the two countries. There was complete agreement on the opposition of both Governments to aggression from any source and their determination to use all legitimate means to prevent it.

"The discussions further demonstrated that the Ethiopian and U.S. Governments are anxious to work together to the end that the following principles shall prevail in international relations: (1) the sovereign equality of all nations under the U.N. Charter; (2) the right of all nations to choose their own form of government without interference; (3) non-intervention and non-interference in the internal affairs of one State by another; (4) recognition of the interdependence of nations and the obligation of nations to respect the just rights and interests of other States."

It was also announced that the Ethiopian Government had discussed with Mr Richards "the possibilities of economic and military assistance under the American doctrine," and that Mr. Richards had agreed that the U.S.A. should provide certain assistance in both fields, in addition to other assistance previously agreed upon.

Sudan. In a statement issued on April 22, after talks in Khartoum between Mr. Richards and Sudanese leaders, the Sudanese Government said that it had decided to postpone a decision on Sudanese association with the "Eisenhower programme" pending further study. A memorandum published on the following day enumerated seven points as a basis on which the Sudanese Government would pursue its study of the plan: (1) economic and military aid should be kept separate; (2) acceptance of economic aid should not prevent the Sudan from pursuing a policy of "positive neutrality"; (3) the acceptance of aid should not cause any harm to any Arab country; (4) development schemes to be financed would be proposed by the Sudan, subject to U.S. approval; (5) the Sudan would be given financial aid; (6) the number of U.S. technicians would be limited to those needed for agreed projects; (7) acceptance of U.S. aid would not preclude acceptance of aid from other countries, including the Soviet Union.

On May 28, however, it was announced in Khartoum that the Sudanese Government had decided not to give an opinion on the "Eisenhower programme," to keep the matter in abeyance, and to send no reply to the U.S. Government

Greece. Mr. Richards arrived in Athens on April 29 for discussions with Mr. Karamanlis (the Greek Premier) and other Greek leaders A joint communiqué (May 2) announced that the Greek Government endorsed the "Eisenhower doctrine" and said that the U.S.A. and Greece agreed "that international Communism is a very great danger to freedom and independence, and that continuous vigilance, as well as co-operation and solidarity of all free peoples, is necessary to face it." After stressing that economic aid was essential "to ensure the independence of economically weaker and technically less-developed countries," the communiqué said that Greece had had "ten years' experience of U.S. aid and co-operation, which, without any limitation of her national independence or foreign policy, has protected her freedom and healed her wounds from war and Communist aggression." She therefore believed that under the same conditions "similar results could be achieved" in the case of the Arab countries.

It was commented in the American Press that although Greece was not a Middle Eastern country it had obviously been considered advisable to enrol her support for the "Eisenhower doctrine" because of her close relations with many Arab countries.

Israel. On May 2 Mr. Richards flew to Jerusalem for discussions with Mr. Ben-Gurion (the Israeli Prime Minister), Mrs. Meir (Foreign Minister), and M. Eshkol (Finance Minister). No communiqué was issued, but Mr. Richards said in a press statement that he had been "much encouraged" by the talks.

After a series of Cabinet meetings, the Israeli Government announced on May 21 that Israel welcomed "the support of the U.S.A. for the preservation of the independence of the countries of the Middle East and the development of their economic strength." The statement said that the Israeli Government had reaffirmed its adherence to the following five principles in its discussions with Mr. Richards: (1) In the conduct of international relations Israel was guided by the principles and purposes of the U.N. Charter; (2) in conformity with its obligations under the Charter, Israel was opposed to aggression from any quarter against the territorial integrity and political independence of any country; (3) Israel recognized that every effort must be made to achieve lasting peace, both in the Middle East and throughout the world; (4) she recognized that for the promotion of stability, well-being, and peace in the Middle East it was vital to promote economic development dedicated to the strengthening of national independence; (5) she expressed her appreciation of the interest shown in the development of Israel, and the assistance rendered over many years, by the Government and people of the United States.

[Israel's support of the "Eisenhower Doctrine" was subsequently announced by Mr. Ben-Gurion on June 3 and accepted by the *Knesset* by 59 votes to five, with 39 abstentions -see 15584 B.]

Tunisia. From Jerusalem Mr. Richards flew to Tunisia for talks with the Prime Minister, M. Bourguiba, on May 4. No communiqué was issued, but M. Bourguiba had already publicly expressed his support for the "Eisenhower Doctrine" in a speech on Jan. 11, in which he said that "this policy conforms with our interest and probably with the interests of the entire Arab world."

Morocco. Mr. Richards had talks in Rabat with the Sultan of Morocco and M. Balafrej (the Foreign Minister) from May 6-8. The Sultan indicated afterwards that he was in favour of the "Eisenhower doctrine"; said that he and Mr. Richards were in agreement on its principles; and expressed satisfaction that the U.S.A. was not trying to "substitute one domination for another" [a reference to French fears that the U.S. Government might be trying to take over French economic and political interests in Morocco]. Mr. Richards said in a press statement that though Tunisia and Morocco were not Middle Eastern countries, they could perhaps be included in the Eisenhower plan.

It was announced in Washington on May 2 that President Eisenhower had requested Mr. Richards to return home as soon as possible in order to take part in a bipartisan meeting on the President's foreign aid programme on May 9. The State Department's announcement added: "Since firm arrangements have not yet been made for the Richards mission to visit other countries in the Middle East area, it is envisaged that discussion of the 'doctrine' will be carried out through normal diplomatic channels with such of those countries as may indicate an interest in doing so."

Mr. Richards accordingly returned to Washington on May 8, and on the following day reported to President Eisenhower on the work of his mission. Later on May 9 Mr. Richards gave a nation-wide radio and television broadcast in which he made the following points:

(*a*) Most Middle Eastern countries recognized the danger of international Communism, "although some are more conscious of the menace than others." Nevertheless, none of the countries visited had rejected the "Eisenhower Doctrine." [In a press statement in Tunis Mr. Richards had said that his mission had met with wholehearted approval of the "Eisenhower Doctrine" in 11 of the 14 countries it had visited so far; in the three other countries, although the "doctrine" had been regarded sympathetically, the national leaders had "expressed hesitancy about endorsing it publicly."].

(*b*) The mission had not found any need for an immediate increase in the level of military aid already being administered to several countries in the area as part of the Mutual Security Programme. As regards other military aid, the mission had not attempted to "consider the entire military aspirations of each country" but had "concentrated instead on those things which would give an immediate increase in area ability to resist either overt or covert aggression by international Communism."

(*c*) As regards economic aid, the mission had been particularly interested in projects involving regional co operation and had agreed to help the Baghdad Pact countries in the fields of telecommunications and road construction.

(*d*) The mission had been concerned about the influence of foreign propaganda broadcasts in some countries, and had therefore allocated funds for the expansion of broadcasting facilities in the countries concerned.

In a press statement on May 10, Mr. Richards said that of the $200,000,000 available [under the "Eisenhower plan see 15305 A], a total of $120,000,000 had been allocated to different countries, a little more than half of this sum being in economic rather than military aid. As regards Egypt, he said that the mission had not visited that country because no firm invitation was received, but only vague "intimations" that President Nasser would be pleased to see them.

In a report on his mission to a closed session of the Senate Foreign Relations Committee on May 27, Mr. Richards claimed that the Eisenhower Doctrine "has already achieved a notable success," adding that "this assurance has brought vast relief to countries of the area, especially to those on the borders of the Soviet bloc and especially to the responsible military men." (New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris)

A. UNITED KINGDOM. — Hire Purchase. - Deposit increased for Motor Vehicles.

Mr. Erroll, Parliamentary Secretary to the Board of Trade, announced on May 28 (*a*) that the minimum initial hire purchase deposit on cars, motor cycles, and light vans would be increased from 20 per cent to 33⅓ per cent as from May 29, applying to all new agreements made from that date; (*b*) that the minimum initial deposits on other mechanically-propelled vehicles (i.e., buses, coaches, and lorries of more than 30 cwt. carrying capacity), as well as on machinery and plant, would be reduced from 50 per cent to 33⅓ per cent.

A list of the goods affected by the Order, published by the Board of Trade on the same date, showed that the new minimum deposit rates would also apply to sidecars for motor-cycles and auxiliary motors for bicycles and tricycles, as well as to all capital goods brought within the hire purchase restrictions in February 1956 i.e. shop and office furniture (including typewriters), aircraft, ships and boats, fixed and movable plant, machinery, appliances and apparatus.

The minimum deposit rate for motor cars had been reduced from 50 per cent to 20 per cent on Dec. 20, 1956, because of the difficulties of the automobile industry after the blocking of the Suez Canal and the introduction of petrol rationing. The above-mentioned increase followed the ending of petrol rationing and the recovery in the motor-car trade, the number of new hire-purchase agreements entered into during April considerably exceeding those in March 1957 and April 1956.
(Times - Daily Telegraph) **(Prev. rep. Motor Cars, 15515 A; Capital Goods, 14705 A.)**

B. PAKISTAN. — Agricultural Bank.

The Pakistani National Assembly passed on April 25 a Bill providing for the establishment of an Agricultural Bank to afford credit facilities to farmers with a view to improving and increasing agricultural production. Credit may be provided either in cash or kind, and the bank will also arrange warehousing and storage facilities for farmers and co-operative societies. Not less than 51 per cent of its share capital will be held by the Central Government, while the remaining shares will be offered for subscription to the Provincial Governments and to co-operative societies. (Dawn, Karachi)

C. SINGAPORE.—Legislative Assembly By-elections.

The two by-elections to the Singapore Legislative Assembly caused by the resignations of Mr. Lee Kuan Yew and Mr. David Marshall (see page 15558) were held on June 29. Mr. Lee Kuan Yew regained his seat in the Tanjong Pagar constituency, but at Cairnhill the Labour Front lost the seat to a Liberal Socialist, Soh Ghee Soon. This brought the strength of the right-wing Liberal Socialists in the Assembly to seven—the same as that of the Labour Front. (Times)
(Prev. rep. 15557 A.)

A. **UNITED KINGDOM.—Gold and Dollar Reserves. - Further Increase in June - Exchange Control Restrictions on Purchase of Foreign Securities by U.K. Residents. - Closing of the "Kuwait Gap."**

The Treasury announced on July 2 that the sterling area's gold and dollar reserves had risen during June by $36,000,000, after taking into account (*a*) the receipt of $7,000,000 in U.S. defence aid; (*b*) the payment of $16,000,000 to the E.P.U. in respect of the U.K.'s deficit in May; (*c*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral settlements; (*d*) the payment of $8,000,000 to Canada as a quarterly instalment on the Canadian interest-free loan; and (*e*) the payment of $5,000,000 as half-yearly interest on loans from the U.S.A. under the European Recovery Programme. As a result, the gold and dollar reserves stood at $2,381,000,000 on June 30—the highest figure reached since July 31, 1956.

It was also stated that India had withdrawn $72,500,000 from the International Monetary Fund during the month. Although the amount of dollars transferred by India to the sterling area's gold and dollar reserves against payment in sterling was not announced, it was stated in the British press that the rise of £20,000,000 in India's sterling reserves between June 7 and 14 indicated that most of the dollars had been deposited in London against sterling, so that the Indian drawing of dollars seemed to have been mainly responsible for the increase in the sterling area's gold and dollar reserves during the month of June

Provisional figures for the E.P.U. June settlement showed that Britain had a deficit of £10,000,000, three-quarters of which would be settled in gold or dollars and the remaining quarter by an increase in the United Kingdom's debt to the European Payments Union.

The Chancellor of the Exchequer (Mr. Thorneycroft), announced in a written reply on July 5 that, in order to stop a "leak" in the gold and dollar reserves, restrictions had been reimposed on the purchase of dollar and other foreign securities by U.K. investors.

Mr. Thorneycroft said that U.K. residents would remain free to buy foreign currency securities already in the possession of other U.K. residents. Hitherto, they had also been able to acquire such securities legally from residents in other parts of the sterling area, and this had led to transactions in these securities by residents of those parts of the sterling area where free markets existed. "While any additions to private holdings of foreign currency securities in the U.K. increase our current overseas income," he added, "the capital cost falls on the reserves, and I am not willing to let this continue. I have therefore decided to control the acquisition of foreign currency securities by U.K. residents, directions to this effect having come into force at midnight on July 4."

It was pointed out in the Press that the leaks in the reserves had occurred because of arbitrage operations with other parts of the sterling area, e.g. Kuwait and Hongkong, where exchange controls were less rigorously enforced than in Britain.

In this way it had been possible for international arbitrage specialists operating through Kuwait, etc., to sell "resident sterling" against dollars at a discount in the local free markets; to use the dollars to buy dollar securities in the U.S.A. and Canada; and then to sell those securities in London against sterling at a premium. Through such operations the pool of dollar securities available for U.K. residents had been continually increasing, especially in the first half of 1957, when a strong demand for Canadian securities developed. These transactions, especially through the "Kuwait gap," had apparently grown to such proportions that part of the U.K.'s gold and dollar holdings was, in effect, being turned into long-term Canadian and other dollar securities.

A further unfavourable result of these transactions had been that "resident sterling" thus obtained by dollar area residents at cheap rates had been used by them for making certain types of "invisible" payments to the sterling area, e.g. to settle shipping freight charges. In consequence, the demand for sterling against dollars in the official market had been materially reduced.

It was emphasized by the Treasury that the new restrictions should not be interpreted as a retrograde step in the progress of removing exchange controls; that their principal aim was to close a gap in the existing regulations; and that the Government's general policy on oversea investment had not been changed. It was still hoped that investment in Canada, for example, would continue, although it would not for the present be allowed to take the form of security investment.

As a result of the Chancellor's decision, the official premium at which dollar securities stand in London over U.S. and Canadian prices rose on July 5 from about 6¼ per cent to 10½ per cent, and on July 8 to 14 per cent, whilst the rate for "security sterling" (i.e. sterling holdings arising from the sale of sterling assets by non-residents) immediately rose from around $2.60 to $2.71 to the £.—(Treasury Press Office - Times - Financial Times) **(Prev. rep. 15574 C.)**

B. **CIVIL AVIATION. — Agreement between Central African Airways and British Overseas Airways.**

The Federal Minister of Transport and Works (Mr. W. H. Eastwood) announced on May 17 that the Government of Rhodesia and Nyasaland had authorized Central African Airways to enter into a 10-year agreement with the British Overseas Airways Corporation under which B.O.A.C. would provide long-range aircraft on charter for the operation of C.A.A.'s external services between the Federation and the United Kingdom. At the same time the Federal Government had rejected an offer by the British and Commonwealth Shipping Company, in conjunction with Hunting-Clan Air Holdings Ltd., for an option until mid-1960 to acquire a 55 per cent holding in C.A.A.

Mr. Eastwood said that the British and Commonwealth Shipping Company and Hunting-Clan Air Holdings Ltd., in making their offer, had also proposed to meet a substantial portion of any losses incurred by C.A.A. during the option period, and to provide the Federal Government with a loan for purposes of general development. The Federal Government, however, had found that the two firms were unable to depart from the principle of an option, and it had accordingly feared that if the option were not taken up at the end of the period C.A.A.'s financial position might be no better, and possibly worse, than at present. The Government had therefore chosen "the certainty and security" of the charter agreement with B.O.A.C., believing it to have the following advantages: (i) it was "financially attractive, definite and limited"; (ii) the Government would retain the ownership and control of assets in the form of C.A.A; (iii) C.A.A.'s external services would be effectively and profitably operated without the Government being faced with the difficult task of finding large amounts of capital for the purchase of aircraft; and (iv) C.A.A. would be free to concentrate on its chief function—viz., the provision of local and regional services.

The chairman of C.A.A., Mr. Robinson, gave further information about the agreement on the same day:

(*a*) It would come into operation on July 1, when B.O.A.C. *Argonauts* would take over the existing C.A.A. *Viscount* service to London.

(*b*) The *Argonauts* would be replaced by *Britannias* when the latter became available (probably about the middle of 1958) and the *Comet IV* would be introduced on the Salisbury route in 1959.

(*c*) B.O.A.C. had guaranteed to C.A.A. a minimum net profit of £1,750,000 over the ten-year period.

(*d*) The agreement could be suspended if at any time B.O.A.C. found itself unable to provide services in accordance with its obligations.

(*e*) On the expiry of the agreement, C.A.A. would have the right to resume international operations with its own aircraft. Alternatively, the agreement could be extended.

Mr. Robinson subsequently announced that, in contrast to its subsidy of £300,000 for the current financial year, C.A.A. would seek a subsidy of only £150,000 for the following year. He added that the agreement with B.O.A.C. was the main reason for the anticipated improvement in the company's financial position.—(Federal Information Dept., Salisbury - Times) **(Prev. rep. B.O.A.C., 15234 A; C.A.A. 14755 A.)**

C. **UNITED STATES. — Affirmation of Freedom of Navigation in Gulf of Akaba.**

The State Department circulated a statement on June 23 to U.S. shipping companies and masters of U.S.-registered ships affirming the "right of free and innocent passage" for shipping of all nations in the Gulf of Akaba. The statement said that "the U.S. position is that the Gulf of Akaba comprehends international waters" and that "no nation has the right to prevent free and innocent passage in the Gulf and through the straits giving access thereto."

The statement was issued in response to individual inquiries by U.S. shipping companies and shipmasters In an apparent reference to the Arab League's economic blockade of Israel, the State Department gave instructions that "any denial of free and innocent passage through these waters to vessels of U.S. registry" should be reported to the U.S. diplomatic officers at Port Said, Alexandria, Asmara, Jedda, or Aden, or direct to Washington.

The U.S. statement gave great satisfaction in Israel, where a Foreign Ministry spokesman said that the United States had "placed its authority behind the factual situation in the Gulf of Akaba, which is now being used by ships of many nations." (New York Times) **(Prev. rep. 15528 A.)**

D. **INDIA. — Council of Elementary Education.**

An All-India Council of Elementary Education came into being on July 1 with the object of fulfilling Article 45 of the Indian Constitution, which lays down that the State shall provide free and compulsory education for all children up to the age of 14 before 1960. The Council will advise the Government of India, State Governments, and local bodies on all matters relating to elementary education, and will prepare detailed programmes for the expansion and improvement of elementary education in each State of the Indian Union.

(Indian High Commissioner's Office, London)

A. JAPAN. — Mr. Kishi's Visits to Asian Countries and the United States. - Meetings with Asian Premiers and President Eisenhower. - Reduction in U.S. Forces in Japan. - Return of Five Air Bases by 1960.

The Japanese Prime Minister, Mr. Nobosuke Kishi, left Tokio on May 20 for a fortnight's visit to six Asian countries—India, Pakistan, Ceylon, Burma, Siam, and Formosa (Nationalist China) during which he had discussions with the respective Prime Ministers: Mr. Nehru, Mr. Suhrawardy, Mr. Bandaranaike, U Nu, Field-Marshal Pibul Songgram, and Generalissimo Chiang Kai-shek. The tour was the first of its kind to be undertaken by a Japanese Premier since the end of the war.

During his visits to Delhi and Colombo joint declarations were issued with Mr. Nehru and Mr. Bandaranaike appealing for the cessation of nuclear weapon tests and the banning of all atomic and hydrogen weapons. The statements issued at the end of Mr. Kishi's visits to India, Pakistan and Ceylon are summarized below:

Visit to India.

Mr. Kishi had discussions in Delhi from May 23-25 with Mr. Nehru and other Indian Ministers, including Mr. Krishnamachari (Finance Minister) and Mr. Morarji Desai (Minister for Commerce and Industry), and also called upon President Prasad and Vice-President Radhakrishnan. The communiqué issued by Mr. Nehru and Mr. Kishi at the end of the latter's visit stated:

(1) The discussions had covered "a wide range of international issues and questions of special interest to India and Japan," and the two Prime Ministers were "satisfied that their talks have resulted in a better appreciation of each other's views and have strengthened the close and friendly relations which exist between the two countries." The discussions had also shown that "the two countries share a common faith in the democratic way of life"

(2) Mr. Nehru had expressed India's gratification at Japan's admission to the United Nations, and her conviction that Japan's membership "has added to the effectiveness of the U.N. and its constituent organs."

(3) The two Prime Ministers were "convinced that, given goodwill and sincerity, there are no international disputes which cannot be solved in a peaceful manner in accordance with the U.N. Charter and the ten principles of the Bandung Resolution." They had reaffirmed "the dedication of their countries to the cause of peace, both in the interests of the two countries and in those of the world."

(4) The Prime Ministers had given "anxious and particular consideration to one of the gravest and most urgent problems which faces the world today—the threat to the whole future of mankind posed by the application of nuclear and thermo-nuclear power to the production of weapons of mass destruction." After saying that "humanity would in all probability face the risk of total extinction" if such weapons were used in war, and referring to the "harmful and unpredictable effects on mankind of the radiation caused by the continuing explosions of nuclear and thermo-nuclear weapons for test purposes," Mr. Nehru and Mr. Kishi made "an earnest and urgent appeal for the immediate suspension of these test explosions." They expressed the hope that the Powers concerned "will reach an agreement on the eventual abandonment of these tests and the prohibition of all nuclear and thermo-nuclear weapons."

(5) Mr. Kishi had expressed satisfaction at the successful fulfilment of India's First Five-Year Plan; had evinced "keen interest" in the Second Five-Year Plan; and had promised Japan's "full co-operation in the implementation of this Plan." The two Prime Ministers had had a general discussion on economic collaboration and the development of Indo-Japanese trade.

During Mr. Kishi's visit to Delhi, the Indian and Japanese Governments exchanged ratification instruments of a cultural agreement concluded between the two countries in October last. The agreement, which came into force on May 24, provides for exchanges of professors, students, and members of scientific and cultural institutions, and remains in force for ten years.

Visit to Pakistan.

The communiqué issued by Mr. Suhrawardy and Mr. Kishi after the latter's visit to Karachi (May 25-28) stated:

(1) The two Prime Ministers had reaffirmed their countries' adherence to the principles of the U.N. Charter; had expressed their determination to work for a relaxation of international tension; and were agreed "to accord the maximum possible co-operation to the U.N. in finding a peaceful solution of all unresolved international problems with a view to ensuring lasting peace." They attached "particular importance to the maintenance of security in Asia, being convinced that peace and security in Asia are indispensable to world peace."

(2) Mr. Suhrawardy and Mr. Kishi had also stressed the need for international disarmament, and appealed to all concerned "to bring about speedily the regulation, limitation, control and reduction of all armed forces and armaments, including prohibition of the production, experimentation and use of all weapons of mass destruction, and to establish a system of effective international inspection and control to this end."

(3) Discussions had been held on ways and means of fostering trade between Japan and Pakistan and on economic co-operation between the two countries, "including the question of joint participation in industrial, economic and cultural ventures." In the latter connexion the Prime Ministers had expressed great satisfaction at the conclusion of a cultural agreement between the two countries [see below], "thereby initiating a new chapter in the history of friendly relations between Japan and Pakistan."

The above-mentioned agreement, signed in Karachi on May 27 by Mr. Kishi and Mr. Suhrawardy, was on similar lines to the Indo-Japanese cultural agreement. Like the latter, it provided for exchanges of professors, students, cultural workers, and cultural material (books, periodicals, films, exhibitions, and other media) between the two countries.

Visit to Ceylon.

The communiqué issued by Mr. Bandaranaike and Mr. Kishi after the Japanese Premier's visit to Ceylon (May 28-31) is summarized below:

(1) Both Prime Ministers expressed their full support for the principles of the U.N. Charter and the Bandung Conference, and affirmed their faith "in negotiation based on goodwill as the only effective means of settling disputes between nations." They recognized the importance of the U.N. "as an instrument for securing the ends of world peace."

(2) Discussions had been held on the further strengthening of economic co-operation between Japan and Ceylon. The two Prime Ministers "attach much importance to this subject and believe that still closer collaboration in the fields of economic development and of trade and commerce will greatly conduce to the mutual benefit of their two countries."

(3) After declaring that "effective disarmament is indispensable for world peace," the two Prime Ministers said that "they are strongly of the view that, in the interests of the future of all humanity, the nuclear and thermo-nuclear test explosions being undertaken by certain nations should be abandoned without delay."

(4) "Japan and Ceylon share a common religion, Buddhism, and are linked together by the ties and traditions of a common Buddhist culture. These bonds enable their countries to make a special contribution to the peace and welfare of humanity . . . and the two Prime Ministers affirm their countries' resolve to collaborate in this spirit for the common good."

Mr. Kishi returned to Tokio on June 4 after visits to Rangoon, Bangkok and Taipeh (Formosa). Before leaving Taipeh he said that he had had "intimate talks" with President Chiang Kai-shek and other Chinese Nationalist leaders, and had "found many points of agreement regarding the international situation and Sino-Japanese co-operation."

In all his discussions with the leaders of the countries visited Mr. Kishi laid emphasis on his proposal for an Asian Development Fund, the objects of which he had outlined at a press conference in Colombo. He explained that this Fund would be created by contributions from member-nations of the Colombo Plan; that it would be used to provide capital in the form of long-term interest-loans; and that it would be devoted solely to promoting the economic development of Asian countries. During his visits to Karachi and Colombo he declared that Japan was prepared to assist in the implementation of Pakistan's Five-Year Development Plan and in the economic development of Ceylon, and was ready to make technical assistance available for these purposes. As stated in the Nehru-Kishi communiqué, he also promised Japan's "full co-operation" in India's Second Five-Year Plan.

Visit to United States.

Following his return from his Asian tour, Mr. Kishi paid a visit to the United States from June 19-30, during which he had discussions with President Eisenhower, Mr. Dulles, the Secretaries of the Treasury and Commerce, the Chairman of the Joint Chiefs of Staff, and the president of the Export-Import Bank. A communiqué was issued from the White House on June 21 dealing with the subjects discussed, as summarized below:

After saying that the talks between the President and Mr. Kishi (June 19-21) had been "focused mainly on U.S.-Japanese relations" but had also dealt with "international subjects of mutual concern, especially the situation in Asia," the communiqué went on to mention the subjects discussed, divided into two sections: (*a*) the general principles of U.S.-Japanese co-operation; (*b*) questions affecting U.S.-Japanese relations.

I. Principles of U.S.-Japanese Co-operation.

(1) The President and Mr. Kishi had agreed that "although the dangers of a general war had somewhat receded, international Communism remained a major threat." Accordingly, they had agreed that the free nations should continue to preserve their strength and unity and had "mutually recognized that the deterrent power of the free world had, in recent years, been effective in preventing overt aggression in the Far East and the world."

(2) President Eisenhower and Mr. Kishi had expressed their conviction that "relations between Japan and the United States are entering a new era firmly based on common interests and trust." They had therefore decided that "it would be appropriate to affirm the following principles of co-operation between the two countries":

"(i) Relations between the U.S.A. and Japan rest on a solid foundation of sovereign equality, mutual interest, and co-operation beneficial to both nations. In the years ahead, this relationship will provide a vital element in strengthening the free world.

"(ii) Both nations are dedicated to peace based on liberty and justice in accordance with the principles of the United Nations . . To this end they will support the U.N. and contribute their best efforts to preserve and enhance the unity of the free world. They will oppose the use of force by any nation except in individual or collective self-defence as provided in the U.N. Charter.

"(iii) In the interests of continued peace, the free world must maintain its defensive capability until armaments are brought under effective control. Meanwhile, the free nations need to intensify their efforts to foster the conditions necessary for economic and social progress and for strengthening freedom in Asia and throughout the world. Free Asian nations which desire assistance should be aided in carrying forward measures for economic development and technical training.

"(iv) The U.S.A. and Japan reaffirm the desirability of a high level of world trade beneficial to free nations, and of orderly trade between the two countries without unnecessary and arbitrary restrictions.

"(v) The two countries fully agree that an effective international agreement for the reduction of armaments, both nuclear and conventional, is of crucial importance for the future of the world. They will continue in close consultation on this important problem."

The communiqué added: "Within the context of these principles the President and the Prime Minister reviewed the great changes which have taken place in Japan in recent years, including Japan's extensive economic recovery and admission to the U.N., both of which the President warmly welcomed."

II. U.S.-Japanese Relations.

(1) It had been agreed to set up an inter-governmental committee to study problems arising out of the U.S.-Japanese Mutual Security Treaty of 1951 [see 11724 A], "including consultation, whenever practicable, regarding the disposition and employment in Japan by the United States of its forces."

(2) President Eisenhower and Mr. Kishi had "affirmed their understanding" that the 1951 treaty was "designed to be transitional in character and not in that form to remain in perpetuity." The inter-governmental committee would "consider future adjustments in the relationships between the U.S.A. and Japan in these fields adequate to meet the needs and aspirations of the peoples of both countries."

(3) The U.S.A. welcomed Japan's plans for the build-up of her defence forces and would "substantially reduce the number of U.S. forces in Japan within the next year, including a prompt withdrawal of the U.S. ground combat forces." Further reductions would be carried out *pari passu* with the growth of the Japanese defence forces.

(4) President Eisenhower, "while recognizing that Japan must trade to live," had "stressed the continuing need for control of exports of strategic materials to those countries threatening the independence of free nations through the extension of international Communism." Mr. Kishi, "while agreeing with the need for such control in co-operation with other free-world Governments," had "pointed to the necessity for Japan to increase its trade."

(5) Mr. Kishi had "emphasized the strong desire of the Japanese people for the return of the Ryukyu and Bonin Islands to Japan." The President had "reaffirmed the U.S. position that Japan possesses residual sovereignty over these islands" but had pointed out that "so long as conditions of threat and tension exist in the Far East, the U.S.A. will find it necessary to continue the present status." Meanwhile the U.S.A. would "continue its policy of improving the welfare and well-being of the inhabitants of the islands and of promoting their economic and cultural advancement."

(6) In a lengthy discussion of U.S.-Japanese economic and trade relations, the President and Mr. Kishi had "mutually confirmed not only the desire for a high level of trade but also the need for close relations between the two countries in other economic fields." Mr. Kishi, while expressing his "deep concern" at certain import restrictions in the U.S.A., had explained that "in consideration of the predominant importance of the U.S. market for Japanese trade, Japan is taking measures for an orderly development of her exports to the United States." The President had confirmed that the U.S. Government would "maintain its traditional policy of a high level of trade without unnecessary and arbitrary restrictions" and had expressed his hope for "the removal of local restrictions on the sale of Japanese products."

(7) Mr. Kishi had described his Asian tour, had spoken of the "serious efforts toward economic development" which were being made in the countries visited, and had "expressed his conviction that further progress in the economic development of these countries would greatly contribute to stability and freedom in Asia." The President had expressed his full agreement with these views and had discussed with Mr. Kishi "ways in which free Asian countries might be further assisted in developing their economies."

(8) The President and Mr. Kishi had discussed "the early cessation of both the testing and manufacture of nuclear weapons as part of a first step in a safeguarded disarmament programme." President Eisenhower had told the Japanese Prime Minister that the latter's views would be taken into account "in formulating the U.S. position at the current U.N. disarmament session in London."

Mr. Kishi visited New York, Los Angeles and other American cities before returning to Tokio.

Reduction in U.S. Forces in Japan. - Return of Air Bases by 1960.

The U.S. Defence Secretary (Mr. Wilson) announced on June 27 that 25,000-30,000 American troops would be withdrawn from Japan by the end of the year in accordance with the agreement reached between President Eisenhower and Mr. Kishi during the Washington discussions.

On June 16 the Japanese Defence Board had announced that five U.S. air bases in Japan, together with 24 radar stations, would be returned to Japanese control by 1960 under an agreement between the U.S. and Japanese authorities. Two of the air bases—Tsuiki and Miho, in Central Japan—would be handed over to the Japanese Air Force within one month.—(New York Times - New York Herald Tribune - The Statesman, Calcutta - The Hindu, Madras - Indian and Pakistani High Commissioners' Offices, London - Ceylon Government Information Department, Colombo)

(Prev. rep. Mr. Kishi, 15540 A; 15456 C.)

A. RHODESIA AND NYASALAND FEDERATION. — Four-year Development Plan.

A four-year development plan covering the period 1957 to 1961, and envisaging total expenditure of £137,660,000, was presented to the Federal Parliament on June 27 by Sir Malcolm Barrow, the acting Prime Minister. Of the total planned investment, over £117,000,000 (85 per cent) was for economic services, the total being divided as follows:

Power—over £60,000,000, the largest item being £54,000,000 for the Kariba project.

Railways—£38,750,000 for Rhodesia Railways, including over £19,000,000 on locomotives and rolling-stock, nearly £9,000,000 on traffic and operating facilities and water supplies, and over £7,000,000 on staff housing.

Posts and Telecommunications—£7,369,000.

Roads and Bridges—£6,406,000, including the completion of the Bulawayo-Beit Bridge road and work on the Salisbury-Chirundu and Bulawayo-Victoria Falls roads.

Southern Rhodesian Electricity Supply Commission—£5,600,000, covering mainly the replacement and development of transmission lines.

Education—£5,680,000.

Health Services—£5,600,000.

The balance of the expenditure related to housing for civil servants in Northern Rhodesia and Nyasaland (£1,250,000); bush-clearing around the new Kariba Lake (£1,000,000); preparation of fishing grounds in Kariba Lake (£3,000,000); and civil aviation, including a new airport at Bulawayo (£1,018,000).

Estimated resources totalled £96,757,000, leaving £40,930,000 to be borrowed by the Federal Government over the next four years. In addition to nearly £15,000,000 to be transferred from revenue votes, income-tax proceeds from the copper price when it was over £240 a ton were expected to yield £7,100,000, and loan recoveries £4,505,000; £54,081,000 had already been secured by special loans for the Kariba project (see 15136 A), while Rhodesia Railways would provide £17,850,000 out of its own resources and from revenue votes.—(Federal Information Department, Salisbury - Financial Times)

(Prev. rep. 15423 D; 13734 A.)

B. FRANCE - UNITED KINGDOM. — Unveiling of the Dunkirk Memorial.

A memorial to 4,700 soldiers of the British Expeditionary Force who gave their lives in France and Belgium in the campaign of 1939-40, and who have no known grave, was unveiled at Dunkirk on June 29 by Queen Elizabeth the Queen Mother.

The unveiling ceremony was performed in the presence of General Ganeval (representing President Coty), the Duke of Gloucester (president of the Imperial War Graves Commission), General Sir Gerald Templer (Chief of Imperial General Staff), and British military leaders of the Second World War, among them Field-Marshal Viscount Montgomery, Field-Marshal Earl Alexander, and General Sir Brian Horrocks. Some 2,000 relatives of those commemorated—mothers, wives and children—were present in a pilgrimage organized by the British Legion and led by its president, Sir Ian Fraser, M.P., who was blinded in the First World War. In addition, the ceremony was attended by many survivors of the 1939-40 campaign, by captains and crews of the "little ships" which evacuated 350,000 British and French troops from the beaches of Dunkirk, and by representatives of the French Resistance movement. All the armed forces were represented, together with the Merchant Navy.

The memorial, designed by Mr. P. D. Hepworth for the Imperial War Graves Commission, is in the form of an avenue of engraved columns on which the names of those commemorated are inscribed. The avenue leads to a shrine where a huge window depicts the battle on the Dunkirk beaches.

A. RUMANIA. — Party and Government Changes. - Dismissal of M. Chisinevschi and M. Constantinescu.

The Rumanian News Agency (Agerpres) announced on July 4 that the Central Committee of the Rumanian Workers' (Communist) Party had dismissed M. Josip Chisinevschi from the post of secretary of the Central Committee, and that both he and M. Miron Constantinescu had been relieved of their membership of the Politburo. A subsequent announcement on July 9 accused both men of "fractionalism" and "anti-party activities," of advocating policies which would have led to the weakening of party unity, and of supporting the "rightist" and "deviationist" policies of Mme. Ana Pauker and Vassili Luca, who had been dismissed in 1952 (see 12330 C, 12272 A).

M. Chisinevschi (52), for many years one of the most influential members of the party, had been a Deputy Premier from 1950 to 1955, when he was appointed Second Secretary of the party in the governmental and party changes announced at that time (see 14479 B). M. Constantinescu (40), an economist, holds a professorial chair at the University of Bucharest and was formerly editor of the party newspaper *Scanteia*. At the time of his dismissal from the Politburo he held the portfolio of Education and Culture.

M. Chisinevschi and M. Constantinescu were regarded as belonging to the "Stalinist" wing of the Rumanian Workers' Party. Their dismissal was announced within 24 hours of the similar action taken in the U.S.S.R. against M. Molotov, M. Malenkov and M. Kaganovich (see 15639 A), the charges against them being similar to those brought against the Soviet "anti-party group."

It was further announced on July 14 (*a*) that M. Ion Gheorghe Maurer had succeeded M. Preoteasa as Foreign Minister; (*b*) that M. Anastase Stoica had become Minister of Education and Culture *vice* M. Constantinescu; and (*c*) that M. Preoteasa had been appointed a candidate (alternate) member of the Politburo and secretary of the Central Committee of the Rumanian Workers' Party. The new Foreign Minister had been appointed vice-president of the Grand National Assembly a short time earlier, but had otherwise played no part in political life for the past two years, though he had held various ministerial posts in the earlier Communist governments. He was regarded as a friend and political associate of M. Patrascanu, the former Minister of Justice, who was executed in 1955 on charges of treason. — (Times - Le Monde, Paris)

B. JORDAN - UNITED STATES. - U.S. Grants to Jordan for Economic Aid and Military Equipment.

It was announced in Washington and Amman on June 29-30 (*a*) that the U.S. Government would supply the Jordanian Army with military equipment to the value of $10,000,000, and (*b*) that the U.S.A. had made a further grant of $10,000,000 for economic aid to Jordan, additional to the similar sum made available on April 29 (see page 15564, first column). Pointing out that U.S. grants to Jordan since April totalled $30,000,000, the *New York Times* commented: "This establishes the United States as heir to Britain's burden in Jordan, at least financially."

A spokesman of the Jordanian Foreign Ministry said that the $30,000,000 of U.S. aid (over £10,700,000) had been offered and accepted "without strings," and would enable Jordan to cover the deficit of 7,500,000 dinars (about £7,500,000) in her Budget resulting from the failure of Egypt and Syria to pay their agreed contributions in replacement of the former British subsidy. He also pointed out that the military aid had been requested by the Jordanian Government to maintain the level of efficiency of Jordan's armed forces. - (New York Times)

(Prev. rep. U.S. Aid to Jordan, 15561 A.)

C. GREECE - UNITED KINGDOM. — New Ambassadors appointed in London and Athens.

It was announced in Athens on April 11 that M. Mostras who had returned to London as Ambassador after the British Government's decision to release Archbishop Makarios (see page 15475, second column), had resigned from the Greek diplomatic service, no reason being given for his resignation. He was succeeded by M. Giorgios Seferiadis, a well-known Greek poet and writer, who presented letters of credence to Queen Elizabeth II on June 26. M. Seferiadis had been Counsellor at the London Embassy some years earlier, and was later appointed Ambassador in Beirut.

Sir Charles Peake (retiring), who had been British Ambassador in Athens since 1951, was succeeded in that post on April 8 by Sir Roger Allen, Minister at H.M. Embassy in Bonn. (Times - Manchester Guardian) **(Prev. rep. 15469 A.)**

D. INDIA. — Removal of British Statues.

A statement on the Government of India's attitude toward British statues in the country was made by Mr. Nehru in the *Lok Sabha* on May 13, in reply to questions by Mr. P. V. G. Raju, the Socialist leader.

Mr. Nehru recalled that during the period of British rule statues had been put up in various parts of India; some of these might be considered of historic interest, others were artistic, and some might be considered "rather offensive to our national sentiments." He added: "Our general attitude has been first of all to remove such as might be considered offensive without making too much fuss, and in a manner which would not create international ill-will and raise up old questions which are dead and gone. We have removed a fair number of statues from various places, and propose to go on doing so. Those which have historical or artistic significance will be placed in museums." Mr. Nehru confessed that the Government did not know what to do with statues which had neither historic nor artistic importance, adding that "if anybody wants them, we shall make a present of them."

Prior to Mr. Nehru's statement the Socialist Party in Uttar Pradesh had begun an unauthorized campaign to remove British statues from that State in connexion with the centenary of the Indian Mutiny of 1857. On May 11 clashes occurred between the police and a number of demonstrators who were attempting to dismantle a statue of Queen Victoria in a park at Benares; 46 demonstrators were arrested and subsequently brought to trial on charges of wilful damage to property and unlawful assembly, several of them being sentenced to four months' imprisonment. The statue, which had been damaged, was repaired and reinstalled in its place.

Despite Mr. Nehru's statement to the *Lok Sabha*, the Government of Uttar Pradesh gave orders on July 14 that all British statues in the State should be removed by Aug. 15, the tenth anniversary of Indian independence.

The statue of General Sir Alexander Taylor, erected in 1916 at the Mori Gate in Old Delhi, was removed by the civic authorities during the night of June 5-6, quietly and without publicity. It was understood that the statue of General Sir John Nicholson, also in Delhi, would be removed shortly. General Nicholson recaptured Delhi during the Indian Mutiny, while General Taylor (then a captain in the Bengal Engineers) drew up the plan for the assault on the city. (The Statesman, Calcutta - Indian High Commissioner's Office, London)

E. SCIENTIFIC RESEARCH. — Element 102.

The U.K. Atomic Energy Authority announced on July 9 that a team of Swedish, British and U.S. scientists had discovered a new element Element 102 during researches carried out at the Nobel Institute in Stockholm. All previous discoveries of synthetic elements (i.e. elements produced in the cyclotron or "atom-smasher") had been made in the United States, Element 102 being the first to be discovered in Europe.

It was disclosed that the new element had been obtained by bombarding curium (Element 96) with carbon ions in the Nobel Institute's cyclotron. The isotope produced had a half-life of about ten minutes and emitted an alpha-particle of 8,000,000 electron-volts energy when broken down; its atomic weight was probably 253 but this was not yet certain. The new element was believed to have chemical analogies with the rare-earth element ytterbium (Element 70).

The statement added: "The sequence of known elements standing beyond uranium in the atomic table is now: neptunium (element 93), plutonium (94), americium (95), curium (96), berkelium (97), californium (98), einsteinium (99), fermium (100), mendelevium (101), and the new element." [All elements beyond No. 92 (uranium) have been produced artificially by the cyclotron.]

Although no final decision was taken, it was reported that the name "nobellium" was being considered for Element 102 because it had been discovered at the Nobel Institute. Elements 99 and 100, both of which were discovered in 1954 (see 13415 B, 13592 A), were subsequently named einsteinium and fermium respectively, after the late Professor Albert Einstein and the late Professor Enrico Fermi, the famous physicists. Element 101, discovered in 1955 (see 14224 D), was named mendelevium after the 19th-century Russian scientist, Mendelyev.—(Times - Svenska Dagbladet - New York Times)

F. IRAQ. — British Gift of Jet Fighters.

The British Foreign Secretary, Mr. Selwyn Lloyd, announced in the House of Commons on April 17 that H.M. Government had decided to supply five *Hunter* Mark VI jet fighter aircraft to the Iraqi Government as a gift. Mr. Lloyd explained that the gift was made in response to an Iraqi request for help in equipping her Air Force.—(Times) **(Prev. rep. 14137 A.)**

JULY 20—27, 1957

A. HUNGARY. — Political Developments since the Revolution. - M. Imre Nagy deported to Rumania.

A review of the internal situation in Hungary since November last, when the people's uprising was suppressed by the Soviet Army, is given below under cross-headings.

The Aftermath of the Revolt. - Dissolution of Workers' Councils. - Proclamation of Martial Law. - Arrests of Workers' Leaders.

Following the suppression of the Hungarian revolution by the Soviet armed forces, the general strike launched on Oct. 23, 1956 (see 15189 A) continued intermittently throughout November and part of December, resulting in serious losses in production and largely paralysing many mines, factories and industrial establishments. Despite incessant appeals to the workers by the Kadar regime, mingled with threats and promises, it was not until the middle of December that there was a full-scale return to work following the dissolution of the Workers' Councils (see below), the imposition of martial law, and the arrest of a number of workers' leaders.

An indication of the serious economic position of Hungary was given on Nov. 25, 1956, by the Minister of Industry, M. Antal Apro, who said that the loss of production since the uprising amounted to 6,000 million forints (about £200,000,000), that output of electricity was less than half of normal, and that production in the mines had fallen catastrophically, necessitating coal imports from the U.S.S.R., Poland and Czechoslovakia. M. Antal also referred to the breakdown of rail communications as a result of the uprising, gave a warning of inflation and mass unemployment unless there was an immediate full-scale return to work, and threatened workers who were still on strike with dismissal unless they resumed work forthwith.

The Central Workers' Council (the supreme body representing the Hungarian workers, comprising elected delegates of the Workers' Councils set up in all parts of the country during the revolution) presented the following demands to the Kadar regime on Nov. 21: (1) recognition of the National Council as the only negotiating body representing the workers of Hungary; (2) the reinstatement of M. Nagy in a coalition government; (3) the withdrawal of Soviet forces from Hungary; (4) free elections, free political parties, and a free Press and radio; (5) the provision of full and accurate information to the Press; (6) the release of all arrested "freedom fighters," political prisoners, and deportees; (7) open trials of persons against whom criminal charges had been made.

After calling on the Government to start negotiations with the Central Workers' Councils by Nov. 24, the declaration said that the general strike would be called off if official recognition were given to the National Council, but would continue if recognition was withheld. A 48-hour "total strike" was proclaimed on the same day (Nov. 21) after Soviet troops had tried to prevent delegates of the Central Workers' Council from attending a mass meeting in Budapest.

In response to these demands, M. Kadar told a workers' delegation on Nov. 25 that his Government "cannot give in and will not be soft," and that it would concern itself with the withdrawal of Soviet troops from Hungary only after "the total destruction of the counter-revolution" and when order was fully restored. Similarly, the question of reconstructing the Government on a coalition basis could only be discussed when these conditions had been fulfilled. As regards M. Nagy's position, M. Kadar asserted that the former Prime Minister had agreed to go to "another socialist country" [see below] "in the interests of his own safety" and that M. Nagy would have been "killed by counter-revolutionary elements as an act of provocation" had he been allowed to return to his home in Budapest. M. Kadar added that M. Nagy's removal to another country did not imply banishment, and that M. Nagy would "not be called to account for his past mistakes."

Further meetings between representatives of the Central Workers' Council and M. Kadar were equally unsuccessful, leading to a warning by the Central Workers' Council on Nov. 29 that the country would be "plunged into anarchy" if the Government continued to reject the workers' demands. Among these demands—all of which were rejected by M. Kadar—were an opportunity for the workers' leaders to meet M. Nagy, the establishment of workers' councils in all branches of production, and permission for the workers to publish their own newspaper.

During the first week of December the mounting anger against the Kadar regime was reflected in a number of clashes between workers and the Government's militia, and an intensification of strike activities. Strong forces of Soviet troops and infantry were called out on Dec. 4 against a mass demonstration of some 30,000 working-class women, many accompanied by children, who forced their way through the Russian columns to heap flowers on the Tomb of the Hungarian Unknown Soldier as a tribute to the dead of the revolution. Several of the women were roughly handled by the Soviet troops, who on one occasion opened fire over the heads of the crowd and wounded a woman demonstrator. On the following day Soviet tanks again appeared in strength when thousands of workers demonstrated against the Kadar regime outside the British and American Legations.

Some 200 workers' leaders were arrested by the Kadar regime during the nights of Dec. 6 and 7, leading to a further wave of anti-government demonstrations and renewed strikes in factories in Budapest, Vesprzem and other centres. The Central Workers' Council issued a declaration on Dec. 7 warning M. Kadar that the continued arrest of workers' leaders would result in "bloodshed and a new national tragedy," and denouncing the Government's "overnight hunts against workers throughout the country." As the Kadar regime had refused to allow the workers to publish their own newspaper, the declaration was circulated to factories, mines and workshops throughout Hungary in the form of an information sheet printed clandestinely.

The declaration complained that the Government, in spite of promises made by M. Kadar, had done nothing to meet the demands of the workers; that meetings of Workers' Councils had been prevented or interrupted "by armed force"; and that police agents had "dragged away leaders and members of the Workers' Councils during the night without investigation or fair hearing, often on the basis of groundless accusations." It emphasized that the arrests, if continued, would make the restoration of normal conditions impossible and would result in the workers losing all confidence in the Government. The proclamation declared *inter alia* that "Janos Kadar apparently does not have the power to oust certain people who are still close to him and who are hated by the workers."

In the morning of Dec. 9, 1956, the Central Workers' Council issued a call for a 48-hour general strike for Dec. 11-12 since the Government had ignored its protests at the arrest of workers' leaders and had thereby "ignored the entire Hungarian working population and its elected representatives." The strike resolution denounced "the campaign conducted against the people and the workers by the Soviet-supported Government of Janos Kadar" and said that M. Kadar was "incapable of leading the Hungarian people out of their tragic situation."

A few hours later the Kadar Government issued an emergency decree ordering the dissolution of all Workers' Councils throughout the country, imposing a state of martial law, and announcing that summary courts would be set up to try persons accused of "incitement to revolt," "jeopardizing production," illegal possession of arms, murder, or looting. The announcement described the Workers' Councils as "strongholds of the counter-revolutionaries," accused them of staging the women's demonstration of Dec. 4 (see above) in order to "cause a blood-bath among the women and then blame it on the Government," and alleged that the worker's leaders were preparing "new plots" against the regime. Armed militia and police occupied the headquarters of the Workers' Councils in Budapest and other cities, and Soviet tanks and infantry were again called out to prevent further demonstrations against the Kadar regime.

Despite the Kadar Government's decree, and there appearance of strong Soviet forces in the streets of Budapest, the call for a 48-hour strike was observed by the workers throughout the country, all factories and mines ceasing production and all forms of transport coming to a standstill. Although the complete cessation of communications during this period cut Hungary off from the outside world, reports from Vienna, and information given by escaping refugees, said that many clashes between the Kadar militia and the workers had occurred in different parts of the country, with casualties on both sides. There were also reports, though unsubstantiated, that a number of Soviet soldiers had been killed in a clash with workers at Szombathely.

After a period of relative quiet, further disorders broke out in Budapest on Jan. 10-11, 1957, when several thousand workers at the Csepel steelworks staged protest demonstrations at reports of large-scale dismissals because of the fuel shortage, and also against the reinstatement of former Rakosi supporters in leading managerial positions in the works. Truckloads of Kadar militiamen sent to the factory were stoned by the demonstrators, several of whom were killed and wounded when the militiamen opened fire. The demonstrations only ceased when Soviet tanks, armoured cars, and lorry-loads of infantry arrived at the factory and sealed it off. [The Csepel steelworkers played an outstanding part during the uprising of October-November last, holding out for several days in the face of powerful forces of Soviet tanks and infantry.]

Repressive Measures of Kadar Government. - Widespread Extension of Death Penalty. - Police Powers of Imprisonment without Trial. - Creation of People's Courts to try "Counter-Revolutionaries."

The suppression of the Workers' Councils and the imposition of martial law were followed by a series of decrees, issued at intervals between December 1956 and June 1957, whereby the Kadar regime in effect destroyed all fundamental rights and reimposed a stringent police dictatorship on the whole country. *Inter alia*, the death penalty was invoked against anyone committing "any kind of offence against the State"; special "people's courts" were set up for the summary trial and execution of "counter-revolutionaries"; and the police were given powers to arrest and detain without trial any individual suspected of "endangering public order." The various decrees are summarized below:

(1) Under a decree of Dec. 20, 1956, the police were given powers to detain for six months, without trial, anyone whose "activities or behaviour endangers public order, especially production." The emphasis on "endangering production" was interpreted abroad as being directed against the strike weapon used by the workers.

(2) The death penalty was introduced on Jan. 13, 1957, for "any kind of offence against the State," including such "offences" as entering a Government factory without permission and distributing leaflets. Other offences which became liable to the death penalty included "sabotage or interference in any way with public utilities and other essential enterprises" and "incitement of the workers." Previously the only offences for which the death penalty was prescribed were murder, manslaughter, and illegal possession of arms.

(3) On the same day (Jan. 13) it was announced that special tribunals would be set up in the provincial capitals for the summary trial of "counter-revolutionaries," with power to impose the death penalty, life imprisonment, or terms of imprisonment from 5 to 15 years. It was stated that all sentences would be subject to appeal to the Supreme Court.

(4) By a decree of March 21, 1957, any persons considered "dangerous to the State or public order, politically unreliable, or economically harmful" could be banished to remote parts of Hungary or placed under police surveillance from a minimum of six months to a maximum of two years. Persons in these categories would not be allowed to leave their homes during certain periods of the day, seek employment, or use the telephone, and would be required to carry identity cards at all times. Only people over 60 years of age and parents with at least two children under the age of 10 were exempted from the scope of the decree.

(5) A decree of June 15, 1957, ordered the setting-up of "people's courts," consisting of a professional judge and four laymen, to accelerate the trials of "counter-revolutionaries" and "political offenders." Defendants were no longer given a free choice of their defending counsel but were required to choose their lawyer from a list of names drawn up by the Ministry of Justice. [It was believed that the chief function of the "people's courts" was to "stiffen" the sentences passed by the special tribunals set up under the decree of Jan. 13, which in a number of cases had shown reluctance to impose the death penalty. In many instances persons who had been sentenced to imprisonment by the tribunals were subsequently sentenced to death by the "people's courts," to whom the cases had been passed for "revision."]

(6) The decree of Dec. 20, 1956 (see above) was amended on July 16, 1957, so that persons whose "activities or behaviour endangers public order" could be detained for an indefinite period, instead of up to two years as previously.

Apart from the dissolution of the Workers' Councils, the Kadar Government ordered on Dec. 4, 1956, the disbanding of the "Revolutionary Committees" set up during the uprising. A number of these committees had continued to function clandestinely in different parts of the country.

Abduction of M. Nagy after Departure from Yugoslav Embassy. - Kadar Government's Violation of Pledge of Safe-conduct. - Yugoslav Protests to Hungary and U.S.S.R. - Deportation of M. Nagy to Rumania.

M. Imre Nagy, who had sought refuge in the Yugoslav Embassy on Nov. 2 with a number of his political associates and their families, left the Embassy on Nov. 22 after M. Kadar had given written and verbal assurances to the Yugoslav Government that he would be allowed to return to his home without molestation. Despite this promise, M. Nagy was abducted by Soviet troops shortly after leaving the Embassy. M. Kadar subsequently announced that M. Nagy had sought permission to go to another "socialist country" and had been allowed to leave Hungary for Rumania. Later reports stated that M. Nagy and his associates were living in the Rumanian health resort of Sinaia.

On Nov. 21 the Yugoslav and Hungarian Governments had reached an agreement, in the form of an exchange of letters, whereby the Hungarian Government confirmed previous verbal guarantees that no action would be taken against M. Nagy or any of his associates "on account of their previous activities," and guaranteeing them a safe and unmolested return to their homes. On the basis of these assurances, M. Nagy, ten of his Ministers and other political associates, and members of their families, comprising 15 women and 17 children in all, left the Embassy on Nov. 22 in a motor-bus made available by the Hungarian authorities. As stated above, they were abducted *en route* by Soviet forces and, according to a broadcast by Budapest Radio, sent to Rumania.

The Hungarian Chargé d'Affaires in Belgrade was summoned to the Yugoslav Foreign Ministry on Nov. 23 and asked for an explanation why M. Nagy and his party had not been allowed to return to their homes, as had been promised by the Hungarian Government in the written agreement of Nov. 21. The Chargé d'Affaires was informed that Hungary's failure to ensure "full implementation" of that agreement would be considered by Yugoslavia as "a flagrant violation not only of the existing friendship between the two countries but also of the generally recognized standards of international law.

On the following day the Yugoslav Government sent a strongly-worded Note to Hungary declaring that it could "under no circumstances" credit the explanation that M. Nagy had gone to Rumania voluntarily, and protesting at the Hungarian Government's "flagrant violation" of its previous assurances that M. Nagy and his party would be allowed to return to their homes in freedom.

The Note said that the Yugoslav Government could not accept the explanation that M. Nagy and his companions had gone to Rumania of their own free will, since M. Nagy himself, while living in the Embassy, had rejected the suggestion that he and his party should go to Rumania and had, in fact, expressed the wish for asylum in Yugoslavia. After recalling that the Yugoslav Government had sent a Note to Hungary on Nov. 18 "concerning the asylum of the men and women concerned," and that the Yugoslav Under-Secretary for Foreign Affairs (M. Vidich) had visited Budapest and had several conversations with M. Kadar on this matter, the Note continued:

"The Yugoslav Government believed that a settlement could be obtained either by guaranteeing the safety of the people concerned and allowing them to return to their homes, or by allowing them to leave Hungary for Yugoslavia. . . M. Kadar, with the authority of his Government, fully accepted the first proposal, as clearly set out in his letter of Nov. 21 to the Yugoslav Government. He said in this letter: 'The Hungarian Government . . . does not wish to punish Imre Nagy and the members of his group for their past activities. We acknowledge that . . . the asylum offered to the group has been brought to an end and that they will leave the Yugoslav Embassy and return freely to their homes. The Hungarian Government **accepts the manner of settlement proposed in the Yugoslav Government's letter . . .**'"

"On the basis of this agreement (the Yugoslav Note continued) Nagy and his friends left the Yugoslav Embassy of their own free will at 4.30 p.m. on Nov. 22, to return to their homes in a bus placed at their disposal by Dr. Ferenc Muennich, the Hungarian Vice-Premier and Minister of Public Security. . . When the party boarded the bus, however, the Soviet military authorities intervened with the request that they should be allowed to take away the people concerned. They boarded the bus in defiance of the energetic protests of the Yugoslav Minister in Budapest. As a result, the Minister sent two Embassy officials with the Nagy party so that they could personally ensure that they were delivered to their own homes. The bus, however, was driven to the Soviet headquarters, where a Soviet lieutenant-colonel forced the two Yugoslavs to leave the bus. In reply to protests by the Yugoslav Military Attaché, he declared that he was carrying out the orders of his command. After that the bus, escorted by Soviet armoured cars, drove away to an unknown destination."

Continuing, the Note said that the Yugoslav Ambassador (M. Soldaditch) had "informed Dr. Muennich by telephone of all that had happened" and had "protested against the obvious violation of the agreement" about M. Nagy and his party. Although Dr. Muennich had "promised to look into the matter," no reply had been forthcoming to the Yugoslav representations. After protesting strongly against Hungary's "flagrant violation" of the agreement, and stressing the fact that this violation had occurred "directly after the agreement had been reached," the Yugoslav Government lodged "a most energetic protest" and called upon the Hungarian Government "to implement immediately" the written agreement of November 21.

The Yugoslav Note to the U.S.S.R. recapitulated the agreement reached between Hungary and Yugoslavia on the question of M. Nagy and his companions, and the manner in which it had been broken. It expressed the Yugoslav Government's "surprise" that the Soviet authorities had intervened to thwart the agreement, and its "expectation" that the Soviet Government would take steps to ensure that the agreement was carried out.

The Hungarian and Soviet replies were not published, but it was understood that the Hungarian Government had maintained that M. Nagy had left for Rumania voluntarily, and had insisted that the matter was solely within Hungarian domestic jurisdiction. The Soviet Government, similarly, was understood to have disclaimed any responsibility and to have

taken the view that the matter was entirely a Hungarian domestic affair. The Yugoslav Government sent another Note to Hungary on Dec. 6 reiterating its demand for the fulfilment of the agreement granting safe-conduct to M. Nagy and his party, and denying that the matter was exclusively within Hungary's internal jurisdiction.

In a broadcast on Nov. 26, 1956, M. Kadar had made a violent attack on M. Nagy, accusing him of having countenanced "a murderous counter-revolution" and of "being under the sway of such reactionaries as Cardinal Mindszenty." After accusing M. Nagy of having "deserted his post" by taking refuge in the Yugoslav Embassy, he added: "Imre Nagy, who legally left the territory of his country by stepping into the Yugoslav Embassy, later asked to leave the country entirely . . . After the Rumanian Government said that it was prepared to give him sanctuary, he and his party left for Rumania on Nov. 23. Despite his grave deeds, we plan no criminal proceedings against him, and we will keep that promise. We do not consider him permanently exiled. But we think it better that he remain outside the country for the time being, because some of the many counter-revolutionaries who are still in hiding might assassinate him and try to place the blame on the Government."

Executions of alleged "Counter-Revolutionaries." - Arrests of Writers, Journalists and Students. - Official Admission of Deportations during the Uprising.

Between December 1956 and July 1957 many Hungarians of both sexes were executed by hanging on charges of "counter-revolutionary" actions during the uprising, the sentences being passed summarily by the tribunals and "people's courts" set up under the decrees mentioned above. Many others were condemned to long terms of imprisonment, including life imprisonment, on similar charges. Although by mid-July the number of death sentences officially admitted by the Kadar regime was given as 105, reports from Hungary indicated that the figure was in fact very much higher.

In certain cases the defendants were tried in public, but in the great majority of cases the Hungarian press gave no details beyond the bare announcement of the names of the persons condemned and their subsequent execution. The victims included people from all walks of life, among them workers, soldiers, students, and journalists, on charges such as illegal possession of arms, organizing strikes, leading armed bands, attacking Russian troops, and sabotaging communications. Some of the leading trials mentioned by the Hungarian press and radio are summarized below:

The principal public trial, lasting from February to the beginning of April, was that of ten defendants on charges of murder, attempted murder, incitement, and concealing arms. Three of the defendants—Miss Ilona Toth (25) and Miklos Gyöngyössi (28), both medical students, and Ferenc Gönczi (26), a locksmith—were sentenced to death after pleading guilty to a charge of killing a wounded member of the A.V.H. in a Budapest hospital; all the other defendants received prison sentences ranging from six months to ten years. They included Gyula Obersovszky (30), a journalist, who was given three years' imprisonment and banned from the journalistic profession for another three years, and Joszef Gali (27), a playwright, who was sentenced to a year's imprisonment. Obersovszky was found guilty of publishing a pamphlet supporting the uprising, and Gali (an invalid whose parents and brothers were gassed by the Nazis at Auschwitz) of writing articles for Obersovszky's publication. Ilona Toth, in giving evidence, said that she had stabbed an A.V.H. man to death after having first attempted to kill him with a hypodermic injection, she also told the court that she had knocked out a Soviet tank with a hand-grenade during the street fighting in Budapest.

All the defendants appealed to the Hungarian Supreme Court, which not only confirmed the death sentences on Ilona Toth, Gyöngyössi and Gonczi, but also passed sentence of death on Obersovzky and Gali, both of whom had received sentences of imprisonment in the lower Court. Another defendant previously sentenced to imprisonment—Ferenc Kovacs, a policeman—was also sentenced to death, and all other defendants had their prison sentences increased. The savagery of the revised sentence on Obersovzky and Gali gave rise to strong protests by writers and artists in all parts of the world, many appeals being made to the Hungarian authorities to reprieve the two men. On June 25 the Hungarian Ministry of Justice announced that the death sentence on Obersovzky had been commuted to life imprisonment, and on Gali to 15 years' imprisonment. The execution of Ilona Toth, Gyóngyossy, Gónczi and Kovacs was announced by Budapest Radio two days later.

Among the numerous executions carried out during the period under review were those of two leaders of the uprising, Joszef Dudas and Colonel Janos Szabo, both of whom were hanged on Jan. 20. Dudas was chairman of the Central Revolutionary Council during the revolt, while Colonel Szabo, second-in-command to Dudas, led a revolutionary fighting battalion. Nothing was known of the fate of General Pal Maleter, who was kidnapped by the Russians while negotiating with them on behalf of the Nagy Government. A British Foreign Office spokesman said on Jan. 24 that General Maleter was believed to have been condemned to death at a secret trial, but the head of the Kadar regime's Press Bureau subsequently announced that proceedings against Maleter had "not yet begun."

Many workers' leaders were arrested during December and in subsequent months, notably M. Sandor Bali and M. Sandor Racz (both members of the Central Workers' Council), whose arrest was announced by Budapest Radio on Dec. 12, 1956, and who were charged with "plotting to overthrow the Government," "misleading the workers," instigating "illegal strikes," giving "false information" to Western journalists in Budapest, and maintaining contacts with Radio Free Europe. M. Bali was released on Dec. 21, but M. Racz remained in custody.

An International Commission of Jurists, consisting of eminent lawyers from 13 countries (Austria, Belgium, Denmark, Finland, France, the German Federal Republic, Great Britain, India, the Netherlands, Norway, Sweden, Switzerland, and the U.S.A.), issued a statement on the Hungarian trials on June 21 from information collected from Hungarian sources.
